NOTICES

COVID-19 NOTICE: Pursuant to the Executive Order N-29-20 and No. N-35-20 from the Executive Department of the State of California and the County of Los Angeles Department of Public Health Safer at Home Order, Council Members may attend City Council meetings via teleconferencing and make public meetings accessible telephonically or electronically to all members of the public seeking to observe and address the City Council. To ensure the health and safety of the public during the local, state, and federally declared COVID-19 Emergency, City Hall Council Chambers will not be open for this meeting, and all public participation must occur telephonically. Consistent with the Executive Order, the City Council meeting will continue to be live streamed and can be watched on the City's website at: www.cityofmontebello.com under the "City Council AGENDAS" tab and clicking the "Live Stream" tab, and may also be viewed on Channel 3.

AMERICANS WITH DISABILITIES ACT: In compliance with the Americans with Disabilities Act (ADA) any person with a disability who requires special accommodations in order to participate in a meeting should contact the Administration Office at (323) 887-1363 Monday-Thursday from 7:30 a.m.-5:30 p.m. Please call 48 hours prior to the meeting to ensure that reasonable arrangements can be made to provide accessibility to this meeting (28 CFR 35.102-35.104 ADA Title II 1203). If you require translation services, please contact the City Clerk's office 24 hours before this meeting.

STATEMENT OF PUBLIC COMMENTS AND PARTICIPATION: Members of the public may address the City Council on any items listed on the Agenda. Anyone wishing to address the City Council on an item not listed on the Agenda (Non-Agenda Items) may do so during the "Public Comments" period. State Law prohibits the City Council from taking action or entertaining extended discussion on a topic not listed on the agenda. In order to conduct a timely meeting, the maximum time allotted for members of the public to speak shall not exceed three (3) minutes per person. "Public Comments" may be limited to 30-minutes, those not accommodated during that time may have an opportunity to speak under "Oral Communications – Continued" after all scheduled matters have been considered. Please show courtesy to others and direct all of your comments to the Mayor.

For those interested in making public comments, you may call up until the day of the meeting, **Wednesday, July 28, 2021 between 7:30 a.m. – 3:30 p.m. at (323) 887-1359**. Staff will complete the speaker cards and the public will be called during the City Council meeting – Closed Session begins at 5:30 p.m. and Regular Session begins at 6:30 p.m. The exact call back time is not predictable due to the nature of the City Council agenda. As a result, you must be available until the end of the meeting to receive a live call from staff during the meeting. The City has also created an email address, ccpubliccomment@cityofmontebello.com, where the public can submit public comments up until the day of the meeting, **Wednesday, July 28, 2021 between 7:30 a.m. – 3:30 p.m.** These comments will be read out loud and submitted for the record. Any requests to provide public comment which is submitted after the deadlines indicated above will not be addressed at the council meeting, with the exception of non-agenda item comments which will be held over to the next regularly scheduled meeting.

AGENDA MATERIALS: The agenda and agenda packet related to items on this agenda are available for public inspection at City's website at: www.cityofmontebello.com under the "City Council AGENDAS" tab and clicking the "Council Agenda" tab. Copies of the agenda cover sheets will be available for pickup at the front and west entrance of City Hall, as well as the north side of the building on Masser Place. Please note that only 10 copies will be distributed between the three locations and will be available for pick up on a first-come, first-served basis. The agenda cover sheets may also be emailed upon request.

IN CONSIDERATION OF OTHERS, PLEASE TURN OFF, OR MUTE, ALL CELL PHONES AND PAGERS
THANK YOU FOR YOUR COOPERATION

OPENING CEREMONIES

REGULAR BUSINESS

15. APPROVE EXECUTION OF A CITY SERVICES REQUEST WITH THE LOS ANGELES COUNTY DEPARTMENT OF PUBLIC WORKS FOR ANNUAL SEWER MAINTENANCE SERVICES (FISCAL YEAR 2021-22) PROVIDED BY THE LOS ANGELES COUNTY CONSOLIDATED SEWER MAINTENANCE DISTRICT

RECOMMENDATION: It is recommended that the City Council:

1) Authorize the City Manager to execute a City Service Request with the Los Angeles County Department of Public Works' Consolidated Sewer Maintenance District (CSMD) in an amount not-to-exceed $600,000 for annual sewer system maintenance services for Fiscal Year 2021-22; and,
2) Amend, the Fiscal Year 2021-22 budget by increasing appropriations by $600,000 in Account No. 100-30-340-6040.10, General Fund, Public Works, Sewer Operations, Other Contract Services; and,
3) Take such additional, related, action that may be desirable.

16. CONSIDER ADOPTING ORDINANCE NO. 2440 A/B SETTING CAMPAIGN CONTRIBUTION LIMITS TO CANDIDATES FOR ELECTIVE CITY OFFICE IN COMPLIANCE WITH AB 571

RECOMMENDATION: It is recommended that the City Council:

1) Adopt Ordinance No. 2440 B establishing a "no limit" campaign contribution limit for candidates for elective City office; or
2) Adopt ordinance No. 2440 A establishing a maximum campaign contribution limit of $5,000 or other amount per year for candidates for elective City office; or

3) Take no action and allow the State default campaign contribution limits to apply to elections for elective City office.

17. REVIEW OF PROPOSED ORDINANCE AMENDING AND RESTATING THE RULES OF ORDER AND PROCEDURE FOR THE CONDUCT OF ALL CITY COUNCIL AND SUCCESSOR AGENCY MEETINGS, PROCEEDINGS, AND BUSINESS

RECOMMENDATION: It is recommended that the City Council:

1) Review and discuss rescinding Resolution Nos. 89-70, 06-22, 11-89, and 19-124 and adopting the proposed Ordinance amending the Rules of Order and Procedure for the Conduct of City Council Meetings at the next regularly scheduled City Council meeting; and
2) Take such additional, related, action that may be desirable.

18. CONSIDERATION OF APPOINTMENT FOR TWO (2) VACANT SEATS ON THE TRAFFIC COMMITTEE

RECOMMENDATION: It is recommended that the City Council:

1) Discuss and make appointments to the Traffic Committee; and
2) Take such additional, related, action that may be desirable.

19. CONSIDERATION OF APPOINTMENT FOR TWO (2) VACANT SEATS ON THE FISCAL ACCOUNTABILITY AND INVESTMENT COMMITTEE

RECOMMENDATION: It is recommended that the City Council:

1) Discuss and make appointments to the Fiscal Accountability and Investment Committee; and
2) Take such additional, related, action that may be desirable.

CONSENT CALENDAR

All matters listed under the Consent Calendar are considered to be routine. Any items a Councilmember wishes to discuss should be designated at this time. All other items, with the exception of an item upon which a member of the public or City Council has requested to speak on, may be approved in a single motion. Such approval will also waive the reading of any ordinance.

20. FUTURE MEETING CANCELLATION

RECOMMENDATION: It is recommended that the City Council:

1) Cancel the regularly scheduled City Council meeting on September 22, 2021

21. ADOPT RESOLUTION NO. 21-71 IN SUPPORT OF CITY OF SOUTH GATE ANNUAL CONFERENCE CALLING UPON THE GOVERNER AND THE LEGISLATURE TO PROVIDE NECESSARY FUNDING FOR CUPC TO FUFILL ITS OBLIGATION TO INSPECT RAILROAD LINES TO ENSURE THAT OPERATORS ARE REMOVING ILLEGAL DUMPING, GRAFFITI AND HOMELESS ENCAMPMENTS THAT DEGRADE THE QUALITY OF LIFE AND RESULTS IN INCREASED PUBLIC SAFETLY CONCERNS FOR COMMUNITIES AND NEIGHBORHOODS THAT ABUTT THE RAILROAD RIGHT-OF-WAY

RECOMMENDATION: It is recommended that the City Council:

1) Approve the proposed Resolution.
2) Take such additional or alternative action that may be desirable.

22. REPORT OF EMERGENCY SEWER REPAIR AT TAYLOR RANCH PARK BY THE LOS ANGELES COUNTY CONSOLIDATED SEWER MAINTENANCE DISTRICT

RECOMMENDATION: It is recommended that the City Council:

1) Receive and file the City Manager's report of an emergency sewer repair at Taylor Ranch Park by the Los Angeles County Consolidated Sewer Maintenance District pursuant to Montebello Municipal Code Section 3.20.140 and Public Contracts Code Section 22050; and
2) Take such additional, related, action that may be desirable.

23. CITYWIDE CATCH BASIN CONNECTOR PIPE SCREEN (CPS) INSERTS INSTALLATION PROJECT (CP NO. 877) - AUTHORIZATION TO ADVERTISE FOR CONSTRUCTION

RECOMMENDATION: It is recommended that the City Council:

1) Approve the Plans, Specifications, and Estimate (PS&E) for the Citywide Catch Basin Connector Pipe Screen (CPS) Inserts Installation Project (CP No. 877); and
2) Authorize the City Clerk to publish the Notice Inviting Bids (Attachment A); and
3) Approve the Notice of Exemption (Attachment B) for the subject project and authorize the City Clerk to file the Notice of Exemption with Los Angeles County Registrar-Recorder; and
4) Approve the Total Project Budget (Attachment C).

24. VARIOUS STREET IMPROVEMENTS PROJECT, CP 872 – NOTICE OF COMPLETION

RECOMMENDATION: It is recommended that the City Council:

1) Accept the Various Street Improvements Project, (CP 872) – FY 2018-2019 as completed by Sequel Contractors, Inc.; and
2) Approve the final contract amount for Sequel Contractors, Inc. in the amount of $503,967, including change orders; and

3) Authorize the City Clerk to execute, verify and file the Notice of Completion with the Los Angeles County Registrar-Recorder; and
4) Authorize the City Manager to release the retention payment due to Sequel Contractors, Inc. following the mandatory waiting period from the date the Notice of Completion is recorded; and
5) Take such additional, related, action that may be desirable.

25. VARIOUS STREET IMPROVEMENTS PROJECT, CP 873 – NOTICE OF COMPLETION

RECOMMENDATION: It is recommended that the City Council:

1) Accept the Various Street Improvements Project, (CP 873) – FY 2018-2019 as completed by Sequel Contractors, Inc.; and
2) Approve the final contract amount for Sequel Contractors, Inc. in the amount of $759,441; and
3) Authorize the City Clerk to execute, verify and file the Notice of Completion with the Los Angeles Registrar-Recorder; and
4) Authorize the City Manager to release the retention payment due to Sequel Contractors, Inc. following the mandatory waiting period from the date the Notice of Completion is recorded; and
5) Take such additional, related, action that may be desirable.

26. APPROVAL OF THE FISCAL YEAR 2021-22 ANNUAL PLAN FOR THE LOS ANGELES REGION MEASURE W (SAFE, CLEAN WATER PROGRAM) EXPENDITURES

RECOMMENDATION: It is recommended that the City Council:

1) Approve the Fiscal Year 2021-22 Annual Plan for Los Angeles Region Measure W (Attachment A) that programs expenditures for the fiscal year.

27. ADOPT RESOLUTION NO. 21-58 APPROVING THE LIST OF PROJECTS FOR FISCAL YEAR 2021-22 FUNDED BY SENATE BILL 1 – THE ROAD REPAIR AND ACCOUNTABILITY ACT OF 2017

RECOMMENDATION: It is recommended that the City Council:

1) Adopt Resolution No. 21-58 Approving the List of Projects for Fiscal Year 2021-22 Funded by Senate Bill 1 – The Road Repair and Accountability Act of 2017.

28. SECOND READING OF ORDINANCE NO. 2439 FOR THE AMENDED AND RESTATED STATUTORY DEVELOPMENT AGREEMENT WITH M&M AT MONTEBELLO, LLC, A CALIFORNIA LIMITED LIABILITY COMPANY FOR THE PROPERTY LOCATED AT 1345 N. MONTEBELLO BOULEVARD TO ALLOW THE EXISTING WAREHOUSE STRUCTURE (FORMER COSTCO BUILDING) TO BE USED AS A "LAST-MILE DELIVERY FACILITY" (SUCH AS AMAZON) AND RESERVING THE REMAINDER OF THE PROPERTY (COMPRISED OF APPROXIMATELY 3.63 ACRES) FOR A FUTURE MIXED-USE RETAIL AND/OR RESIDENTIAL DEVELOPMENT

WITH PARKING FACILITIES THAT WILL BE SUBJECT TO AND CONDITIONED UPON FUTURE ENVIRONMENTAL ANALYSES AND DISCRETIONARY LAND USE APPROVALS BY THE CITY

RECOMMENDATION: It is recommended that the City Council:

1) Hold the second reading of Ordinance No. 2439 approving an Amended and Restated Statutory Development Agreement by and between the City of Montebello ("City") and M&M at Montebello, LLC, a California limited liability company to allow the existing warehouse structure (former Costco building) to be used as a "Last-Mile Delivery Facility" (such as Amazon) and reserving the remainder of the subject property for a future mixed-use retail and/or residential development with parking facilities that will be subject to and conditioned upon future environmental analyses and discretionary land use approvals by the City; and
2) Take such additional, related, action that may be desirable.

29. ADOPT CITY RESOLUTION NO. 21-62/SUCCESSOR AGENCY RESOLUTION NO. 21-01 APPROVING THE PURCHASE AND SALE AGREEMENT FOR THE PROPOSED DISPOSITION OF REAL PROPERTY LOCATED AT 310 W. WHITTIER BOULEVARD AND AUTHORIZING THE CITY MANAGER TO EXECUTE THE PURCHASE AND SALE AGREEMENT ON BEHALF OF THE CITY OF MONTEBELLO; ADOPT CITY RESOLUTION NO. 21-63/SUCCESSOR AGENCY RESOLUTION NO. 21-02 PURSUANT TO SURPLUS LAND ACT

RECOMMENDATION: It is recommended that the City Council / Successor Agency to the former Community Redevelopment Agency of the City of Montebello adopt City Resolution No. 21-6/Successor Agency Resolution No. 21-01:

1) Approving the Successor Agency's disposition of the real property located at 310 W. Whittier Boulevard in the City of Montebello, California identified as Los Angeles County Assessor's Parcel Nos. 6346-022-900, 6346-022-901, 6346-023-900, and 6346-023-901 for $8,300,000; and
2) Approving the form and material terms of the Purchase and Sale Agreement, and authorize the Executive Director (i.e. City Manager) and Agency Counsel (i.e. City Attorney) to finalize negotiations and the agreement (provided that no material changes to the purchase price or property are made); and
3) Authorize the Executive Director to execute the final Purchase and Sale Agreement between the Successor Agency to the Redevelopment Agency of the City of Montebello and Sonic Vet LLC, and any related documents necessary to reasonably complete the proposed disposition in accordance with the final agreement; and
4) Take such additional, related, action that may be necessary to implement the approved transaction.

30. APPROVE FIFTH AMENDMENT TO AND REINSTATEMENT OF THE MEMORANDUM OF UNDERSTANDING WITH PLAINS EXPLORATION AND PRODUCTION COMPANY (AGREEMENT NO. 2207)

RECOMMENDATION: It is recommended that the City Council:

1) Approving the Fifth Amendment to and Reinstatement of the Memorandum of Understanding (MOU) with Plains Exploration and Production ("PXP") (Agreement No. 2207); and
2) Authorize the City Manager to execute the MOU between the City of Montebello and Plains Exploration and Production ("PXP") and any related documents; and
3) Take such additional, related, action that may be desirable.

31. ADOPT RESOLUTION NO. 21-64 AMENDING THE BUDGET TO THE FISCAL YEAR 2021-2022 ANNUAL ACTION PLAN TO INCORPORATE ADDITIONAL COMMUNITY DEVELOPMENT BLOCK GRANT (CDBG) FUNDING

RECOMMENDATION: It is recommended that the City Council:

1) Adopt Resolution No. 21-64 amending the budget to the Fiscal Year 2021-22 Community Development Block Grant (CDBG) and Home Investment Partnerships Annual Action Plan to incorporate additional CDBG funding; and
2) Take such additional, related action that may be desirable.

32. APPROVE THREE (3) AMENDMENTS TO COMMERCIAL CANNABIS BUSINESS DEVELOPMENT AGREEMENTS NOS. 3718 (DA 23-19), 3654 (DA 07-19), AND 3721 (DA 27-19)

RECOMMENDATION: It is recommended that the City Council:

1) Approve, in substantially the form as presented, three (3) Amendments to Cannabis Business Development Agreement Nos. 23-19, 07-19, and 27-19 (collectively referred to as the "Amendments") for the operation of commercial cannabis activities in the City of Montebello, and authorize the City Attorney's Office to make final and technical edits or revisions, if any, prior to execution; and
2) Condition the approval of the three (3) Amendments on the respective owner(s) and operator(s) clearing the requisite background checks, providing all exhibits to the development agreement amendments and missing information, if any, to the City of Montebello in a form acceptable to the City Attorney's Office no later than August 27, 2021, and on a case-by-case basis, authorize the Director of Planning and Community Development or his designee i discretion to provide the applicant(s) additional time if necessary in light of the current COVID-19 logistical limitations; and
3) Adopt findings contained herein exempting the three (3) Amendments from further CEQA review under CEQA Section 15301, and direct staff to prepare and file the applicable Notices of Exemption for each project recommended for approval; and
4) Take such additional, related action that may be desirable, and/or provide the City Attorney's office and/or staff with additional or alternative directive(s).

33. ADOPTION OF RESOLUTION NO. 21-66 FOR PARTICIPATION IN THE INSTITUTE FOR LOCAL GOVERNMENT'S BEACON PROGRAM

RECOMMENDATION: It is recommended that the City Council:

1) Adopt Resolution No. 21-66 supporting the City of Montebello's participation in the Institute for Local Government's Beacon Program; and
2) Take such additional, related, action that may be desirable.

34. APPROVAL TO PURCHASE GENERATOR AND BACKUP BATTERY SYSTEM FOR FIRE DEPARTMENT COMMUNICATION SITE

RECOMMENDATION: It is recommended that the City Council:

1) Authorize the City Manager to approve the emergency purchase of a replacement backup generator for the City of Montebello Fire Department's Communication Site located at the Montebello Reservoir; and
2) Forego the formal bidding procedure per Montebello Municipal Code (MMC) 3.20.050, requiring a super-majority (four-fifths) approval by the City Council of this item; and
3) Amend the Fiscal Year 2021-22 budget by increasing appropriations by $128,480 in the General Fund, Account No. 100-85-880-6010.10 (Fire Department, Communications, Machinery and Equipment) and $47,520 in the Transit Fund, Account No. 600-90-900-6010.10 (Transit Administration, Machinery and Equipment); and,
4) Take such additional, related, action that may be desirable.

35. APPROVE ESTABLISHING A SOLE-SOURCE BLANKET PURCHASE ORDER WITH AMERICAN MOVING PARTS, NAPA AUTO PARTS, NEW FLYER PARTS, AND WAYNE ELECTRIC COMPANY TO PURCHASE MAINTENANCE-RELATED BUS PARTS AND VEHICLE FLEET PARTS

RECOMMENDATION: It is recommended that the City Council:

1) Approve establishing a sole-source blanket purchase order with American Moving Parts, for the total not-to-exceed amount of $65,000, to purchase maintenance-related bus parts for Montebello Bus Lines (MBL) and vehicle fleet parts for the Montebello Fire Department (MFD) for Fiscal Year 2021-22; and
2) Approve establishing a sole-source blanket purchase order with Napa Auto Parts, for the total not-to-exceed amount of $85,000, to purchase maintenance-related bus parts for the Fiscal Year 2021-22; and
3) Approve establishing a sole-source blanket purchase order with New Flyer Parts, for the total not-to-exceed amount of $185,000, to purchase maintenance-related bus parts for Fiscal Year 2021-22; and
4) Approve establishing a sole-source blanket purchase order with Wayne Electric Company, for the total not-to-exceed amount of $75,000, to purchase maintenance-related bus parts for the Fiscal Year 2021-22; and
5) Take such additional, related, action that may be desirable.

36. ADOPT RESOLUTION NO. 21-59 AUTHORIZING THE USE OF TRANSIT FUNDING FROM THE AMERICAN RESCUE PLAN ACT TO SUPPORT THE FARELESS SYSTEM INITIATIVE PROJECT

RECOMMENDATION: It is recommended that the City Council:

1) Adopt Resolution No. 21-59 authorizing Montebello Bus Lines (MBL) to participate in the Fareless System Initiative Project (FSI); and
2) Authorize the submission of a grant application to the Federal Transit Administration (FTA) to use funding from the American Rescue Plan Act of 2021 (ARPA) to support the FSI; and
3) Take such additional, related, action that may be desirable.

37. APPROVE A SOLE SOURCE PURCHASE WITH ENTERPRISE INTEGRATION PARTNERS, LLC TO RENEW AND PURCHASE INTERNATIONAL BUSINESS MACHINES CORPORATION ANNUAL SOFTWARE SUBSCRIPTION AND SUPPORT LICENSES

RECOMMENDATION: It is recommended that the City Council:

1) Approve a sole source purchase with Enterprise Integration Partners, LLC, (EIP) for the total not-to-exceed amount of $118,757, to renew fifteen (15) and purchase thirty (30) new International Business Machines Corporation (IBM) annual software subscription and support licenses; and
2) Take such additional, related, action that may be desirable.

38. ADOPT RESOLUTION NO. 21-60 AUTHORIZING THE SUBMISSION OF AN APPLICATION TO THE FEDERAL TRANSIT ADMINISTRATION TO RECEIVE CORONAVIRUS RESPONSE AND RELIEF SUPPLEMENTAL APPROPRIATIONS FUNDING FOR TRANSIT OPERATING ASSISTANCE

RECOMMENDATION: It is recommended that the City Council:

1) Adopt Resolution No. 21-60 authorizing the submission of an application to the Federal Transit Administration (FTA) to receive Coronavirus Response and Relief Supplemental Appropriations funding for operating assistance in the amount of $1,000,000 (49 U.S.C. Section 5307 CRRSA Act funding); and
2) Take such additional, related, action that may be desirable.

39. APPROVAL AMENDMENT NO. 1 TO AGREEMENT NO. 3452 WITH ALL CITY MANAGEMENT SERVICES FOR SCHOOL CROSSING GUARD SERVICES

RECOMMENDATION: It is recommended that the City Council:

1) Approve Amendment No. 1 to Agreement No. 3452 with All City Management Services for School Crossing Guard Services; and
2) Authorize the City Manager to execute the amendment on behalf of the City; and
3) Take such additional, related, action that may be desirable.

RECOMMENDATION: Adopt the proposed Resolution approving the Warrant Register dated March 10, 2021.

40. PAYMENT OF BILLS: RESOLUTION NO. 21-71 APPROVING THE CITY WARRANT REGISTER OF DEMANDS DATED JULY 28, 2021

RECOMMENDATION: Adopt the proposed Resolution approving the Warrant Register dated July 28, 2021.

Alicia Fernandez, Deputy City Clerk

ITEM #10

NOTE: This Public Hearing will be continued to the City Council Meeting of August 11, 2021 or at a date thereafter as determined by the City Council.

ITEM # 11

CITY OF MONTEBELLO

CITY COUNCIL AGENDA STAFF REPORT

TO: Honorable Mayor and Members of the City Council

FROM: René Bobadilla, P.E., City Manager

BY: David Sosnowski, Director of Recreation and Community Services

SUBJECT: **Public Hearing to Approve Resolution No. 21-65 to Adopt the Parks Master Plan and Facilities Needs Assessment**

DATE: July 28, 2021

RECOMMENDATION (S):

It is recommended that the City Council:

1) Approve proposed Resolution No. 21-65 to adopt the Parks Master Plan and Facilities Needs Assessment; and

2) Take such additional, related, action that may be desirable.

FISCAL IMPACT

There is no fiscal impact at this time related to this action. The funds appropriated in Fiscal Year 2019-20 have proved sufficient to pay for the work associated with drafting these plans and funds were carried over in FY 2020-21 and to FY 2021-22. Any recommended improvements and/or projects will be brought back to the appropriate Commission and/or City Council at the time of project initiation to discuss costs and budgets.

BACKGROUND

The purpose of the Park Facilities Master Plan ("Master Plan") is to serve as a planning and asset management tool for the City of Montebello's parks and open spaces. The Master Plan is done in an effort to improve quality of life for current and future residents by compiling strategies to sustain and enhance the current park system. The Master Plan aids in providing an understanding of the recreational and open space assets the City owns and operates, as well as the financial investment it requires to maintain, repair and/or improve these assets.

In addition to managing the City's park system and recreational activities, the Recreation and Community Services Department is also responsible for the

maintenance of City facilities and includes a Building Maintenance Division. The Facilities Needs Assessment ("FNA") expands upon the Master Plan and provides a comprehensive report which includes current and future needs at existing City-owned facilities. The FNA will be useful for future planning of capital improvement projects and current and ongoing maintenance considerations – all of which have budget impacts.

The City's current Park Master Plan was adopted in 1992. Since its adoption, the specific needs and maintenance for the City's parks and facilities have changed over time. The City's park system has been modified, has adapted to changing needs and has had an increase in the number of recreational facilities. In 2016, the City participated in the Los Angeles County Comprehensive Parks and Recreation Needs Assessment, which concluded that many of the City's parks and amenities are in fair to poor condition.

At the September 11, 2019 City Council meeting, City Council approved appropriations necessary to produce a Master Plan and FNA. The approved Resolution #19-108 appropriated $400,000 from the General Fund to cover the estimated cost of developing both documents.

On October 30, 2019 the City issued Request for Proposals (RFP) No. 19-56 (RFP No. 19-56) for development of a new Master Plan and FNA. The scope of work included research and analysis of existing conditions, community outreach, a community needs assessment, an assessment of funding, maintenance and operations feasibility, and the identification of potential park improvements. RFP No. 19-56 also included an additional task to assess the needs of non-park facilities in the FNA. On February 12, 2020, City Council awarded a Professional Services Agreement to KTUA in the amount of $383,749 for the development of a Master Plan and FNA.

ANALYSIS

City staff and KTUA held kick off meetings in early March of 2020 and have continued to have monthly virtual meetings throughout the life of the project. The initial stages of the project included City staff interviews, preliminary assessments of park and non-park facilities, inventory of site conditions and amenities, the establishment of a community outreach strategy, and research. Some aspects of the research included the benchmarking of parks and their amenities against local comparable jurisdictions, as well as assessing the walkability of our park system to determine the ease of access and availability of open space to the community. A website was created to update the community with the project's progress. The website included an interactive map that allowed community members to make comments on specific park areas and/or amenities, provided general updates on the project's status, and gave the public access to recorded presentations, surveys, and maps.

The community outreach aspect of the project began with mailed surveys to approximately 4,500 random households throughout the City. The mailed survey provided statistically valid results on public sentiment on City parks and recreational programming. After mailed surveys were sent out, the survey was made available to

the public on the project website and promoted through the City's social media platforms. Additionally, the survey was advertised through the Recreation and Community Services email list. A total of approximately 400 responses were received.

On July 22, 2020, the City hosted its first virtual community presentation/workshops. A total of four workshops have been held to date from July 2020 through December 2020. Presentations began by providing the public with general information on the purpose, background, and scope of the project.

The Master Plan project scope contains the ability to analyze and plan for three specific park plans. Through public outreach efforts and survey results, it was determined that the three parks that would receive a site-specific plan were Grant Rea Park, City Park and Reggie Rodriguez Park. A workshop was dedicated to discussion of the design and improvements to these parks. Due to the COVID-19 pandemic and gathering restrictions, all presentations were done online, and any interested community member could register to participate. During workshops, participants had the opportunity to ask questions, leave comments and answer poll questions relative to the specific topics provided to drive the discussion towards the wants and needs of the community within the City's existing park system.

The final document includes an analysis and inventory of parks and City facilities, park classifications, a Level of Service analysis, a park distribution analysis, the identification of future opportunities and potential expansion areas, and recommendations, goals, and standards to enhance level of service and quality of existing facilities and programs. The Appendices of the Master Plan document include specific plans for three (3) City parks: Grant Rea Park, Montebello City Park, and Reggie Rodriguez Park, a cost analysis matrix, workshop details, survey results, and the Facility Needs Assessment.

The Master Plan has been presented to the Parks and Recreation Commission and Planning Commission to afford the public the greatest opportunity for review and comment. On June 24, 2021, the Master Plan was presented to the Parks and Recreation Commission for their review. Thereafter, on July 13, 2021, the Planning Commission adopted a Resolution recommending the City Council adopt the Master Plan finding that it conforms to the City's General Plan. On July 15, 2021, the Master Plan was discussed and reviewed a second time at the Parks and Recreation Commission. At all Commission meetings, Master Plan was duly noticed giving the public the ability to submit any comments or questions. Additionally, the entire Master Plan and FNA document was made available to the public on the City website prior to this City Council meeting. The Master Plan is now being brought to City Council for consideration of adoption.

GENERAL PLAN

The City Council is being asked to consider approval of a Resolution to adopt the proposed Master Plan and FNA. The proposed documents conform and remain consistent with the City of Montebello General Plan (specifically, the Parks and

Recreation, Conservation, and Open Spaces Elements).

A. Parks and Recreation Element Goals:

1. To provide a full range of park and recreational facilities and programs which are easily accessible to all residents of the community.
2. To provide 4.0 acres of park and recreational use per 1,000 residents to meet the standards of the City.

B. Conservation Element Goals:

1. Preserve and protect natural, environmental, and man-made resources.
2. Practice sound management in the utilization of the sources for the long-term benefit of the community.

C. Open Space Element Goals:

1. To ensure the preservation and conservation of sufficient open space to introduce relief from otherwise uninterrupted urban development of the Southern California region.
2. To ensure the preservation and conservation of sufficient open space to serve the recreational, health, and welfare needs of the residents.

The Master Plan and FNA conform and remain consistent with the City of Montebello General Plan (specifically, the Parks and Recreation, Conservation, and Open Space Elements). Additionally, KTUA has worked closely with the current General Plan consultants to ensure the final Master Plan document is consistent with the General Plan that is currently underway.

These documents will be used to guide project priorities and funding allocation. Information will also be used for grant submission support.

ENVIRONMENTAL

The adoption of the Master Plan and FNA is not subject to California Environmental Quality Act (CEQA) because CEQA guidelines section 15060(c)(2) states that project is not subject to CEQA review where the activity will not result in a direct or reasonably foreseeable indirect physical change to the environment and is exempt from CEQA pursuant to CEQA Guidelines section 15061(b)(3) which states that a project is exempt from CEQA “where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment.” The Master Plan serves as a planning tool and any recommended improvements and/or projects will be brought back to the appropriate Commission and/or City Council at the time of project initiation.

SUMMARY

The City Council is being asked to consider approving a proposed Resolution to adopt the Parks Master Plan and Facilities Needs Assessment and direct staff to take any such additional, related, action that may be desirable.

RESOLUTION NO. 21-65

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MONTEBELLO, CALIFORNIA, ADOPTING THE PARKS MASTER PLAN AND FACILITIES NEEDS ASSESSEMENT

RECITALS

WHEREAS, the purpose of the Parks Master Plan ("Master Plan") is to serve as a planning and asset management tool for the City of Montebello's ("City") parks and open spaces to improve quality of life for current and future residents by compiling strategies to sustain and enhance the current park system; and

WHEREAS, the Master Plan aids in providing an understanding of the recreational and open space assets the City owns and operates, as well as the financial investment it requires to maintain, repair and/or improve these assets; and

WHEREAS, the Facilities Needs Assessment ("FNA") expands upon the Master Plan provides a comprehensive report which includes current and future needs at existing City-owned facilities; and

WHEREAS, the City's current Parks Master Plan was adopted in 1992 and since its adoption, the specific needs and maintenance for the City's parks and facilities have changed; and

WHEREAS, at the September 11, 2019 City of Montebello City Council ("City Council") meeting, the City Council approved appropriations necessary to develop a new Master Plan and FNA through the adoption of Resolution #19-108, which appropriated $400,000 from the General Fund to cover the estimated cost of developing both planning documents; and

WHEREAS, on October 30, 2019 the City issued Request for Proposals (RFP) No. 19-56 ("RFP No. 19-56") for development of a new Master Plan and FNA including research and analysis of existing conditions, community outreach, a community needs assessment, an assessment of funding, maintenance and operations feasibility, and the identification of potential park improvements; and

WHEREAS, the public was invited to participate and comment on the development of the proposed Master Plan and FNA through a series of public outreach efforts and a total of four presentations from July 2020 through December 2020; and

WHEREAS, a draft of the Master Plan and FNA were released for public review on June 24, 2021; and

WHEREAS, on June 24, 2021 and July 15, 2021, the Parks and Recreation Commission reviewed and discussed the Master Plan and FNA; and

WHEREAS, on July 13, 2021, as the advisory commission to the City Council regarding land use and land-use related matters, the Planning Commission

recommended adoption of the proposed Parks Master Plan and Facilities Needs Assessment to the City Council at a duly noticed public hearing and has considered all public comments received thereon, staff reports, presentations, public testimony, and all other evidence presented during the public hearing on this matter finding that the proposed Master Plan and FNA are consistent with the City's General Plan.

NOW THEREFORE, THE CITY COUNCIL OF THE CITY OF MONTEBELLO HEREBY RESOLVES, FINDS, AND DECLARES AS FOLLOWS:

SECTION 1. RECITALS. The foregoing recitals are true and correct and are hereby incorporated as substantive findings in this Resolution.

SECTION 2. FINDINGS. The proposed planning documents conform and remain consistent with the City of Montebello General Plan (specifically, the Parks and Recreation, Conservation, and Open Spaces Elements):

A. Parks and Recreation Element Goals:

1. To provide a full range of park and recreational facilities and programs which are easily accessible to all residents of the community.
2. To provide 4.0 acres of park and recreational use per 1,000 residents to meet the standards of the City.

The proposed Master Plan and FNA are consistent with the goals of the Parks and Recreational Element of the General Plan in that they put focus on creating recreation services focused around the community, makes recommendations to increase recreational use, and aims to preserve and maintain all existing parks and recreational facilities within the City.

B. Conservation Element Goals:

1. Preserve and protect natural, environmental, and man-made resources.
2. Practice sound management in the utilization of the sources for the long-term benefit of the community.

The proposed Master Plan and FNA are consistent with the goals of the Conservation Element of the General Plan in that they make recommendations to keep open spaces consistent while providing an equitable distribution of park facilities.

C. Open Space Element Goals:

1. To ensure the preservation and conservation of sufficient open space to introduce relief from otherwise uninterrupted urban development of the Southern California region.
2. To ensure the preservation and conservation of sufficient open space to serve the recreational, health, and welfare needs of the residents.

The proposed Master Plan and FNA are consistent with the goals of the Open Space Element of the General Plan in that they promote the preservation and conservation of open space and aim to utilize existing open space for multi-use purposes.

SECTION 3. CEQA. The adoption of the Master Plan and FNA not subject to California Environmental Quality Act (CEQA) because CEQA guidelines section 15060(c)(2) states that project is not subject to CEQA review where the activity will not result in a direct or reasonably foreseeable indirect physical change to the environment and is exempt from CEQA pursuant to CEQA Guidelines section 15061(b)(3) which states that a project is exempt from CEQA "where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment." The Master Plan serves as a planning tool and any recommended improvements and/or projects will be brought back to the appropriate Commission and/or City Council at the time of project initiation.

SECTION 4: APPROVAL. The City Council has considered all public comments received thereon, staff reports, presentations, public testimony, and all other evidence presented during the public hearing on this matter and based on such evidence hereby approves the adoption of the Parks Master Plan and Facilities Needs Assessment.

SECTION 5. That the City Clerk shall certify to the passage and adoption of this Resolution and that the same shall be in full force and effect.

[SIGNATURE PAGE TO FOLLOW]

APPROVED AND ADOPTED this 28th day of July 2021.

CHAPTER 1
Executive Summary

1.1 INTRODUCTION

The City of Montebello Park Facilities Master Plan (Master Plan) is based on a comprehensive planning process that took place from March 2020 through May 2021. This Master Plan provides an assessment of Montebello's parks and playgrounds system, taking into account future growth in the community. The Master Plan is intended to provide a realistic view of the City's parks and facilities as they exist now and as they could evolve into the future.

The City of Montebello is Los Angeles County's 29th most populous city with 63,833 residents. Montebello is approximately 8.3 square miles and is located 10 miles east of downtown Los Angeles, within the triangular intersection of I-5, I-60, and I-605. Montebello has 125 acres of parkland, with 1.3 park acres per 1,000 people. Sixty percent of the population lives within half-mile of a park compared to the county average of forty-nine percent. Grant Rea Park is the largest park with 24.94 acres and is home to batting cages, multiple ball fields, and the Barnyard Zoo (the City's local petting zoo).

The Department of Recreation and Community Services is responsible for providing the community with "innovative social, cultural, recreational, and educational activities to promote and enhance the quality of life in Montebello." The department provides an extended variety of community and recreational services, leisure time activities, and health programs to residents, as well as many neighboring communities. The department also includes the Park Maintenance and Building Division, which is in charge of maintaining the parks and city facilities throughout Montebello.

Montebello's recreation and community facilities consist of two community/recreation center, one senior centers, four mini parks, six neighborhood parks, and two community parks. These park types are defined in detail in Chapter 3 of this Master Plan. Other major recreational amenities include eight baseball fields, seven basketball courts, two tennis courts, six multi-purpose fields, one skate park, two swimming pools, two splash pads, and one gymnasium. Citywide park master plans are usually intended to layout a vision for the future, as well as coherent steps for achieving this vision. The overall citywide master plan is not intended to go into detail on park design, park programming, or park environmental review. However, in this Master Plan, some preliminary design ideas are explored for three parks within the City. No park facility should be constructed from this document without individual park master plans, detailed site plans, engineering, and environmental review. However, this document can be used as a tool to develop plans in the future.

1.2 KEY ISSUES AND REOCCURRING THEMES

Issues regarding parks, recreation facilities, and programs were identified using various methods of input. This included a review of existing plans and documents, stakeholder meetings, inventory of existing facilities, a statistically valid and open link survey, level of services analysis, and various community workshops and presentations. A summary of the information gathered from these sources can be found in Chapter 5 and Appendix III. This information was analyzed, and recommendations were developed to address the following key issues:

Community Survey

- There are concerns about safety and security at the parks.
- Maintenance, repairs, and security improvements are needed throughout the park system.
- More focus on providing family-oriented activities.
- Ensure environmental sustainability in park design and maintenance practice.
- Add more pocket parks/plaza.
- Offer cultural events, festivals, and activities to reflect diversity and inclusivity.
- Ensure facilities and programs are affordable to all residents of Montebello.
- Expand current park amenities and activities.
- Create economic benefit through the attraction of businesses and enhanced property values.
- Increase use of parks resulting from adding infill amenities to existing parks.
- New parks in areas of new growth to address inequities in park access to different areas of the City.
- Add more traditional neighborhood or community parks.
- Expand existing park boundaries.
- Upgrade and retrofit existing facilities throughout the City.
- Add more linear parks that include natural areas with paths.
- Ensure parks and recreation opportunities are accessible to all residents. Encourage active lifestyles and promote health, wellness, and fitness.
- Add more trails and walking areas in or outside of parks.
- Increase use of parks resulting from increased programs and activities.
- Strengthen community image and sense of place.

Staff Interviews:

- Additional staff members would allow the Department to optimize operations and expand programming/services.
- Restroom buildings are a big concern.
- Lack of joint use agreements creates challenges.
- Lighting would help make the parks feel safer and encourage positive park use during the evening.
- The department does not have a scholarship program for recreation programs which limits access for low-income residents. Expand sports programs to include football, soccer, and baseball, additional competitive sports programs, and girls' softball programs.

1.2.1 SUMMARY OF PROGRAM ANALYSIS KEY FINDINGS

According to the input received through the community outreach process, the parks, recreation facilities, and programs are actively used by Montebello's residents. Key issues were identified through stakeholder meetings and interviews, online community workshops, a community survey, a review of existing documents, an inventory, and a geographic distribution analysis. All the information obtained from the sources was analyzed and recommendations were developed to address the following key issues:

- Improve walking and biking connections to parks.
- Preserve open space.
- Create additional trails through open space.
- Make improvements and/or renovate existing amenities of parks.

1.3 RECOMMENDATIONS

After analyzing the findings, community and stakeholder input, inventory of existing facilities, level of service analysis, and analysis of future recreation trends, a series of recommendations were developed to guide the improvement of Montebello's parks, recreation facilities, and programs. Early in the planning process, the team developed three major goals for the project; to **Connect**, to **Improve**, and to **Include**. These broad goals help to organize the overall strategies for the project. A summary of these can be found below:

These goals and strategies represent ideas that have evolved all the way from the beginning of the work effort and that have been influenced by public input, level of service analysis, and other factors since that time. The team used these broad goals and strategies to identify action-oriented objectives and actions which have further fiscal planning impact, operational budget impacts, and timelines to complete. These recommendations can be found in more detail in Chapter 6.

1.4 GLOSSARY OF TERMS

These terms will be found throughout the report and the definitions to these terms are below:

Active recreation: Structured individual or team activity that requires the use of special facilities, courses, fields, or equipment.

Amenity: A physical element that accommodates a recreational activity or sport.

Facility: The built features within parks that create opportunities to engage in specific games and activities. These can range from single courts or small play areas up to the recreation centers which supports a wide variety of self-directed and programmed recreation.

Natural habitat: Native or naturalized plant communities and natural features such as woodlands, riparian corridors, and varied undeveloped landscape, including but not limited to all areas designated as environmentally sensitive habitat areas (EHSA) in the General Plan.

Open space: Any area of land that is essentially unimproved and designated for one or more of the following open space uses: (1) land for the preservation of natural resources; (2) land for the managed production of resources; (3) open space for outdoor recreation; (4) open space for public health and safety; and (5) protection of Native American cultural sites, including burial, historic or archaeological, sacred, or other cultural sites.

Park: Public land for passive or active recreation.

Passive natural area: Areas designated for passive recreation where minimal stress has been done to the site's resources.

Passive recreation: Recreational activities that do not require prepared facilities like sports fields or pavilions.

Playground: A space designed for children to play and explore. It may include playsets, interactive panels, and protective surfacing. The types of parks are defined in detail in Section 3.2 Park Classifications.

Level of Service (LOS): A qualitative measure to relate the quantity of park facilities. This measurement evaluates how parks, open spaces, and facilities serve the given community.

Geographic Distribution Analysis (GDA): Examines the walktime, biketime, and drivetime to the parks and open spaces within the City as determined by a GIS parkshed analysis.

Transit Oriented Development (TOD): A development of residential, businesses, and leisure space within walking distance to a public transportation hub.

1.5 SCOPE OF THE DOCUMENT

The scope of the Master Plan encompasses a summary of the existing planning efforts, inventorying of the existing parks and amenities, projection of future conditions, as well as, a summary of the user and community input, and recommendations for the City. The Master Plan sets the future direction of the parks, playgrounds, and portions of parks and open space with improved facilities in the City of Montebello parks system.

View of Downtown Los Angeles

1.6 OVERVIEW OF THE DOCUMENT

1. Executive Summary – Describes the purpose and goals of the Master Plan, identifies the key issues and recurring themes, and provides a summary of the recommendations.

2. Planning Context – Explains the context of the City of Montebello to California and the U.S., describes the functions of the Park Maintenance and Building Division, and provides an overview of the planning process methodology, as well as a review of past and existing planning documents relevant to the Master Plan.

3. Existing Conditions – Provides analysis and inventory of Montebello's existing park and recreation facilities, a description of each park classification, and a park distribution analysis that includes a Level of Service (LOS) analysis of existing facilities.

4. Community Priorities and Needs – Summarizes the information gathered through community workshops, stakeholder and staff interviews, and invitation and open link surveys. This chapter also includes a comparative analysis of other cities' programs along with a program analysis of the City.

5. Future Conditions – Analyzes the future projection of parks and open spaces in the City. Identifies future recreation trends. Looks into future opportunities and potential expansion areas. This chapter also investigates other population-based service analysis and LOS distribution.

6. Recommendations and Action Plans – Provides recommendations, goals, and standards to enhance the level of service and quality of existing facilities and programs, improve programming and service delivery, and increase financial opportunities.

7. Appendices – Includes the Park Specific Plans for Reggie Rodriguez, Grant Rea, and Montebello City Park, recommendations, operations, maintenance, and financial analysis, meetings and surveys, and the reports from Bureau Veritas.

CHAPTER 2
Planning Context

2.1 HISTORY OF MONTEBELLO

The recorded history of Montebello is tied to the greater history of California and the Franciscan Missionaries. Prior to this era, the Rio Hondo River was occupied by the Tongva Native Americans who were a part of the larger Uto-Aztecan family. On September 9, 1771 Fathers Angel Somera and Pedro Cambon established the original San Gabriel Mission near where San Gabriel Boulevard now crosses the Rio Hondo River. The Mission was fourth in a chain of 21 missions established under Father Junipero Serra.

The City of Montebello originally consisted of parts of Rancho San Antonio, Rancho La Merced, and Rancho Paso de Bartolo. On the banks of the Rio Hondo, an armed conflict was staged with Mexico for possession of California at the Battle of the Rio San Gabriel on January 8, 1847. The Juan Matias Sanchez Adobe remains standing just north of the intersection of La Merced and Lincoln Avenue, the heart of the old La Merced Rancho. The old adobe has just recently been restored and is part of the park system.

About a half-mile north of where Garfield Avenue crosses the Pomona Freeway, Alessandro Repetto built a ranch house on the hill overlooking his land. When Repetto passed in 1885, his brother Antonio sold his inheritance to a group of businessmen well known in Los Angeles. Approximately1,200 acres of these shares would become what is now known as Montebello in May 1899. This area was named Montebello, meaning beautiful hills in Italian.

Originally an agricultural community, the area was famous for flowers, vegetables, berries, and fruits. In 1917 the discovery of oil by Standard Oil Company changed the agricultural community into a major contributor to oil production. By 1920, Montebello oil fields were producing one-eighth of our state's crude oil. On October 16, 1920, Montebello was incorporated as the 35th of the present cities in Los Angeles County. Remnants of the oil fields can still be found in the northern hills of Montebello to this day.

2.2 DEPARTMENT OF RECREATION AND COMMUNITY SERVICES OVERVIEW

The City of Montebello is Los Angeles County's 29th most populous city with 63,833 residents. Montebello is approximately 8.3 square miles and is located 10 miles east of downtown Los Angeles, within the triangular intersection of I-5, I-10, and I-105. Montebello has 84 acres of parkland, with 1.3 park acres per 1,000 people listed as residents in the city using projected current population numbers. Sixty percent of the population lives within half mile of a park compared to the county average of forty-nine percent. Grant Rea park is the largest park with 24.94 acres and is home to batting cages, multiple ball fields, and the Barnyard Zoo, the City's local petting zoo.

The Department of Recreation and Community Services is responsible for providing the community with "innovative social, cultural, recreational, and educational activities to promote and enhance the quality of life in Montebello." The department provides an extended variety of community and recreational services, leisure time activities and healthy programs to residents, as well as many neighboring communities. The department also includes the Park Maintenance Division, which is in charge of maintaining the parks and city facilities throughout Montebello.

2.3 PREVIOUS PLANNING HISTORY FOR PARKS AND RECREATION

The City of Montebello has been operating under the guidelines of the Comprehensive Parks and Recreation Master Plan, which was adopted in 1993, and has since increased the number of parks and infrastructure throughout the City. In 2016, Los Angeles County Conducted a Comprehensive Park and Recreation Needs Assessment, which indicated that the City of Montebello had moderate need for park improvement.

A Municipal Facilities ADA Compliance Evaluation was completed in 2015 and identified 11 City-owned park and recreational facilities that were in need of updates in order to meet ADA standards.

Source: KCET, Title Insurance and Trust, and C.C. Pierce Photography Collection, USC Libraries

2.4 POLICIES AND GUIDANCE FROM OTHER STUDIES

The following plans were reviewed for relevance to this master planning effort and to ensure that all planning efforts were aligned and integrated.

2.4.1 2016 LOS ANGELES COUNTYWIDE COMPREHENSIVE PARK AND RECREATION NEEDS ASSESSMENT (2016)

The Los Angeles Countywide Comprehensive Park and Recreation Needs Assessment documents all existing parks and recreation facilities in cities and unincorporated areas within Los Angeles County. The purpose of this plan is to help local officials, park agencies, and residents understand the steps necessary to ensure all communities have access to parks. According to this assessment, about 60 percent of Montebello residents live within half a mile of a park. The City has 1.3 park acres per 1,000 residents and it has a moderate need for park improvement. A total of ten projects were proposed at a cost upwards of $67.5 million, including:

1 – Replace fitness zones at Henry Acuna Park.

2 – Replace community/recreation center at Taylor Ranch.

3,4, and 5 – Build new community park in southside Montebello.

6 – Add gymnasium at Chet Holifield Park.

7 – Add dog parks at Henry Acuna Park.

8 – Repair infrastructure/general at Taylor Ranch.

9 – Repair pools/aquatic facilities at Chet Holifield Park.

10 – Add trails at Montebello City Park.

2.4.2 CITY OF MONTEBELLO GENERAL PLAN (1973)

The Montebello General Plan is the primary city-wide comprehensive plan that guides future growth. The General Plan was adopted in 1973, but multiple updates have been made since. The General Plan contains goals and objectives that are meant to guide decisions and preserve the quality of life within the City of Montebello. The following summaries and text excerpts reflect the policies that are consistent with the recommendations provided in this plan.

Parks and Recreation Element

The Parks and Recreation Element provides goals and policies relating to parks and recreation and identifies proposed general location and acreage for park and recreational land. This document includes an action program for implementing the Parks and Recreation Plan. Additionally, the Park and Recreation Element puts focus on creating recreation services focused around the community. The goal of this being to have a balanced approach to addressing the park system as a whole to best suit the input of Montebello's residents and community leaders.

Goals

1. To provide a full range of park and recreational facilities and programs which are easily accessible to all residents of the community.
2. To provide 4.0 acres of parks and recreational use per 1,000 residents.

Objectives

1. Provide neighborhood parks and recreational facilities wherever possible within walking distance of all residents.
2. Expand joint-use recreational agreements with the school district.
3. Establish park and recreational space in utility easements where open land is available.
4. Expand recreational use of land in the Rio Hondo Channel area.
5. Establish park and recreational facilities in the hill area.
6. Preserve and expand existing park and recreational facilities.
7. Add park facilities and improve existing park facilities in the South Montebello area.

Policies

1. Preserve and maintain all existing park and recreation facilities within the City.
2. Encourage expanded cooperation and coordination between the School District and the Recreation and Community Services Department for the purpose of formally establishing multi-use recreational opportunities at Montebello's school sites.
3. Wherever possible, acquire the necessary parks and recreational acreage required throughout the City to meet the standard of 4.0 acres of per and recreational use per 1,000 residents.
4. Pursue the goals and objectives for parks and recreation.

Conservation Element

The recommendations of this element are to keep open spaces consistent while providing an equitable distribution of park facilities. This master plan would remain consistent with the existing conservation element.

Goals

1. To ensure the preservation and conservation of sufficient open space to introduce relief from the otherwise uninterrupted development of the Southern California region.
2. To ensure the preservation and conservation of sufficient space to serve the recreation, health, and welfare needs of the residents.

Objectives

1. Establish standards and criteria for the location and development of open space and parkland.
2. Provide open space and a full range of recreation facilities and programs which are easily accessible to all residents.
3. Determine the location, size and type of recreational facilities and programs on the basis of the needs of the people.

Policies

1. Two hundred (200) acres of land in the hills should be acquired by the City for parks, playgrounds and open space.
2. Open space areas should be provided or developed to serve the needs appropriate to their location.
3. In addition to obtaining new open space areas, the City should seek to make more use or multi-use of the existing open space areas of the community. This program would include recreation use of school playground facilities during non-school hours.

2.5 PARK AND RECREATION POPULATION STANDARDS

In order to determine Montebello's parks and recreation needs, this master plan references the National Recreation and Park Association Survey for national and regional averages of agencies park and recreation facilities. The public park standard suggested in the Parks and Recreation Element is of four acres of park and recreational use per 1,000 residents.

Additional standards suggested in the previous master plan are included in Table 2-1.

TABLE 2-1: Park and Recreation Population Standards from Previous Master Plan

FACILITY	NRPA AVERAGE	ADJACENT CITY AVERAGE	RECOMMENDED STANDARD FOR MONTEBELLO	MONTEBELLO RECREATION DEMAND	CURRENT MONTEBELLO INVENTORY	SURPLUS (DEFICIENCY)
Ball Field	1/2,500	1/7,200	1/5000	12	10	(2)
Soccer Field	1/10,000	1/16,000	1/13,000	5	5	0
Football Field	1/10,000	N/A	1/13,000	5	4*	(1)
Basketball Court	1/5,000	1/12,000	1/8,000	8	7	(1)
Tennis Court	1/2,000	1/7,000	1/5,000	12	6(+21)**	15
Gymnasium	1/10,000	1/34,000	1/25,000	2	0	(2)
Community Center	No Standard	1/20,000	1/20,000	3	0	(3)
Swimming Pool	1/20,000	1/34,000	1/27,000	2	2***	(2)
Senior Center	No Standard	1/60,000	1/60,000	1	1****	0

NRPA: National Recreation and Parks Association
Recreation standards are expressed in facilities per population.
**Football fields in Montebello are overlain on ballfields.*
***Tennis courts at city school site are available for public use.*
****Both city swimming pools are dilapidated and in need of replacement.*
*****The Senior Center us currently inadequate and requires expansion.*

2.6 DEMOGRAPHIC PROFILE

Gaining a clear understanding of the existing and projected demographic character of the City is an important component of the planning process for the Master Plan. By analyzing population data, trends emerge that can inform decision making and resource allocation strategies for the provision of public parks, recreation amenities, and open spaces. For example, if the population of young children was steadily on the rise and existing public recreation facilities for young children, such as playgrounds, were barely meeting existing user demand; then the City may want to consider targeting investments to meet the increasing needs of this growing segment of the population.

Key areas were analyzed to identify current demographic statistics and trends that impact the planning and provision of public parks and recreation services in Montebello. Community characteristics analyzed and discussed consist of:

- existing and projected total population;
- age distribution;
- racial and ethnic character;
- household information;

A demographic profile was completed using the most current data available (December 2018) the U.S. Census Bureau data and U.S. Census Bureau's American Community Survey. A summary of demographic highlights is noted in the next page, followed by a more detailed demographic analysis.

The estimated median age of Montebello's residents is 35.7, similar to the median age of California residents(36.4) and that of the United States (38.5). The median age is expected to increase over time for the City. The median household income in Montebello in 2020 was $56,502, lower than the State of California ($77,500) and the United States (62,203).

Montebello's 2020 estimated population is 63,833, a slight increase from the 2010 census count of 62,500. The average annual growth rate between 2010 and 2020 was 2.1 percent, higher than the growth rate of California (0.61%) and the United States (0.75%). The population is fairly evenly split between female (51.3%) and male (48.7%) residents. The population of California and the United States are also roughly evenly divided between both genders.

The racial and ethnic make-up of Montebello is 80.3% Hispanic or Latino, 11.5% Asian alone, 52.9% White alone, 3.8% two or more races, 0.8% Black or African American alone, 0.9% American Indian or Alaska native alone and 30% other race.

CHAPTER 3

Existing Conditions

3.1 EXISTING CITY PARKS AND RECREATION FACILITIES

The City of Montebello prides itself on providing ample high-quality parks and recreation facilities to its citizens. The parks and recreation facility inventory shows that a broad range of passive and active opportunities exist throughout the City. The City of Montebello currently has approximately 125 acres of parkland. This includes 40 acres of mini and neighborhood parks, 39 acres of community parks and centers, and 46 acres of special use and regional park facilities. Please see Figure 3-1 for a map of the existing parks and Table 3-1 for a listing of the park categories and acres.

The current park amenities are analyzed against a ratio of park/recreation amenity per population, typically shown per 1,000 population. Local agencies can adopt their own standards, but often agencies tend to look toward national or regional standards. The park acreage standard was developed as part of the general plan in the Parks and Recreation Element. Recreation facility metrics were developed based on national and regional averages but were tailored to the City of Montebello based on input and local demographics.

TABLE 3-1: Park Category

Park Category	Size	Acres
Mini Parks	< 2 acres	3.05
Neighborhood Park	<2- 8 acres	37.45
Community Parks + Center	> 8 acres	38.70
Special Use + Regional Park		45.86
Total		**125.06**

Acuna Park (6.23 Acres)
0.84 park acres per 1,000

Ashiya Park (7.93 Acres)
1.01 park acres per 1,000

Bicknell Park (5.88 Acres)
3.84 park acres per 1,000

Chet Holifield Park (6.23 Acres)
0.7 park acres per 1,000

Dutcher Tot Lot (0.04 Acres)
0.03 park acres per 1,000

Grant Rea Park (21.80 Acres)
4.64 park acres per 1,000

Montebello City Park (16.53 Acres)
1.3 park acres per 1,000

Montebello Golf Course (45.61)*

Northridge Mini Park (0.26 Acres)
0.05 park acres per 1,000

Potrero Heights Park (1.26 Acres)
1.21 park acres per 1,000

Reggie Rodriguez Park (7.6 Acres)
1.27 park acres per 1,000

Sanchez Adobe Park (1.14 Acres)*

Taylor Ranch Park (3.59 Acres)
0.39 park acres per 1,000

Catherine Hensel Youth Center (0.36 Acres)*

George Hensel Aquatic Center (0.20 Acres)*

Grant Rea Recreation Building (0.1 Acres)*

Holifield Recreation Center (0.07 Acres)*

Potrero Heights Community Center (0.37 Acres)*

Reggie Rodriguez Community Center (0.10 Acres)*

Sanchez Adobe Museum (0.25)*

*Note: Special use facilities do not include park per thousand standard in above list

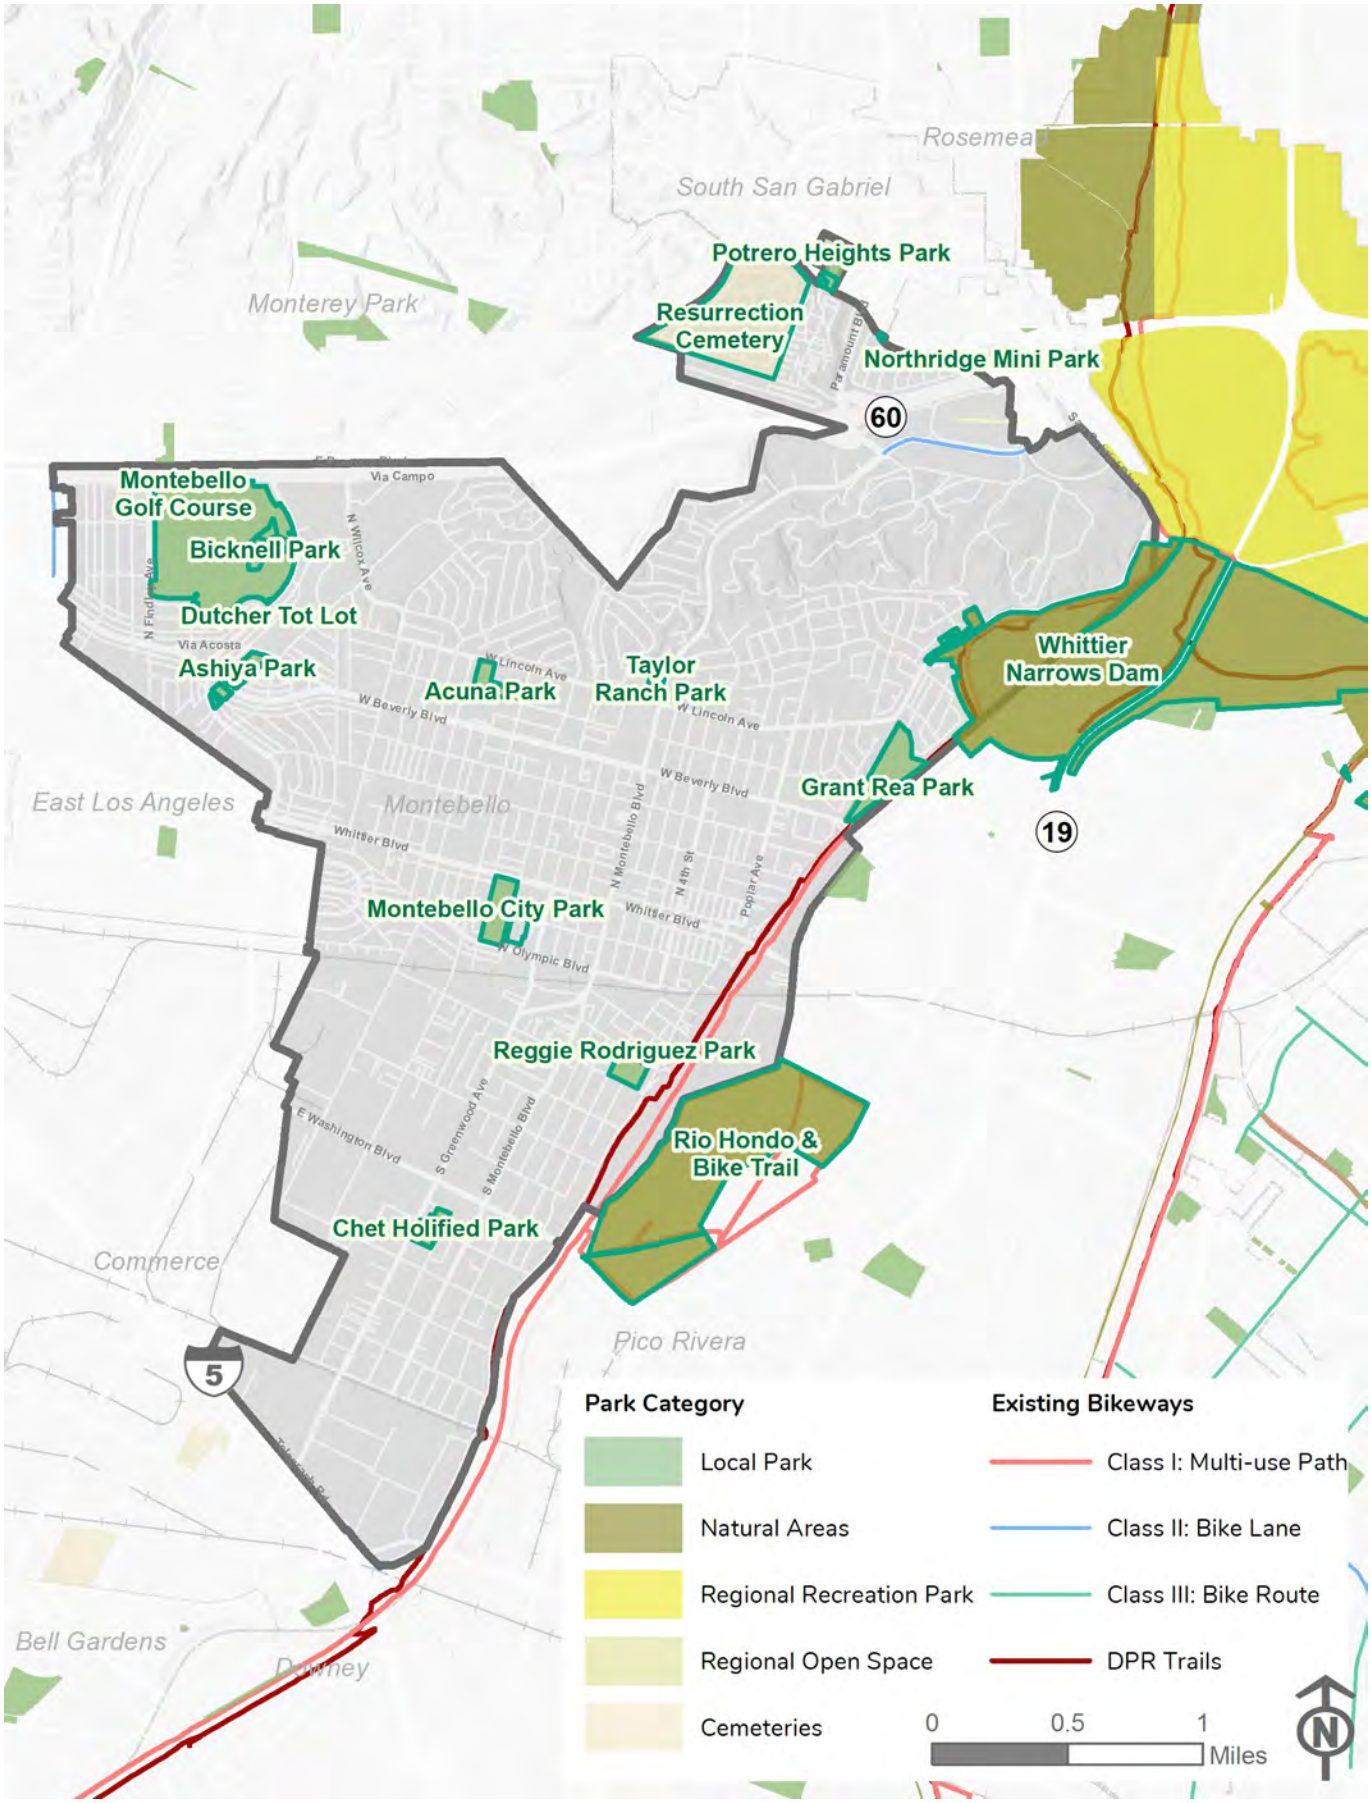

FIGURE 3-1: Existing Parks

3.2 PARK CLASSIFICATIONS

This Master Plan suggests the classification of parks into five categories: Community Centers, Community Parks, Neighborhood Parks, Mini Parks, and Special Use Parks. These categories are based on park acreage and NRPA averages. Table 3-2 breaks down the park type and the typical parkshed distance and walk, bike, and drive time. See Table 3-3 to see the classification of each Montebello park and its acreage.

TABLE 3-2: Park Type

Park Type	Parkshed Distance	Assumed Speed	Parkshed Defined by Primary Mode of Travel in Minutes
Mini/neighborhood Park	0.5 mile	2.5 mph (with signalized crossings slowing to 2 mph)	15 minute walk
Community + Special Park	1 mile	15 mph (12 mph with signals)	5 minute bike
Regional Park / Open Space	2.5 mile	35 mph (30 mph with signals & parking)	5 minute drive

TABLE 3-3: Park Acreage and Type

ID	Park Name	Acre	Park Type
1	Acuna Park	6.23	Neighborhood Park
2	Ashiya Park	7.93	Neighborhood Park
3	Bicknell Park	5.88	Neighborhood Park
4	Chet Holified Park	6.23	Neighborhood Park
5	Dutcher Tot Lot	0.04	Mini Park
6	Grant Rea Park	21.80	Community Park
7	Montebello City Park	16.53	Community Park + Center
8	Montebello Golf Course *	45.61	Special Use Facility
9	Northridge Mini Park	0.26	Mini Park
10	Potrero Heights Park	1.62	Mini Park
11	Reggie Rodriguez Park	7.60	Neighborhood Park
12	Sanchez Adobe Park	1.14	Mini Park
13	Taylor Ranch Park	3.59	Neighborhood Park
14	Catherine Hensel Youth Center	0.36	Community Center
15	George Hensel Aquatic Center	0.20	Community Center
16	Grant Rea Recreation Building	0.10	Community Center
17	Holifield Recreation Center	0.07	Community Center
18	Potrero Heights Community Center	0.37	Community Center
19	Reggie Rodriguez Community Center	0.10	Community Center
20	Sanchez Adobe Museum	0.25	Special Use Facility
	TOTAL	**125.91**	

** Only greens, driving range, clubhouse and parking counted*

3.2.1 MINI-PARK

A mini-park is characterized by its small size and specialized features that serve a small local area or a specific segment of the population, such as children or senior citizens. The following standards apply to mini or pocket parks:

- 2 acres or less.
- Serves residents within a 15-minute walkshed.
- Located near housing and/or other activity centers in the immediate neighborhood.
- Facilities include children's play areas and equipment, exercise and fitness areas, outdoor seating and picnic areas, and plazas.

3.2.2 NEIGHBORHOOD PARK

Neighborhood parks serve nearby residential neighborhoods with recreation facilities for all age groups. The following standards apply to neighborhood parks:

- Less than 10 acres.
- Serve nearby residents within a 15-minute walkshed.
- Easily accessible to the surrounding neighborhood population through safe pedestrian and bicycle access.
- Facilities include playgrounds and associated equipment, picnic tables, open undeveloped areas, lawns or grassy areas for field games, and benches.

They generally do not include citywide facilities like gyms or pools. Neighborhood parks do not require on-site parking, although they may be provided.

2 acre or less

Within 15-min walk

Located near housing and/or other activity centers

Includes children's play areas and equipment, exercise and fitness areas, outdoor seating and picnic areas, and plaza

Less than 10 acres

Within 15-min walk

Easily accessible through safe pedestrian and bicycle access.

Includes playgrounds picnic tables, open undeveloped areas, lawns or grassy areas for field games, and benches

3.2.3 COMMUNITY PARK

Community Parks include developed areas suited for active recreational activities, large natural areas suited for passive outdoor recreation, or a combination of both. These parks may contain special amenities, facilities, or features that attract people from throughout the surrounding community. The following standards apply to community parks:

- 10 acres or more; and
- Serves local residents within a 15 minute walk and community residents in a 5 minute drive; and
- Active facilities include a range of formal and informal athletic fields, tennis courts, play areas, developed picnic areas, and gathering spaces; and
- On-site parking and restroom facilities are provided.

10 acres or more

Within 5- min drive & 15-min walk

Includes both active and passive facilities

On-site parking and restroom facilities may be provided

3.2.4 COMMUNITY CENTER

Community Centers are community buildings that serve all ages and provide a wide range of activities for the community at large. The following standards apply to community centers:

- Serves local residents within a 15 minute walk and community residents in a 5 minute drive
- These facilities provide accommodations for special events, recreation programs, offices, and community services
- On-site parking and restroom facilities may be provided

Within 5- min drive & 15-min walk

On-site parking and restroom facilities may be provided

Includes accommodations for special events, recreation programs, offices, and community services

3.2.5 REGIONAL PARK

Regional Parks (often natural resource pased parks) are parks that are larger than 30 acres, serving the region, and provide a range of activities including passive and active recreation opportunities and often include open space, cultural, and/or natural resources. The following standards apply for regional parks:

- 30 or more acres; and
- Pull visitors from throughout the city and region; and
- Balance of passive and active activities focused on the natural resources and context of the park; and
- Often includes natural, visual, and cultural resources.

3.2.6 SPECIAL USE FACILITY

Special Use Facilities are open spaces in the community that serves the community and the local broader neighborhood. In Montebello, the Montebello Golf Course and the Adobe Sanchez Museum are classified as a special use facility since they provide specalized uses or educational opportunities for the community. Other Special Use Facilities can include schools, adjacent regional parks and recreation facilities, and private recreation facilities.

To classify a school as a special use facility, the City must establish a joint-use agreement with the school district. A joint use agreement would allow the school districts and the City to cooperate to improve facilities and organize, promote, and conduct recreation and education programs for children and adults. If any joint-use school agreement is reached, future plans may count the schools' recreation areas at 50 percent due to the limited amount of time the general public can access them.

Parks, open spaces, and facilities outside of, but adjacent to Montebello include Whittier Narrows, Bosque Del Rio Hondo, Legg Lake, Rio Hondo Park, and Veterans Memorial Park. These facilities lie within the sphere of influence (.5 miles from the City border) and residents of Montebello may use these spaces based on proximity and convenience.

Private recreational facilities include places like Montebello-Commerce YMCA which provides recreational activities that serve the community. Private recreational facilities may also include homeowners association (HOA) parks and amenities which may serve the residents within the HOA neighborhood.

HOA pool and tennis courts

3.3 SCHOOL FACILITIES & OTHER PARKS AND RECREATION FACILITIES OPEN TO THE PUBLIC

The Montebello Unified School District operates eleven schools within the City of Montebello. This includes five elementary schools, two intermediate schools, two high schools, an applied technology center, and a continuation high school. All the schools in the City account for over 100 facilities. These facilities sit vacant during much of the year when school is not in session, allowing for shared facility use if a joint use agreement (JUA) or memorandum of use (MOU) is established. Currently, the City does not have a strong JUA or MOU. Table 3-4 lists all the schools and their amenities that could be available for the public to use. Figure 3-2 shows the Montebello schools and their proximity to parks. The City also has a total of 6 tennis courts and a community pool that's located on the northern end of the City that are located in a private HOA development. These facilities courts are located off of Solano Circle and Taylor Ave; Adelita St.; and Rio Blanco St. Additionally, there's a YMCA community center located on the corner of 20th Street and Beverly Blvd which has a swimming pool and other recreational features.

TABLE 3-4: Montebello School Amenities

Citywide Inventory of Outdoor Recreation Assets at Schools		SUM	Freemont Elementary (Montebello Unified) 1	Greenwood Elementary (Montebello Unified) 2	La Merced Elementary (Montebello Unified) 3	Washington Elementary (Montebello Unified) 4	Wilcox Elementary (Montebello Unified) 5	Eastmont Intermediate (Montebello Unified) 6	La Merced Intermediate (Montebello Unified) 7	Applied Technology Center (Montebello Unified) 8	Montebello High School (Montebello Unified) 9	Schurr High School (Montebello Unified) 10	Vail High School - Continuation (Montebello Unified) 11

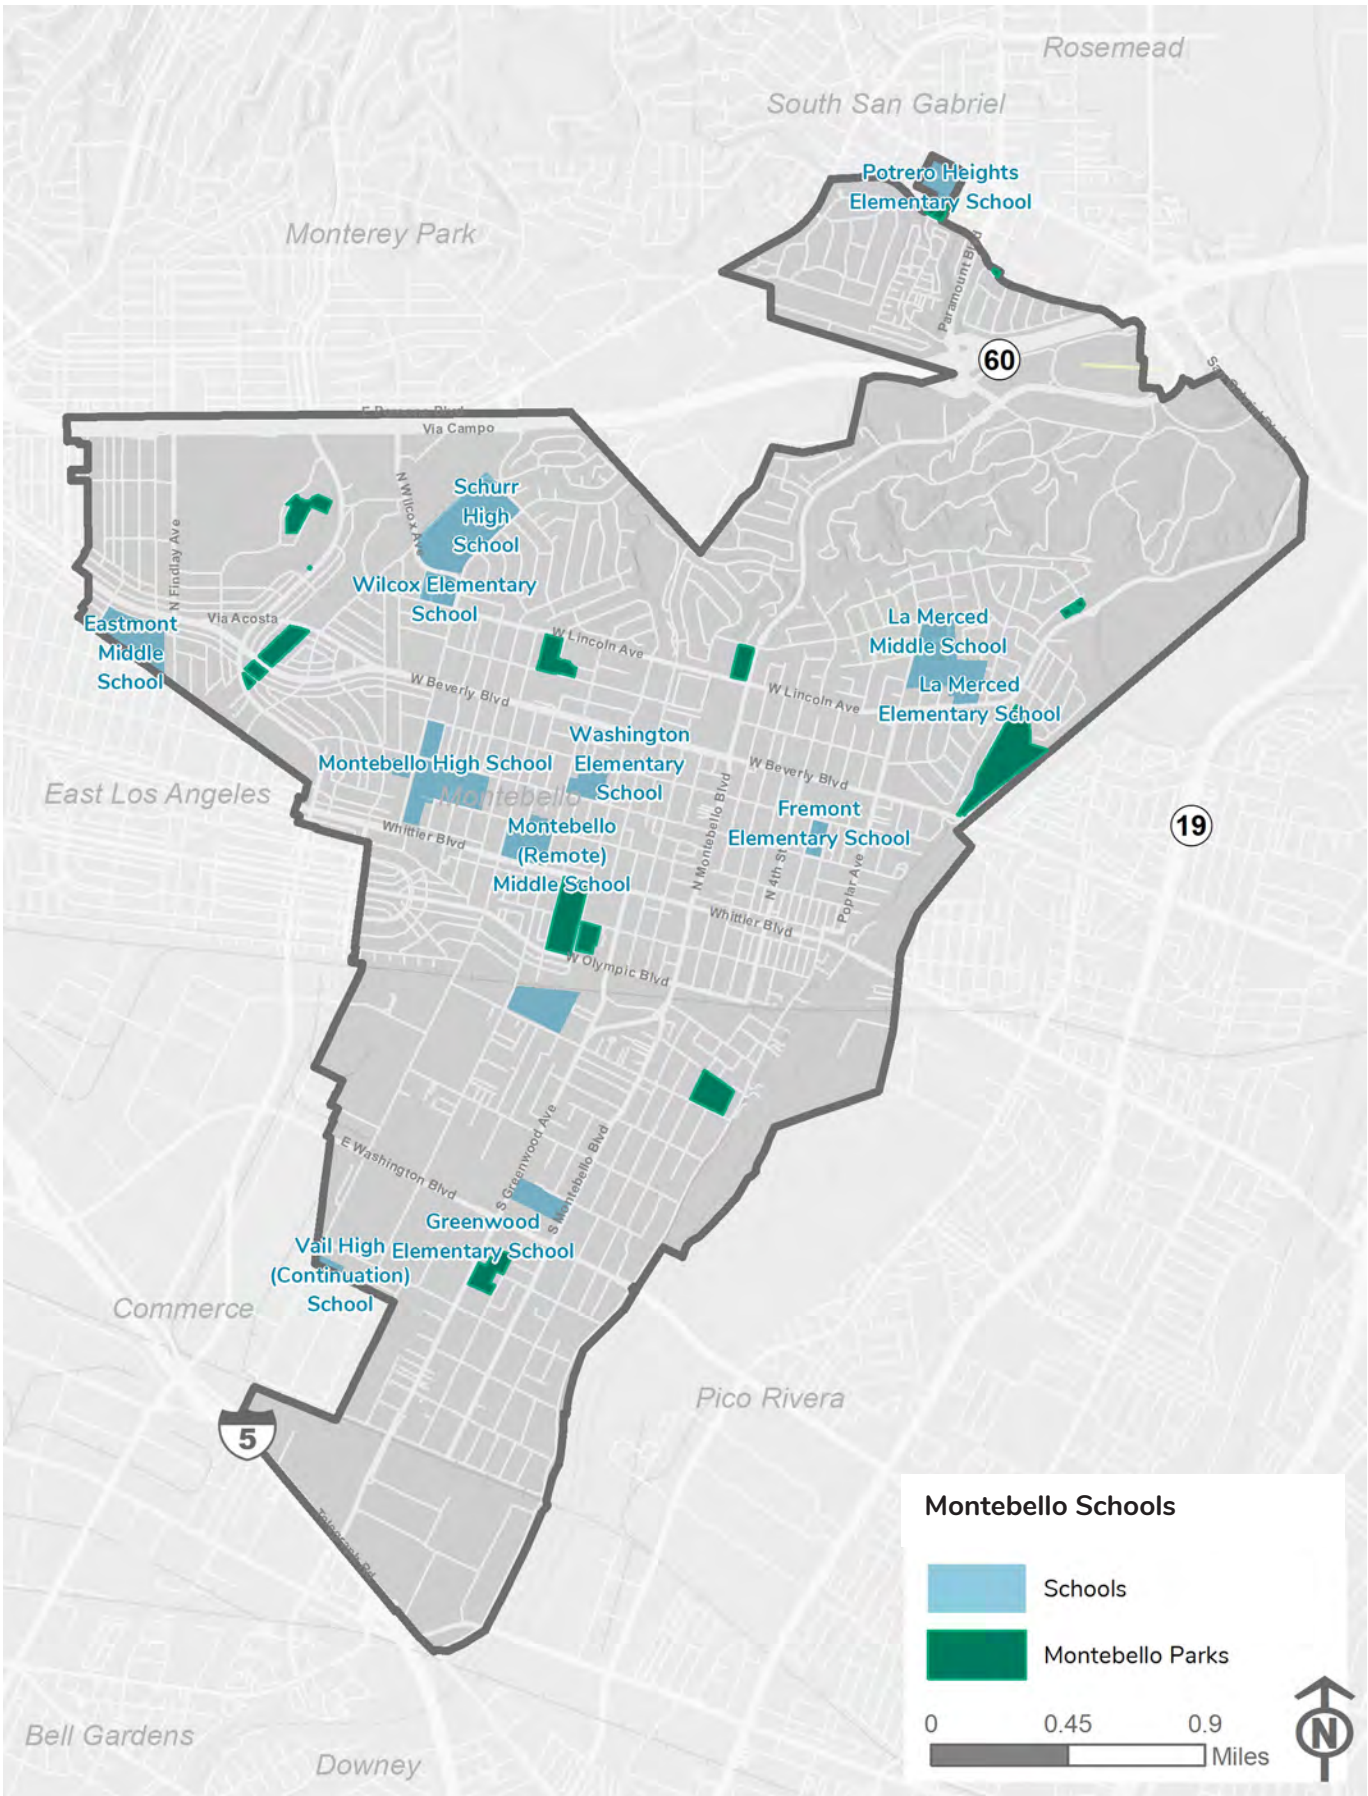

FIGURE 3–2: Montebello Schools

3.4 LEVEL OF SERVICE

Level of Service (LOS) within the context of park planning is a measurement to evaluate how parks, open spaces, and facilities serve the given community. A LOS analysis is used to benchmark current conditions based on NRPA metrics and other regional metrics on park facilities. LOS is used to help direct future planning efforts based on projected population growth and future park facilities.

LOS describes how a recreation system provides residents access to recreational assets and amenities. It indicates the ability of people to connect with nature and pursue active lifestyles. It can have implications for health and wellness, the local economy, and the quality of life. Further, LOS for a park and recreation system tends to reflect community values. It is often representative of people's connection to their communities and lifestyles focused on outdoor recreation and healthy living.

3.5 POPULATION-BASED SERVICE ANALYSIS

A population-based service analysis for Montebello's park system was performed using NRPA Park Metrics from the 2020 Agency Performance Review Survey. An amenity spreadsheet was produced indicating the amenities that are located in each park. These amenities were then totaled and listed under each park. The Master Plan inventoried the City's existing recreation facilities using the Los Angeles Countywide Comprehensive Park & Recreation Needs Assessment. Table 3-5 summarizes these facilities and compares them with the National Recreation and Park Association (NRPA) guideline service level and recommended Needs Assessment standards for the City of Montebello (one facility per number of population). The calculations are based on the current population level in the City of Montebello of 63,833 according to the 2018 Census American Community Survey (ACS) 5-Year Estimates. This table also shows the existing park and sports facilities available at each park. Because private parks may not be available to the public at all times, their analysis acreage and amenities are calculated as 25%. Due to the lacking JUA/MOU agreement, the school facilities are not included in LOS analysis. According to the recommended standards, the City currently has sufficient picnic areas, pools, and recreation centers, but is deficient in most of the sports (fields and court based sports), pedestrian, and bicycle facilities.

LOS is an appropriate gauge of where deficits may be; however, this is not the only measure to view the park facilities. For instance, this national survey does not reflect regional trends in Southern California such as futsal, handball, pelota mixteca, and other adventure type sports such as obstacle courses, climbing walls, rope courses, bouldering, pump tracks, and adventure playgrounds. As such, an additional lens should be applied to capture the community's priorities, needs, and impressions on the current park system. This should be used in addition to the population-based level of service analysis can provide a good indication of the future park needs. The needs will be further discussed in other chapters of the report.

TABLE 3-5: Existing Level of Service

	Level of Service for 2020 Population (63,833 Est. Pop.)	Existing City Facilities	Existing Private Facilities (partially counted)	School Facilities (not counted)	Total Existing Inventory		National Guideline Service Level (1/# pop)	Recommended City Standard (1/# pop)	Total Facilities Needed	Total Surplus / Deficit

3.6 GEOGRAPHIC DISTRIBUTION ANALYSIS

A Geographic Distribution Analysis (GDA) was performed on the community parks, neighborhood parks, recreation centers, and special-use parks. A GDA examines the walktime, biketime, and drivetime to these facilities as determined by using a Geographical Information System (GIS) based parkshed analysis. Results from this analysis are displayed in Figures 3-3 and 3-4.

The park's GDA analysis takes into account the percentage of the population served by neighborhood, community, and regional parks. Instead of using a traditional 1/2 mile circle from parks that only considers a direct distance, the method deployed by the project team takes into account actual walking, driving, or biking distances that considers walking, biking and driving routes someone would use to get to these parks. This actual network method is more accurate since it puts attention on the need to improve the local network to improve access to park facilities. Standard circles are highly inaccurate in determining access for areas that have significant barriers such as freeways, highways, rivers, rail lines or steep topography. The GDA is important since it can highlight the areas that may have greater park needs and can be measured with goals that neighborhood park users live within walking or biking distance of neighborhood parks.

TABLE 3-6: Park Type Level of Service

	Existing Acres	Recommended Standard per 1000 Population	Acre per 1,000 Population 2020	Total Surplus/Deficit
Developed General Purpose Parks				
Mini and Neighborhood Parks	40.5	1.5	0.6	(0.9)
Community Parks and Center	38.7	2.5	0.6	(1.9)
All Active Parks	79.2	4	1.2	(2.8)
Special Use and Regional Park / Open Space				
Special Use Facility	45.86	6	0.7	(5.3)
Regional Park Area	978	6	15.3	9.3

TABLE 3-7: Park Distribution Level of Service

Parkshed (Service Area)	Existing 2020			
	Parkshed Acreage	% City Area Served	# Population Served	% Population Served
1/2 Mile Walkshed using 15-minute walktime (All Parks including golf course)	2,602	49%	38,197	59.8%
1/2 Mile Walkshed using 15-minute walktime (Mini/Neighborhood)	1,966	37%	28,214	44.2%
1 Mile Bikeshed assuming 5-minute ride time (Community/Special Use Parks)	2,279	43%	33,107	51.9%
Combined Parkshed	3,414	64%	48,746	76.4%

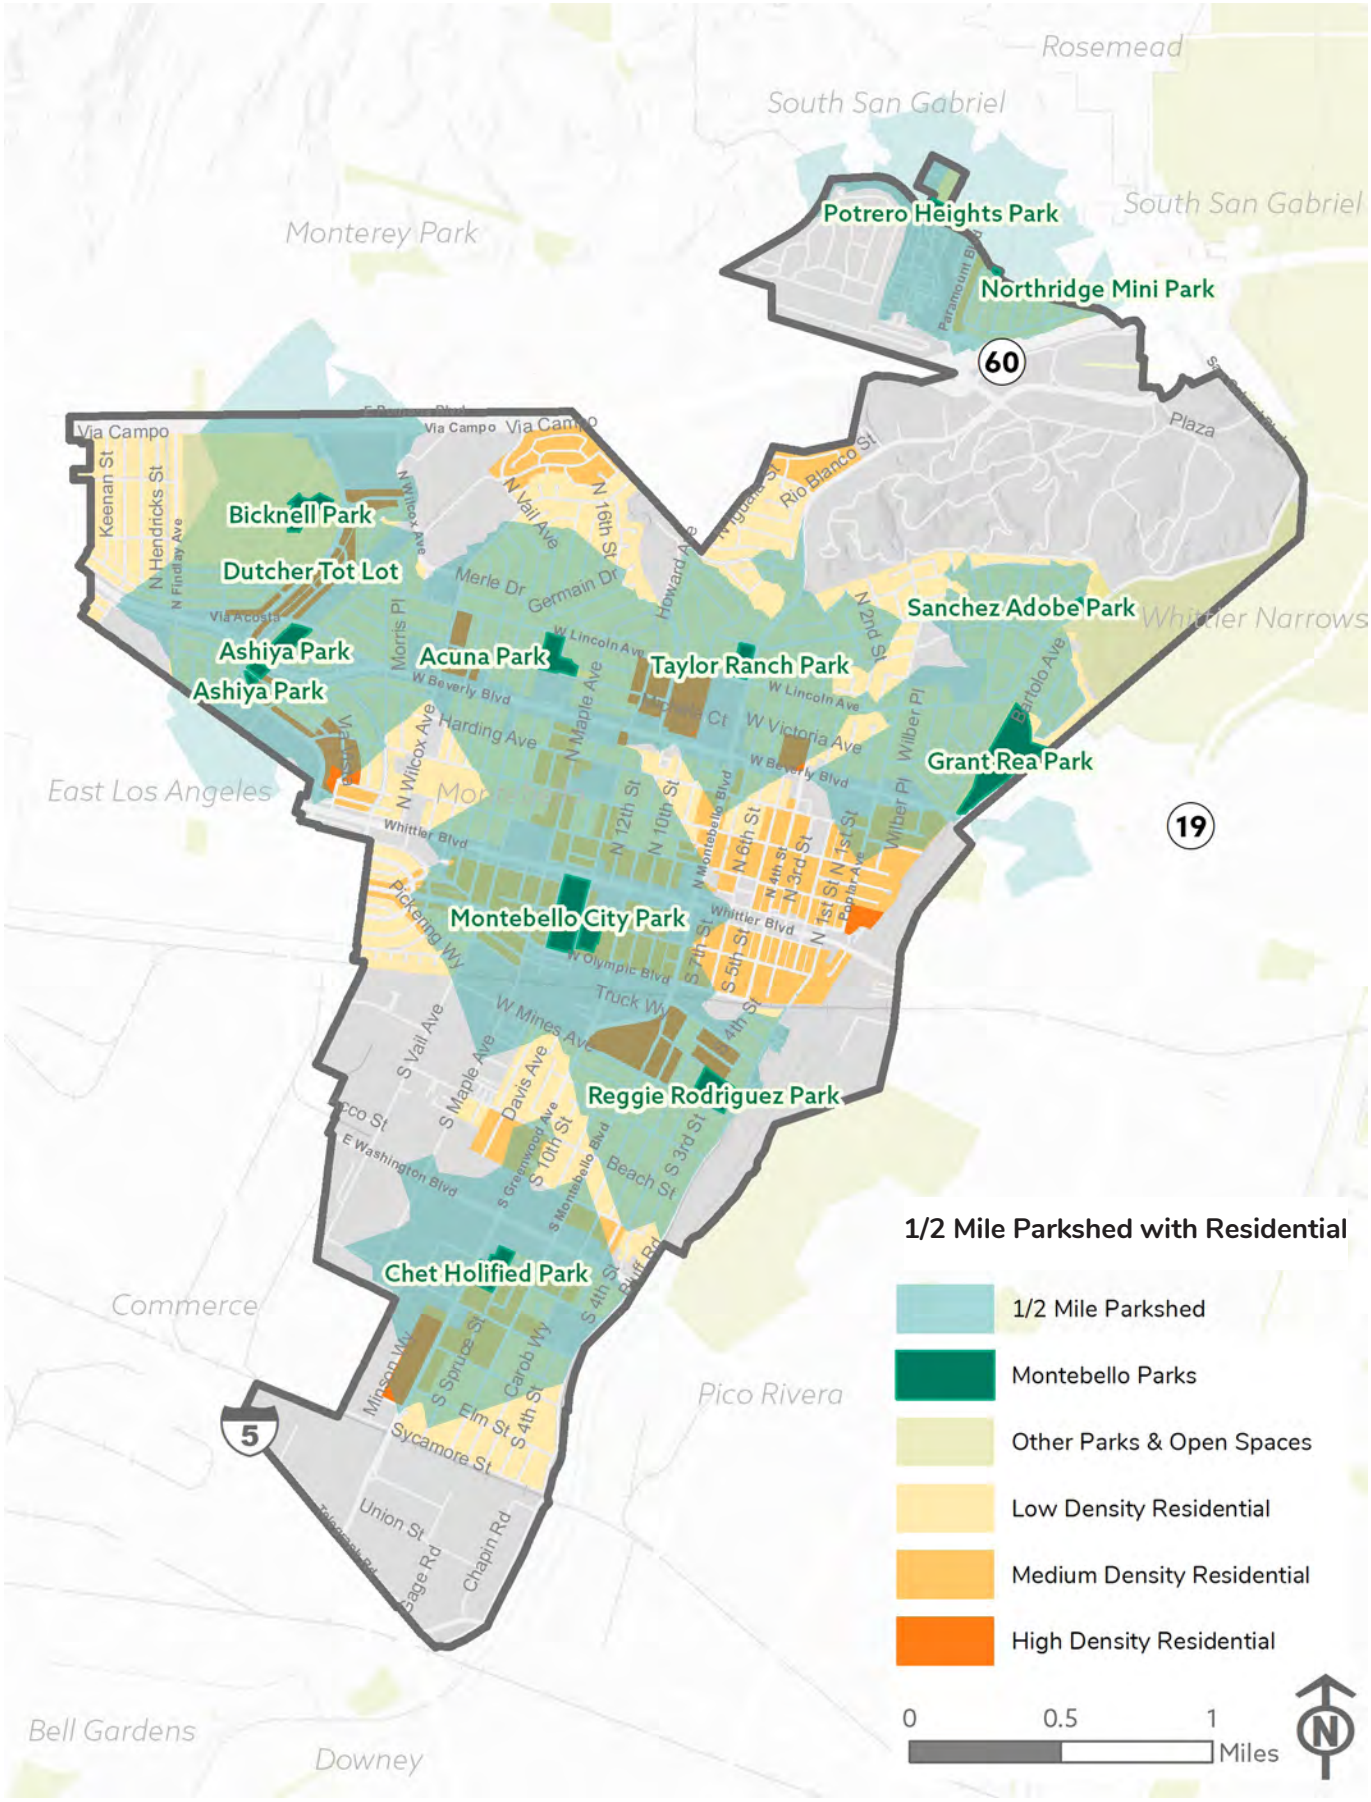

FIGURE 3-3: 1/2 Mile Parkshed with Residential

For each neighborhood park, community park, community center, special use park, and regional park, a GIS analysis was completed that generated polygons representing a 15-minute walkshed, given a walking speed of 2.5 mph (slowed to 2 mph to take into account street crossings, some with signals). The 5-minute driveshed assumed posted speed limits which tends to average 35 mph with it slowing to 30 mph average with signals and parking at each end of the trip. Resulting walkshed polygons were superimposed on the city base map to see which regions were well covered by park access and to estimate the number of residents served by park type.

Forty-four percent of residents are served by the 15-minute walkshed for the neighborhood parks, highlighting the need for additional neighborhood parks, especially north-east and east Montebello. The 5-minute bike/driveshed serves 51 percent of the community for parks, community centers, special use parks, and regional parks.

3.6.1 PARKSHEDS

There are three different parksheds used to analyze the service area a park provides to the City: walkshed, bikeshed, and driveshed. For each park type, a Geographical Information System (GIS) analysis generated a polygon representing a 15-minute walkshed (given a walking speed of 2.5 mph, slowed to 2 mph for signalized intersections) and a 5-minute driveshed (includes total travel time with approximate delay due to traffic signals and finding parking). The resulting service catchment areas were overlaid on the city base map to see which regions were well covered by park access and to estimate the number of residents served by park type. Table 3-7 is a summary of the parkshed assumptions. Populations within a 15-minute walkshed are typically covered by mini parks and neighborhood parks, whereas, populations within a 5-minute driveshed are served by community parks/centers and regional parks. Figure 3-4 displays a half-mile parkshed (typical walkshed) and residential density in Montebello to show which areas of Montebello have convenient access to parks.

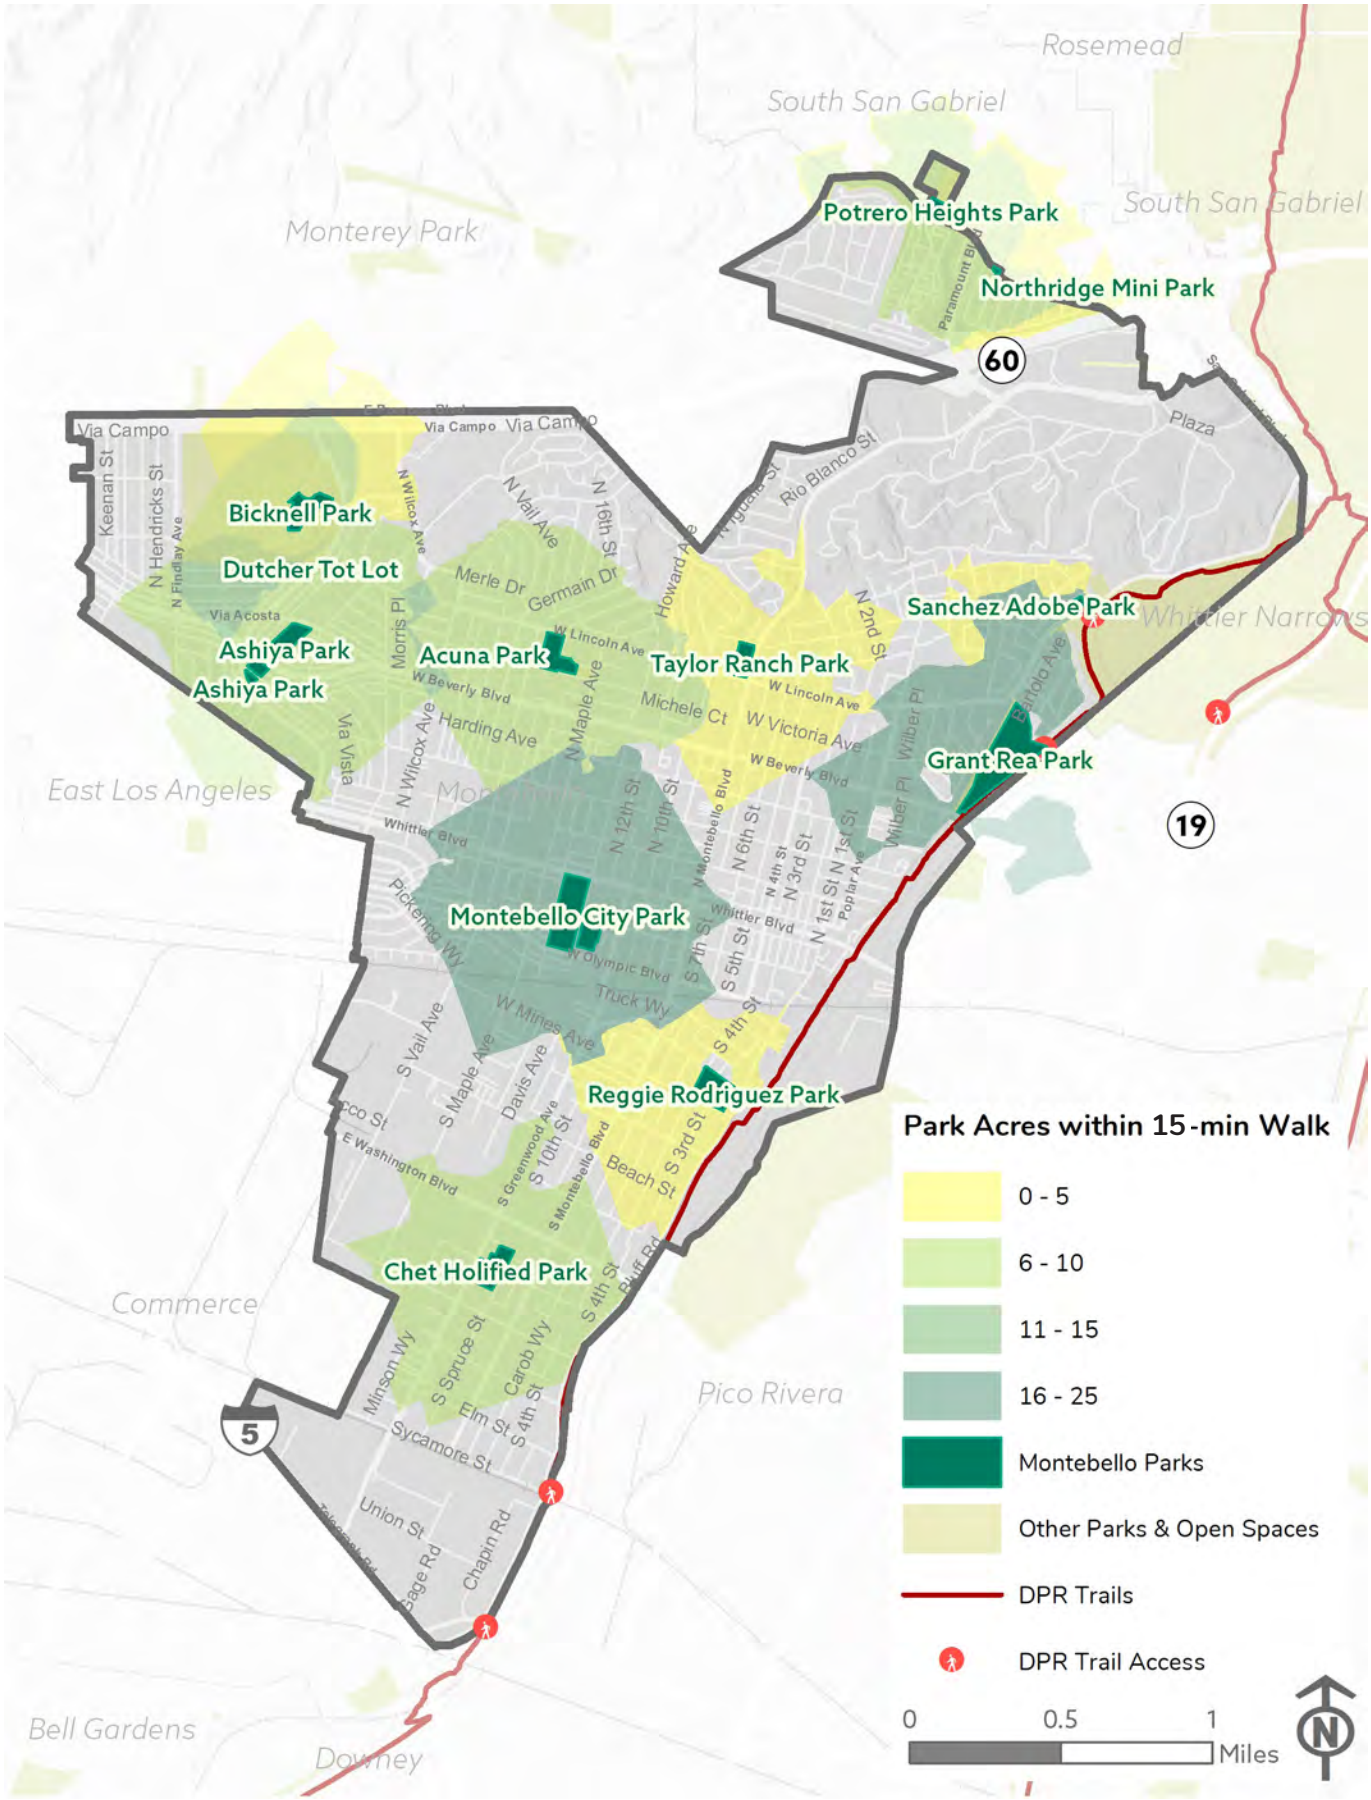

FIGURE 3-4: Park Acres within 15-minute Walk

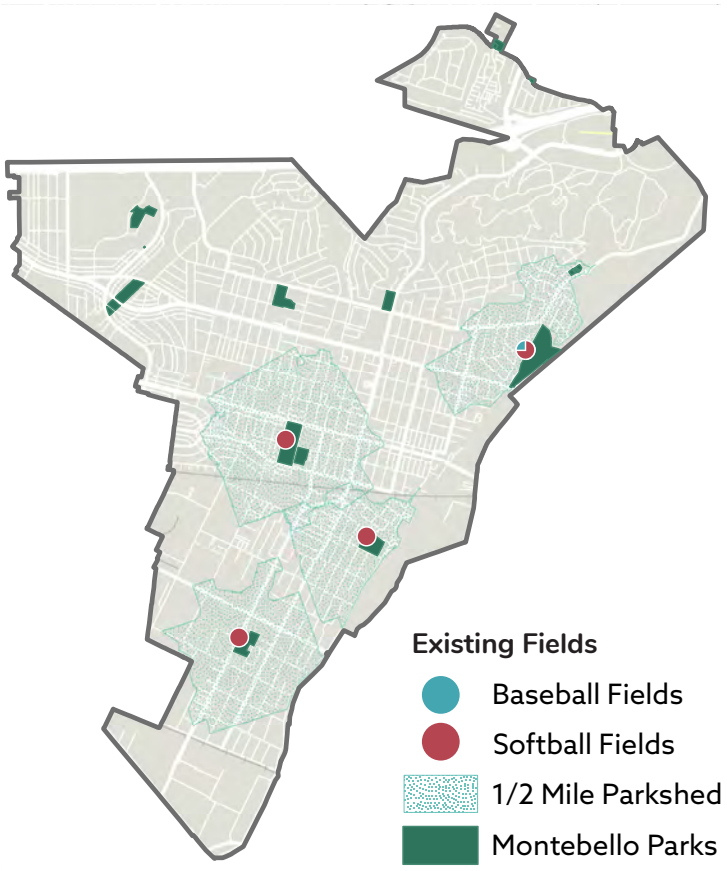

FIGURE 3-6: Field Amenities

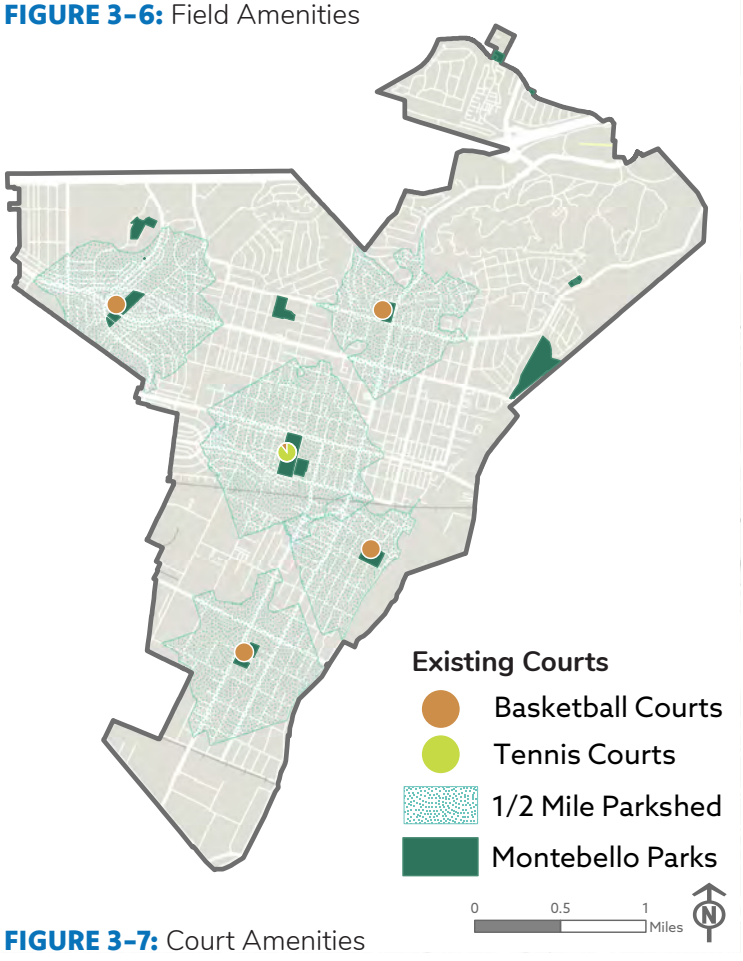

FIGURE 3-7: Court Amenities

3.6.2 AMENITIES

As shown in Table 3-5, there are many different amenities provided in the City of Montebello's park system. Figure 3-5, 3-8, and 3-9 display the percent population age of the age group that is most likely to use the specific amenity with a half-mile parkshed to show the area of the population these amenities serve. Figures 3-6 and 3-7 separate the sports facilities from Figure 3-6 to sports fields and sports courts and show the percentage of these amenities in each park.

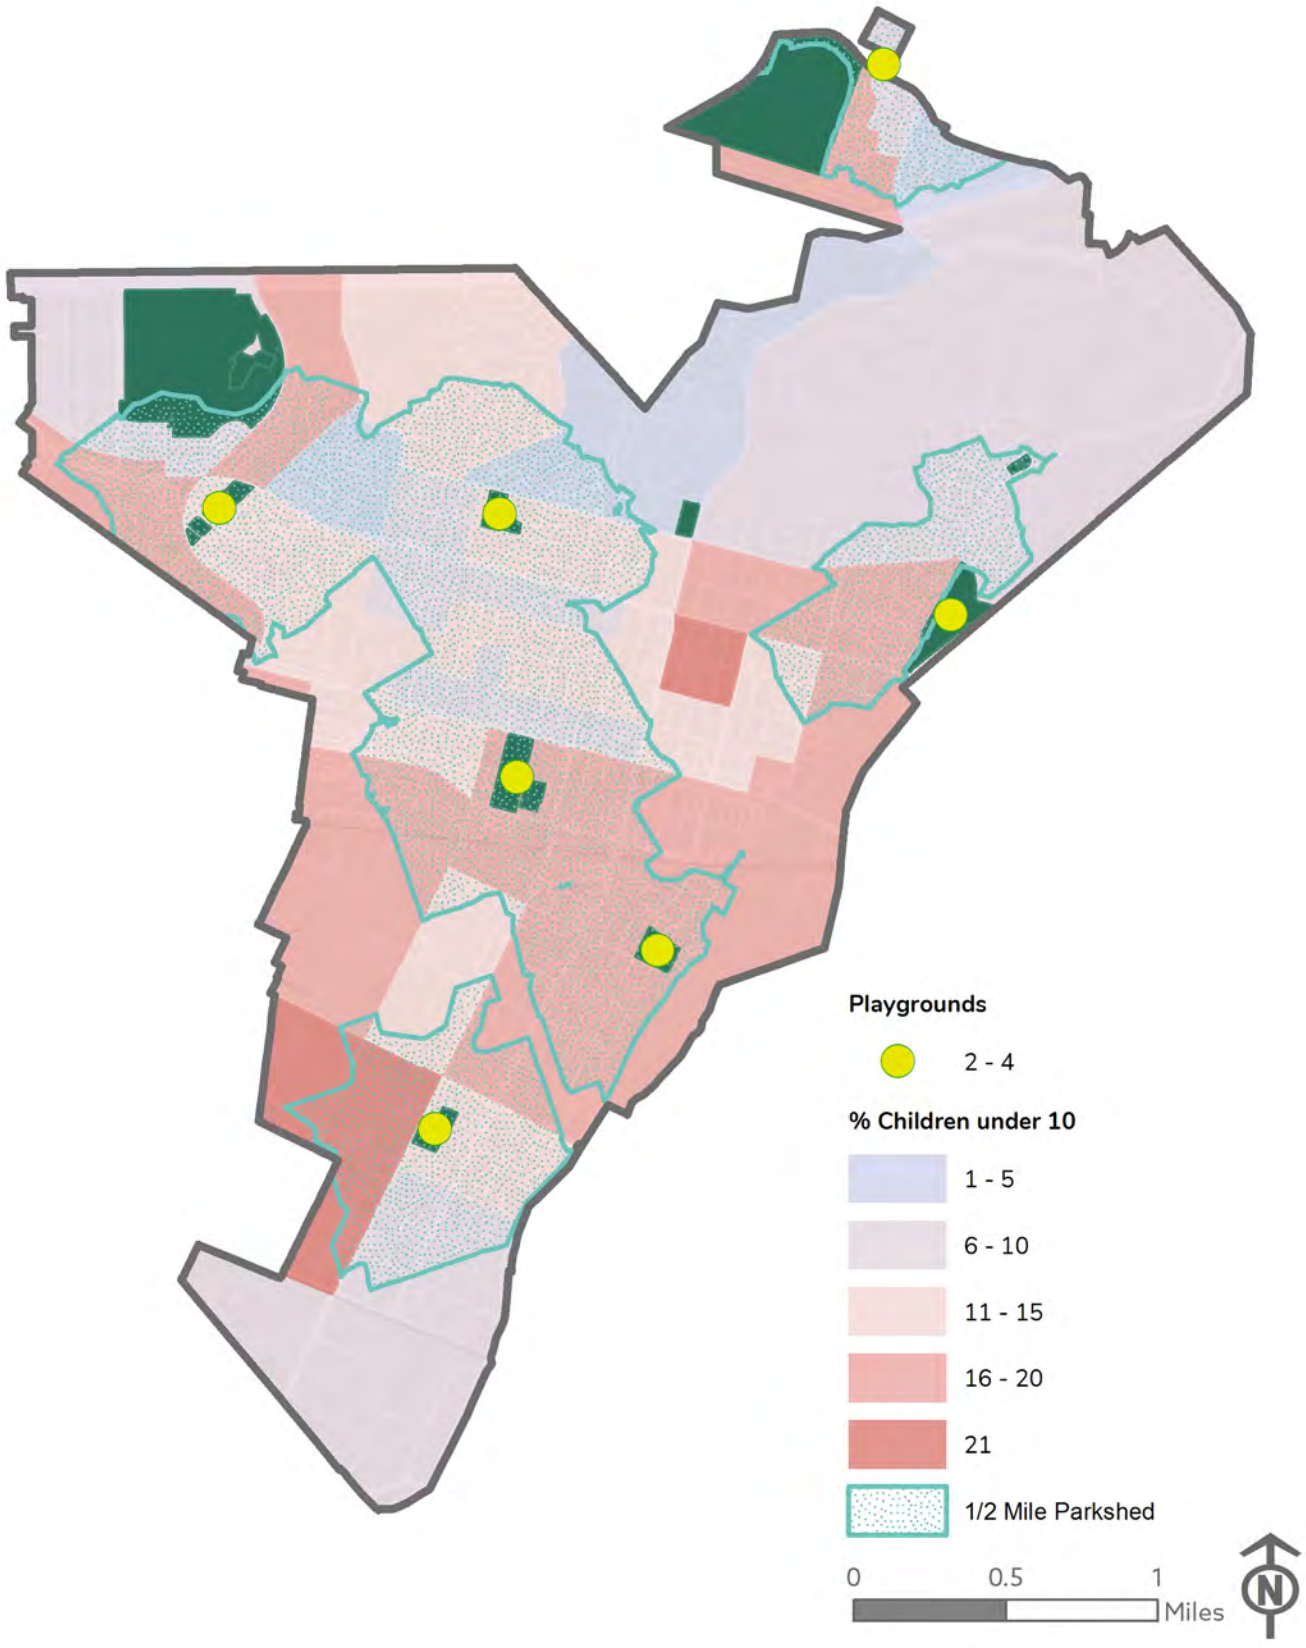

FIGURE 3–8: Population of Kids Under 10

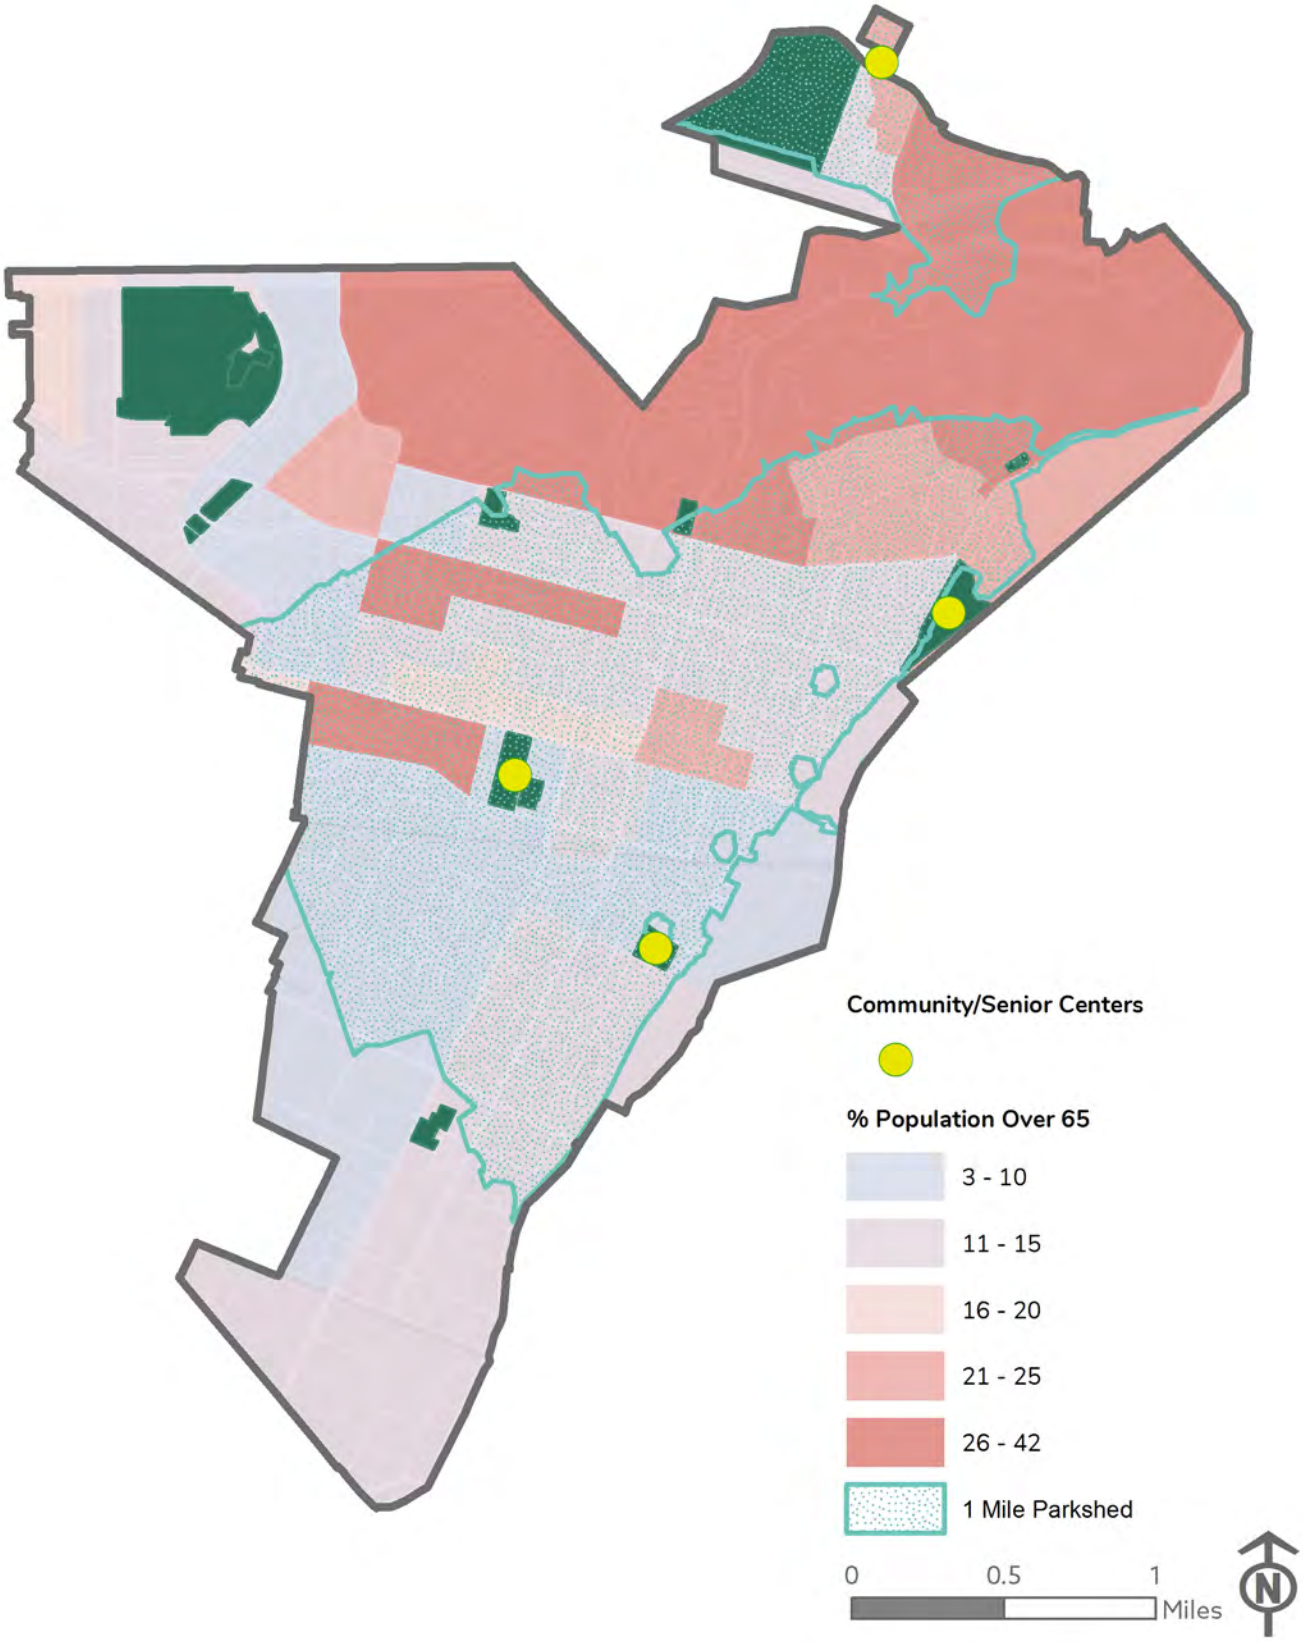

FIGURE 3-9: Population Over 65

3.7 DESCRIPTIONS OF EXISTING PARKS

Each park in the City of Montebello is listed with its current amenities and a conditions report provided by Bureau Veritas. The park's conditions are broken down into four categories: pedestrian plazas and walkways; athletic, recreational & playfield areas; special construction and demo, and sitework. Pedestrian plazas and walkways assess sidewalks, parking lots, driveways, and other specific sites at each park location. Items like playgrounds, softball fields, basketball courts are evaluated under the Athletic, Recreational & Playfield Areas. The special construction and demo category is only found at three parks: Chet Holifield, Grant Rea, and Montebello City Parks and looks at special areas like the pool areas and batting cages. The sitework category looks at the site's overall site furnishings like picnic tables and signage. Each category is then broken down into five conditions: excellent, good, fair, poor, and failed. In this section, the average of each category is shown with a breakdown of each condition rating. More detailed conditions reports analyze each aspect of the site and can be found in Appendix IV.

3.7.1 ACUNA PARK

Acuna Park is named after Montebello police officer Henry Acuna, who was killed in the line of duty. Acuna Park is a 6.2-acre neighborhood park located on Victoria Ave. The park includes amenities such as playgrounds and multi-purpose fields.

3.7.2 ASHIYA PARK

Ashiya Park is named after Montebello's sister city: Ashiya, Japan. The Montebello-Ashiya Sister City Agreement is part of the "people-to-people program" started by President Dwight D. Eisenhower in 1956. Montebello's relationship with Ashiya, Japan continues to grow and flourish and will celebrate its 60th anniversary in 2021. Ashiya Park is categorized as a neighborhood park and is 7.9 acres. Amenities include sports fields, basketball courts, and playgrounds. This park is an Edison property that is under a lease agreement with the City.

3.7.6 MONTEBELLO GOLF COURSE

The Montebello Golf Course is a total of 122.69 acres. This includes 45.61 acres which are the greens, fairways, driving range, club house and parking lots and 77.07 of natural open space which includes the roughs, hazards, water features, and other non-playable areas. The Golf Course was started in 1928 and is owned by the City.

3.7.7 GRANT REA PARK

Grant Rea Park is the largest park in Montebello at 21.8 acres, it is named after World War II hero, Lt. Grant Martel Rea. Amenities at this park include baseball and softball fields, basketball courts, playgrounds, and a recreational center. Grant Rea Park is also home to the Montebello Barnyard Zoo and miniature water park.

3.7.14 COMMUNITY AND SENIOR CENTER

The Potrero Heights Community and Senior Center (Center) is located on the northern edge of the City at the entrance to Potrero Heights Park. The Center was recently constructed in 2012 and is approximately 4,000 square feet. The building features multiple large glass roll-up doors which allow the building to be opened to the park on both sides of the building which provides additional outdoor plaza space for any programmed event. The Center is owned and operated by Los Angeles County.

Inside community and senior center set up for an event.

CHAPTER 4
Community Priorities & Needs

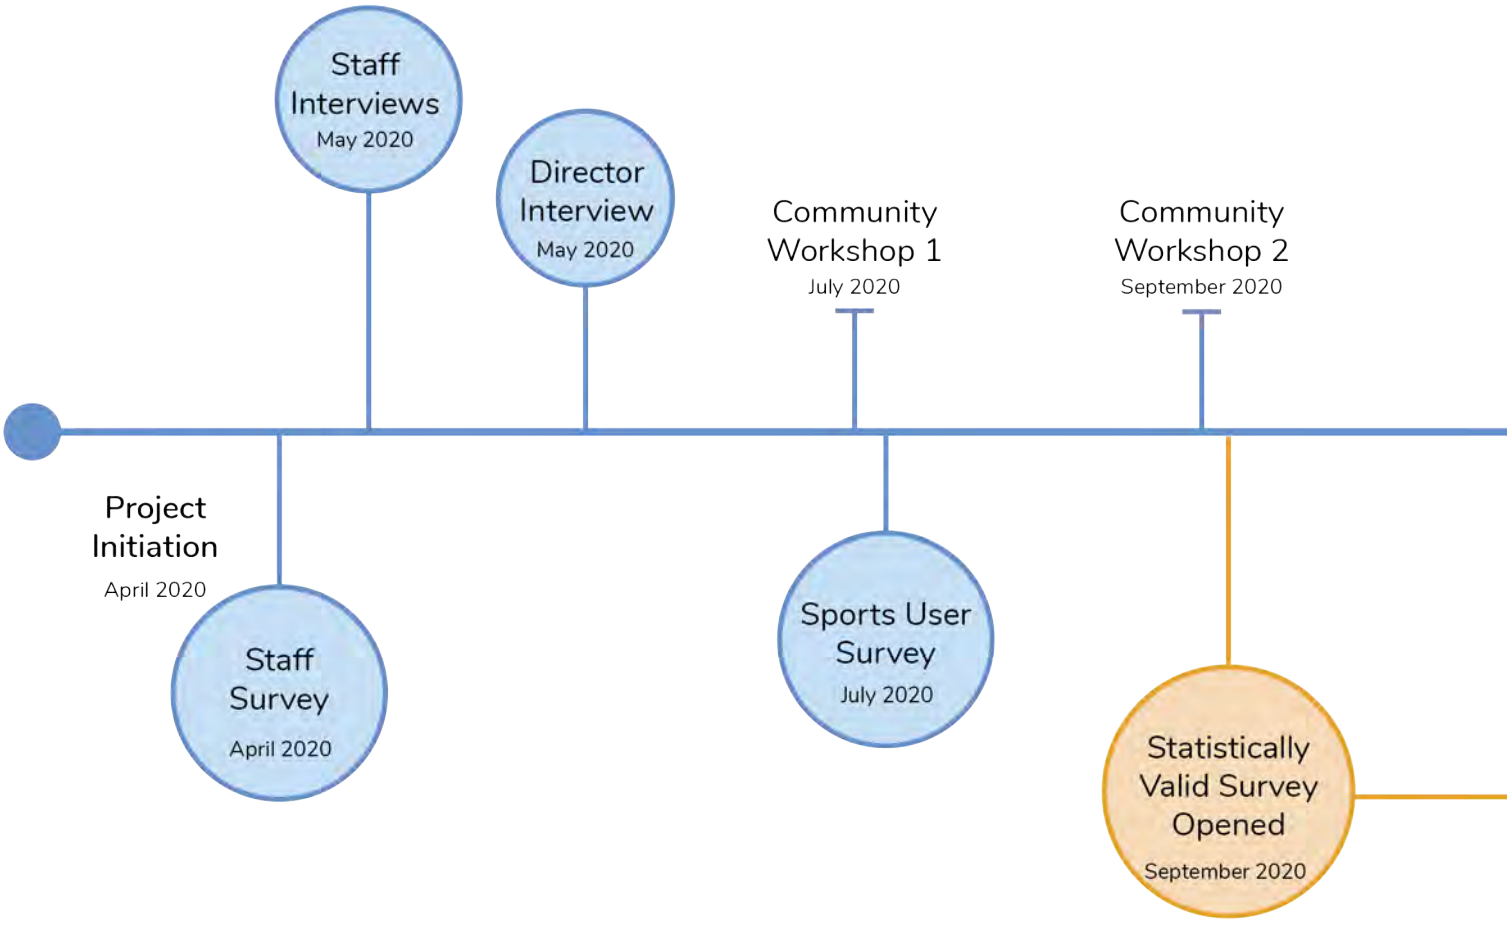
4.1 OUTREACH STRATEGY

A major component of the Master Plan is developing a comprehensive needs assessment which is derived from community outreach, surveying, and user interviews. This process seeks to develop a list of prioritized recommendations, assessments on funding, operations, maintenance, and site-specific conceptual designs. This chapter summarizes the outreach process and includes information on recreational trends nationally and within the City. Additional information related to the comprehensive outreach can be found in Appendix III of the Master Plan report.

In commencing the project, the team developed an outreach strategy that focused on ways to engage to the community. The City is committed to making the planning process a collaborative effort with the community, stakeholders, and staff. As such, the team made sure that engagement with people through a series of public workshops, surveys, online maps, and other meetings were the emphasis of the outreach strategy so that feedback could be gathered for the Master Plan.

The outreach plan further outlined a diverse set of outreach strategies to ensure the planning process gathers feedback from people of all ages and demographic backgrounds. Additional emphasis was placed on underserved communities that disproportionately lack easy and comfortable access to parks, open space, and other recreation facilities. The team developed key messages and outreach strategies to gather feedback, paying particular attention to the Hispanic/Latino community and providing all data in translated versions. The team also utilized the City's database of previous resident and stakeholder involvement to further boost outreach efforts.

FIGURE 4-1: Outreach Timeline



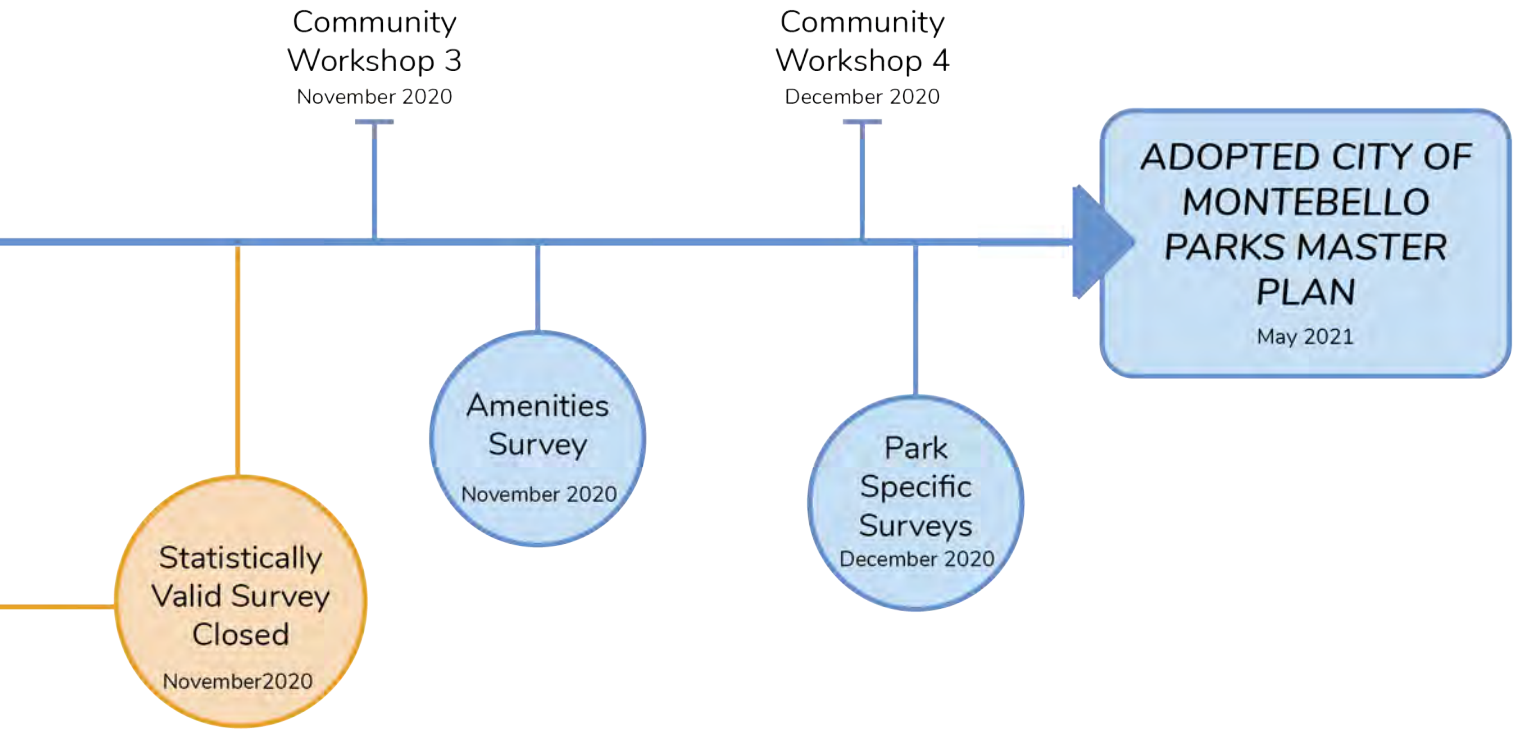
Outreach Strategy Plan Document

4.1.1 COVID-19

The project team's priority above all was the safety and welfare of the community of Montebello. The spread of COVID-19 and the Global Pandemic triggered necessary safety measures regarding public gatherings of any size. As of the writing of this engagement plan, State and local regulations prohibited all social gatherings of more than 10 people. Due to COVID-19, typical methodologies for community engagement were altered, turning all in-person public engagement for the Master Plan into video-chat(-virtual) meetings. Public engagement shifted to online through community outreach surveys as it was deemed safer to conductvirtual rather than in-person workshops to gain feedback from residents. The team worked on methods to help provide equal access to the community.

Outreach included alternative methods for meaningful community engagement through online tools, recorded public meetings, printed and online surveys, and other methods. This was fundamental in keeping the Master Plan moving forward while ensuring that public input was adequately met. While nothing can replace in-person engagement, the following strategies and tools were utilized to gather the feedback needed for the planning process.

Remote Engagement Tools utilized during the project: GoToMeeting and GoToWebinar, SurveyMonkey, ConstantContact, Esri StoryMap and Online Interactive Maps, Mentimeter, & Youtube.



4.1.2 STORYMAP WEBSITE

The StoryMap website for the Montebello Parks Master Plan is an ESRI web-based application that provided access to information about the project. The project StoryMap was active for the duration of the project and included an overview of the project, an interactive map for visitors to input information, recordings of previous online workshops, and other general project links and information. The interface of this application can be seen in Figure 4-2, along with interfaces for the mapping and online workshop records below.

This QR code led people to view online Storymap.

FIGURE 4–2: Storymap

Our first online workshop was held on July 22th at 6:00 pm. The City is committed to making the planning process a collaborative effort with the community, stakeholders, and staff. The team introduced project goals, existing conditions mapping with a presentation, and explained how you can share your valuable feedback!

Missed the workshop? No worries! Check out the video recording below to see what you've missed.

4.2 COMMUNITY AND STAKEHOLDER INPUT

The planning process included several public outreach efforts designed to gather information from a broad range of residents, stakeholders, and City staff through a series of online public events, stakeholder meetings, and surveys.

4.2.1 STAKEHOLDER INTERVIEWS

Stakeholder interviews were conducted between May and October 2020. Leadership and staff from the department and community leaders representing senior clubs and activities, sports non-profits, and civic groups were interviewed using the Zoom digital platform. The goal of these sessions was to guide the development of the parks and recreation needs assessment and collect input on the needs and desires of City residents.

Consistent themes and topics were brought up during many of the interviews, including (not listed by priority):

- An increase in services on the south side of the City, south of Whittier Blvd. is desired. The residents from the north side of Montebello are much more vocal. Engagement appears to not be equitable between the north and south sides of the City.
- Having a Senior Center where people can gather and make new friends that focuses on social interaction, learning and being active is a priority. The Senior Center should focus on three components that are key - social services, social activities, and healthcare information.
- A lot of programming is centralized at Montebello City Park. Programs offered in neighborhoods should be a priority.
- More trails and walking pathways are desired. Walking is a major activity that residents participate in.
- Attention to deferred maintenance, repairs, and renovations are needed in the parks.
- Restrooms in the parks are a big concern. Parks need additional shade and restrooms.
- Safety in the parks is a major issue in part due to limited lighting and homeless concerns.
- An inclusive playground is desired.
- A joint use agreement with the school district may make the partnership more equitable for the Department.
- Expand sports programs to include football, soccer, and baseball, additional competitive sports programs, and girls' softball programs.
- Some youth sports providers must work around Department organized activities. Scheduling of sports fields is inefficient due to the need for an automated reservation system.
- Outdoor exercise equipment in the parks is needed.
- Converting underused tennis courts to futsal and pickleball are desired.

A list of all comments from stakeholder interviews are in Section III-B of Appendix III.

4.2.2 RANDOM INVITATION COMMUNITY SURVEY SUMMARY (STATISTICALLY VALID)

The following discussion briefly outlines the methods and approach used to conduct the Montebello Parks and Recreation Survey, a part of the City's Needs Assessment. This research was conducted by RRC Associates in association with KTUA on behalf of the City of Montebello.

The Parks and Recreation Survey used a traditional mail survey approach, coupled with an option to complete the survey online or by smartphone through a password-protected website. The mail survey also referred to as the "Invite Survey" was structured to allow for a random selection of respondents in Montebello to obtain a representative sample from the community. The Invite Survey can be referred to as the "statistically valid" survey. In total, 4,500 households within the city limits of Montebello were randomly selected to receive a mail survey with an option to alternatively complete the survey online through the password-protected website. The Invite Survey generated 278 completed surveys which resulted in a margin of error of +/- 5.84% at a 95% confidence level.

This margin of error represents a level of accepted uncertainty in a survey effort, while confidence level represents how confident we are that the results represent the greater population. Error is present in all survey research because the purpose of the research is typically to use a sample of randomly collected responses to estimate how an entire population would respond.

To further ensure results represent residents of Montebello Invite Survey responses are weighted by age to better represent the City. In this case, younger residents were not as well represented. In general, mail surveys tend to have a higher-than-average age than the local population. Weighting is therefore applied to ensure younger residents are given a representative share of responses. This is a common practice in survey research and facilitates representative results.

95%
confidence level

5.8%
margin of error

Open Link Survey

In Montebello, an "Open Link" version of the survey was also publicized through a variety of City sources. The survey invited responses from residents that were not selected to receive a survey through the Invitation method. A total of 166 responses were received. The Open Link sample was compared to the Invite results and because the responses were generally very similar, the combined survey responses were used for some of the analysis of findings from the Montebello survey program. The overall combined sample in Montebello included 444 responses. An analysis of the geographic origin of respondents to the survey indicated that responses were collected from throughout the City of Montebello with all areas providing further confidence in the overall sample obtained through the surveys.

Improvements to walking and biking connections are high priorities

Improvements to existing facilities are high priorities

TABLE 4-1: Current Usage Random – Invitation Survey

Which city parks/recreation facilities have been used by your household in the past 12 months?

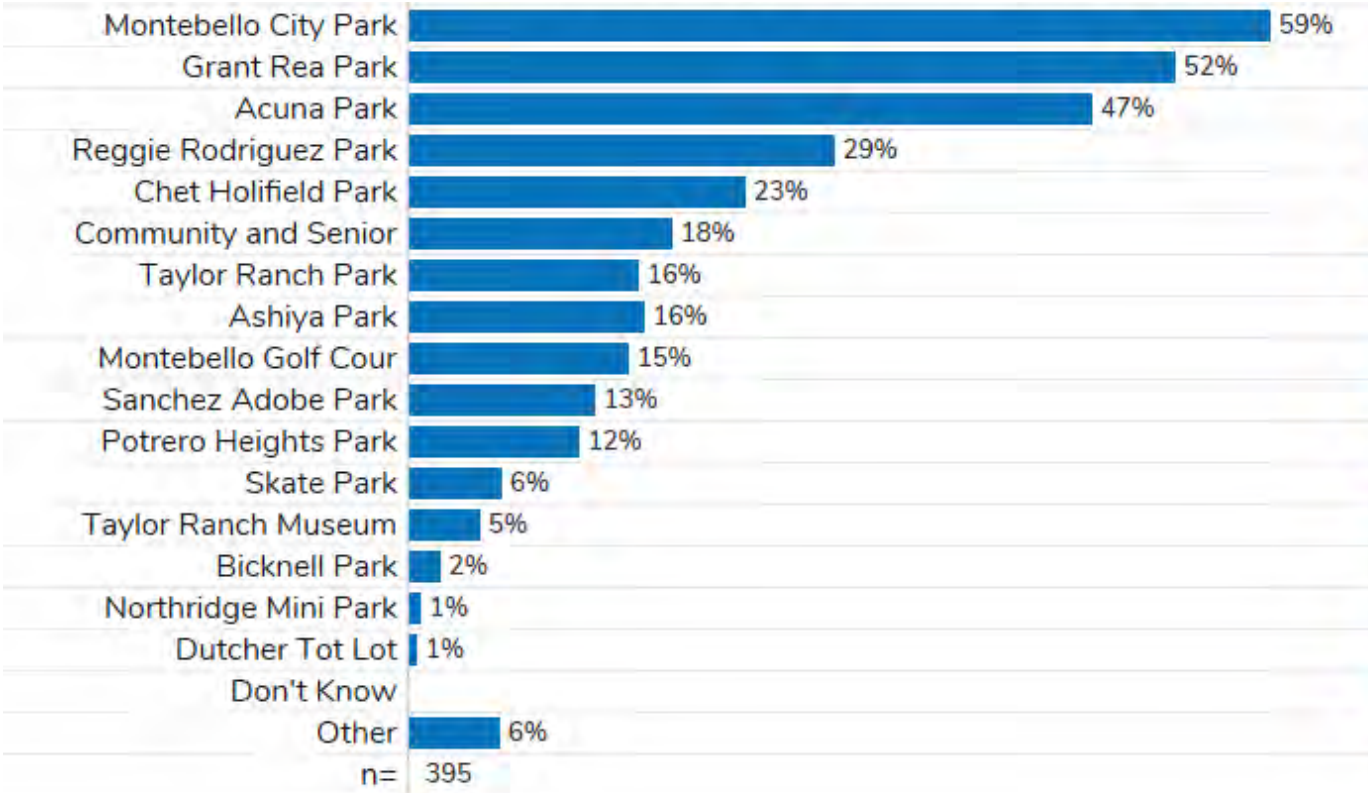


TABLE 4-2: Importance of Facilities Operated by the City of Montebello Average Rating – Invitation Survey

How important are the following facilities and services to your household?

Rating Category	Overall	Montebello City Park	Grant Rea Park	Reggie Rodriguez Park	Other
City parks and open spaces	4.5	4.4	4.5	4.5	4.5
Amenities at City parks(e.g., picnic areas, restrooms)	4.5	4.5	4.7	4.5	4.5

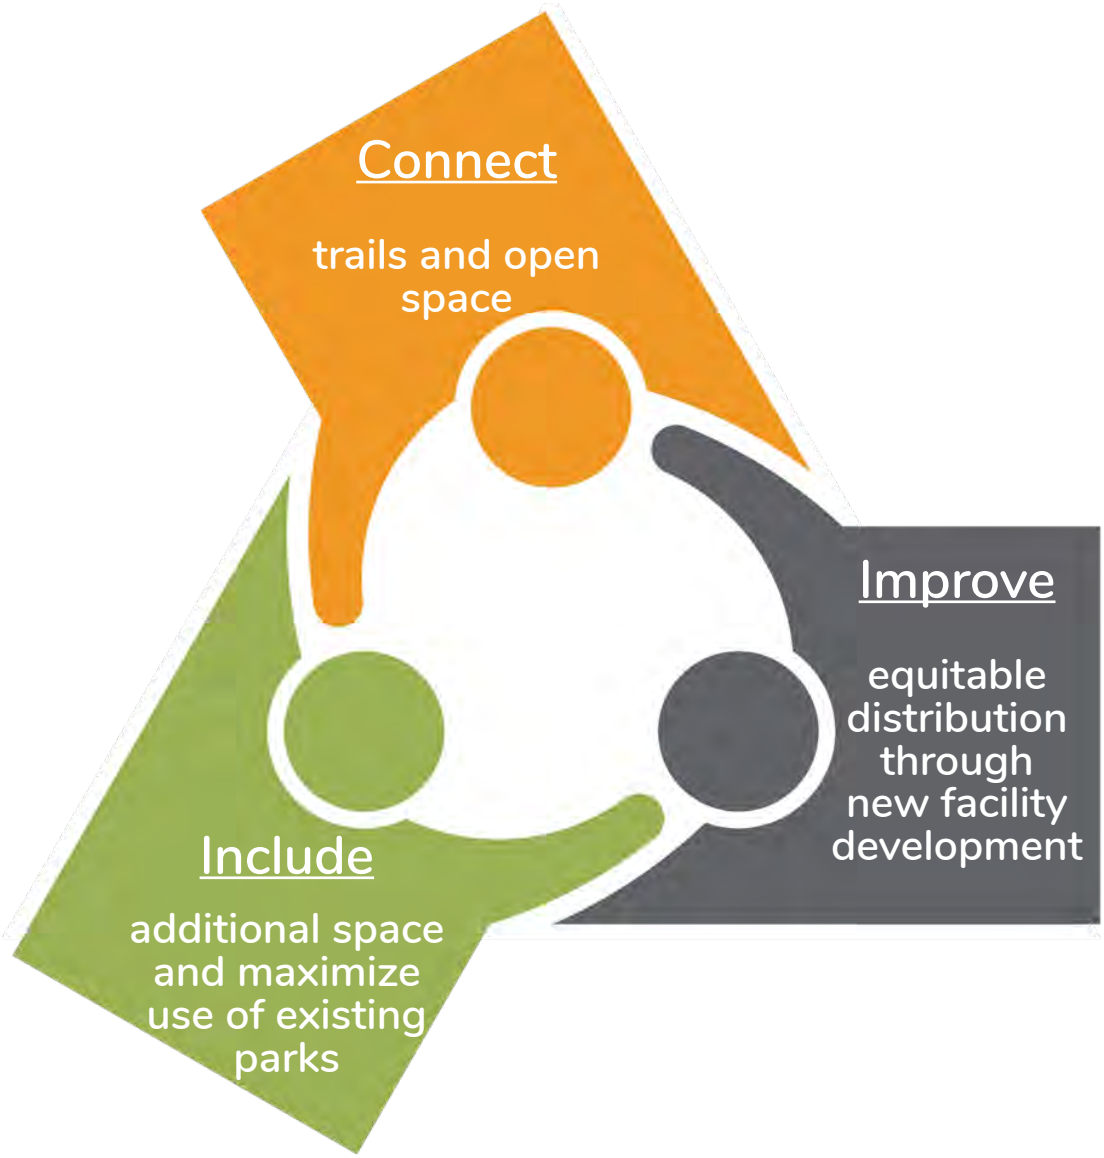
4.2.3 COMMUNITY WORKSHOPS

A total of four workshops were conducted throughout the planning process to obtain community input and solicit feedback on existing parks and recreation facilities. All four workshops were held Via GoToMeeting (an online video conferencing platform) between 6:00 PM-8:00 PM in order to abide to the COVID-19 restrictions in place at the time. Additional resident feedback was incorporated through a series of online surveys.

Community Workshop 1

The first online workshop was held on July 22th, 2020 at 6:00 pm. The team introduced the overall project goals, existing conditions mapping, and explained the project StoryMap website and how the community can share their valuable feedback for the duration of the project. The recording of this workshop was posted on YouTube and was made available through the StoryMap website.



Community Workshop 2

The second online workshop was held on September 10th, 2020 at 6:00 pm. The team introduced project progress, park level of service analysis, and benchmarking with a presentation. The team also conducted some quick polls, discussed key issues with the residents, and covered how to share feedback using the project StoryMap website. The recording of this workshop was posted on YouTube and was made available through the StoryMap website.

After this workshop, an amenities survey was distributed to the public. A couple of the top priorities' residents listed in this survey was that they would prefer additional lighting and more playgrounds. Some other amenities that residents expressed that they would like to see are dog parks, security towers/ kiosks, and splash pads. Below are the top three active, passive, linear, and general park amenities residents would like to see:

Preferred ACTIVE park amenities:

Childrens playground, 10

Outdoor exercise area, 9

Dog area, 8

Preferred LINEAR park amenities:

Multi-use paths (walking and biking), 4

Natural surface walking trails, 3

Walking paths with fitness stations, 2.5

Preferred PASSIVE park amenities:

Open-air plaza and seating terrace, 5

Outdoor education spaces, 4

Shaded picnic shelters, 3

Preferred GENERAL park amenities:

Restoom building with storage, 4.3

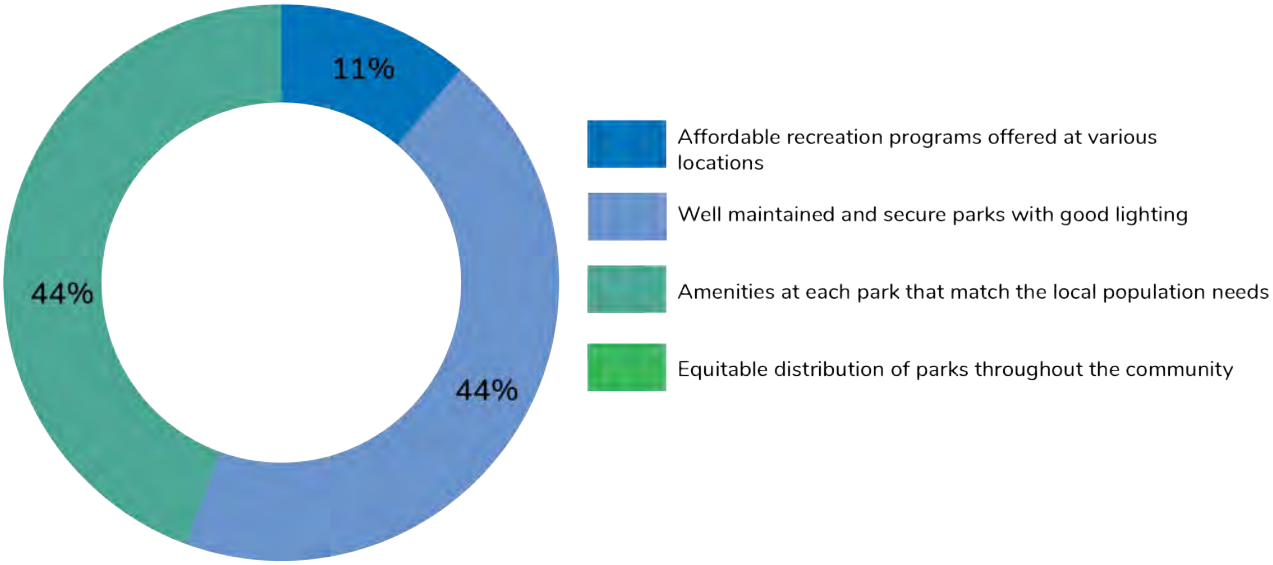
Benches, 3.4

Lighting, 3

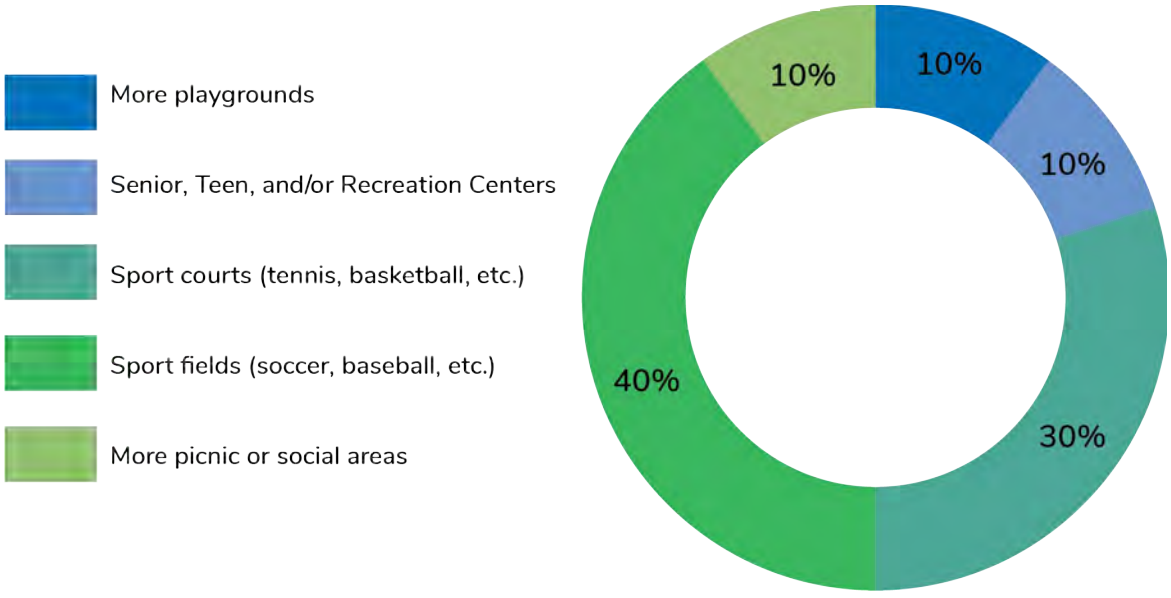
Community Workshop 3

The third online workshop was held on November 17th, 2020 at 6:00 pm. The team gave a summary of the public survey, discussed some of the park amenity gaps, went over some potential infill opportunities, introduced the project draft recommendations, quickly reviewed some of the park specific plan sites, and closed with the project's next steps and a community raffle. The recording of this workshop was posted on YouTube and was made available through the StoryMap website.

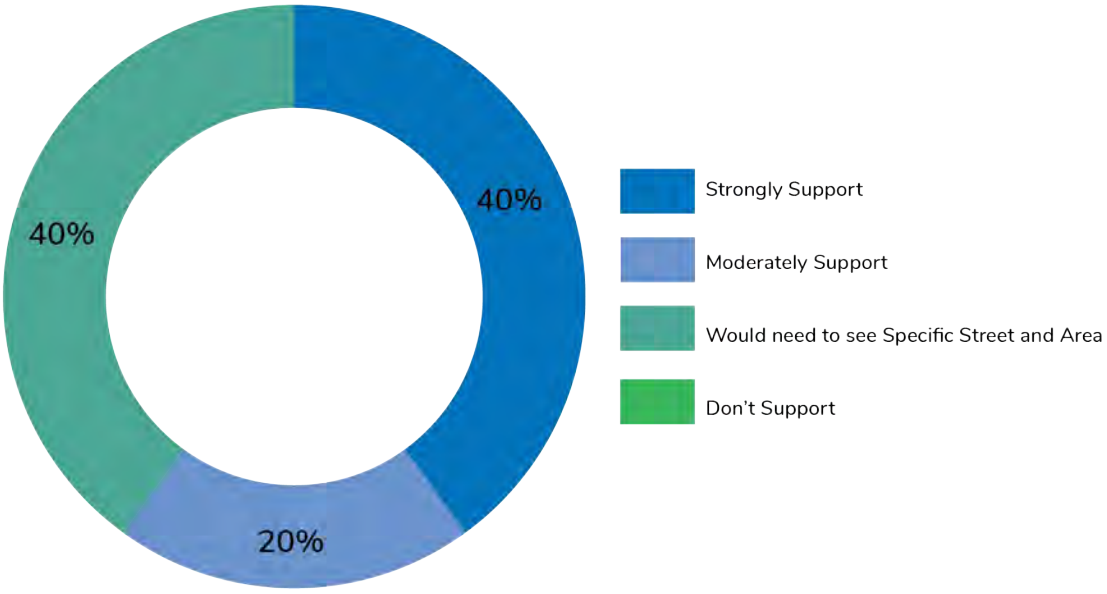
Poll Question #1:
Regarding Parks, what is most important to you?



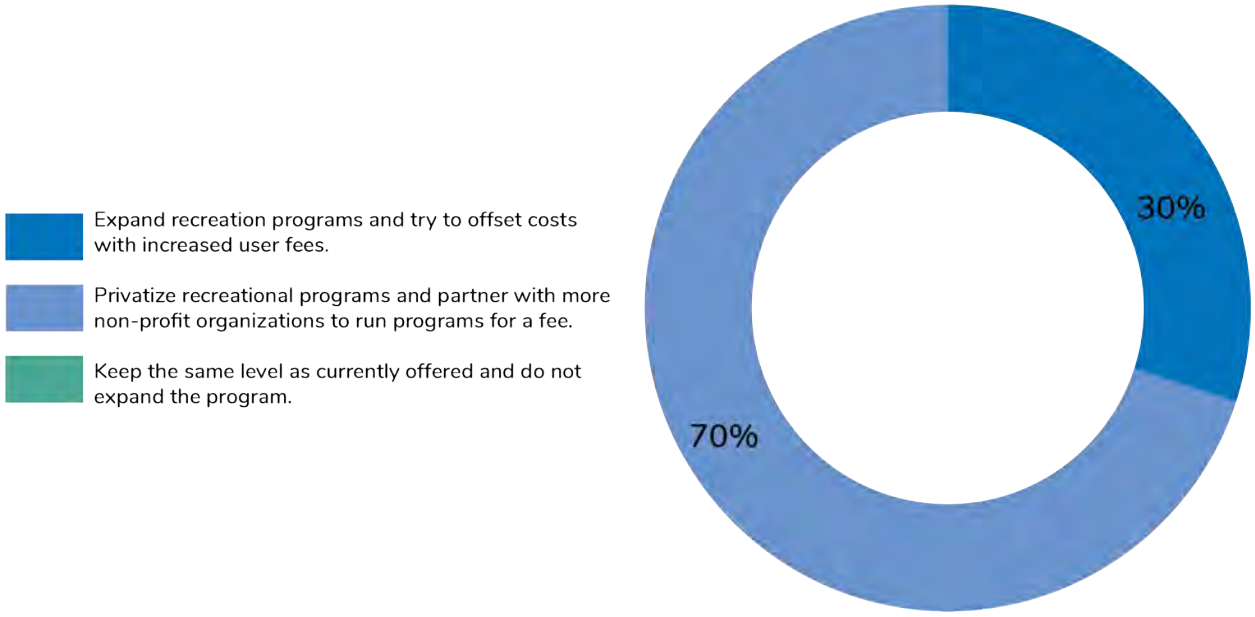
Poll Question #2:
Which of the following items do you feel are needed in your neighborhood?



Poll Question #3:
Do you support reclaiming portions of some City streets right of ways and improving these as public spaces or linear parks?



Poll Question #4:
The City offers some level of recreation programs, which of the following statements most closely aligns with your opinions on programs?



Community Workshop 4

The first online park specific workshop was held on December 15th, 2020 at 6:00 pm. The team gave an overview of the project along with a summary of the public survey and the park amenity gaps. The workshop was primarily focused on design ideas for Reggie Rodriguez Park, Grant Rea Park, and Montebello City Park. The team shared various design ideas including potential infill opportunities for each park and more holistic modifications to the park sites. The workshop closed with general discussion, the project's next steps, and a community raffle. Recording of this workshop was posted on YouTube and made available through the StoryMap website. Additionally, three park surveys were distributed to solicit input. The park surveys were provided to allow for additional input and feedback on the park specific plans. Community members who participated in the survey were entered into a community raffle.

4.2.4 GRANT REA PARK SPECIFIC SURVEY

Grant Rea Specific Park Survey was sent to the public after Community Workshop 4. This survey yielded 175 responses from the public. Out of these responses, 38% of the survey takers lived closest to Grant Rea Park. When asked how often they used the park, 42% responded with about once a week. In regards to park user safety, most users stated that the issues they encountered were uncleanliness of park amenities (specifically restrooms), vagrants, and lighting. As shown in Figure 4-3 and Figure 4-4, there were two optional park layouts presented in the survey. When asked which park redesign was most preferred, 43% said Option 1 and 57% said Option 2. Users who preferred option two enjoyed the addition of the dog park and walking paths.

4.2.5 MONTEBELLO CITY PARK SPECIFIC SURVEY

Montebello City Specific Park Survey was sent to the public after Community Workshop 4. This survey yielded 199 responses from the public. Out of these responses, 52% of the survey takers lived closest to Montebello City Park. When asked how often they used the park, 32% responded with about once a week. In regards to park user safety, most users stated that the issues they encountered were uncleanliness of restrooms, vagrants, and upkeep of park amenities. Figure 4-5 shows the park redesign and when asked their comments on the design, many stated how they enjoyed the addition of walking trails.

FIGURE 4-5: Montebello City Park Redesign

Playgrounds, 4

Improved Park Amenities Preferences:

Lighting, 4.7

Restrooms, 4.5

Paths and sidewalks, 4.2

4.2.6 REGGIE RODRIGUEZ PARK SPECIFIC SURVEY

Reggie Rodriguez Specific Park Survey was sent to the public after Community Workshop 4. This survey yielded 289 responses from the public. Out of these responses, 53% of the survey takers lived closest to Reggie Rodriguez Park. When asked how often they used the park, 49% responded with about once a week. In regards to park user safety, most users stated that the issues they encountered were uncleanliness or park amenities (specifically restrooms) and vagrants. When shown the potential park redesign in Figure 4-6, many users stated their excitement about walking trails and playgrounds.

Paths (walking and biking), 4.1

Playgrounds, 3.94

Shaded seating areas for social gatherings, 3.92

Improved Park Amenities Preferences:

Restrooms, 4.4

Lighting, 4.2

Site Furnishings, 3.9

4.3 PROGRAM ANALYSIS

4.3.1 PROGRAM DEVELOPMENT

The City offers a variety of recreation services and programs that seek to meet the needs of the community. These services benefit individuals, families, businesses, and neighborhoods as a whole. Assessing current program offerings, determining program gaps, and idenifying community needs will allow the Parks and Recreation Department to identify improvement areas and develop strategies to assist in the delivery of other services. To do so, the City should develop a vision and mission to help identify the core services that will bring the greatest community benefits. It is also important to maintain regular dialogue with users and residents, as well as analyzing current trends, the market, and the data obtained during the community outreach efforts. The Montebello Recreation and Community Services Department should pursue program development around the priorities identified by the program evaluation process, research, and community input, including community events, hobby/interest programs, fitness and wellness programs, nature programs, among others. According to the survey, the top three highest priority programs are community events, fitness and wellness programs, and outdoor recreation programs. The following criteria should be analyzed when developing new programs:

- **Need**: outgrowth of a current popular program, or enough demonstrated demand to successfully support a minimal start (one class for instance).
- **Budget**: accounting for all costs and anticipated (conservative) revenues; should meet cost recovery targets established by the department.
- **Location**: appropriate, available, and within budget.
- **Instructor**: qualified, available, and within budget.
- **Materials and supplies**: available and within budget.
- **Marketing effort**: adequate and timely opportunity to reach intended market; (either existing marketing budget or as part of new program budget).

New programs should be based on community demand and trends. Careful consideration, planning, and communication with the community are required. Due to the inability to predict the success of certain activities and programs, the City should engage in continuous creative assessments, surveying, research, and planning for viability. Additionally, new programs should be well advertised to provide the best possibility of success. Available facilities and funding must be considered when adding or expanding programs, as this may hinder potential opportunities in some cases.

4.3.2 PROGRAM EVALUATION

All current programs should be evaluated annually to determine if they should be continued, changed, or discontinued. A few simple questions should be asked about each program that includes:

- Is participation increasing or decreasing?
- Is there information contained in user feedback that can be used to improve the program?
- Are cost recovery goals being met? If not, can fees be realistically increased or costs reduced?
- Can the program be offered by a more suitable or more qualified provider?
- Is this program taking up facility space that could be used for expansion of more popular programs or new programs in demand by the community?

4.4 KEY TRENDS

Since the provision of public parks and recreation services can be influenced by demographic preferences, the Master Plan process identified local and national recreation trends that help define what Montebello's residents are seeking. By combining participation levels of the City, resident demographics using data from the U.S. Census Bureau, local community input, and research of relevant national recreation trends, critical insights that help to plan for the future can be found. This section reviews local and national recreation trends relative to Montebello's demographic and identified interests. The current trends impacting City services include:

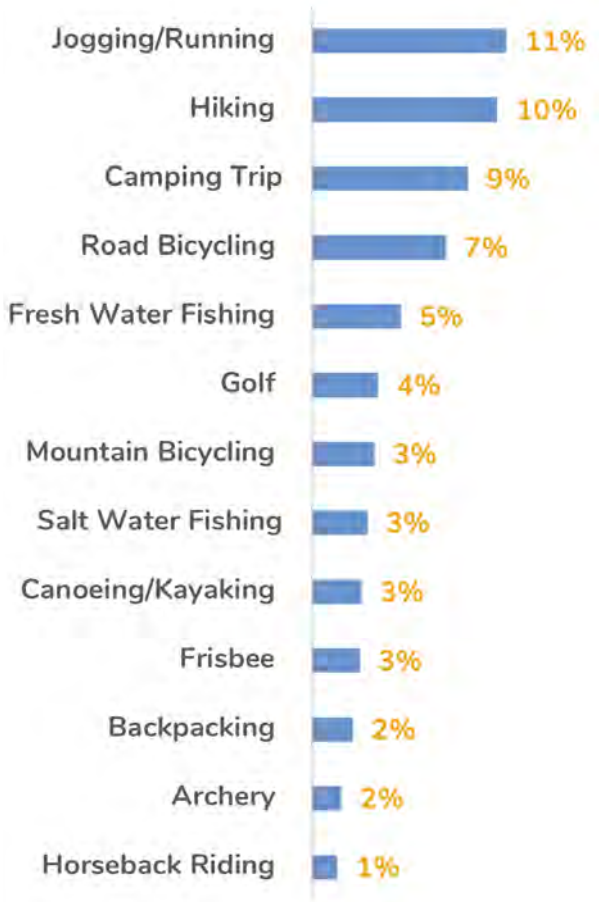
- A focus on walking, hiking, and camping in an outdoor setting.
- Participation in team sports activities.
- Swimming and aquatic-based activities.
- Recreation activity and programs for the different age-based generations.

Learning from these new shifts in participation in outdoor recreation, sports, and cultural programs, a city can then adapt its park requirement planning and development focus.

4.4.1 HOUSEHOLD PARTICIPATION IN OUTDOOR ACTIVITIES

According to the 2020 Sports, Fitness, and Leisure Activities (SFIA) Topline Participation Report, outdoor recreation is an activity group that is continuing to capture the interest and attention of new audiences; besides those older than 55, all other age groups listed camping as the number one activity among non-participants. Figure 4-7 demonstrates the participation in outdoor activities in the City households according to data from the U.S. Census Bureau. Almost 12 percent of households participated in overnight camping trips. Outdoor recreation activities that are growing in popularity are indicated with green arrows whereas activities that are losing popularity are indicated with a red arrow. Camping trips, canoeing/kayaking, fresh and saltwater fishing, frisbee, hiking, jogging/ running, and road biking, were all popular activities; visiting the beach was the number one outdoor recreation activity. Knowing that residents like to visit the beach may be an indication of the community's need for aquatic related programs. Table 4-9 shows the team sports with the highest and the lowest average annual growth from 2012 to 2017. According to the 2018 SFIA, Millennials are more likely than other generations to engage in water sports.

FIGURE 4-7: City of Montebello Outdoor Activity Participation



Source: U.S. Census, ESRI Business Analyst

TABLE 4-9: Water Sport Average Annual Growth

WATER SPORT	5 YEAR AVG. ANNUAL GROWTH
Stand Up Paddling	5.3%
Kayaking for recreation	5.2%
Surfing	1.8%
Sailing	-1.6%
Board Sailing	-1.8%
Wakeboarding	-2.5%

Source: 2020 Sports, Fitness, and Leisure Activities Topline Participation Report, 2014-2019

4.4.2 HOUSEHOLD PARTICIPATION IN TEAM SPORTS

Figure 4-8 demonstrates the household participation of individual and team sports in the City. Swimming, basketball, soccer, and baseball were all activities with over five percent of household participation.

Nationally, according to the 2020 SFIA report, the activity with the most growth over the last five years has been rugby with a more than 16 percent increase.

Flag football, indoor soccer, cheerleading and basketball have all experienced an increase in participation. Ultimate Frisbee, touch football, and fastpitch softball have seen a significant decline in the last five years.

4.4.3 NATIONWIDE FITNESS ACTIVITY TRENDS

According to the SFIA, high impact intensity training (HIIT) and cross-training style workouts, or CrossFit, are two of the top trending aerobic activities. These workouts combine elements of gymnastics, weightlifting, running, rowing, and other sports to create a varied fitness regime.

Concerning individual sports, off-road triathlons have seen a 7 percent average annual growth for the last five years. These races, such as XTERRAs, consist of a competitive combination of swimming, mountain biking, and trail running.

Pickleball, a paddle sport mixing badminton, tennis, and table tennis, is still trending, gaining an average of 8 percent growth each year. Growing even slightly faster is Cardio Tennis at 9.1 percent. Cardio Tennis is a fitness program that focuses on combining a full-body workout with elements of tennis.

Engaging individuals who normally do not participate in recreational activities or visit parks is one of the outreach challenges of parks and recreation agencies. Income has been seen to impact activity rates; those households making under $50,000 are significantly less active than those making more. Data shows that having someone to join first-time users will increase participation more than any other reason.

FIGURE 4-8: City of Montebello Team Sport Participation

4.4.4 LOCAL AND STATE-WIDE RECREATIONAL EXPENDITURES

According to the U.S. Census Bureau, City of Montebello residents spend on average $118 a year on recreational expenditures, totaling almost $19 million in 2017, as seen in Figure 4-9 This included membership fees for social, recreation, and community clubs, fees for recreation lessons, camping fees, and recreation equipment purchases, and other related recreation expenses. According to the Outdoor Industry Economy Report, in California alone, annual consumer spending in outdoor recreation is $92 billion, supporting 691,000 direct jobs. About 56 percent of California residents participate in outdoor recreation each year.

TABLE 4-11: Nationwide Fitness Activity Trends

CHAPTER 5
Future Conditions

5.1 FUTURE POPULATION

In addition to determining the needs and desires of Montebello residents, it is important to examine the future projected City demographics, vacant land, potential growth areas within the City, and future recreation needs for the projected population. Understanding the community's recreational desires, its social makeup, and the City's ability to provide services is key to developing a long-range plan for Montebello's parks and recreational facilities. This chapter highlights the demographic trends and future recreation needs as obtained through the outreach process and the Population Based Standards (PBS). These needs, deficiencies, and demographic changes should influence the City's park and recreation planning through 2035. After 2035, a new park master plan should be considered to calibrate and update these changes and trends.

5.1.1 PROJECTED POPULATION

SCAG provides several resources for population growth projections for jurisdictional planning within the Government's boundary. However, to more accurately project population growth, a thorough analysis of the city's General Pan, the market demand for housing in the given city, vacant land for population growth opportunities, local and regional jobs trends, and other inputs are required. As the City of Montebello was going through a General Plan Update and a Downtown Specific Plan at the time of this report, further population projections based on these planning efforts were not available in the population projections shown in this report. However, a percentage growth rate was generated after a close analysis of various data sources. These sources include the following:

- Various interviews with the consultant leading the General Plan Update and Downtown Specific Plan planning efforts.
- Close analysis of the two reputable projection scenarios - SCAG Demographic and Growth Projection report and the SCAG Regional Housing Needs Assessment (RHNA) report.
- Analysis of various City planning efforts and vacant land leading to future potential growth corridors, catalytic sites, and growth trends related to transit oriented development.

TABLE 5-1: Population Projection

Year	Population
2018	63,275
2020	63,833
2025	69,382
2030	74,931
2035	80,480

This study that was developed for this project is herein referred to as the "Anticipated Growth Scenario" (AGS). The AGS represents the mean growth percentage between the SCAG growth projection (3% annual growth) along with the *RHNA growth projection (40% annual growth). The AGS was then skewed to the upper quartile (75%) of the mean between these two data sets.

Based on the analysis from the AGS project, the City is projected to have a population of 80,480 persons in 2035. This represents a 26% increase over the 2017 population of approximately 16,647 persons. This population growth rate demonstrates an aggressive growth pattern. Although this level of growth may not occur, planning to accommodate this level of growth is prudent as it may represent a worst-case scenario.

*Derived from the 5,174 housing units needed multiplied by the average household size at 3.3

5.1.2 VACANT LAND

The City of Montebello has 424.19 acres of vacant land, as determined by the October 10, 2020 parcel assessment information from LA County. Planning efforts for the various vacant land parcels are currently underway, although changes in desired use may result in future planning efforts, including this Master Plan. To allow for planning decisions to be made, all parcels are shown in Figure 5-1. Further descriptions of these 'opportunity sites' are found in this chapter. The currently vacant land allows for more accurate population projections as these represent easier opportunities for new development and growth.

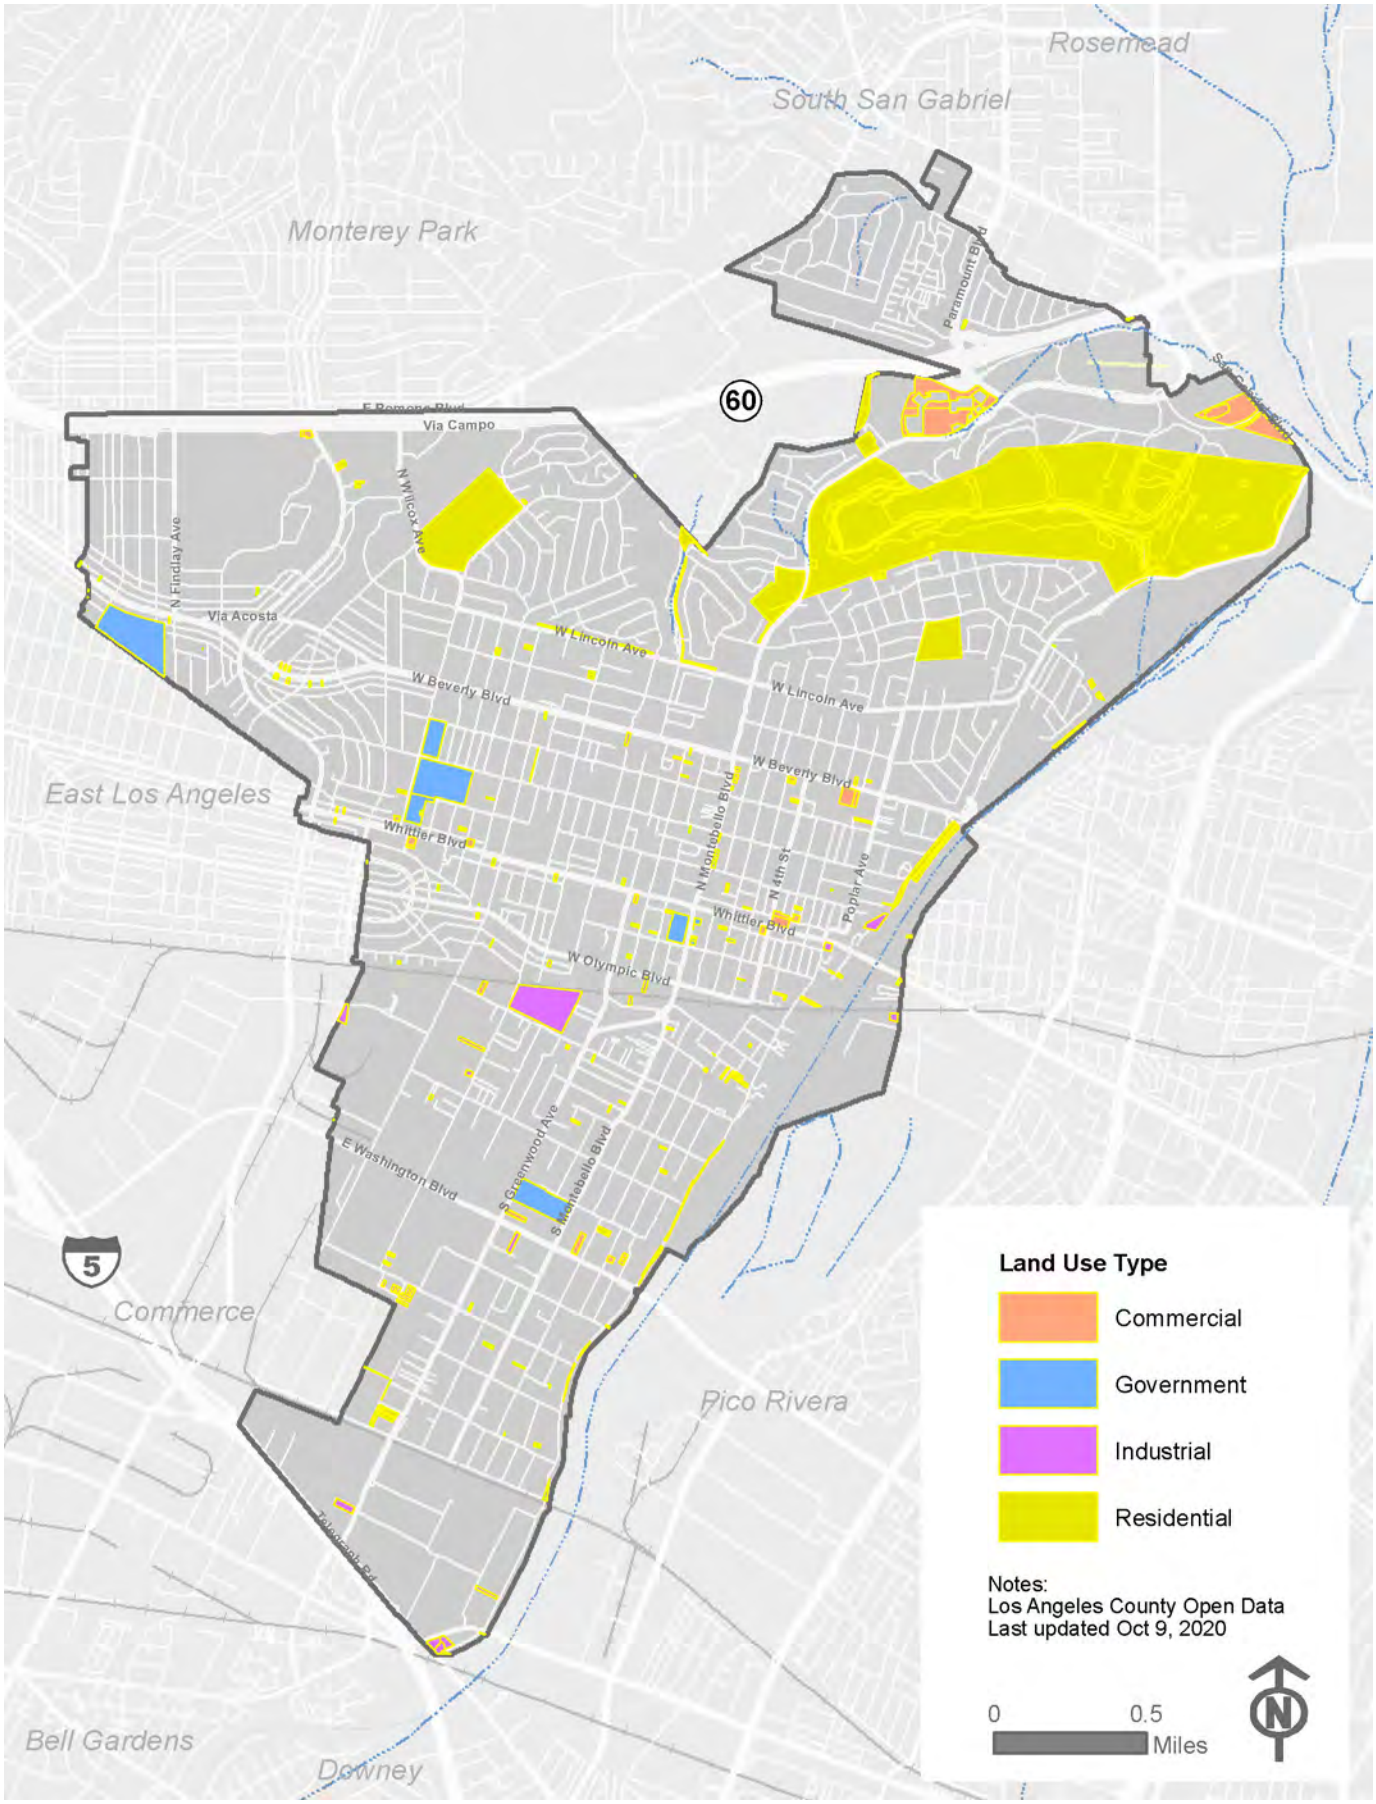

FIGURE 5-1: Vacant Land

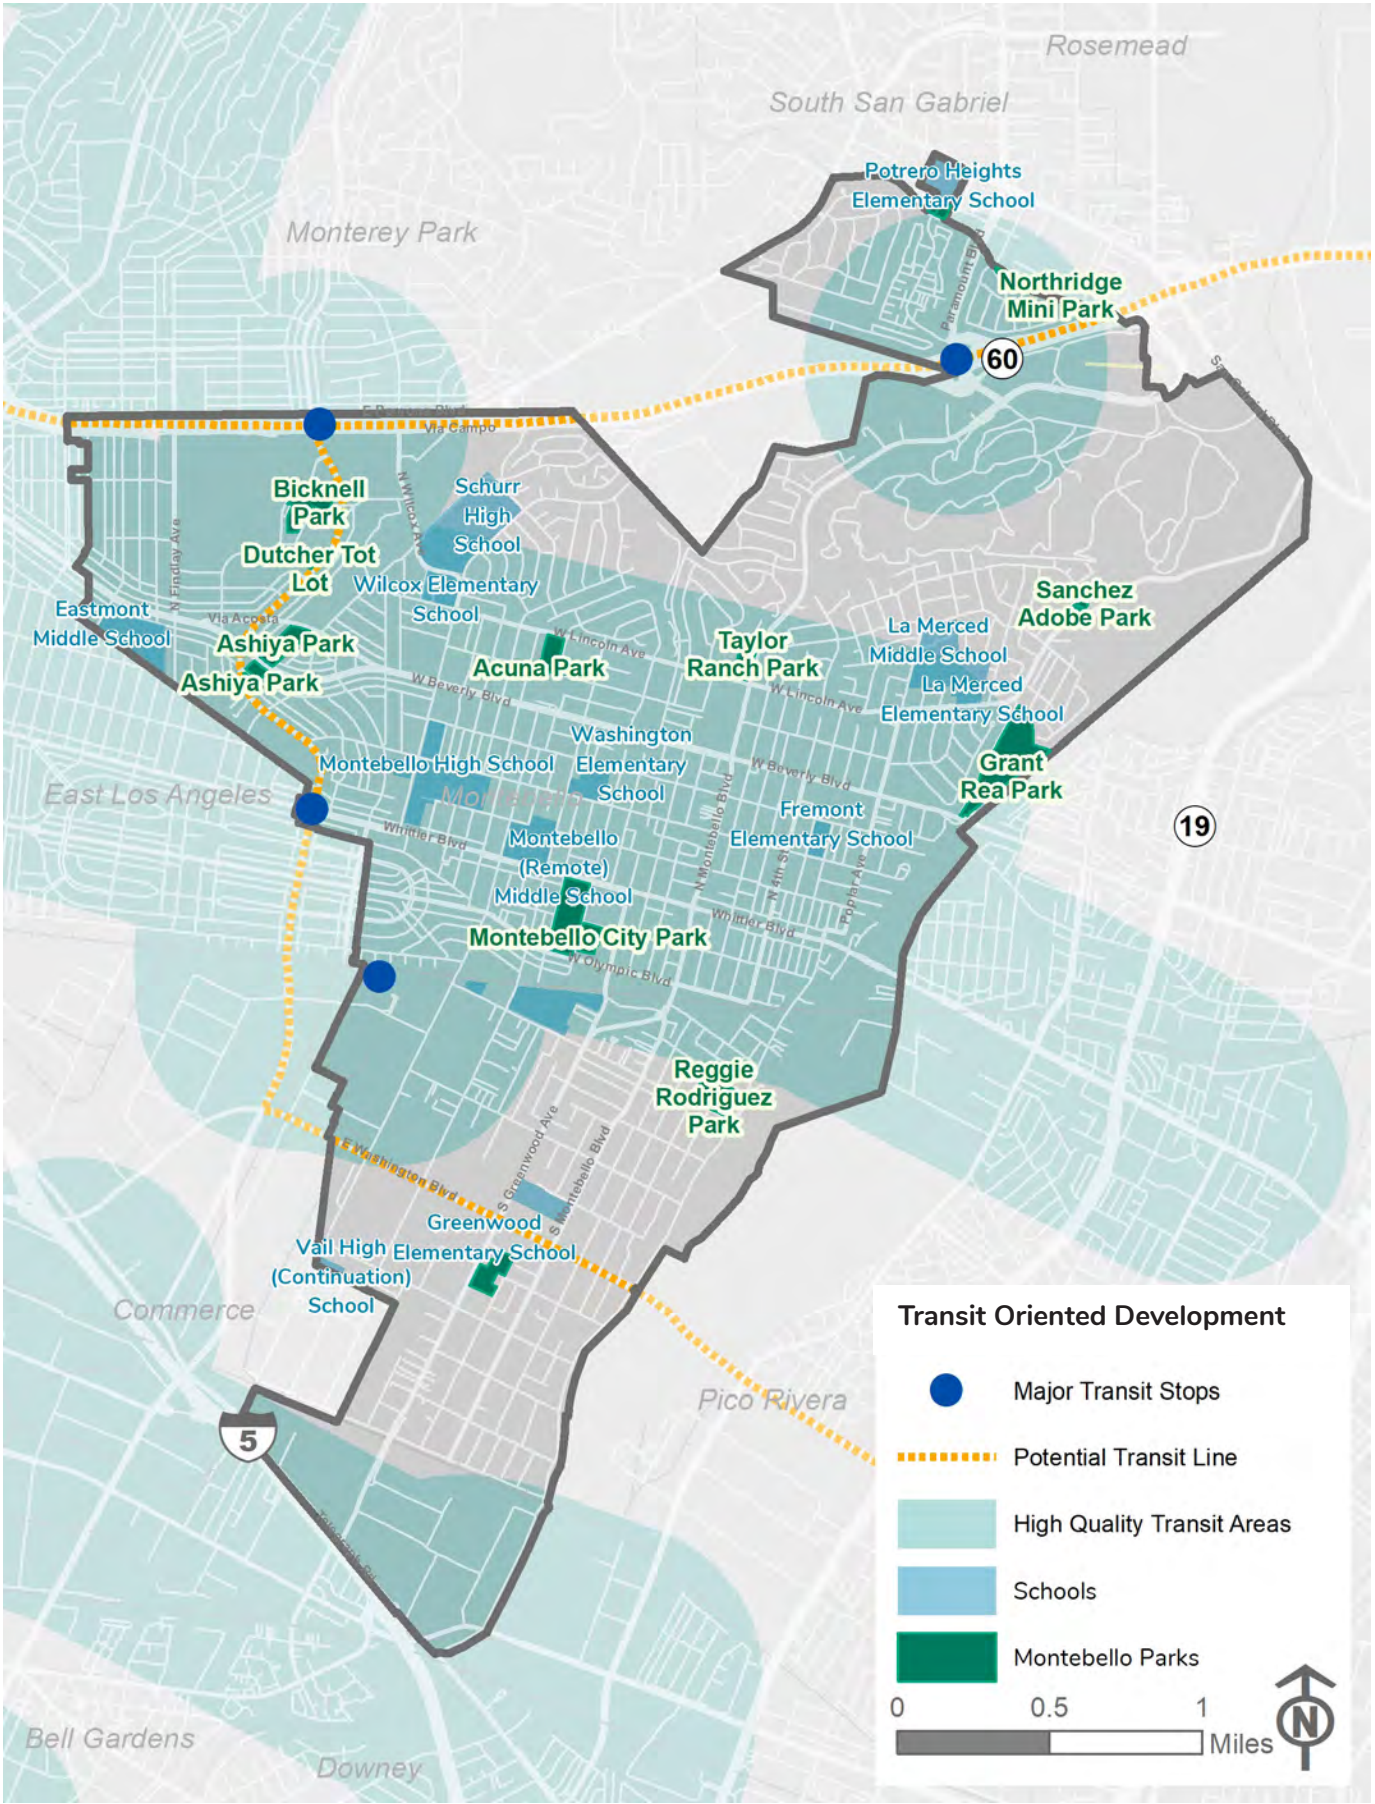

FIGURE 5–2: Transit Oriented Development

5.1.3 TRANSIT ORIENTED DEVELOPMENT

As vacant land is limited in the urbanized canvas of Montebello, the development trend that's likely to occur is transit oriented development (TOD). TOD typically occurs as infill development, which is where an existing parcel is redeveloped to accommodate more intensive and denser usage of the parcel. These types of developments are usually catalyzed by larger transportation planning efforts occurring near or around major transportation corridors and transit stops. Furthermore, these efforts are typically incentivized by the local government as they present a smarter growth pattern than isolated growth areas where public transportation and other services may be lacking. These areas may be the focus of the current General Plan Update and Downtown Specific Plan where upzoning or rezoning of parcels may occur and underutilized surface lots, warehouses, and one-story buildings are converted to low-rise or mid-rise towers. The challenge with infill development as it relates to park planning is that it typically exacerbates the demand for park services within the given growth areas while not providing much parkland in exchange within the vicinity of growth, creating additional pressure to the parks within walking distance.

Major Transit Stops

With the increase of population and catalytic sites throughout Montebello, TOD's will be on the rise. Its location near the LA Metropolitan Area makes Montebello an ideal area for TOD's. The blue points in Figure 5-2 are the major Transit stops in Montebello where TOD's would most likely be centered around. The following transit stops are Major Transit Stops:

- Paramount/Marketplace;
- Garfield/Via Campo;
- Garfield /Whittier;
- Montebello/ Commerce Metrolink Station.

High Quality Transit Areas

High-quality transit areas include the area within a half-mile radius around major transit stops or transit routes. These are the areas most TOD's would be developed and the City's population would increase. These areas are shown in Figure 5-2 and depicted in light blue.

Potential Gold Line Extension

The potential Gold Line Extension (see Figure 5-2) offers a great opportunity for connecting Montebello transit with the greater LA Area. The Gold Line is an eastward extension along the 60 Freeway to the Montebello Town Center, and a southeasterly extension to Whittier via Garfield Ave. and Washington Blvd. This corridor already benefits from high transit use, pedestrian-friendly design, and numerous job and entertainment destinations, catalyzing TOD's.

TOD Growth (Case Studies)

Noteworthy examples of TOD within the Los Angeles region are the Van Nuys Station and Mariachi Plaza:

The Van Nuys Station is a bus station on the current Orange Line and the future East San Fernando Valley Line. This bus station is located in a suburban neighborhood and surrounded by mainly low-rise residential and commercial uses. In its current location, the bus station serves about 30,783 people and as a TOD, the population increase could rise to 38,095, according to the 2018 UCLA Transit Oriented Los Angeles report. As a TOD the neighborhood surrounding the bus stop will become denser and infill of 800 sf/unit buildings will increase in the area.

Van Nuys Station

The Mariachi Plaza Station is connected to the Gold Line, which may also run through Montebello. This light rail station is in Boyle Heights at the commercial center of the Mariachi Plaza off of 1st Street and Boyle Avenue.

Mariachi Plaza Station

5.2 POPULATION GROWTH DISTRIBUTION

Based on the demand that TOD may have on the City, an analysis of the growth distribution was done to better understand growth areas within the City. Since growth will be focused on key corridors and around future transportation hubs, a focused analysis that takes the anticipated growth and divides it amongst these areas is the best method to understand distribution. Table 5-2 illustrates the anticipated distribution based on this analysis. Furthermore, Figure 5-3 shows these areas and their anticipated growth percentages as it relates to the City map. Note that these projections are preliminary and will be examined in greater detail and refined during the General Plan update and Downtown Specific Plan process; however, this provides a general framework to explore growth distribution within the City. The areas identified within the growth areas are:

Area A – Beverly Boulevard:

Beverly Boulevard will likely experience a level of growth that is slightly above the rate of growth within the City but modest compared to other key corridors. This is due to the commercial presence of Beverly Boulevard and the fact that most administrative and governmental facilities occur along this corridor which will restrict residential growth. However, some areas along Beverly Boulevard may witness some infill development resulting in some growth of the area.

Area B – Montebello Boulevard North:

The north end of Montebello Boulevard may see growth mildly above the City's rate of growth. This is due to the commercial presence, the existing Taylor Ranch Park site and other areas that may restrict residential growth. However, some areas south of Beverly Boulevard and adjacent to the Whittier Boulevard growth / downtown specific growth area may witness some infill development resulting in mild population growth.

Area C – Whittier Boulevard:

Whittier Boulevard will likely experience the highest level of growth within the existing developed areas within the City due to the Downtown Specific Plan on the east end of this corridor area. Additionally, this corridor is a SCAG High Quality Transit Area and has a Major Transit Stop on the west end of the corridor. The existing sparse development on the far east end of the identified area along the Rio Hondo may experience additional growth due to the available land. All these factors contribute the higher percentage of population distribution for the corridor.

Area D – Greenwood Avenue:

Greenwood Avenue will likely experience a modest level of growth compared to the rest of the City. This is due to the adjacency to Washington Boulevard and the likely increase in density that may occur due to a potential Gold Line expansion. Additionally, this area already has some density compared to the rest of the City which may be redeveloped to accommodate additional housing units.

Area E – Montebello Boulevard South:

Montebello Boulevard South will likely experience a modest level of growth compared to the rest of the City. Similar to Greenwood, this is also due to the adjacency to Washington Boulevard and the likely increase in density that may occur due to a potential Gold Line expansion. This area is mainly R1 residential zoning which may change if the community and planning officials feel that higher density along this corridor is desired.

Area F – Washington Boulevard:

Washington Boulevard will likely experience the second highest level of growth within the existing developed areas within the City along with the catalytic sites. This is due to the increase in density that may occur due to a potential Gold Line expansion. Further, this area has other growth opportunities on the western end that are currently light industrial uses. These areas may be rezoned if the Gold Line becomes a reality.

Area G - Catalytic Sites:

The catalytic site areas are specific areas that may be sought after for redevelopment in the future. These sites currently have vast parking lots, unused land, are underutilized or simply inefficient in their uses. These sites allow for possible growth opportunities as redevelopment may include additional housing in order to achieve the RHNA goals.

Area H – Montebello Hills:

The Montebello Hills site is a specific plan area with up to 1,200 planned residential dwelling units. Using the average household size of 3.3 persons, an approximate population increase of 3,995 people could be anticipated in these areas if approval, construction, and occupancy occurs. This exhibits the largest population growth area within the City. As such, the distribution accounts for this population as closely as the percentage increments allow.

TABLE 5-2: Population Distribution Table - 2035 Projection

AREA NAME	AREA ID	PER	TOTAL
Beverly Blvd.	A	5%	832
Mont. Blvd. N.	B	3%	499
Whittier Blvd.	C	20%	3,329
Greenwood Ave.	D	8%	1,332
Mont. Blvd. S.	E	8%	1,332
Washington Blvd.	F	15%	2,497
Catalytic Sites	G	15%	2,497
Montebello Hills	H	24%	3,995
Rest of City	-	2%	333
All	-	100%	16,647

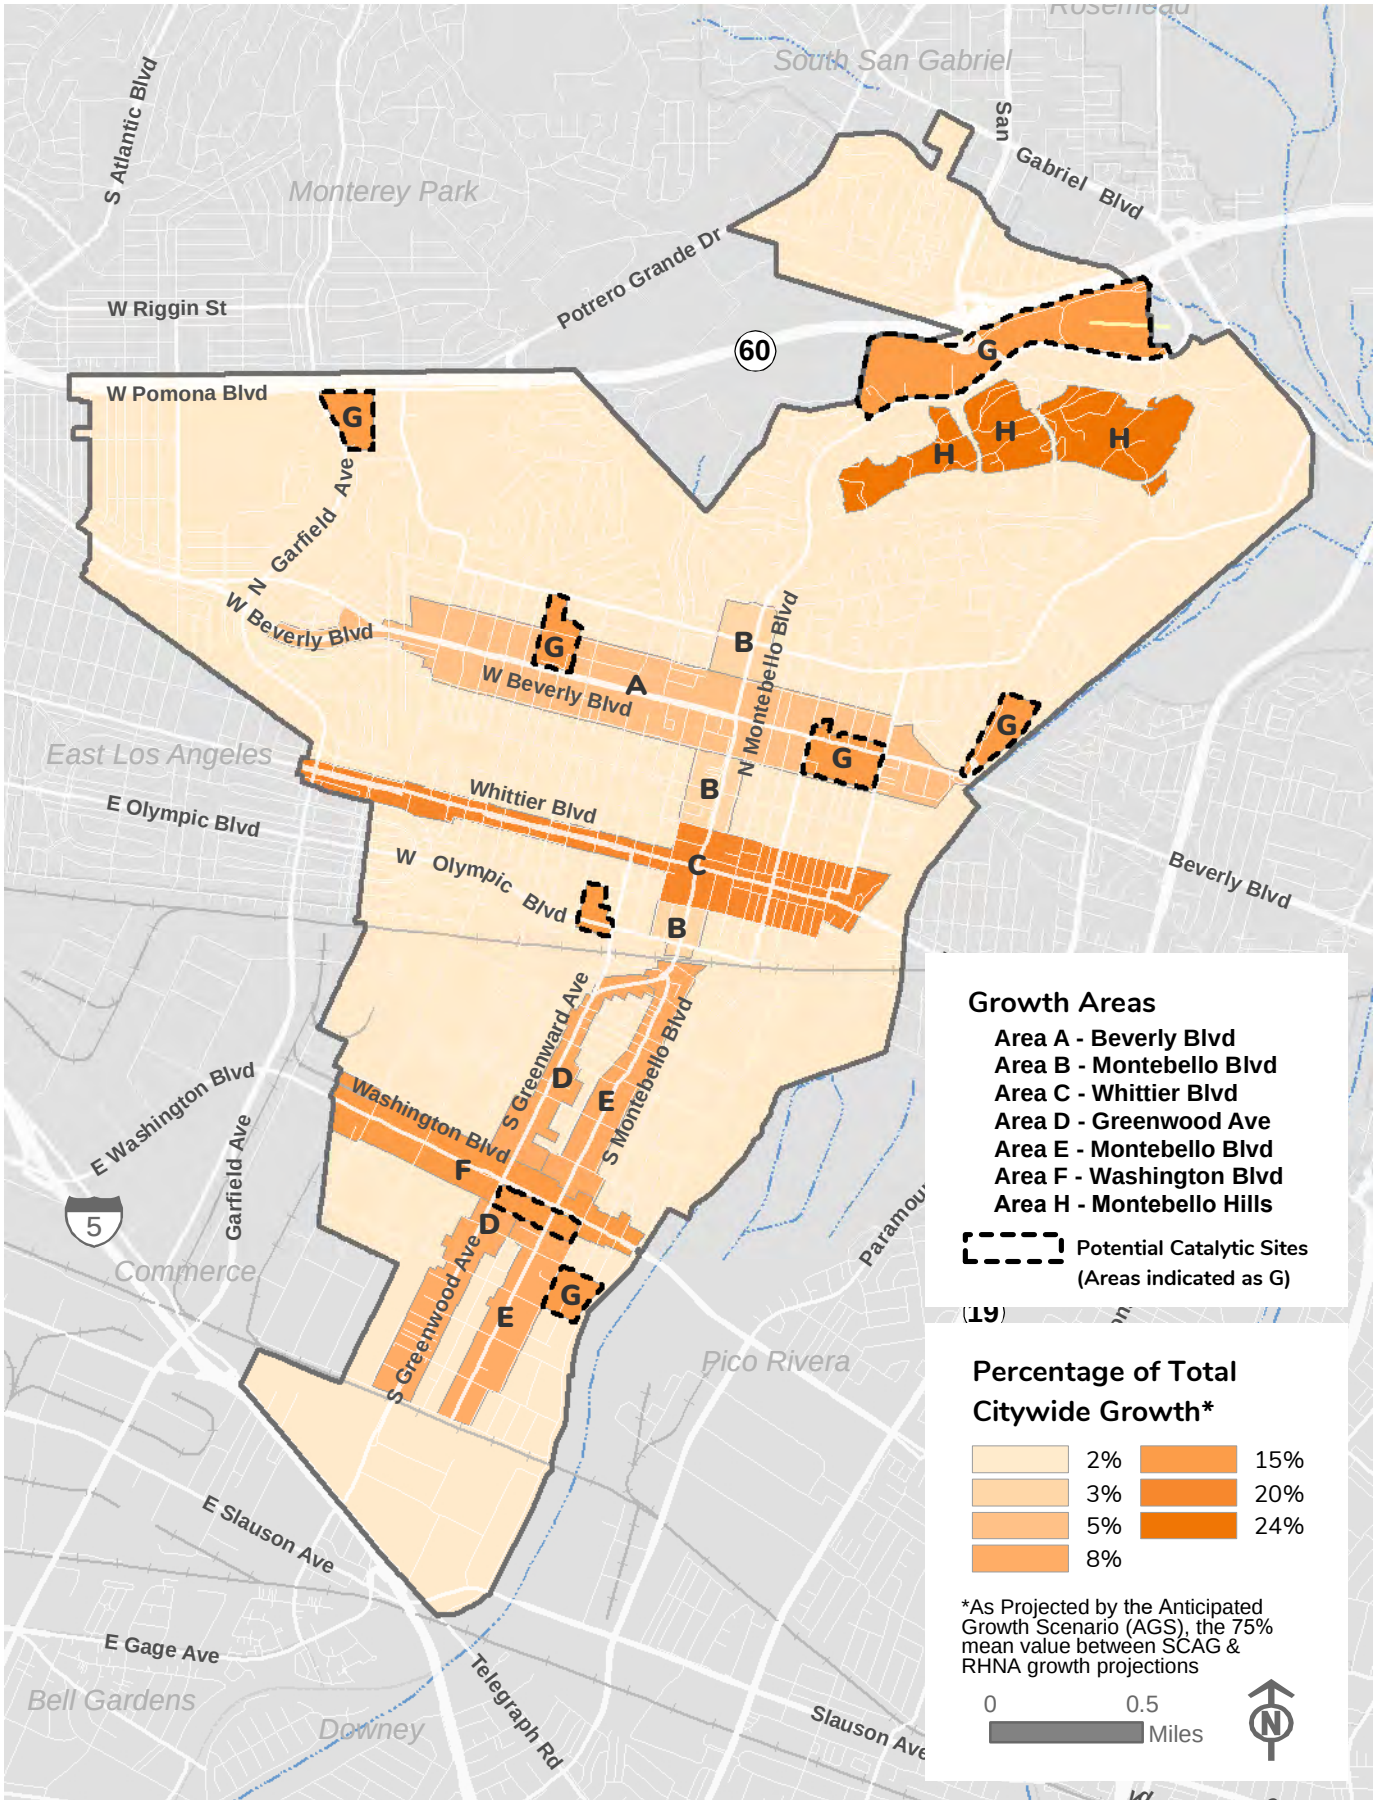

FIGURE 5-3: Specific Plan Area and Corridors

5.3 FUTURE LOS NEED ANALYSIS

The future LOS need analysis is a study to determine which park amenities will be in higher demand within the City as it continues into the near future. The analysis provided an adjustment factor to the NRPA national guidelines to determine a forecasted demand resulting in the 'Recommended City Standards' amount in the LOS amenities table found in Table 5-3. The adjustment factor is based on sports trends, user input data, and current recreation participation numbers. This analysis then took a numeric adjustment which correlates with a low, neutral, high, and very high classification. This classification adjustment was the result of the following studies as in presented in Chapter 4 in greater depth:

- Amenity Trends based on the 2020 Sports, Fitness, and Leisure Activities (SFIA) Topline Participation Report
- User input data from the collective user outreach including the statistically valid surveying, park specific user surveys, and stakeholder interviews
- The current Montebello household participation in outdoor activities, team sports, and fitness activities

TABLE 5-3: Level of Service Adjustment Table

	FACILITY / AMENITY	NEED ADJUSTMENT	Trends	User Data	Rec Participation

5.4 FUTURE POPULATION BASED SERVICE ANALYSIS

For the purposes of this chapter, a population-based service analysis was done for future conditions based on population forecasts from the SCAG RGF which is projected on the low end and the RHNA population estimates (projected on the high end). Table 5-4 shows the difference of this range along with the utilized AGS scenario. The results are that amenities that currently exceed the standards are expected to keep meeting them by 2035. However, the facilities that do not meet the level of standards today will have a greater deficiency in the future, as shown in Table 5-4. This type of analysis is important because it allows the City to identify the future needs and deficiencies of the community and plan accordingly, especially around those areas that are expected to gain the most population by 2030. New community parks and recreation facilities should be centered in those areas with deficiencies that are expected to concentrate more density, especially near developments that meet the criteria for density incentives for low- and moderate-income units. This will make these facilities more accessible to a higher percentage of users who drive, bike, or walk. Future development should be located within shorter distance of these community parks and recreation facilities to ensure an adequate level of service while at the same time encouraging alternate modes of traveling, traffic reduction, and healthier lifestyles.

TABLE 5-5: Future Distribution

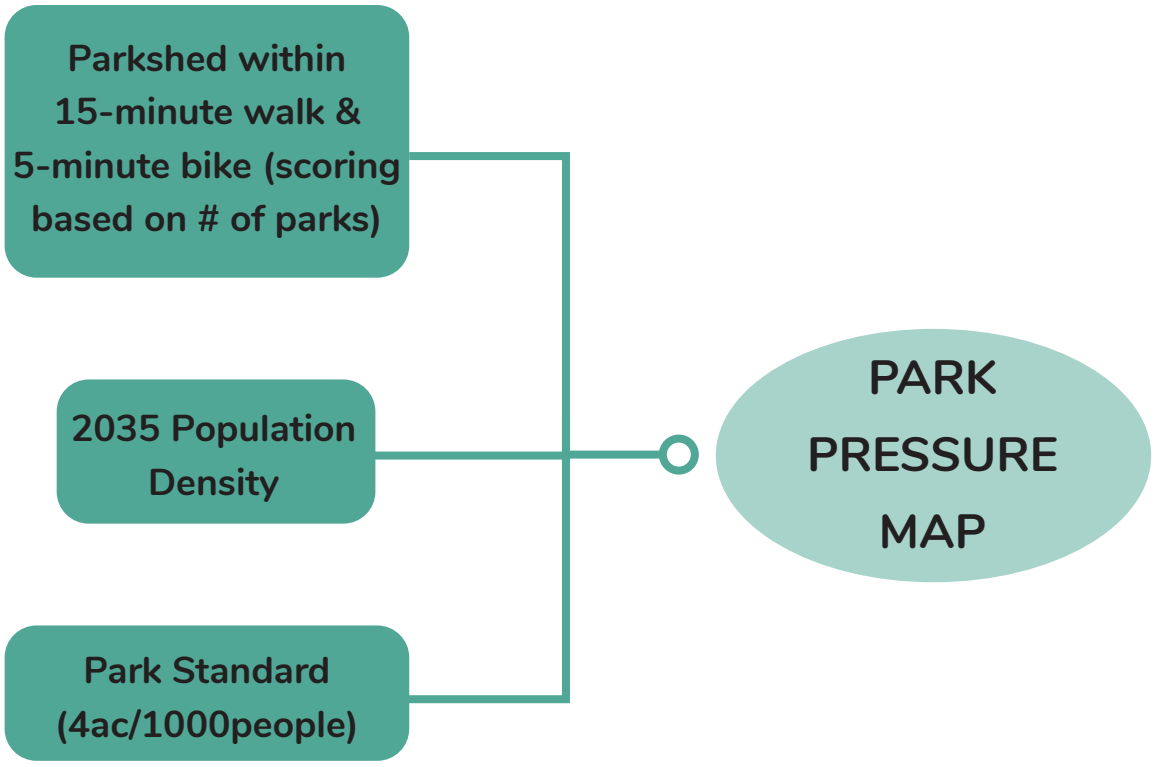
Park Service Area	# Population Served 2017	% Population Served 2017	# Population Served 2035	% Population Served 2035
15-Minute Walking Distance (Neighborhood Parks)	22,858	36.5%	26,135	32.5%
15-Minute Walking Distance (All Active Parks)	23,455	37.4%	25,183	31.3%
15-Minute Walking Distance (All Parks)	25,654	41.0%	29,125	36.2%
5-Minute Driving Distance (Community Parks)	27,086	43.2%	30,046	37.3%
5-Minute Driving Distance (All Parks)	28,481	45.5%	32,138	39.9%

5.4.1 FUTURE PARK PRESSURE

Park pressure is a mapping study that analyses park size in relation to population density and quantifies how population density affects parks by capturing the potential demand. This study assumes that each resident is using the park closest to them. Park pressure was generated by defining a "parkshed" around each park in the City which is defined by a polygon containing all the households. The population within each parkshed was then calculated to estimate the number of potential park users within each parkshed. The acreage of the park was then used to calculate the number of park acres available per 1,000 people within the parkshed.

Areas within the City with fewer park acres available per 1,000 people within the parkshed are more likely to have heavier use, while those with more park acres available may be used less heavily. Population density can greatly affect park pressure. So as the City densifies in areas around the defined TOD areas, the parks serving those will be more impacted and will experience greater park pressure.

TABLE 5-6: Park Pressure of Inputs



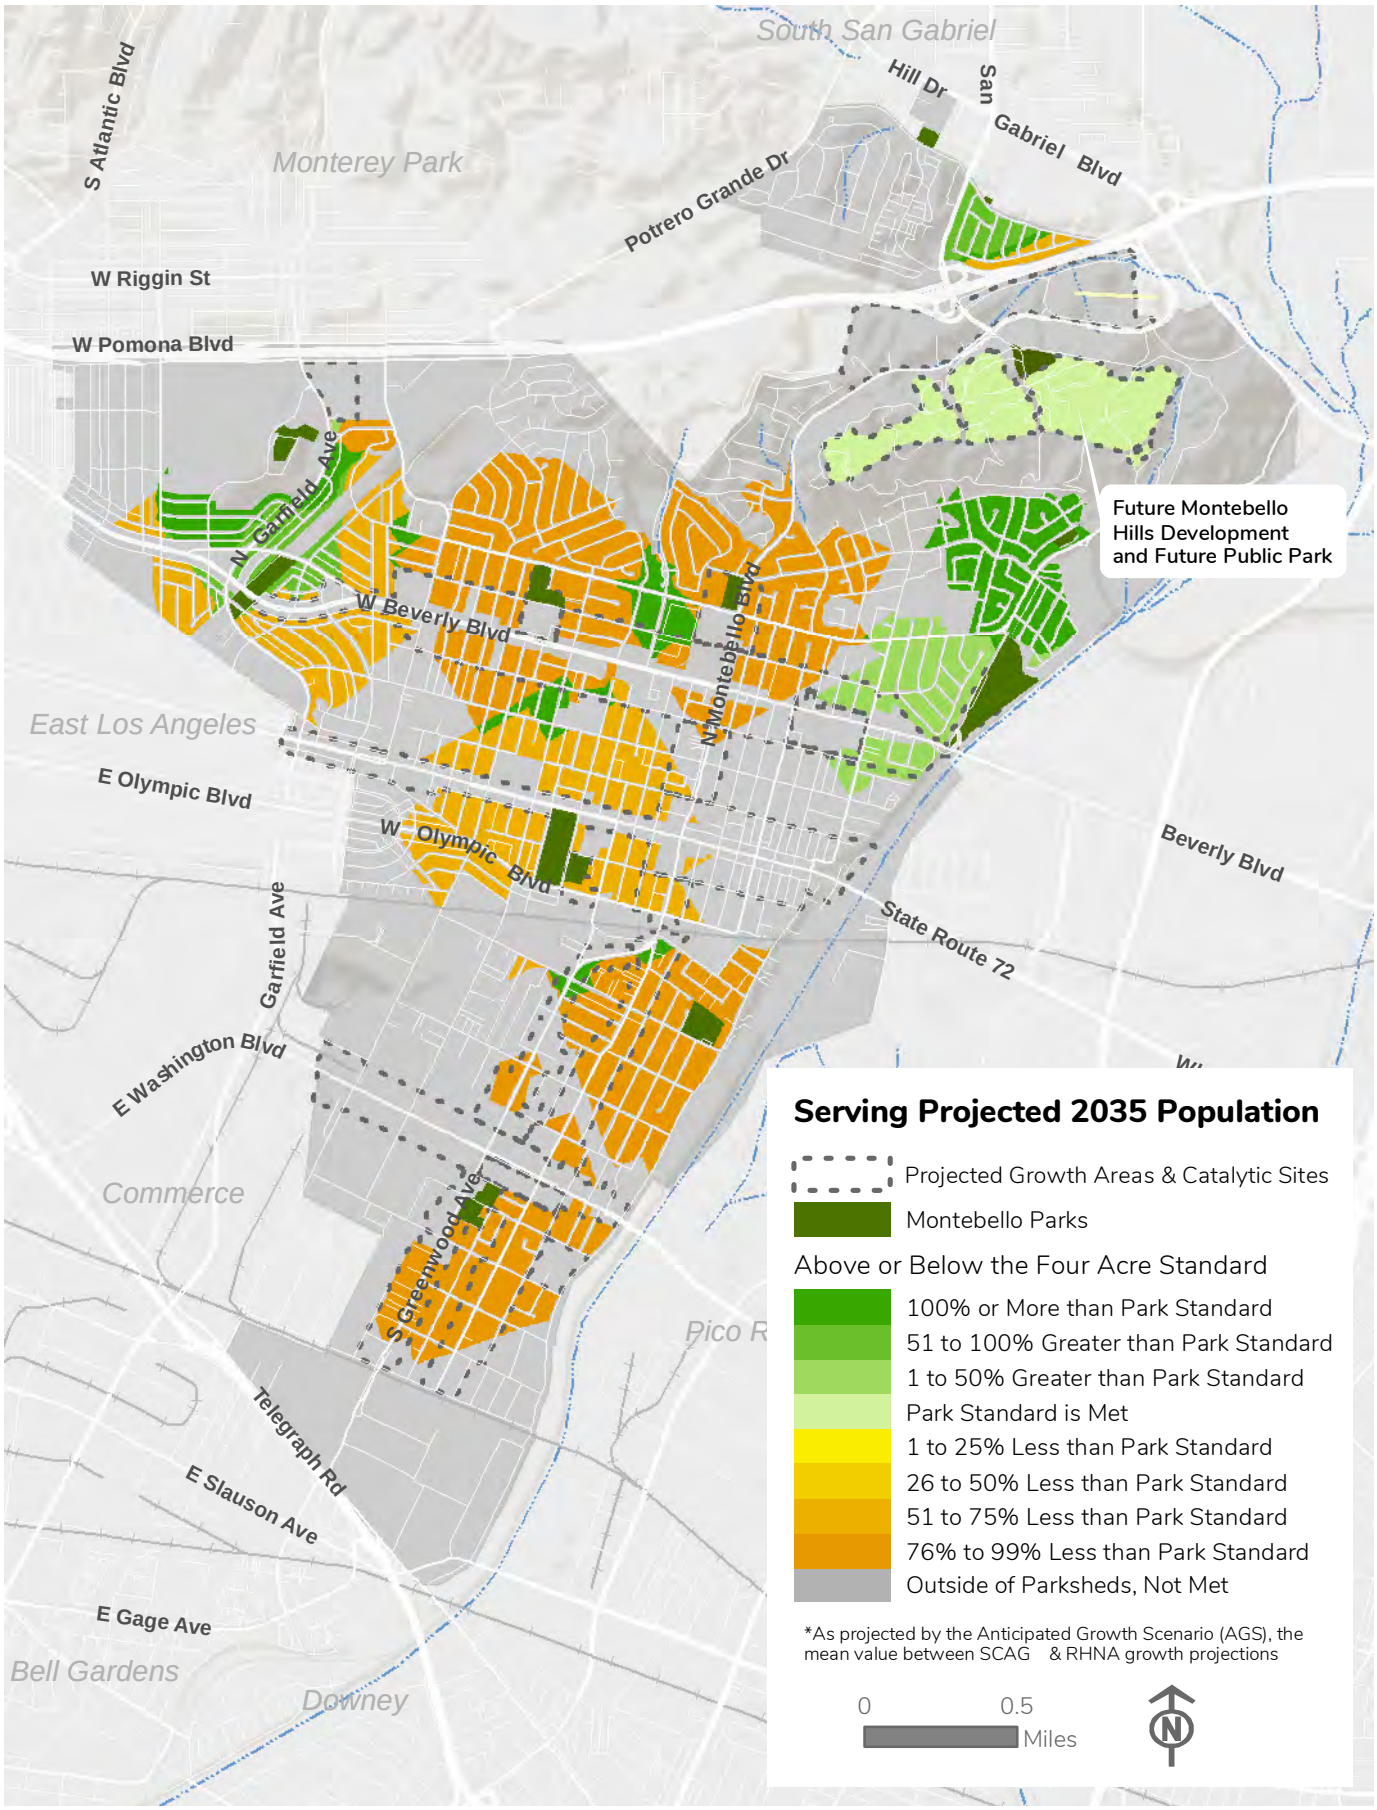


FIGURE 5-4: 2035 Park Pressure

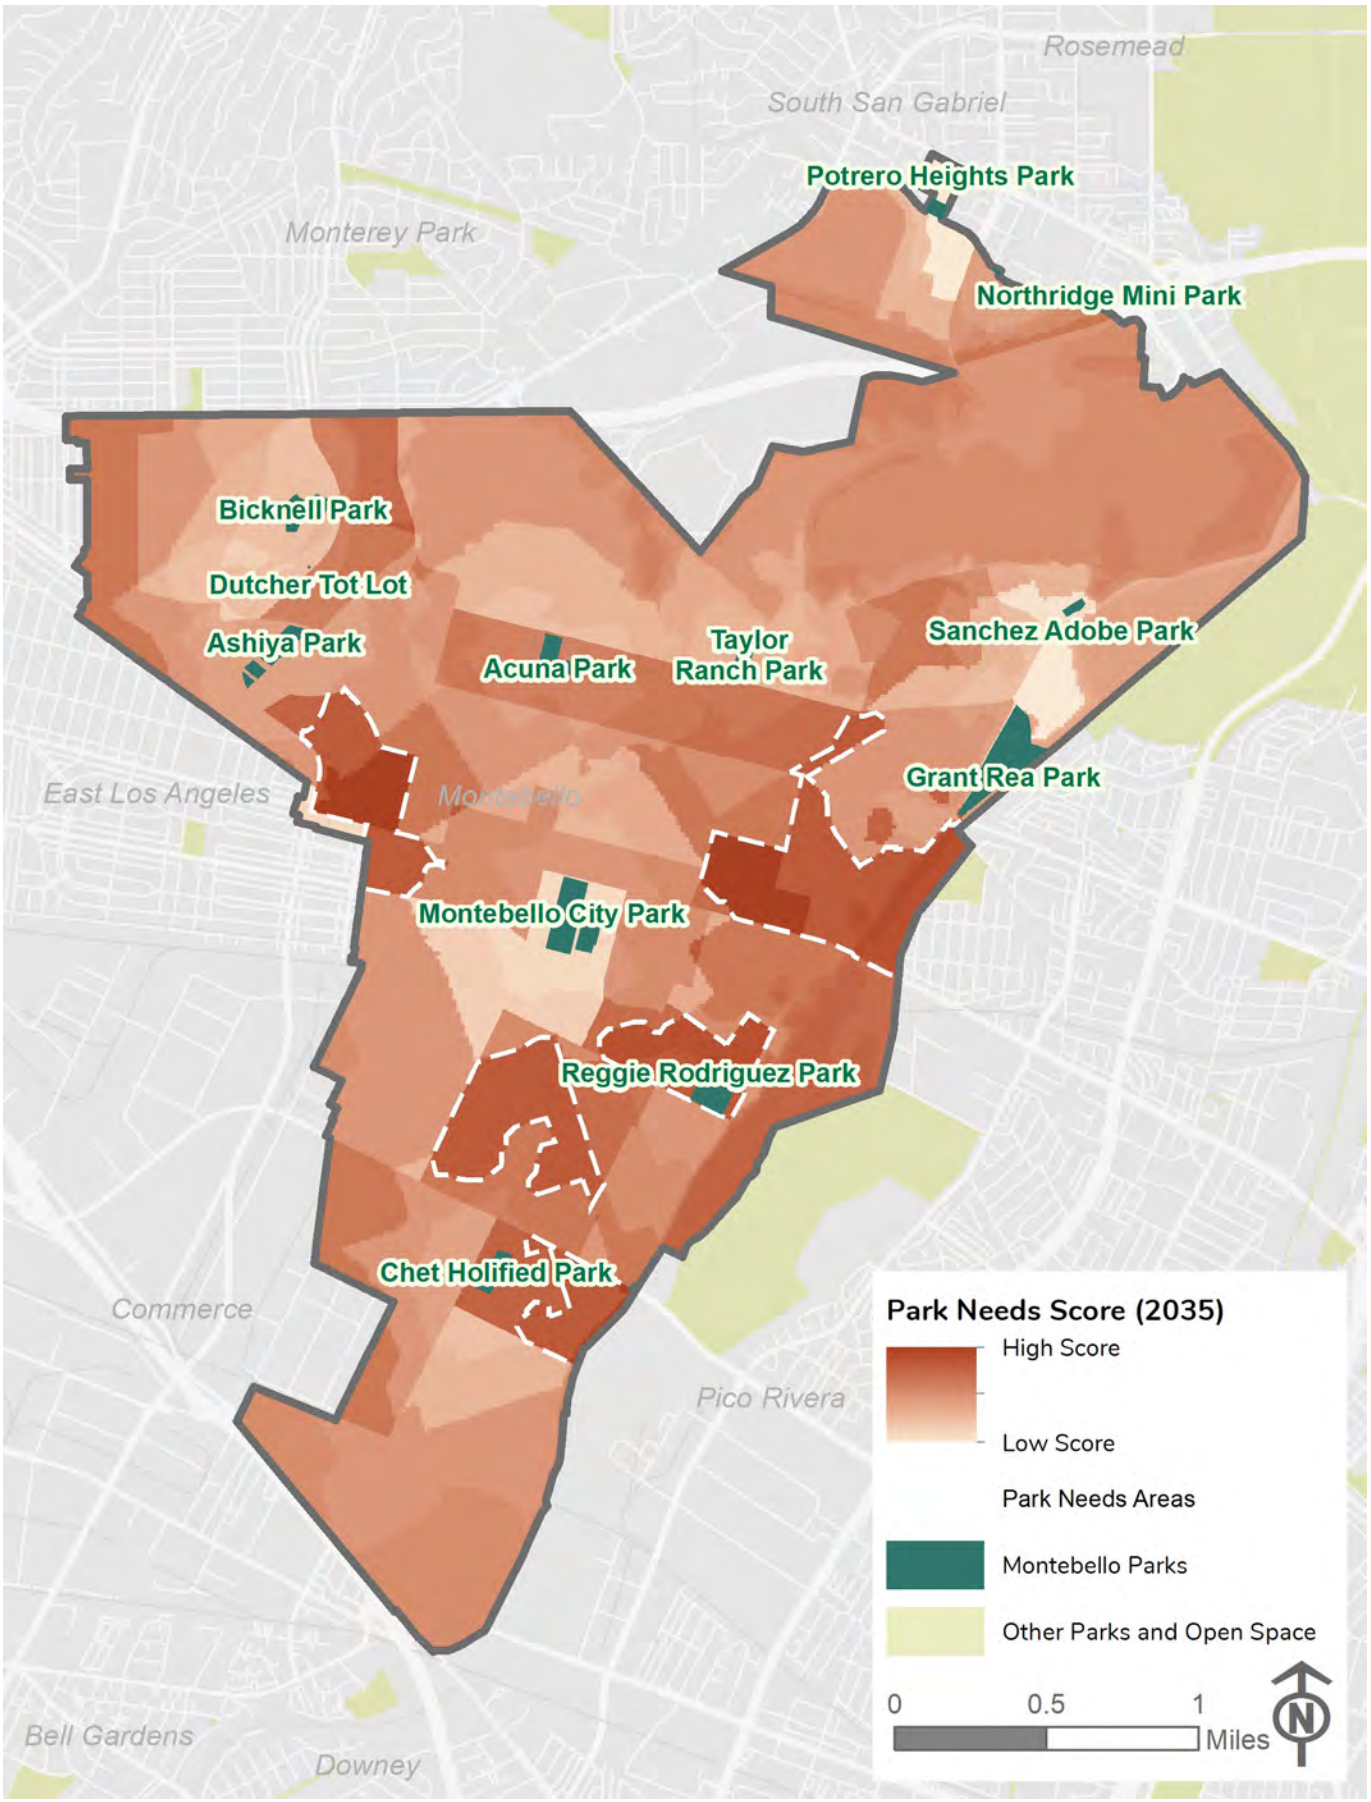

FIGURE 5-5: Park Needs Assessment

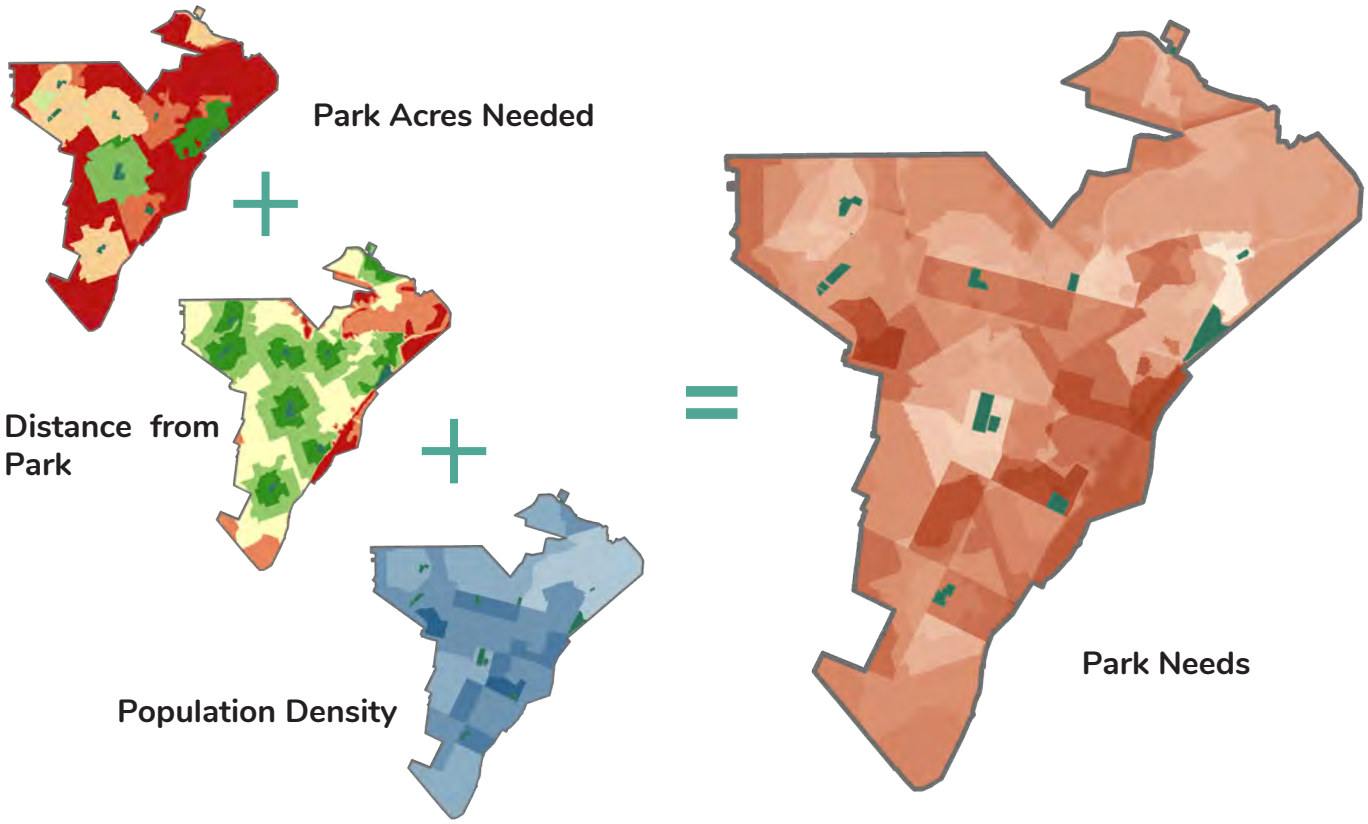
5.4.2 FUTURE CONDITIONS GDA

In addition to the existing condition GDA performed in Chapter 3, access distances were calculated for all parks and future parks including special recreation facilities. This analysis used 2035 future populations, as projected by the AGS.

For these future conditions, the parks and recreation facilities GDA effort looked at the percentage of future population that will be serviced by the existing community parks, neighborhood parks, recreation centers, and special use parks. The future percentage of population being serviced by these facilities was evaluated using actual walking, driving, or biking distances utilizing the existing network routes that lead to park and recreation facilities (see Figure 3-3 and Figure 3-4). This analysis indicates those neighborhoods that might be currently adequately serviced by parks and other recreation facilities, but that may experience future deficiencies based on the expected population growth. Additionally, the existing park amenities are analyzed based on a ratio of amenity per future population. Given the current population growth trends and the location of existing facilities, about 42 percent of residents will be served by the 15-minute walkshed for the neighborhood parks and 50 percent of the community will be served by the 5-minute driveshed for parks, community centers, special use parks, and regional parks (see Table 5-5).

TABLE 5-7: Park Need of Input

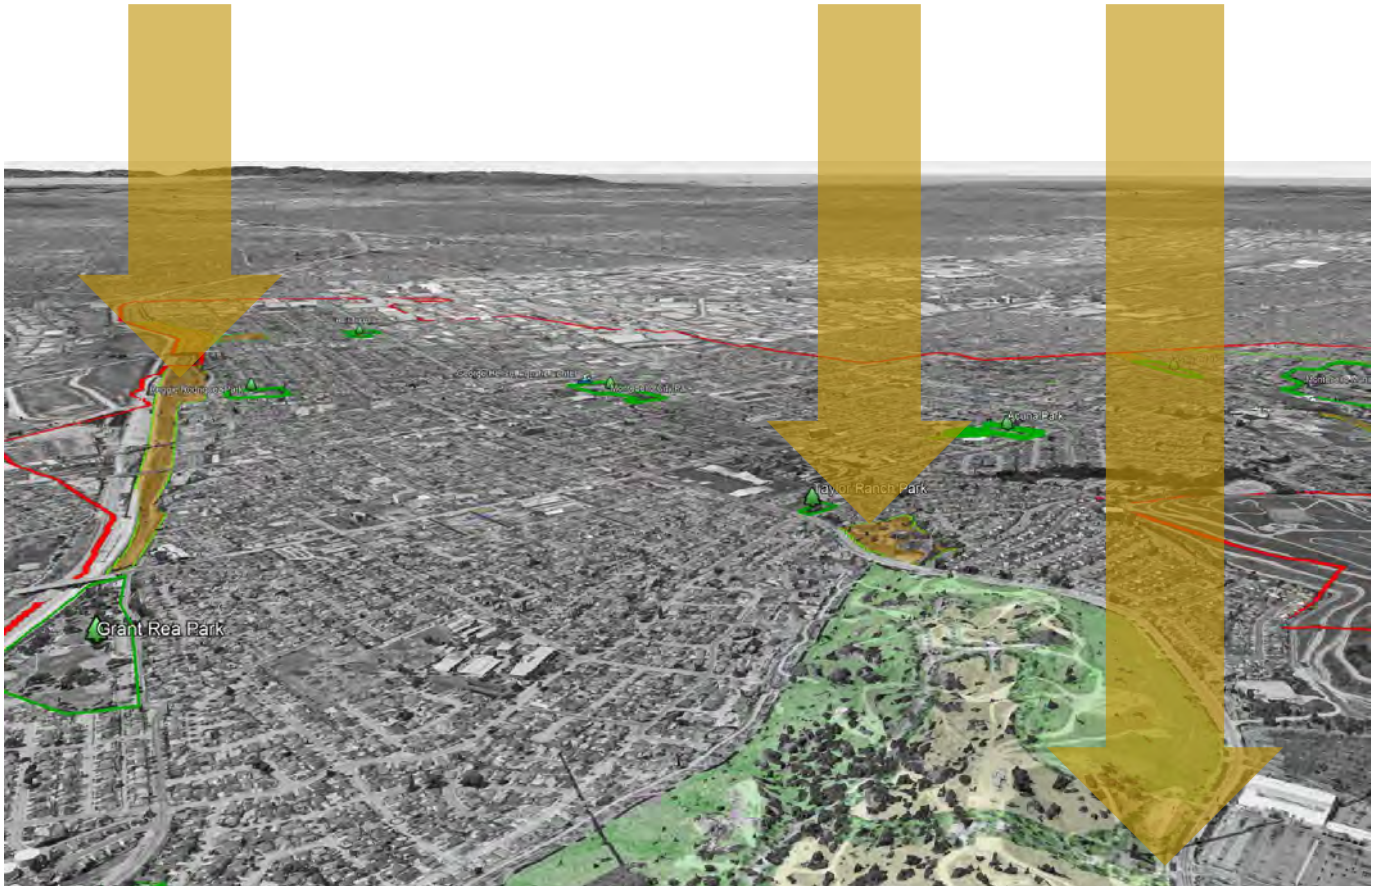


5.5 FUTURE OPPORTUNITIES AND PARK INFILL

In order to maintain park equity throughout Montebello and close geographic LOS gaps, parks with new facilities should be added in these areas when possible. The City should ensure that new developments build parks to cover their share of park requirements. Where areas are park or facility deficient, staff should require new development to construct parks rather than accept the in-lieu fees so that the deficient resource can be made available to the future population, within a reasonable distance. However, given the likely TOD development trends for Montebello, in-lieu fees may be appropriate in instances where opportunity infill areas are not possible. In which case, if amenity deficiencies occur within the proposed development's park service area, in-lieu fees may be considered to help pay for enhancements of existing park features, adding new park amenities, and to help mitigate the amenity LOS as deemed necessary. The potential properties for future park sites is very preliminary and is not necessarily a recommendation, just an opportunity to explore. Their presence here does not obligate the City to implement or for the current owner to sell.

Infill area A

Infill area B



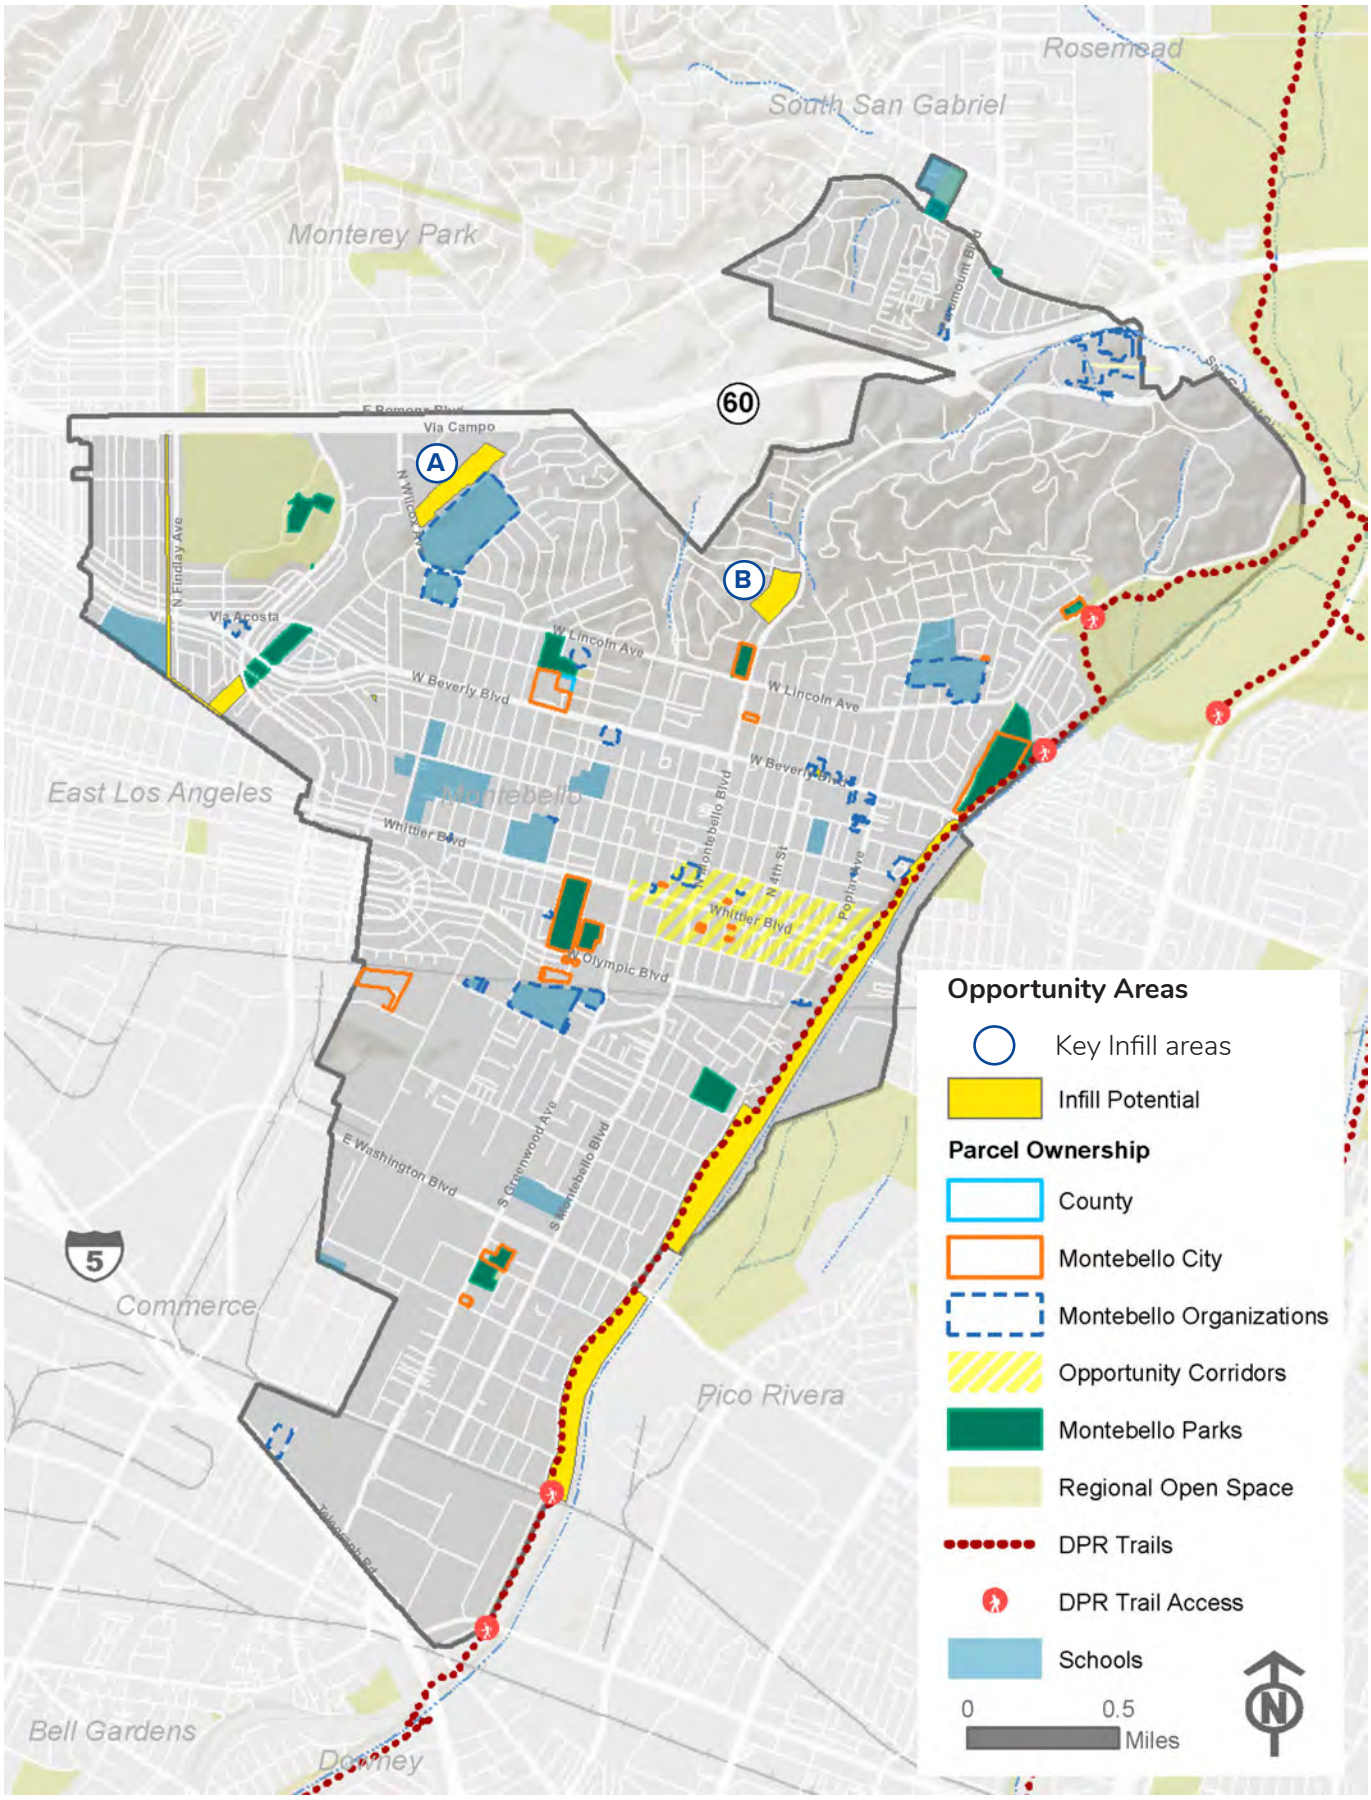


FIGURE 5-6: Opportunity/Infill Areas

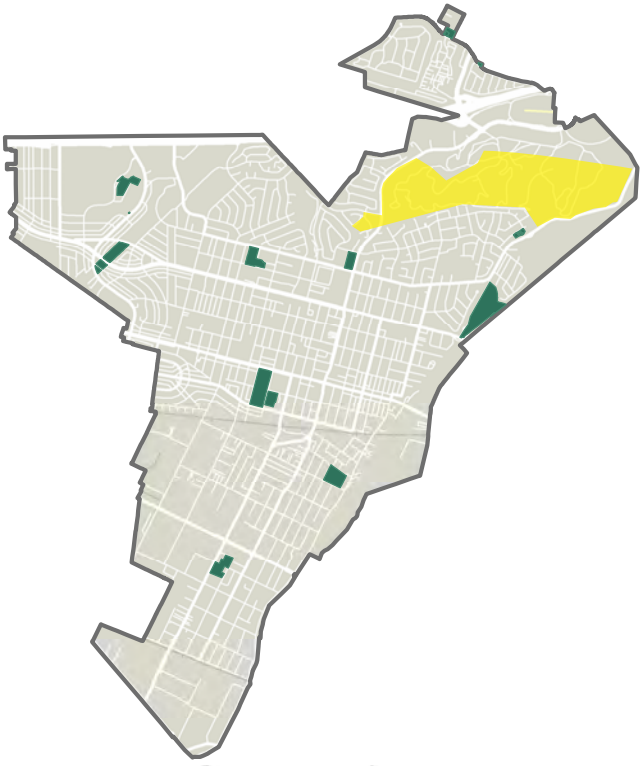
5.5.1 MONTEBELLO HILLS

The Montebello Hills Specific Plan Area (Montebello Hills) is a planned infill residential development on approximately 488 acres. The site is on the northern end of the City south of Montebello Boulevard and southwest of San Gabriel Boulevard. The area is bounded on the south and west by existing residential houses and to the north by the Shoppes at Montebello which is a regional shopping mall. The area is currently utilized as an oil field known as the Montebello Oil Field which has been producing oil and gas for over 100 years, dating back to its origin in 1917. Once fully developed, Montebello Hills is planned to add a variety of housing types.

Montebello Hills is slated to provide approximately 314 gross acres for open space; however, open space areas are restricted in use by existing oil operations, existing utility infrastructure, and other uses. Furthermore, open space areas may be further limited due to sensitive species that were found in the area such as the California gnatcatcher. To help keep these areas functional, Montebello Hills will provide a multi-use trail which is planned to extend through the Specific Plan area across portions of the open space and residential areas. Due to the informal trail designation from the undeveloped area, this formal multi-use trail will add to the overall City's trails and open space count. Additionally, a scenic promenade will be planned as part of the trail network providing public viewing areas across the Los Angeles basin.

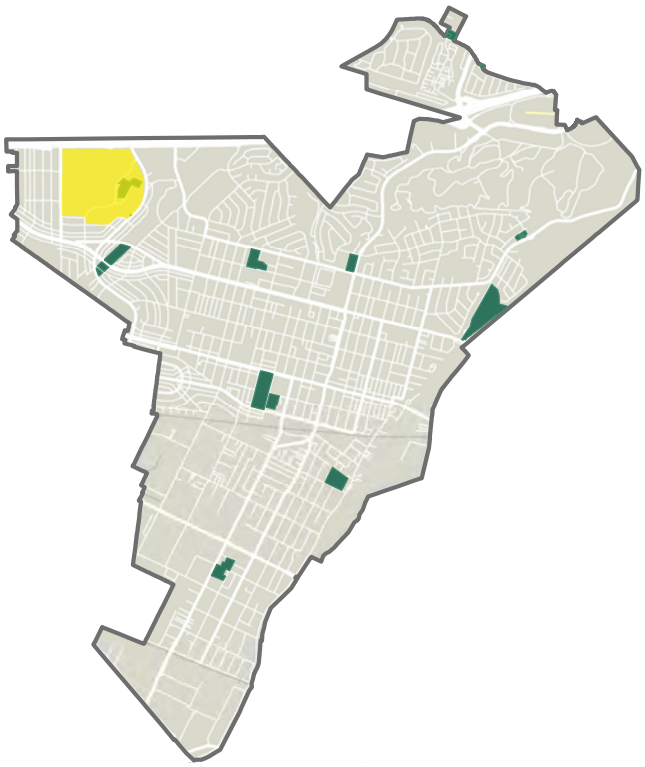


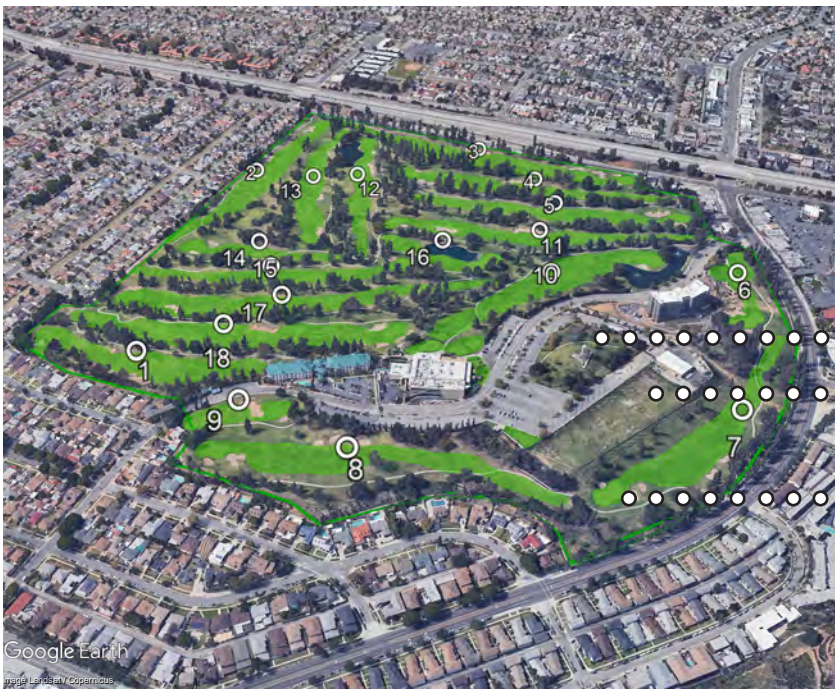
On the north side of the development, a public park is proposed as a part of the plan. This park is approximately 3.14 acres and will help offset the park demand at 4 acres per thousand. The park may also provide some additional recreational amenities which are not currently designed.

5.5.2 GOLF COURSE

The existing Montebello Golf Course is in a prime location with great views, connections to freeways, and public transportation, and is the largest facility within the Park and Recreation and City ownership at 45.61 acres. Although the Golf Course offers a unique golfing experience in an urban area and provides a golfing recreation to the residents of Montebello, portions of the site may be explored for potential reuse. Studies show that user demand for golfing as a recreational trend is declining in Southern California and throughout the United States. The lack of overall recreational equity is also a challenge as golfing is typically done by specific user groups and not enjoyed by portions of the broader population. Further, the overall costs for water and maintenance of these facilities are also increasing regionally, making golf facilities costly and difficult to maintain at an affordable rate. Other catalysts for growth in this area such as planned transportation hubs and TOD may also increase the need for broader recreational uses and facilities in the future as population density intensifies in the area.

Considering all these factors, the Golf Course may offer some opportunities as a portion of the site could be studied for reuse. Reuse may also fulfill a larger community need and can help offset costs and offer a community focused asset that offers a mix of recreational amenities. In general, recreational and community uses should be considered.





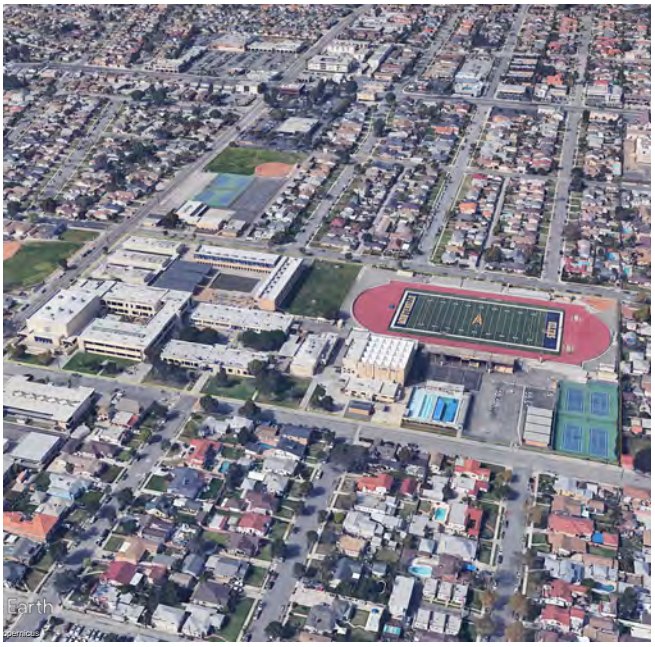
5.5.3 SCHOOLS

As mentioned in Chapter 3, the Montebello Unified School District operates eleven schools and over 100 facilities. Seeing how schools are closed for a portion of the year, JUA's are recommended for sharing the use of these facilities with the public. It is recommended that the schools and the City establish a JUA to take pressure off the facility deficit the City faces with the rise in population. To see a list of all facilities the schools have to offer, refer to Table 3-4 in Chapter 3. Each school has facilities that create the opportunity for a JUA and represent how the community can be brought together through the use open space.

Although each individual school provides its own opportunity to public use, Montebello High School and La Merced Intermediate and Elementary School offer unique opportunities:

Montebello High School (28.2 acres)

Montebello High School offers a unique opportunity for a JUA with the City of Montebello because its site is being redone. Through this remodeling process, the school presents the opportunity to consider the reuse of spaces and JUA in its design (Label A on Figure shows the location of the school within the city).



A - Montebello High School

La Merced Intermediate and Elementary School (27.2 combined acres)

As seen in the lower right picture, La Merced Intermediate and Elementary School has a large, underutilized portion of land on its property. This open space provides the opportunity for a large JUA park (Label B on Figure 5-7 shows the location of the school within the city).

B - La Merced Intermediate & Elementary School

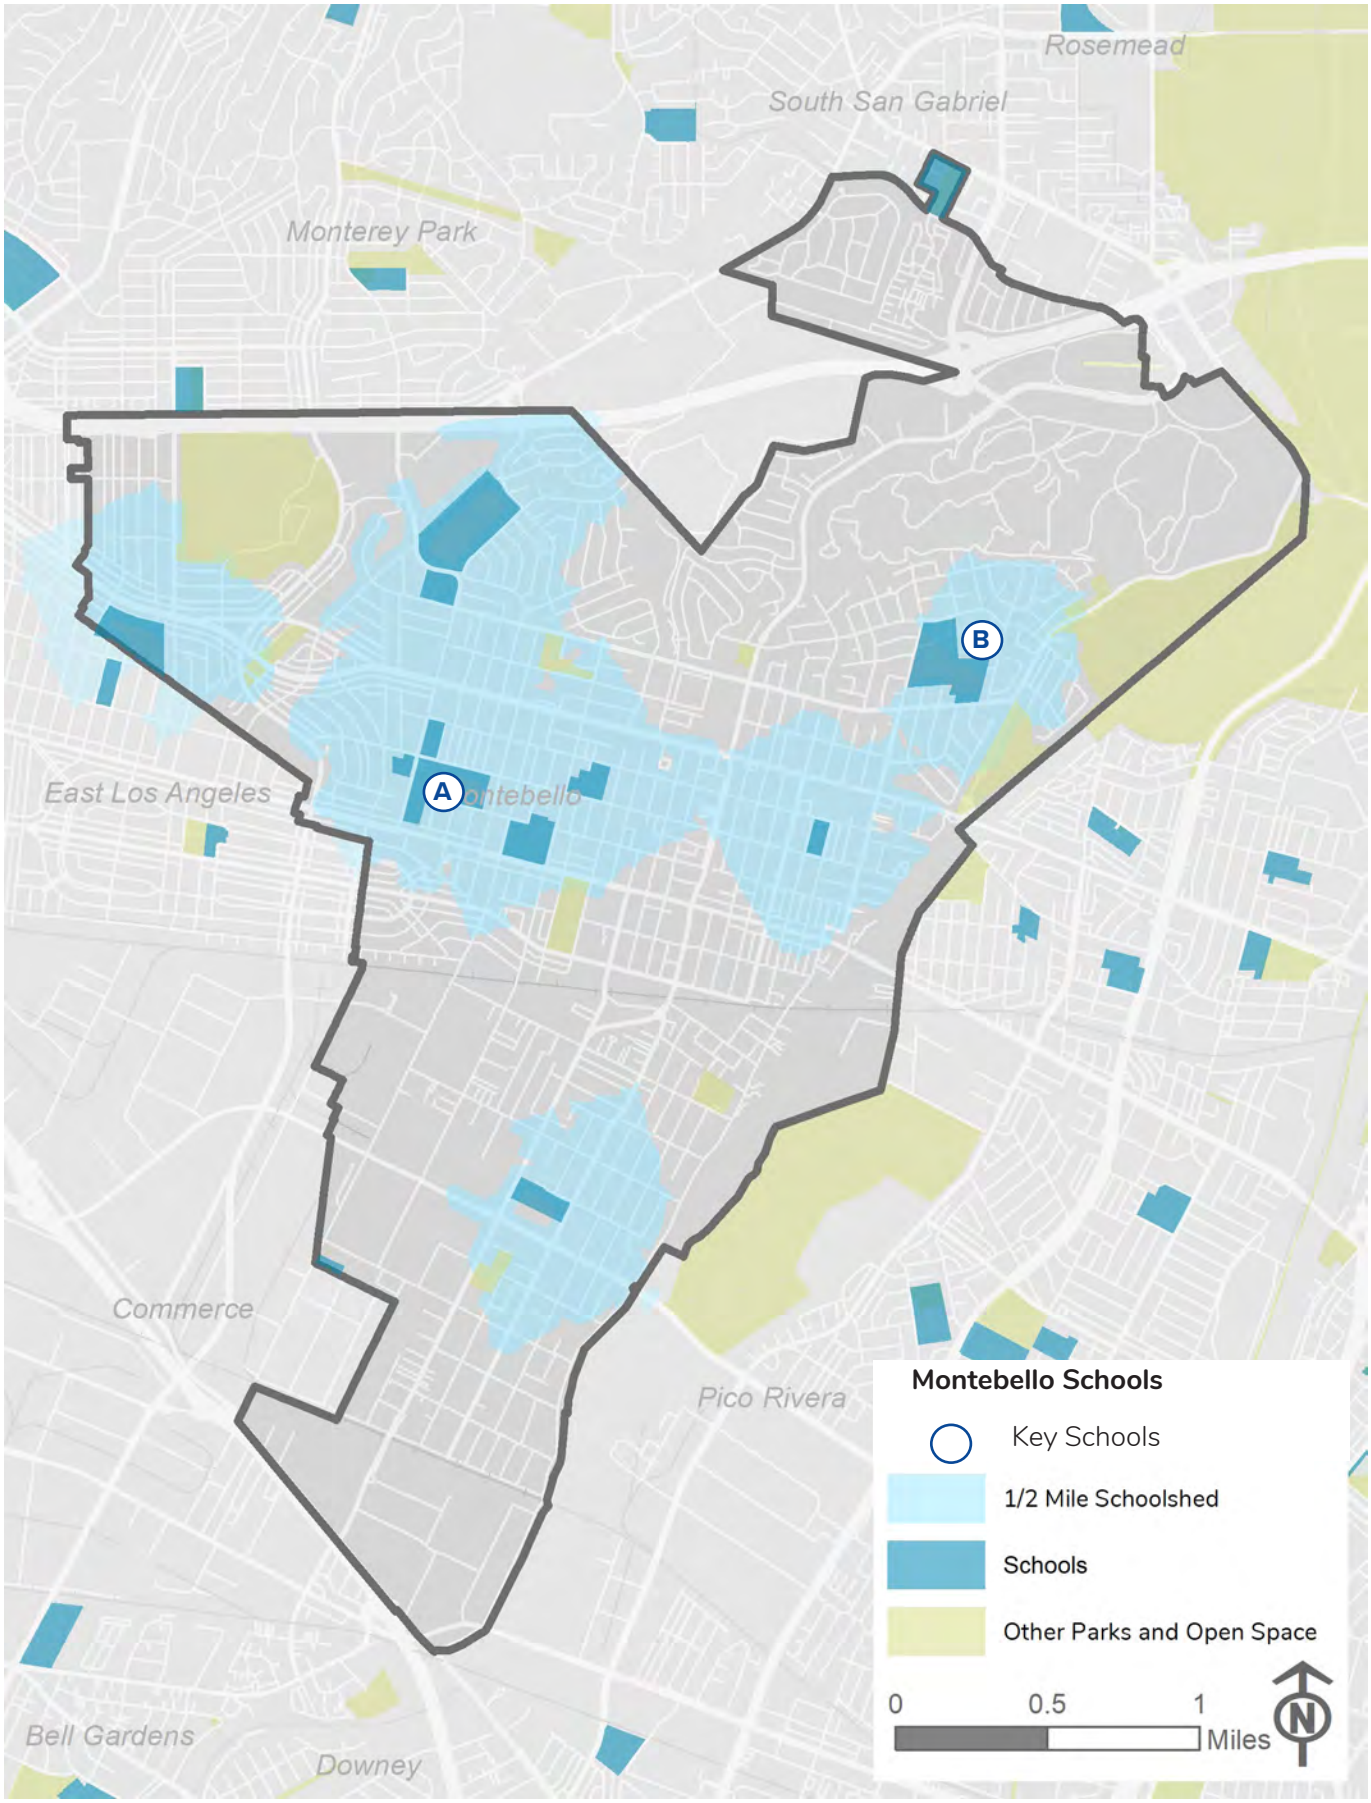


FIGURE 5-7: Montebello Schools

5.5.4 LINEAR AREAS AND CORRIDORS THROUGHOUT CITY

Linear parks and green corridors provide a connection of the existing open spaces and parks throughout the City of Montebello. The corridors shown in Figure 5-8, can incorporate greenery through streetscaping or linear parks.

- Streetscaping provides greenery through visual elements along street such as street furniture, trees, and pocket parks.
- A linear park is an urban park that is different than a typical perception of a park because it is considerably longer than it is wide. Linear parks also allow for aging infrastructure to be revamped into public green spaces.

These additional green spaces allow for increased connectivity to the parks throughout Montebello by closing the gaps where the city currently has a park deficit. By closing those gaps, it will allow all residents access to open space and connect them to the parks throughout the City. Connectivity through these corridors is also increased through the existing and proposed bikeways as seen in Figure 5-8.

Montebello Bikeways

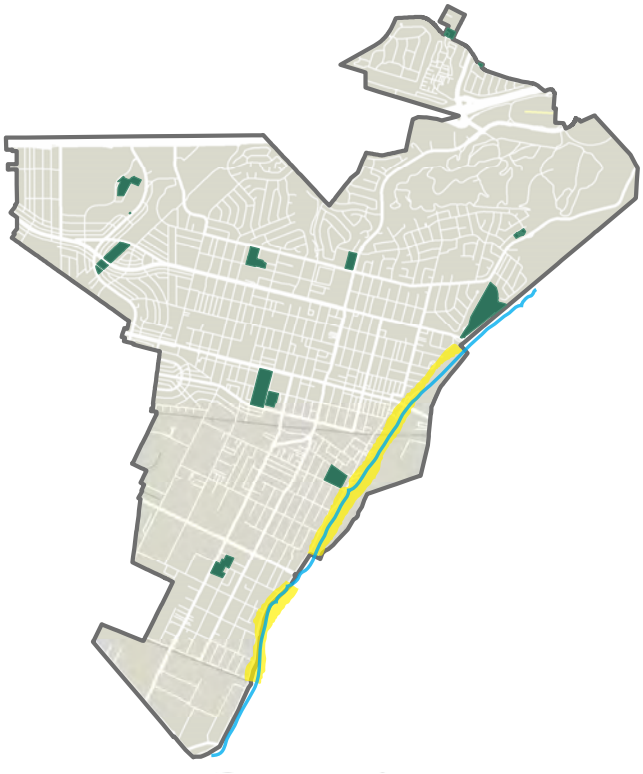
FIGURE 5-8: Green Corridor

5.5.5 RIO HONDO AREA AND ADJACENT LAND

The Rio Hondo area provides a great opportunity for the City. Located on the east side, the Rio Hondo stretches north to south and encompasses much of the eastern portion of the City. Portions of the Rio Hondo's banks are used for the Rio Hondo trail, however, much of the basins and open space that are related to the County Flood Land is underutilized and empty. These areas present opportunities for passive recreation as they are empty most of the year which could be assets to the surrounding communities.

The spaces within the City's boundary account for approximately 100 acres of land. A portion of this land may be sloped, walkways, and infrastructural elements but around 50% of this land could serve as public open space. Further use agreements with the County should be explored, and safety precautions should be considered, but the site offers great opportunities to mitigate park demand in some of the most stressed areas of the City. Furthermore, the Rio Hondo has great connections to the Whittier Narrows park that is northeast of the City and it has connections to parks and open spaces along the Rio Hondo such as Grant Rea, Reggie Rodriguez, and Chet Holifield parks.

The area also has major open space on the east side of the river along Washington Street. Although this land is located within the adjacent Pico Rivera City boundaries, if these spaces could be converted to passive open space or rectangular field uses for soccer, lacrosse, football, or other informal uses, much of the future demand for these facilities could be mitigated in this area as it falls within the sphere of influence of the Master Plan area.



DePaul Center

The DePaul Center provides unique opportunity for park infill as it lays adjacent to the Rio Hondo River. As it currently stands, the Center closed December 18, 2020 and is now categorized as vacant land. Occupying 12 acres of land, this site provides the opportunity to place additional parkland in the City.

MULTI-USE TRAIL

5.6 POTENTIAL INFILL OPPORTUNITIES PER PARK

Within the existing Montebello parks, there are areas where opportunities for additional amenities could be placed. These opportunity areas were identified by looking at underutilized spaces in each park. Amenities were then identified that could be placed in these areas based on square footage of the opportunity site and the square footage of the amenity. This section will go over the additional amenities available in each park. By infilling the opportunity areas within each park with amenities that Montebello will be deficient in with it's growing population (see Table 5-4), the pressure of providing these amenities can be alleviated. Each park has an amenities table associated with the opportunity areas displayed on the accompanying park map. For an introduction and overview of the existing conditions of each park, please refer to section 3.7 in Chapter 3 of this document.

5.6.1 ACUNA PARK

Acuna Park is located on the north side of Montebello, off of Lincoln Avenue. Due to its location near catalytic sites, this park will see an approximate 15% increase in population growth. Opportunity areas 1-4 are displayed in Figure 5-9 with their associated amenities listed in the table, along with a summary of each potential infill area:

Area 1: 5,128 square feet

Located on the northern section of the park and adjacent to the street, and picnic tables.

Area 2: 32,630 square feet

Located on the west/center of the park, and adjacent to the existing playground area, picnic area, and Montebello Parks and Rec Building.

Area 3: 5,164 square feet

Located on the eastern section of the park and adjacent to the surrounding neighborhood.

Area 4: 4,155 square feet

Located on the south east section of the park and adjacent to the surrounding neighborhood and street parking.

FIGURE 5-9: Opportunity Areas - Acuna Park

		Acuna Park			
		5,128	32,630	5,164	4,155

Non-Traditional Recreation Facilities for Infill					
Adventure Playgrounds	4,000-6,000	•	•	•	•
Community Garden	2,000-40,000	•	•	•	•
Pump Track/Bike Skills Course	10,000-20,000		•		
Rope/Adventure/Skills Course	5,000-50,000	•	•		
Skate Spot	4,000-10,000	•	•		•

5.6.2 ASHIYA PARK

Ashiya Park is located on the westernmost side of Montebello, off of Beverly Boulevard. With the increase in population of Montebello, the area surrounding Ashiya Park will see an approximate 2% growth. Opportunity areas 1-3 are displayed in Figure 5-10 with their associated amenities listed in the table, along with a summary of each potential infill area:

Area 1: 2,770 square feet

Located on the northeast section of the park and adjacent to the existing picnic area.

Area 2: 6,951 square feet

Located on the west/center of the park and adjacent to the existing basketball court and pathways.

Area 3: 2,335 square feet

Located on the southwestern corner of the park and adjacent to picnic tables and the existing playground.

FIGURE 5-10: Opportunity Areas - Ashiya Park

Area 4: 16,870 square feet

Located centrally in the park and across from the existing basketball court.

Area 5: 25,199 square feet

Located on the northeast corner of the park and adjacent to picnic tables and the existing playground.

		Ashiya Park				
		2,770	6,951	2,335	16,870	25,199
Traditional Recreation Facilities for Infill	**Typical SF**	**1**	**2**	**3**	**4**	**5**
Basketball Court (92'x50')	4,700				•	•
Bocce Ball/Shuffleboard	5,000-10,000		•			
Dog Park	10,000-75,000					•
Outdoor Gym and Exterior Exercise Areas	5,000-20,000		•			
Pickleball	2,500-3,500		•			
Picnic Areas	500-1,500	•	•	•		
Playgrounds	4,000-6,000		•			
Soccer Field	4,000-75,000					
Sml Soccer Field (6U & 8U)	4,050-11,250				•	•
Tennis (60'x120')	7,200-28,000				•	•
Volleyball (70'x40')	4,000-16,000		•		•	•
Non-Traditional Recreation Facilities for Infill						
Adventure Playgrounds	4,000-6,000		•			
Community Garden	2,000-40,000	•	•	•		
Rope/Adventure/Skills Course	5,000-50,000		•			
Skate Spot	4,000-10,000		•			

5.6.3 BICKNELL PARK

Bicknell Park is located on the northwest portion of Montebello, within the Montebello Golf Course. With the increase in population of Montebello, the area surrounding Ashiya Park will see an approximate 2% growth. Opportunity areas 1-3 are displayed in Figure 5-11 with their associated amenities listed in the table, along with a summary of each potential infill area:

Area 1: 1,648 square feet

Located in the south-west area of the park, but the northernmost of the three opportunity areas and adjacent to the parking lot.

Area 2: 1,112 square feet

Located in the south-west area of the park, in the center of the three opportunity areas, and adjacent to the existing walkway.

Area 3: 3,241 square feet

Located in the south-west area of the park, but the southernmost of the three opportunity areas and adjacent to the parking lot and walkway.

FIGURE 5-11: Opportunity Areas - Bicknell Park

		Bicknell Park		
		1,648	1,112	3,241
Traditional Recreation Facilities for Infill	**Typical SF**	**1**	**2**	**3**
Bocce Ball/Shuffleboard	5,000-10,000			•
Picnic Areas	500-1,500	•	•	•
Non-Traditional Recreation Facilities for Infill				
Community Garden	2,000-40,000			•
Skate Spot	4,000-10,000			•

5.6.4 CHET HOLIFIELD PARK

Chet Holifield Park is located on the south side of Montebello, off of Greenwood Avenue. Due to its location within the city, this park will see an approximate 8% increase in population growth. Opportunity areas 1-6 are displayed in Figure 5-12 with their associated amenities listed in the table, along with a summary of each potential infill area:

Area 1: 5,628 square feet

Located on the southwest section of the park and adjacent to the street and baseball field.

Area 2: 3,000 square feet

Located in the southeast area of the park and adjacent to the baseball field and housing.

Area 3: 9,740 square feet

Located on the northernmost section of the park and adjacent to parking and the Park Ranger & Scout House

Area 4: 1,907 square feet

Located on the northern section of the park and adjacent to the existing playground, picnic tables and group picnic area.

Area 5: 1,515 square feet

Located on the north/center section of the park and between the two existing playgrounds and picnic tables.

Area 6: 1,435 square feet

Located in the northeast section of the park and adjacent to the group picnic area and playground.

FIGURE 5-12: Opportunity Areas - Chet Holifield Park

		Chet Holified Park					
		5,628	3,000	9,740	1,907	1,515	1,435

Volleyball (70'x40')	4,000-16,000			•			
Non-Traditional Recreation Facilities for Infill							
Adventure Playgrounds	4,000-6,000	•		•			
Community Garden	2,000-40,000	•	•	•			
Rope/Adventure/Skills Course	5,000-50,000	•		•			
Skate Spot	4,000-10,000	•		•			

5.6.5 DUTCHER TOT LOT

Dutcher Tot Lot is located within the Montebello Golf Course in the southern portion of Montebello. With the increase in population of Montebello, the area surrounding Dutcher Tot Lot will see an approximate 2% growth. It is important to note that this site is currently overgrown with no amenities present, so the opportunity area will cover the entire site. As its name suggests, this open space could provide a small playground area with seating. Opportunity area 1 is displayed in Figure 5-13 with its associated amenities listed in the table, along with a summary of each potential infill area:

Area 1: 1,705 square feet

Covers the entire site which is located off North Garfield Avenue and adjacent to the Montebello Golf Course.

FIGURE 5-13: Opportunity Areas - Dutcher Tot Lot

		Dutcher Tot Lot
		1,705
Traditional Recreation Facilities for Infill	**Typical SF**	**1**
Picnic Areas	500-1,500	•
Playgrounds	4,000-6,000	•

5.6.6 POTRERO HEIGHTS PARK

Potrero Heights Park is located in the northmost section of Montebello off of West Arroyo Drive. With the increase in population of Montebello, the area surrounding Potrero Park will see an approximate 2% growth. Opportunity areas 1 and 2 are displayed in Figure 5-14 with their associated amenities listed in the table, along with a summary of each potential infill area:

Area 1: 1,675 square feet

Located in the west area of the park and adjacent to the Potrero Heights Park Community and Senior Center and pathways.

FIGURE 5-14: Opportunity Areas - Potrero Park

Traditional Recreation Facilities for Infill	Typical SF	Potrero Heights Park
		1,675
Bocce Ball/Shuffleboard	5,000-10,000	•
Picnic Areas	500-1,500	•

5.6.7 NORTHRIDGE MINI PARK

Northridge Mini Park is located in the northern-most portion of Montebello. With the increase in population of Montebello, the area surrounding Northridge Mini Park will see an approximate 2% growth. Opportunity area 1 is displayed in Figure 5-15 with its associated amenities listed in the table, along with a summary of each potential infill area:

Area 1: 3,079 square feet

Located on the southern-most section of the park and adjacent to Arroyo Drive.

Area 2: 1,392 square feet

Located on the eastern corner of the park and adjacent to the existing picnic area.

FIGURE 5–15: Opportunity Areas - Northridge Mini Park

		Northridge Mini	
		3,079	1,392
Traditional Recreation Facilities for Infill	**Typical SF**	**1**	**2**
Bocce Ball/Shuffleboard	5,000-10,000	•

Playgrounds	4,000-6,000		•
Non-Traditional Recreation Facilities for Infill			
Community Garden	2,000-40,000	•	•

5.6.8 SANCHEZ ADOBE PARK

Sanchez Adobe Park is located in the northeast portion of Montebello. With the increase in population of Montebello, the area surrounding Sanchez Adobe Park will see an approximate 2% growth. Opportunity area 1 is displayed in Figure 5-16 with its associated amenities listed in the table, along with a summary of each potential infill area:

Area 1: 6,625 square feet

Located on the northeast section of the park and adjacent to North Adobe Avenue and neighboring houses.

FIGURE 5-16: Opportunity Areas - Sanchez Adobe Park

		Sanchez Adobe
		6,625
Traditional Recreation Facilities for Infill	**Typical SF**	**1**
Outdoor Gym and Exterior Exercise Areas	5,000-20,000	•
Picnic Areas	500-1,500	•
Non-Traditional Recreation Facilities for Infill		
Adventure Playgrounds	4,000-6,000	•
Community Garden	2,000-40,000	•
Rope/Adventure/Skills Course	5,000-50,000	•
Skate Spot	4,000-10,000	•

4.4.5 GENERATIONAL CHANGES

Activity participation and preferences tend to vary based on several demographic factors but can also differ based on generational preferences. According to Esri Business Analyst, the following birth years identify generations into the categories in Figure 4-10.

The Silent Generation began life in some of the most difficult conditions, including the Great Depression, World War II, and economic and political uncertainty. The youngest have reached 75 years of age and can be greatly assisted by the social interaction that takes place at senior centers or within senior programs.

As Baby Boomers enter and enjoy retirement, they are looking for opportunities in fitness, sports, outdoor activities, cultural events, and other activities that suit their lifestyles. When programming for this age group, a customized experience to cater to the need for self-fulfillment, healthy pleasure, nostalgic youthfulness, and individual escapes are important.

Many members of Generation X are in the peak of their careers, raising families, and growing their connections within the community.

Millennials tend to be more tech-savvy, socially conscious, and achievement-driven with more flexible ideas about balancing wealth, work and play. They generally prefer different park amenities, and recreational programs, from their counterparts in the Baby Boomer generation.

As of the 2010 Census, Generation Z form about a quarter of the U.S. population, nearly half of the youth population is ethnically diverse.

Generation Alpha are the children of Millennials, they will have no fear of technology. Every effort to accommodate this generation with high quality, state of the art technology in facilities and with programs will be necessary to reach this group.

FIGURE 4-10: City of Montebello Generational Breakdown

CHAPTER 6
Recommendations

6.1 GENERAL RECOMMENDATIONS

These recommendations were derived from community input including stakeholder interviews, community workshops, intercept surveys, statistically valid surveys, pop-up outreach, and staff interviews. The recommendations were also informed by the level of service (LOS) analysis, geographic distribution analysis, and funding considerations.

The following discussion describes ways to increase LOS, distribution, and the quality of the parks and recreation system. This is accomplished through adding and enhancing amenities, as well as a commitment to partner with schools to lower the deficiencies and geographic distribution of neighborhood and community parks. The affordability of services and programs, upgrading programs and service delivery, improving organizational efficiencies, and augmenting financial opportunities will expand and improve efficiencies of the parks system.

The general recommendations are described in further in Appendix II.

The following strategies will help to improve the quantity and quality of the existing park system.

PROPOSED STRATEGIES TO IMPROVE THE PARK SYSTEM:

1. PLACEMAKING

2. LINEAR PARKS & URBAN SPACES

3. TECHNOLOGY

4. FACILITIES & AMENITIES

5. FINANCIAL

6. PROGRAMS & SERVICES

7. ADMINISTRATIVE

STRATEGY 1

PLACEMAKING

Placemaking helps to serve in the identity of public spaces and the broader community. It seeks to capitalize on the community's character and help to further define a place. Placemaking is both a process and a philosophy that is rooted in the use of urban design and psychology. For example, when one thinks of the streets of New Orleans, what comes to mind? Perhaps an image of balconies that hug cobble-lined streets. Or maybe the iconic images of brick and ivy or the elegant design motifs of Spanish and French architecture. These are the traits that make a place iconic and serve in the broader identity that a space, community, or city has.

Placemaking can be achieved in various ways. However, it is typically derived from the history, culture, and heritage of a place. It's further enhanced by art, architecture, vegetation, scale, and other design characteristics. As such, it is something that can be developed and/or enhanced. It's typically further strengthened by the interaction of people in a space, especially in an urban setting. Here are specific objectives and actions to enhance the placemaking of Montebello:

Rendering of Reggie Rodriguez Potential Improvements.

6.2.1 INCLUDE PUBLIC ART

Public Art includes the addition of sculptures, murals, and other interactive art pieces throughout the City. These encourage a sense of place and a desirable location for users of the space.

- Establish a public arts commission.
- Encourage public art that's representative of the community.
- Allocate areas within Montebello Parks for art opportunities.

6.2.2 ENCOURAGE SOCIAL INTERACTION

Provide places in parks and throughout Montebello like public plazas or other gathering spaces encourage social interaction with members of the community.

- Incorporate public plazas and gathering areas within the public realm.
- Provide areas for family gatherings and events.
- Establish programmed activities that encourage social interaction (i.e., movies in the park, holiday events, etc.).

6.2.3 INCREASE IDENTITY

The identity of a place is defined by it's history and culture. Incorporating elements of the City's history into the parks system increases the identity of Montebello.

- Identify and bring out the history of the site and City.
- Look for identifiable elements within each park and celebrate them.
- Incorporate entry monuments or gateways into parks to aid in park identity.
- Include informational signage that identifies the character of the park.

6.2.4 ENHANCE CHARACTER

The character of a place refers to the geographic characteristics of a place. This can include establishing a theme in each park to create a cohesive element throughout the City.

- Establish a character of the City that's incorporated into each park.
- Work off of City theme but have a park character that's unique for each.
- Integrate park theme and character into site features and buildings.
- Ensure everything is set in context.

Montebello residents say...

"Add **more trails and walking areas** in or outside of parks"

"Increase use of parks resulting from **increased programs and activities**"

"Make parks **a hub** of a neighborhood"

"An increase in services on the south side of the City to create **equitable engagement** between North and South Montebello"

... about Placemaking

STRATEGY 2

LINEAR PARKS & URBAN SPACES

Linear parks and urban spaces have a tremendous contribution to a City's park system when combined with traditional neighborhood, community and regional park typologies. Linear corridors can connect the various park components of a City to each other and into the neighborhoods and community's that they serve. Additionally, linear connections can serve as recreational elements. Features and amenities can be intertwined into a linear park and become experiences that thrive off the activity of the linear park. For example, fitness nodes can be used along a walking/jogging trail or educational signage or entry node areas can be included to enhance the linear path.

Linear parks also have the ability to serve as green networks within a City or community as well. They can help to enhance the urban greening aspects of a corridor by introducing life such as birds, pollinators, and other fauna within an urbanized area. There are various studies that show the benefits of having trees within urban areas and linear green corridors. They function as recreational spaces and they extend to where people are considering roadways typically wind throughout our neighborhoods and cities whereas parks tend to be more nodal experiences. Furthermore, these corridors can help with the carbon sequestration and help cleanse the air of our urban areas. Here are specific objectives and actions to enhance the linear parks and urban spaces of Montebello:

6.3.1 DEVELOP LINEAR PARKS

Linear parks provide an increase of green space in more places throughout an urban setting by creating parks that are longer instead of wide

- Expand and explore opportunities for linear parks.
- Find areas where linear parks may occur.
- Reclaim underutilized streets and/or infrastructure within the City.

6.3.2 CREATE A UNIQUE LINEAR TRAIL AT THE RIO HONDO

The open space surrounding the Rio Hondo offers a unique opportunity for recreational trails.

- Expand the Rio Hondo trail system.
- Incorporate trails within the northern hills in Montebello and in new development areas.
- Include an urban trails signage program that connects corridors and trails within the City to other regional trails.
- Develop a Rio Hondo Specific Park Plan to further study the corridor and prioritize improvements.

6.3.3 ESTABLISH MAJOR "GREEN CORRIDORS" WITHIN THE CITY

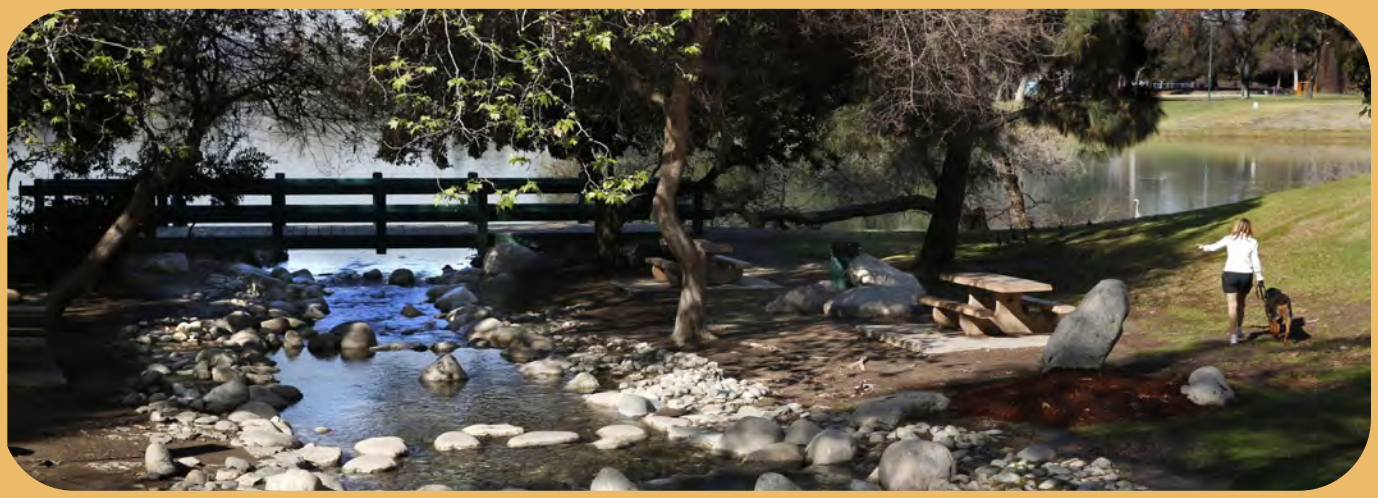
Through the addition of linear parks, connections between each park in Montebello could be made creating a "green corridor" throughout the City.

- Look into enhancing Whittier Blvd., Olympic Blvd., Beverly Blvd., Greenwood / Montebello Blvd. with street trees, planting, and linear park amenities.
- Study each corridor to find areas of opportunities.
- Consider an urban greening project that specifically studies these corridors and others for linear park / green corridor opportunities.

6.3.4 CONNECT TO URBAN TRAILS OUTSIDE OF THE CITY

Cities surrounding also provide parks and recreation opportunities to the residents of Montebello and by incorporating a trails system into the City, increased connections can be made.

- Look into the connection along Rio Hondo that can connect green space in Pico Rivera and South El Monte.
- Research existing trail networks in and around Montebello to establish potential connection points.
- Develop a Specific Plan with surrounding cities to further study trail connections.



Source: Don Bartletti / Los Angeles Times

6.3.5 PROVIDE WALKABLE AND BIKE FRIENDLY NETWORKS THROUGHOUT THE CITY

By providing more path connections throughout the City, more residents will be encouraged to use them for walking and biking to parks for both transportation and recreational exercise. This lessens parking demand at parks as well.

- Encourage development of Transit Oriented Developments.
- Provide more bike lanes to parks.
- Provide more walking trails leading to parks.
- Enhance Whittier Blvd., Olympic Blvd., Beverly Blvd., Greenwood / Montebello Blvd. with street trees, planting, and linear park amenities.
- Develop an Active Transportation Plan to improve bike and pedestrian facilities, safety, and connectivity.

Montebello residents say...

"Overall condition/ **maintenance** of location"

"Add **more linear parks** that include natural areas with path"

"Encourage active lifestyles and **promote health, wellness, and fitness**"

"Walking is a major activity, but **safety** is a concern "

"Ensure parks and recreation opportunities are **accessible to all residents** (including safe walkable routes, trail connections, and transportation options)"

"**More trails and walking pathways** are desired. Walking is a major activity that residents participate in"

... about Linear Parks & Urban Spaces

STRATEGY 3

TECHNOLOGY

Technology is integral now in our core to our day to day lives. It is hard to go into a public space and not see several individuals engaging on their smart device. However, in many cases the systems that are in place in our municipalities may not take advantage of the various technological improvements that we have seen over the last decade. This technology has revolutionized how we access, distribute, and convey data. It has also set the standards high in terms of how the public expects information to be delivered. Foe parks, technology could be leveraged to allow for communication to the community by social media or a reservation system for recreation fields. It can also be used to help understand how users perceive or use a space, and better inform agencies on what items should be addressed or where maintenance is needed.

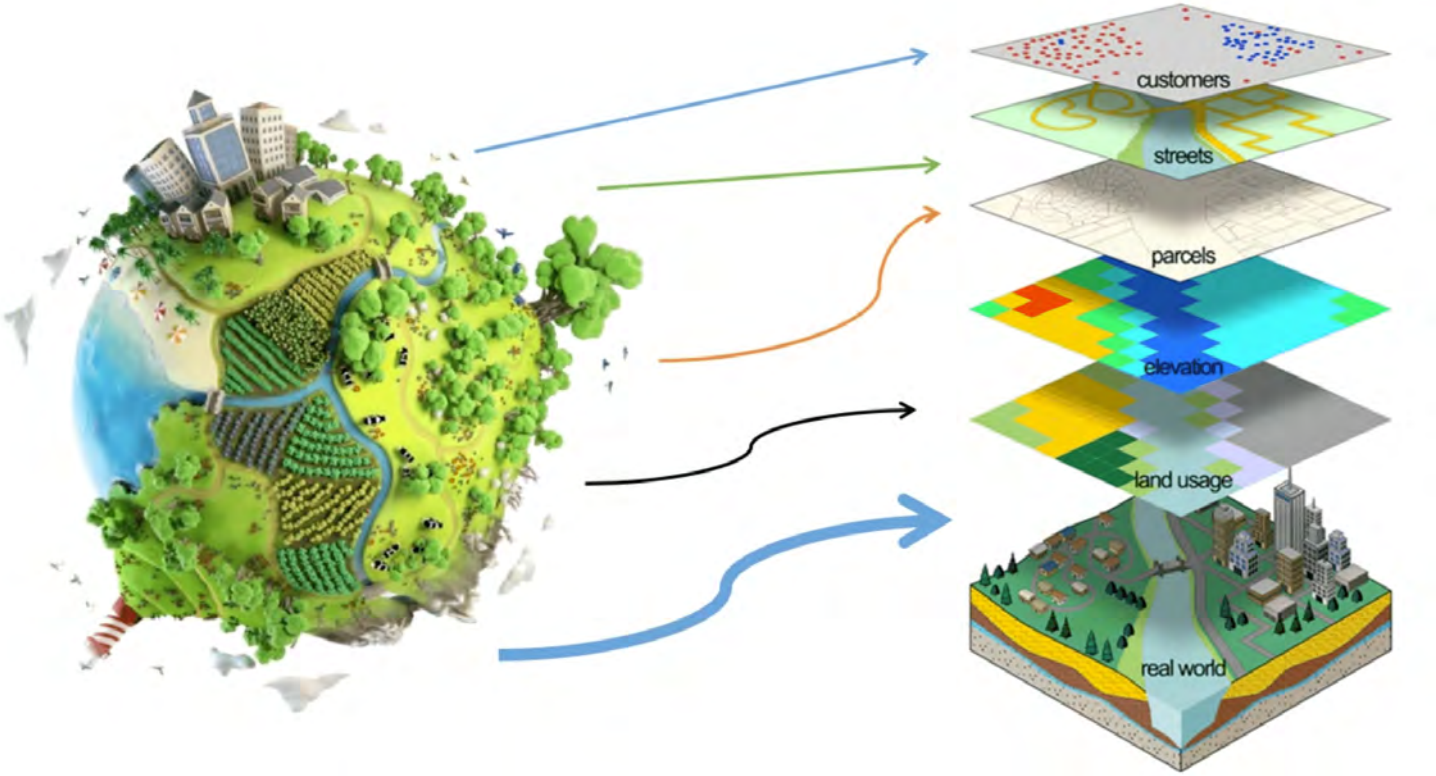
Other technologies have further revolutionized how we operate on a daily basis. Geographic information systems allow cities and agencies to store information in a geographic database, allowing for assets to be better recorded and distributed. Asset management systems take this one step further by allowing geo-tagging while also allowing for a user-friendly interface that is customized to the user. An example of this is an asset management system for park facilities that provides the ease of running reports on life cycle conditions, annual budget needs, and other critical data. Security systems allow for our spaces to be better monitored and allows for first responders and citizen patrol groups to respond to situations. Here are specific objectives and actions that could enhance how Montebello may leverage technology to support the park and recreational aspects of the City:

A goal for technology is to create collaborative online community events

6.4.1 ORGANIZE DIGITAL FILES AND DEVELOP A CITYWIDE GIS DATABASE

Having digital files and a citywide GIS database readily available for use by contractors and residents will allow for more efficient services to be provided to the City.

- Work on a technology plan that establishes a digital record system for CAD and BIM files.
- Establish a GIS database for all of the City's mapped data.



Source: *GEOUniversity*

6.4.2 INCREASE USAGE OF SECURITY SYSTEMS WITHIN THE PARK SYSTEM

Additional safety can be afforded with increases use of security systems within each park.

- Work on a technology plan to increase security cameras.
- Prioritize parks where safety concerns and issues were mentioned.
- Increase presence of security officers in parks of concern.

6.4.3 INCORPORATE A DIGITAL SCHEDULING AND FACILITY MANAGEMENT SUITE

Increased productivity, cleanliness, and utilization of the city's park system could be seen with an effective digital scheduling and facility management suite.

- Research and explore platforms.
- Setting up digital workflow.

6.4.4 INCLUDE VIRTUAL PROGRAMS, EVENTS, AND ACTIVITIES

Due to COVID-19 there is an increased demand for virtual programs, events, and activities. Hosting virtual meetings will keep the public engaged and excited for the future of Montebello. Beyond the pandemic, many have found virtual options allow for greater participation, access, and convenience.

- Research and explore platforms to host virtual events.
- Establish working platform and share events with community.
- Work with existing community center classes to incorporate virtual programming.

Residents say...

"Ineffective **outreach of information** on parks & recreation facilities, services, and programs"

"Some youth sports providers must work around Department organized activities. Scheduling of sports fields is inefficient due to the need for an **automated reservation system**"

... about Technology

Tech Trends

1. Esports

"Esports have grown in popularity as the pandemic has curtailed youth team sports activities."

Source: NRPA

"In 2021, dozens of park and recreation agencies will begin to stream live youth sports events. Parents and families can drop off their kids and watch from the parking lot, fully maintaining a physical distance, but being able to honk at will when a goal is scored."

2. Smart Parks

"A Smart Park goes far beyond just giving connected generations what they want. By creating Smart Parks, park directors can begin to harness the energy of people and groups who over the years may have become disconnected from public spaces and the outdoors."

Source: NRPA

Smart Park Strategies:

- Add Park Wi-Fi;
- Include Smart Furniture;
- Consider Interactive 'Smart Phone' Signs.

STRATEGY 4

FACILITIES & AMENITIES

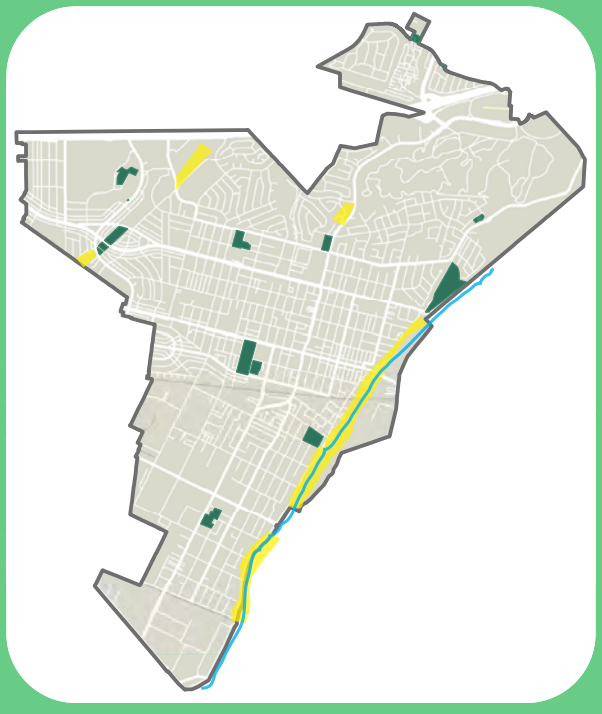
The facilities and amenities of a park system are the spaces and supporting equipment that users engage with. These are not only the parks and open spaces, but the features that reside within them. This includes the large recreational fields, sports courts or other facilities that one thinks of when the phrase 'recreational facilities' is used. However, this doesn't only include these recreational elements but also the elements with them such as park benches, picnic shelters, trash cans, or other furnishings that users engage with on a small scale. Furthermore, it may include the infrastructural elements of a park system such as the irrigation, lighting systems, and other key utilities to maintain a functional park.

As the City seeks ways to enhance the facilities and amenities, these scales are imperative as every aspect plays a role in how the overall park system functions. Furthermore, these require close understanding of these systems and monitoring so that they do not fall into disrepair. The active maintenance, management, and repair of these systems is critical for the City considering the growing demand of the park network and lack of additional space to augment parkland. As such, this strategy seeks to find objectives and actions to help with these facilities and amenities. This includes the following recommendations:

6.5.1 CONSIDER IMPROVEMENTS/INFILL OF CITY OWNED PROPERTIES

Through improvements to city owned property and infill development the character of Montebello will be ENHANCED. These improvements would also provide access to open space to more residents of Montebello if converted into parks.

- Look at ways to include facilities within existing City owned properties, specifically facilities that may help increase Level of Service and mitigates park needs in park poor areas.
- Find opportunities to include small plazas and minor recreational elements at City facilities such as at City Hall.
- Explore divesting from properties that don't have a strong use in the future.
- Create a phased plan for infill in established parks and create Concept Plans for each infill area.
- Implement infill projects.



6.5.2 INCLUDE NEW POCKET PARKS AND MINI PARKS

Pocket parks and mini parks are a great way to provide accessible park space to the public. These park types allow for parks on small or irregular pieces of land.

- Study unused lots to find areas for new pocket parks and mini parks.
- Look at including pocket parks and mini parks specifically in park poor areas.
- Upgrade the existing pocket parks at Dutcher Tot Lot and Northridge Mini Park.

Source: Petersen Studio - Streetlights Makers Quarter

6.5.3 ADDRESS DEFERRED MAINTENANCE THROUGHOUT THE CITY

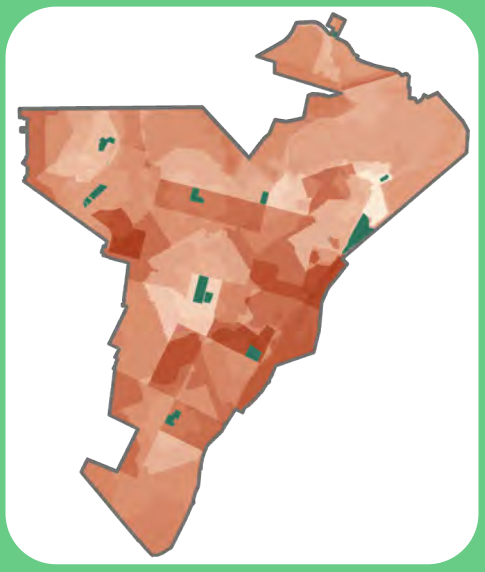
Address the deferred maintenance to ensure that all parks have safe and functional amenities.

- Utilize the AssetCalc list of deferred maintenance items to prioritize which items need immediate repair.
- Evaluate the list annually to create priorities to be addressed.
- Consider outsourcing service repairs as needed to meet the demand for deferred maintenance.

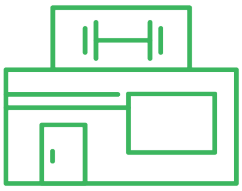
6.5.4 IMPROVE THE CURRENT LEVEL OF SERVICE THROUGHOUT THE CITY

Improving the current LOS in the City includes making sure that the current level of service can be improved to meet the future needs for Montebello.

- Reference the infill opportunity map on page 108 and LOS tables on page 26 and 101 to find areas to deal with level of service gaps within the City.
- Look at the top 5 priority LOS amenities and implement.



6.5.5 EXPLORE ADDING INDOOR FACILITIES, REC, TEEN, AND SENIOR CENTERS



Having additional public indoor facilities for teens and seniors can foster a larger sense of community in Montebello.

- Find underutilized areas within the key growth areas of the City for additional indoor facilities, rec, teen and senior centers.
- Look at adding a recreation facility on the western edge of town.

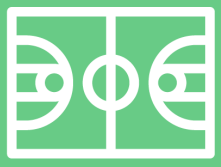
Source: Lehrer Architects

6.5.6 DEVELOP FLEXIBLE USE AREAS

A flexible use area will allow for certain spaces in Montebello to be used for multiple events and activities like sports and event.

- Look at creating a multi-use field at Reggie Rodriguez.
- Look at creating a multi-use field at Grant Rea.
- Look at other areas for multi use fields.

6.5.7 PROVIDE MULTI-PURPOSE COURTS AND COMBINE SELECTED COURT STANDARD TO ACCOMMODATE TRENDS AND MORE VARIETY IN COURT SPORTS



Multi-purpose courts allow for a variety of sports to be played in a smaller footprint allowing for more park space to be utilized.

- Identify existing courts that can be converted to multi-purpose courts.
- Prioritize multi-purpose courts in areas where LOS is lacking and construct.
- Look for areas to add multi-purpose courts including line striping for sports that are growing in demand.

Montebello residents say...

"Create **economic benefit** through attraction of businesses and enhanced property values"

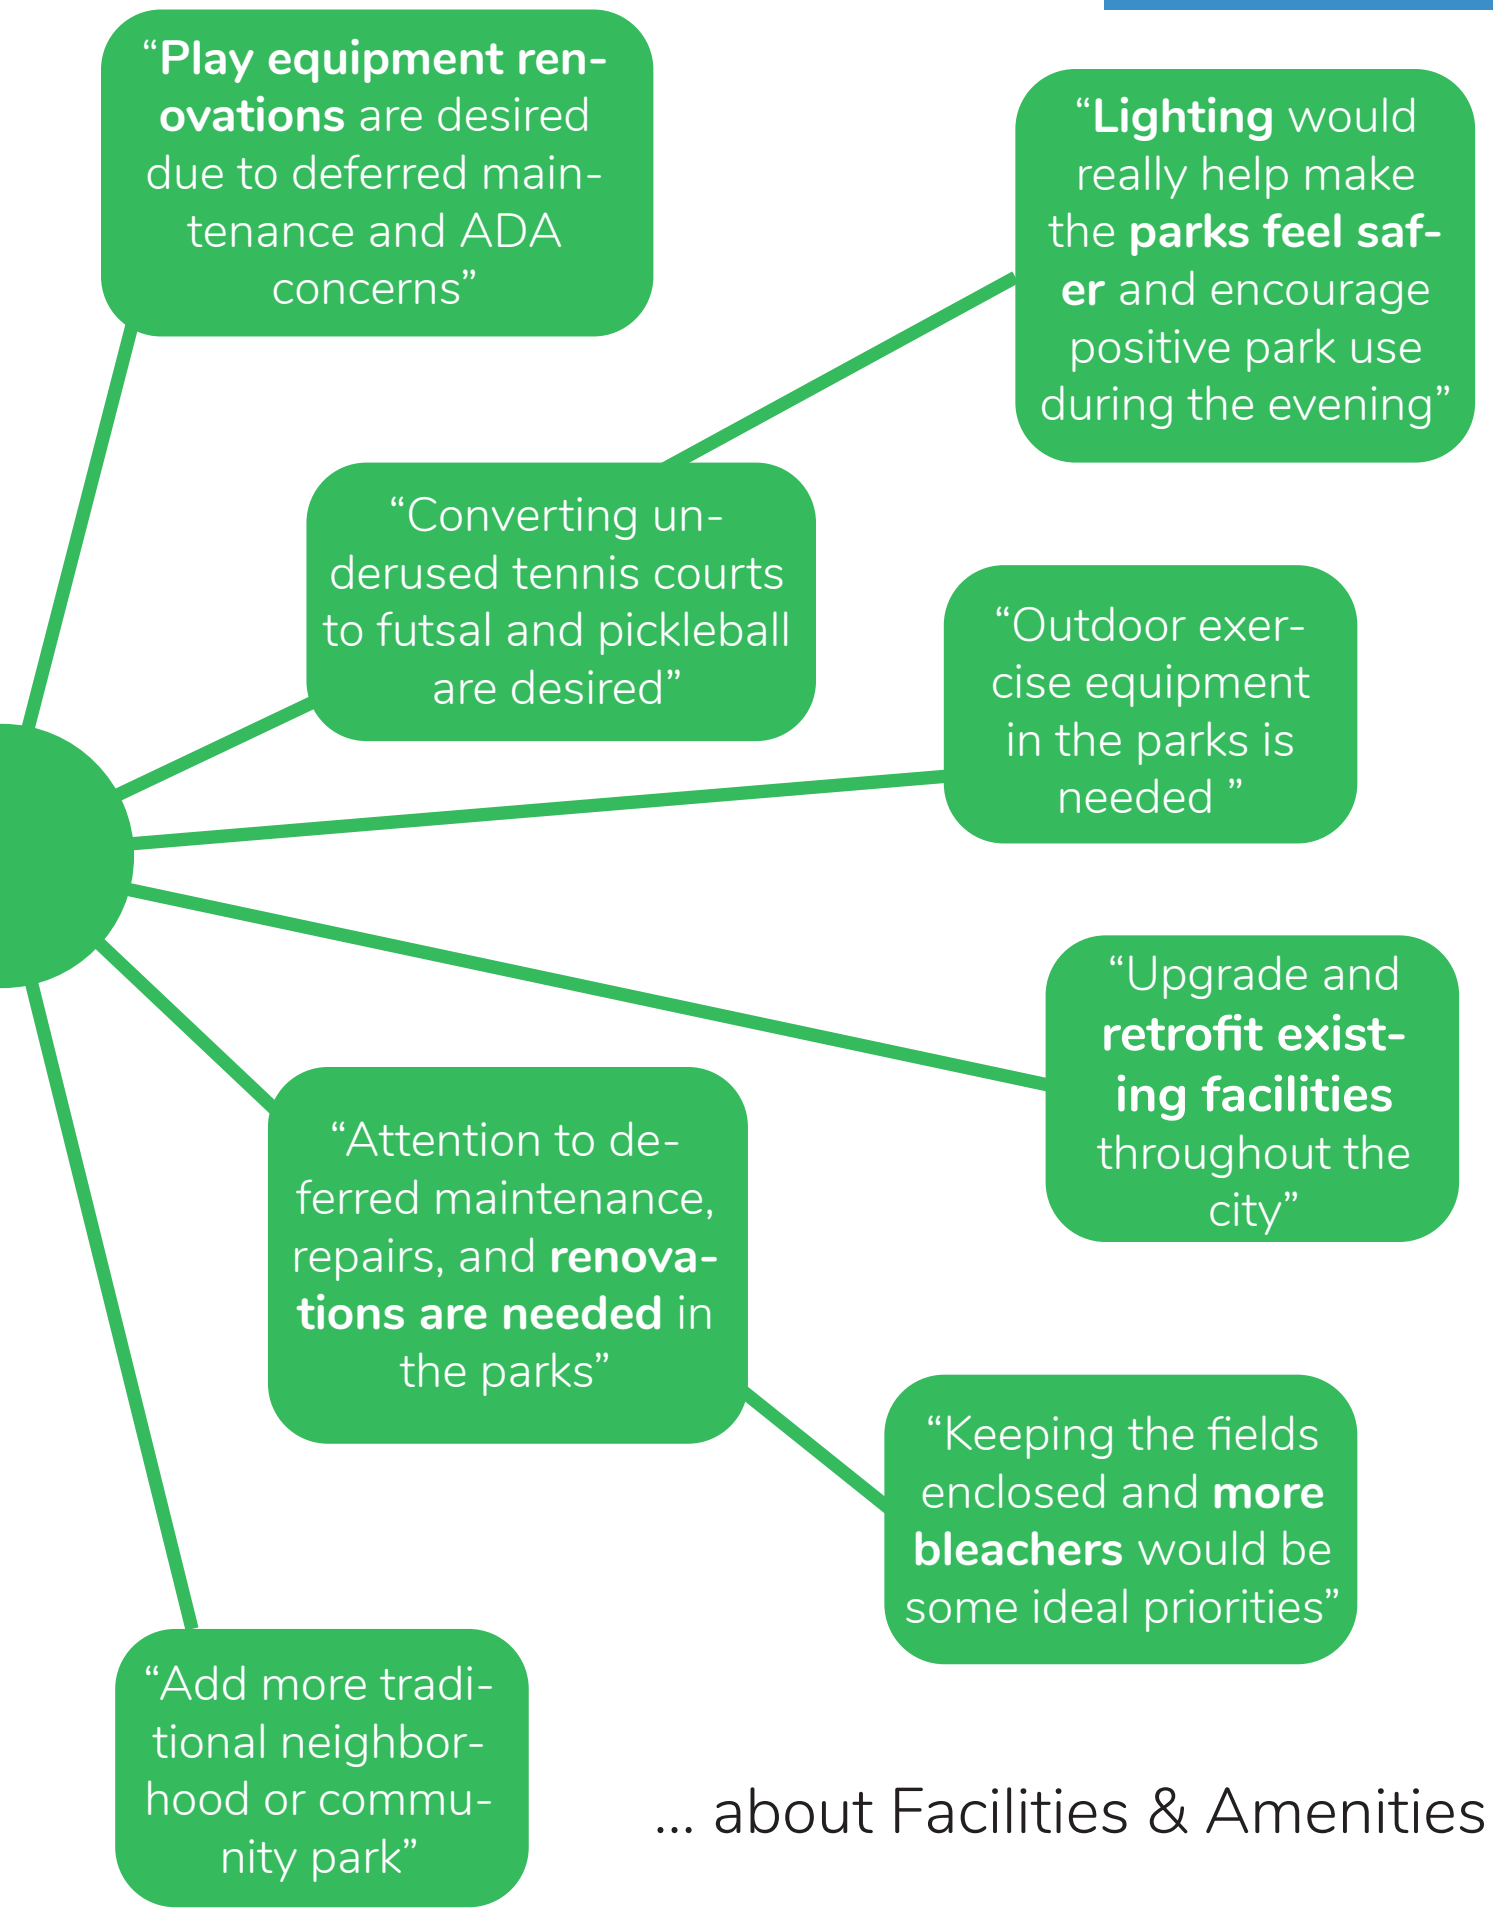
"Increase use of parks resulting from **adding infill amenities** to existing parks"

"A new gymnasium at Chet Holifield Park and **upgrades to the aquatic facility** are desired"

"**Expand** current park amenities and activities"

"Build **new parks in areas of new growth** to address inequities in park access to different areas of the city"

"Programs offered in neighborhoods should be a priority"



... about Facilities & Amenities

STRATEGY 5

FINANCIAL

One of the key components of a successful parks and recreation system is the financial resources dedicated to it These financial elements of a park and recreation system work best when they are healthy and well balanced. Various items must be analysed to understand the vast nature of a financial system. This not only includes a comprehensive understanding of how the park and recreation system runs on a daily basis, but how the City at large operates. Furthermore, a general understanding of other financial externalities helps to complete the picture on how the financial elements of the park system may be improved.

This analysis of the current health and operations of the financial system allows further recommendations on areas of possible savings and where funding may need to be increased. Savings may explore efficiencies in programs or staffing. Furthermore, it may explore how various expenditures may be reduced to limit the financial burden of a department. Recommendations may also seek to further balance the financials and may also inform where areas of underfunding may be. For example, if a program is not receiving the proper funds to operate, a recommendation may be increase funding for that program to allow it to be supported correctly. The same applies for staffing or for the various facilities and amenities within a department. This may also include exploration of various grants, sponsorships, or charitable opportunities to further leverage funding sources that may help with the financial balance of the park and recreation system. Here are specific objectives and actions to enhance the financial health of Montebello's park and recreation systems:

6.6.1 CONTINUE THE ASSET MANAGEMENT SYSTEM

The current asset management system evaluates the current condition of the assets in the park system and by continuing this program, Montebello's will have a better financial understanding of how to improve their parks.

- Establish an asset management system to manage and track equipment and inventory to improve budget planning.
- Create and update a data-driven plan for identifying, evaluating, and managing park assets.
- Annually, inventory and create a condition assessment for each asset in the parks and recreation system. Establish photo-inventory and GIS mapping if available. The inventory must include cost, installation year and a lifecycle for each asset.
- Complete an annual risk assessment to determine the cost of maintenance and operations, replacement, and consequences if each asset fails. Determine maintenance and operations cost at each year of the asset's lifecycle (based on the level of service for each asset).
- Annually, incorporate data from the asset management plan and process into capital and operating budgets.

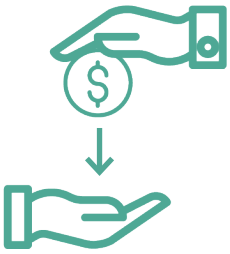
6.6.2 EXPLORE ADDITIONAL FUNDING OPTIONS

Find additional ways that the City can gain financial support to help the city grow and flourish.

- Consider potential funding mechanisms to support and pay for operations and maintenance of parks and facilities.
- Consider the potential support for bond referendum to fund multiple/capital projects.
- Consider internal budget and opportunities to ask/seek additional funding to support improvements in the maintenance and care of City parks and facilities to improve the standard throughout the community.

- Evaluate the non-resident fee structure and consider adjusting fees to ensure non-residents are paying the entire cost of programs, rentals, and activities they participate in.
- Reevaluate current contracts with partners and seek out new and creative public/private partnerships as a means to enhance the variety of recreational amenities available to the community. Consider opportunities with developers to incorporate needed enhancements through new development and recreational attraction.
- Explore opportunities to increase cost recovery at the Montebello Golf Course. Evaluate current fee structure, ongoing expenses, and options for new revenue streams.
- Continue to seek alternative funding source that includes donations, grants, and others forms of sponsorship.
- Communication with current sponsors and donors should be conducted on a regular basis to ensure their continued positive relationships with the City.
- The Department should use the results of the alternative funding exercise completed during the master planning process as a guide for exploring new funding opportunities.
- Seek increased General Fund allocations to address recommendations from the master plan.
- Develop a nonprofit foundation for parks and recreation to pursue grant opportunities and philanthropic donations.

6.6.3 EXPLORE OPPORTUNITIES TO INCREASE SPONSORSHIPS



Increasing sponsorships can create exposure for participants in Montebello and surrounding cities.

- Build on existing sponsorships as well as pursue local entities to support events and a scholarship fund within the foundation (Sample Sponsorship Policy Staff Document).
- Ensure all existing and future sponsorships are accurately portrayed in a signed sponsorship agreement.
- Create a friends' groups for each neighborhood park that hosts summer events and partner to recruit and enter agreements with the local business community.
- Establish media sponsors and multi-year agreements as priority.

6.6.4 TRACK GRANTS AND CHARITABLE OPPORTUNITIES

Grants and charitable opportunities will allow for Montebello to gain funds and other opportunities to better the parks system.

- Consider contracting with a dedicated grant writer to research, submit, and track federal, regional, state, and local grants.
- Continue to research, submit, and track federal, regional, state, and local grants.
- Follow NRPA's grant web page that includes up-to date opportunities in areas like climate resilience, adaptive recreation, health care, Replay Grants, out of school time program grants, Keep America Beautiful and more.
- Utilize NRPA's Foundation Center for links to thousands of grant opportunities, grant education and training.
- Utilize Non-Profit foundation (action item 5.2d) to write and pursue grant opportunities.

Montebello residents say...

"Only build new parks if they are **driven by demand from new development** and that this development pays for their fair share"

"Offer **cultural events, festivals, and activities** to reflect diversity and inclusivity"

"Ensure facilities and **programs are affordable** to all residents of Montebello"

"Add **more pocket parks/plazas** (less than ½ acre"

"No formalized **sponsorship program** is in place"

"People from other cities **regularly participate** in Montebello Senior Center programs"

"The Department is known as the "yes" department, and **works hard** to provide service with limited staff "

... about Financial

STRATEGY 6

PROGRAMS & SERVICES

A vital component to the overall health of a comprehensive parks and recreation system is the programs and services that are offered. Programs and services cover a broad range of areas and community needs. This may include daily programs such as youth camps, senior programs, or various recreational activities. However, this may also include monthly, seasonal, or annual programs and services. An example of this may be a monthly community event or perhaps seasonal events such as a 5k run. Annual events are typically those that occur around holidays such as a Thanksgiving run, or snow day in the park.

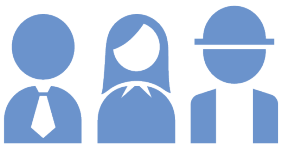
A thorough understanding of the current programs and services is needed to better recommend where additional programs and services may be made, or where removal may help with other budgetary or staffing challenges. Recommendations may also look into other services to better the health, safety, and wellness of a community. This may include services that help minors stay active or ways to keep seniors engaged within the community. These may also explore how diverse and equitable the programs are within the City and find ways to better distribute them. Here are specific objectives and actions to enhance the programs and services of Montebello's park and recreation systems:

6.7.1 EXPAND PROGRAMS AND SERVICES

Public Expanding programs and services in Montebello will open opportunities for the community to be engaged with the City.

- Consider expanding operations at the George Hensel Aquatic Center.
- Expand sports programs to include football, soccer, baseball, and girls' softball. Continue to monitor sports program trends and interest.
- Develop a recreation program plan that includes a service matrix, activity development and selection process, and other requirements found in CAPRA standards.
- Continue to offer and expand program opportunities to Montebello's Lifemode groups - Next Wave, Ethnic Enclaves, and Upscale Avenues and appropriate market segments.
- Promote active lifestyles by enhancing and increasing aquatic exercise and fitness programs.
- Evaluate salaries and compensation for Department employees. At a minimum, conduct a wage analyses to assist the Department with recruiting highly qualified full and part-time recreation staff.

6.7.2 EXPLORE MORE DIVERSE PROGRAMS



Exploring more diverse programs that can every resident in Montebello could participate in.

- Install outdoor fitness and exercise equipment in programmable spaces in neighborhood parks.
- Use contracted instructors to offer enhanced fitness programming in parks across the City.
- Increase and enhance programs for individuals with disabilities. Consider programmatic ADA inclusion requirements.
- Offer organized walking programs for seniors and families in safe environments.

6.7.3 ENHANCE SPECIAL EVENT PROGRAMMING

Enhancing special event programming will provide the city with an efficient way to inform the public about the events that occur in Montebello.

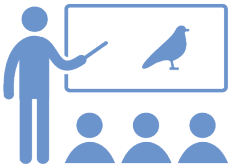
- Offer special events in each neighborhood that will contribute to a sense of community and help make parks the hub of each neighborhood.
- Develop a special events advisory group for each neighborhood to assist with planning special events in parks.
- Invest in a formal sponsorship program for events and activities. At a minimum, develop a policy and tools to assist staff with recruiting program sponsors.
- Enhance and offer Spanish language programs, cultural programs and outdoor movies in Spanish.

6.7.4 CONTINUE TO WORK WITH OTHER SERVICE PROVIDERS TO DEVELOP PROGRAMS AND SERVICES TO MEET DEMAND AND TRENDS

By continuing to work with other services to provide programs and services to meet demands and trends, the City will be able to better communicate with its residents.

- Invest in and develop an automated and real-time sports field reservation system.
- Develop a joint use agreement with the school district to ensure the partnership is equitable.
- Coordinate with local recreation providers (PAAL Police Athletic & Activities League, schools, youth sports providers, Montebello-Commerce YMCA, the Boys & Girls Club of West San Gabriel Valley, the Montebello and Chet Holifield Libraries, etc.) to reduce duplication of services.

6.7.5 INCLUDE EDUCATIONAL AND NATURE/ENVIRONMENTAL PROGRAMS



Educating the public through nature/environmental programs can increase the knowledge of residents and encourage them to use parks.

- Establish walking programs that highlight nature interpretation opportunities.
- Develop partnerships with environmental advocacy groups to offer environmental education programs and camps.
- Establish community gardens in convenient locations to promote gardening and local food production.
- Collaborate with schools and educators to create outdoor "classroom" space in parks near schools.

6.7.6 CONTINUE TO MONITOR AFFORDABILITY OF PROGRAMS AND SERVICES

Monitoring the affordability or programs and services to ensure that the City can sustain the programs and services offered.

- Develop and enhance scholarship opportunities.
- Evaluate non-resident program participation to ensure non-resident participants are paying appropriate and equitable fees.
- Develop a resource allocation and cost recovery policy to ensure equitable use of City resources for Recreation.

6.7.7 EXPAND INDOOR PROGRAMS AND INCREASES OPPORTUNITIES FOR SENIOR, TEEN, COMMUNITY CENTERS

Having additional public indoor facilities for teens and seniors can foster a larger sense of community in Montebello.

- Offer additional enrichment classes for Seniors, using contract or volunteer instructors to maintain affordability.
- Increase and improve Senior Center activities focusing on social services, social activities, transportation and information and referral for healthcare and other services.
- Enhance and improve enrichment programs that offer skills opportunities related to job skills, personal improvement, and academic success.
- Evaluate parking opportunities at the Senior Center to ensure appropriate spaces are reserved and available during program and event times.

6.7.8 CONTINUE TO EVALUATE THE QUALITY AND MIX OF PROGRAMS AND SERVICES

Introducing a variety of programs and services to enhance the quality of residents experiences in Montebello is highly valued.

- Develop and report a minimum of 5 performance measures to evaluate quality of recreation programs and services.
- Develop a consistent and equitable manner of community member engagement to determine recreation desires and needs.
- Ensure engagement processes include residents who live in the south part of the City.
- Conduct an annual on-line survey to establish trends in participant satisfaction.
- Expand patron evaluation process, emphasizing aquatics, adult sports and youth sports to include post program surveys and comment cards.
- Establish customer service response goals to ensure patrons receive timely responses to complaints or suggestions.
- Implement California's Concussion Management in Youth Sports Act to comply with legal mandates.

6.7.9 COMMUNICATE RECREATION OPPORTUNITIES TO CITY RESIDENTS

Keeping Montebello City residents in the loop on recreation opportunities will help foster a greater sense of community in the City.

- Develop a marketing plan that includes outreach, pricing, promotion, program mix and social media.
- Publish a quarterly program guide to provide branding and program registration information.
- Develop a social media plan that has both resources and is aligned with current trends and updated continually.
- Increase communication and coordination with youth sports providers by creating a youth sports advisory board.
- Emphasize use of the City's webpage to assist patrons to remain up to date on recreation program opportunities.
- Continue to use and enhance an equity lens when marketing programs, with specific emphasis on program promotion in the Spanish language.

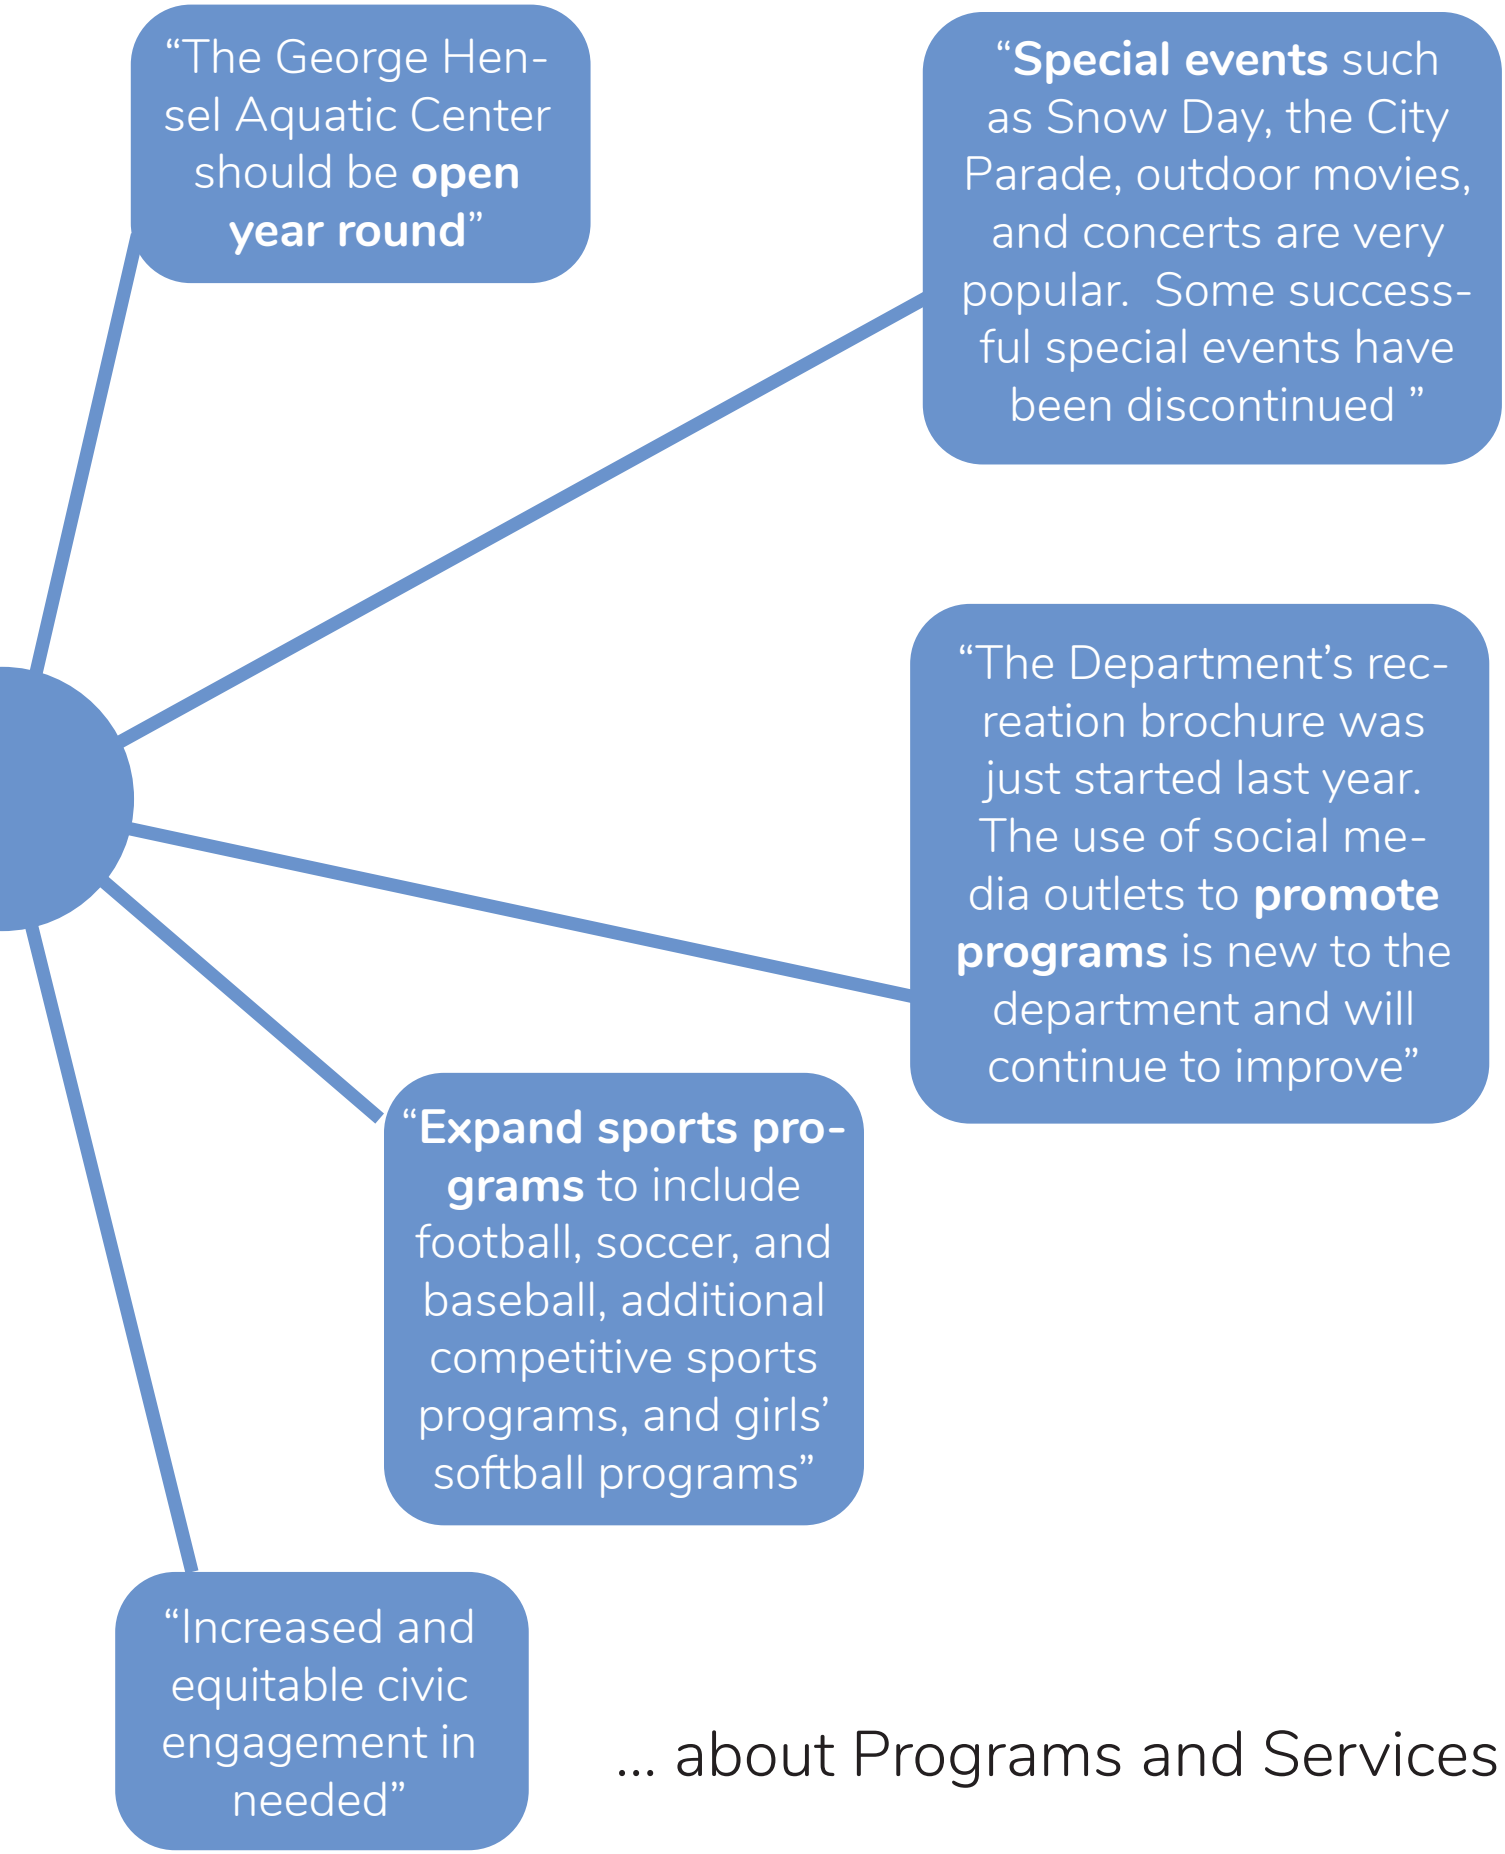
Montebello residents say...

"A **joint use agreement** with the school district may make the partnership more equitable for the Department"

"Additional **general marketing and communication** will help the department promote programs and events"

"The department does not have a **scholarship program** for recreation programs which limits access for low income residents"

"Programs for individuals with disabilities are needed"



... about Programs and Services

STRATEGY 7

ADMINISTRATIVE

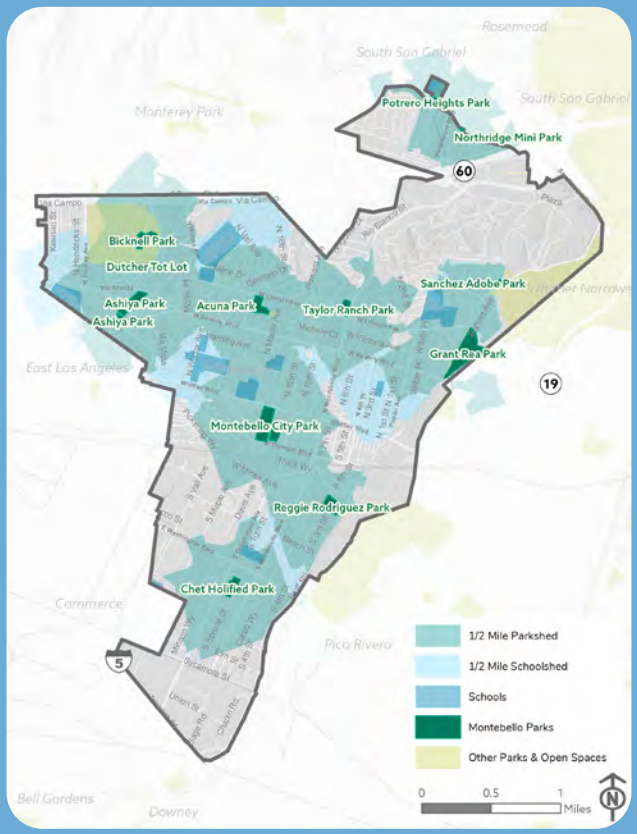
Administrative elements of a park and recreation system are those that require city or community interaction and facilitation. One way to think about the administrative items of a park and recreation system is the analogy of it as a functioning company or business. With this analogy, the administrative items may include the various managerial items that the owner, CEO, or COO may be involved in. For example, an administrative item may be how the system operates current leases or agreements with other recreational providers or joint use agreements. Other administrative items may include staffing levels within the park and recreation system or other partnerships, volunteering, or management items.

An understanding of the administrative makeup allows for recommendations on these items to improve the day-to-day operations and management of the park and recreation system. Recommendations may explore various partnerships and agreements, or how to appropriately staff and maintain the park system. It may further examine how communication with other city departments can be improved or how information is conveyed to the community. It may include ways of how rentals, purchase agreements and other administrative items are executed as to better suggest ways to operate or explore other actions to further enhance the park and recreation department. Here are specific objectives and actions to enhance the administrative elements of Montebello's park and recreation systems:

6.8.1 IMPROVE PARTNERSHIPS AND JOINT USE AGREEMENTS

Maintaining current partnerships and establishing joint use agreements will provide increase opportunities for the City.

- Develop a joint use agreement plan with the school district.
- Look at strategic partnerships with organizations such as the YMCA and others.
- Generate partnerships with organizations that help with park security, maintenance, and cleanup.



6.8.2 STAFF APPROPRIATELY TO MEET CURRENT DEMAND AND MAINTAIN ESTABLISHED QUALITY SERVICE

Ensuring that there is an adequate number of staff personnel to meet the current demands and maintenance of parks to establish quality service.

- Understand the need for additional manpower for maintenance practices at additional parks or upgraded facilities.
- Research additional resources.
- Create new maintenance positions within the Department.

Source: Little League University

6.8.3 EXPLORE ADDITIONAL PARTNERSHIPS TO ASSIST WITH FUNDING, VOLUNTEERING, AND MARKETING

Additional partnerships to assist with funding, volunteering, and marketing will expand resources the Montebello can use in the future.

- Develop relationships with local businesses, clubs, and organizations to seek funding, volunteers, and marketing support to expand programs and facilities.
- Find volunteers to help operate and run programs.
- Reevaluate current contacts with partners and seek out new public/private partnerships to enhance amenities.
- Identify partnerships with other organizations that can provide additional programming space.

6.8.4 EVALUATE AND ADDRESS STAFFING LEVELS

Evaluate whether staffing levels can meet the current needs of the City and address accordingly.

- Consider comparison for staffing levels through NRPA Standards.
- Identify current performance standards.

6.8.5 IMPROVE INTERNAL AND EXTERNAL COMMUNICATION ABOUT DIVISION ACTIVITIES, EVENTS AND SERVICES

Improving internal and external communications about division activities, events, and services to allow for increase involvement from Montebello residents.

- Utilize a number of marketing tools and strategies to actively promote parks an recreation services.
- Increase social media presence, school flyers, and hire teens or interns to assist with social media marketing and promotions.
- Engage all segments of the community in the marketing efforts.

6.8.6 EXPLORE IMPROVEMENTS TO THE FACILITY AND PARK RENTAL FEE

Exploring facility and park rental fee options that are accessible to all residents and are user friendly.

- Partner with an insurance agent.
- Review fees annually to ensure they are equitable and the collection of fees is resulting in appropriate cost recovery.
- Consider conducting a Resource Allocation/Cost Recovery study to determine cost recovery goals, cost of operations, and how resources are currently allocated and could be better allocated.

Montebello residents say...

"Provide a high level of **safety and security** at facilities"

"Focus on providing **family-oriented activities**"

"Increased maintenance, repairs, and security improvements"

"Safety and security"

"Lack of **joint use agreements** creates challenges"

... about Administration

6.9 SPECIFIC RECOMMENDATIONS

Based on the parks needs assessment map Figure 6-1 the areas of significant park needs that were outlined can be overlaid onto the vacant land parcels of the City to indicate areas of focus for planning purposes. The open parcels within these areas should be explored for additional parkland as these areas are in most critical need for parks and open space. Many many of the parcels that are within the park needs areas are generally small and do not offer significant opportunities for larger recreational amenities such as ballfields or soccer fields, opportunity areas in or adjacent to these areas (see Figure 6-3 and Figure 6-4) should also be explored, and if redevelopment of these sites is considered, park land should be made available to further offset the park needs in these areas. The geographic distribution of amenities within these areas should also be considered to allow for placement of amenities compared to existing amenities that may be currently available around the sites.

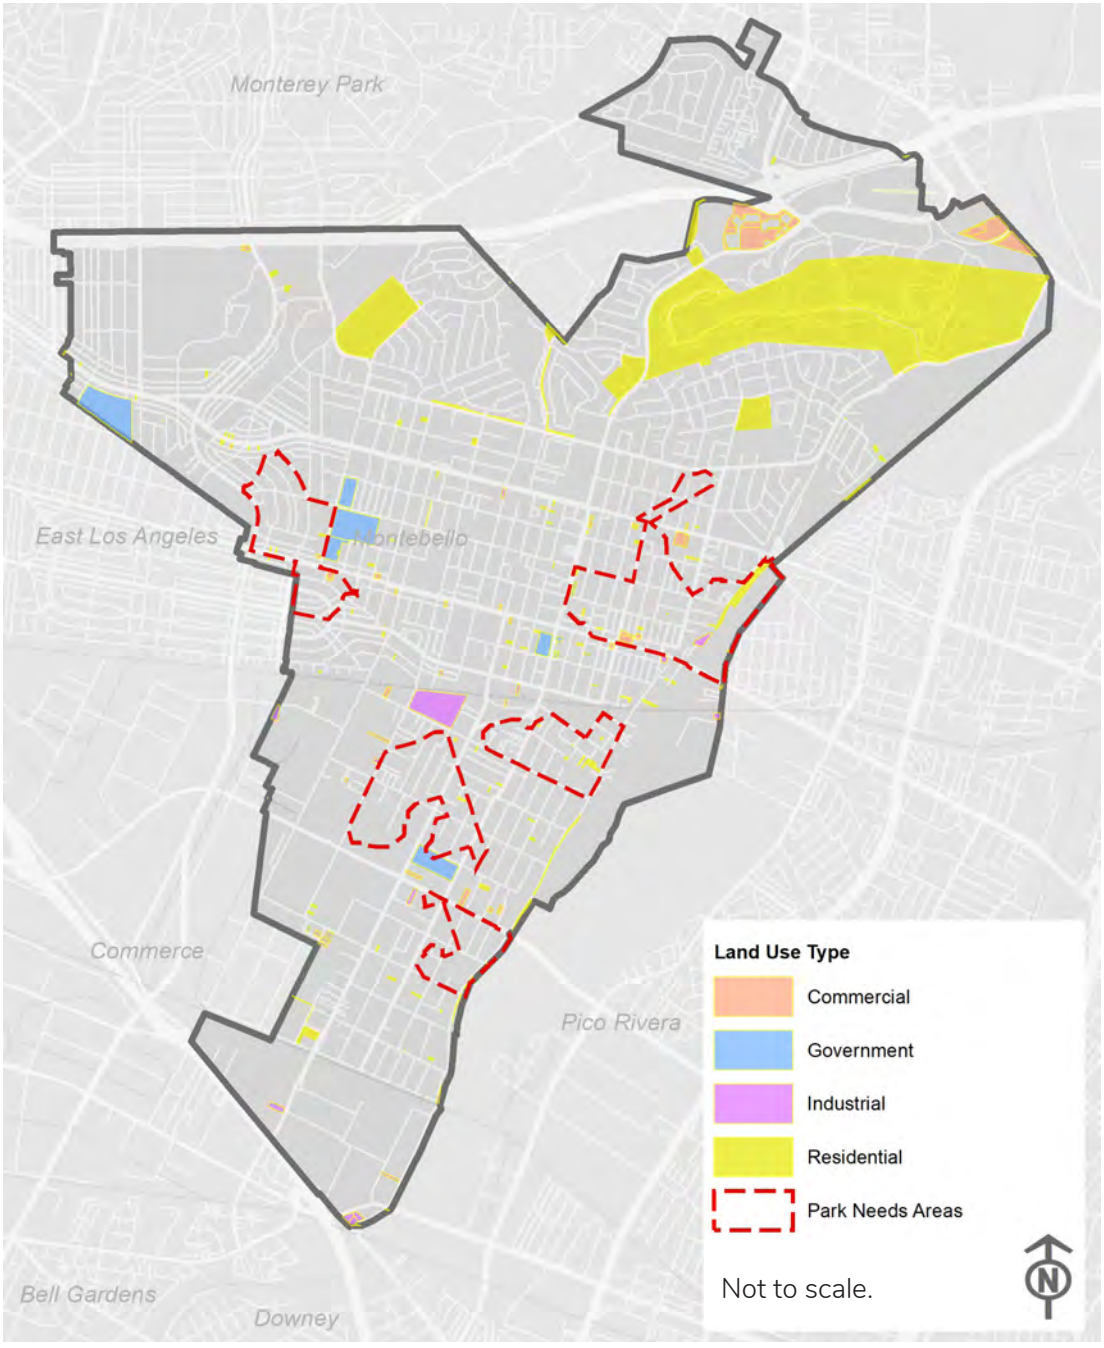


FIGURE 6-1: Vacant Land near Park Needs Areas

6.9.1 PARK SPECIFIC MASTER PLANS

Following the city-wide parks analysis facilitated the understanding of the community needs, geographic distribution of amenities, and City's priorities. From these three park sites were identified to complete park level specific plans. These park specific plans look at the parks at a master plan level, exploring reuse of the spaces and finding better efficiencies in the placement of amenities. The three park sites that were identified were Reggie Rodriguez Park, Grant Rea Park, and Montebello City Park. More information about each park can be found in Appendix I.

Reggie Rodriguez

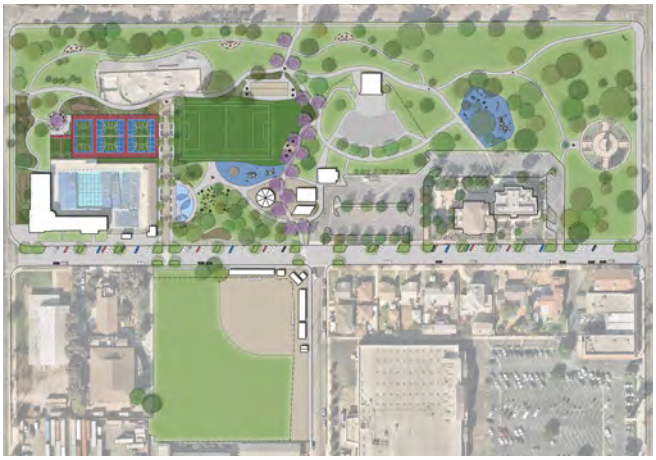
Reggie Rodriguez Park is in a key area of the City where additional growth will put stress on the park, requiring additional amenities and improvements. The park design increases the overall level of service of the park and provides a larger playground area, a central promenade with art elements, a larger family gathering area, a looped trail, a new t-ball and soccer field, a community garden, a large multi-use soccer field, an enhanced and revised multi-sport court area (basketball, tennis, volleyball, and pickleball), enhancements at the existing community center, and a new park restroom building.

Grant Rea

As the City's main active community park the design makes use of the central area of the park by providing a multi-use synthetic turf field to allow for both baseball and soccer use year-around. The park design also includes overall ADA improvements throughout, a new basketball and tennis court area, an enhanced and enlarged inclusive playground and splash pad area, a dog park, a new community center, a central promenade with a new playground and enhanced trails, enhancements to the north existing baseball/softball field, enhancements to the youth softball field, a new community garden at the batting cages location, an enhanced trail with vehicular paving for the ability to better patrol the park, and various fitness nodes and activities.

Montebello City Park

As the park is the hub for the community, providing a central place where families can gather for community events while also providing community-wide recreational activities, the park design seeks to bring balance to the level of service that the park offers while also helping to clear some of the amenities that are aging and that were placed somewhat haphazardly over time. The park design includes overall ADA improvements and enhancements throughout, a redesigned family event area, a new adventure playground area, a new rectangular multi-use field and bocce ball court area, a central promenade and splash pad, a large multi-sport court area (basketball, tennis, volleyball, pickleball, and futsal) with handball courts and an outdoor fitness area, an enlarged skatepark area, a new cultural themed playground area, and a new walking trail with fitness pads.



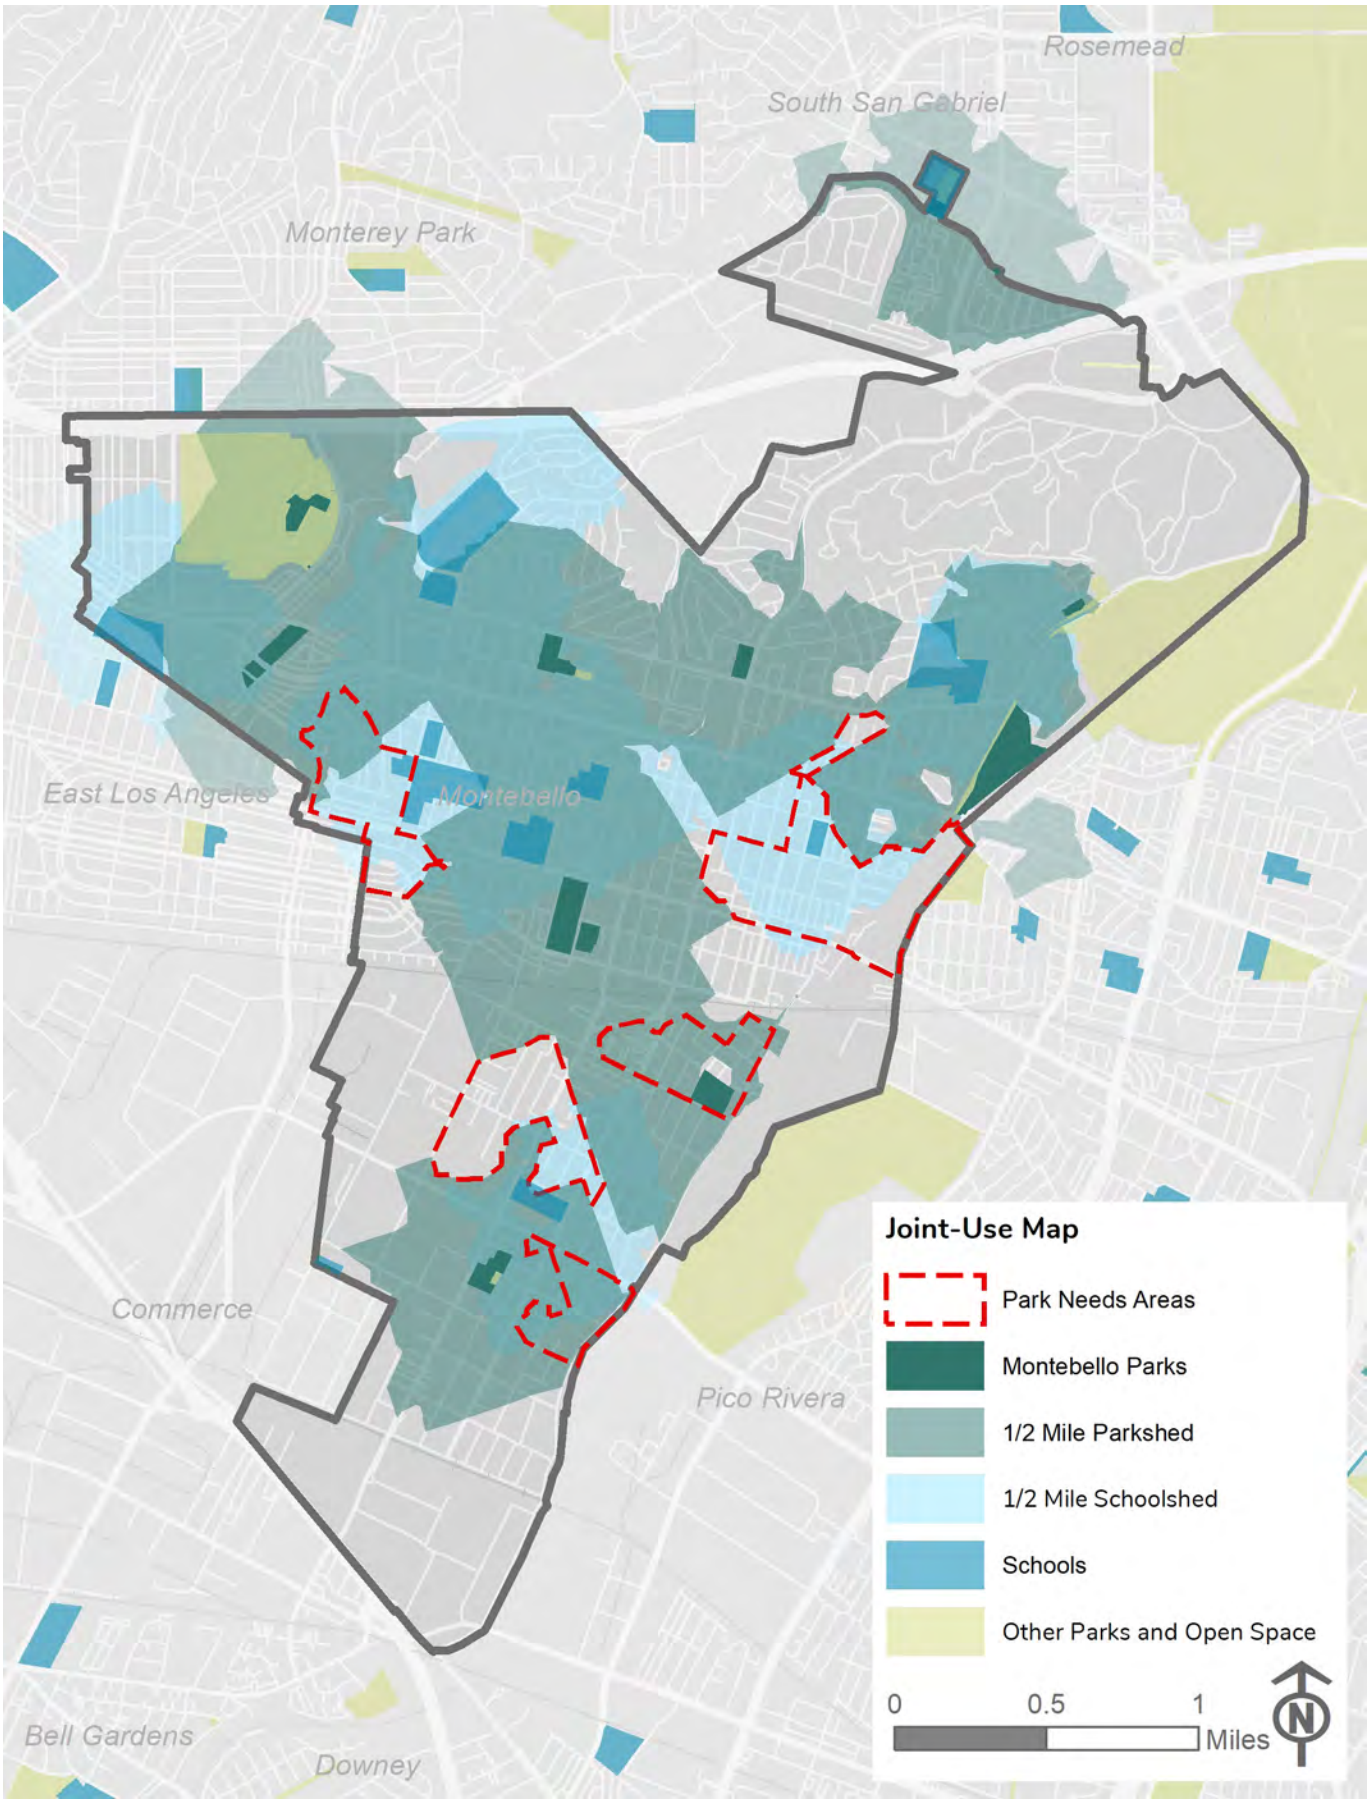


FIGURE 6-2: Joint-use Map

6.9.2 JUA AGREEMENTS

Another method to help mitigate the LOS gaps within the community is to establish a joint use agreement with the school district as indicated in recommendations 6.7.4 and 6.8.1. As schools offer various amenities that may be utilized by residents during times when school is not in use, these amenities could help to mitigate the growing LOS demand that the community will face. As seen in Figure 6-2, the school sheds are located in areas of high park demand which can greatly help these areas where parkland may be hard to come by. This allows for additional benefits to the communities within these areas. Furthermore, these schools may provide areas where participating students can further recreate in a social environment that they are also using during school hours, fostering greater community pride and sense of place.

6.9.3 AMENITY INFILL THROUGHOUT THE CITY

In addition to the three specific park plans, further exploration of various infill amenities at parks throughout the City may help find balance of amenities citywide. These may present less expensive and easier opportunities as the identified areas (see pages 109-134 in Chapter 5) can be constructed without major park expansions being done. The infill of these areas should be done in a geographically distributed manner so that these elements can be accessible to the greater community within the 15-minute walk times or parksheds that serve the community (see Figure 6-3 and Figure 6-4).

The suggested infill amenities at the park level can be found in Table 6-1. This table also includes the improvements that were highlighted within the park specific plans. Although these improvements provide a roadmap for the City on which amenities could be placed in each identified park, the ultimate placement of these amenities should be further vetted by the community that the park serves prior to inserting the amenity. Furthermore, the locations at which these improvements occur should be further explored as utilities and other constraints were not studied at the system wide planning level.

*** Indicates a single purpose facility, number includes shared facilities*

**** May count some of the tennis courts if facility is shared*

† Indicates park specific plan site

6.9.4 SPECIFIC RECOMMENDATION SCENARIO

In order to assess the value of the specific recommendation, a scenario that indicates the LOS abilities of the recommendations has been provided. This scenario takes into account the following assumptions:

1. JUA agreements (only counted at 50%) of recreation areas
2. The new park specific plan improvement amenities
3. Park infill amenities for existing parks

As seen in the table (see Table 6-3), if all of these items in the scenario are included, most LOS amenities can be achieved. As youth baseball could be played at softball fields by using a portable mound, these facilities may be accounted for in the softball youth category. For adult baseball fields, the school facilities may be used or the City may consider finding a location for adult fields at the opportunity sites as these may provide additional land for the larger footprint of this facility type. Further balancing of amenities could also be considered at the opportunity sites if park land becomes available but these should be distributed in a manner to serve the entire community.

TABLE 6-2: Priority of Proposed Facility Inventory

Priority of Proposed Facility Inventory	Mini-park			Neighborhood Park			
	Dutcher Tot Lot	Northridge Mini Park	Potrero Heights Park	Acuna Park	Ashiya Park	Bicknell Park	Chet Holifield Park

6.9.5 FUNDING, OPERATIONS, AND MAINTENANCE RECOMMENDATIONS

Further cost impact studies may be found in Appendix II of the report. Cost studies highlight each of the recommendation's range of capital and operational costs along with the appropriate time to complete the suggested recommendations. This appendix also includes a comparative analysis of other cities in the region along with further funding, operational, and maintenance notes with various traditional and alternative funding sources for consideration.

Reggie Rodriguez Park Overall Design Narrative

The improvements at Reggie Rodriguez seek to revitalize the park and create additional active and passive spaces for the community. The park design increases the overall level of service of the park and provides an additional playground area, a larger family gathering area, a looped trail, a new t-ball field and soccer field, a community garden, and a large multi-use soccer field. Throughout the park crime prevention through environmental design (CPTED) principles will be implemented and site lighting standards, furnishings, and equipment will be updated and enhanced. All existing trees will be inventoried, and an arborist report shall be completed prior to further design efforts to assess tree health and determine where heritage or significant trees need protected. The design represents a 10% schematic level of design effort for planning purposes. Further design and engineering studies shall be done to further understand site constraints, the feasibility of proposed design features, and to better understand costs.

Reggie Rodriguez Park

Not to Scale

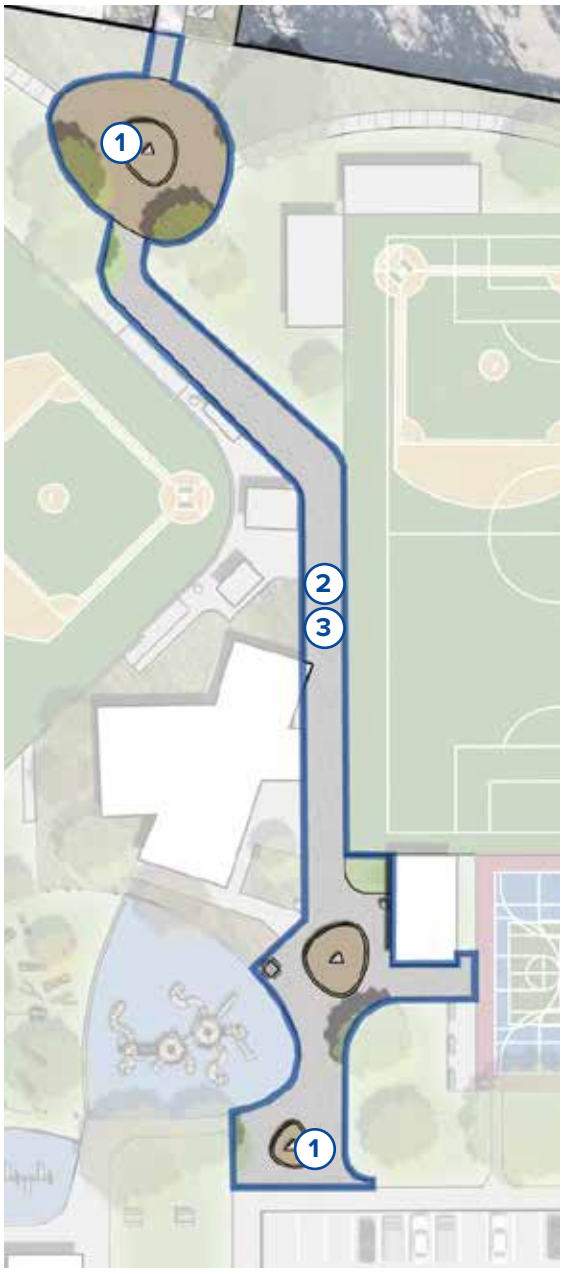
IMPROVEMENT	DESCRIPTION	COST ESTIMATE
A	Park Promenade	$536,200 - $625,500
B	Playground	$767,000 - $894,800
C	Multi-purpose Baseball/Soccer Field West	$1,029,300 - $1,200,900
D	Perimeter Walk, Fitness Pads, & Waterwise Planting Areas	$895,900 - $1,045,200
E	Community Garden	$188,200 - $219,500
F	Multi-purpose Baseball/Soccer Field East	$937,200 - $1,093,400
G	Multi-purpose Sports Courts	$134,800 - $157,300
H	Family Gathering Area	$229,200 - $267,400
I	Restroom / Community Building	$1,836,300 - $2,142,400
R	Remaining Park Areas	$521,400 - $608,300

Total Cost: $7,104,300 - $8,288,300

Area A: Park Promenade

The central park promenade is the area in the center of the park that runs north to south connecting the adjacent neighborhood to the park and connecting the various major components and amenities of the park. The team is suggesting removal and replacement of the concrete in this area to bring it to current ADA standards and make it larger for vehicular access north of the existing baseball field. The concrete will be enhanced and is intended to have various low seatwall areas with art in the middle of them. Site furnishing including lighting, benches, trash receptacles, and drinking fountains are also suggested to make the area functional and safe.

Seating improvements



LEGEND	DESCRIPTION
#	New Facility
#	Existing Facility
#	Enhanced Facility

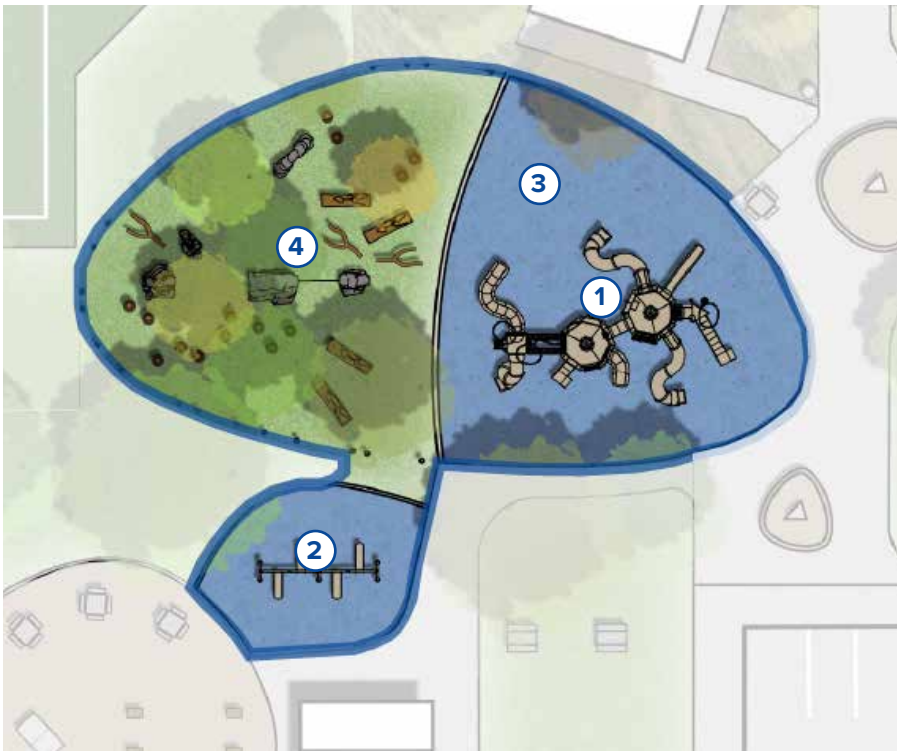
IMPROVEMENT	DESCRIPTION
1	Art Node & Entry Signage
2	Enhanced Vehicular Paving Throughout Promenade
3	Furnishings Througout

Total Cost of Area A: $536,200 - $625,500

Area B: Playground

The playground area is intended to be redone to bring into compliance with the latest ADA standards. The playground will include two structures for 2–5-year-old play (tot lot) and for 5–12-year-old play. Additionally, the playground will expand into the adjacent hilled area and include various nature play elements such as small boulders, logs, and other elements for the exploration and imaginative play environment. The play equipment will include an all-inclusive swing area and the playground will have resilient surfacing per the required standards and regulations.

Playground



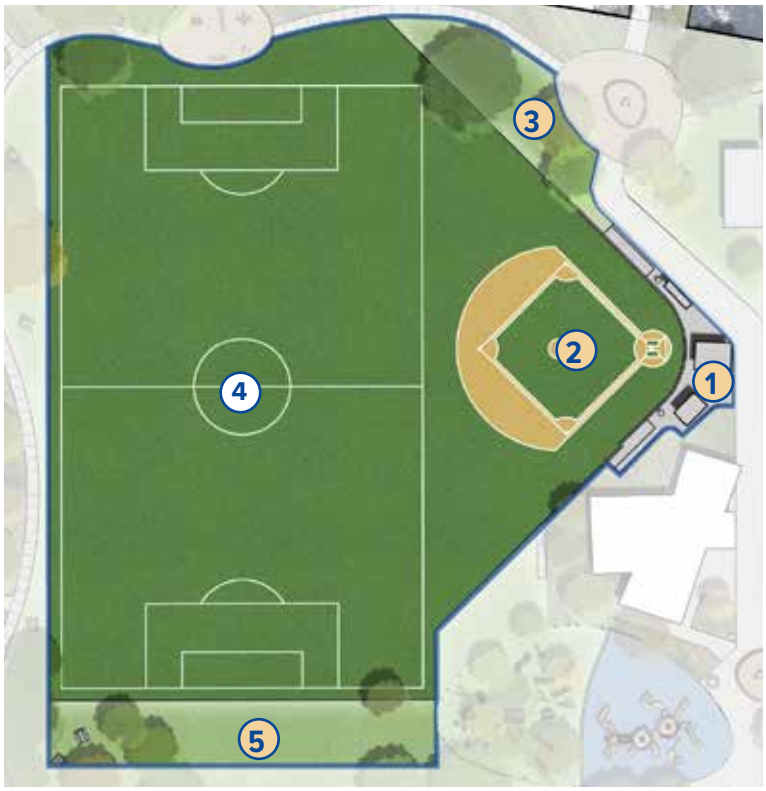
IMPROVEMENT	DESCRIPTION
1	Inclusive Playground Equipment
2	All-Inclusive Swingset
3	Resilient Surfacing
4	Nature Play Equipment

Total Cost of Area B: $767,000 - $894,800

Area C: Multi-purpose Softball/Soccer Field West

The multi-purpose softball and soccer field area will include various enhancements to the existing baseball field. This will include new backstop fencing, dugout repairs, hardscape replacement for ADA compliance, and new infield material and lighting. The soccer field is sized to accommodate a 14U playing area. This area will share the outfield of the baseball field and will have lawn replacement that focuses on irrigation improvements, new lawn turf, proper soil amendments, and other improvements to allow for hardy natural play field turf. The area will include an allowance for spectator seating behind the backstop of the softball field.

Enhanced baseball field



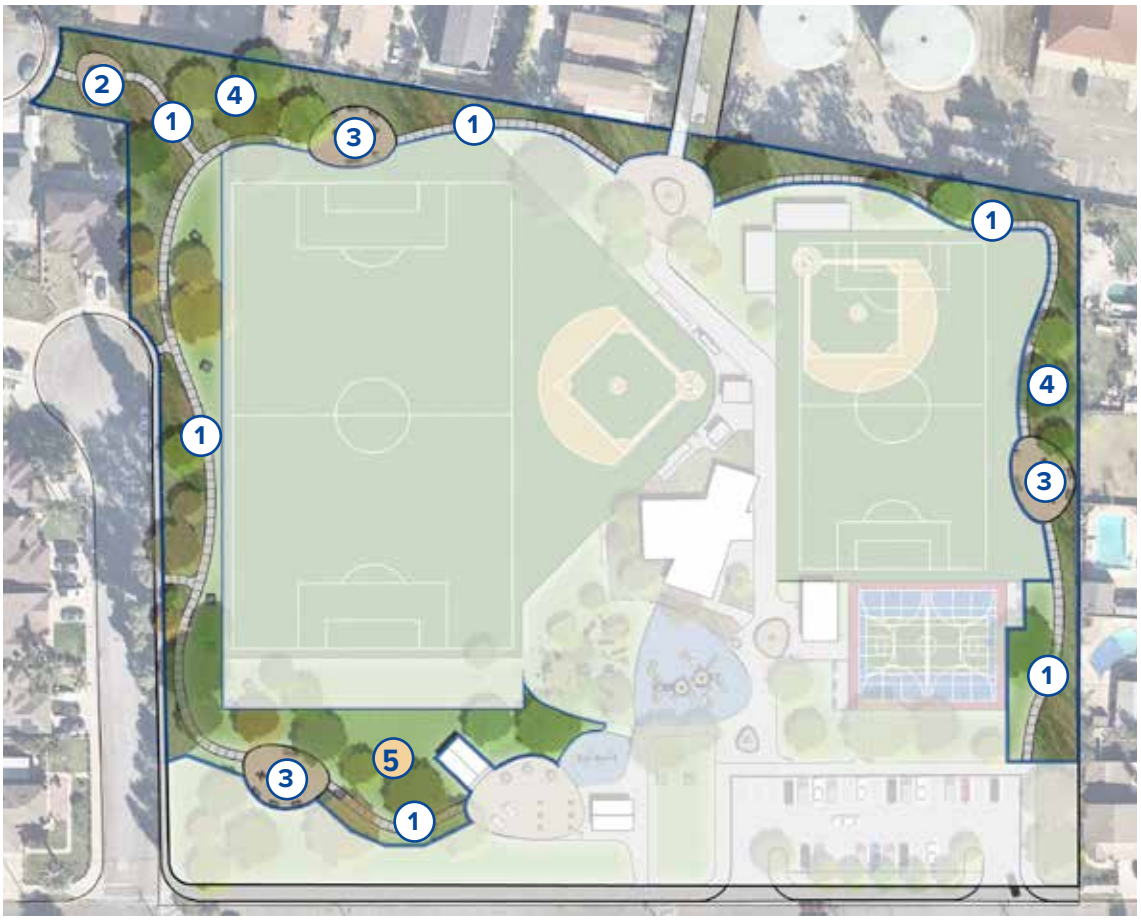
IMPROVEMENT	DESCRIPTION
1	Enhanced Backstops, Dugouts, & Spectator Seating & Lighting Area
2	Enhanced Softball / Baseball Field
3	Enhanced Planting Area
4	New Natural Field Turf, Striping, and Irrigation Upgrades
5	Enhanced Existing Lawn Areas

Total Cost of Area C: $1,029,300 - $1,200,900

Area D: Perimeter Walk, Fitness Pads, and Water Wise Plantings

The perimeter walk loop is a pathway system that will provide an inner trail for park-goers to walk or jog on. The walk will have three fitness pads with fitness equipment included within them. The fitness equipment will allow for various levels of exercising and each station may feature another play element. The area will also include water wise planting along the perimeter of the park. The water wise planting areas will include bio-retention areas and bioswales. This area will also include the entrance from Walnut Ave which will feature pilasters, fencing, enhanced planting, and an art element.

Trail and fitness station



IMPROVEMENT	DESCRIPTION
1	New Perimeter Multi-Purpose Path
2	Entry Plaza, Fencing, & Pilasters
3	Fitness Pad

IMPROVEMENT	DESCRIPTION
4	Water-Wise Planting Areas
5	Enhanced Lawn Area

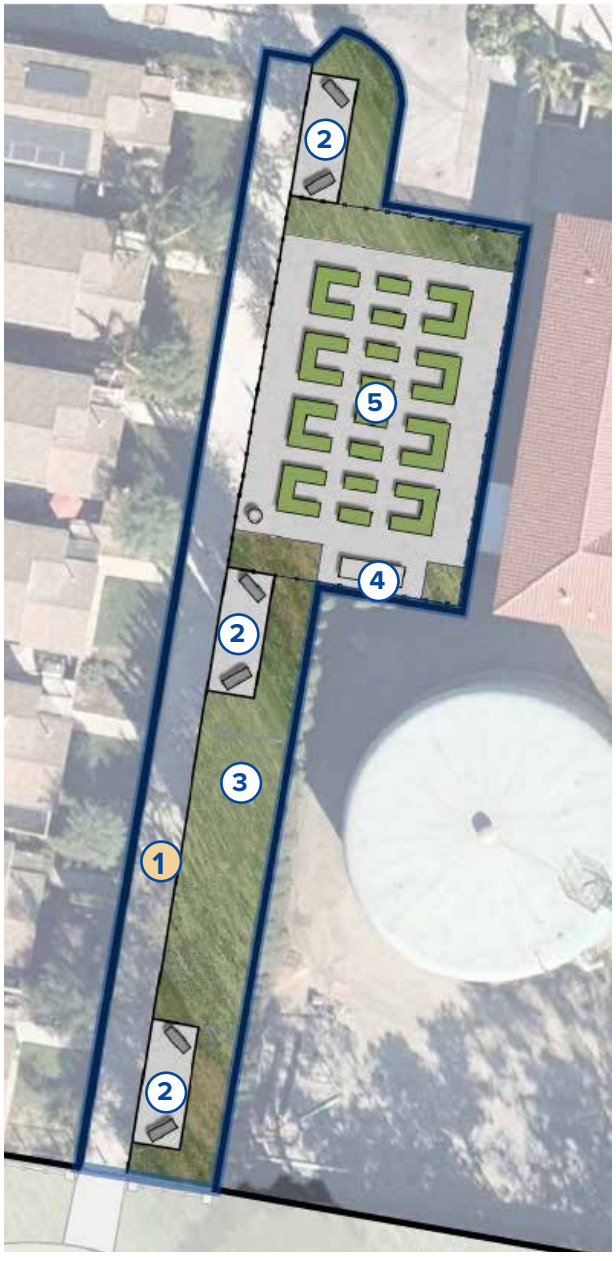
Total Cost of Area D: $895,900 - $1,045,200

Area E: Community Garden

The community garden area is located on the far north end of the park on the corner of Lohart Avenue and 3rd Street. This area currently has a dilapidated playground which is proposed to be removed. In it's place a new community garden would be added that provides communal learning and a farm to fork experience. The community garden will feature various garden beds and have storage for gardening equipment. The area also includes a pathway that connects to the park and provides benches, enhanced planting, and other features that are suitable for the community.

New community garden

Butterfly garden or nature walk



IMPROVEMENT	DESCRIPTION
1	Enhanced Walkway
2	Seating Nodes
3	Water-Wise / Butterfly Garden Planting Areas
4	Storage Units
5	Community Garden

Total Cost of Area E: $188,200 - $219,500

Area F: Multi-purpose Softball/Soccer Field East

The multi-purpose baseball & soccer field east is a smaller playfield that is similar to the Area C multi-purpose baseball/soccer fields. This area has a small T-ball field which includes a new backstop fencing, dugout benches and shade, hardscape areas for ADA compliance, and infield material. This field will not have lighting but will be ambiently lit by adjacent path lighting. The soccer field is sized to accommodate a 10U playing area. This area will share the outfield of the baseball field and will have lawn replacement that focuses on irrigation improvements, new lawn turf, proper soil amendments, and other improvements to allow for hardy natural play field turf. The area will include an allowance for spectator seating behind the backstop of the T-ball field.

Multi-purpose turf field

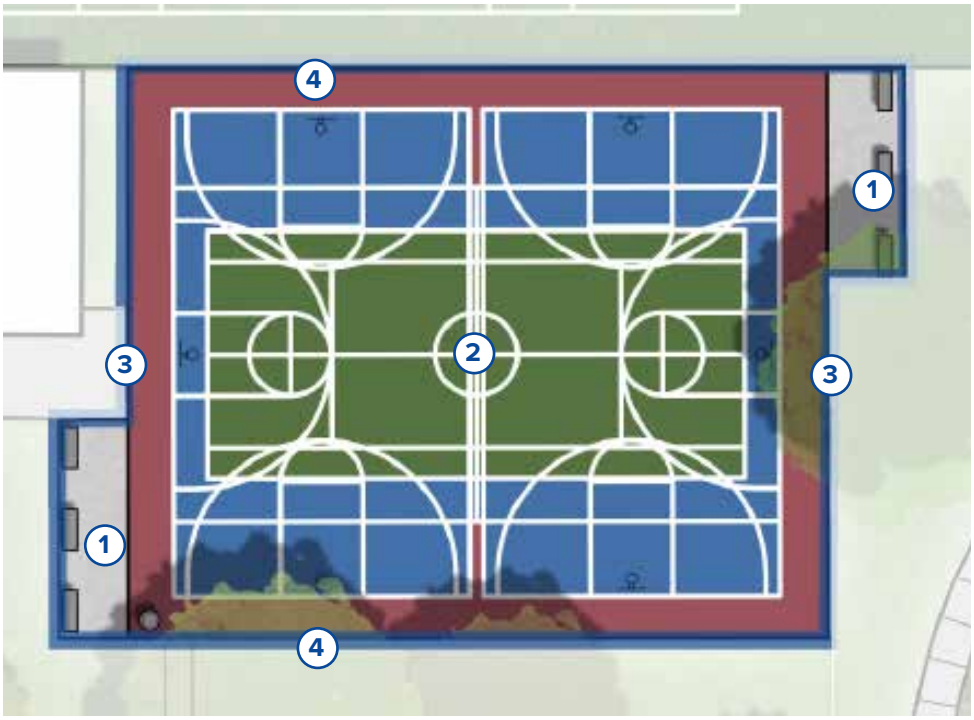
IMPROVEMENT	DESCRIPTION
1	Spectator Seating and Small Backstop - Bench Dugouts
2	Synthetic Infield
3	Synthetic Turf Field with U10 Field Striping
4	Natural Turf Area

Total Cost of Area F: $937,200 - $1,093,400

Area G: Multi-purpose Sports Courts

The multi-purpose sports court area will include the enhancement of the existing basketball court. The area will look to include tennis and pickleball areas in the striping layout. The area may also explore having volleyball striping if feasible. The area will include new top treatment on the existing concrete, new paint striping, new lighting, new basketball courts, 12' tall vinyl chain link fencing behind the tennis areas on the east/west of the facility, and low 4' vinyl chain link fencing on the north/south of this area. This area will also include two seating areas for community members who are waiting to play or watching.

Basketball and tennis striping



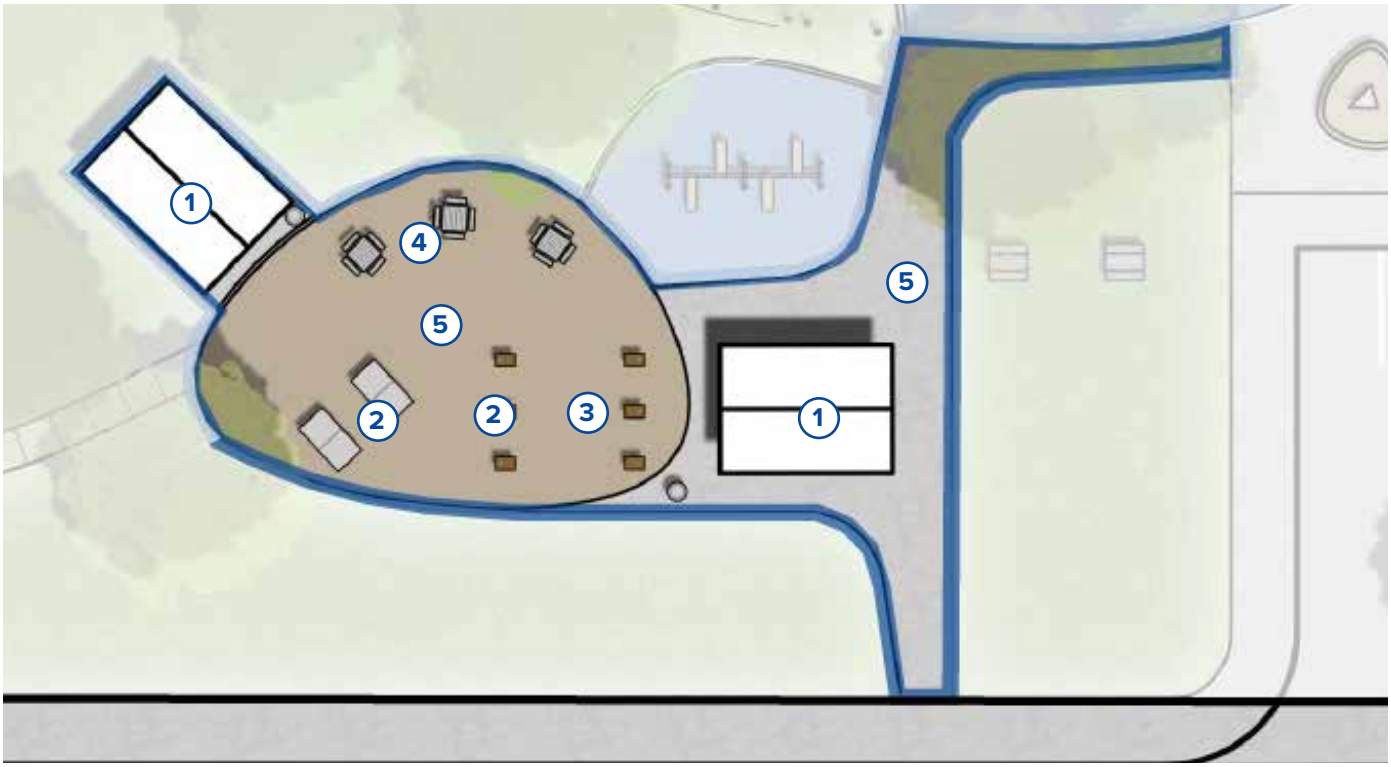
IMPROVEMENT	DESCRIPTION
1	Seating / Waiting Areas
2	Multi-purpose Sport Court (Basketball, Tennis, Volleyball, Pickleball, Futsal)
3	12' Tall Vinyl Chain Link Fence
4	4' Tall Vinyl Chain Link Fence

Total Cost of Area G: $134,800 - $157,300

Area H: Family Gathering Area

The family gathering area will support larger family events through the acommodation of reserved facilities. The money collected for these reservations can help provide other funding of park maintenance or improvements. This area will include various family play elements such as concrete cornhole, game tables, and ping pong tables. The area will also include seating nodes, structures, and enhanced paving throughout. The area will be further activated by it's proximity to the open lawn and the nearby playground.

Outdoor ping pong



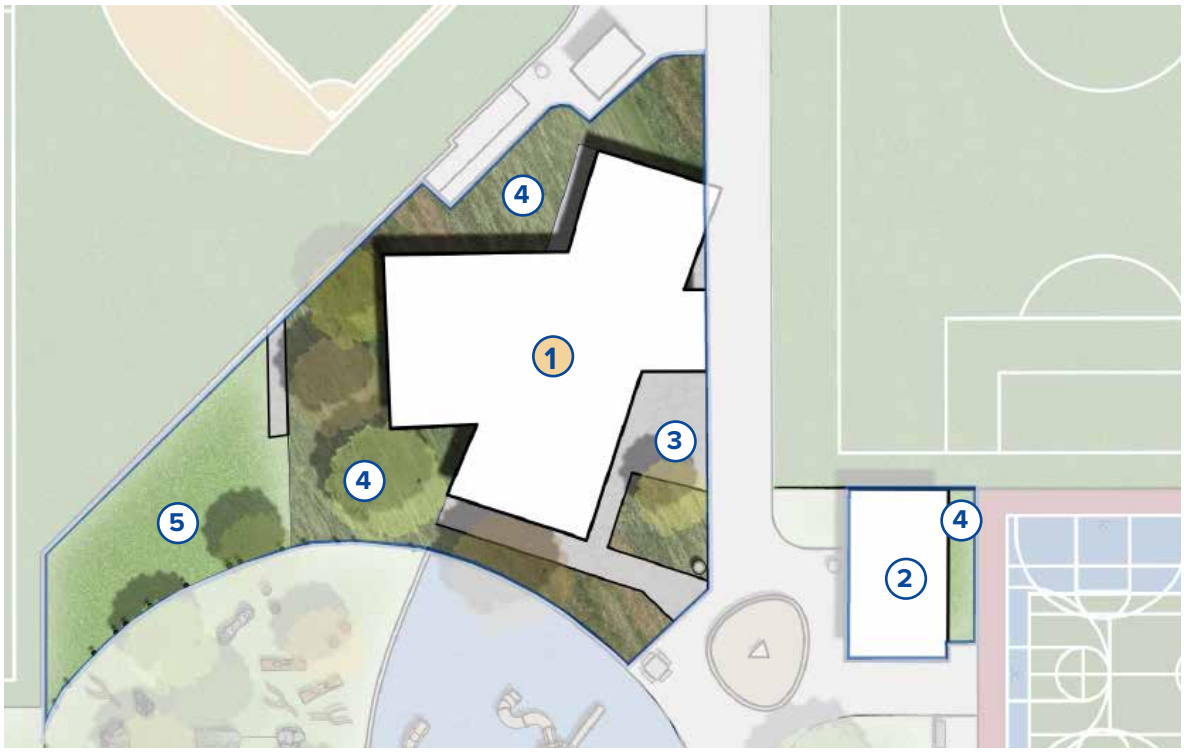
IMPROVEMENT	DESCRIPTION
1	New Picnic Shade Shelters & Furnishing
2	Ping Pong Tables
3	Concrete Corn Hole
4	Game Tables
5	Enhanced Paving and Plaza / Walkway

Total Cost of Area H: $229,200 - $267,400

Area I: Restroom / Community Building

The restroom & community building area will include various improvements to the perimeters of the restroom and community buildings. The restroom will be replaced with a pre-manufactured restroom and which will include the latest ADA and gender neutral / family style restroom standards. The restroom will be sized appropriately and will placed in the same location as the existing restroom facility.

Community building classrooms



IMPROVEMENT	DESCRIPTION
1	Enhanced Existing Community Building
2	New Park Restroom Building
3	Enhanced Paving Area / Plaza
4	Foundation Planting
5	Enhanced Lawn Area

Total Cost of Area I: $1,836,300 - $2,142,400

Area R: Remaining Park Areas

The various areas of the park and infrastructural costs are aggregated into the afformentioned areas. These include costs for site mobilization, demolition, earth-work, misc. utility repairs, general irrigation elements (i.e., controller, backflow, etc.). This also includes the parking lot, curbs and PV solar panels in the parking lot area.

Existing parking lot

IMPROVEMENT	DESCRIPTION
1	Enhanced Lawn Areas & Planting
2	Enhanced Parking Lot w/ Solar PV Shade Shelters
3	Removed Perimeter Fencing (on 4th Street)

Total Cost of Area R: $521,400 - $608,300

Grant Rea Park Overall Design Narrative

The improvements at Grant Rea Park seek to revitalize the park and create additional active and passive spaces for the community. Overall, the design intent is to provide various community wide facilities to help further the level of service of the park and mitigate the community and Citywide amenity gaps found during the park master plan needs assessment. Throughout the park crime prevention through environmental design (CPTED) principles will be implemented and site lighting standards, furnishings, and equipment will be updated and enhanced. All existing trees will be inventoried, and an arborist report shall be completed prior to further design efforts to assess tree health and determine where heritage or significant trees shall be protected. The site features proposed will be in conformance with the existing site use and should allow for a mitigated negative declaration (MND) or negative declaration (ND) CEQA determination; however, further CEQA determination should be made following additional schematic design efforts. The design represents a 10% schematic level of design effort for planning purposes. Further design and engineering studies shall be done to further understand site constraints, the feasibility of proposed design features, and to better understand costs.

Grant Rea Park

To help organize the improvements, the site has been subdivided by major recreation features. This includes the following areas:

IMPROVEMENT	DESCRIPTION	COST ESTIMATE
A	Multi-use Synthetic Sports Field	$5,470,600 - $6,382,300
B	Basketball and Tennis Courts	$404,400 - $471,800
C	Inclusive Playgrounds & Splash Pad	$958,200 - $1,117,900
D	Dog Park	$137,200 - $160,100
E	Community Center	$1,632,600 - $1,904,700
F	Central Promenade, Playground, and Trails	$348,000 - $487,200

IMPROVEMENT	DESCRIPTION	COST ESTIMATE
G	Baseball/Softball Field	$150,000 - $175,000
H	Youth Softball Field and Retention Basin	$124,400 - $145,200
I	Batting Cages and Community Garden	$148,300 - $173,000
J	Existing Petting Zoo	$36,000 - $42,000
P	Parking Lot Areas	$111,600 - $125,000
R	Remaining Park Areas and Infrastructure	$164,400 - $191,800

Below are descriptions of the park per the above park areas:

Total Project Cost: $10,441,300 - $12,214,600

Area A: Multi-use Synthetic Sports Field

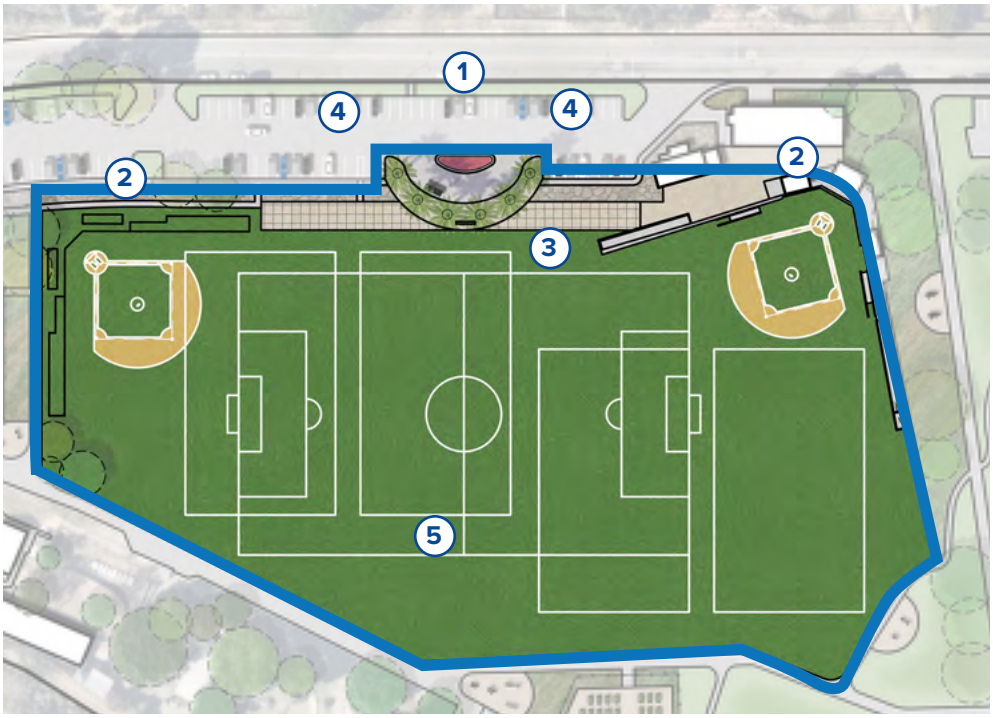
The multi-use synthetic sports field is an area that provides ample playable area for rectangular sports and baseball/softball. At the entrance of the area there will be a main drop off loop which includes enhanced paving and park signage, art, and informational signage. The median in the parking lot is intended to have a rolled curb to allow fire truck and emergency access. The area is wide enough to allow for cars to wait while other can pass by them.

The area will include synthetic turf for year-round playability. The area will feature one large U14 soccer field which may be used for football as well. Four separate U12 fields may be striped with the ability of running multiple U8 fields perpendicular to them. The existing softball field infrastructure for both fields will remain but the backstops, dugouts, spectator seating, and other features will be enhanced. The outfield will be shared with the multi-use synthetic field but during time of in-season play, a temporary fence may be erected to allow for a flexible homerun fence. A detention basin of crushed aggregate and perforated piping will occur underneath the field, allowing for treatment of stormwater for the fields and surrounding hardscape. Equipment storage will be provided within the park to allow for storage of baseball equipment including the temporary fence and a raised mound which may be rolled out for baseball play. The area will receive upgraded field lighting and controls.

The irrigation system will feature Big Gun rotors or other for field rinse down. The area will also include perimeter decorative fencing at 4' height. Spectator seating and passive seating areas may be included within or at the perimeter of the field area.

Multi-use sport field

LEGEND	DESCRIPTION
#	New Facility
#	Existing Facility
#	Enhanced Facility



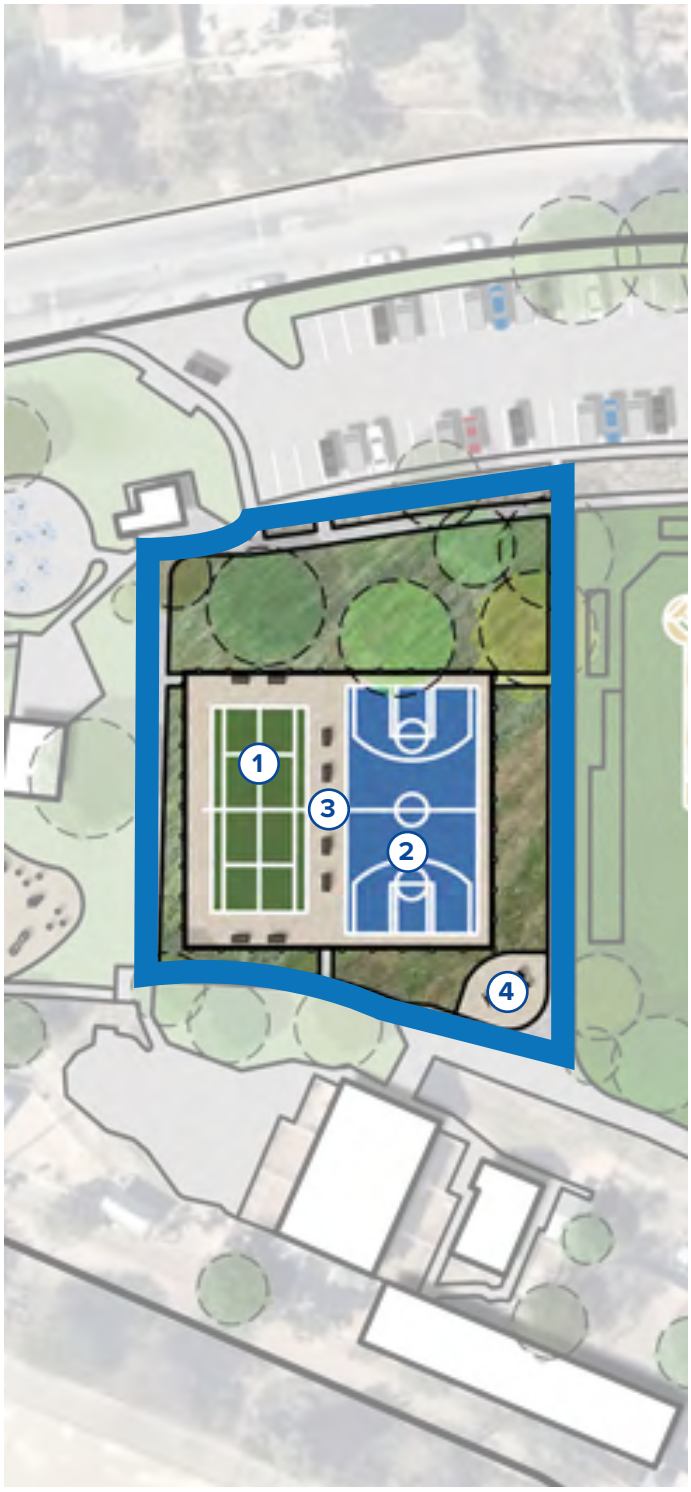
IMPROVEMENT	DESCRIPTION
1	Entry Plaza
2	Softball / Baseball Field, Backstops, Dugouts, & Spectator Seating
3	Synthetic Turf Field with U14 Field Striping & 4 U8 Fields
4	Promenade and Spectator Seating Area
5	Perimeter Fencing

Total Cost of Area A: $5,470,600 - $6,382,300

Area B: Basketball and Tennis Courts

The basketball and tennis court area will include one dedicated basketball court and a tennis/pickleball facility for use year-round. The basketball facility will include regulation basketball courts with a regulation sized court. The tennis and pickleball facility will include a 10' perimeter fence for ball control. Both areas will include lighting and enhanced court play surfacing, cushioned surfacing at the tennis court and integral colored concrete at the basketball court. A central seating area pavilion will be placed between the facilities for spectator viewing and/or waiting. This area will also include a small fitness pad to be used in the overall park trail system.

Tennis court



IMPROVEMENT	DESCRIPTION
1	Tennis & Pickleball Court
2	Basketball Court
3	Spectator and Waiting Area
4	Fitness Node

Total Cost of Area B: $404,400 - $471,800

Area C: Inclusive Playgrounds & Splash Pad

The inclusive playgrounds and splash pad area is intended to include a community and regional class inclusive playground area. The intent of the playgrounds is to provide ample imaginative play area with inclusive features for the community. The playgrounds will include at a minimum one 2–5-year-old play structure and one 5–12-year-old play structure. The theming and design of the playground may be further refined during a community process but may include agrarian play elements that allude to the rich agricultural history of the City and area while also tying into the adjacent petting zoo. The splash pad will remain but may be updated with new equipment, play features, seating, and surfacing. The splash pad is intended to blend seamlessly into the playground and allow for use while the water is turned off. Furthermore, the area will be part of the overall thematic design of the playground area and serve as a primary entry to the playground area.

Inclusive playgrounds

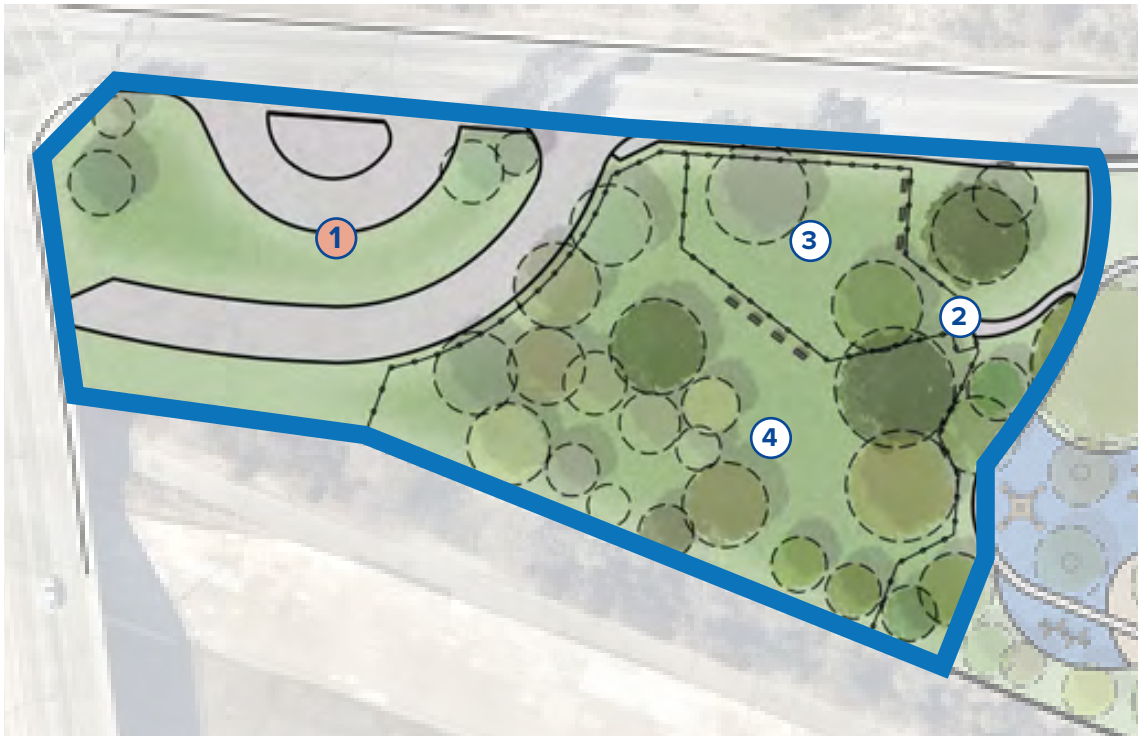
IMPROVEMENT	DESCRIPTION
1	Existing Restroom
2	Enhanced Splashpad
3	Enhanced Seating/Picnic Areas
4	Inclusive Swing
5	2-5-Year-Old & 5-2-Year-Old Play Structure/s
6	Climbing Structure
7	Agrarian Themed & Inclusive Play Area (Rockers, Climbers, Balance Beams, Etc.)

Total Cost of Area C: $958,200 - $1,117,900

Area D: Dog Park

The dog park area is located on the south end of the park making use of an underutilized corner of the site. The park will include an off-leash area for small dogs and large dogs. The area will include a separated entry area to allow for access control and a waiting area to get the dog off leash. The area will include various seating benches, dog waste stations, and dog play furnishings such as large fire hydrants, jumping hoops, and other fun play equipment.

Dog park



IMPROVEMENT	DESCRIPTION
1	Existing Maintenance Road & Bus Stop
2	Dog Park Entrance / Vestibule
3	Small Dog Off-Leash Park Area
4	Large Dog Off-Leash Park Area

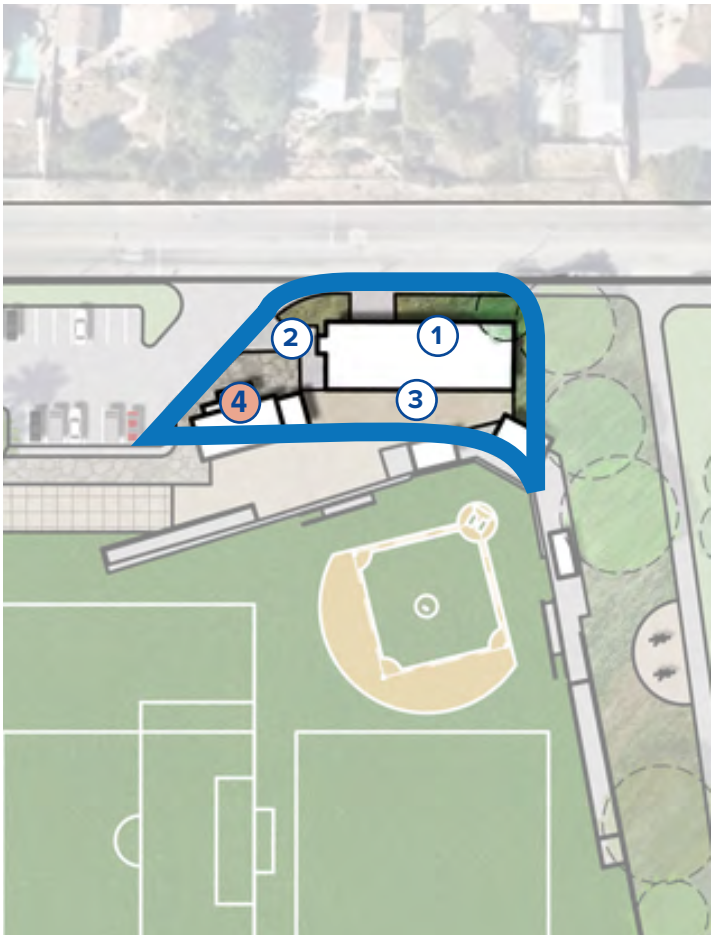
Total Cost of Area D: $137,200 - $160,100

Area E: Community Center

The new community center will feature a gathering space and main entry building that allows central activities to occur at the park. The building may include an open floorplan to allow for flexible use. The façade of the building that's facing Rea Drive will have ample glazing and architectural character that's fitting within the community and expressive of the community's desired look. The building may include a staff office along with a concession stand. The area will include new planting, ADA improvements, and an open patio for indoor/outdoor event space.

New community center

IMPROVEMENT	DESCRIPTION
1	New Community Building
2	Building Entrance & Drop-off Area
3	Indoor/Outdoor Plaza Area
4	Existing Utility Building

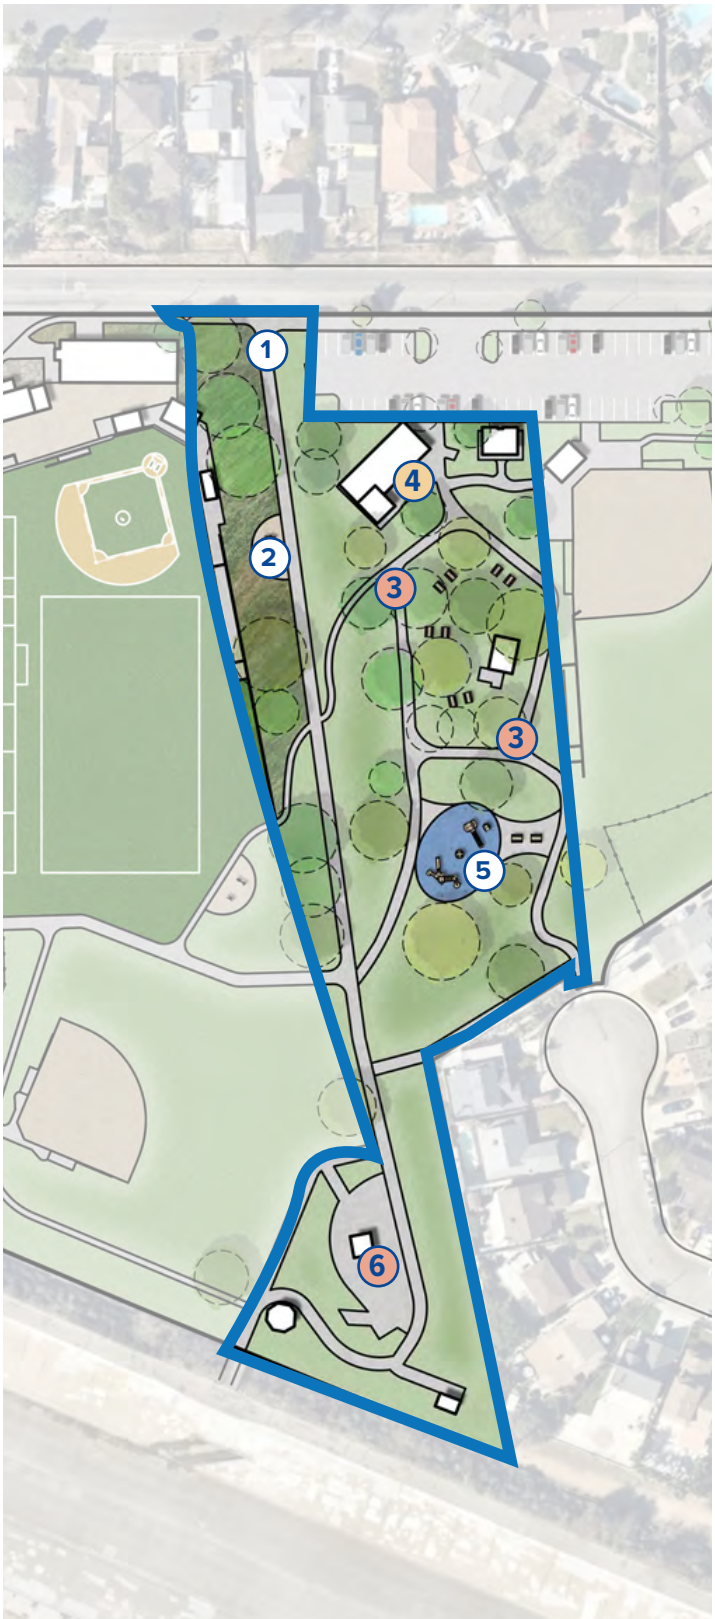


Total Cost of Area E: $1,632,600 - $1,904,700

Area F: Central Promenade, Playground, and Trails

The central promenade area is the main spine of the park connecting the main entrance between the multi-use synthetic field (Area A) and the baseball/softball field (Area B) to the Rio Hondo River trail head. This area is intended to receive new paving treatments and upgrades to bring it to the latest ADA standards. This are will also receive new planting and irrigation enhancements. The surface paving treatment will include enhanced paving and art elements casted into the concrete. To provide play space on the northern portion of the park and the community that is adjacent to the park to the northeast, a new playground will be placed in an open area within the shaded trees and trails. The playground will include a 2–5-year-old play structure and a 5–12-year-old play structure. The trails will include site furnishings such as benches, trash receptacles, and drinking fountains located in an orderly fashion. The existing restroom facility at the entry of the park will receive various upgrades to bring it up to standards.

Entry plaza example



IMPROVEMENT	DESCRIPTION
1	Promenade Main Entrance
2	Fitness Node
3	Existing Trails
4	Enhanced Restroom Area
5	New 2-5-Year-Old & 5-12-Year-Old Play Structures
6	Existing Trail Head Area with Minor Enhancements

Total Cost of Area F: $348,000 - $487,200

Area G: Baseball/Softball Field

The baseball / softball field on the northern portion of the site will remain; however, improvements to the existing infill, dugouts, backstop, and field turf shall be made. Further improvements may include features to allow the field to be used for baseball use.

Turf baseball field

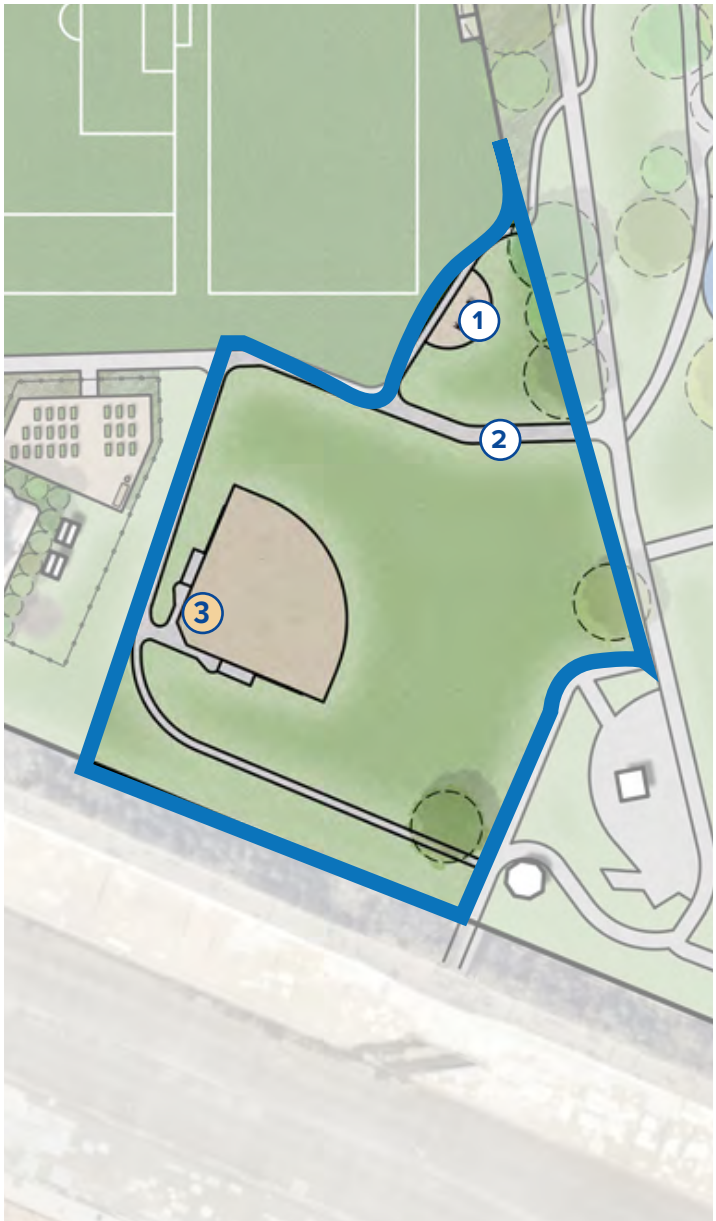
IMPROVEMENT	DESCRIPTION
1	Enhanced Ball Field
2	Enhanced Bullpin Area
3	Potential Material Storage Area
4	Enhanced Planting Area

Total Cost of Area G: $150,000 - $175,000

Area H: Youth Softball Field and Retention Basin

The youth softball field on the eastern edge of the park shall remain in place but general improvements to the infill, dugouts, backstop, and field turf shall be made.

Fitness node



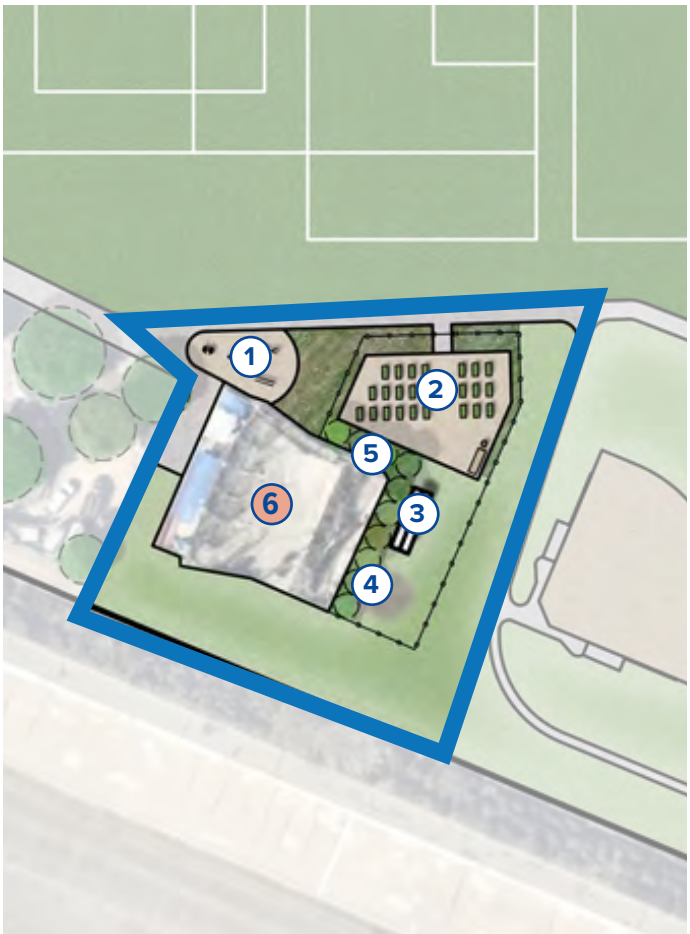
IMPROVEMENT	DESCRIPTION
1	Fitness Node
2	12’ Wide Pathway
3	Enhanced Ballfield

Total Cost of Area H: $124,400 - $145,200

Area I: Batting Cages and Community Garden

The existing batting cage area shall accommodate the current lease agreement for the batting cages; however, further community assessment and amenity deficits indicate that a community garden may be desired to help provide educational elements to the community and provide an area for agricultural heritage to be celebrated and knowledge to be passed on. As such, a community garden including various raised garden beds is proposed. The area may include a perimeter fence made of hog wire with decorative wood framing and posts. The area also includes two storage buildings along with a material storage area.

Community garden



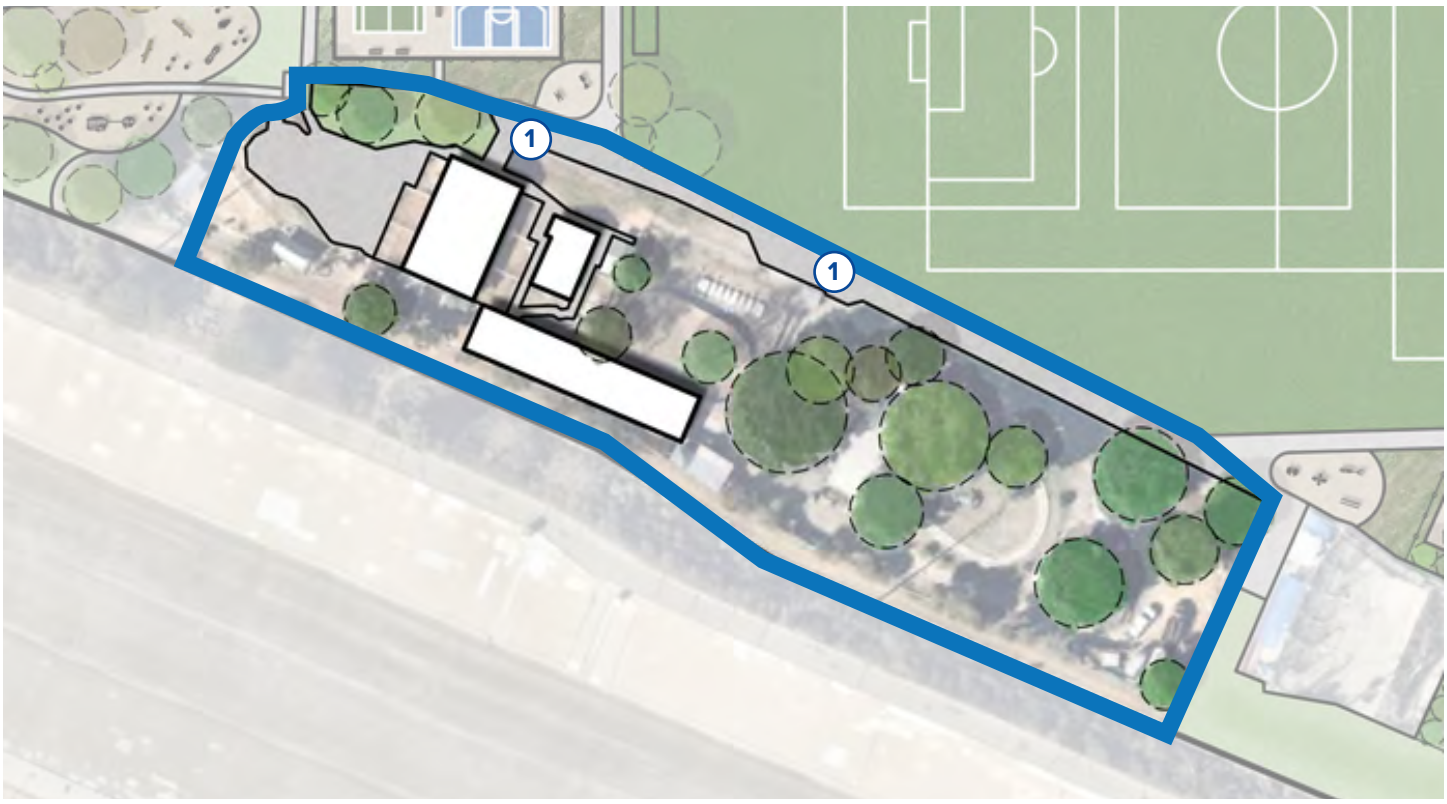
IMPROVEMENT	DESCRIPTION
1	Fitness Node
2	Community Garden
3	Tool / Material Storage Shelters
4	Soil Material Storage Area
5	Buffer Planting
6	Existing Batting Cages

Total Cost of Area I: $148,300 - $173,000

Area J: Existing Petting Zoo

The existing petting zoo is planned to remain in place but general improvements to the entrance and art elements may be added to enhance the general appearance at the entrance and celebrate the unique site feature.

Existing petting zoo



IMPROVEMENT	DESCRIPTION
1	Enhanced Paving, Art, & Signage

Total Cost of Area J: $36,000 - $42,000

Area P: Parking Lot Areas

The parking lot areas shall include resurfacing and re-striping. The tree standards shall be accessed and supplemented with additional trees where gaps in tree coverage may occur to allow for sustainable site shading over the asphalt material. If feasible, a solar PV system may be included to provide additional power. EV, ADA, and bike storage/parking shall be included to meet the latest code requirements.

PV parking

IMPROVEMENT	DESCRIPTION
1	New Slury Seal and Striping in Parking Lot
2	Bioswale Area

Total Cost of Area P: $111,600 - $125,000

Area R: Remaining Park Areas and Infrastructure

The remaining park areas shall receive general improvements to planting, lawn, irrigation, furnishings, and lighting. Site infrastructure shall be accessed for life cycle replacement needs. If deemed necessary, water, sewer, and electrical infrastructure shall be upgraded while site construction occurs. A weather based irrigation system will be included per the latest State requirements.

Total Cost of Area R: $164,400 - $191,800

March, 2021

Montebello City Park Overall Design Narrative

The improvements at Montebello City Park (City Park) are focused on the southern end of the park where there are various aged facilities that have been scattered onto the site, resulting in a lack of harmony and overall design and placement. The design intent is to relieve this area of the various fenced features while making way for a multi-use field to help increase the level of service of the park and to add a rectangular field for the community which were found to be critically needed from the park master plan needs assessment. Throughout the park, crime prevention through environmental design (CPTED) principles will be implemented and site lighting standards, furnishings, and equipment will be updated and enhanced. All existing trees will be inventoried, and an arborist report shall be completed prior to further design efforts to assess tree health and determine where heritage or significant trees shall be protected. The site features proposed will be in conformance with the existing site use and should allow for a mitigated negative declaration (MND) or negative declaration (ND) CEQA determination; however, further CEQA determination should be made following additional schematic design efforts. The design represents a 10% schematic level of design effort for planning purposes. Further design and engineering studies shall be done to further understand site constraints, the feasibility of proposed design features, and to better understand costs.

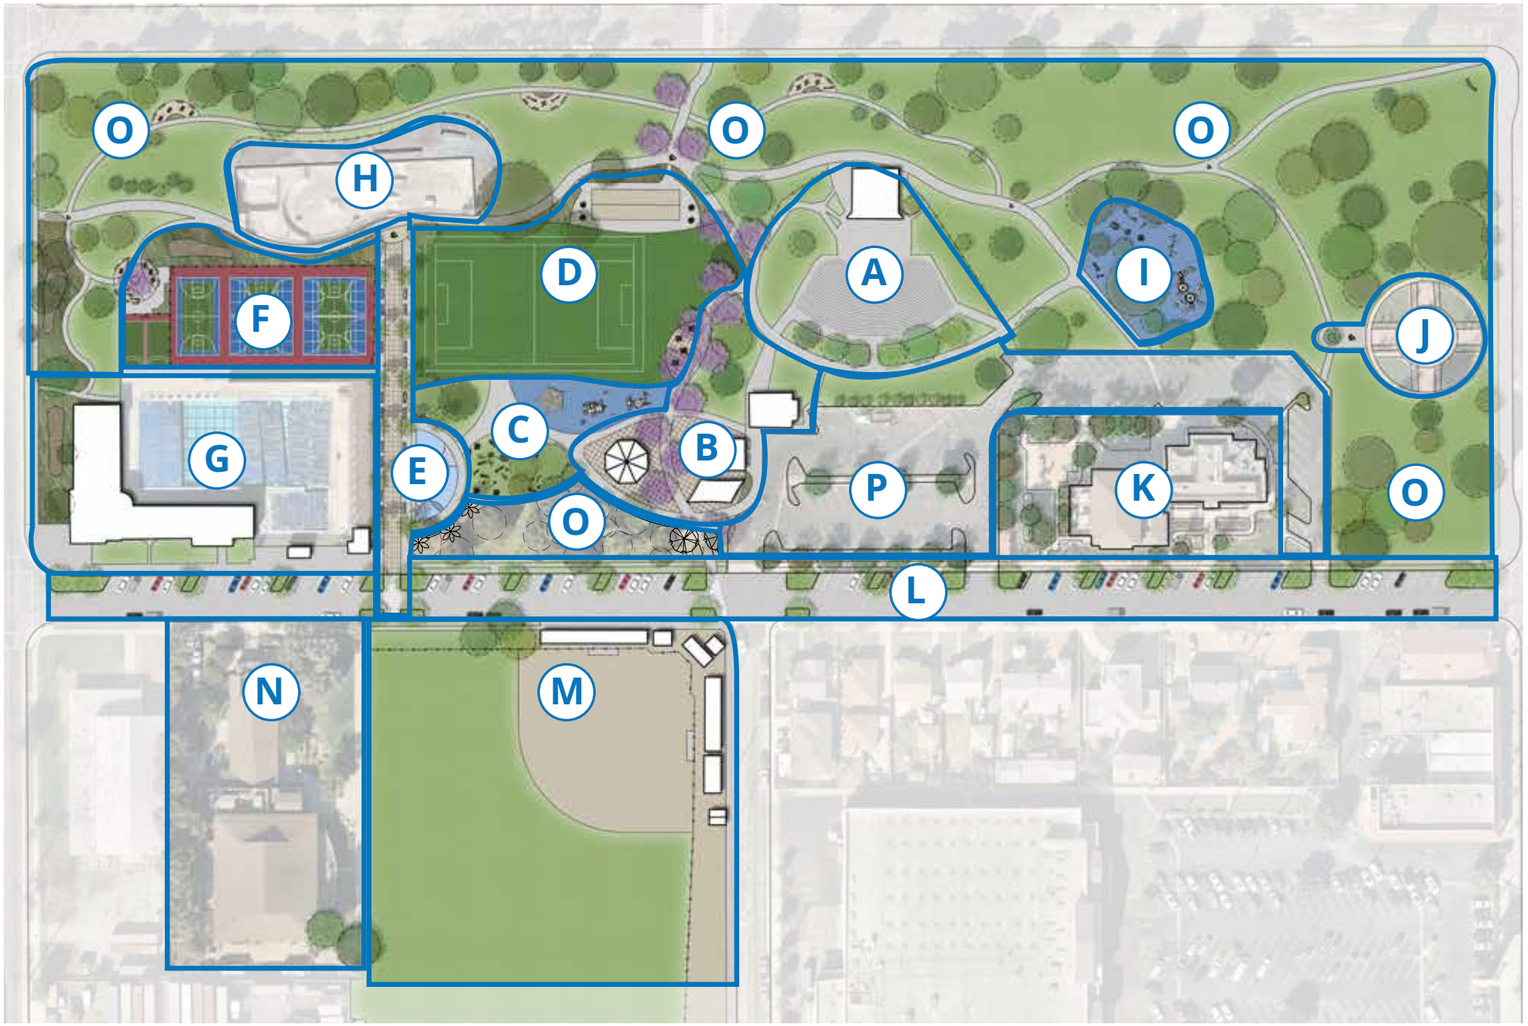
Below are descriptions of the park per the above park areas:



To help organize the improvements, the site has been subdivided by major recreation features. This includes the following areas:

IMPROVEMENT	DESCRIPTION	COST ESTIMATE
A	Amphitheater	$186,800 - $217,900
B	Family Event Area, Restroom & Scout Building	$787,900 - $919,200
C	Adventure Playgrounds	$632,600 - $738,000
D	Rectangular Multi-use Field and Bocce Ball Courts	$567,200 - $661,800
E	Central Promenade and Splash Pad	$470,100 - $548,500
F	Fitness Pad & Sports Courts	$175,800 - $205,100
G	George Hensel Aquatic Center	$41,000 - $47,800
H	Skatepark	$811,200 - $946,400
I	Passive Playgrounds	$69,600 - $81,200
J	Veterans Memorial	$24,900 - $29,100
K	Alex E Esquivel Complex & Senior Center	$193,200 - $225,300
L	Taylor Street	$221,500 - $258,400
M	Baseball Field	$95,200 - $111,000
N	Catherine Hensel Youth Center	$120,000 - $140,000
O	Open Lawn, Walking Trails, and Passive Areas	$1,743,500 - $2,034,100
P	Parking Lots	$64,700 - $75,500
R	Remaining Park Areas and Infrastructure	$164,400 - $191,800

Montebello City Park

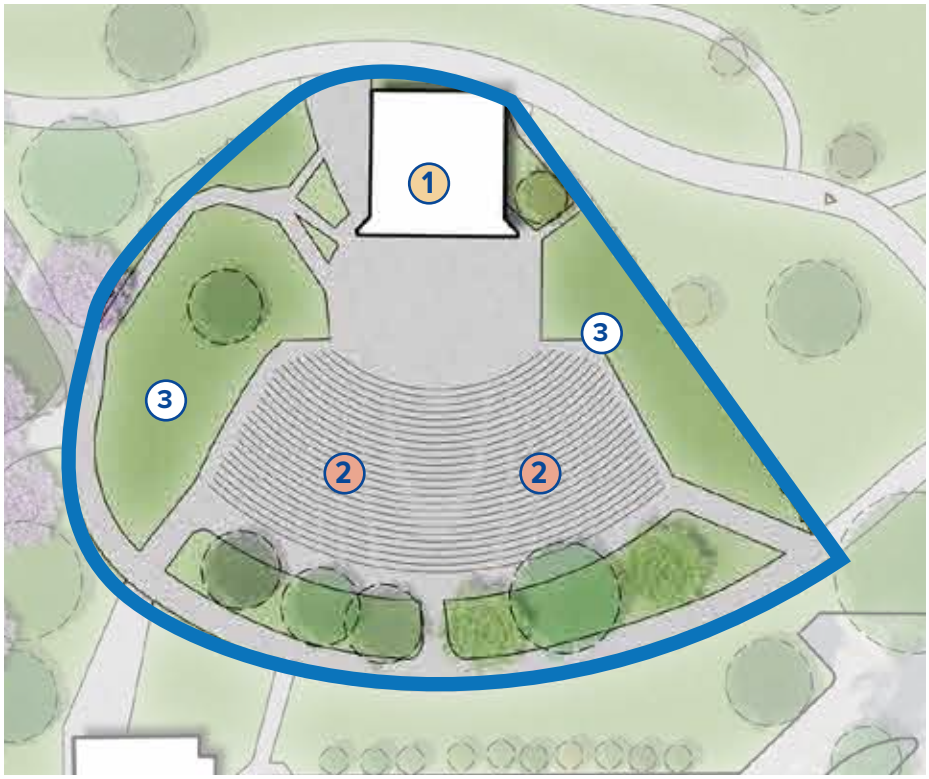
Total Project Cost: $6,943,300 - $8,066,000

Area A: Amphitheater

The park amphitheater is located at the center of the park and is an active element that promotes community socialization by providing an area for live performances, concerts, and other events. The improvements that are suggested in this area are removal and replacement of the existing flatwork in this area to bring it to current ADA standards along with improvements at the stage and other general maintenance upgrades per the BV reports. Additional site furnishing may include new event lighting, additional benches, trash receptacles, and security/CPTED elements.

LEGEND	DESCRIPTION
#	New Facility
#	Existing Facility
#	Enhanced Facility

Montebello amphitheater



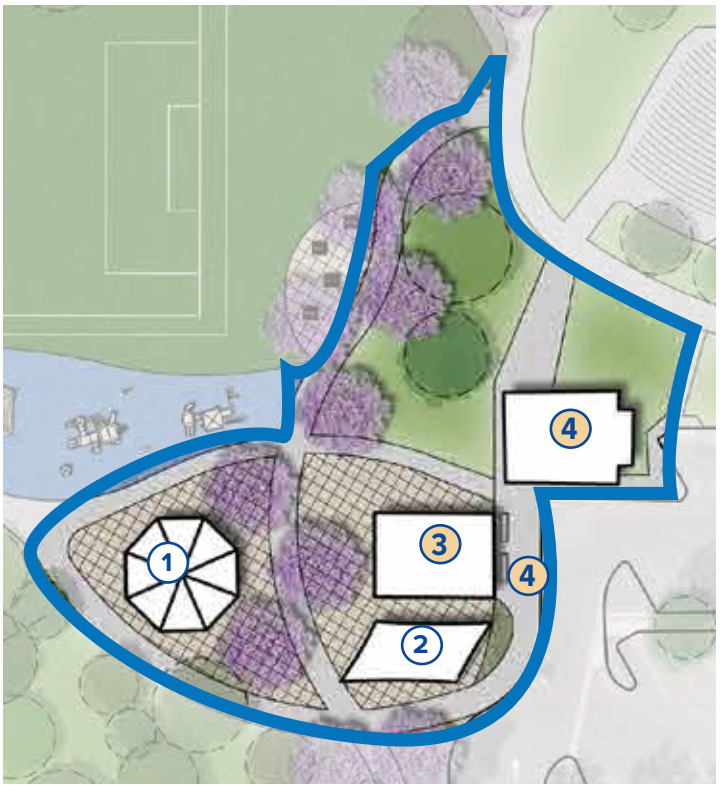
IMPROVEMENT	DESCRIPTION
1	Enhanced Stage
2	Seating Area
3	Planting Areas with Cultural Art

Total Cost of Area A: $186,800 - $217,900

Area B: Family Event Area, Restroom & Scout Building

The family event area is located near the central axis of the park and it is adjacent to the new adventure playground area and multi-purpose lawn. The area is central to the park and serves as the main gathering area, allowing for large events to occur but also for the space to be utilized in a series of smaller gatherings. The area includes one large gathering area (located on the south end of the space), one medium sized area (located just east of the scout building), and one medium/small area (located north of the multi-use field). The large gathering area will include a large structural shade pavilion. The shade pavilion may include enhanced pilasters and treatments. The medium sized area that is located nearest to the scout building will include tensile shade over the area. This will help shade the area but also will serve as a sculptural entry element as you enter the main parking lot. Each area will include picnic tables and trash receptacles. The paving will be enhanced with integral color, finishes, and paving patterns.

The existing restrooms shall be enhanced to include new fixtures and treatments throughout. The existing scout building shall be enhanced and various repairs to the structure, flooring and roofing systems and other major repairs shall be done. The building shall include historic signage and elements to celebrate the unique structure and history.



Group picnic area

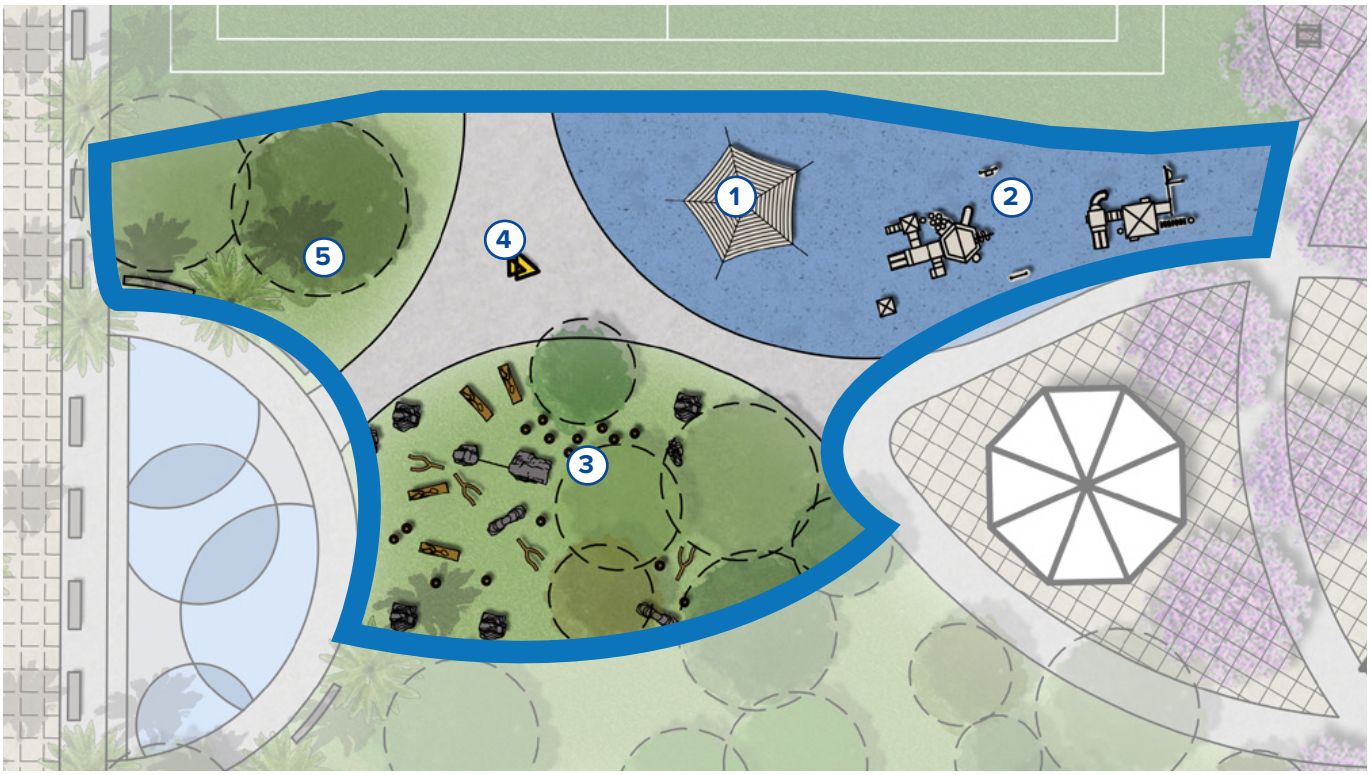
IMPROVEMENT	DESCRIPTION
1	Large Seating Pavilion
2	Tensile Shade Shelter
3	Enhanced Scout Building
4	Enhanced Restroom Building

Total Cost of Area B: $787,900 - $919,200

Area C: Adventure Playgrounds

The adventure playground area is a themed playground that includes various adventure play elements including a large spiracle rope climbing feature. The adventure playgrounds will include a 2–5-year-old play structure and a 5–12-year-old play structure that also have various themed playing features. This area will allow kids to play while being supervised by family members or mentors who may be participating in an event at the seating areas or the rectangular multi-use field area. The adventure playground also features a large adventure obstacle course with various themed climbers, balance bars, and inclusive play swings and other features. The area will have the required resilient surfacing and will include various sit benches and furnishings.

Adventure playground area



IMPROVEMENT	DESCRIPTION
1	Climbing Structure
2	2-5-Year-Old & 5-12-Year-Old Playground Structures
3	Adventure Play Area

IMPROVEMENT	DESCRIPTION
4	Art Area
5	Open Lawn Area

Total Cost of Area C: $632,600 - $738,000

Area D: Rectangular Multi-Use Field and Bocce Ball Courts

The rectangular multi-use field and bocce ball court area will include a medium sized field (130' x 250') that can accommodate a U14 sized soccer field or multiple U8 or U10 fields. The field shall be natural turf and will include various small open lawn areas which may be used for passive recreation (i.e., picnicking, reading a book, etc.). The open lawn also provides a large informal active recreational area for the community which may be used for informal activities such as throwing a frisbee, a football, or simply a small pickup soccer game. The bocce ball courts will be enhanced, and the area will be revitalized to allow for use of the courts. The area will include a small paved or DG area that surrounds the courts for spectator viewing or seating. Further community vetting shall determine the desire of the bocce ball courts. If the community decides this facility is not desired, then the open lawn area may expand into this area or another amenity may be placed the instead.

Multi-use field

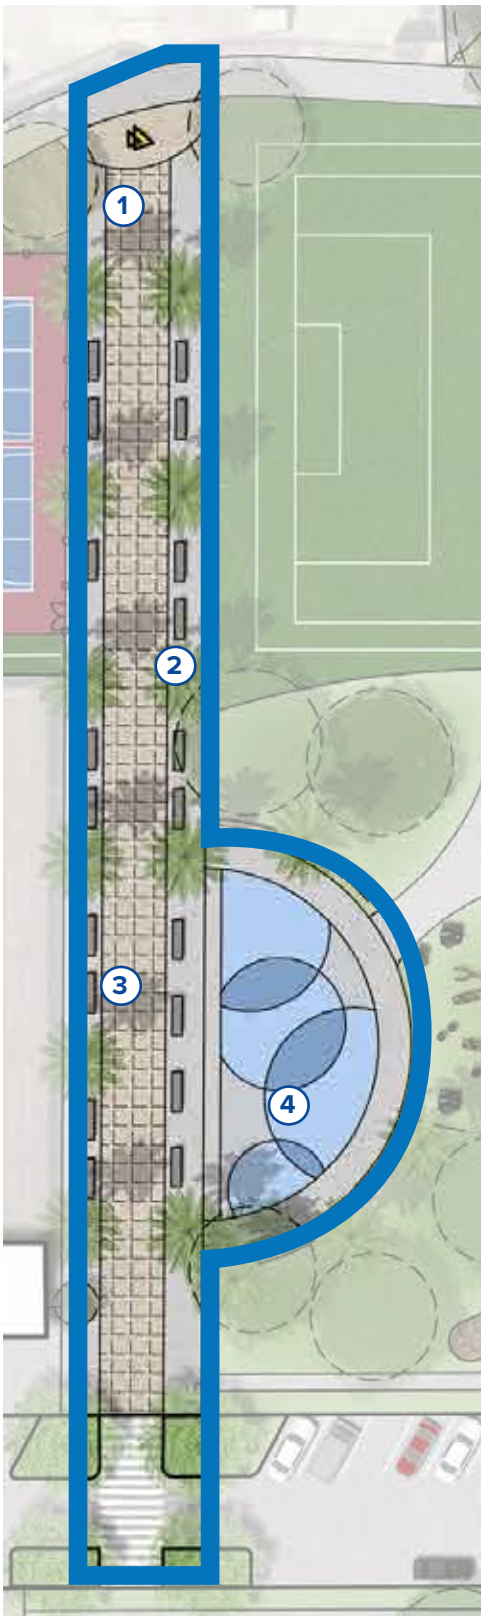
IMPROVEMENT	DESCRIPTION
1	Multi-Use Open Lawn
2	Seating / Picnic Area
3	Enhanced Bocceball Court
4	Chess / Checkers Game Tables

Total Cost of Area D: $567,200 - $661,800

Area E: Central Promenade and Splash Pad

The central promenade and splash pad make use of the central paved area that is currently partially running through this area. As this is anchored by various facilities including the George Hensel Aquatic Center, the linear geometry that is in place may be further celebrated by a series of palm or shade trees. The area will include benches that are placed on either side of the path allowing for leisure sitting and passive use. The paving may include thematic art or symbology that is unique for this promenade. At the terminus of the promenade (near the existing skatepark) an art feature may be placed to further punctuate the walkway and provide a visual feature. On the other end of the promenade (eastern side) the promenade shall cross Taylor Street and include a pedestrian actuated crossing feature such as a RRFB sign for safe pedestrian crossing. The area also includes a splash plaza which may have spray jets that are turned on seasonally for use by the community. The splash plaza may be able to make use of the pool infrastructure while allowing for a feature that is separate to the pool and which may be utilized by children playing in the adventure playground area.

Splash pad



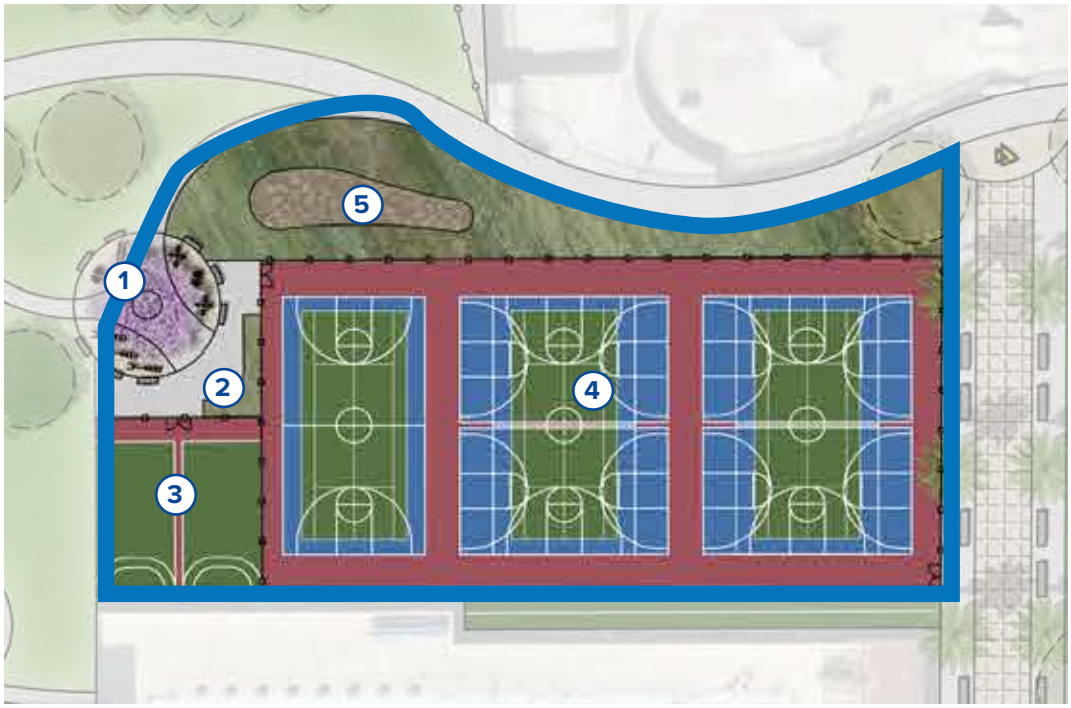
IMPROVEMENT	DESCRIPTION
1	Art Node
2	Seating Area
3	Main Promenade Walk
4	Splash Pad / Plaza

Total Cost of Area E: $470,100 - $548,500

Area F: Fitness Pad & Sports Courts

The fitness pad and sports courts area are located on the western edge of the George Hensel Aquatic Center. This area consolidates the various court uses throughout the park into one central court area. The courts will include multi-sport line striping which may include futsal, tennis, volleyball, basketball and pickleball. The area may also accommodate a sprinting track which may also be utilized for programmed fitness classes such as CrossFit or for informal workouts. The area will include two handball courts to the south of the multi-sport facility. These courts make use of the wall from the aquatic center to not prohibit views into the park. At the southwest entry to the sports courts area there is a fitness pad which may include various outdoor fitness stations. This area also allows for warm up prior to entering the sports courts. A planting area is arranged at the visual entrance of the sports courts area which may feature a donor wall for potential donor support of this facility.

Multi-court sports court



IMPROVEMENT	DESCRIPTION
1	Large Fitness Area with Workout Stations, Central Seating, and an Accent Shade Tree
2	Accent Planting Area with Donor Wall
3	Handball Courts

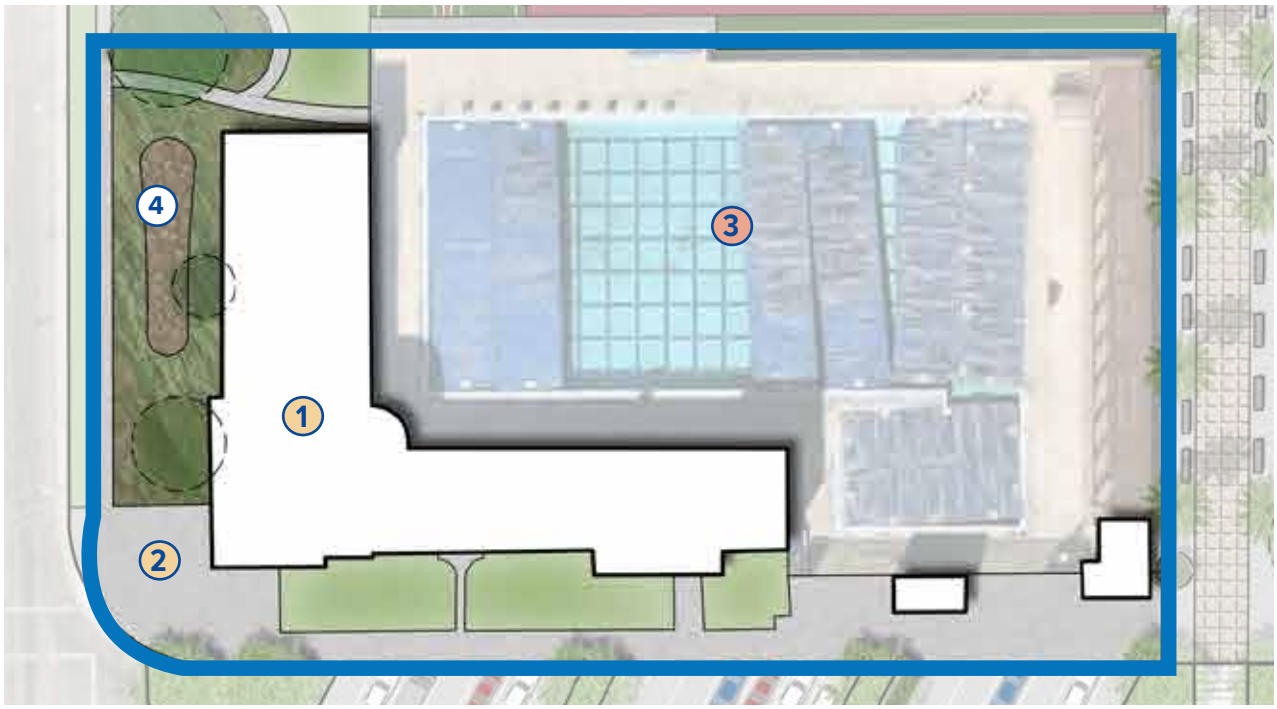
IMPROVEMENT	DESCRIPTION
4	Multi-Sport Courts (Basketball, Volleyball, Tennis, Pickleball, Futsal)
5	Bio-Retention Area

Total Cost of Area F: $175,800 - $205,100

Area G: George Hensel Aquatic Center

The George Hensel Aquatic Center will remain in it is current location however, facility upgrades and improvements will occur to bring it up to the latest ADA standards and fix any failing equipment or building elements. The surrounding landscape shall be enhanced with water-wise planting and the pool system shall be accessed to fix or upgrade any equipment as needed. Additional signage and art may be included at the building entrance to help further create a sense of place.

George Hansel Aquatic Center pool



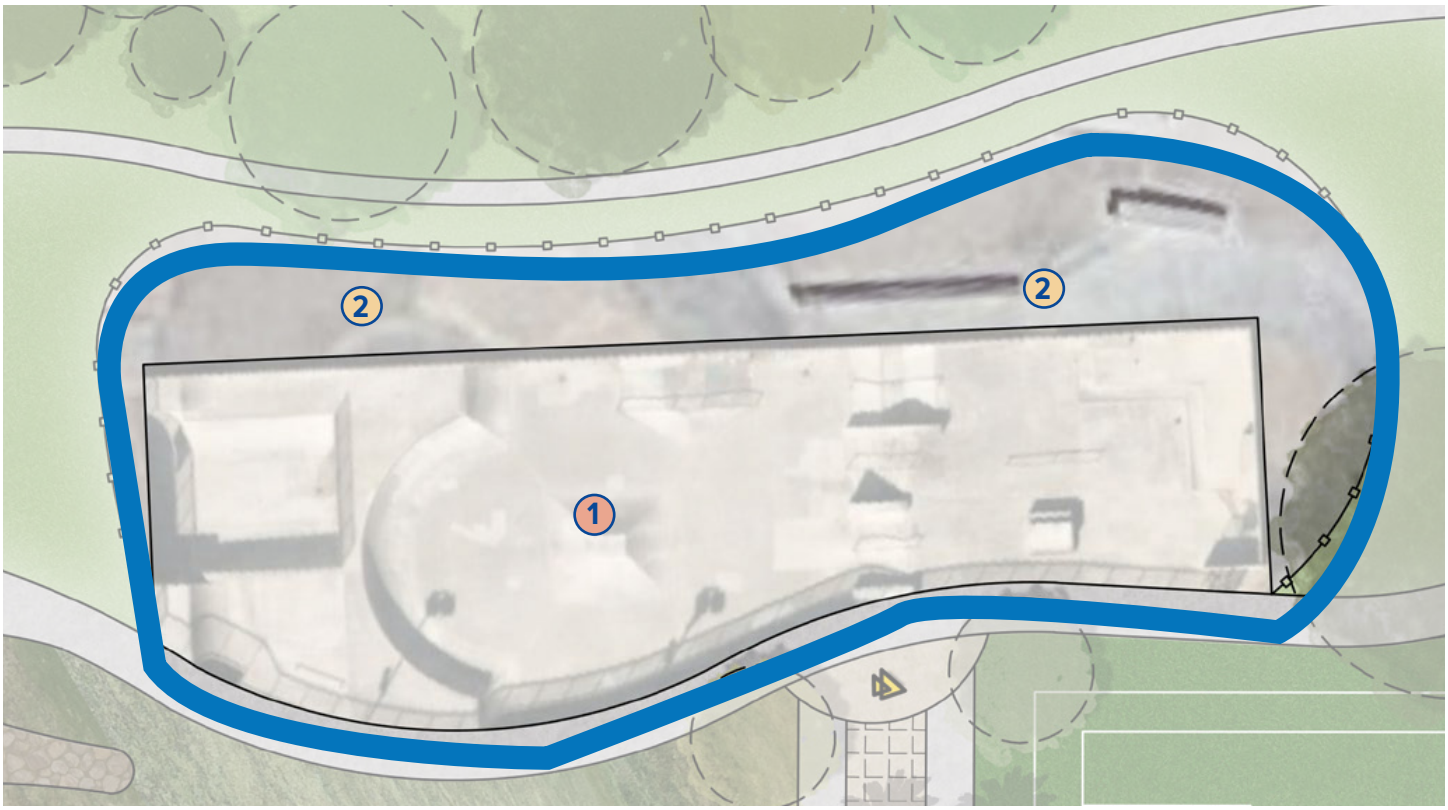
IMPROVEMENT	DESCRIPTION
1	Enhanced George Hensel Building
2	Enhanced Entry Plaza
3	Existing Swimming Pool
4	Bio-Retention Area

Total Cost of Area G: $41,000 - $47,800

Area H: Skatepark

The skatepark area will remain in its current location however, the area may expand to the west to provide additional skatepark terrain. The area should be further studied by a skatepark designer with the emphasis of integrating it into the existing facility. A beginner's skate area should be considered along with an enhanced viewing/spectator area.

Existing skatepark



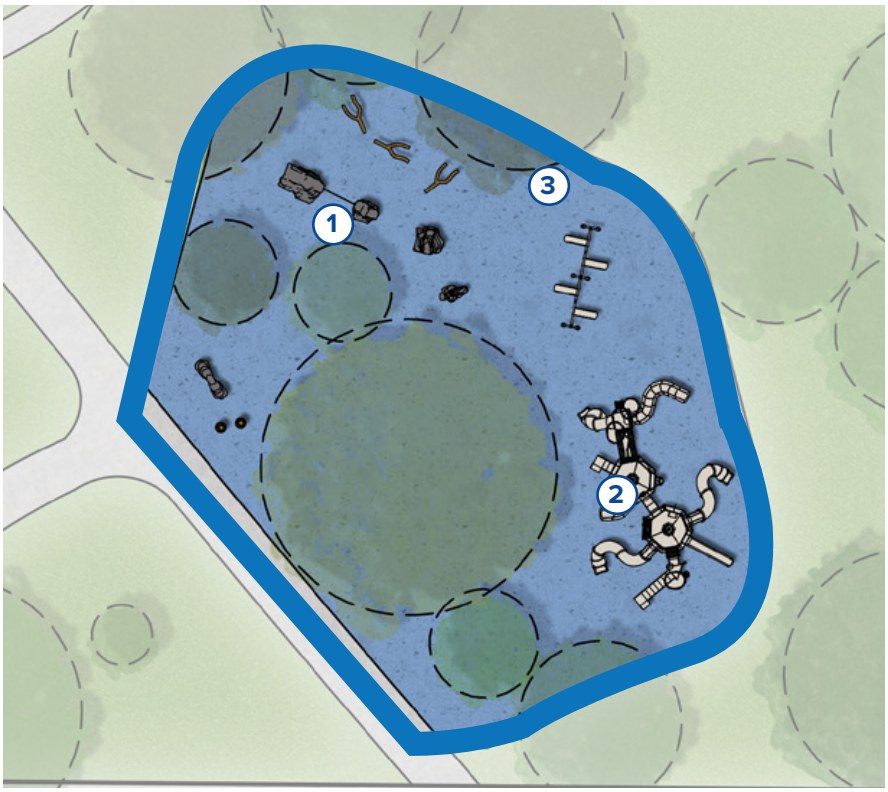
IMPROVEMENT	DESCRIPTION
1	Existing Skatepark
2	Expanded Skatepark Area

Total Cost of Area H: $811,200 - $946,400

Area I: Passive Playgrounds

The cultural heritage playgrounds shall feature thematic play equipment that pays homage to the City's history as well as the culture of Montebello. The playgrounds may include thematic elements that are included in interpretive signage but also are playfully integrated into the play features. Historic imagery shall be used along with historic elements. The playgrounds will include a 2–5-year-old play structure and a 5–12-year-old play structure. The area will have the required resilient surfacing and will include various sit benches and furnishings.

Inclusive playground example



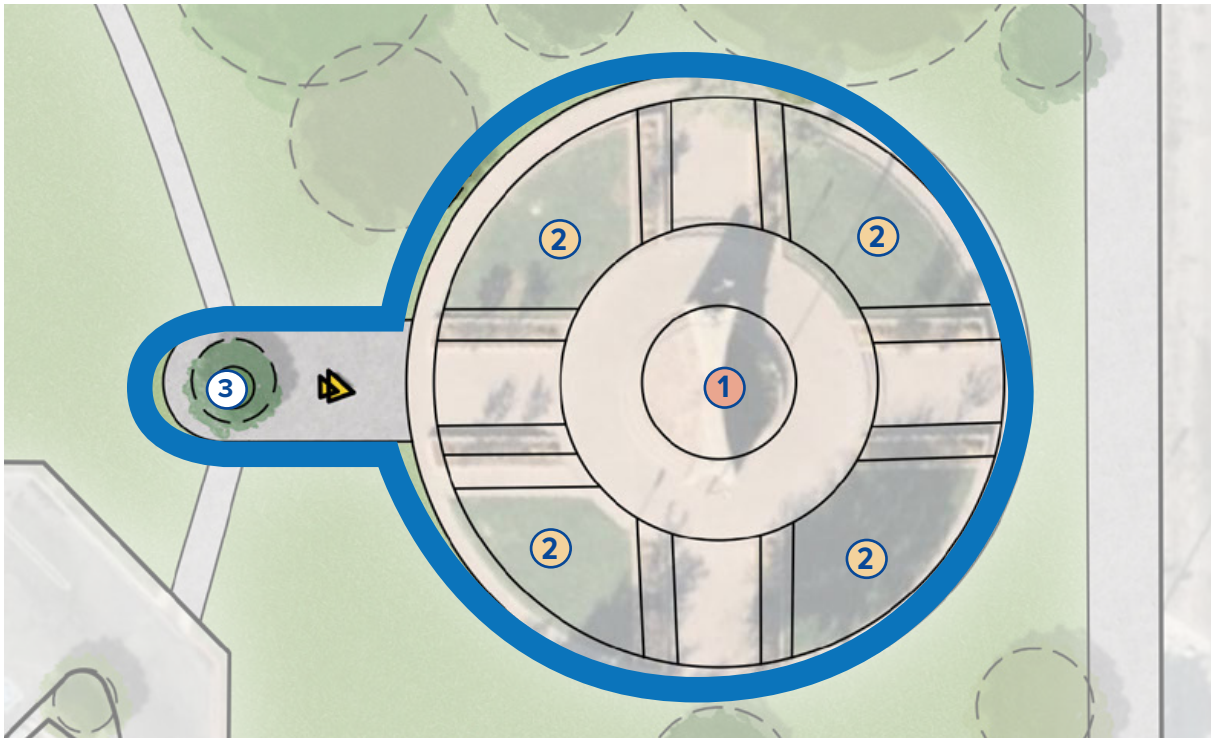
IMPROVEMENT	DESCRIPTION
1	2-5-Year-Old Playground Structure
2	5-12-Year-Old Playground Structure
3	Music Play Equipment

Total Cost of Area I: $69,600 - $81,200

Area J: Veterans Memorial

The veteran's memorial will remain in its current location. The area shall receive general upgrades to the various features and will be accessed for ADA accessibility. Planting and irrigation upgrades should be included.

Existing veterans memorial



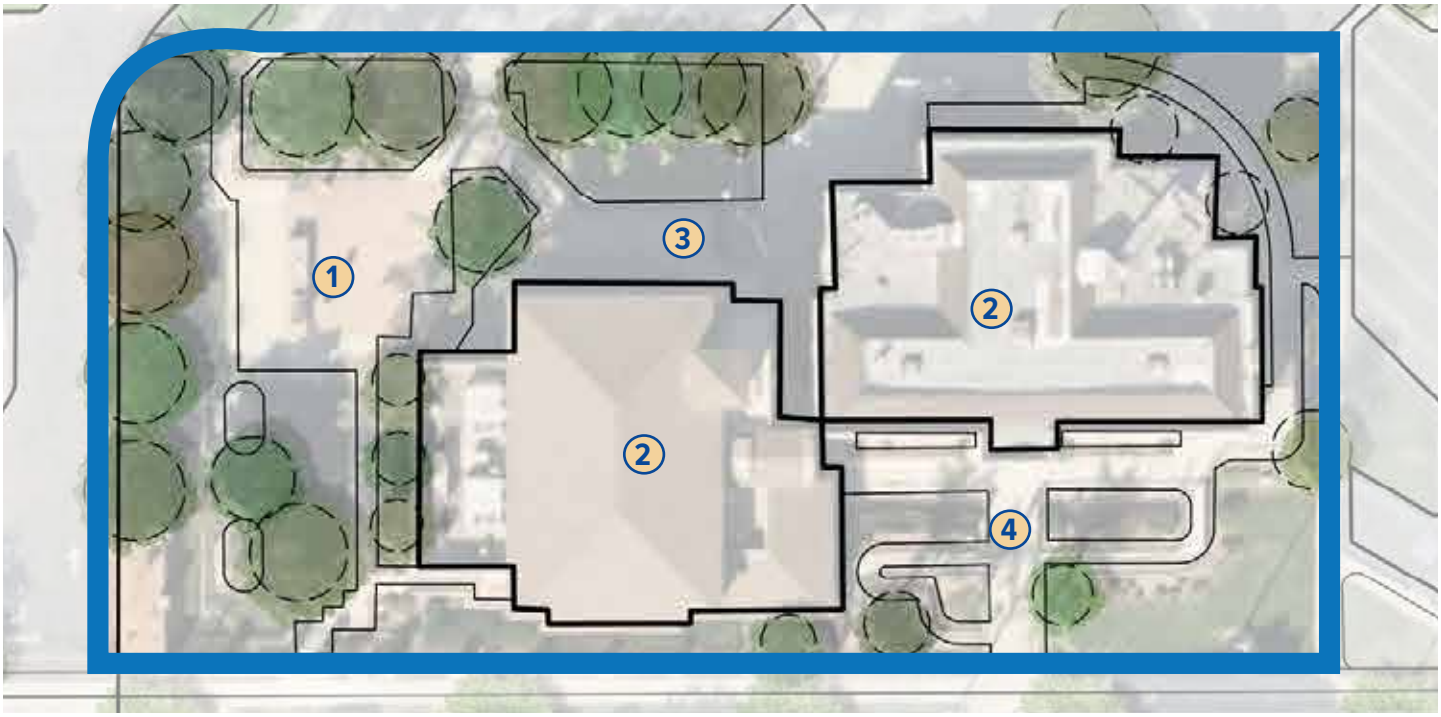
IMPROVEMENT	DESCRIPTION
1	Existing Memorial
2	Enhanced Planting Area - Flower Themed
3	Art Node

Total Cost of Area J: $24,900 - $29,100

Area K: Alex E Esquivel Complex & Senior Center

The Alex E Esquivel Complex and Senior Center will remain in its current location. The area shall receive general upgrades to the various features and will be accessed for ADA accessibility. Planting and irrigation upgrades should be included.

Event at the existing senior center



IMPROVEMENT	DESCRIPTION
1	Enhanced Courtyard
2	Enhanced Building
3	Enhanced Planting Area
4	Enhanced Entrance

Total Cost of Area K: $193,200 - $225,300

Area L: Taylor Street

Taylor Street will include rear angled parking along the western edge of the street. This will provide ample parking space while promoting a slower street travel speed. The street will be lined with trees and planting islands. There will be two crosswalks that connect the western part of the park to the ball field and Youth Center on the eastern side of Taylor Street.

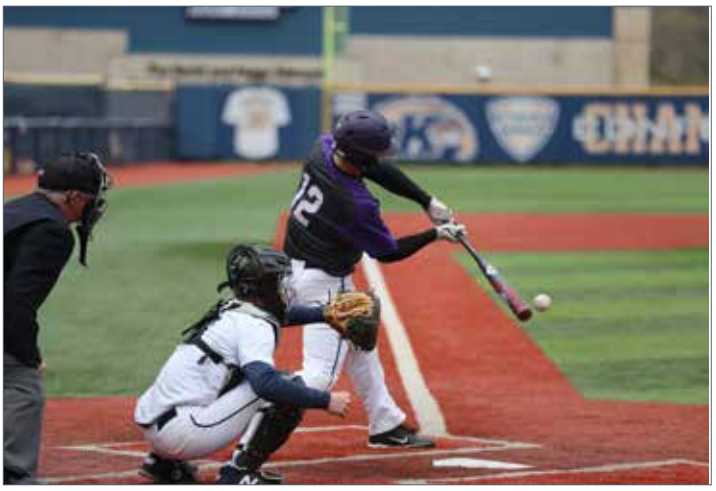
Reverse diagonal parking

IMPROVEMENT	DESCRIPTION
1	Street Crossing (Pedestrian Actuated RRFB)
2	Safe Street Crossing
3	Reverse Diagonal Parking

Total Cost of Area L: $221,500 - $258,400

Area M: Baseball Field

The baseball field on the eastern portion of the site will remain; however, improvements to the existing infill, dugouts, backstop, and field turf shall be made.



Baseball field

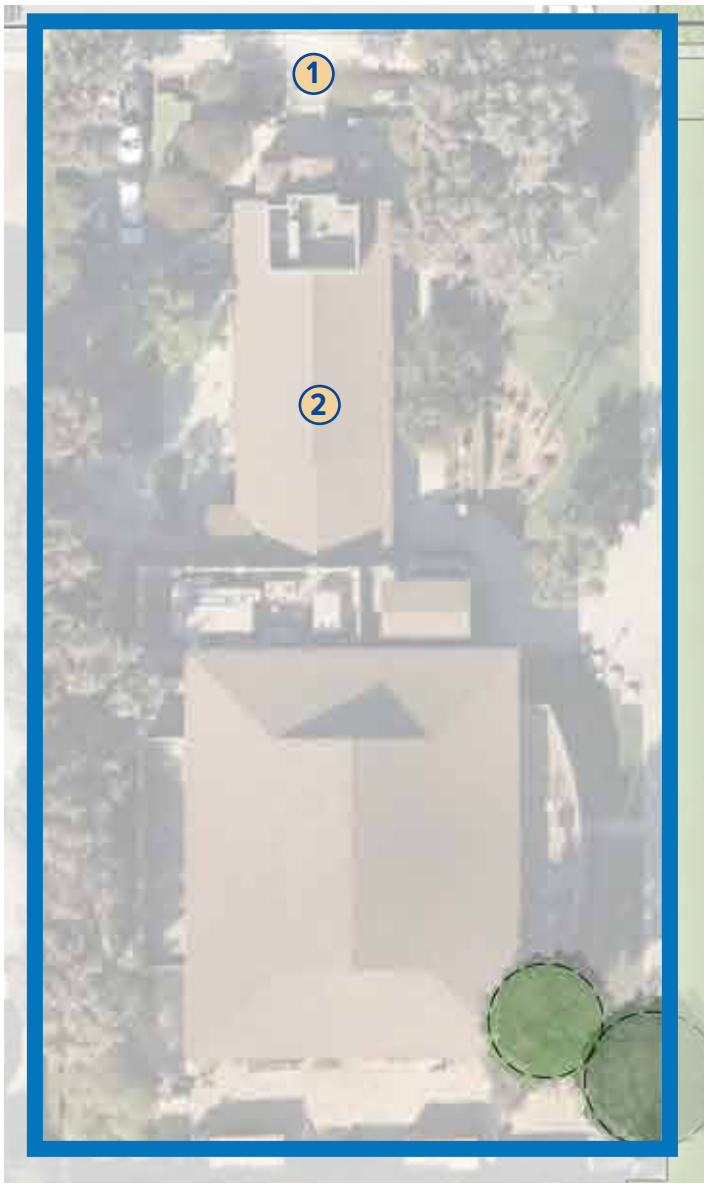
IMPROVEMENT	DESCRIPTION
1	Enhanced Infield Area
2	Enhanced Lawn Area
3	Enhanced Plaza Area

Total Cost of Area M: $95,200 - $111,000

Area N: Catherine Hensel Youth Center

The Catherine Hensel Youth Center will remain in its current location. The area shall receive general upgrades to the various features and will be accessed for ADA accessibility. Planting and irrigation upgrades should be included.

Sign in front of existing community center



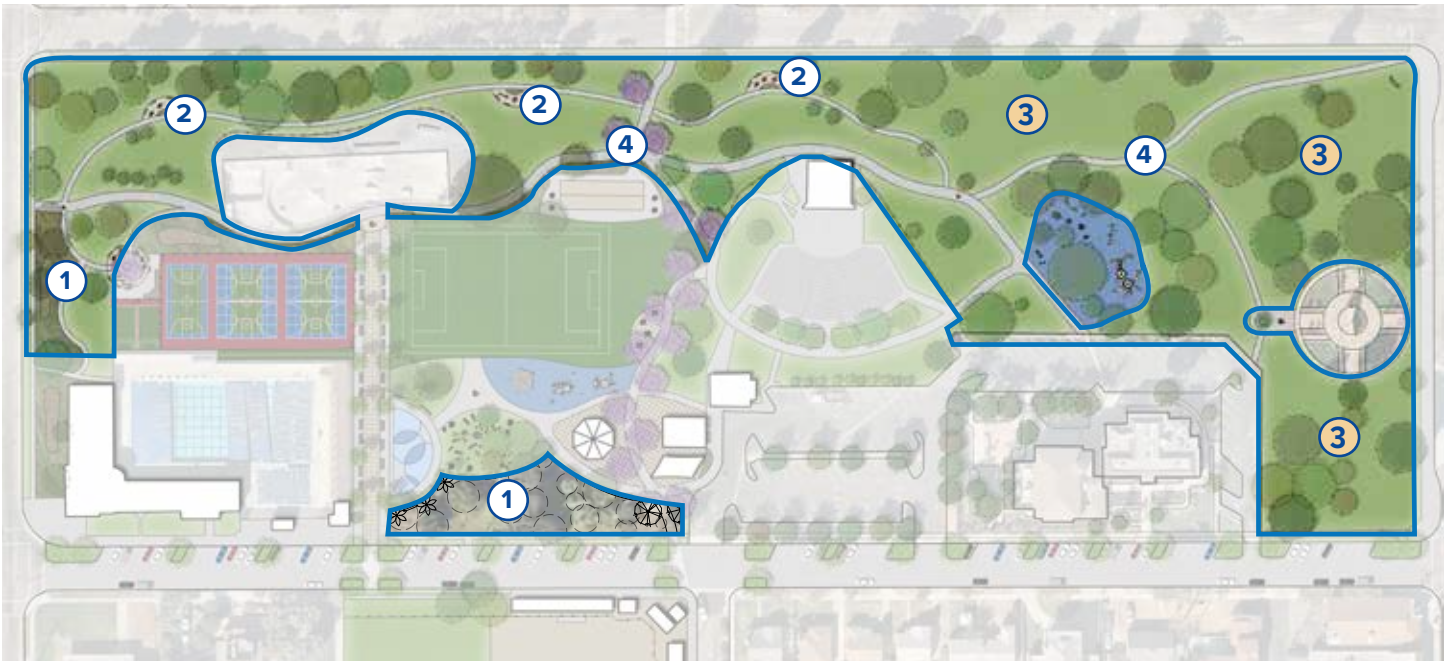
IMPROVEMENT	DESCRIPTION
1	Enhanced Entrance
2	Enhanced Community Building

Total Cost of Area N: $120,000 - $140,000

Area O: Open Lawn, Walking Trails, and Passive Areas

The open lawn, walking trails, and passive areas shall be preserved but enhanced with turf treatments. In areas where bioretention may be needed some of the lawn may be removed and replaced with water-wise planting and bioretention rock mulch. The area will include a new permeable asphalt trail which will have small fitness stations. At various intersections art may be included to help with the overall placemaking of the park.

Passive fitness area example



IMPROVEMENT	DESCRIPTION
1	Bio-Retention & Waterwise Planting Area
2	Fitness Nodes
3	Enhanced Open Lawn Area

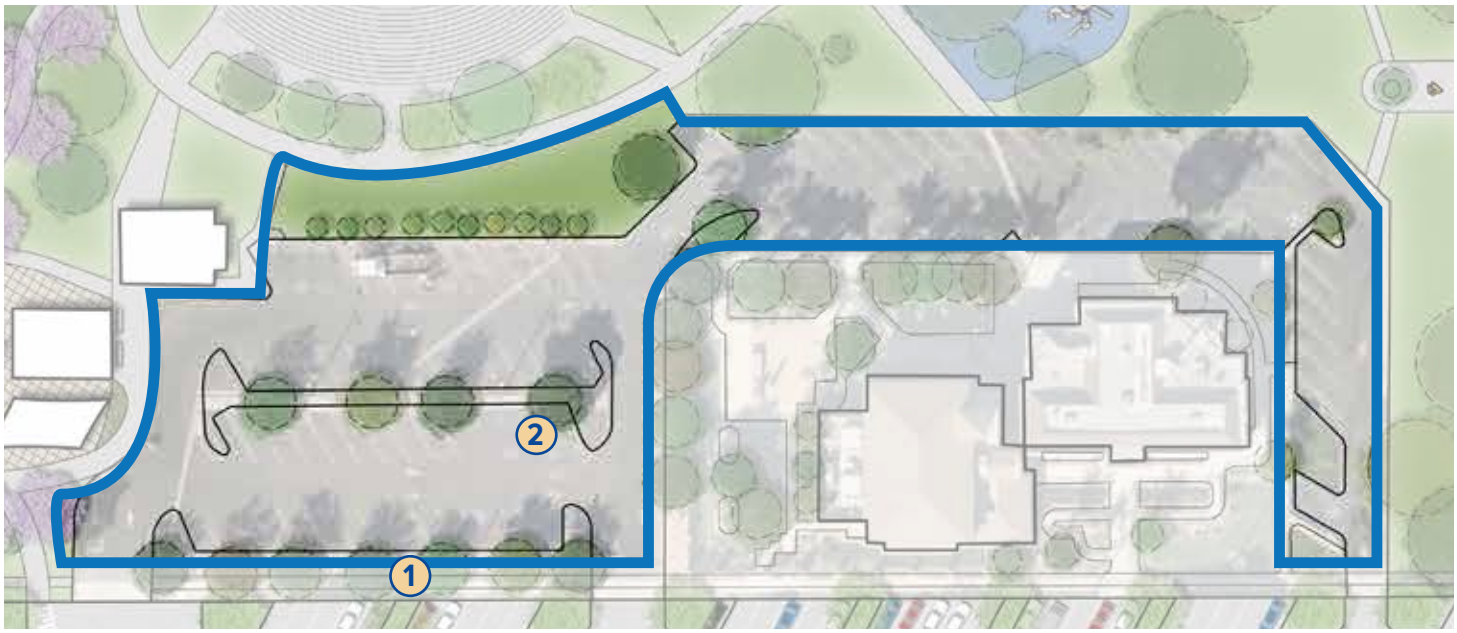
IMPROVEMENT	DESCRIPTION
4	Art Node / Opportunity

Total Cost of Area O: $1,743,500 - $2,034,100

Area P: Parking Lots

The parking lot areas shall include resurfacing and re-striping. The tree standards shall be accessed and supplemented with additional trees where gaps in tree coverage may occur to allow for sustainable site shading over the asphalt material. If feasible, a solar PV system may be included to provide additional power. EV, ADA, and bike storage/parking shall be included to meet the latest code requirements.

IMPROVEMENT	DESCRIPTION
1	Enhanced Parking Lot
2	Enhanced Planting Area



Total Cost of Area P: $64,700 - $75,500

Area R: Remaining Park Areas and Infrastructure

The remaining park areas shall receive general improvements to planting, lawn, irrigation, furnishings, and lighting. Site infrastructure shall be accessed for life cycle replacement needs. If deemed necessary, water, sewer, and electrical infrastructure shall be upgraded while site construction occurs. A weather based irrigation system will be included per the latest State requirements.

Existing open lawn space

Total Cost of Area R: $738,100 - $826,700

SECTION II-A
Recommendations & Cost Analysis Matrix

Montebello Parks Master Plan Recommendations Matrix

Draft 5/12/2021

Goal	Strategy		Objective	Actions	Capital Cost Estimate	Operational Budget Impact	Timeframe to Complete Short=3 years Mid= 3-10 years Long 10+ years
CONNECT	1. Placemaking	1.1	Include public art	a. Establish a public arts commission		**Staff time**	**Short**
				b. Encourage public art that's representative of the community		**Staff time**	**Short**
				c. Allocate areas within Montebello Parks for art opportunities	**100-200k**	**$1.6K per art piece**	**Mid**
		1.2	Encourage social interaction	a. Incorporate public plazas and gathering areas within the public realm	**1M-5M**	**$23.7K-$30K**	**Mid**
				b. Provide areas for family gatherings and events	**1M-2M**	**$12.4K-$16.1K**	**Mid**
				c. Establish programmed activities that encourage social interaction (i.e., movies in the park, holiday events, etc.)		**$40K-$50K**	**Short**
		1.3	Increase identity	a. Identify and bring out the history of the site and City		**Staff time**	**Short**
				b. Look for identifiable elements within each park and celebrate		**Staff time**	**Short**
				c. Incorporate entry monuments or gateways into parks to aid in park identity	**500k-750k**	**$1.6K per monument**	**Short**
				d. Include informational signage that identifies the character of the park	**100k-200k**	**$1.6K per sign**	**Short**
		1.4	Enhance character	a. Establish a character of the City that's incorporated into each		**Staff time**	**Short**
				b. Work off of City theme but have a park character that's unique for each		**Staff time**	**Short**
				c. Integrate park theme and character into features and buildings. Include in review of future projects for integration	**250-500K**	**$15.9K per acre**	**Mid**
				d. Ensure everything is set in context			**Mid**

Goal	Strategy	Objective	Actions	Capital Cost Estimate	Operational Budget Impact	Timeframe to Complete Short=3 years Mid= 3-10 years Long 10+ years
CONNECT	2. Linear Parks & Urban Trails	**2.1** Develop linear parks	a. Expand and explore opportunities for linear parks	**100-250k**	**$2.3K for hard surface, 4.9K for soft surface trails per mile (assumes hard surface replacements are capital costs)**	**Mid**
			b. Find areas where linear parks may occur and implement.	**1M-5M**	**$2.3K for hard surface, 4.9K for soft surface trails per mile (assumes hard surface replacements are capital costs)**	**Mid**
			c. Reclaim underutilized streets and/or infrastructure within the City	**2M- 5M**	**$2.3K per mile (assumes hard surface replacements are capital costs)**	**Mid**
		2.2 Create a unique linear trail at the Rio Hondo	a. Expand the Rio Honda trail system	**1M-5M**	**$2.3K for hard surface, $4.9K for soft surface trails per mile**	**Mid / Long**
			b. Incorporate trails within the northern hills in Montebello and in new development areas	**500k-1.5M**	**$2.3K for hard surface, $4.9K for soft surface trails per mile (assumes hard surface replacements are capital costs)**	**Mid / Long**
			c. Include an urban trails signage program that connects corridors and trails within the City to other regional trails	**50-100K**	**$1.5K for system of 30 signs**	**Short**
			d. Develop a Rio Hondo Specific Plan to further study the corridor and prioritize improvements	**150-300K**	**Staff time**	**Short**
		2.3 Establish major "Green Corridors" within the City	a. Look into enhancing Whittier Blvd., Olympic Blvd., Beverly Blvd., Greenwood / Montebello Blvd. with street trees, planting, and linear park amenities.	**1M-3M**	**$2.3K - $3.5K per mile (assumes hard surface replacements are capital costs)**	**Mid**
			b. Study each corridor to find areas of opportunities	**100K**	**Staff time**	**Short**
			c. Consider an urban greening project that specifically studies these corridors and others for linear park / green corridor opportunities	**2M-3M**	**TBD - Cost varies depending on results of the specific studies**	**Mid**

Goal	Strategy	Objective	Actions	Capital Cost Estimate	Operational Budget Impact	Timeframe to Complete Short=3 years Mid= 3-10 years Long 10+ years
CONNECT	2. Linear Parks & Urban Trails	**2.4** Connect to urban trails outside of the City	a. Look into the connection along Rio Hondo that can connect green space in Pico Rivera and South El Monte	**1M-2M**	**$2.3K for hard surface, $4.9K for soft surface trails per mile (assumes hard surface replacements are capital costs)**	**Mid**
			b. Research existing trail networks in and around Montebello to establish potential connection points	**100K**	**Staff time**	**Short**
			c. Develop a Master Plan with surrounding cities to further study trail connections	**150-200K**	**Staff time**	**Mid**
		2.5 Provide walkable and bike friendly networks throughout the City	a. Encourage development of Transit Oriented Developments		**Staff time**	**Short / Mid**
			b. Provide more protected bike lanes and bike facilities	**2M-5M**	**$2.3K for hard surface, $4.9K for soft surface trails per mile (assumes hard surface replacements are capital costs)**	**Mid / Long**
			c. Provide more walking trails	**1M-2M**	**$2.3K for hard surface, $4.9K for soft surface trails per mile (assumes hard surface replacements are capital costs)**	**Mid**
			d. Enhance Whittier Blvd., Olympic Blvd., Beverly Blvd., Greenwood / Montebello Blvd. with street trees, planting, and linear park amenities.	**see above**	**TBD based on street improvements**	
			e. Develop an Active Transportation Plan to improve bike and pedestrian facilities and safety	**150K**	**Staff time**	**Short**

Goal	Strategy		Objective	Actions	Capital Cost Estimate	Operational Budget Impact	Timeframe to Complete Short=3 years Mid= 3-10 years Long 10+ years
CONNECT	3. Technology	3.1	Organize digital files and develop a Citywide GIS databases	a. Work on a technology plan that establishes a digital record system for CAD and BIM files	**100-150K**	**Staff time**	**Short**
				b. Establish a GIS database for all of the City's mapped data	**50K**	**Staff time**	**Short**
		3.2	Increase usage of security systems within the park system	a. Work on a technology plan to increase security cameras.	**100K**	**Staff time, $5K**	**Short**
				b. Prioritize parks where safety concerns and other major issues mentioned		**Staff time**	**Short / Mid**
				c. Increase presence of security officers in parks of concern		**$100K-$200K**	**Short**
		3.3	Incorporate a digital scheduling and facility management suite	a. Research and explore platforms		**Staff time**	**Short**
				b. Setting up digital workflow	**75K**	**Staff time (training)**	**Short**
		3.4	Include virtual programs, events, and activities	a. Research and explore platforms to host virtual events		**Staff time**	**Short**
				b. Establish working platform and share events with community	**25K**	**Staff time/$10-20K for IT support**	**Short**
				c. Work with existing community center classes to incorporate virtual programing		**Staff time**	**Short**

Goal	Strategy	Objective	Actions	Capital Cost Estimate	Operational Budget Impact	Timeframe to Complete Short=3 years Mid= 3-10 years Long 10+ years
IMPROVE	4. Facilities & Amenities	**4.1** Consider improvements /infill of City owned properties	a. Look at ways to include facilities within existing City owned properties, specifically facilities that may help increase Level of Service and mitigates park needs in park poor areas		**Staff time**	**Mid**
			b. Find opportunities to include small plazas and minor recreational elements at City facilities such as at City Hall	**50-250K**	**$23.7K per acre**	**Mid**
			c. Explore divesting from properties that don't have a strong use in the future		**Staff time**	**Short**
			d. Create a phased plan for infill of established infill areas / create Concept Plans and CDs for each infill area	**100-500K**	**Staff time**	**Short**
			e. Implement infill projects	**5M-15M**	**$300K-$400K**	**Mid / Long**
		4.2 Include new pocket parks and mini parks	a. Study unused lots to find areas for new pocket parks and mini parks	**25K**	**Staff time**	**Short**
			b. Look at creating pocket parks and mini parks specifically in park poor areas	**1M-3M**	**$23.7K per acre**	**Mid**
			c. Upgrade the existing pocket parks at Dutcher Tot Lot and Northridge Mini Park	**250-750K**	**$10K-$23.7K depending on elements and comfort amenities**	**Mid**
		4.3 Address deferred maintenance throughout the City	a. Utilize the AssetCalc list of deferred maintenance items to prioritize which items need immediate repair	**500K-1.5M**	**TBD**	**Short**
			b. Evaluate the list annually to create priorities to be addressed		**Staff time**	**Short**
			c. Consider outsourcing service repairs as needed to meet the demand for deferred maintenance	**500-750K**	**TBD**	**Short**
		4.4 Improve the current level of service throughout the City	a. Reference the infill opportunity maps on pages 107 - 126 and LOS tables on pages 26, 101, & 168 to find areas to mitigate level of service gaps within the City		*** see attached**	**Short**
			b. Look at the top 5 priority LOS amenities and implement	**1M-2.5M**	**TBD**	**Mid**
		4.5 Explore adding additional indoor facilities, rec, teen, and senior centers	a. Find underutilized areas within the key growth areas of the City for additional indoor facilities, rec, teen and senior centers	**25k**	**Staff time**	**Short**
			b. Look at adding a recreation facility on the western edge of town	**2.5M-7.5M**	**TBD based on facility size, program offered and projected revenue**	**Mid**
		4.6 Develop flexible use fields	a. Look at creating a multi-use field at Reggie Rodriguez	**750K-1.5M**	**$7-9K + $3K per acre for turf care**	**Mid**
			b. Look at creating a multi-use field at Grant Rea	**750K-1.5M**	**$7K-$9K + $3K per acre for turf care**	**Mid**
			c. Look at other areas for multi use fields	**750K-1.5M**	**$7-$9K + $3K per acre for turf care**	**Long**
		4.7 Provide multi-purpose courts and combine court standards to accommodate trends and more variety in court sports	a. Identify existing courts that may be converted to multi-purpose courts	**15K**	**Staff time**	**Short**
			b. Prioritize multi-purpose courts in areas where LOS is lacking and construct	**750K-1.5M**	**$1.3K**	**Mid**
			c. Look for areas to include additional multi-purpose courts and find opportunities to include line striping for sports that are growing in demand	**750K-1.5M**	**$1.3K**	**Mid**

Goal	Strategy	Objective	Actions	Capital Cost Estimate	Operational Budget Impact	Timeframe to Complete Short=3 years Mid= 3-10 years Long 10+ years
IMPROVE	5. Financial	**5.1** Continue the asset management system	a. Establish an asset management system to manage and track equipment and inventory to improve budget planning.	**100K**	**Staff time**	**Short**
			b. Create and update a data-driven plan for identifying, evaluating, and managing park assets	**100K**	**Staff time**	**Short**
			c. Annually, inventory and create a condition assessment for each asset in the parks and recreation system. Establish photo-inventory and GIS mapping. The inventory must include cost, installation year and a lifecycle for each asset.		**Staff time**	**Short**
			d. Complete an annual risk assessment to determine the cost of maintenance and operations, replacement, and consequences if each asset fails. Determine maintenance and operations cost at each year of the asset's lifecycle (based on the level of service for each asset).		**Staff time**	**Short**
			e. Annually, incorporate data from the asset management plan and process into capital and operating budgets.		**Staff time**	**Short**
		5.2 Explore additional funding options	a. Consider the potential support for funding mechanisms to support and pay for operations and maintenance of parks and facilities.		**Staff time**	**Mid**
			b. Consider the potential support for bond referendum to fund multiple/capital projects.		**Staff time**	**Short / Mid**
			c. Consider internal budget and opportunities to ask/seek additional funding to support improvements in the maintenance and care of City parks and facilities to improve the standard throughout the community.		**Staff time**	**Short**
			d. Evaluate the non-resident fee structure and consider adjusting fees to ensure non-residents are paying the entire cost of programs, rentals, and activities they participate in.	**75K**	**Staff time**	**Short**
			e. Reevaluate contracts with partners and seek out new public/private partnerships as a means to enhance the variety of recreational programs available to the community. Consider opportunities with developers to incorporate needed amenities in new development.		**Staff time**	**Short / Mid**
			f. Explore opportunities to increase Cost Recovery at the Montebello Golf Course. Evaluate current fee structure, ongoing expenses, and options for new revenue streams.		**(funds currently allocated to consultant)**	**Short**
			g. Continue to seek alternative funding source that includes donations, grants, and others forms of sponsorship.		**Staff time**	**Short / Mid**
			h. Communication with current sponsors and donors should be conducted on a regular basis to ensure their continued positive relationships with the District		**Staff time**	**Short**
			i. The Department should use the results of the alternative funding exercise completed during the master planning process as a guide for exploring new funding opportunities.		**Staff time**	**Short**
			j. Seek increased General Fund allocations to address recommendations from the master plan.		**Staff time**	**Short / Mid**
			k. Develop a nonprofit foundation for parks and recreation to pursue grant opportunities and philanthropic donations.		**TBD**	**Mid**

Goal	Strategy		Objective	Actions	Capital Cost Estimate	Operational Budget Impact	Timeframe to Complete Short=3 years Mid= 3-10 years Long 10+ years
IMPROVE	5. Financial	**5.3**	Explore opportunities to increase sponsorships	a. Build on existing sponsorships as well as pursue local entities to support events and a scholarship fund within the foundation (Sample Sponsorship Policy Staff Document).		**Staff time**	**Short / Mid**
				b. Ensure all existing and future sponsorships are accurately portrayed in a signed sponsorship agreement.		**Staff time**	**Short / Mid**
				c. Create a friends' groups for each neighborhood park that hosts summer events and partner to recruit and enter agreements with the local business community.		**$15K-$30K part-time outreach employee**	**Short / Mid**
				d. Establish media sponsors and multi-year agreements as priority.		**Staff time**	**Short / Mid**
		5.4	Track grants and charitable opportunities	a. Consider contracting with a dedicated grant writer to research, submit, and track federal, regional, state, and local grants.	**75K**	**Staff time**	**Short**
				b. Continue to research, submit, and track federal, regional, state, and local grants.		**Staff time**	**Short**
				c. Follow NRPA's grant web page that includes up-to date opportunities in areas like climate resilience, adaptive recreation, health care, Replay Grants, out of school time program grants, Keep America Beautiful and more.		**Staff time**	**Short / Mid**
				d. Utilize NRPA's Foundation Center for links to thousands of grant opportunities, grant education and training.		**Staff time**	**Short / Mid**
				e. Utilize Non-Profit foundation (action item 5.2d) to write and pursue grant opportunities.		**Staff time**	**Mid**

Goal	Strategy	Objective	Actions	Capital Cost Estimate	Operational Budget Impact	Timeframe to Complete Short=3 years Mid= 3-10 years Long 10+ years
INCLUDE	6. Programs & Services	**6.1** Expand programs and services	a. Consider expanding operations at the George Hensel Aquatic Center		**$50-$100K**	**Mid**
			b. Expand sports programs to include football, soccer, baseball, and girls' softball. Continue to monitor sports program trends		**$100-$150K**	**Mid**
			c. Develop a recreation program plan that includes a service matrix, activity development and selection process, and other requirements found in CAPRA standards		**Staff time**	**Short**
			d. Continue to offer and expand program opportunities to Montebello's Lifemode groups - Next Wave, Ethnic Enclaves, and Upscale Avenues and appropriate market segments		**TBD**	**Short**
			e. Promote active lifestyles by enhancing and increasing aquatic exercise and fitness programs		**$100-$150K**	**Short**
			f. Evaluate salaries and compensation for Department employees. At a minimum, conduct a wage analyses to assist the Department with recruiting highly qualified full and part-time recreation staff		**TBD - will vary based on outcome of the study**	**Short / Mid**
		6.2 Explore more diverse programs	a. Install outdoor fitness and exercise equipment in programmable spaces in neighborhood parks	**300-500K**	**$.75-$1K to maintain equipment, (per piece) vandalism abatement**	**Short**
			b. Using contracted instructors, offer enhanced fitness programming in parks across the City		**Staff time, $20K**	**Short**
			c. Increase and enhance programs for individuals with disabilities. Consider programmatic ADA inclusion requirements		**$75-$100K**	**Short / Mid**
			d. Offer organized walking programs for seniors and families in safe environments		**$10K-$25K**	**Short**
		6.3 Enhance special event programming	a. Offer special events in each neighborhood that will make contribute to a sense of community and help make each park the hub of each neighborhood		**$40K-$50K**	**Short**
			b. Develop a special events advisory group for each neighborhood to assist with planning special events in parks		**Staff time**	**Short**
			c. Invest in a formal sponsorship program for events and activities. At a minimum, develop a policy and tools to assist staff with recruiting program sponsors		**Staff time**	**Short**
			d. Enhance and offer Spanish language programs, cultural programs and outdoor movies in Spanish		**$10-$15K**	**Short**
		6.4 Continue to work with other service providers to develop programs and services to meet demand and trends	a. Invest in and develop an automated and real-time sports field reservation system	**50-100K**	**$1.5K**	**Short**
			b. Develop a joint use agreement with the school district to ensure the partnership is equitable		**Staff time, negotiated costs**	**Short**
			c. Coordinate with local recreation providers (PAAL Police Athletic & Activities League, schools, youth sports providers, Montebello-Commerce YMCA, the Boys & Girls Club of West San Gabriel Valley, the Montebello and Chet Holifield Libraries, etc.) to reduce duplication of services.		**Staff time**	**Short**

Goal	Strategy		Objective	Actions	Capital Cost Estimate	Operational Budget Impact	Timeframe to Complete Short=3 years Mid= 3-10 years Long 10+ years
INCLUDE	6. Programs & Services	6.5	Include educational and nature/ environmental programs	a. Establish walking programs that highlight nature interpretation opportunities		**$10K-$25K**	**Short**
				b. Develop partnerships with environmental advocacy groups to offer environmental education programs and camps		**$10K-$30K**	**Short**
				c. Establish community gardens in convenient locations to promote gardening and local food production	**100-500K**	**$4.8K (1/2 acre garden)**	**Mid**
				d. Collaborate with schools and educators to create outdoor "classroom" space in parks near schools	**100-500K**	**$4.8K (1/2 acre garden)**	**Mid**
		6.6	Continue to monitor affordability of programs and services	a. Develop and enhance scholarship opportunities		**Staff time, dedicated scholarship fund**	**Mid**
				b. Evaluate non-resident program participation to ensure non-resident participants are paying appropriate and equitable fees		**Staff time**	**Short**
				c. Develop a resource allocation and cost recovery policy to ensure equitable use of City resources for Recreation	**50K**	**Staff time**	**Short**
		6.7	Expand indoor programs and increases opportunities for senior, teen, community centers	a. Offer additional enrichment classes for Seniors, using contract or volunteer instructors to maintain affordability		**$20K-$50K**	**Short**
				b. Increase and improve Senior Center activities focusing on social services, social activities, transportation and information and referral for healthcare and other services		**$25K**	**Mid**
				c. Enhance and improve enrichment programs that offer like skills opportunities related to job skills, personal improvement, and academic success		**$20-$50K**	**Short**
				d. Evaluate parking opportunities at the Senior Center to ensure appropriate spaces are reserved and available during program and event times		**Staff time**	**Mid**
		6.8	Continue to evaluate the quality and mix of programs and services	a. Develop and report a minimum of 5 performance measures to evaluate quality of recreation programs and services		**Staff time**	**Short**
				b. Develop a consistent and equitable manner of community member engagement to determine recreation desires and needs		**Staff time**	**Short**
				c. Ensure engagement processes include residents who live in the south part of the City		**Staff time**	**Short**
				d. Conduct an annual on-line survey to establish trends in participant satisfaction	**20K**	**Staff time**	**Short / Mid**
				e. Expand patron evaluation process, emphasizing aquatics, adult sports and youth sports to include post program surveys and comment cards		**Staff time**	**Short**
				f. Establish customer service response goals to ensure patrons receive timely responses to complaints or suggestions		**Staff time**	**Short**
				g. Implement California's Concussion Management in Youth Sports Act to comply with legal mandates		**Staff time**	**Short**

Goal	Strategy	Objective	Actions	Capital Cost Estimate	Operational Budget Impact	Timeframe to Complete Short=3 years Mid= 3-10 years Long 10+ years
		6.9 Communicate recreation opportunities to City residents	a. Develop a marketing plan that includes outreach, pricing, promotion, program mix and social media	**75-100K**	**Staff time**	**Short**
			b. Publish a quarterly program guide to provide branding and program registration information	**25-50K**	**$25K-$100K**	**Short**
			c. Develop a social media plan that has both resources and is aligned with current trends and updated continually		**Staff time**	**Short**
			d. Develop a Senior's advocacy or friends' group to aid in increased communication and program evaluation		**Staff time**	**Short**
			e. Increase communication and coordination with youth sports providers by creating a youth sports advisory board		**Staff time, $1K**	**Short**
			f. Emphasize use of the City's webpage to assist patrons to remain up to date on recreation program opportunities		**Staff time**	**Short**
			g. Continue to use and enhance an equity lens when marketing programs, with specific emphasis on program promotion in the Spanish language		**$10K-$20K**	**Short**

Goal	Strategy	Objective	Actions	Capital Cost Estimate	Operational Budget Impact	Timeframe to Complete Short=3 years Mid= 3-10 years Long 10+ years
7. Administrative	**7.1**	Improve partnerships and joint use agreements	a. Develop a joint use agreement plan with the school district		**Staff time**	**Short / Mid**
			b. Look at strategic partnerships with organizations such as the YMCA and others		**Staff time**	**Short / Mid**
			c. Generate partnerships with organizations that help with park security, maintenance, and cleanup		**Staff time**	**Short**
	7.2	Staff appropriately to meet current demand and maintain established quality service	a. Understand the need for additional manpower for maintenance practices at additional parks or upgraded facilities		**Staff time**	**Short / Mid**
			b. Research additional resources		**Staff time**	**Mid**
			c. Create new maintenance positions within the Department		**$75-$100K per FTE**	**Mid**
	7.3	Explore additional partnerships to assist with funding, volunteering, and marketing	a. Develop relationships with local businesses, clubs, and organizations to seek funding, volunteers, and marketing support to expand programs and facilities		**Staff time**	**Short**
			b. Find volunteer to help operate and run programs		**Staff time**	**Short**
			c. Reevaluate current contacts with partners and seek out new public/private partnerships to enhance amenities		**Staff time**	**Short / Mid**
			d. Identify partnerships with other organizations that can provide additional programming space		**Staff time**	**Short / Mid**
	7.4	Evaluate and address staffing levels	a. Consider comparison for staffing levels through NRPA Standards		**Staff time**	**Short**
			b. identify current performance standards		**Staff time**	**Short**
	7.5	Improve internal and external communication about division activities, events and services	a. Utilize a number of marketing tools and strategies to actively promote parks an recreation services		**Staff time**	**Short / Mid**
			b. Increase social media presence, school flyers, and hire teens or interns to assist with social media marketing and promotions		**Staff time**	**Short / Mid**
			c. Engage all segments of the community in the marketing efforts		**Staff time**	**Mid**
	7.6	Explore making the facility and park rental fee easier	a. Partner with an insurance agent		**Staff time**	**Short**
			b. Review fees annually to ensure they are equitable and the collection of fees is resulting in appropriate cost recovery		**Staff time**	**Short**
			c. Consider conducting a Resource Allocation/Cost Recovery study to determine a goal for cost recovery, cost of operations, and how resources are currently allocated and could be reallocated	**75K**	**Staff time**	**Short**

Operational Budget Impact for Strategy 4.4

Adventure Playgrounds (4,000-6,000 SF), $1.3K

SECTION II-B

Comparative Analysis

Comparative Analysis

Comparative analysis is a tool that allows for comparison of certain attributes of the City of Montebello's management practices and fee structure. This process creates a deeper understanding of alternative providers, your place in the market, and varying fee methodologies, which may be used to enhance and improve the service delivery of parks and recreation.

It is very difficult to find exact comparable communities, because each has its own unique identity, ways of conducting business, and differences in the populations that it serves. The political, social, economic, and physical characteristics of each community make the policies and practices of each parks and recreation agency unique. Additionally, organizations do not typically define the expenditures of parks, trails, facilities, and maintenance the same way.

Agencies also vary in terms of how they organize their budget information, and it may be difficult to assess whether or not the past year's expenses are typical for the community. Finally, the impact of COVID-19 has significantly altered program offerings, facility availability, and overall program delivery. Therefore, it is important to take all data in a benchmarking study with context, realizing that while benchmarking can be a great comparative tool, it doesn't necessarily lend itself into being a decision-making tool.

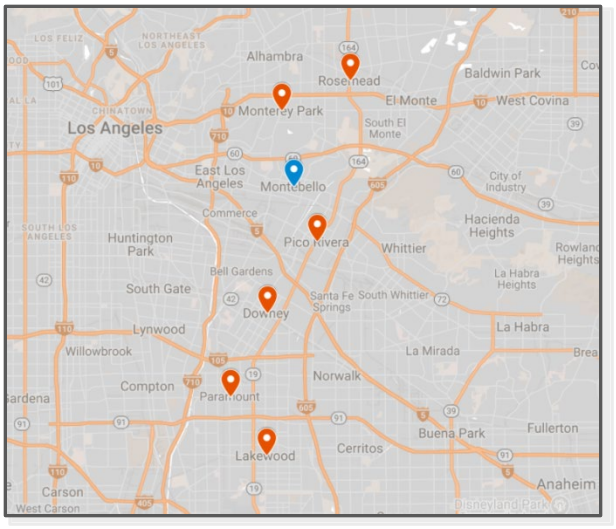
For the purposes of this study, a regional approach was taken to benchmark neighboring agencies listed below in Table II-B-1. Population data was sourced from Esri Business Analyst, and current population numbers are listed below. Figure II-B-2 shows the locations of these agencies (orange) in relation to the City of Montebello (blue).

Table II-B-1: Population and Growth Rate of Benchmarked Communities

	2020 Population	2020-2025 AGR
Montebello	63,734	0.07%
Paramount	54,741	0.00%
Lakewood	81,003	-0.01%
Downey	115,239	0.10%
Rosemead	54,881	0.07%
Monterey Park	61,255	0.04%
Pico Rivera	63,185	-0.04%

**AGR = Average Growth Rate; Source: Esri Business Analyst*

Figure II-B-1: Responsibilities of Park and Recreation



Staffing

The City of Montebello 2020 budget allocated for 16 full-time equivalent (FTE) employees. On a national level, the typical park and recreation agency for populations between 50,000 and 99,999 have significantly more staff (60.2 FTE) with 9.3 FTEs per 10,000 residents. The City of Montebello has approximately 2.51 FTEs per 10,000 residents, which is lower than the national average but similar to other nearby municipalities. Table II-B-2 below demonstrates the local data for neighboring agencies.

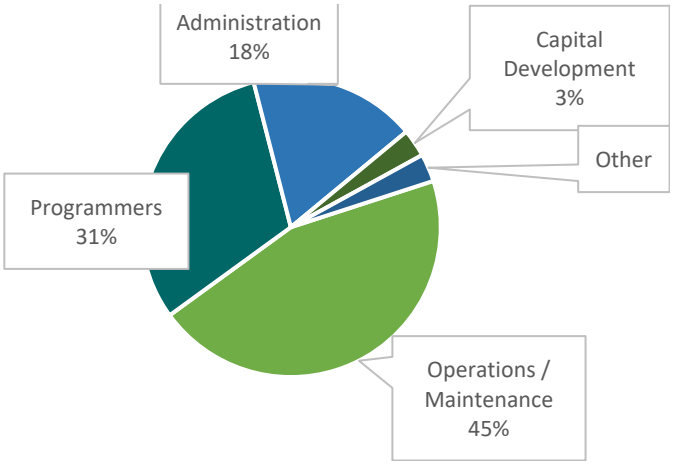
Table II-B-2: Park and Recreation FTEs on Staff and FTEs per 10,000 Residents

	FTEs on Staff	FTEs per 10,000 Residents
Montebello	16	2.51
Paramount	10	1.83
Lakewood	60	7.41
Downey	13	1.13
Rosemead	9	1.64
Monterey Park	1.05	0.17
Pico Rivera	26	4.11

Source: NRPA Park Metrics

Data from agencies across the country indicate that it is common for the typical Park and Recreation staff responsibilities to be divided into four primary categories: operations/maintenance, programmers, administration, and capital development. Figure II-B-2 shows the breakdown for the typical agency on a nationwide level. Operations and maintenance, on average, make up 45 percent of an agency's budget, while programmers make up 31 percent, and administration is approximately 18 percent.

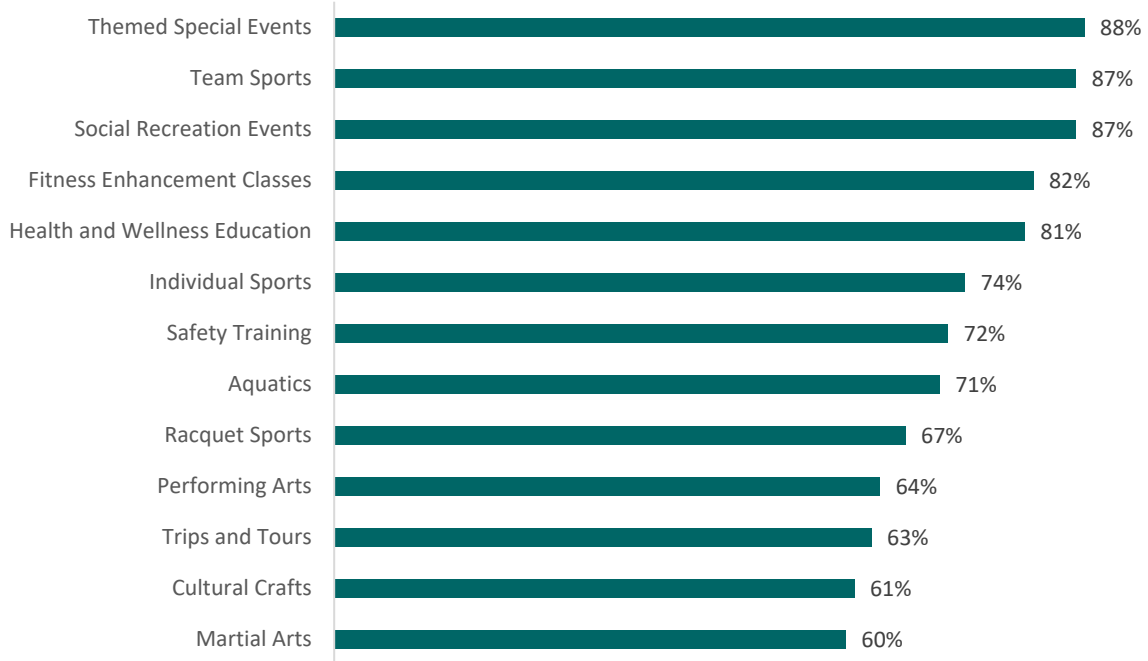
Figure II-B-2: Responsibilities of Park and Recreation



Recreation Program Overview

NRPA's 2020 Agency Performance Report indicates that programming can be the primary way of engaging with residents. It can also be the largest source of non-tax revenues. The typical agency offers over 180 programs each year; 67 percent of those being fee-based. Beyond revenue benefits, programming allows for thousands of contacts with their community members. NRPA defines "contacts" as those interactions that residents have with their facilities and programs – visiting parks, walking trails, participating in a program, or visiting a community center. The typical agency has 225,000 contacts a year. In 2020, the following activities were listed as the key programs offered by at least 60 percent of park and recreation agencies:

Figure II-B-3: Key Programming Activities Offered by Typical Park and Recreation Agency



Source: Esri Business Analyst

Local and National Program Benchmarked Standards

Regarding program offerings on a local level, a number of key recreation categories were indexed and researched for nearby agencies based on program catalogs and recreation brochures. The result is Table II-B-3, which details an inventory of programs. Montebello offers many of the same type of programs as the other agencies, including special events, youth/summer camps, fitness classes, and senior programs and services. Based on this research, there may be some duplication of services for these programs especially for those agencies that are closest in proximity to Montebello, such as Pico Rivera and Monterey Park.

Table II-B-3: Park and Recreation FTEs on Staff and FTEs per 10,000 Residents

Program Standards

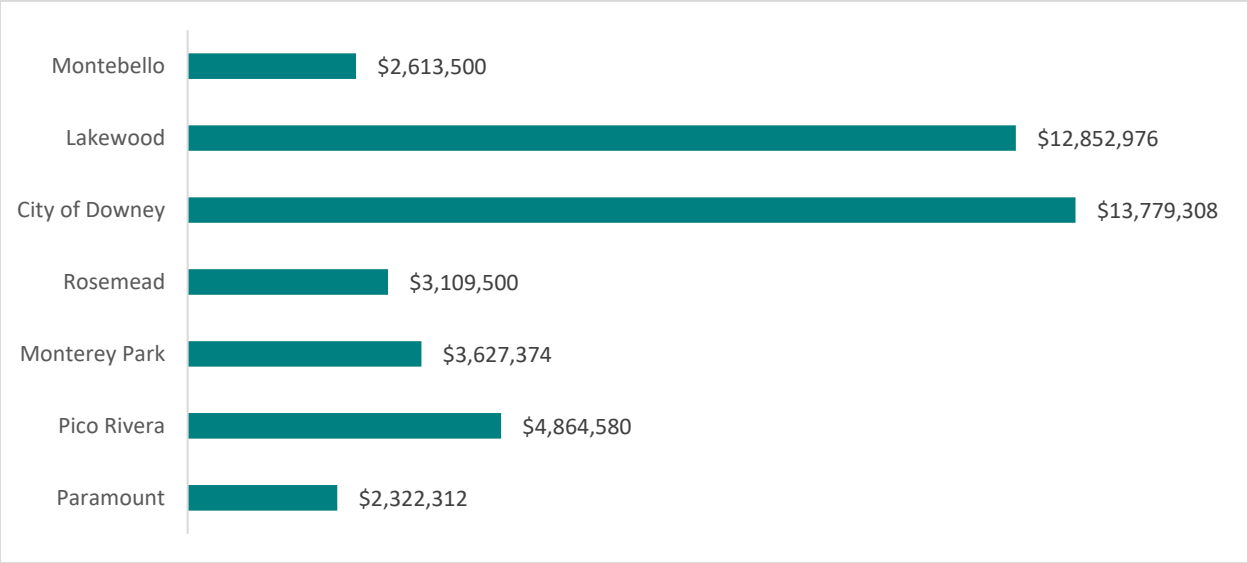
While local comparisons can help determine duplication of services or potential gaps in service, the best guidelines for creating and implementing program standards come from a national perspective - the NRPA's Commission for Accreditation of Park and Recreation Agencies (CAPRA) offers a comprehensive approach to developing and maintaining best practices related to programming and overall operations. A fundamental component of national accreditation is a Recreation Programming Plan (RPP) which is a document that offers the following:

- Program Planning Model
- Services Management Matrix
- Target Market/Audience
- Activity Development and Selection
- Type and Scope of Programs
- Outreach Initiatives
- Organizational Chart

Expenditures

The typical parks and recreation agency with a population between 50,000 and 99,999 residents has expenditures of $6,185,614 annually, this is significantly higher than the annual expenditures of the City of Montebello at $2,613,500. For nearby agencies, the numbers were variable, with most of the other agencies spending between 2.3 million to 4.9 million, with the exception of City of Downey ($13.8 million) and Lakewood ($12.9 million). Montebello expended $41.01 per 10,000 residents which is the lowest among those communities that were compared. These numbers were sourced from local budget and planning documents from 2020 and should be used as an estimate only.

Table II-B-4: Parks & Recreation Expenditures



Source: Budget and Planning Documents, 2019 – 2021

Table X: Parks & Recreation Expenditures per 10,000 population

	Expenditures	Expenditures per 10,000 Residents
Montebello	$2,613,500	$41.01
Paramount	$2,322,312	$42.42
Lakewood	$12,852,976	$158.67
Downey	$13,779,308	$119.57
Rosemead	$3,109,500	$56.66
Monterey Park	$3,627,374	$59.22
Pico Rivera	$4,864,580	$76.99

Budgets will become impacted by the COVID-19 crisis, but many agencies are still realizing the full impact of the virus. Monterey Park specifically details the change in their budget projected for 2021 planning document, which will likely be seen in other agencies as well:

> *"The $1.027 million decrease to the Parks and Recreation budget is primarily due to the reduction of programming/services due to the COVID-19 crisis. The COVID-19 crisis has forced organizations to reassess the traditional program delivery model. For example, the City will modify major holiday event gatherings by moving them to an online virtual platform. In addition, summer special events were either cancelled or modified through January of 2021 to be revaluated at that time."*

The traditional program delivery model, as Monterey Park indicated, is evolving to rely more heavily on virtual programming and strategic partnerships. Reducing duplication of services to focus on what the City of Montebello does best will be essential moving forward.

SECTION II-C
Funding Operations & Maintenance Items

Funding Shortfalls for Maintenance or Operations

Current funding

Two key indicators of the sufficiency of funding for maintenance are operating expenditures per acre of park land and residents per park.

Operating expenditures per acre of park land

Montebello allocates approximately $15,953 per acre of park land to maintain and operate the parks in the City. A typical system may expend between $4,578 per acre on the low end and $20,494 per acre on the high end. Montebello's operating expenditure per acre is above the median typical investment of $7,891 per acre. This does not include the golf course which is budgeted separately. This analysis evaluated the park system, made up of 79.21 acres in eleven parks.

Residents per park

The city currently maintains 10 park areas greater than .5 acres which translates into 6,205 residents per park. Typically, agencies similar to Montebello would be much less dense – 1,560 to 4,518 with a median of 2,523. Typically, the greater the number of residents per park, the greater the maintenance needs due to the need to remove greater amounts of trash, clean restrooms more often, repairs and overall maintenance.

Identification of Resources Needed to Support Expansion of the Park System

It is expected that to achieve a recommended level of service of 4 acres per 1,000 residents, the city will need to add 168 acres of park land and subsequently, allocate an additional $2,539,107 to operate and maintain the parks.

Costs to maintain park spaces vary based on the kind of park, size, location and amenities in the park. Typically, the smaller the parks, the higher the maintenance costs per acre. The larger parks may cost more to maintain but are generally more efficient as moving equipment and people is more minimal.

Costs Associated with Park Maintenance

This master plan was completed during the Covid-19 Pandemic which prevented ride-along and other opportunities with the staff. This section was completed based on interviews with the staff and other background materials. Maintenance costs vary by the size of the park and can be predicted based on the cost to maintain each amenity in each park, accomplished by completing a much more comprehensive maintenance analysis.

Using actual and budgeted data from current and past Montebello budgets, estimated costs were identified for maintenance and operation of different types of amenities and are identified in Table II-B-1.

Table II-C-1: Costs to Maintain Individual Amenities

MAINTENANCE & REPAIR TASK	UNIT	MULTIPLIER	MAN HOURS	HOURLY RATE fully costed with benefits, admin, etc.	FREQUENCY	MANPOWER	CONSUMABLES	UTILITIES	ANNUAL COSTS
Basketball Courts with lights	Each	1	0.25	$34.62	40	$346	$360	$6,000	$ 6,706.20

Maintenance Costs Based on Park Typologies

The costs per acre are typical costs associated with maintaining and operating different kinds of parks with different kinds of amenities. The costs should be considered estimates as the number and condition of amenities, and the level of reactive maintenance due to graffiti, illegal dumping, etc., all play a significant and changing role.

Personnel costs for Montebello's park maintenance staff along with all associated benefits for 2018/19 were used in the analysis. The personnel costs were adjusted for paid time for administrative and personnel (leave) functions which is assumed to be 20% of available work hours, on average.

Maintaining Montebello's Different Classifications of Parks

Maintaining individual amenities contributes to the overall cost of operations for each park and collectively, the system. As a basic rule of thumb, the smaller the park space, the higher the maintenance cost per acre.

Mini-Park (<2 acre or less) *$23,729 per acre to operate and maintain*

- Serves residents within a 15-minute walkshed
- Located near housing and/or other activity centers in the immediate neighborhood
- Facilities include children's play areas and equipment, exercise and fitness areas, outdoor seating and picnic areas, and plazas
- Typically, do not include parking areas or restrooms

Mini-parks require a similar amount of travel time, effort to transport turf equipment to larger parks and are the least efficient type of park to maintain.

Neighborhood Parks – (2 to 8 acres) *$16,145 per acre to operate and maintain*

The Neighborhood Park is considered the "basic unit of the parks system and serves as the recreational and social focus of the neighborhood" (National Recreation and Park Association, 1996).

- Typically located within ¼ to ½ mile from residential areas
- May include basketball courts, open turf areas, playgrounds, picnic tables, drinking fountains, and benches
- Restrooms and dedicated parking are typically not in neighborhood parks although they can be. Access is through walking or by bicycle and are intended to meet the needs of residents within a short walk

Community Parks – (> 8 acres) *$12,458 per acre to operate and maintain*

- Sports fields for soccer, baseball, softball, etc.
- Natural areas
- Fitness courts
- Basketball courts
- Dog off leash areas or fenced dog areas
- Typically include large event space or amphitheaters
- Multiple restroom facilities
- Dedicated parking

- Tennis courts
- Multiple playground areas and specialized playgrounds
- Picnic areas
- Reservable spaces for groups

Community's Desired Level of Service Cost Analysis

Scenario that meets the future user demand and trend needs without additional funding beyond current sources

The City has two financial challenges ahead of them. (1) Funding maintenance associated with bringing the overall park acreage from 1.3 acres per 1,000 residents to 4 acres per 1,000 residents and (2) to identify resources to maintain new amenities that are needed to provide quality park experiences.

1. Currently, the City allocates $15,043 per acre of park land which is in excess of the median allocation for similar cities across the United States. While this is not unexpected due to extremely high utility costs in Southern California, and the level of security issues brought about by inappropriate use of the parks (graffiti, vandalism, etc.), the median allocation by a similar or typical department is $7,841 per acre. At the median level of investment, the department could operate and maintain 160 acres or an increase of 80.94 acres and still remain at the national median and high-quality park maintenance. This, however, does not suggest that a significant degradation in park maintenance would be avoided due to the high cost of park maintenance in Montebello.

2. Cost associated with infill opportunities determined by population standards include sixteen different amenities. These are identified below (and in Chapter 3) that the Department may want to consider as infill opportunities to bring the specific amenity types in line with what a typically parks and recreation agency would offer. If all of the deficiencies were cured, the additional annual maintenance cost would be approximately $306,000.

Table II-C-2: Maintenance Costs Associated with Infill Opportunities

Amenity	Deficiency	Individual Operation and Maintenance Cost	Total Cost to the Montabello System
Basketball Courts (with lights)	-1	$ 6,706.00	$ (6,706.00)
Basketball courts (without lights)	-1.5	$ 326.96	$ (490.44)
Bocce ball Courts	-10.6	$ 585.00	$ (6,201.00)
Community Gardens	-1.3	$ 4,846.00	$ (6,299.80)
Diamond Fields: Baseball (Adult - 230'+) with lights	-2.2	$ 12,400.00	$ (27,280.00)
Diamond Fields: Baseball (Youth -< 230'+) without lights	-8.1	$ 7,400.00	$ (59,940.00)
Diamond Fields: Softball (Adult - 200'+) with lights	-2.1	$ 12,400.00	$ (26,040.00)
Diamond Fields: Softball (Youth - <200'+) without lights	-3.3	$ 7,400.00	$ (24,420.00)
Dog Parks	-1.1	$ 4,800.00	$ (5,280.00)
Performance Amphitheaters	-0.1	432.75	$ (43.28)
Pickleball Courts	-10.6	$ 1,028.00	$ (10,896.80)
Playgrounds (age 6-12)	-8	$ 1,355.00	$ (10,840.00)
Rectangular Soccer (Adult U14+)	-3.8	$ 8,451.00	$ (32,113.80)
Rectangular Soccer (Youth U6-12)	-7.1	$ 8,451.00	$ (60,002.10)
Tennis Courts	-5.1	$ 5,346.00	$ (27,264.60)
Volleyball Courts	-3.2	$ 950.00	$ (3,040.00)
Total			$ (306,857.82)

Funding levels to meet all population-based standards, geographic distribution and amenity needs

While the emphasis in this section of the masterplan is on addressing the needs to fund park maintenance and operations, it is recognized that small parks and recreation departments budgets are interactive throughout. As a result, this section attempts to look at the financial challenges and opportunities for the entire department.

Background

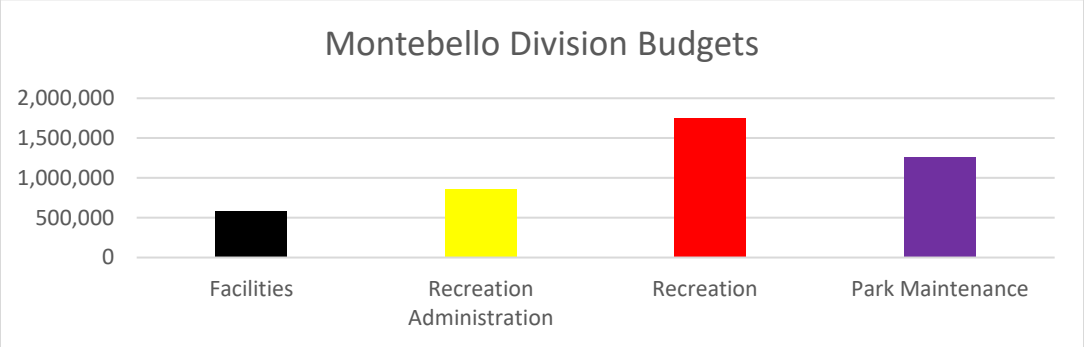
The City of Montebello Recreation and Community Services Department provides a wide variety of recreation programs and services, and 79.22 acres of neighborhood and community park space in 11 parks for its residents. In addition, a 45.86 acre golf course with a 3,141,000 annual budget is administered by the department.*

The Department is funded by a 4.4-million-dollar operating budget that supports 27 full time staff. In a typical year, the department receives approximately $500,000 in revenues.

The Department is organized into four divisions –Facilities, Recreation Administration, Recreation and Park Maintenance. Figure II-C-1 shows the breakout between the department's allocated budgets.

* The golf course is being studied in another process and is not analyzed here. As a result, the acreage and financial data is not included.

Figure II-C-1: Montebello FY 2020/21 Division Budgets



The purpose of this analysis is to look at current and future resources needed to meet the changing parks maintenance and operation needs of Montebello's parks. This analysis does not address the golf operation, as a separate study is currently underway to evaluate the efficient operation of the course.

The 2020/21 budget reflects necessary changes in services and operations due to the Pandemic. Concurrently, department staff attempted to right-size the 2020/21 budget to reallocate unused resources. An annual zero-based budgeting process, although more work to complete, typically results in a better planning tool.

Budget Trends

The current budget represented a 16 percent decrease of $879,196 compared to the previous year, as a result of both the right-sizing effort and the Covid-19 Pandemic. Table II-C-2 and II-C-3 show the current and previous four-year expense and revenue actuals and budgets. Revenues are budgeted at 39% less than 2019/20 as a result of the Pandemic but would be expected to recover within the next post-Pandemic budget cycle.

Table II-C-2: Five Year Expenditure Trends

Expenditure Trends					
	FY 2016/17 Actuals	FY 2017/18 Actuals	FY 2018/19 Actuals	FY 2019/20 Amended Budget*	FY 2020/21 Adopted Budget
Facilities			$792	$606,681	$589,800
Recreation Administration	$346,595	$360,628	$513,571	$812,805	$856,700
Recreation	$1,346,595	$1,586,851	$1,501,193	$1,847,155	$1,756,800
Park Maintenance	$1,314,191	$1,264,499	$1,307,349	$1,350,662	$1,263,800
Total Expenses	$3,137,146	$3,212,669	$3,322,825	$5,346,296	$4,467,100

*In FY 2019/20, a one-time allocation of $715,000 was included in the budget (Commercial Cannabis), that is not part of the typical operating budget and was not included in the table.

Budgets are broken out by accounting category for each division in the current budget in Table Y

Table II-C-3 Budgets by Category

	Facilities	Administration	Recreation	Maintenance	Total	% of Budget
Salaries	$188,300	$420,900	$875,200	$463,500	$1,947,900	45%
Benefits	$36,000	$84,600	$159,600	$151,500	$431,700	10%
Retirement	$13,700	$37,000	$77,800	$65,900	$194,400	5%
Operating Expenses	$351,200	$160,700	$644,200	$582,900	$1,739,000	40%
Total	$589,200	$703,200	$1,756,800	$1,263,800	$4,313,000	100%

Current funding levels compared to national benchmarks

The National Recreation and Park Association tracks key indicators of an agency's financial health and efficiency which can guide agency staff to better meeting the important park and recreation needs of their community. The 2020 NRPA Agency Performance Review, presents an excellent collection of park and recreation benchmarks to gauge the level of investment the City of Montebello is currently making in its park and recreation system. While this is a good tool, it is not intended to be a set of national standards, but simply one way of evaluating available resources and financial performance. Unique park and recreation agencies across the United States (1,053) contributed by reporting their data. The review presents data for typical, similarly sized organizations as Montebello using ranges from low to high and the median data available.

Assumptions were made based on estimated minimal growth. As a result, the current population in 2020 of 62,053 was used for this analysis. The City's FY 20/21 adopted budget for expenses was used, although actuals for this FY are expected to vary due to the Pandemic. Revenues were from FY 2018/19 (pre-COVID-19 Pandemic).

Table II-C-4 below demonstrates several ways to gauge the efficiency and financial health of the department. Below is an explanation and analysis of each of the key measurements.

Table II-C-4: Operating measurements compared to benchmarks

Operating Measurement	Montebello	Benchmark
Operating Expenditures per Capita	$76.41	$88.53
Full Time FTE (Equivalents) per 10,000 residents*	5.8	9.3
Revenues to Operating Expenditures	13.4%	28.2%
Residents per Park	5,641	2,523
Acres of Parkland per 1,000 residents	1.3**	7.7
Distribution of Funds within the Department	Administration/ Other – 22%, Recreation – 44%, Operations – 32%.	Administration/ Other – 13%, Recreation – 43%, Operations – 44%.
Operating Expenditures per Acre of park land	$15,043	$7,891

Operating Expenditures per FTE	$48,305	$91,080
Per Capita Revenues from Recreation	$8.48***	$21.97

*Includes part-time staff hours along with full-time positions
**Standard recommended at 4.0 acres per 1,000
*** Data used from 2018/19 – pre-Covid-19 Pandemic

Operating expenses per capita
This measures the investment per resident made by the City. The range of operating expenses per capita is from $52.91 to $156.90 for typical agencies that serve a population similar to Montebello. The investment of $76.41 is lower than what a typical agency would spend for a high-quality parks and recreation program. Because revenues are also on the low side of what a typical agency recovers, opportunities for program expansion, creative and novel programs are limited without additional funding. Staff workload is also adversely affected as was reported in the staff and public input process. An increase in budgeted resources of approximately 15% is needed to bring the Department to the investment a typical agency makes.

Full Time FTE (equivalents) per 10,000 residents
Typical agencies employ a range from 4.5 FTE on the lower quartile to 17.2 FTE per 10,000 residents on the upper quartile. The median is 9.3 FTE per 10,000 residents. Montebello's FTE per 10,000 residents of 5.8 is low, affecting workloads. Approximately $360,000 is allocated during a typical year for part time and seasonal, hourly employees. A factor of $20.00 per hour was estimated, leading to an additional 9 FTE. An additional increase of approximately $150,000 to $200,000 and an additional $60,000 in associated payroll costs for PT labor is recommended to bring the department close to the median.

Revenues to operating expenditures
Comparing revenues to direct operating expenditures is one way to evaluate the efficiency of the organization by looking specifically at cost recovery. Typical agencies recover 13.7% on the lower quartile to 49.7 on the higher quartile. Montebello's total cost recovery of 13.4% suggests either a need to expand revenues or decrease expenditures. In this case, this percentage is more likely tied to lower revenues. An increase in revenues of over $600,000 per year would bring the department close to the median which seems impractical in the near term given the economic issues related to the Pandemic.

Residents per park
Residents per park measures the density of park use and thus the quality of the park experience. Currently, the density in Montebello is 5,641 residents per park. Typical agencies provide parks that range from 1,560 residents per park to 4,518 residents per park. Additional park space is needed to reduce the density and subsequent unit costs of park maintenance tasks.

Acres of park space per 1,000 residents
This measure addresses access to available park space. Currently, the City provides 1.3 acres per 1,000 and a goal is recommended in this plan of 4 acres per 1,000. This measure suggests a need in the future to acquire and operate ~168 acres of additional park space.

Table II-C-5 Park Acreage by Category

Park Category	Size	Acres
Mini Parks	< 2 acres	3.05
Neighborhood Park	<2- 8 acres	37.45
Community Parks + Center	> 8 acres	38.71
Special Use + Regional Park		45.86
Total		125.08

The City's need to increase available park space, as well as decrease the density of use suggests a substantial investment in operating and maintenance costs.

The additional annual operating costs associated with an additional ~168 acres of park land is $2,539,107 at current costs. This assumes a similar make up of mini-parks, neighborhood and community parks, and special use/regional parks. Maintenance and operating costs are typically greater, the smaller the park as efficiencies gained for maintaining large spaces may be lost.

Distribution of funds within the Department

The distribution of funds to administration and recreation divisions, and park operations within the Department is very close to other typical agencies. The differences noted, are accounted for by liability insurance payments debited to administration and not allocated to recreation or operations.

Operating expenditures per acre

The amount executed ($15,953 per acre of park land) to maintain and operate the parks may be related to higher density of use and thus higher labor costs to maintain the parks in a safe, clean and green manner. The diminutive park acreage in the city may eliminate efficiencies gained in larger systems. A typical system may expend between $4,378 per acre on the low end and $20,494 per acre on the high end. Montebello's operating expenditures per acre is healthy and appears reasonable. The 20/21 budget is 9 percent less than was spent in FY 2017/18 for park maintenance.

Operating Expenditures per FTE

This measures the relationship between full-time equivalent positions and department expenditures. The typical agency falls into a range from $69,870 to $120,727 with the median being $91,080. Montebello allocates only $48,305, close to 53% of the median. This limits opportunities for additional creative and novel programs.

Per Capita Revenues from Recreation

A typical department receives between $7.53 and $62.92 per capita. Montebello receives only $8.48 which suggests the Department may be underperforming in the area of revenue generation.

Key Findings

- The Department is generally underfunded in recreation but adequately funded for park maintenance in comparison to other typical agencies and should consider increasing funding if expansion of programs is desired.
- The consensus among recreation staff is that they do a lot with very little. This is confirmed in the financial analysis.
- The Department operates with approximately 9 FTE, less than what a typical agency would have, creating workload concerns among staff.
- Revenues are on an upward trend, increasing 16% from FY 2016/17 to FY 2020/21. Still, the Department should continue to focus on opportunities for revenue generation, sponsorships, etc. This will need to be accomplished concurrently with any increase in the level of services offered.
- Operating expenses have increased 24% from FY 2016/17 to FY 2020/21. This significant increased may have been a result of minimum wage increases and costs associated with California's public employee retirement system.
- The Department should always ensure funding is approved for operations and maintenance when projects are approved.

Current LOS that can be supported by existing funding

Funding for maintenance and operations for the current LOS of 1.3 acres per 1,000 residents appears practical and reasonable as growth is limited. The population estimates in 2030, suggest Montebello will support 64,575 residents and a subsequent need for an additional 10.08 acres of park space resulting in $160,806 in additional annual maintenance costs. To remain above the national median for funding per acre of park land, the current budget would support the current LOS until the population reaches 120,000 which is not likely in the not-so-distant future.

Table II-C-6 Investment per Acre of Park Land

A.	Future Population	120,000
B.	LOS	1.3 acres per 1,000
C.	Current Budget	$1,263,800
D.	National Median	$7,891
E.	Acres of new parkland needed to support future population	A/1,000*B= 156 acres
F.	C/E	$8,096

Accepting deficiencies within the funding source limits

If the City reaches its goal of 4 acres per 1,000 residents without additional resources, (248.21 acres not including the golf course acreage), the allocation for park maintenance would be $5,091.65, well below the national median. The Department may be faced with decisions regarding:

- Consolidation of maintenance routes – perhaps from 5 to 3
- Reduction of horticultural services
- Reduced turf maintenance, perhaps reducing contracted mowing schedules
- Allowing the parks to "go brown", discontinuing irrigation at all but the most important spaces where safety is a concern (sports fields)

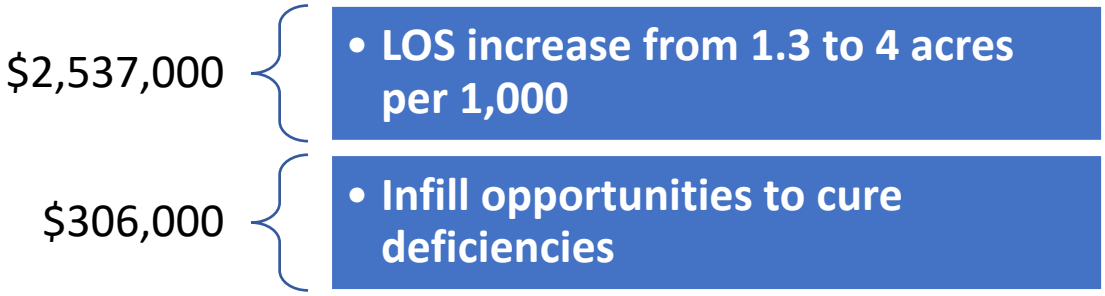
- Intermittent opening of restrooms
- Forgoing investments in sustainable assets such as electric cars

The long-term effects of a "thinning the soup" approach, typically results in deferred maintenance, reduced health of trees and other assets and a less than favorable experience for park users. It should be noted that residents have already voiced concerns over park maintenance in both the public engagement process and the needs assessment survey.

There are a number of opportunities to create efficiencies that include technology upgrades to irrigation systems, allowing additional areas in parks to become "natural areas" requiring less maintenance and sustainable technology that may help.

Meeting LOS and identifying funding needed to meet deficiencies

For purposes of operations and maintenance, the following ongoing, annual funding is required:



Alternative Funding

The City should consider and implement funding sources identified during this Master Plan update. The following provides a summary of most easily used (some are already in use) funding sources to assist with implementation for potential use by Montebello.

It would be beneficial for the City to continue to use and consider any new funding sources identified below to help increase the amount of funding for parks, open space and recreation and achieve the funding necessary to implement the recommendations included in this master plan. A detailed description of each item can be found in appendix II-D.

Traditional Tax and Exactions-Based Funding Resources

- Development Funding
- Development Impact Fees
- Local Improvement Districts
- Park Lands Dedication Ordinance

Traditional Earned Revenue Resources

- Fees and Charges
  - Daily Admission, Annual Pass Sales, and Vehicle Parking Permits
  - Registration Fees
  - Ticket Sales / Admission

Alternative Operations and Capital Loan Mechanisms

- Full Faith and Credit Bonds
- General Obligation Bonds
- Industrial Development Bonds
- Revenue Bonds
- Special Assessment Bonds

Alternative Service Delivery and Funding Structures

- Annual Appropriation / Leasehold Financing
- Commercial Property Endowment Model - Operating Foundation
- Inter-Local Agreements
- New Markets Tax Credit

Partnership Opportunities

- Montebello – San Gabriel YWCA/YMCA
- School Districts
- Medical Centers / Hospitals
- Kiwanis, Optimists, VFWs, Elks, Rotary, & other service / civic organizations
- Chamber of Commerce
- Convention and Visitor's Bureau
- Homeowner or Neighborhood Associations
- Youth Sports Associations
- Public Safety
- The Mexican American Opportunity Foundation
- Ashiya, Japan Sister City
- The Women's Club
- Adult Sports Associations
- Neighboring counties / cities
- Private alternative providers
- Churches (Rentals; Leases)
- Professional Sports (LA Kings) Teams/Organizations
- Amusement Parks (ex. Disney World)
- Senior Citizen Groups (AARP, Silver Sneakers)
- Shop Montebello
- The Latino Diabetes Association
- Commissioners
- Business Community
- The Montebello Historical Society

Community Resources

- Advertising Sales
- Corporate Sponsorships
- Grants
    - Facilities and Equipment Grants
    - General Purpose or Operating Grants
    - Management or Technical Assistance
    - Grants
    - Program-Related Investments
- Naming Rights
- Philanthropic
    - Conservancies
    - Foundations/Gifts
    - Friends Associations
    - Gift Catalogs
    - Volunteers / In-Kind Services
    - Adopt-A-Park or -Trail
- Land and Water Conservation Fund
- Fundraising/Crowdfunding
    - Matching Grants
    - Planning Grants
    - Private Grants and Philanthropic Agencies
    - Program or Support Grants
    - Seed Money or Start-Up Grants
    - Neighborhood Park Watch
    - Irrevocable Remainder Trusts
    - Life Estates
    - Maintenance Endowments
    - Raffling

- Recreational Trails Program (RTP)

Community Services Fees and Assessments

- Capital Improvement Fee
- Development Surcharge/Fee
- Franchise Fee on Cable
- Percent-for-Art Legislation
- Processing / Convenience Fee
- Recreation Service Fee
- Recreation Surcharge Fee on Sports and Entertainment Tickets, Classes, MasterCard, Visa
- Self-Insurance Surcharge
- Signage Fees

Contractual Services

- Cell Towers and Wi-Fi
- Concession Management
- Merchandising Sales or Services
- Private Concessionaires

Permits, Licensing Rights, and Use of Collateral Assets

- Agricultural Leases
- Booth Lease Space
- Catering Permits and Services
- Film Rights
- Land Swaps
- Leasebacks on Recreational Facilities
- Manufacturing Product Testing and Display
- Rental Houses and Buildings for Private Citizens
- Special Use Permits
- Subordinate Easements - Recreation / Natural Area Easements
- Surplus Sale of Equipment by Auction

Funding Resources and Other Options

- Enterprise Funds
- Land Trusts
- Positive Cash Flow
- Cost Avoidance
- State Park Funding Ideas

Cost Saving Measures

- Changing maintenance standards and practices
- Contract renegotiation
- Cost Avoidance

Green Trends and Practices

- Rooftop gardens and park structures
- Use light, water, and motion sensors
- Conduct energy audits
- Update to energy efficient ballasts, motors, appliances
- Use electric and hybrid vehicles
- Develop “Pack It Out” trash program
- Use greywater
- Use solar and wind energy
- Green operating practices

Administrative

- Recycle Office Trash
- Clean offices less frequently
- Go Paperless
- Conserve Resources
- Flex Scheduling
- Virtual Meetings

Operating Standards

- Preventative Maintenance
- Reduce Driving
- Eliminate Environmentally Negative Chemicals and Materials
- Purchase better equipment - less maintenance

Sustainable Stewardship

- Public Education
- Lead by Example
- Monitor and Report Results
- Incorporate Stewardship Principles in all Park and Recreation Services
- Seek Available Grant Funding and Initiative Awards
- Re-analyze and Revised Practices and Standards

SECTION II-D
Traditional & Alternative Funding Sources

Traditional Parks and Recreation Operations and Capital Development Funding Sources

There are a variety of mechanisms that local governments can employ to provide services and to make public improvements. Parks and recreation operating and capital development funding typically comes from conventional sources such as sales, use, and property tax referenda voted upon by the community, along with developer exactions. Operating funds are typically capped by legislation; may fluctuate based on the economy, public spending, or assessed valuation; and may not always keep up with inflationary factors. In the case of capital development, "borrowed funds" sunset with the completion of loan repayment and are not available to carry-over or re-invest without voter approval. Explained below are the salient points of traditional funding sources. Many of these strategies may be currently in use to some extent by your agency.

Traditional Tax and Exactions-Based Funding Resources

General or Operating Fund

Parks and recreation services are typically funded by an agency's General or Operating Fund, which can be comprised of property tax, sales tax, and other compulsory charges levied by a government for the purpose of financing services performed for the common benefit of a community. These funds may also come from resources such as inter-governmental agreements, reimbursements, and interest and may include such revenue sources as franchise taxes, licenses and permits, fees, transfers in, reserves, interest income, and miscellaneous other incomes.

Sin Tax

This revenue source often partially funds public park and recreation agencies and is derived from casinos, tobacco tax and/or marijuana tax (where legalized). Sin tax revenue is somewhat popular in many states (where it is legal) with high traffic tourism agencies and with cities, counties, and state parks. Special Districts many times cannot exact sin taxes, which often calls into question the issue of charging resident and non-resident fee differentials.

Development Funding

Development Impact Fees

Development impact fees are one-time charges imposed on development projects at the time of permit issue to recover capital costs for public facilities needed to serve new developments and the additional residents, employees, and visitors they bring to the community. State laws, with a few minor exceptions, prohibit the use of impact fees for ongoing maintenance or operations costs. Not all states allow the collection of impact fees.

Local Improvement Districts
Different from cities that are direct beneficiaries of these funds, Special Districts (or local improvement districts) are the beneficiaries of pass-through funding from cities or counties, which have responsibility for their interests. Special Districts cannot exact or collect the land dedication or the fee-in-lieu on their own.

Park Land Dedication Ordinance
Park land dedication requirements typically state that all residential subdivisions of land (and often commercial), with some exemptions, are to provide for parks by either dedicating land, paying an in-lieu fee (the amounts may be adjusted annually), or a combination of the two.

Traditional Parks and Recreation Earned Revenue Resources

Fees and Charges

Daily Admission and Annual Pass Sales or Vehicle Permits
Daily and annual pass fees can apply to regional parks and aquatics centers. The consultant team recommends consideration of bulk discount buying of daily admission fees marketed as "monthly, seasonal, 3-month, 6-month, and/or annual passes."

Registration Fees
This revenue source is for participating in programs, classes, activities, and events which typically require pre-registration to ensure a place. These services may or may not have limited space. These participant fees attempt to recover most if not all of the direct expenses and are often revenue positive due to market demand.

Ticket Sales/Admissions
This revenue source is for accessing facilities for self-directed or spectator activities such as splash parks, ballparks, and entertainment activities. Fees may also be assessed for tours, entrance or gate admission, and other activities, which may or may not be self-directed. These user fees help offset operational costs or apply to new projects.

Alternative Parks and Recreation Operations and Capital Development Funding Sources

Alternative funding sources include a variety of different or non-conventional public sector strategies for diversifying the funding base beyond traditional tax-based support. The following is a list of known industry funding practices, potential sources, and strategies, as compiled by GreenPlay. Some of the strategies may currently be used by your agency, but may not be used to maximum effectiveness or capacity. Those that may not currently be used by your agency should be considered for a project's or the operation's specific relevance.

NOTE: *Not every funding mechanism on this list may be allowable by law, as the laws, regulations, statutes, ordinances, and systems of governance vary from city to city, county to county, and state to state. The authority to put forth referenda or institute exactions must be researched for validity within your city and your state, as this list is comprised of the financial practices from across the nation. Some referenda are passed by simple majority of those who vote, while others require a larger percentage to pass. In certain circumstances, referenda are passed by the majority of eligible voters versus just those who vote.*

Loan Mechanisms

Full Faith and Credit Bonds

Bonds that are payable from the general resources of the agency. They are not tied to a specific revenue source, but the payment of principle and interest uses available operating funds.

General Obligation Bonds

Bonded indebtedness issued with the approval of the electorate for capital improvements and general public improvements.

Alternative Service Delivery and Funding Structures

Your agency may already be using some of these strategies.

Annual Appropriation/Leasehold Financing

This is a more complex financing structure that requires use of a third party to act as an issuer of the bonds who would construct the facility and retain title until the bonds are retired. For example, an agency can enter into a lease agreement with the third party with annual lease payments equal to the debt service requirements. The bonds issued by the third party are considered less secure than general obligation bonds of an agency and are therefore more costly. Since a separate corporation issues these bonds, they do not impact an agency's debt limitations and do not require a vote. However, they also do not entitle an agency to levy property taxes to service the debt. The annual lease payments must be appropriated from existing revenues.

Commercial Property Endowment Model – Operating Foundation

John L. Crompton[1] discusses government using the Commercial Property Endowment Model citing two case studies in the United Kingdom and Mission Bay Park in San Diego, California as an alternative structure to deliver park and recreation services. A non-profit organization may be established and given park infrastructure and/or land assets to manage as public park and recreation services along with commercial properties as income-earning assets or commercial lease fees to provide for a sustainable funding source. This kind of social enterprise is charged with operating, maintaining, renovating, and enhancing the public park system and is not unlike a model to subsidize low-income housing with mixed-use developments.

[1] Spring 2010 *Journal of Park and Recreation Administration*, Volume 28, Number 1, pp 103-111

Inter-local Agreements
Contractual relationships could be established between two or more local units of government and/or between a local unit of government and a non-profit organization for the joint usage/development of sports fields, regional parks, or other facilities.

Partnership Opportunities

Partnerships are joint development funding sources or operational funding sources between two separate agencies, such as two government entities, a non-profit and a government agency, or a private business and a government agency. Two partners jointly develop revenue producing park and recreation facilities and share risk, operational costs, responsibilities, and asset management based on the strengths and weaknesses of each partner.

Creating synergy based on expanded program offerings and collaborative efforts can be beneficial to all providers as interest grows and people gravitate to the type of facility and programs that best suit their recreational needs and schedules. Potential strategic alliance partnerships where missions run parallel, and mutually beneficial relationships can be fostered and may include the following:

- YMCA
- School Districts
- Medical Centers or Hospitals
- Kiwanis, Optimists, VFWs, Elks, Rotary, and other service and civic organizations
- Chamber of Commerce
- Convention and Visitor's Bureau
- Homeowner or Neighborhood Associations
- Youth Sports Associations
- Adult Sports Associations
- Neighboring counties/communities
- Private alternative providers
- Churches
- Professional Sports Teams/Organizations
- Amusement Parks (example Disney World)
- Senior Citizen Groups (AARP, Silver Sneakers)

Community Resources

The following subsections summarize research findings on potential funding sources that could enhance capital expenditures for capital repair, renovation, and new construction and operating budgets for an agency. These findings do not recommend any particular funding strategy over another. The economic conditions within the service area may vary with time, and your agency should explore the best means of achieving its goals toward the operations of the agency, the programs, and the facilities on an ongoing basis.

Advertising Sales

Advertising sales are a viable opportunity for revenue through the sale of tasteful and appropriate advertising on items such as program guides, scoreboards, dasher boards, and other visible products or services. This could be a viable strategy in the future if appropriate opportunities present themselves, such as the acquisition of scoreboards, etc. Current sign codes should be reviewed for conflicts or appropriate revisions.

Corporate Sponsorships

An agency can solicit this revenue-funding source itself or work with agencies that pursue and use this type of funding. Sponsorships are often used for programs and events where there are greater opportunities for sponsor recognition (greater value to the sponsor).

Fundraising

Many park and recreation agencies have special fundraisers on an annual basis to help cover specific programs and capital projects. This can include selling bricks, benches, pavers, tiles, and commemorative tree plantings, etc.

Crowdfunding

Crowdfunding is the practice of funding a project or venture by raising many small amounts of money from a large number of people, typically via the Internet. Park and Recreation agencies are beginning to incorporate crowdfunding efforts alongside traditional fundraising strategies. NRPA has implemented a Fund Your Park crowdfunding platform. It's free to members, donations are tax deductible and you have all the support you need from NRPA staff. *Source: Kara Kish, MPA, CPRE, CPSI, article in Parks and Recreation Magazine, December 2015. www.NRPA.org*

Grants

Grants often supplement or match funds that have already been received. For example, grants can be used for program purposes, information technology infrastructure, planning, design, seed money, and construction. Due to their infrequent nature, grants are often used to fund a specific venture and should not be viewed as a continuous source of funding.

Facilities and Equipment Grants

These grants help buy long-lasting physical assets, such as a building. The applicant organization must make the case that the new acquisition will help better serve its clients. Fund providers considering these requests will not only be interested in the applicant's current activities and financial health, but they will also inquire as to the financial and program plans for the next several years. Fund providers do not want allocate resources to an organization or program only to see it shut down in a few years because of poor management.

General Purpose or Operating Grants

When a grant maker gives an operating grant, it can be used to support the general expenses of operating. An operating grant means the fund provider supports the overall mission and trusts that the money will be put to good use. Operating grants are generally much harder to procure than program or support grants.

Management or Technical Assistance Grants

Unlike most project grants, a technical assistance grant does not directly support the mission-related activities of an agency. Instead, they support management or administration and the associated fundraising, marketing, and financial management needs.

Program-Related Investments (PRIs)—In addition to grants, the Internal Revenue Service allows foundations to make loans—called Program-Related Investments (PRIs)—to nonprofits. PRIs must be for projects that would be eligible for grant support. They are usually made at low or zero interest. PRIs must be paid back to the grant maker. PRIs are often made to organizations involved in building projects.

Matching Grants

Many grant makers will provide funding only on the condition that an amount equal to the size of the grant can be raised from other sources. This type of grant is another means by which foundations can determine the viability of an organization or program.

Planning Grants

When planning a major new program, an agency may need to spend a good deal of time and money conducting research. A planning grant supports this initial project development work, which may include investigating the needs of constituents, consulting with experts in the field, or conducting research and planning activities.

Private Grant and Philanthropic Agencies

Many resources are available which provide information on private grant and philanthropic agency opportunities. A thorough investigation and research on available grants is necessary to ensure mutually compatible interests and to confirm the current status of available funding. Examples of publicly accessible resources are summarized below.

- Information on current and archived Federal Register Grant Announcements can be accessed from The Grantsmanship Center (TGCI) on the Internet at: http://www.tgci.com.
- Another resource is the Foundation Center's RFP Bulletin Grants Page on Health at: http://foundationcenter.org.
- Research www.ecivis.com for a contract provider of a web-based Grants Locator system for government and foundation grants specifically designed for local government.

Program or Support Grants

A program or support grant is given to support a specific or connected set of activities that typically have a beginning and an end, specific objectives, and predetermined costs. Listed below are some of the most common types of program or support grants:

Seed Money or Start-up Grants

These grants help a new organization or program in its first few years. The idea is to give the new effort a strong push forward, so it can devote its energy early on to setting up programs without worrying constantly about raising money. Such grants are often for more than one year, and frequently decrease in amount each year.

Land and Water Conservation Fund

This fund was reauthorized by Congress in December in 2019. Generally the funding allocated to states is (through the State and Local Assistance Program) for outdoor recreation land acquisition and facility development is anticipated to rise. Every state runs their State and Local Assistance Program in a slightly unique manner, so we encourage any municipal or county parks personnel interested in LWCF to contact their LWCF State Liaison Officer (typically someone at a state's department of fish and game, environmental protection, or conservation and recreation) for more information.

Naming Rights

Many agencies throughout the country have successfully sold the naming rights for newly constructed facilities or when renovating existing buildings. Additionally, newly developed and renovated parks have been successfully funded through the sale of naming rights. Generally, the cost for naming rights offsets the development costs associated with the improvement. People incorrectly assume that selling the naming rights for facilities is reserved for professional stadiums and other high profile team sport venues. This trend has expanded in recent years to include public recreation centers and facilities as viable naming rights sales opportunities.

Naming rights can be a one-time payment or amortized with a fixed payment schedule over a defined period of time. During this time, the sponsor retains the "rights" to have the park, facility, or amenity named for them. Also during this time, all publications, advertisements, events, and activities could have the sponsoring group's name as the venue. Naming rights negotiations need to be developed by legal professionals to ensure that the contractual obligation is equitable to all agents and provides remedies to change or cancel the arrangements at any time during the agreement period.

Philanthropic

Philanthropy can be defined as the concept of voluntary giving by an individual or group to promote the common good and to improve the quality of life. Philanthropy generally takes the form of donor programs, capital campaigns, and volunteers/in-kind services.

The time commitment to initiate a philanthropic campaign can be significant. If an agency decides to implement a capital fundraising campaign and current resources that could be dedicated to such a venture are limited, it may be recommended that the agency outsource some or most of this task to a non-profit or private agency experienced in managing community-based capital fundraising campaigns. Capital campaigns should be limited to large-scale capital projects that are desired by the community but for which dedicated funding is not readily available.

Foundation/Gifts

These dollars are received from tax-exempt, non-profit organization. The funds are private donations in promotion of specific causes, activities, or issues. They offer a variety of means to fund capital projects, including capital campaigns, gifts catalogs, fundraisers, endowments, etc.

Friends Associations

These groups are typically formed to raise money for a single purpose that could include a park facility or program that will benefit a particular special interest population or the community as a whole.

Gift Catalogs
Gift catalogs provide organizations the opportunity to let the community know what their needs are on a yearly basis. The community purchases items from the gift catalog and donates them to an agency.

Volunteer Programs/In-Kind Services
This revenue source is an indirect source in that persons donate time to assist an agency in providing a product or service on an hourly basis. This reduces cost in providing the service, plus it builds advocacy for the system. To manage a volunteer program, an agency typically dedicates a staff member to oversee the program for the entire agency.

Adopt-a-Park/Adopt-a-Trail
Programs such as adopt-a-park may be created with and supported by the residents, businesses, and/or organizations located in the park's vicinity. These programs allow volunteers to actively assist in improving and maintaining parks, related facilities, and the community in which they live.

Neighborhood Park Watch
As a way to reduce costs associated with vandalism and other crimes against property, an agency may consider a neighborhood park watch program. This program develops community ownership of an agency's facilities.

Gifts in Perpetuity

Irrevocable Remainder Trusts
These trusts are set up with individuals who typically have more than a million dollars in wealth. They will leave a portion of their wealth to an agency in a trust fund that allows the fund to grow over a period of time and then is available to use a portion of the interest to support specific park and recreation facilities or programs that are designated by the trustee.

Life Estates
This revenue source is available when someone wants to leave their property to an agency in exchange for their continued residence on the property until their death. An agency can usually use a portion of the property for park and recreational purposes, and then use all of it after the person's death. This revenue source is very popular for individuals who have a lot of wealth and their estate will be highly taxed at their death. Their benefactors will have to sell their property because of probate costs. Life Estates allow individuals to receive a good yearly tax deduction on their property while leaving property for the community. Agencies benefit because they do not have to pay for the land.

Maintenance Endowments
Maintenance Endowments are set up for organizations and individuals to invest in ongoing maintenance improvements, and infrastructure needs of specific/targeted facilities. Endowments retain money from user fees, individual gifts, impact fees, development rights, partnerships, conservation easements, and for wetland mitigations.

Raffling
Some agencies offer annual community raffles, such as purchasing an antique car that can be raffled off in contests.

Community Service Fees and Assessments

Capital Improvement Fees
These fees are on top of the set user rate for accessing facilities such as sport and tournament venues and are used to support capital improvements that benefit the user of the facility.

Development Surcharge/Fee
Some agencies have added a surcharge on every transaction, admission, or registration to generate an improvement or development fund.

Franchise Fee on Cable
This would allow an agency to add a franchise fee on cable designated for parks and recreation. The normal fee is $1.00 a month or $12.00 a year per household. Fees usually go toward land acquisition or capital improvements.

Percent-for-Art Legislation
Percent-for-art legislation dedicates a percentage (usually .5 to 2) of publicly funded capital improvement projects (CIP) for art in public places, usually in, on, or adjacent to the project, building, or park being constructed or improved. This guarantees funding for public art projects and that public art projects will be planned with each new improvement. This can also be conceived as an Art-in-the-Park program.

Processing/Convenience Fees
This is a surcharge or premium placed on electronic transfers of funds, automatic payments, or other conveniences.

Recreation Service Fee
The Recreation Service Fee is a dedicated user fee that can be established by a local ordinance or other government procedure for the purpose of constructing and maintaining recreation facilities. The fee can apply to all organized activities that require a reservation of some type, or other purposes as defined by an agency. Examples of such generally accepted activities that are assigned a service fee include adult basketball, volleyball, and softball leagues; youth baseball, soccer, and softball leagues; and special interest classes. The fee, above and beyond the user fee, allows participants to contribute toward the construction and/or maintenance of the facilities being used.

Recreation Surcharge Fees on Sports and Entertainment Tickets, Classes, MasterCard, Visa
This fee is a surcharge on top of the regular sports revenue fee or convenience fee for use of MasterCard and Visa. The fee usually is no more than $5.00 and is usually $3.00 on all exchanges. The money earned would be used to help pay off the costs of improvements or for operational purposes.

Self-Insurance Surcharge
Some agencies have added a surcharge on every transaction, admission, or registration to generate a self-insured liability fund.

Signage Fees
This revenue source charges people and businesses with signage fees at key locations with high visibility for short-term events. Signage fees may range in price from $25-$100 per sign based on the size of the sign and location.

Contractual Services

Cell Towers and Wi-Fi
Cell towers sited in strategic park locations are another potential source of revenue that an agency may consider. Typically, agencies engage in this service as a means of enhancing overall operational cost recovery.

Another type of revenue for a facility or complex can come from providing sites for supporting Wi-Fi technology. In California, the State Park System is providing wireless internet access and is charging $7.95 for 24 hours of connectivity (approximately $.33 per hour) within its service area. They have connected 85 state parks with SBC Communications. For more information, contact California State Parks at www.parks.ca.gov. [2015/16 update: It is unclear whether CA is still charging for this service; this is being further researched]

Concession Management
Concession management is the retail sale or rental of soft goods, hard goods, or consumable items. Through contracting, the agency either receives a percentage of the gross sales or the net revenue dollars from the revenue above direct expenses. Net proceeds are generally more difficult to monitor.

Merchandising Sales or Services
This revenue source comes from the public or private sector on resale items from gift shops, pro-shops, restaurants, concessions, and coffee shops for either all of the sales or a defined percentage of the gross sales. Typically, agencies engage in this type of service as a convenience to their patrons and as a means of enhancing overall operational cost recovery.

Private Concessionaires
Contracts with private sector concessionaires provide resources to operate desirable recreational activities. These services are typically financed, constructed, and operated by a private business or a non-profit organization with additional compensation paid to an agency.

Permits, Licensing Rights and Use of Collateral Assets

Agricultural Leases
In some agency parks, low land property along rivers, or excess land may be leased to farmers for crops.

Booth Lease Space
Some agencies sell booth space to sidewalk vendors in parks or at special events for a flat rate or based on volume of product sold. The booth space can also be used for sporting events and tournaments.

Catering Permits and Services
This is a license to allow caterers to work in the system on a permit basis with a set fee or percentage of food sales returning to the agency. Also, many agencies have their own catering service or an authorized provider list and receive a percentage of dollars from the sale of food.

Filming Rights
Many agencies issue permits so that park sites may be used for commercial film and photography activities. The production company pays a daily fee for the site plus the loss of revenue the agency would incur during use of the community space.

Land Swaps
An agency may trade property to improve access or protection of resources. This could include a property gain by the agency for non-payment of taxes or a situation where a developer needs a larger or smaller space to improve its profitability. The agency would typically gain more property for more recreation opportunities in exchange for the land swap.

Leasebacks on Recreational Facilities
Many agencies do not have adequate capital dollars to build desired revenue-producing facilities. One option is to hire a private investor to build the facility according to the specifications requested with the investment company financing the project. An agency would then lease the property back from the investor over 20+ years. This can be reversed whereby an agency builds the facility and leases to a private management company who then operates the property for a percentage of gross dollars to pay off the construction loans through a subordinate lease.

Manufacturing Product Testing and Display or Research
An agency may work with specific manufacturers to test their products in a park, recreation facility, or in a program or service. The agency may test the product under normal conditions and report the results back to the manufacturer. Examples include lighting, playground equipment, tires on vehicles, mowers, irrigation systems, seed & fertilizers, etc. The agency may receive the product for free but must pay for the costs of installation and for tracking results. Research Fees may be charged to allow research to occur on park lands or related to equipment used at Parks. Companies may pay to have their equipment installed and tested to prove durability and user satisfaction. Product Placement fees may also be an option – having a company not only donate their equipment but also pay a fee to have their equipment used at a public facility.

Rentals of Houses and Buildings by Private Citizens
Many agencies will rent out facilities such as homes to individual citizens for revenue purposes.

Special Use Permits
Special permits allow individuals to use specific park property for financial gain. The agency receives either a set amount of money or a percentage of the gross service provided.

Subordinate Easements – Recreation/Natural Area Easements
This revenue source is available when an agency allows utility companies, businesses, or individuals to develop some type of an improvement above ground or below ground on its property. Subordinate easements are typically arranged over a set period of time, with a set dollar amount that is allocated to the agency on an annual basis.

Surplus Sale of Equipment by Auction
Agencies often have annual surplus auctions to get rid of old and used equipment, generating additional income on a yearly basis.

Enterprise Funds

These funds establish business units that are self-sustaining through fees and charges. Debt service and all indirect costs should be allocated or attributed to enterprise funds. Any excess revenue generated is maintained by the fund for future needs and cannot be used by another fund or department. Examples include premier sports tournament complexes.

Other Options

Land Trusts
Many agencies have developed land trusts to help secure and fund the cost of acquiring land that needs to be preserved and protected for greenway purposes. This may also be a good source for the acquisition of future lands.

Positive Cash Flow
Depending on how aggressively an agency incorporates marketing and management strategies, there may be a positive fund balance at the end of each year. While current facilities, projections, and fee policies do not anticipate a positive cash flow, the climate can change. The ending positive balance could be used, for example, to establish a maintenance endowment for agency recreation facilities, to set aside funds for capital replacement and/or repair, or to generate a fund balance for contingency or new programming opportunities.

Cost Saving Measures

In addition to aligning cost recovery with goals, charging appropriate fees, and using traditional and alternative funding mechanisms, several cost saving measures can improve the overall cost recovery picture for an agency.

Change Maintenance Standards/Practices

- Add one extra day onto the mowing interval; thus reducing the amount of mowing in a season.
- Evaluate and determine actual maintenance needs and schedules for upkeep of different facilities and landscape features/types. Based on needs, evaluate resource needs (equipment, staff, etc.) and production rates of staff/equipment for the system's regularly occurring maintenance work and prioritize maintenance program needs, schedules and relevant resource allocations.
- Consider turf management strategies by turf use/wear – high intensity use and maintenance needs (such as sports fields) versus low intensity use areas such as lawns along the edge of a woodlot or roadway – there are usually areas of turf that are regularly maintained because "they have always been mowed"; by changing the maintenance strategy to not mowing or not regularly mowing such areas, less time/resources need to be dedicated to mowing overall.
- Naturalizing areas of lawn where you don't need lawn is a "going green" type of practice that also reduces maintenance needs/costs.
- Buildings/Facilities
    - Evaluate needs and consider in-house versus contracted maintenance workers for different needed services/trades.
    - Standardize equipment, fixtures, and relevant materials.
    - Are some facilities in such disrepair that continuing to throw limited funding on "band-aids" no longer practical?
    - In designing new facilities, are simple sustainability factors being vetted (such as orienting the building to maximize solar gain to reduce lighting and heating costs)?
- Add energy efficient fixtures, low flow water fixtures, eliminate throw away products like paper towels and replace with energy efficient hand dryers.
- Strategically locate trash and recyclable containers to reduce cost of having staff empty these and spend time picking up trash/recyclables that are not properly placed by patrons.
- Reduce cleaning frequency of office spaces and centralize trash and recyclables into one location in employee work areas to save on costs of related to housekeeping.
- Consider having staff complete multiple tasks at the same time – emptying recyclables and trash at the same time as doing rounds or inspections.
- Educate users to better utilize existing facilities and resources to cut down costs – clean up after themselves.
- Equipment and Supplies
    - Purchase better equipment that last longer and requires less maintenance – saving money on the front end does not always result in cost savings overall.
    - Standardize equipment (such as vehicles, grounds equipment and tools, etc.) as a way to increase efficiency in training staff to use it, and as a means to simplify and reduce costs associated with parts inventory and maintenance/repair programs (ex. Mechanic places one order for 10 air filters for 1 type of lawnmower and gets bulk price from one vendor, versus ordering 10 different filters for 10 different mowers, from multiple vendors and keeping track of it all)
    - Consider leasing vehicles or other heavily used equipment - it can be more cost effective for an organization to lease vehicles or equipment and rotate their fleet regularly versus allocating resources to maintain and repair aging fleets of old, well used vehicles/equipment that have higher likelihood of breakdowns and associated loss of production time.

- Use volunteers to assist with housekeeping and maintenance.
- Solicit in-kind donation of time and services in exchange for maintenance assistance

Contract Re-negotiate or Re-bid

At every opportunity, review contracts to assure you are not paying more than you have to, or are receiving the maximum amount of revenue possible.

Cost Avoidance

An agency must maintain a position of not being everything for everyone. It must be driven by the market and stay with its core businesses. By shifting roles away from being a direct provider of facilities, programs, or services, an agency may experience additional savings. This process is referred to as *cost avoidance*. The estimated savings could be realized through partnering, outsourcing, or deferring to another provider in the provision of a service and/or facility. One example is purchasing in bulk.

Greening Trends

Rooftop Gardens and Park Structures

Rooftop gardens create respites in a densely built environment and help reduce the urban heat island effects. In addition, the lack of availability and affordability of urban real estate has continued the trend of parks built over structures such as parking garages and other structures.

Green Practices

- Use light, water, and motion sensors
- Conduct energy audits
- Update to energy efficient ballasts, motors, appliances
- Use electric and hybrid vehicles
- Develop “Pack It Out” trash program
- Use greywater
- Use solar and wind energy
- Implement green operating practices

Many agencies miss the easiest green practices in their everyday operating procedures and policies. These include administrative procedures, best operating standards, and sustainable stewardship performance measures. Many of the industry best practices outlined below (***Table 1***) may be currently and successfully employed by your agency.

Table 1: Green Practices Focus Area and Action Step

Focus Area	Action Step
Administrative	• Recycle Office Trash (consolidate trash and recyclables to one common location – reduce cost to empty containers in each office) • Clean offices weekly instead of daily • Go Paperless • Conserve Resources • Flex Scheduling • Virtual Meetings

Operating Standards	• Preventative Maintenance • Reduce Driving • Eliminate Environmentally Negative Chemicals and Materials • Recycling in Parks • Purchase better equipment and supplies that require less maintenance and are more durable
Sustainable Stewardship	• Re-analyze and Revised Practices and Standards • Monitor and Report Results • Lead by Example • Public Education - agencies should lead by example teaching the public a little bit about what green practices actually are and how they might be able to incorporate some of the same features (maybe raingardens or LED lighting) in their own home to help conserve our shared natural resources. • Incorporate Stewardship Principles in all Park and Recreation Services • Seek Available Grant Funding and Initiative Awards

SECTION III-A
Outreach Plan

CITY OF MONTEBELLO

PARKS MASTER PLAN

Public Outreach Strategies Plan

In partnership with: ktua

April 2020 DRAFT

Parks Facilities Master Plan: Public Outreach Strategies Plan Overview

The City of Montebello (City) Park Facilities Master Plan (MPFMP) is a comprehensive planning effort that will provide a clear set of goals, policies, and objectives for the Recreation and Community Services Department. The MPFMP will include an extensive existing conditions inventory of all parks and facilities, an analysis on accessibility to and from park facilities, a community needs assessment, list of prioritized recommendations, assessments on funding, operations, and maintenance, and site-specific conceptual designs.

The City is committed to making the planning process a collaborative effort with the community, stakeholders, and staff. The City wishes to engage with people through a series of public workshops, surveys, online maps, and other meetings to gather the feedback for the MPFMP.

*There is a section dedicated to alternative forms of community engagement that can take place during the COVID-19 pandemic we're experiencing as of the writing of this outreach plan.

Target Audience

The target audience for the MPFMP is anyone that lives, works, or plays within the City's limits. This outreach plan outlines a diverse set of outreach strategies to ensure the planning process gathers feedback from people of all ages and demographic backgrounds. Additional emphasis will be placed on underserved communities that disproportionately lack easy and comfortable access to parks, open space, and other recreation facilities. The team will develop key messages and outreach strategies to gather feedback, paying particular attention to the Hispanic/Latino community. The team will also use the City's database of previous resident and stakeholder involvement to maximize outreach.

Community Outreach Plan Strategies and Materials

The following tasks will be completed during the development of the MPFMP:

1. Coordinate with City on compiling list of stakeholders;
2. Conduct City staff meetings;
3. Prepare flyers, hand-outs, and other community outreach announcements;
4. Create an ESRI Storymap for the MPFMP;
5. Distribute a statistically-valid survey;
6. Conduct three (3) citywide community workshops;
7. Conduct three (3) neighborhood-specific workshops; and
8. Compile public participation comments into a summary report.

A variety of outreach materials will be designed to maximize community engagement. Because of Montebello's diverse population, all outreach materials will be designed in both English and Spanish. Materials that will be created include:

» Flyers, post cards, and/or press releases

» Printed maps and surveys

» Online maps and surveys

» Interactive outreach exhibits

» Other as-needed workshop exhibits and presentations

Materials and announcements will be approved by the City at all times and will be posted to appropriate City and stakeholder communication outlets such as social media pages, City website and newsletters, mobile neighborhood apps, and the MPFMP's Story Map.

Project Branding

Project branding will be created for all outreach materials and presentations. The branding will be based on the City's official logo, including approved fonts and colors. A unique project logo will be used for all outreach materials to promote project familiarity throughout the planning process.

Project logo (draft)

Project colors (draft)

Project Surveys

The MPFMP will include a series of surveys that will provide the team both general and detailed understanding of the City's existing parks, facilities, and programs.

Post-Workshop Surveys

The Post-Workshop surveys will be designed to allow community members and stakeholders that were not available to attend a workshop an opportunity to provide feedback on the topics covered at the workshop. The surveys will be accessible through the MPFMP's Story Map. The Story Map will also provide access to workshop exhibits, presentations, and other related materials. Announcements through email-blasts and social media can will be made to remind people to participate in the survey.

All surveys and materials will be approved by the City prior to publishing online.

Statistically Valid Survey

The team recommends the use of a statistically valid survey because these results will provide a broader cross-section understanding of the community's needs and wants. While stakeholder meetings, focus groups, and public meetings allow the team to draw in interested parties and users, a statistically-valid survey is the only defensible source that provides feedback from people that may not necessarily use parks and recreation facilities.

The team will work with RRC Associates (RRC) to create a survey of three to four pages in length (including a cover letter) to be mailed to approximately 3,000 randomly selected households in the City. The survey will provide critical information in determining community values, satisfaction levels, needs and priorities, preferred marketing channels, level of awareness, current usage levels, and demographic information for long-range planning efforts. Citizens will be given the option of either completing the mailed survey form or accessing the survey online using an individual pass-code (included in the mailed survey) assigned to each household. RRC frequently uses this technique for parks, recreation, and community surveys and finds it to be effective in maintaining the random sample while also increasing response opportunities.

The team will ask questions about what types of programs, facilities, and services residents want in their parks and facilities. Questions regarding current level of usage, primary providers of services, alternative providers, quality and satisfaction levels with existing services and facilities, priorities, level of awareness of city-operated programs and facilities, and willingness to pay for new services and facilities will also be included.

To help improve response rates, the team will ask the City to assist with marketing and creating public awareness of the survey through media and other appropriate communication channels.

Once the survey is closed, RRC will compare the demographics of the statistically valid sample to that of the City (using U.S. Census Bureau American Community Survey 5-year estimates). If the two do not track closely, RRC will weight the invitation sample by key demographic variables to more closely match the demographic profile of Montebello. The results will be summarized and infographics will be created using the data received from the survey. This summary also includes comparing invitation sample results to those from the open link sample and evaluating results by other key items of interest such as location of residence, whether or not children are present in the household, and age of the respondent.

Online Map Survey

An interactive online map survey will also be made available to the public and stakeholders through the MPFMP's online Story Map website. This online map will allow users to navigate to the park or recreation facility they want to provide feedback on. A user will be able to drop a point and type their comments. This type of input provides the team a geo-referenced source of information that can be used for general understanding and analyses.

Community Workshops Types and Timeline

The MPFMP includes three (3) citywide community workshops and three (3) neighborhood-specific workshops throughout the planning process. The workshops can be designed in a few different styles to best match the needs of the City and community. The project team will complete the required six (6) workshops but can remain flexible through the planning process on the specific type of community workshops that will be conducted.

Standard Community Workshops

The project team can schedule three (3) standard community workshops to support the MPFMP. These community workshops will be scheduled at three appropriate milestones in planning process to help the team and the City make informed decisions. The first workshop will ask the community to comment on the project's vision, goals, existing conditions and issues, and the project's overall planning process. The information gathered at the first workshop will supplement the data collected during the team's inventory exercise for each park and facility.

The second workshop will concentrate on the level of service for population-based standards, the assessment of amenity needs and standards based on populations, and the verification of park and amenity prioritization. Possible solutions that should be considered for addressing all equity and park deficiencies will also be presented. Workshop activities and polling methods will be used to ascertain these solutions and to gauge these priorities.

The third workshop will center on the strategies for expanding, infilling or developing parks as well as adding amenities in existing or proposed parks. A series of key major recommendations will be presented and the public will have the opportunity to weigh in on these ideas at the workshop as well as through follow up surveys. Another end result of the workshop will be the prioritization of three new or redeveloped parks that will be taken into a subsequent phase of analysis and recommendations.

The team will prepare and provide all workshop-related materials such as a presentations, large-scale aerial maps, infographics, and other necessary exhibits. Furthermore, the team will coordinate with the City on identifying the three best locations for the workshops. For example, the workshops can take place at a centrally-located facility such as a library or community center to provide clarity in meeting location. Alternatively, the workshops can take place in two or three different locations to provide geographically equitable opportunities for the community.

The following summary describes two community workshop formats that may be used for the MPFMP.

Option 1: Open House with Presentation (1.5-2 hours)

» Fifteen minute presentation (typically ten minutes after the official start time of the workshop to account for people signing in, snacks, etc.).

→ Presentation will cover project goals, schedule, and workshop activities. Questions are answered once the presentation is complete and on a one-on-one basis to avoid any soapboxing from attendees.

→ Exhibits and tables will be available for comments and input.

» Attendees come and go as they feel necessary. Staff and KTUA are present to answer questions.

Pros: Less intimidating for attendees and allows them to provide comments however they wish. Does not require a time commitment to those that may just be passing by unless they want to see a presentation.

Cons: May not provide ample person-to-person interactions and discussions.

Option 2: Interactive Workshop (1.5-2 hours)

» Fifteen minute presentation (typically ten minutes after the official start time of the workshop to account for people signing in, snacks, etc.).

→ Presentation will cover project goals, schedule, and workshop activities. Questions are answered once the presentation is complete and on a one-on-one basis to avoid any soapboxing from attendees.

» Exhibits and tables will be available for workshop activities.

» Workshop includes 1 or 2 table top activities, to be determined with team and city.

Pros: Very interactive and social. Attendees leave knowing they had a direct impact on the project's goals.

Cons: Requires a larger time commitment for attendees. More staff needed for table facilitation.

Sample agenda below:

6:00-6:10	Sign in, snacks, meet and greet
6:10-6:25	Presentation
6:25-6:45	Activity #1 To be determined by City and project team. Each table facilitated by City and project team.
6:45-7:00	Each table reports back their finding to the group
7:00-7:20	Activity #2 To be determined by City and project team. Each table facilitated by City and project team.
7:20-7:35	Report back to the group
7:35-8:00	Attendees can continue to view exhibits or talk to City staff and KTUA one-on-one. This also allows extra time in case groups take a little longer to provide comments.

Special Event Pop-up Workshops

The MPFMP team can conduct pop-up workshops at established community festivals, high-attendance events, or at community-based locations to gather input from those who would not necessarily attend standard community workshops. Having team members present at a community event is a great opportunity to directly interact with residents and to collect hundreds of comments or surveys.

**Detailed information on potential pop-up workshops will be provided once COVID-19 Federal, State, or regional health guidelines on social gatherings are lifted.*

Potential Design Workshop Schedule

The following workshop schedules are suggestions on where and when to host workshops. Actual locations and times will be determined with City staff.

Combination #1: Standard Workshops at Same Location

Event Name	Date	Time	Location
Workshop #1	TBD	TBD	TBD
Workshop #2	TBD	TBD	TBD
Workshop #3	TBD	TBD	TBD

Combination #2: Standard Workshops at Different Locations

Event Name	Date	Time	Location
Neighborhood Workshop #1	TBD	TBD	TBD
Neighborhood Workshop #2	TBD	TBD	TBD
Neighborhood Workshop #3	TBD	TBD	TBD

Stakeholder Outreach

Stakeholder outreach will be based on individuals or groups, both at the City and resident level, related to parks, recreation, open space, recreation, transportation, and land use planning. Communication will include a combination of interviews, focus group meetings, and general online announcements.

Our team will support Greenplay in conducting focus group meetings with appropriate stakeholders. These focus group meetings will allow Greenplay to gather detailed feedback on specific topics such as programs, maintenance and operations, staffing levels, etc. The feedback received from these group meetings will be summarized and used to help develop project recommendations and priorities.

The team will also ask stakeholders to help promote community workshops and other project announcements by distributing notices via their websites, text message listservs, and/or social media forums.

Potential Stakeholders:

- Montebello Recreation and Community Services Department
- Montebello Planning and Community Development Department
- Montebello Public Works Department
- Montebello Transportation Department
- Montebello Planning Commission
- Montebello Culture and Recreation Commission
- Montebello Youth Commission
- All school districts serving Montebello
- Local sport leagues
- Special interest organizations

City Responsibilities

The City of Montebello will be responsible for following tasks:

» Contact information for stakeholders
» Workshop room reservations and billing
» Social media announcements via City Events calendar
» Community meeting announcements via City Events calendar
» Host MPFMP Story Map website that will include outreach materials
» Mail and collect statistically valid workshop notices
» Food and drinks for workshops (if needed)

Project Team Responsibilities

KTUA will be responsible for the following tasks:

» Develop outreach materials such as flyers, fact sheets, sign in sheets, workshop exhibits, maps etc.
» Contact and schedule stakeholder focus group meetings
» Develop messages for project announcements and newsletters
» Participate and conduct all community workshops
» Provide a community and stakeholder summary at the conclusion of all outreach events.

Contingency Plans Addressing COVID-19 Pandemic

The City's and the team's priority above all is the safety and welfare of the community they represent and work with. The spread of the COVID-19 coronavirus and the pandemic the world is in right now is triggering necessary safety measures regarding public gatherings of any size. As of the writing of this engagement plan, State and local regulations have prohibited all social gatherings of more than 10 people. Discussions will need to take place with the City to decide on how to complete all in-person public engagement for the MPFMP. Public engagement will have to either be paused or shifted to online until it is deemed safe to conduct in-person workshops.

Alternative methods for meaningful community engagement through online tools can be considered to keep the MPFMP moving forward. While nothing can replace in-person engagement, the following strategies and tools can be utilized to gather the feedback needed for the planning process.

Online tools

» GoToMeeting and GoToWebinar
» SurveyMonkey
» ConstantContact
» Esri Story Map and Online Interactive Maps
» Mentimeter
» Facebook Live
» Youtube Live

Strategies: How to use these tools

The MPFMP's scope of work includes six (6) community workshops and several stakeholder meetings/interviews. The KTUA team recommends a combination of the tools listed above if the City wishes to complete these tasks during the COVID-19 health crisis. The following section includes proposed strategies for stakeholder and community engagement.

City Staff / Stakeholder / Focus Group Engagement

The scope of work includes a 2-day period for our planning team to conduct in-person stakeholder interviews that may include key decision makers, staff, partners, and special user group leaders. To complete this task, our team recommends the following:

1. Create an online **Surveymonkey** survey that includes the questions that would have been asked during the in-person interviews.
2. Online survey would be disseminated to appropriate stakeholders.
3. Stakeholders would have two weeks to complete the survey.
4. Team will collect and summarize the responses.
5. Team will schedule **GoToMeetings** and/or **GoToWebinars** to virtually engage with stakeholders.
6. Greenplay and KTUA will lead online discussions based on the input collected from the surveys .
7. Repeat virtual meetings as-needed to manage group sizes and to engage in meaningful discussions.

Additional Notes:

» **GoToWebinar** will be used if a stakeholder meeting exceeds 20 attendees

» Stakeholder and focus group feedback will be used to develop the questions for the MPFMP's statistically valid survey

» Greenplay will also make direct phone calls to City staff or other stakeholders if needed

Citywide Community Engagement

Task Category B in the planning process includes citywide community engagement via three (3) community workshops for the overall master plan and three (3) neighborhood-specific workshops for prioritized projects. The following tools and strategies can be used to replace the in-person workshops:

1. Create **Surveymonkey** surveys that include questions based on the discussion topics planned for each community workshop.
2. Disseminate the survey two weeks prior to the scheduled online workshop via appropriate online communication channels.
3. Workshop presentations and discussions can take place via **GoToWebinar**.
4. Team can include the interactive online polling tool **Mentimeter** to provide other fun means of live community engagement during a **GoToWebinar** workshop.
5. **Facebook Live** or **Youtube Live** can be used in combination with **GoToWebinar** if the City has the available social media accounts, camera, and speaker equipment.
6. People will be continuously directed to the MPFMP 's **Esri Story Map** for project updates, announcements, surveys, and downloadable exhibits.

Moving Forward

The project team and the City will work closely to develop the best strategies for community engagement during this unique time.

SECTION III-B
Stakeholder Interviews

#1

Q1 Please enter your contact information

Name	**Nadine Hernandez**
Department / Organization	**Recreation and Community Services Department**

Q2 What are the strengths of the Recreation and Community Services Department related to parks, trails and recreation facilities/activities that should continue over the next 10 years?

Our department does it's best to accommodate the needs of our community by offering various ongoing programing at our local parks and recreational facilities.

Q3 Conversely, what are some weaknesses that may be addressed through the Department's master plan update?

Rehabilitation of many of our outdate park structures, as well as upkeep of the parks.

Q4 What additional activities or services do you feel should be offered by the Recreation and Community Services Department that are currently not available?

A wider variety of classes at all park locations, most classes are currently limited to only certain locations.

Q5 What new facilities and/or amenities would you like to see the Recreation and Community Services Department provide?

Outdoor exercise equipment at all park locations and a walking trail with padding and makers around the parks. Water splashpads at more of our park locations.

Q6 Are there some areas of the City that are better served than others?

Yes

Q7 What is the most repeated concern you hear from residents?

We have a large concern with the homeless population at some of our parks and get regular call on that. Also, that the park restroom are in very poor condition and are always dirty or have stalls that don't work. Park lights are broken.

Q8 Who are the key partners and stakeholders in the City with regards to assisting with the programs and services offered by the Recreation and Community Services Department?

Respondent skipped this question

Q9 During the next 10 years, what should be the top parks and recreation priorities for the City?

A revamp of each park: which would include new fields, restrooms, play equipment, more lighting, picnic table, sheltered area and more parking.

Q10 Is there anything else you like to add?

We have a great team at the Recreation and Community Services Department who's goal is to make sure that the community has a positive experience when they have participated in any of our programs, rented a facility, enrolled in a class, attended on of our special events or have visited our parks. Updating our parks, facilities and programming would take their experience to the next level.

#2

Q1 Please enter your contact information

Name	**Jacob Castillo**
Department / Organization	**Recreation and Community Services**

Q2 What are the strengths of the Recreation and Community Services Department related to parks, trails and recreation facilities/activities that should continue over the next 10 years?

The Strengths that need to be continued are the programs that are provided by the city; Sports, Classes, Child Care, Senior Services, Aquatics etc...

Q3 Conversely, what are some weaknesses that may be addressed through the Department's master plan update?

Some Weaknesses that may arise are the lack of information that is not present or available. For example, Blue Prints for playground systems and Schedule maintenance.

Q4 What additional activities or services do you feel should be offered by the Recreation and Community Services Department that are currently not available?

Respondent skipped this question

Q5 What new facilities and/or amenities would you like to see the Recreation and Community Services Department provide?

I would love to see new/updated playground systems and work out equipment around our parks.

Q6 Are there some areas of the City that are better served than others?

I believe Northside Montebello is given more of the attention. Anywhere from Whittier to Beverly and everything in between.

Q7 What is the most repeated concern you hear from residents?

The lighting in some of our parks is something that is brought to our attention.

Q8 Who are the key partners and stakeholders in the City with regards to assisting with the programs and services offered by the Recreation and Community Services Department?

The council would be the main voice for all regards.

Q9 During the next 10 years, what should be the top parks and recreation priorities for the City?

Parks and Facilities should be a top priority.

Q10 Is there anything else you like to add?

N/A

Q12 How many youth from Montebello do you serve?

Answered: 2 Skipped: 1

#	RESPONSES	DATE
1	Approximately 400 on average per Spring season.	7/27/2020 3:03 PM
2	Recently 400 to 500, used to be closer to 800 in previous years	7/27/2020 11:11 AM

Q13 What age divisions do you offer?

Answered: 3 Skipped: 0

#	RESPONSES	DATE
1	We offer 4-5 5-6 7-8 9-10 11-12 13-14	7/27/2020 3:03 PM
2	Playtime/jamboree (u4/u5) U6, u8, u10, u12, u14, u16, u19	7/27/2020 11:11 AM
3	6u through 14u	7/27/2020 9:27 AM

Q14 How many teams made up primarily from Montebello do you serve?

Answered: 3 Skipped: 0

#	RESPONSES	DATE
1	Approximately 30 teams.	7/27/2020 3:03 PM
2	About 40 teams	7/27/2020 11:11 AM
3	15 to 18 teams	7/27/2020 9:27 AM

Q15 How many teams per division from Montebello do you serve?

Answered: 3 Skipped: 0

#	RESPONSES	DATE
1	4 to 6 teams per division	7/27/2020 3:03 PM
2	U4/U5-2 U6-6 U8-10 U10-10 U12-4 U14-3 U16-3 U19-2	7/27/2020 11:11 AM
3	Any were from 2 /7 per division	7/27/2020 9:27 AM

Q16 How many games does each team play in your leagues?

Answered: 3 Skipped: 0

#	RESPONSES	DATE
1	15-20 depending on the division.	7/27/2020 3:03 PM
2	At least 10 games	7/27/2020 11:11 AM
3	20 to 25	7/27/2020 9:27 AM

Q17 How many games per field or court do you schedule each year?

Answered: 3 Skipped: 0

#	RESPONSES	DATE
1	Unsure but in the Spring we have approximately 100+ games across 4 fields.	7/27/2020 3:03 PM
2	Varies on division, on average have at least 4 to 8 fames per field per Saturday. About 80 games per field per season.	7/27/2020 11:11 AM
3	4 to 5 games per field and only have 3 fields	7/27/2020 9:27 AM

Q18 How many practice times do you schedule each team for pre-season and during the regular season?

Answered: 3 Skipped: 0

#	RESPONSES	DATE
1	Each teams get approximately 2, hour and a half practices per week. They practice during the pre-season at grant Rea park, then when the season starts they move on to other parks in the city.	7/27/2020 3:03 PM
2	U4/U5 only Saturdays (1/week) U6 - 1/week U8 thru u19 (2/week)	7/27/2020 11:11 AM
3	2	7/27/2020 9:27 AM

Q19 How many fields/courts do you use for practices and games?

Answered: 3 Skipped: 0

#	RESPONSES	DATE
1	At Grant Rea park we use 4. We also use 4 other locations around the city.	7/27/2020 3:03 PM
2	Practices- all grass fields at Reggie, all grass fields at Potrero, all grass fields at Holifield some fields at City Park if available) GAMES held at La Merced Elementart & Middle school Recently started using MHS for upper division games	7/27/2020 11:11 AM
3	6 fields	7/27/2020 9:27 AM

Q20 Is there anything else you'd like to add?

Answered: 2 Skipped: 1

#	RESPONSES	DATE
1	Keeping the fields enclosed and more bleachers would be some ideal priorities	7/27/2020 3:03 PM
2	Yes, we need better fields for all sports, but seems soccer fields are the most we are lacking in montebello. It's embarrasing when other cities come to play in Montebello and we dont have nice facilities like neighboring cities let alone those coming from OC. our kids deserve to play and have fun in safe and well maintained sports facilities.	7/27/2020 11:11 AM

Memo to: **Michael Singleton, Principal, KTUA**

CC: **Matt Wilkins, Associate, Planning and Landscape Architecture, KTUA**
Art Thatcher, GP Principle in Charge, GreenPlay, LLC

From: **Jeff Milkes, Project Manager, GreenPlay, LLC**
Jacob Leon, Associate, KTUA

Date: **November 2, 2020**

Subject: **Montebello Park Facilities Master Plan: Public Input**

To gather information pertinent to the park facilities master plan, stakeholder interviews were conducted between May and October 2020. Leadership and staff from the department, and community leaders representing senior clubs and activities, sports non-profits and civic groups were interviewed using the Zoom digital platform. The goal of these sessions was to guide the development of the parks and recreation needs assessment and collect input into the needs and desires of City residents.

Participant contacts included:

- Civic Group Leaders (3)
- Staff (3)
- Director (1)
- Sports Focus Group (5)
- Senior Leaders (5)

Themes

Not listed in priority order, but consistent during many of the interviews, recurring themes are presented as follows:

Placemaking

- The Department's goal is to cater to our neighborhoods; make parks a hub of a neighborhood
- An increase in services on the south side of the City, south of Whittier Blvd is desired. The residents from the north side of Montebello are much more vocal. Engagement appears to not be equitable between the north and south sides of the City
- Having a Senior Center where people can gather and make new friends that focuses on social interaction, learning and being active is a priority. The Senior Center should focus on three components that are key - social services, social activities, and healthcare information
- A lot of programming is centralized at Montebello City Park. Programs offered in neighborhoods should be a priority

Linear Parks & Urban Trails

- More trails and walking pathways are desired. Walking is a major activity that residents participate in
- Walking is a major activity, but safety is a concern

Technology

- Some youth sports providers must work around Department organized activities. Scheduling of sports fields is inefficient due to the need for an automated reservation system

Facilities and Amenities

- Attention to deferred maintenance, repairs, and renovations are needed in the parks
- Restrooms in the parks are a big concern. Parks need additional shade and restrooms
- Safety in the parks is a major issue in part due to limited lighting and homeless concerns
- Buildings are outdated and need general upkeep and improvements
- Converting underused tennis courts to futsal and pickleball are desired
- Outdoor exercise equipment in the parks is needed
- A new gymnasium at Chet Holifield Park and upgrades to the aquatic facility are desired
- Play equipment renovations are desired due to deferred maintenance and ADA concerns
- Parking is an issue during summer events, and among Seniors at the Senior Center
- Taylor Ranch Park is a model park for the rest of the system
- Daily parks maintenance needs improvement across the system. Some parks are not nice, clean, or inviting
- Field space is at a premium for both youth sports practices and games
- The Senior Center has poor lighting, (downstairs) and has deferred maintenance issues
- An all-inclusive playground is desired
- The George Hensel Aquatic Center needs a renovation to include locker rooms and support amenities
- Some sports providers use school facilities and believe they could greatly increase capacity if more school facilities were made available. There are concerns about the maintenance condition of some of the school facilities

Financial

- The Department does not have a large enough budget to allow staff to do everything they need to do
- Staffing shortages is a major challenge. Recruiting is difficult as neighboring cities pay higher wages. There is not enough staffing for park maintenance
- No formalized sponsorship program is in place
- The Department is known as the “yes” department, and works hard to provide service with limited staff
- People from other cities regularly participate in Montebello Senior Center programs

Programs and Services

- A joint use agreement with the school district may make the partnership for equitable for the Department
- Special events such as Snow Day, the City Parade, outdoor movies and concerts are very popular. Some successful special events have been discontinued
- The department does not have a scholarship program for recreation programs which limits access for low income residents
- Expand sports programs to include football, soccer, and baseball, additional competitive sports programs, and girls' softball programs
- Programs for individuals with disabilities are needed
- The George Hensel Aquatic Center should be open year around

Administration

- Increased and equitable civic engagement in needed
- Additional general marketing and communication will help the department promote programs and events
- The Department's recreation brochure was just started last year. The use of social media outlets to promote programs is new to the department and will continue to improve

A summary of the responses follows. While responses are not prioritized, asterisks demonstrate repeated comments made during the engagement process.

How long have you been a resident of the City of Montebello?

0	<5 years
2	5-9 years
3	10-19 years
3	20+ years

What are the strengths of the City related to parks, trails and recreation facilities/activities that should continue over the next 10 years?

- Special events such as Snow Day, the City Parade, outdoor movies, and concerts*****
- Having a Senior Center where people can gather and make new friends that focuses on social interaction, learning and being active*****
- Taylor Ranch Park**
- The Department does a good job supporting sports throughout the community – sports needs are being met**
- People positively recognize the City's customer service, organization, and variety of quality programs**
- The Recreation program brochure that started distribution last year. Social media as well*
- The youth lunch program*
- Montebello City Park is the crown jewel of the Montebello park system*
- The staff's ability to make things happen with small budgets*
- They department is on a great path, given the master plan. It has been decades since this kind of planning was done*
- There is a general willingness among the five youth sports providers to work together and share field space when at all possible*
- The childcare and preschool programs are working well
- Staff are proactive. They address any issues or problems
- The department goes above and beyond during tax season at the Senior Center. They provide scheduling, takes calls, make appointments, etc. They are very responsive allowing volunteers to complete 300-350 tax returns for seniors
- Youth and adult programs are some of the City's major strengths
- If Grant Rhea Park was available more, the Department could serve 1,000 more people
- The new City Manager has made identifiable positive changes in the City
- Partnerships with the Rotary Club, the police, the hospital, and the City are good
- A lot of improvement with the golf course – a new management group appears to be working Visually there appears to be more people using the golf course
- The Quiet Cannon is a nice facility for group meetings with a good view of the golf course
- Henry Acuna Park is well used by Seniors
- The gymnasium's basketball program now reaches 400 participants
- Good communication with the high school
- The Department offers a lot of sports (basketball, baseball, softball, soccer, etc.)

What are the weaknesses that need addressed through the Master Plan update?

- Daily parks maintenance needs improvement. Some parks are not nice, clean, or inviting. Groundskeeping and surrounding areas need improvement so that the parks do not fall prey to bad elements, parks, and sports infields have not been a priority – some look awful******
- Renovations, specifically to restrooms are needed******
- The does not have a large enough budget to allow staff to do everything they need to do******
- There are staff shortages at the Senior Center, in park maintenance and in general that are made worse by not having funds to offer competitive salaries*****
- Field space is at a premium for both youth sports practices and games causing youth sports providers to compete for use. Conflicts occur during overlap of seasons when soccer season overlaps with baseball and softball****
- Some youth sports providers must work around Department organized activities in the parks***
- Some of the fields at Montebello City Park are bad. Dog feces, needles, dirt more than grass, poor lighting, bad restrooms, and homeless issues (sleeping in dugouts – beds/blankets/etc.)***
- Scheduling of sports fields is inefficient due to the need for an automated reservation system***
- Park infrastructure is lacking – not having proper amenities. Deferred maintenance, repairs, and lighting are big issues in the parks, especially during fall/winter months. Need to improve safety and comfort***
- A lack of joint use agreement with the schools creates challenges. There is a potential unbalance in “City vs school” uses***
- Communication from the department to Senior club needs to be improved– the Department at times schedules events in conflict with senior club activities causing a club to have to cancel events and lose money**
- There are not enough special events like battle of the bands, and outdoor concerts**
- The golf course needs additional TLC*
- The Senior Center has only two large rooms for programs and needs to be expanded*
- Holifield Park is not safe. The consensus among sports groups is to avoid using this park for safety and security reasons*
- Staff do not always treat Seniors how they should be treated – it seems the Department has been more interested in renting the rooms rather than prioritizing Senior use*
- The Senior Center is at a great disadvantage because it is a multi-use facility, with it being rented out on evenings and weekends
- The Olympic-size swimming pool can be heated but is currently not open past September because the Department cannot afford to heat it
- There are not enough lifeguards to run the pool year around
- Reggie Rodriguez Park is not safe because of pirates and bad elements
- Walkability is not what it should be. The parks do not seem connected
- Programming is no longer taking place outside the Senior Center
- The high school track can be used by the Department but only outside the school’s existing programs
- Access to programs is limited because the Department does not have a scholarship program
- Challenges for special events include shade and sanitation services

- Some of the school facilities are not up to par. The schools are only responsive to safety issues
- A big challenge is that Montebello City Park only has one baseball/softball diamond
- It would be good to have security cameras on the fields
- When the fields are not available, the youth sports providers must use neighboring cities facilities at a much higher price. One organization, the Montebello Brewers Youth Baseball uses the Whittier Narrows at three times the cost of the fields in Montebello
- Advertising, getting the story out is inconsistent
- Communication from staff is not always good
- QOL in Montebello has decreased
- Homeless issues present barriers to use
- Grant Rae Park needs more attention
- The Montebello Golf Course should pattern the operation after the City of Industry course
- Building maintenance can be improved
- Chet Holifield park has a lot of unnecessary facilities

What parts of Montebello's Parks or Recreation facilities do not meet your expectations or need improvement?

- The Senior Center has poor lighting, (downstairs) and has deferred maintenance issues*
- Restrooms in parks are a deterrent to use because they have not been updated
- Grant Rae Park field #1 where Ponytail Softball plays was built in the 1950s and is not what is needed anymore
- The recreation building near Grant Rae Park Field #2 where the Montebello Indians play is in disrepair, including the snack bar
- Restrooms in the south part of Grant Rae Park are heavily used and suffer huge vandalism issues
- Termites in the paint at Ashiya Park hold the buildings together
- Reggie Rodriguez Park needs better daily maintenance and upkeep
- Holifield Park is sad – tired and no love in the park. It needs a complete overhaul. It is dark

What new amenities do you desire?

- Outdoor exercise equipment in the parks, but this seems to have lost priority with Department leadership (in Montebello City Park too)****
- All-inclusive play equipment and/or playground***
- Better parking. This has been an issue in the parks during events. Sometimes multiple groups reserve the same parks on the same days and during the same times***
- More trails and walking pathways. Walking in the Community is a major activity that residents participate in***
- Montebello City Park could use more attention*
- Locker rooms and support amenities at the Aquatic Center could use renovations*
- Splash pads would be a great benefit*
- A nice set of tennis courts (like Whittier Narrows)*
- Better lighting in the parks would make people feel safer and may encourage more park use*
- Futsal facilities*

- Better sports and active recreation design at Grant Rae Park
- Montebello Senior Center could use a seated area like the Arcadia Senior Center or Norwalk Senior Center has for socializing. A welcoming area in the Center for drop-in use
- Chet Holifield Park, in south side, does not get as much attention due to its perceived reputation
- Rubber flooring for walking/running paths
- A new gymnasium at Chet Holifield Park would be a great asset because it would capture a large audience
- Play equipment renovations due to deferred maintenance
- Cathy Hansel Gymnasium and Youth Center needs general park improvements. It is heavily used by the community for various programs
- Community gathering spaces that are connected by walking trails would be great
- A cultural arts facility would be a unique and fun asset to host events and run special programs. The Department does not have a dedicated space like this
- Renovating the pool in the south side of Montebello would be a major benefit
- Taylor Ranch Park needs a cultural arts center
- Better sports and active recreation design at Grant Rae Park
- Another basketball gym
- Some of the facilities do not have amenities but we work around them
- Skateboard park like one that was active in the 1980s
- A little higher end facility – not Beverly Hills but people will pay for quality
- Reggie Rodriguez Park could use an upgrade
- Playgrounds could use upgrading for ADA
- A dog park would be a good amenity
- More picnic benches would be nice
- Montebello City Park could benefit from several improvements
- More general surveillance would be good
- Reserved parking for seniors at the center during events and club activities

What new recreation activities do you desire?

- Expand sports programs to include football, soccer, and baseball***
- Programs for individuals with disabilities***
- The Senior Center should focus on three components that are key - social services, social fun activities, and healthcare information and referral to resources**
- Additional senior services*
- The youth program overall needs more help*
- Improvements to the registration process for senior programs. Keep it simple because the senior community is not tech-savvy
- New classes
- After school recreation programs
- Teen programs
- New senior model - The social clubs are not working for the new (younger) generations
- Youth programming – partnerships with youth sports organizations should be fine-tuned
- Multi-generational programming

- Technology based programs and E-sports with safety precautions in place
- A senior travel club would be well received
- Pickleball is a growing sport and interest is increasing
- More girls' softball programs/facilities would be great, although the desire for "competitive" programs is greater
- Subsidy programs would be welcomed. People call and ask about camps, childcare, sports, etc. at lower fees
- Parents ask about sports, classes, etc.
- Dog parks are requested
- Seniors would like more excursions
- Additional special events
- Concerts in the park are great events, supported well by the community
- Outdoor movies started four years ago and typically take place during the summer, but the Department would like to conduct them during winter months as well
- Family field trips
- Trips to destinations throughout Southern California

Are there areas in the City (geographic or market segments) that are underserved?

- South side of Montebello could be served better. Park facilities and amenities are more limited even despite the large population that resides there*****

What are the most repeated concerns/messages staff hear from residents?

- Lighting at parks is a constant issue**
- Not enough staffing at parks/facilities, maintenance, park lighting and safety*
- Residents from north side of Montebello are vocal and more active compared to residents from the south side of the City. Residents perceive the north side as safer, and the reputation from the south side hurts attendance in the parks
- The growing variety of programs and great customer service
- People appreciate the hard work Department staff provides with existing programs
- Restrooms, vandalism, and graffiti are major issues
- Seniors appreciate the Senior Center's welcoming and safe environment
- Seniors would like to see improvements to the taxi service that is contracted by City. Seniors pay $1.00 a ride but may run out of monthly ride vouchers, forcing them to choose services
- The condition of restrooms
- Always carved out an amount of the park for parking but we do not want to take this out of our park system
- Parking concerns

What key partners and stakeholders in the community can assist with the implementation of the Park Facilities Master Plan?

- The Lions Club
- The Rotary Club
- The Optimists Club
- The Mexican American Opportunity Foundation
- Montebello – San Gabriel YWCA
- Ashiya, Japan sister city
- The Women's Club
- Shop Montebello
- Youth sports program representatives
- The police department
- The school district
- Senior center representatives
- The fire department
- Youth program participants
- User groups
- The Latino Diabetes Association
- Commissioners
- Insurance groups
- LA Kings
- Sport groups
- Youth sports programs
- The Montebello Historical Society

What key issues, values and priorities in the Montebello community need to be considered, while developing the Park Facilities Master Plan?

- Address parking issues**
- General park infrastructure and beautification**
- Safety in the parks – better lighting, safety and paths are the top priorities*
- Our goal is to cater to our neighborhoods; make parks a hub of a neighborhood*
- We are an old community and I feel are still working with programs that worked 20 years ago. We have to learn to think out of the box and learn to work with what we have and utilize our facilities to the maximum
- Play equipment should be updated
- Programming for senior groups is a priority and should continue to best of the City's ability
- Bring the community together and be the neighborhood resource
- Offer the best sports complex - play, exercise, feel safe, etc.
- The George Hensel Aquatic Center should be open year around
- Chet Holifield Park. Focus on good staff and a newer facility and it would be a real hub for the community. The area is super industrial. A lot of families are in apartments with different social-economic demographics. Needs to be a safe space with good lighting and staffing

- A study is needed to prioritize services, determine users, and if parks are walkable? It all matters
- Partnerships are a priority which can help with budget issues
- Increased civic engagement and create more community connections
- Attract larger number of residents to attend facilities, programs, and special events
- Aquatics has the potential to become one of the City's greatest strengths
- Improvements to Montebello City Park should be a priority
- Keep improving general communication, catalogs, brochures, etc.
- Technological upgrades are needed
- New programs, the types that people go to other cities for
- Trails, walkways, and walking programs
- We are known as the "yes" department, so we work hard to make anything work even with limited staff
- Opportunities for play, exercise, feeling safe, etc.

Other Comments

- Fees are competitive compared to those of surrounding cities
- The community is made up of many Hispanic people. There is a strong American pride in the community – if you made it to Montebello "you made it". It's coined the Beverly Hills of East LA. We are going to need to address the demographic needs in the next 10 months not 10 years
- Better roads. Paving is needed. There are many potholes in many streets
- There is a curve on Montebello Boulevard where people lose control of their cars and run into homes and other parked cars
- For safety reasons, staff should never leave only one person at the Senior Center
- Transportation is an issue (but there is a voucher program) for senior's use of programs and facilities
- Transportation = equity and access
- Residents do not participate at the same levels of civic engagement around the City
- There is always something happening at Reggie Rodriguez Park–Kids playing basketball, baseball
- Areas between Montebello and Pico Rivera are more impacted by homeless issues under the bridges, not so much in parks
- Ever since the Covid-19 Pandemic began, senior dances have been a thing of the past, so new programs will have to be implemented such as computer classes, movies, and exercise classes
- Up and coming City Council members are humble, active, attend events, look for funding, etc. They are a great support system for the department
- No formalized sponsorship program is currently in place
- The Department needs to pay licensing fees that range from $500-$1200 per movie
- Pockets of people continue to use the parks during the Pandemic
- Prior to Covid-19, the parks (Chet Holifield Park, Ashiya Park), were better maintained
- A lot of programming is centralized at Montebello City Park. Walking is a major activity here
- Deterioration of infrastructure – roads, and such but seems the Department is going the right direction

- To keep a positive morale in City, there needs to be more two-way communication and engagement
- Hope that within the City, the departments are talking
- Fees are reasonable
- Covid-19 slowed the relationships between the Rotary Club and the community
- Reggie Rodriguez Park has a lot of potential
- The Mexican American Opportunity Foundation (MAOF) pays the City to have youth participate in City programs
- Senior Center issues are tied to staffing and budgets
- Community would be hesitant to major changes due to nostalgia, but staff would see the benefits of improvements/upgrades
- Lifeguards have good retention
- Relationships have been built with the senior community
- The Department works with other organizations for Senior case management services
- Volunteers support meetings and events
- Important for socializing, self-esteem, getting out of the house
- There is usually a waitlist for popular events
- Senior clubs also provide health-related information and services
- Right now, the Senior Center would be having meetings on Medicare enrollment if not for the Pandemic
- People from other cities also participate in Montebello Senior Center programs
- Senior clubs contribute to emergency relief efforts when needed
- Senior clubs also adopt a foster family during the Christmas holiday
- Senior clubs are very grateful for the Department's support
- The City has a summer intern program that trains potential new hires
- Summer fees are slightly higher
- Some sports providers use school facilities and believe they could greatly increase capacity if more school facilities were made available. There are concerns about the maintenance condition of some of the school facilities
- Rotary meets at the Golf Course facility on Wednesdays and works to promote Montebello
- A new gated community with 400 or so new homes will be constructed in the future
- People are scared and frustrated; it is a tough time for many people. Seniors miss participating in club activities

19

Importance/Performance Matrix

High importance/ Low needs met

These are key areas for potential improvements. Improving these facilities/programs would likely positively affect the degree to which community needs are met overall.

High importance/ High needs met

These amenities are important to most respondents and should be maintained in the future but are less of a priority for improvements as needs are currently being adequately met.

These "niche" facilities/programs have a small but passionate following, so measuring participation when planning for future improvements may prove to be valuable.

Current levels of support appear to be adequate. Future discussions evaluating whether the resources supporting these facilities/programs outweigh the benefits may be constructive.

Low importance/ Low needs met

Low importance/ High needs met

12. From the list below, indicate which factors have hindered your use of Montebello parks and recreation facilities, services, and programs in the past? (CHECK ALL THAT APPLY)

- ☐ N/A - Have not been hindered
- ☐ Don't have the programs I want
- ☐ Hours of operation/time offered
- ☐ Lack of quality instruction for programming
- ☐ Location of programs/classes not convenient
- ☐ No time or other personal reasons
- ☐ Not aware of the services offered
- ☐ Overall condition/maintenance of locations
- ☐ Prefer other recreation providers/clubs
- ☐ Price or user fees
- ☐ Safety and security
- ☐ Other (specify): _____

COMMUNICATION

13. How effective is the City of Montebello at reaching you with information on parks and recreation facilities, services, and programs?

NOT AT ALL EFFECTIVE — VERY EFFECTIVE

1 ☐ 2 ☐ 3 ☐ 4 ☐ 5 ☐

14. How do you currently receive information on parks and recreation facilities, services, and programs? (CHECK ALL THAT APPLY)

1) ☐ Local media (e.g., TV, radio, newspaper)
2) ☐ City of Montebello website
3) ☐ At the recreation facility/program location
4) ☐ Social media (e.g., Facebook, Instagram, Nextdoor)
5) ☐ Email
6) ☐ School email/newsletter
7) ☐ Flyers/posters at businesses
8) ☐ Billboard/street banner
9) ☐ Word of mouth
10) ☐ Other (specify: _____)

15. What is the <u>best</u> way for you to receive information on parks and recreation facilities, services, and programs?

Insert number from Question 14: _____

FUTURE FACILITIES, AMENITIES, AND PROGRAMS

16. Which THREE of the following non-traditional recreational facilities and/or activities do you feel should be seriously considered by the City of Montebello over the next 5 years? (PICK UP TO THREE)

- ☐ Adventure playground
- ☐ Bike pump track/skills course
- ☐ Botanical gardens
- ☐ Community gardens
- ☐ Disc golf course
- ☐ Dog parks
- ☐ Improved lighting
- ☐ Obstacle or agility course
- ☐ Outdoor fitness equipment
- ☐ Pickleball courts
- ☐ Picnic shelters
- ☐ Rope, wall, or bouldering
- ☐ Skateboard park/plaza
- ☐ Spray-grounds/splash pads for water fun
- ☐ Walking trails
- ☐ Other facility/amenity: _____

17. What are the most important needs to be addressed by the City of Montebello over the next 5 to 10 years?

	NOT AT ALL IMPORTANT				VERY IMPORTANT
	1	2	3	4	5
Add more pocket parks/plazas (less than ½ acre)	☐	☐	☐	☐	☐
Add more linear parks that include natural areas with paths	☐	☐	☐	☐	☐
Add more trails and walking areas in or outside of parks	☐	☐	☐	☐	☐
Add more mini-parks (1/2 to 2 acres)	☐	☐	☐	☐	☐
Add more traditional neighborhood or community parks	☐	☐	☐	☐	☐
Expand current park amenities and activities	☐	☐	☐	☐	☐
Expand exisiting park boundaries	☐	☐	☐	☐	☐

VALUES AND VISION

18. Parks, recreation, and open space opportunities are offered in Montebello for a variety of purposes and to serve the needs of a diverse population. Please mark the box for how important each of the following purposes in Montebello is to you and your household.

	NOT AT ALL IMPORTANT				VERY IMPORTANT
	1	2	3	4	5
Create economic benefit through attraction of businesses and enhanced property values	☐	☐	☐	☐	☐
Encourage active lifestyles and promote health, wellness, and fitness	☐	☐	☐	☐	☐
Ensure environmental sustainability in park design and maintenance practices	☐	☐	☐	☐	☐
Ensure facilities and programs are affordable to all residents of Montebello	☐	☐	☐	☐	☐
Ensure parks and recreation opportunities are accessible to all residents (including safe walkable routes, trail connections, and transportation options)	☐	☐	☐	☐	☐
Focus on providing family-oriented activities	☐	☐	☐	☐	☐
Offer cultural events, festivals, and activities to reflect diversity and inclusivity	☐	☐	☐	☐	☐
Provide a high level of safety and security at facilities	☐	☐	☐	☐	☐
Strengthen community image and sense of place	☐	☐	☐	☐	☐
Other (specify): _____	☐	☐	☐	☐	☐

COVID-19 ASSESSMENT

19. Given the pandemic, CDC guidelines and restrictions on accessing parks and recreational facilities that were put into effect for COVID-19, are you now more appreciative of your parks and getting access to them? ☐ Yes ☐ No

20. Do you have any specific comments on how the COVID-19 pandemic has impacted your access to parks and recreation facilities and how that has affected your appreciation for parks and recreational facilities?

_____

_____

21. How do you feel about how the City of Montebello handled parks and recreation closures?

- ☐ Handled closures appropriately
- ☐ Reacted too slowly to put restrictions in place
- ☐ Reacted too quickly to remove restrictions
- ☐ Don't know/No opinion

22. Given likely budget issues influenced in part by COVID-19 for the City of Montebello over the next few years, what are the top two priorities that should be implemented? (PLEASE SELECT ONLY TWO)

- ☐ Increase use of parks resulting from increased programs and activities
- ☐ Increase use of parks resulting from adding infill amenities to existing parks
- ☐ Upgrading and retrofitting of existing facilities throughout the city
- ☐ Building new parks in areas of new growth or to address inequities in park access to different areas of the city
- ☐ Increased maintenance, repairs, and security improvements
- ☐ Only build new parks if they are driven by demand from new development and that this development pays for their fair share of these facilities

SUGGESTIONS AND ADDITIONAL COMMENTS

23. Do you have any further comments about parks, recreation facilities, and programs in Montebello?

_____

_____

DEMOGRAPHICS

Your demographic information will assist in our analysis of survey responses. Your responses are confidential and individual responses will not be shared.

24. Please indicate the gender with which you identify:

- ☐ Male
- ☐ Female
- ☐ I prefer to identify as:_____
- ☐ Prefer not to answer

25. What is your age?

- ☐ Under 25
- ☐ 25 – 34
- ☐ 35 – 44
- ☐ 45 – 54
- ☐ 55 – 64
- ☐ 65 – 74
- ☐ 75 or over

26. Does your household have a need for ADA-accessible (Americans with Disabilities) facilities and services?

- ☐ Yes ☐ No

27. Do you own a dog?

- ☐ Yes ☐ No

28. Which of these categories best applies to your household?

- ☐ Single, no children
- ☐ Single with children at home
- ☐ Single, children no longer at home (empty nester)
- ☐ Couple, no children
- ☐ Couple with children at home
- ☐ Couple, children no longer at home (empty nester)
- ☐ Multi-generational home (grandparents, parents, children)

29. Do you own or rent your residence in Montebello?

- ☐ Own ☐ Rent ☐ Other

30. Are you a registered voter in Montebello?

- ☐ Yes ☐ No

31. Are you of Hispanic, Latino or Spanish origin?

- ☐ Yes ☐ No

32. What race do you consider yourself to be? (CHECK ALL THAT APPLY)

- ☐ American Indian and Alaska Native
- ☐ Asian
- ☐ Black or African American
- ☐ Native Hawaiian and Other Pacific Islander
- ☐ White
- ☐ Some other race

33. Are there any languages other than English used in your household to communicate? If so, please indicate below. (CHECK ALL THAT APPLY)

- ☐ Arabic
- ☐ Armenian
- ☐ Mandarin Chinese
- ☐ Japanese
- ☐ Portuguese
- ☐ Spanish
- ☐ Other: _____

34. Which of these categories best describes the total gross annual income of your household (before taxes)?

- ☐ Under $25,000
- ☐ $25,000–49,999
- ☐ $50,000–74,999
- ☐ $75,000–99,999
- ☐ $100,000–149,999
- ☐ $150,000–199,999
- ☐ $200,000–249,999
- ☐ $250,000 or more

Thank you for taking the time to share your opinions.
Your input will be of great value to Montebello Parks and Recreation.

ENCUESTA SOBRE LOS PARQUES Y RECREACIÓN DE LA CIUDAD DE MONTEBELLO

¡Ayude a dar forma al futuro de su comunidad! La ciudad de Montebello necesita sus comentarios para ayudar en la planificación y desarrollo de parques y oportunidades de recreación futuras.

1. ¿Cuánto tiempo ha vivido en la ciudad de Montebello? Ingrese el número: ☐☐ años O ☐ Marque aquí si ha sido por menos de un año

SATISFACCIÓN

2. *¿Qué tan satisfecho ha estado con la calidad general de los parques, programas y/o servicios recreativos, instalaciones y eventos que ha utilizado en los últimos 12 meses?*

	NO SATISFECHO 1	2	3	4	MUY SATISFECHO 5	NO LO HE USADO EN LOS ÚLTIMOS 12 MESES

12. De la lista a continuación, indique qué factores han impedido que utilice los parques, instalaciones recreativas, servicios y programas de Montebello en el pasado. (MARQUE TODO LO QUE APLIQUE)

- ☐ N/A - No me lo han impedido
- ☐ No ofrecen los programas que me interesan
- ☐ Horario de operación
- ☐ Falta de instrucción de calidad para los programas
- ☐ Ubicación inconveniente de los programas y/o clases
- ☐ Sin tiempo u otras razones personales
- ☐ No conozco los servicios ofrecidos
- ☐ Condición general y/o mantenimiento de las instalaciones
- ☐ Prefiero ir a otros lugares/clubes de recreación
- ☐ Precio o tarifas para el usuario
- ☐ Seguridad y protección
- ☐ Otra (especifique: _____)

COMUNICACIÓN

13. ¿Qué tan efectiva es la ciudad de Montebello para contactarlo con información sobre parques, instalaciones recreativas, servicios y programas?

NO ES EFECTIVA — MUY EFECTIVA

1 ☐ 2 ☐ 3 ☐ 4 ☐ 5 ☐

14. ¿Cómo recibe actualmente información sobre parques, instalaciones, servicios y programas de recreación? (MARQUE TODO LO QUE CORRESPONDA)

1) ☐ Medios locales (p. ej., televisión, radio, periódico)
2) ☐ Sitio web de la ciudad de Montebello
3) ☐ En la instalación recreativa y/o ubicación del programa
4) ☐ Redes sociales (p. Ej., Facebook, Instagram, Nextdoor)
5) ☐ Correo electrónico
6) ☐ Correo electrónico y/o boletín escolar
7) ☐ Folletos y/o carteles en negocios
8) ☐ Espectaculares o anuncios en las calles
9) ☐ De boca en boca
10) ☐ Otro (especifique: _____)

15. ¿Cuál es la mejor manera de recibir información sobre parques, instalaciones, servicios y programas de recreación?

Escriba el número de la pregunta 14: _____

INSTALACIONES, SERVICIOS Y PROGRAMAS FUTUROS

16. ¿Cuáles de las siguientes TRES instalaciones y/o actividades recreativas no tradicionales cree que la ciudad de Montebello debería considerar seriamente en los próximos 5 años? (ELIJA HASTA TRES)

- ☐ Parque de aventura
- ☐ Pump Track (parque de bicicletas)
- ☐ Jardines botánicos
- ☐ Jardines comunitarios
- ☐ Campo de disc golf
- ☐ Parques para perros
- ☐ Mejor alumbrado público
- ☐ Recorrido de obstáculos
- ☐ Aparatos para hacer ejercicio al aire libre
- ☐ Canchas de pickleball
- ☐ Techos para sombra o picnic
- ☐ Cuerdas y/o paredes para escalar
- ☐ Parque y/o plaza para patinaje
- ☐ Fuentes para diversión
- ☐ Senderos para caminar
- ☐ Otra instalación o actividad: _____

17. ¿Cuáles son las necesidades más importantes que debe abordar la ciudad de Montebello en los próximos 5 a 10 años?

	PARA NADA IMPORTANTE 1	2	3	4	MUY IMPORTANTE 5
Más parques y plazas pequeñas (menos de ½ acre)	☐	☐	☐	☐	☐
Más parques lineales que incluyan áreas naturales con senderos	☐	☐	☐	☐	☐
Más senderos y áreas para caminar dentro o fuera de los parques	☐	☐	☐	☐	☐
Más mini parques (1/2 a 2 acres)	☐	☐	☐	☐	☐
Más parques de vecindario tradicionales o parques comunitarios	☐	☐	☐	☐	☐
Ampliar los servicios y actividades actuales del parque	☐	☐	☐	☐	☐
Ampliar los límites existentes de los parques	☐	☐	☐	☐	☐

VALORES Y VISIÓN

18. Montebello ofrecen parques, recreación y espacios abiertos para una variedad de propósitos y para satisfacer las necesidades de una población diversa. Marque en la casilla la importancia de cada uno de los siguientes propósitos en Montebello para usted.

	PARA NADA IMPORTANTE 1	2	3	4	MUY IMPORTANTE 5
Crear beneficios económicos a través de la atracción de negocios y el incremento de los valores de las propiedades	☐	☐	☐	☐	☐
Fomentar estilos de vida activos y promover la salud, el bienestar y la condición física	☐	☐	☐	☐	☐
Garantizar la sostenibilidad ambiental en el diseño de los parques y las prácticas de mantenimiento	☐	☐	☐	☐	☐
Asegurar que las instalaciones y programas sean accesibles para todos los residentes de Montebello	☐	☐	☐	☐	☐
Asegurar que los parques y las oportunidades de recreación sean accesibles para todos los residentes (incluidas rutas seguras para caminar, conexiones a senderos y opciones de transporte)	☐	☐	☐	☐	☐
Enfocarse en proporcionar actividades orientadas a la familia	☐	☐	☐	☐	☐
Ofrecer eventos culturales, festivales y actividades para reflejar la diversidad y la inclusión	☐	☐	☐	☐	☐
Proporcionar un alto nivel de seguridad en las instalaciones	☐	☐	☐	☐	☐
Fortalecer la imagen de la comunidad y el sentido del lugar	☐	☐	☐	☐	☐
Otro (especifique): _____	☐	☐	☐	☐	☐

EVALUACIÓN SOBRE EL COVID-19

19. Dada la pandemia, las pautas y restricciones del CDC para acceder a parques e instalaciones recreativas que se pusieron en práctica para el COVID-19, ¿ahora aprecia más sus parques y el acceso a ellos? ☐ Sí ☐ No

20. ¿Tiene algún comentario específico sobre cómo la pandemia de COVID-19 ha afectado su acceso a parques e instalaciones recreativas y cómo eso ha cambiado su aprecio por los parques e instalaciones recreativas?

_____

21. ¿Cómo se siente acerca de cómo la ciudad de Montebello manejó los cierres de los parques e instalaciones recreativas?
- ☐ Manejó cierres apropiadamente
- ☐ Reaccionó demasiado lento para establecer restricciones
- ☐ Reaccionó demasiado rápido para eliminar restricciones
- ☐ No lo sé / No tengo ninguna opinión

22. Dados los posibles problemas presupuestarios influenciados en parte por el COVID-19 para la ciudad de Montebello en los próximos años, ¿cuáles son las dos principales prioridades que deben implementarse: (SELECCIONE SOLO DOS)
- ☐ Aumentar el uso de parques como resultado de mayores programas y actividades
- ☐ Aumentar el uso de parques como resultado de agregar servicios de relleno a los parques existentes
- ☐ Actualización y modernización de las instalaciones existentes en toda la ciudad
- ☐ Construir nuevos parques en áreas de nuevo crecimiento o para abordar las desigualdades en el acceso a diferentes áreas de la ciudad
- ☐ Mayor mantenimiento, reparaciones y mejoras de seguridad
- ☐ Solo construir nuevos parques si son impulsados por la demanda del nuevo desarrollo y si este desarrollo paga su parte justa de estas instalaciones

SUGERENCIAS Y COMENTARIOS ADICIONALES

23. ¿Tiene algún comentario adicional sobre los parques, instalaciones y programas de recreación en Montebello?

_____

_____

DEMOGRAFÍA

Su información demográfica ayudará en nuestro análisis de las respuestas de la encuesta. Sus respuestas son confidenciales y no se compartirán respuestas individuales.

24. Indique el género con el que se identifica:
- ☐ Masculino
- ☐ Femenino
- ☐ Prefiero identificarme como: _____
- ☐ Prefiero no responder

25. ¿Cuál es tu edad?
- ☐ Menos de 25
- ☐ 25 – 34
- ☐ 35 – 44
- ☐ 45 – 54
- ☐ 55 – 64
- ☐ 65 – 74
- ☐ 75 o más

26. ¿Necesita instalaciones y servicios accesibles para personas con discapacidad en su hogar?
- ☐ Sí ☐ No

27. ¿Tiene un perro?
- ☐ Sí ☐ No

28. ¿Cuál de estas categorías se aplica mejor a usted?
- ☐ Soltero(a), sin hijos
- ☐ Soltero(a) con hijos en casa
- ☐ Soltero(a), niños que ya no están en casa (nido vacío)
- ☐ Pareja sin hijos
- ☐ Pareja con hijos en casa
- ☐ Pareja, con hijos que ya no están en casa (nido vacío)
- ☐ Hogar multigeneracional (abuelos, padres, hijos)

29. ¿Es propietario o renta una residencia en Montebello?
- ☐ Propietario ☐ Rento ☐ Otro

30. ¿Es usted un votante registrado en Montebello?
- ☐ Sí ☐ No

31. ¿Es de origen hispano, latino o español?
- ☐ Sí ☐ No

32. ¿Qué raza se consideras ser? (MARQUE TODO LO QUE CORRESPONDA)
- ☐ Indio americano o nativo de Alaska
- ☐ Asiático
- ☐ Afroamericano
- ☐ Nativo de Hawái u otras islas del Pacífico
- ☐ Blanco
- ☐ Alguna otra raza

33. ¿Hay otros idiomas además del inglés que se utilicen en su hogar para comunicarse? Si es así, indique a continuación. (MARQUE TODO LO QUE APLIQUE)
- ☐ Árabe
- ☐ Armenio
- ☐ Chino mandarín
- ☐ Japonés
- ☐ Portugués
- ☐ Español
- ☐ Otro: _____

34. ¿Cuál de estas categorías describe mejor el ingreso bruto anual total en su hogar (antes de impuestos)?
- ☐ Menos de $25,000
- ☐ $25,000–49,999
- ☐ $50,000–74,999
- ☐ $75,000–99,999
- ☐ $100,000–149,999
- ☐ $150,000–199,999
- ☐ $200,000–249,999
- ☐ $250,000 o más

Gracias por tomarse el tiempo para compartir sus opiniones.
Su opinión será de gran valor para los parques y recreación de Montebello.

CITY OF MONTEBELLO PARKS MASTER PLAN

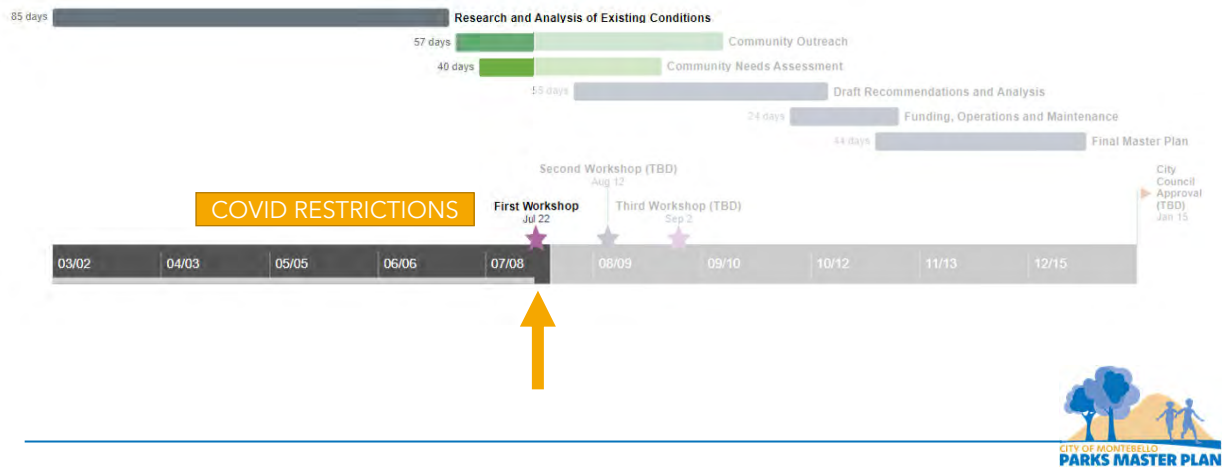
Workshop Schedule

6:00 – 6:10	Greet and Sign-in
6:10 – 6:20	Introduction
6:20 – 6:45	Presentation
6:45 – 7:15	Staff and Consultants Available for Questions

Project Introduction

- The purpose of this plan is to create a report for Montebello's parks and recreation facilities that will address:
  - Capital improvements
  - ADA accessibility
  - Park and general City facility conditions
  - Priorities and funding strategies
  - Maintenance standards
  - Recommendations for park facility improvements – including 3 specific park plans
- 1 year (March 2020 – January 2021)

Schedule



CITY OF MONTEBELLO
PARKS MASTER PLAN

Project Goals

We want to hear from you!

What is a Park Facilities Master Plan?

It is a document that provides a **guide** for the orderly development of future park, recreation, and open space facilities and programs that are required to meet the **current** and **future needs** of the community.

What will the Park Facilities Master Plan include?

In addition to the plan's findings and recommendations, this document will also include:

- An existing parks and facilities inventory
- Documentation of existing conditions
- Future plans
- Funding sources
- A comprehensive financial plan

Key Definitions

- Population Based Standards
- Parkshed
- Distribution of Park Services
- 5 Min / 10 Min Walk or Bike Time

Key Definitions

Equitable distribution of park and recreational facilities and the ability **to serve** the various neighborhoods and **all** socioeconomic **segments of the city's population**.

- Population Based Standards
- Parkshed
- Distribution of Park Services
- 5 Min / 10 Min Walk or Bike Time

A park service study done by taking a **park and** analyzing the **households** it serves. Typically studied in time increments, generating an estimate of the number of nearby **potential park users**.

Population Based Standards

Parkshed

Distribution of Park Services

5 Min / 10 Min Walk or Bike Time

A geographic **distribution analysis** correlating the distribution **of parks and population** and the different access ranges for various park types.

Population Based Standards

Parkshed

Distribution of Park Services

5 Min / 10 Min Walk or Bike Time

Indicates the **parks or facilities** that can be **reached by a 5 min or 10 min walk or bike ride**.

Population Based Standards

Parkshed

Distribution of Park Services

5 Min / 10 Min Walk or Bike Time

PARKS MASTER PLAN

Goals

- Maximize the use of existing parks
- Repurpose underused areas within parks
- Connect with a trail system that provides access to open space and connects parks
- Identify locations that could improve equitable distribution through new facility development

These are just a few. ***We want to hear from you!***

CITY OF MONTEBELLO
PARKS MASTER PLAN

Key Definitions?

Key definitions that you may hear throughout the project:

- Population Based Standards
- Parkshed
- Distribution of Park Services
- 5 Min / 10 Min Walk or Bike Time

3

Workshop Schedule

6:00 – 6:10 Greet and Sign-in

6:10 – 6:20 Introduction

6:20 – 6:45 Presentation

6:45 – 7:15 Staff and Consultants Available for Questions

CITY OF MONTEBELLO
PARKS MASTER PLAN

4

Agenda / Outline

1. Stakeholder Interview Overview
2. Inventory Overview
3. Geographic and Park Acreage Gaps
4. Visual Preference Survey
5. Closing Remarks

5

Workshop #1 Recap

1. Project introduction & goals
2. Discussed what a park facilities master plan is
3. Key definitions
4. Shared the City parks and sizes
5. Discussed parksheds
6. Showed the project Storymap and how to add input

6

Project Goals

We want to hear from you!

7

Key Definitions

- Population Based Standards
- Parkshed
- Distribution of Park Services
- 5 Min / 10 Min Walk or Bike Time

Prop 68 Grant Funding

- Last round of the statewide Prop 68 grants (around 400 million dedicated to parks throughout California)
- Several parks qualify for this grant
- Major selection criteria includes
  - Project Location
  - Community Engagement
  - Operation and Maintenance Considerations
  - Summary About Project Needs, Benefits, & Readiness

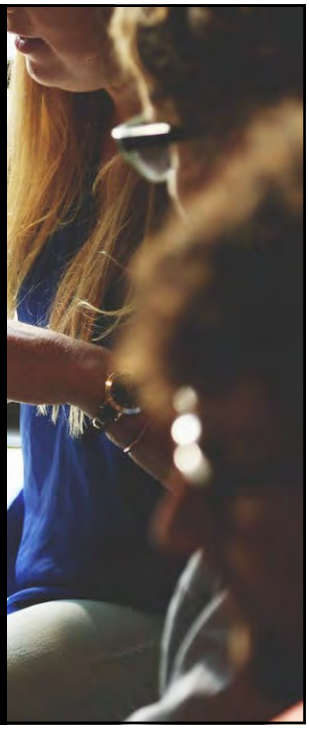
PROJECT SELECTION CRITERIA		MAX POINT VALUE
PROJECT LOCATION		
1.	Critical Lack of PARK SPACE	15
2.	Significant Poverty	16
3.	Type of Project	10
COMMUNITY ENGAGEMENT		
4.	Community Based Planning	18
5.	Employment or Volunteer Opportunities	6
6.	Partnerships or Committed Funding	3
OPERATION AND MAINTENANCE CONSIDERATIONS		
7.	Environmental Design	7
8.	Public Use Fees and Hours of Operation	5
SUMMARY ABOUT PROJECT NEED, BENEFITS, AND READINESS		
9.	Community CHALLENGES, Project Benefits and Readiness	20
MAXIMUM SCORE		100

CITY OF MONTEBELLO
PARKS MASTER PLAN

9

1

Stakeholder Interview Overview



10

Stakeholder Interview Input

- The team interviewed key staff and stakeholders to understand the current operations and opportunities and constraints of the park systems.
- The following members were interviewed:

  Staff: 5 members, May 14/15 and June 5, 2020

  Community Members: 5 sports group leaders , June 27, 2020

CITY OF MONTEBELLO PARKS MASTER PLAN

11

Staff Interview Input

- City staff shared their vision of taking more recreation programs to neighborhood parks with a goal to make parks a hub at each neighborhood
- There is a general need to increase senior programing
- City staff felt there was a need to improve communication on programming through implementation of a program guide
- Safety in the parks is a major issue due to homelessness and limited lighting. This is especially challenging for youth sports organizations

CITY OF MONTEBELLO PARKS MASTER PLAN

12

Community Interview Input

- Additional staff and financial resources are needed to provide updated facilities and expanded programs. Buildings are outdated and need general upkeep and renovated improvements. Daily upkeep of restrooms should be a priority.
- Overall, the City does a good job supporting sports throughout the community, but sports groups could use more space and time to host practices and games. Field scheduling could be more efficient and effective by using an automated field scheduling program.
- More attention should be paid to parks and amenities on the south side of town.

CITY OF MONTEBELLO PARKS MASTER PLAN

13

Poll Question #1

- There appears to be difficulty in obtaining and/or reserving fields for use. Which of the following ideas be your first choice in resolving this issue?
  a. Digital reservation system with shared calendars to see availability
  b. More fields
  c. More lighted fields / night play
  d. Joint use fields with the school district

CITY OF MONTEBELLO PARKS MASTER PLAN

Ways to Participate

- Next Public Workshop anticipated **mid-October**
- Check the City website for additional events and project products or surveys
- Leave us your email address and we will keep you abreast of upcoming engagement events and milestones
- Look out for survey in the mail (not distributed to all residents). Story map will have a survey as well. An open link version of the survey will also eventually be available for all to fill out.
- Visit the **project story map,** https://arcg.is/0yeqOa

2

Workshop Schedule

6:00 – 6:10	Greet and Sign-in
6:10 – 6:20	Introduction
6:20 – 6:45	Presentation on Feedback, Analysis & Draft Recommendations
6:45 – 7:15	Questions & Next Steps

3

Agenda / Outline

1. Survey Overview
2. Amenity Gaps
3. Infill Opportunities
4. Draft Recommendations
5. Park Specific Plans
6. Closing Remarks & Raffle

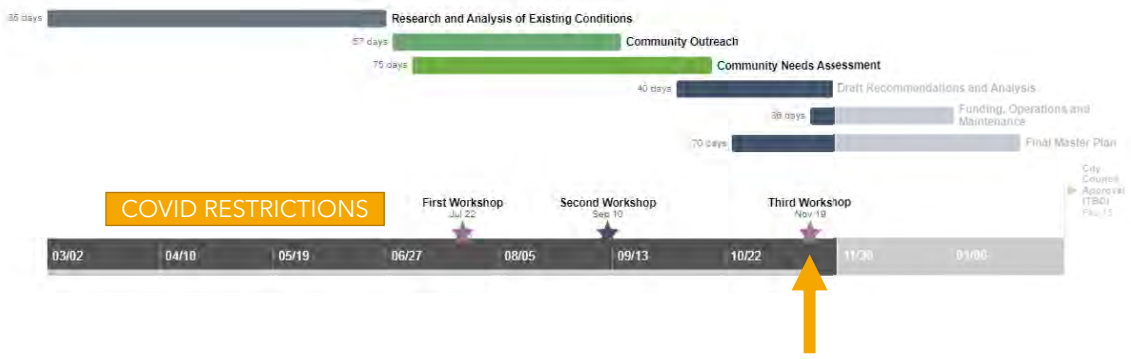
4

Workshop #2 Recap

1. Project recap & goals
2. Shared the stakeholder interview input
3. Went over NRPA population standards
4. Discussed geographic distribution of park facilities
5. Had a visual preference survey
6. Went over the project Storymap

5

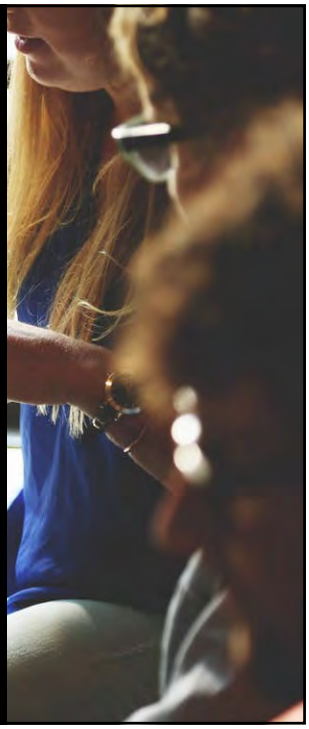
Schedule



6

1

Survey Overview



7

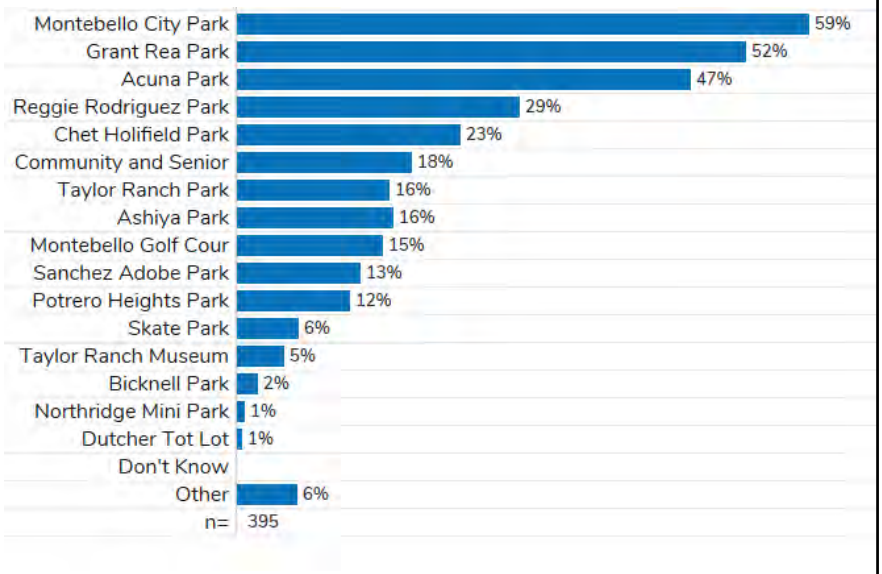
Survey Summary

- Approx. 400 responses to the statistically valid and open link surveys
- Survey supports feedback we've received to date
- Provides direction for draft recommendations

8

Current Usage & Proximity

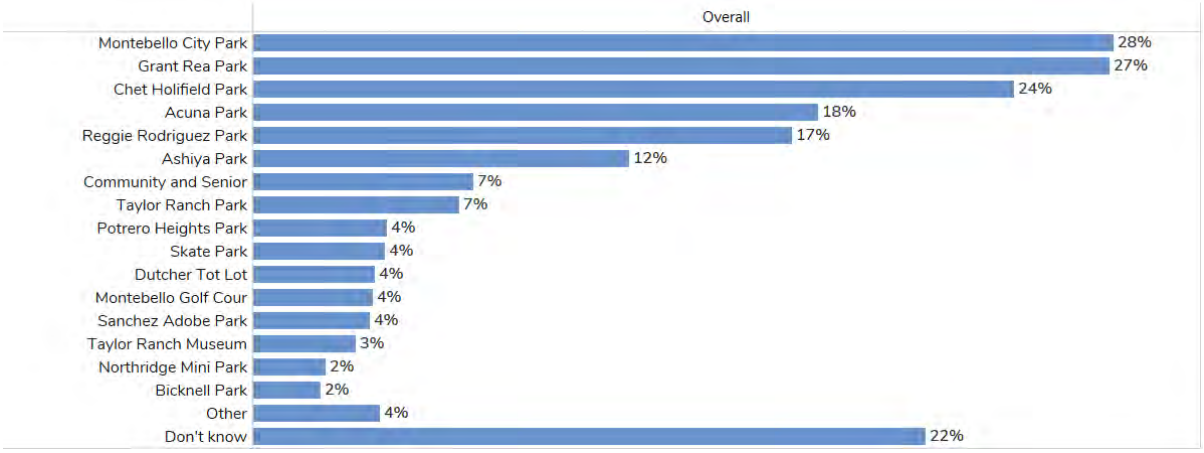
Which city parks/recreation facilities have been used by your household in the past 12 months?



9

Improvement & Additional Amenities

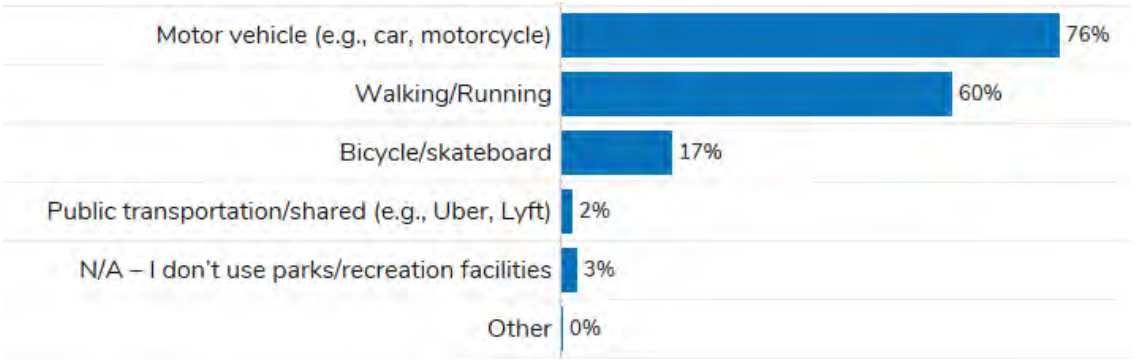
Which of the city parks/recreation facilities do you feel needs improvement and/or additional amenities to meet future needs?



10

Mode of Transportation

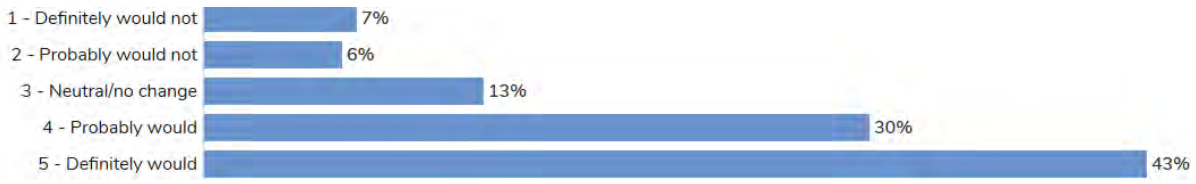
When you and/or your household visit parks, community centers and/or recreation facilities, which mode(s) of transportation do you typically use?



11

Change in Use

If additional trail connections, bike lanes/paths, pedestrian walkways and/or street crossings were developed, would you and/or your household walk or ride a bicycle to get to parks, neighborhood centers and/or recreation facilities more often?



12

Current Facilities: **Importance**

Q 11: Please rate A: how important are the following facilities and services to your household:
Overall

Rating Category	Avg.	n=	Percent Responding: 1 & 2	3	4 & 5
City parks and open spaces	4.5	386	4%	10%	86%
Amenities at City parks (e.g., picnic areas, restrooms)	4.5	385	6%	8%	86%
Trails and pathways	4.3	382	8%	11%	81%
Athletic courts (e.g., basketball, tennis)	4.1	379	13%	14%	72%
Youth recreation and sport programs	4.0	373	16%	13%	71%
Special events	4.0	375	10%	19%	71%
Community centers	4.0	385	9%	23%	68%
Adult recreation and sport programs	3.9	373	14%	21%	65%
Senior programs	3.9	380	15%	21%	64%
Aquatic programs	3.9	373	15%	21%	64%
Athletic fields (e.g., baseball, soccer)	3.9	382	18%	16%	65%

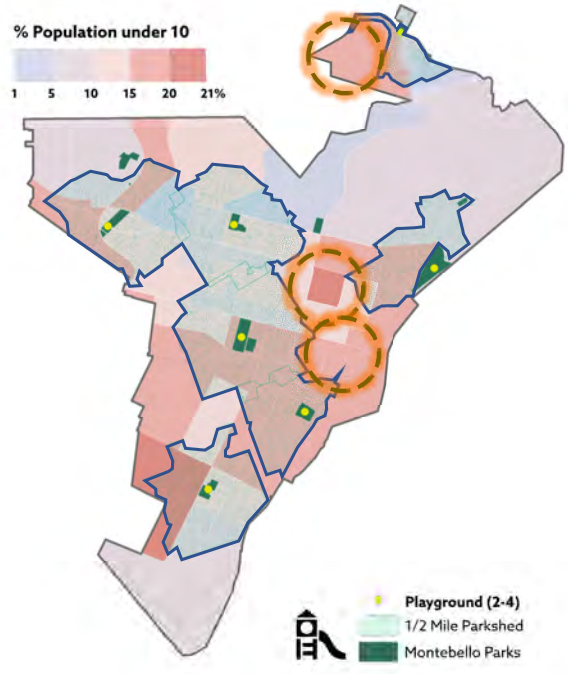
Population under 10 & Playgrounds

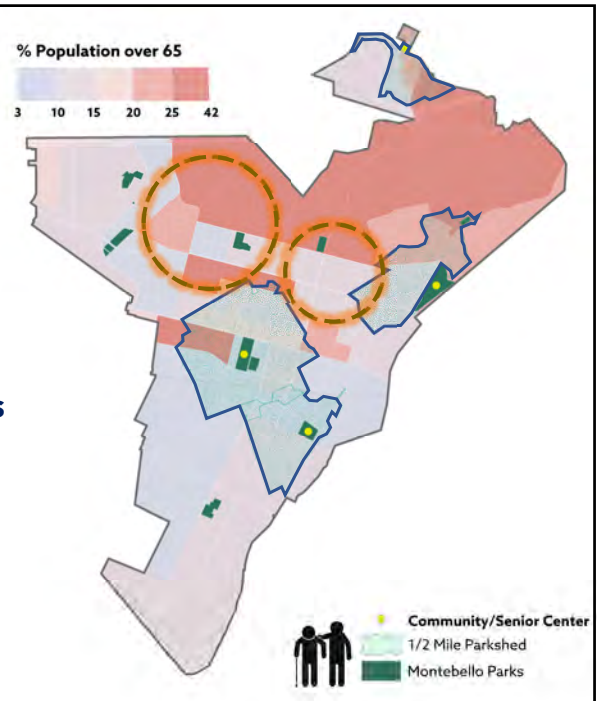
- Percent of population under 10 years-o based on the American Community Survey 5-Year Estimates
- A total of **16 Playgrounds citywide**
- NRPA standard is approximately **16 for similar population**



27

Population Over 65 & Community/Senior Centers

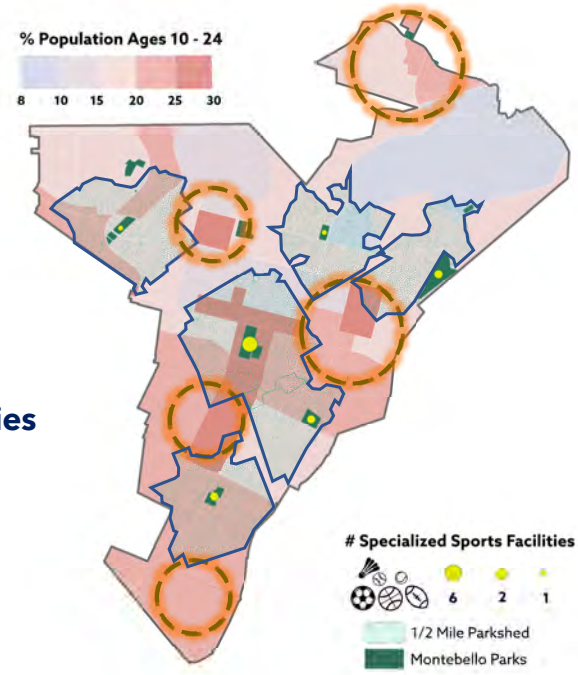
- Percent of population over 65 years-old, based on the American Community Survey 5-Year Estimates
- A total of **4 Community/Senior Centers citywide**
- NRPA standard is approximately **3 for similar population**



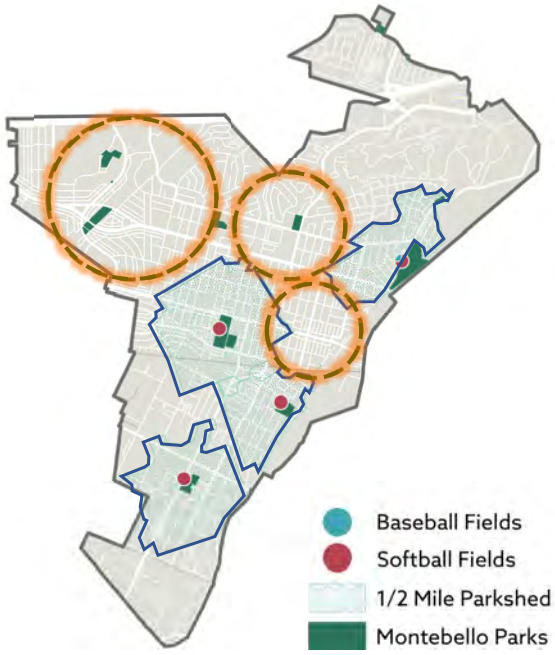
28

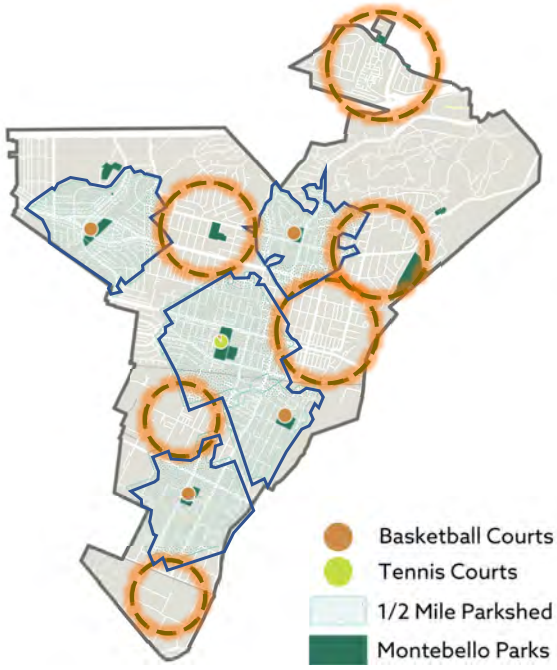
Population Ages 10-24 & Sports Facilities

- Percent of population between 10–24 years-old, based on the American Community Survey 5-Year Estimates
- A total of **14 Specialized Sports Facilities citywide**
- NRPA standard is around **40 sports facilities**



29





30

Poll Question #2

- Which of the following items do you feel are needed in your neighborhood?
  a. More playgrounds
  b. Senior, Teen, and/or Recreation Centers
  c. Sport courts (tennis, basketball, etc.)
  d. Sport fields (soccer, baseball, etc.)
  e. More picnic or social areas

31

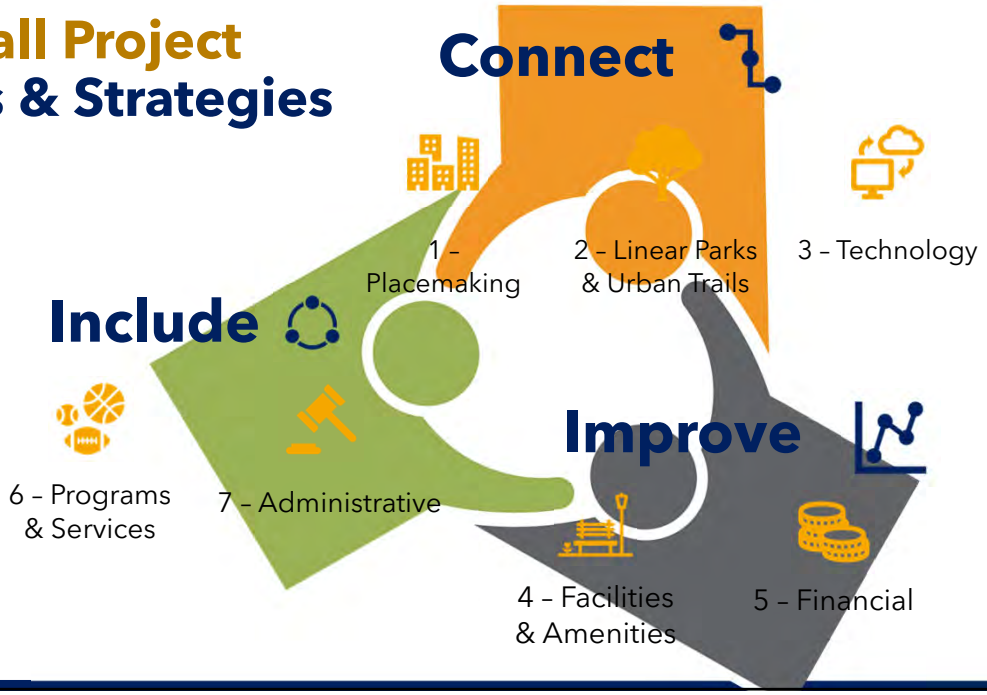
42

Overall Project Goals & Strategies



43

Goal 1: **Connect**

Strategy 1 – Placemaking

Strategy 2 – Linear Parks & Urban Trails

Strategy 3 – Technology

44

Goal: **Connect**

Strategy 1
Placemaking

Objectives:

1. Include Public Art
2. Encourage Social Interaction through Highly Visible Places
3. Increase Park Identity, Entries & Wayfinding

45

Goal: **Connect**

Strategy 2
Linear Parks & Urban Trails

Objectives:

1. Develop linear parks & promenades
2. Create a unique linear trail at the Rio Hondo

46

Goal: **Connect**

Strategy 2
Linear Parks & Urban Trails

Objectives:

3. Establish major "green corridors" within the City
4. Create a system of signed urban trails that lead to parks
5. Connect to other urban trails outside of the City

47

Goal: **Connect**

Strategy 2
Linear Parks & Urban Trails

Objectives:

6. Provide complete streets that include walkable and bike friendly networks throughout the City especially those that lead to parks

48

Goal: **Connect**

Strategy 3
Technology

Objectives:

1. Develop a Citywide GIS web-based map for fut park planning/ park development conditior
2. Digitally connect secur systems within parks as well as irrigation contrc systems

49

Goal: **Connect**

Strategy 3
Technology

Objectives:

3. Provide a digital scheduling and facility management suite with easy-to-use GIS to find parks, amenities & programs
4. Include virtual programs, events & activities

50

Goal 2: Improve

Strategy 4 – Facilities & Amenities

Strategy 5 – Financial

51

Goal: **Improve**

Strategy 4
Facilities & Amenities

Objectives:

1. Consider improvements / infill of City owned properties
2. Include new pocket parks and mini parks
3. Address deferred maintenance throughout the City

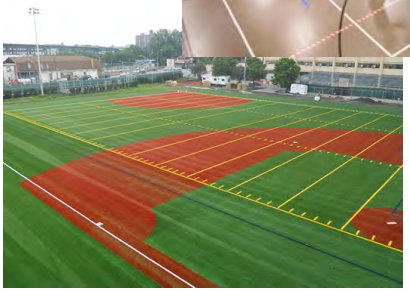
52

Goal: **Improve**

Strategy 4
Facilities & Amenities

Objectives:

4. Improve the current level of service throughout the City
5. Explore adding additional indoor facilities, rec, teen, and senior centers
6. Develop flexible use areas



53

Goal: **Improve**

Strategy 4
Facilities & Amenities

Objectives:

7. Provide multi-purpose courts and combine selected court standard to accommodate trends and more variety in court sports

54

Goal: **Improve**

Strategy 5
Financial

Objectives:

1. Explore additional funding options
2. Explore opportunities to increase sponsorships
3. Track grants and funding opportunities

55

Goal: **Improve**

Strategy 5
Financial

Objectives:

4. Implement a comprehensive replacement schedule for park amenities
5. Continue the asset management system

56

Goal 3: **Include**

Strategy 6 – Programs & Services

Strategy 7 – Administrative

57

Goal: **Include**

Strategy 6
Programs & Services

Objectives:

1. Expand programs and services
2. Enhance special event programming
3. Include educational and nature/environmental programs

58

Goal: **Include**

Strategy 6
Programs & Services

Objectives:

4. Continue to monitor affordability of programs and services
5. Expand indoor programs and increases opportunities for senior, teen, and community centers

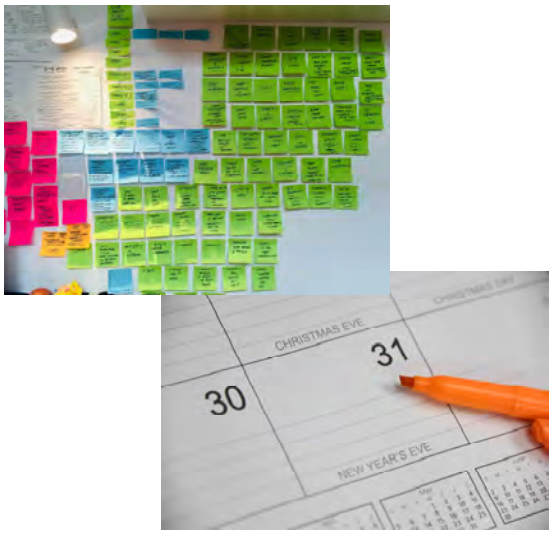
59

Goal: **Include**

Strategy 7
Administrative

Objectives:

1. Improve partnerships and joint use agreements
2. Staff appropriately to meet current demand and maintain established quality service



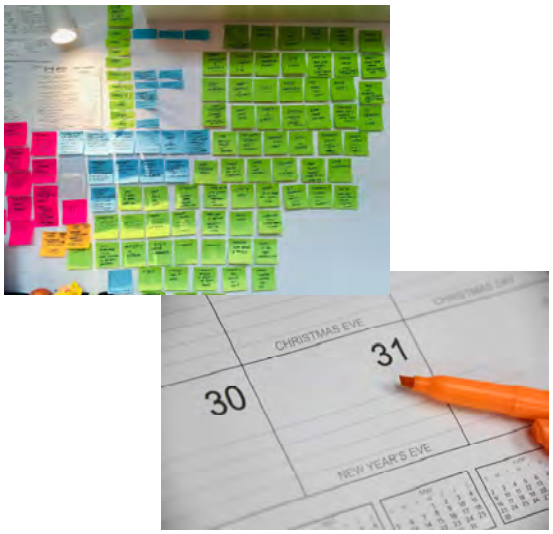
60

Goal: **Include**

Strategy 7
Administrative

Objectives:

3. Explore additional partnerships to assist with funding, volunteering, and marketing
4. Explore making the facility and park rental fee easier



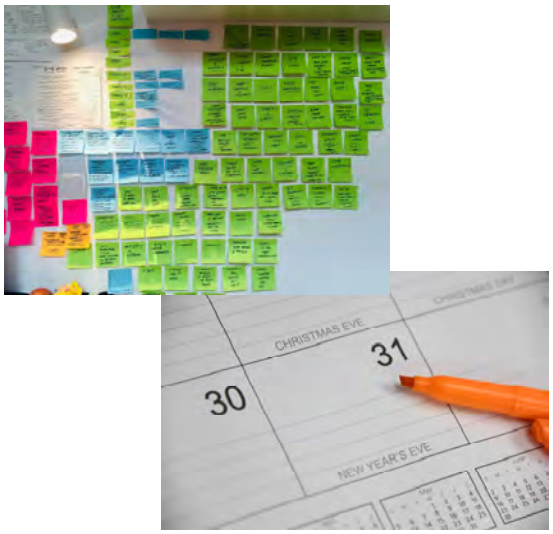
61

Goal: **Include**

Strategy 7
Administrative

Objectives:

5. Improve internal and external communication about division activities, events and services



62

Poll Question #4

- The City offers some level of recreation programs, which of the following statements most closely aligns with your opinions on programs?
  a. Expand recreation programs and try to offset costs with increased user fees.
  b. Privatize recreational programs and partner with more non-profit organizations to run programs for a fee.
  c. Keep the same level as currently offered and do not expand the program.

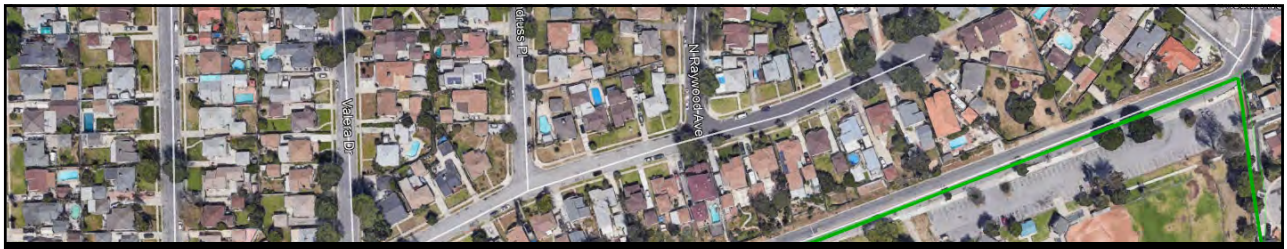
69



Grant Rea Park

70

Opportunity Areas: **City Park**

- Considering multi-use fields and multi-use facilities to balance city-wide amenities and equity

71

6

Closing Remarks

72

Ways to Participate

- Park specific presentation/s anticipated **January to February**
- Check the City website for additional events and project products or surveys
- Leave us your email address and we will keep you abreast of upcoming engagement events and milestones
- Visit the **project story map,** https://arcg.is/0yeqOa

73

RAFFLE

74

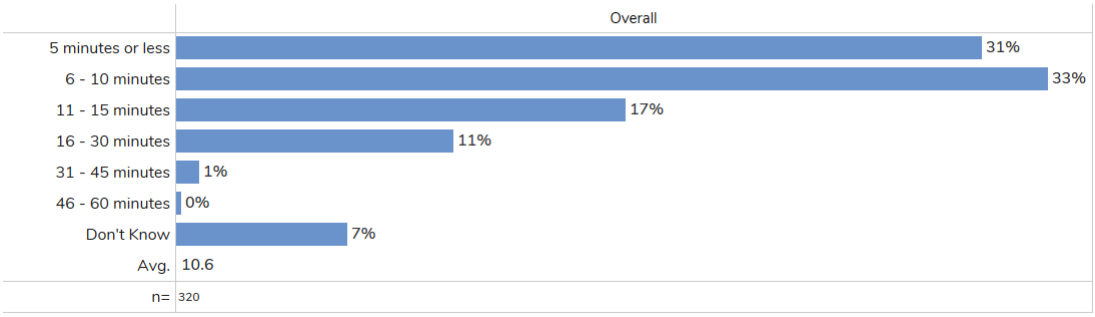
Thank you for attending tonight's workshop!

Be sure to leave a comment before signing off

75

Time to Closest Park/Facility

Q 7: If you and/or a member of your household were to walk to the closest park, community center and/or other recreation facility to your home, approximately how long would it take to get there (one direction)?



Source: RRC Associates and KTUA

76

Appreciation for Parks & Recreation – Open Ended Comments

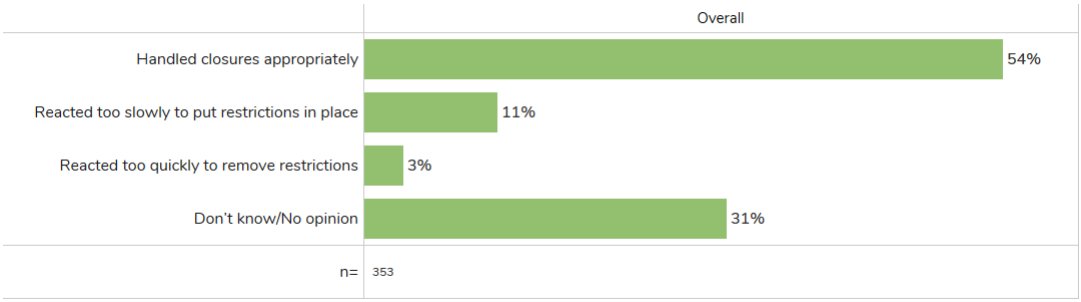
Q20: Do you have any specific comments on how the COVID-19 pandemic has impacted your access to parks and recreation facilities and how that has affected your appreciation for parks and recreational facilities?

77 comments :

77

Appreciation for Parks & Rec & Handling of Closures

Q 21: How do you feel about how the City of Montebello handled parks and recreation closures?



Source: RRC Associates and KTUA

Goal: Connect

Strategy 1 – Placemaking

1. Public Art
    a. Establish a public arts commission
    b. Encourage public art that's representative of the community
    c. Allocate areas within Montebello Parks for art opportunities

84

Goal: Connect

Strategy 1 – Placemaking

2. Social Interaction
    a. Incorporate public plazas and gathering areas within the public realm
    b. Provide areas for family gatherings and events
    c. Establish programmed activities that encourage social interaction (i.e., movies in the park, holiday events, etc.)

85

Goal: Connect

Strategy 1 – Placemaking

3. Identity
    a. Identify and bring out the history of the City and site
    b. Look for identifiable elements within each park and celebrate them
    c. Incorporate entry monuments or gateways into parks to aid in park identity
    d. Include informational signage that identifies the character of the park

86

Goal: Connect

Strategy 1 – Placemaking

4. Character
    a. Establish a character of the City that's incorporated into each park
    b. Have a park character that's unique for each but relates to the character of the City
    c. Integrate park theme and character into site features and buildings
    d. Ensure everything is set in context

Park Facilities Master Plan Recap

1. Project recap & goals
2. Shared the stakeholder interview input
3. Went over NRPA population standards
4. Discussed geographic distribution of park facilities
5. Had a visual preference survey
6. Went over the project Storymap

9

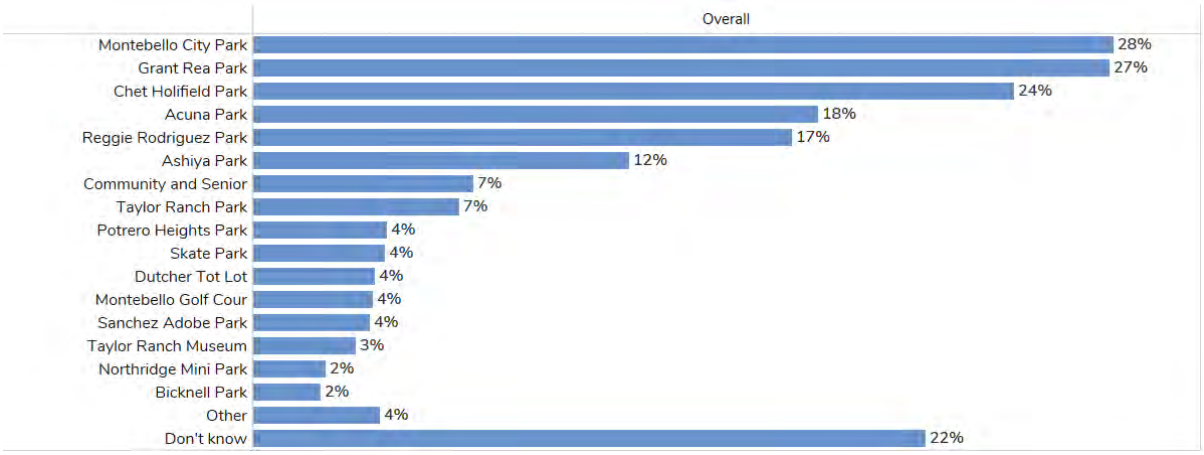
Survey Summary

- Approx. 400 responses to the statistically valid and open link surveys
- Survey supports feedback we've received to date
- Provides direction for draft recommendations and site plans

10

Improvement & Additional Amenities

Which of the city parks/recreation facilities do you feel needs improvement and/or additional amenities to meet future needs?



11

Current Facilities: **Importance**

Please rate how you think the current facilities and services to your household overall

Rating Category	Avg.	n=	Percent Responding: 1 & 2	3	4 & 5
City parks and open spaces	4.5	386	4%	10%	86%
Amenities at City parks (e.g., picnic areas, restrooms)	4.5	385	6%	8%	86%
Trails and pathways	4.3	382	8%	11%	81%
Athletic courts (e.g., basketball, tennis)	4.1	379	13%	14%	72%
Youth recreation and sport programs	4.0	373	16%	13%	71%
Special events	4.0	375	10%	19%	71%
Community centers	4.0	385	9%	23%	68%
Adult recreation and sport programs	3.9	373	14%	21%	65%
Senior programs	3.9	380	15%	21%	64%
Aquatic programs	3.9	373	15%	21%	64%
Athletic fields (e.g., baseball, soccer)	3.9	382	18%	16%	65%
Adaptive programs at City facilities	3.8	364	16%	22%	61%
Kids club/camps	3.8	373	20%	18%	62%

5 - Very important
4
3
2
1 - Not at all important

31

1 BUILDING ENHANCEMENTS

- Enhance indoor / outdoor connections
- Consider areas for art / murals
- Study for more functional use and aesthetic upgrades

32

2 MULTI-SPORT COURTS

- Enhance basketball hoops
- Consider additional sports in footprint
- Include seating areas around court
- Consider back and partial side fencing

33

3 NEW SOCCER FIELD

- Enhance grass area and irrigation system
- Consider synthetic turf for year-round play
- Consider field lighting

34

4 MULTI-USE SPORTS FIELD

- Consider area for multi-use sports area
- Enhance backstops, dugouts, and spectator seating at existing field
- Upgrade and retrofit field lighting

35

5 FAMILY ACTIVITY AREA

- Consider permanent activities such as: ping pong, corn hole, and game tables
- Allow for informal lawn games and events such as: frisbee, ladder toss, etc.

36

6 NEW PICNIC SHELTERS

- Include new picnic shelters and seating
- Consider solar on structure
- Include BBQ areas

37

7 ENHANCE PLAYGROUND AREA

- Look for opportunities to include all-abilities play equipment
- Enhance playground area
- Increase playground area

38

8 TRAIL LOOP WITH FITNESS STATIONS

- Include DG fitness loop around perimeter of park
- Include fitness stations
- Include areas for seating

39

Poll Question #1

- Which new park facilities are you most supportive of?
  a. Multi-sport court
  b. Small soccer field
  c. Multi-use field area
  d. Family event and picnic area
  e. Playground

40

Poll Question #2

- Which general park improvements at are you most supportive of?
  a. Enhancing community center
  b. Enhancing site furnishings
  c. Improve restroom building
  d. Resurface parking lot and add charging stations

49

1 MULTI-USE SPORTS FIELD

- Provide soccer field space, up to age 14
- Synthetic Turf
- Shared space with adjacent baseball fields to conserve space

50

2 Baseball Field

- Provide new baseball field facilities
- Synthetic Turf Field
- Use of temporary fencing for outfield when in use

51

3 MULTI-SPORT COURTS

- Combined court facilities for multiple sports, such as basketball, tennis, pickleball, futsal, etc.
- Court can be adapted to the sport being played

52

4 Enhanced Playground

- Provide designated play areas for multiple age groups
- Provide improved connections and accessibility

53

5 Relocated Building Enhancements

- Relocated Building to improve park visibility and function
- Enhance facility to support adjacent park uses
- Provide restroom and concessions

54

6 Entry Plaza

- Enhanced entry gathering space to provide greater sense of arrival to park
- Improved connection to multi-use sports fields

55

7 Fitness Stations

- Various fitness stations located throughout the park
- Provides various types of exercise
- Improves activation of entire park

56

8 Community Garden

- Provides designated garden space for use by the community
- Improves community engagement

57

9 Entry Plaza at Pedestrian Bridge

- Entry space to activate this "back area" of the park

58

10 Family Activity Area

- Small play area at East end of park
- Provide passive gathering space for families

59

Poll Question #3

- Which new park facilities are you most supportive of?
  - a. Multi-sport courts
  - b. Multi-use field area
  - c. Enhanced playgrounds
  - d. Community garden

TOTAL		160

Q9 What issues have you encountered in using park facilities?

Answered: 147 Skipped: 28

#	RESPONSES	DATE
1	They don't look like they are cared for often, batting cages are pretty old, Zoo needs a face lift (I know it takes money so perhaps we could brainstorm on fundraisers), safety is an issue as are the homeless folks. Not sure how that is being addressed especially since the Rio Hondo river bank is right next to the park. The bike lane is great but it's also not safe.	2/16/2021 1:06 PM
2	I want the restroom to be more cleaner... thank you 😊	2/16/2021 10:42 AM
3	None	2/12/2021 9:57 PM
4	Litter and vagrants.	2/12/2021 6:31 PM
5	Closed bathrooms.	2/12/2021 4:12 PM
6	Homeless people, closed, old and dirty bathrooms.	2/12/2021 3:02 PM
7	The restrooms are not well maintained. Dirty and do not feel safe using the restroom	2/12/2021 1:04 PM
8	On some days, litter around the back ends (near the trail) is more prevalent.	2/12/2021 11:25 AM
9	Lacks curb appeal. Great park, great sports park but has a hard time being anything but a sports park. Great potential.	2/12/2021 11:18 AM
10	We need more camps for sports not all kids are good at sports or they don’t have a dad to teach them. We miss firework show our city has no free community classes crafts baking like neighbors cities	2/12/2021 10:55 AM
11	Too many softball fields. Other sports like soccer would benefit. Bathrooms are outdated and dirty.	2/12/2021 10:49 AM
12	No issues	2/12/2021 10:47 AM
13	None recently	2/12/2021 10:45 AM
14	Restrooms are dirty	2/12/2021 10:21 AM
15	Trash	2/12/2021 10:16 AM
16	Restrooms	2/12/2021 10:15 AM
17	People smoking cigarettes, cigars, vaping, and marijuana in the park.	2/12/2021 9:59 AM
18	The playground area filled with trash	2/12/2021 9:06 AM
19	Right now during COVID, the biggest issue is that people tend to gravitate toward each other & it makes me uneasy. My son & I try to stay far away from others during our day trips, but people still seem to invade our space. The only other thing that concerns me is that there are usually a few wayward people hanging out watching. Weird.	2/11/2021 10:32 PM
20	bathroom don't feel safe, field are rundown	2/11/2021 10:31 PM
21	Homeless persons, trash	2/11/2021 9:15 PM
22	Dirty and needs yo be more picnic area tables. They are kind too close to each other as well	2/11/2021 7:58 PM
23	The park is an eye sore. It’s dirty, the bathrooms are never clean. The grass is always dead. Outdated, parking lot old with pot holes. Bleachers are old and unsafe.	2/11/2021 7:52 PM
24	Restrooms dirty, outdated buildings, football and baseball field not maintenance, graffiti, wolves	2/11/2021 7:52 PM
25	Zoo not opened.	2/11/2021 6:24 PM
26	Lights at dusk	2/11/2021 5:50 PM
27	dirty all through, gangster around, people drinking alcohol,	2/11/2021 5:44 PM
28	no parking	2/11/2021 5:25 PM
29	Bathrooms dirty sketchy people	2/11/2021 5:11 PM
30	Restrooms are atrocious.	2/11/2021 4:49 PM

31	Bathroom's need more maintenance and upkeeping	2/11/2021 4:35 PM
32	Football	2/11/2021 4:30 PM
33	Needs more lighting and nicer trails and more soccer fields	2/11/2021 4:29 PM
34	None	2/11/2021 4:24 PM
35	None	2/11/2021 4:11 PM
36	None	2/11/2021 3:59 PM
37	Poor bathroom maintenance	2/11/2021 3:59 PM
38	The dirtiness of the restrooms.	2/11/2021 3:57 PM
39	Parking	2/11/2021 3:51 PM
40	homeless	2/11/2021 3:40 PM
41	Poor restrooms. Grass with uneven ground makes it hard to walk on. Need walking path	2/11/2021 3:37 PM
42	the restrooms are not nice -- please update them	2/11/2021 3:37 PM
43	Homeless, outdated amenities	2/11/2021 1:15 PM
44	Dirty restrooms	2/3/2021 4:22 PM
45	Restrooms are closed or in disrepair. Water facets are not maintained. Neglect for facilities, such as graffiti.	2/3/2021 7:52 AM
46	None really at this time with Cov19 ☹	2/2/2021 8:10 PM
47	Lighting and lack of community facilities	2/2/2021 1:35 PM
48	Outdated and dirty bathrooms. Dark areas at night that are unsafe. Excessive number of baseball fields when those areas can be used for other activities (multi-purpose fields, i.e. soccer, football, etc.). Many people take their dogs there but no dedicated fences area for them (i.e. dog park).	2/2/2021 1:08 PM
49	Water park needs clear instructions of operation and times. Cracked sidewalk when using roller skates. Muddy holes. More seating areas	2/2/2021 11:36 AM
50	The noise problem around us is the voice of people with no quality all over the world,	2/1/2021 12:06 PM
51	I've met it before, but the park has solved it	2/1/2021 12:06 PM
52	The fields are not well kept and the bathrooms are not well kept either and very outdated.	2/1/2021 11:40 AM
53	none	2/1/2021 10:20 AM
54	After the rain two days ago, if you go again today, some equipment is still wet.	2/1/2021 8:58 AM
55	Sometimes there will be some crazy people around me, their actions make my children confused, and sometimes I can't answer them.	2/1/2021 8:58 AM
56	Some park facilities are old and need to be upgraded, and some need to be protected, because there are children	2/1/2021 6:36 AM
57	none	1/31/2021 7:37 PM
58	Homeless people, dogs not on leashes	1/31/2021 9:26 AM
59	Cleaner bathrooms would be nice.	1/30/2021 10:09 PM
60	Bathrooms are dirty always, the amenities are not kept up, and seems like no one cares about the park but those that are there daily. If you do make changes, make sure to keep up with them. This park and these kids deserve it	1/30/2021 8:01 PM
61	Restrooms not clean	1/30/2021 3:51 PM
62	Dirty restrooms. Insufficient lighting when the baseball or football season aren't in session. Coyotes. Broken cement.	1/30/2021 8:53 AM

63	None	1/30/2021 7:55 AM
64	Dirty Restrooms	1/30/2021 7:03 AM
65	Homeless. Transients	1/30/2021 6:22 AM
66	The monkey robbed the banana	1/30/2021 5:36 AM
67	You don't get more sunlight	1/30/2021 12:52 AM
68	Make your lawn as large as possible and embrace the sun	1/30/2021 12:46 AM
69	They are all good and satisfactory	1/30/2021 12:39 AM
70	Can the baseball field be closer to where the children play	1/30/2021 12:30 AM
71	The atmosphere of the park's home facilities is less	1/30/2021 12:22 AM
72	There is no	1/30/2021 12:20 AM
73	The indoor activity area is relatively small	1/30/2021 12:14 AM
74	It's dark in some places at night	1/30/2021 12:04 AM
75	The road signs are hard to find	1/29/2021 11:54 PM
76	The facilities of the course are failing.	1/29/2021 11:46 PM
77	All aspects of the facilities are relatively old	1/29/2021 11:38 PM
78	homeless ppl, dirty restroom, picnic area destroyed, graffiti, only baseball fields.	1/29/2021 10:18 PM
79	There is no	1/29/2021 8:39 PM
80	Homeless.	1/29/2021 7:46 PM
81	Restrooms are dark and dirty. Need more lighting in Restrooms. Baseball fields could be modernized dugout on the pony field could be redone.	1/29/2021 7:45 PM
82	Dirty bathrooms	1/29/2021 6:29 PM
83	Lightning, not enough seating, not enough parking, dirty bathrooms	1/29/2021 5:50 PM
84	Not enough field access for girls softball.	1/29/2021 5:33 PM
85	Homeless population	1/29/2021 5:20 PM
86	Trash	1/29/2021 4:51 PM
87	Lots of homeless people in the park at all hours	1/29/2021 4:12 PM
88	Homeless living there and living in the restrooms. Exposing themselves to children. Having RV’s living there. I no longer go for those reasons. Just not safe even during the day.	1/29/2021 4:06 PM
89	None	1/29/2021 2:43 PM
90	Restrooms	1/29/2021 2:35 PM
91	Well defined running path that is cushioned	1/29/2021 1:13 PM
92	Druggys from the riverbed	1/29/2021 9:18 AM
93	The bathrooms are not well-maintained. They are disgusting.	1/29/2021 7:12 AM
94	Restrooms	1/29/2021 12:17 AM
95	Parking	1/28/2021 11:52 PM
96	N/A	1/28/2021 11:04 PM
97	Restrooms are awful. Always dirty. Lots of animal poop everywhere. The park just looks dirty/filthy.	1/28/2021 10:32 PM
98	The bathrooms are not good, the batting cages and baseball fields need updating	1/28/2021 8:34 PM
99	Unaanitized/maintained restrooms at grand rea park	1/28/2021 7:09 PM

100	The baseball fields and bleachers need some updating.	1/28/2021 6:56 PM
101	No clean, graffiti, not enough facilities,	1/28/2021 6:52 PM
102	Unclean bathrooms	1/28/2021 3:46 PM
103	None	1/28/2021 3:18 PM
104	The only issue was the restroom right by the playground. They were always filthy.	1/28/2021 12:28 PM
105	Restrooms not open or water fountains not on. Trash left by people using the park Safety issues with homeless or men gathering at grant Rea Park	1/28/2021 11:58 AM
106	Mist good, restroom maintenance could be better	1/28/2021 11:51 AM
107	0	1/28/2021 11:44 AM
108	The parking lot is really unpaved and lots of loose gravel	1/28/2021 11:19 AM
109	Playground equipment is not well maintained. Restrooms are disgusting. To dark and not enough lighting in late afternoon or susnset.	1/28/2021 10:50 AM
110	The bathrooms need to be updated and cleaned more often	1/28/2021 10:05 AM
111	Playgrounds are awful.	1/28/2021 9:46 AM
112	Sus people hanging around once it gets closer to the evening.	1/28/2021 9:10 AM
113	Nothing outrageous	1/28/2021 8:50 AM
114	Potrero Park at night has suspicious individuals	1/28/2021 8:40 AM
115	Poor lighting, unsanitary, height of stalls are too small. The snack bars are usually closed.	1/28/2021 8:14 AM
116	it seems dirty and ran down. I could use a refresher. as well as more patrols because people are doing drugs on the benches towards the back. The trail doesn't feel as safe as they should.	1/28/2021 8:14 AM
117	None	1/28/2021 8:10 AM
118	Dirty restrooms	1/28/2021 7:26 AM
119	Cleanliness and quality of equipment is an issue at times, especially at Ashiya Park.	1/27/2021 9:30 PM
120	None at all.	1/27/2021 10:16 AM
121	Cleanliness	1/27/2021 10:13 AM
122	Restroom not clean. Not enough playground equipment & picnic benches & tables in shaded areas for picnicking.	1/27/2021 9:09 AM
123	None	1/27/2021 4:58 AM
124	It needs a tennis court. The water playground is way high. The picnic area is dirty.	1/27/2021 1:08 AM
125	The restrooms are super gross. They need to be updated like smith parks.	1/26/2021 11:57 PM
126	Very little parking available.	1/26/2021 10:24 PM
127	The lock down. But no toilet paper in the bathrooms.	1/26/2021 10:00 PM
128	Nothing to mention	1/26/2021 6:25 PM
129	Restrooms are too far from the baseball fields that are located near the batting cages	1/26/2021 4:52 PM
130	Lighting in the lawn areas is scarce and the walkways have a lot of cracks/lifts.	1/26/2021 3:45 PM
131	The Rivas brothers ran a horrible football program. Poor maintenance and quality of the pavement and overall facilities.	1/26/2021 3:32 PM
132	Coyote problems since it is right next to River bed,also restrooms can be a bit more maintained.	1/26/2021 2:37 PM
133	Public drinking during the day. Open containers.	1/26/2021 2:01 PM

134	To many transits around. Not safe for the kids. Facities are quit dirty the last few visits. No lighting.	1/26/2021 1:13 PM
135	The bathroom	1/26/2021 12:58 PM
136	Just due to covid, we don't feel safe.	1/26/2021 12:50 PM
137	Dirty Restrooms and no water fountains	1/26/2021 12:42 PM
138	Very outdated.	1/26/2021 11:55 AM
139	Restrooms not working properly	1/26/2021 11:46 AM
140	Homeless and junkies	1/26/2021 11:42 AM
141	Dirty bathrooms and no lights for the baseball field in the hole nor bleachers	1/26/2021 11:24 AM
142	Broken restrooms dirty restrooms in stocked restrooms kids smoking weed by the playground	1/26/2021 11:24 AM
143	There are many transients, barnyard zoo needs updating, not enough security	1/26/2021 11:03 AM
144	Doesn’t have a soccer field or nice trails to walk	1/26/2021 10:49 AM
145	Bathrooms are another in the best shape	1/26/2021 10:43 AM
146	The restrooms are rarely clean or have soap	1/26/2021 10:27 AM
147	No issues so far	1/26/2021 10:24 AM

Q10 Specific Park AmenitiesPlease tell us your priority for including the following potential park amenities in the site plan from lowest to highest. (Note, please try to select an amenity in each column and limit response to 3 checks per priority).

#	RESPONSES	DATE
1	Just by reviewing it, seems like option 2 addresses more of what I think the community needs and what I'd like to see, especially like that you include a Dog park!	2/16/2021 1:10 PM
2	I would love the 2 option... it's a great plan to do something for the community... thank you so much in advance ❤	2/16/2021 10:47 AM
3	1	2/12/2021 10:01 PM
4	Option 2 is preferable. I don't like that we'd have to lose a baseball field, but I think the things we do get outweigh what we lose.	2/12/2021 4:18 PM
5	Need more softball fields	2/12/2021 3:05 PM
6	Personally love the layout of Option 2! I'd be interested in seeing if more pathways could be included. Or more disability accessible areas.	2/12/2021 11:28 AM
7	All our parks are in great need every city around us has better everything we don't. South central has better activities	2/12/2021 10:58 AM
8	Dog park is essential for a community. Same with multi purpose fields.	2/12/2021 10:53 AM
9	Improvements are needed	2/12/2021 10:48 AM
10	Both look like amazing plans, however, my family and I prefer option 2. After reviewing both plans thoroughly, I do not feel that the community garden will benefit the community. Who will maintain the garden and allow it to remain looking fruitful? I feel that community members will continue to pick from the garden leaving it bare, wilted and deserted. I have seen this happen often with the gardens at local school sites within the Montebello Unified School District. Many funds were spent on these gardens (from maintenance, purchases of soil, fruits, vegetables, etc.) and eventually failed, resulting in neglected-empty crates. Instead of having a community garden, please consider a basket ball court for the younger "adolescent" children and a separate court for the adults. Thank you.	2/12/2021 10:26 AM
11	Option 2 looks really good! I like the addition of the dog park. Great idea! However, I think you should add a walking path. We all need to get a little more exercise & I would really like to walk locally rather than going to another park with clearly marked paths. Other than that, it really looks great & I can't wait to see the upgrades.	2/12/2021 8:35 AM
12	ok	2/11/2021 10:36 PM
13	I would like the animal farm to remain.	2/11/2021 9:19 PM
14	1	2/11/2021 8:07 PM
15	Prefer option 1	2/11/2021 5:56 PM
16	Option 1 looks best	2/11/2021 4:34 PM
17	No	2/11/2021 4:27 PM
18	No	2/11/2021 4:12 PM
19	Would love dog park!	2/11/2021 4:01 PM
20	I prefer option 1	2/11/2021 4:01 PM
21	I love option 2	2/11/2021 1:17 PM
22	What about the upper area? The girls pony tail field. Is that not going to be upgraded? Also I dont see paved walking trails.	2/3/2021 4:30 PM

23	I would hope that park maintenance is factored into the plan. More baseball fields needed to accommodate the youth sports from parks and rec.	2/3/2021 8:00 AM
24	Congrats on really addressing all needs of our community in Option 2. It looks amazing. I can see it as a signature of our community. Perhaps my only feedback would be to ensure the multi-purpose field to include both the full-size soccer field and the the	2/2/2021 1:27 PM
25	Love option 2. A dog Park in Montebello would be amazing and I like the layout of the fields and playgrounds. Would a walking trail around the park be able to be added?	2/2/2021 11:43 AM
26	To tell you the truth, there is little difference between the two pictures, but if you follow the second picture, it will be more detailed.	2/1/2021 12:11 PM
27	The design of the second picture may be clearer, which can show the serious attitude. The first picture is like the weather of haze or sandstorm, which is a bit terrible.	2/1/2021 12:11 PM
28	I prefer option 2 .... dog park !!!	2/1/2021 10:22 AM
29	I think the idea of option one is more exciting, which will make the activity space more comfortable	2/1/2021 9:05 AM
30	I prefer the second one	2/1/2021 6:47 AM
31	No	1/31/2021 7:42 PM
32	This park needs basketball court(s) and I truly hope the plan to add new/multi-use sport courts will include that. Plan one includes several soccer fields, which I like but some of them are shared with baseball fields. This park is overran by baseball year round and I doubt they will share the field with soccer. This is going to be a problem. What about a skate park? This can go in place of the batting cages and zoo.	1/31/2021 9:53 AM
33	This park is the place our kids play baseball. You are taking baseball fields from our kids. You will be hurting our kids with less fields for them. You can do a dog park and soccer field somewhere else maybe mi te Elo park or Acuna park. You are taking away the open space. Park will look too crowded and we need more parking. What is a solution for parking it's already bad with k Ku having baseball now that you want to add more to the park we will need a parking structure or something. Let's really look into what our children need	1/31/2021 12:41 AM
34	Looks great	1/30/2021 10:11 PM
35	So basically the plan is to make it a soccer field ?	1/30/2021 8:05 PM
36	Option 2 is preferred	1/30/2021 3:55 PM
37	For either option, baseball/softball need fencing for the outfield. Some form of fencing is required, semi permanent definitely required.	1/30/2021 9:05 AM
38	Volleyball court with sand as court surface	1/30/2021 8:04 AM
39	No	1/30/2021 7:05 AM
40	How many baskets are there on the basketball court	1/30/2021 5:39 AM
41	Try to get as wide a view as possible	1/30/2021 12:56 AM
42	Try to rearrange the green lawn as much as possible	1/30/2021 12:50 AM
43	The second place not to play with the children will be more	1/30/2021 12:43 AM
44	Good. Good.	1/30/2021 12:37 AM
45	I wish I could consider building more walking paths	1/30/2021 12:25 AM
46	The second picture is not much and there are places for family meetings	1/30/2021 12:18 AM
47	The second one is nice and has a gym	1/30/2021 12:11 AM
48	Activity rooms are a must	1/30/2021 12:01 AM
49	The course facilities can be updated	1/29/2021 11:49 PM
50	The facilities should be updated	1/29/2021 11:42 PM

51	LOVE NUMBER 1	1/29/2021 10:19 PM
52	No, very good.	1/29/2021 8:43 PM
53	NA	1/29/2021 7:54 PM
54	I feel option two is more inclusive for the community	1/29/2021 5:55 PM
55	Option- how many fields will be exclusively used for girls softball. ?	1/29/2021 5:37 PM
56	Option 1	1/29/2021 5:23 PM
57	Both plans missing walking trails with lots of trees and plants. Montebello lacks a serene and safe trail/walking paths that provide a feel of quiet outdoor away from traffic and noise.	1/29/2021 4:57 PM
58	1	1/29/2021 2:45 PM
59	Option 2 is preferred between the two	1/29/2021 2:28 PM
60	A cushioned running path is important to me more than it's attenede use, but it also makes people explore all ends of the park which is also good for safety. Almansor Park in Alhambra is an excellent park as a reference.	1/29/2021 1:18 PM
61	Option seems nice.	1/28/2021 11:08 PM
62	No dog park. People are very irresponsible. The less benches and seats there are the better. We have too many homeless people and people just wanting to hang out using the benches and picnic areas. People can't even enjoy these areas because people camp/squat in these locations.	1/28/2021 10:40 PM
63	I prefer option 2- a dog park would be great! In addition, I think a skate park for teens would be awesome!	1/28/2021 8:37 PM
64	None	1/28/2021 7:12 PM
65	I would love it to be able to have baseball facilities to use year round instead of sharing with football who are not good at sharing.	1/28/2021 6:57 PM
66	We need more baseball fields. We need atleast 6 fields. Our youth is playing baseball in pico rivera due to lack of baseball fields.	1/28/2021 11:54 AM
67	I'd like to see more baseball fields instead of soccer fields. Baseball has been a part of this park and city for over 40 years. It would be nice to see more of these fields. You can host several entry fee tournaments to increase revenue and bring people to montebello. The baseball facilities are terrible nowadays and not maintained properly and most parents are now taking their kids to other parks out of the city. What happens to the upper softball field? Neither option show anything being done	1/28/2021 11:09 AM
68	The kids want a better playground and splash pad. The splash pad needs so much. I hate driving to other parks outside my city for better playgrounds and splash pads	1/28/2021 9:50 AM
69	Whatever allows the most for all age groups	1/28/2021 8:54 AM
70	Option two would be great because we need a place that montebello can hang out at that doesn’t fully revolve around sports. trails, dog parks, skate park. a field or two is fine but not the entire park. where are we supposed to go?	1/28/2021 8:19 AM
71	Option 2 is taking away a diamond. We're already short on fields. I wouldn't recommend that. Why can't the Indians play at one of the local high schools?	1/27/2021 10:22 AM
72	The options that were shown are very good to improve to have better parks.	1/27/2021 10:20 AM
73	Would love option one	1/27/2021 5:01 AM
74	Option 2 is better	1/27/2021 1:14 AM
75	I prefer Option 2	1/26/2021 10:28 PM
76	Don't think the multi court field is necessary. The park has a great baseball program why change that? There are other city parks that can handle the multi court field.	1/26/2021 10:13 PM
77	I would like to have bleachers available for the big soccer field	1/26/2021 6:32 PM

78	I like option 2, but think another field would be useful to include.	1/26/2021 3:50 PM
79	No additional feedback.	1/26/2021 3:38 PM
80	Option 1 has better access for pedestrian walk and handicap access to the fields. Plus it is more organized where not anyone can crowd the field or prestarían walk through it. Option 2 will make it more difficult for someone who is disabled to get around the park just to get to the other side.	1/26/2021 2:45 PM
81	The Zoo needs to be a big part of the park. Its part of Montebello.	1/26/2021 1:16 PM
82	plan 2 is my preference.	1/26/2021 11:58 AM
83	Like to see some stadium lights, and perhaps some bleachers to view the competitions, however stadium light more of a priority. Would like to have the option of turf grass for the soccer field	1/26/2021 11:03 AM
84	None	1/26/2021 10:25 AM

Q9 What issues have you encountered in using park facilities?

Answered: 153 Skipped: 46

#	RESPONSES	DATE
1	Lighting, security, restrooms	2/16/2021 1:11 PM
2	Homeless around the park during day and night	2/16/2021 9:14 AM
3	5150	2/15/2021 6:26 PM
4	Homeless, and thugs	2/14/2021 5:33 PM
5	Not enough parkings during the summer event hours	2/14/2021 2:34 PM
6	Too many Homeless	2/13/2021 10:10 PM
7	None	2/13/2021 6:45 PM
8	Drunk and rowdy crowds	2/13/2021 8:00 AM
9	None	2/12/2021 10:07 PM
10	Closed restrooms.	2/12/2021 4:20 PM
11	Homeless and tweakers. Restrooms are dirty and doors dont lock in the toilet section and never has dispenser soap	2/12/2021 2:44 PM
12	Skaters are out of control.no respect for law enforcement or park workers and community as a whole	2/12/2021 12:22 PM
13	Restrooms	2/12/2021 11:45 AM
14	Restrooms	2/12/2021 11:38 AM
15	None	2/12/2021 11:32 AM
16	None	2/12/2021 10:45 AM
17	People smoking/vaping and/or drinking alcohol near the facilities where children are playing. Transient encounters.	2/12/2021 10:31 AM
18	The restrooms definitely need to be updated	2/12/2021 9:19 AM
19	No water in restroom sink and broken door for privacy. Needs more seating areas.	2/12/2021 12:01 AM
20	None	2/11/2021 9:20 PM
21	None	2/11/2021 9:16 PM
22	People drinking alcoholic beverages out in the open especially from car clubs	2/11/2021 8:18 PM
23	Restrooms dirty, outdated buildings, playground equipment damaged, homeless issue.	2/11/2021 7:55 PM
24	Dirty restrooms, not stocked, no soap.	2/11/2021 7:29 PM
25	Parking availability. Dirty bathrooms. Unsafe trails. For years there's been incidents regarding strangers from the trail and kids. Homeless living under bridge and around the park. City. The pool should be operating all year with different aquatic programs for kids. Ridiculous it sits unused 10 mo a year. Fix the field and baseball Diamond by Cathy Hensel. Last, the zoo is horrible at times during the year when it's raining. I can't believe Animal Control hasn't shut it down. To house those animals cramp in small corrals in mud and nastiness is cruel. Fix that place up. What a cool thing to have, yet taken care of terribly.	2/11/2021 6:21 PM
26	Touch free faucets, soap, and towel dispensers, as well as hand a liquid sanitizer dispenser. Regular cleaning and sanitizing by the park staff.	2/11/2021 6:15 PM
27	Incorrect amenities listed above.	2/11/2021 6:10 PM

28	Sometimes there are a lot of people smoking marijuana	2/11/2021 5:30 PM
29	A lot of homeless burnt spoons used For drug use and syringes	2/11/2021 5:12 PM
30	1. Homeless People , We Don't Feel Safe With Our Grandkids Playing Near By.... 2.Filthy Restrooms..... 3. Dirty Picnic Area ! 4. Unkempt Basketbal, Courts, Tennis Courts & The Worst One Is The Unkept Baseball Field With Holes In The Grass Area....My Kids Have Twisted Thief Anckles There Many Times During Basebal, & Soccor Seasons !	2/11/2021 4:49 PM
31	N/a	2/11/2021 4:43 PM
32	Needs more lighting and nicer trail. Soccer field needs major improvements for safety. Like to see a level turf field	2/11/2021 4:40 PM
33	Some benches and restrooms are run down or dirty. Older kids playing roughly on the playsets with no supervision.	2/11/2021 4:35 PM
34	None	2/11/2021 4:11 PM
35	The pool was closed this year when local city pools were open! Homeless living in dumpster areas.	2/11/2021 3:57 PM
36	Restrooms always dirty and people doing drugs inside	2/11/2021 3:45 PM
37	bad and dirty restrooms and locked	2/11/2021 1:07 PM
38	Lawn areas are in poor shape, ie.dieing lawn, over watered areas. Restrooms are I'm poor shape ie.state of disrepair, inoperable water faucets, toilets terribly maintained.	2/3/2021 5:32 PM
39	Not enough parking and no Ada parking	2/3/2021 4:32 PM
40	Too dark at night Broken play structures	2/2/2021 8:10 PM
41	Just having restrooms closed	2/2/2021 2:50 PM
42	Lawn and paths needs to be maintained.	2/1/2021 9:27 PM
43	Closed Homeless.	2/1/2021 4:10 PM
44	The dug out areas for the baseball field. When we were in Tball, the kids would trip on the safety hazards including the holes covered with boards. Sometimes the teams couldnt use the dug out because a person had urinated in there and it was not safe. There needs to be a handicap parking on the street to service Cathy Hensel building. The soccer field was alwasy muddy and had pools of water at the entrance.	2/1/2021 12:34 PM
45	Now the virus is so popular, we go a little less.	2/1/2021 12:19 PM
46	There are a few green plants on the land	2/1/2021 12:18 PM
47	The restrooms	2/1/2021 12:16 PM
48	non applicable	2/1/2021 10:24 AM
49	Maybe there are a few garbage cans, because someone will drop the garbage on the ground.	2/1/2021 9:09 AM
50	In a quiet chat, there will always be some noise around them, and they will not listen to dissuasion	2/1/2021 9:08 AM
51	Parking	1/31/2021 10:12 AM
52	Lots of homeless in the picnic area and restrooms are nasty and dirty. You are asking about batting cages and zoo. Montebello city park doesn’t have that in this location	1/31/2021 12:43 AM
53	Homeless and trash. More workout areas would be nice.	1/30/2021 10:18 PM
54	Trash	1/30/2021 3:56 PM
55	Dirty Restrooms Not enough lights	1/30/2021 7:07 AM
56	Trash around the park, restrooms requiring maintenance, homeless in the area.	1/30/2021 1:44 AM
57	There are fewer public toilets	1/29/2021 11:07 PM

58	Seating facilities are relatively few	1/29/2021 10:57 PM
59	Not enough seating facilities	1/29/2021 10:51 PM
60	It's darker at night.	1/29/2021 10:44 PM
61	cleanliness and uncomfortable going in with men hanging around ladies restroom	1/29/2021 10:30 PM
62	Night lights are dark	1/29/2021 10:27 PM
63	The display facilities are not beautiful	1/29/2021 10:17 PM
64	Night lighting problem	1/29/2021 10:08 PM
65	Parking, lighting, safety and cleanliness	1/29/2021 10:05 PM
66	Toilet facilities are not adequate	1/29/2021 10:03 PM
67	Homelessness	1/29/2021 9:24 PM
68	Baseball field needs updating	1/29/2021 5:58 PM
69	Community center is old and no events on weekends. Can't tell how much is being utilized. Not attractive. Not enough trees and flowers.	1/29/2021 5:05 PM
70	Homeless and drug users. Kind of scary	1/29/2021 4:58 PM
71	The skaters are rowdy and leave a mess everywhere	1/29/2021 4:22 PM
72	There are cases of physical fitness equipment being damaged by people.	1/29/2021 3:58 PM
73	Cleanliness	1/29/2021 2:18 PM
74	Nothing	1/29/2021 2:08 PM
75	Finding needles in the Restrooms homeless having sex the restroom	1/29/2021 1:58 PM
76	Gang violence and homelessness	1/29/2021 1:35 PM
77	Safety and cleaning	1/29/2021 1:35 PM
78	No clear running paths, poor lighting	1/29/2021 1:20 PM
79	Transient screaming and acting iradicle	1/29/2021 12:51 PM
80	Trails pavements or new trails, teach people to clean up after their dog. Trials should have pavement like Alhambra park.	1/29/2021 10:15 AM
81	Poor lighting, trash, no dog park	1/29/2021 8:28 AM
82	Dogs not on leashes. Trash. Homeless sleeping through the park. Playground closed	1/29/2021 1:03 AM
83	Broken floor, bees, homeless near baseball field	1/29/2021 12:20 AM
84	None	1/28/2021 11:59 PM
85	Words hanging out at the benches/picnic area and restrooms.	1/28/2021 10:46 PM
86	None	1/28/2021 9:43 PM
87	The pavement is uneven. There’s bad filtration for the water. So there are mud and holes	1/28/2021 9:07 PM
88	the hygiene of the bathrooms	1/28/2021 8:35 PM
89	No issues	1/28/2021 8:19 PM
90	I would love to see the sidewalk redone with rubber flooring since many people walk and/or run. That would be helpful to resolve the fact that the floor is uneven in some areas. It needs more lighting during the evening when it's dark.	1/28/2021 8:14 PM
91	Cleaningness and saferly	1/28/2021 7:44 PM
92	Dirty bathrooms, muddy fields, muddy areas, trash left over from pinatas and parties, graffiti on equipment and seating areas.	1/28/2021 4:14 PM

93	As an Architect, designer and Montebello Citizen I believe our Montebello Parks can be updated for a more safe visit to the restrooms, picnic areas, with running tracks and flooring.	1/28/2021 11:58 AM
94	Not enough baseball fields.	1/28/2021 11:57 AM
95	Homeless taking over public sitting areas like park benches. Not good lighting. Bathrooms not well maintained nor lit.	1/28/2021 9:36 AM
96	Most of them are dirty specially by the playground and tables, a lot of homeless around	1/28/2021 9:05 AM
97	Traffic on the weekends. The park gets taken over by car crews	1/28/2021 9:01 AM
98	Inability to socially distance during COVID	1/28/2021 8:58 AM
99	Too many transients/homeless	1/28/2021 8:56 AM
100	No dog parks	1/28/2021 8:39 AM
101	The skate park is really out dated and can use a refresher. I think you should gather the skaters in the area and talk about what could make it better. Rosemead skate park did that.	1/28/2021 8:22 AM
102	N/a	1/28/2021 8:18 AM
103	Mainly people who refuse to social distance, or groups of questionable looking adults congregating at a bench. Those people make me nervous because the park is relatively empty & the kids & I go into the deepest part of the park to play kickball. Anything can happen & we wouldn't be able to get any assistance.	1/28/2021 7:52 AM
104	Daily walk	1/28/2021 7:33 AM
105	1.kids play area need extra care ,instead of using wooden chips, sand would be ideal for kids not be hurt when they playing..	1/27/2021 10:40 PM
106	Cleanliness, quality of equipment, especially at Ashiya Park.	1/27/2021 9:37 PM
107	The homeless	1/27/2021 10:27 AM
108	Restrooms not clean. Not enough tables for picnicking throughout the park.	1/27/2021 9:19 AM
109	Homeless and also RV parked to close to the park.	1/27/2021 8:53 AM
110	Bathrooms need remodeling, no sunshade on playground areas not enough sitting places	1/27/2021 8:38 AM
111	Too much smoke from cigarettes. Restrooms are dirty.	1/27/2021 12:44 AM
112	The restrooms do not have toilet paper, no soap, and often dirty. The walking paths are not safe, there are some cracks. The tennis courts should reopen and have more lights. The playground should be remodeled and also use a rubber tile interlocking. More lights around the playground area.	1/27/2021 12:32 AM
113	No running water, the restrooms are very dirty and not enough lights in the park. there are a lot of very dark areas and some people gather there to smoke.	1/26/2021 11:21 PM
114	None	1/26/2021 11:08 PM
115	The pool dressing rooms need upgrading.	1/26/2021 10:32 PM
116	none at the moment	1/26/2021 10:09 PM
117	Pot smocking and homelessness	1/26/2021 8:08 PM
118	The bathrooms are sub par.	1/26/2021 6:35 PM
119	Dirty bathroom	1/26/2021 5:58 PM
120	None	1/26/2021 5:30 PM
121	Homeless people sleeping in the play ground	1/26/2021 5:00 PM
122	Not enough Summer Day care parking	1/26/2021 4:59 PM
123	A lot of homeless taking over the bleachers, tables and different areas around the park. Very filthy.	1/26/2021 4:00 PM

124	Not enough lighting throughout the park. A lot of through traffic on the residential streets; not as safe as I would like.	1/26/2021 4:00 PM
125	The pandemic (COVID)	1/26/2021 3:40 PM
126	N/A	1/26/2021 2:07 PM
127	People smoking marajuana right near the playground. I told an officer who was parked on the grass and they didn't do anything about it.	1/26/2021 1:57 PM
128	Restroom	1/26/2021 1:53 PM
129	uneven cement	1/26/2021 1:41 PM
130	Homeless people and trash	1/26/2021 1:38 PM
131	There is a lot of homeless people with their encampments	1/26/2021 12:55 PM
132	Dirty bathrooms	1/26/2021 12:45 PM
133	The parking lot is to small they need more parking	1/26/2021 12:43 PM
134	Parking can be an issue sometimes	1/26/2021 12:39 PM
135	Gathering of homeless	1/26/2021 12:25 PM
136	Skate park in the morning is usually found with a lot of trash and left-over food .	1/26/2021 12:03 PM
137	At Montebello City Park I would say the homeless issue, better lighting around the play areas for evening play, the Park area near Whittier Boulevard more seating areas for the parents to watch their children, the cement that runs in front of the concert area is cracked and I've seen people trip and fall... restrooms need to be updated and maybe another restroom near the play area near Whittier blvd...	1/26/2021 12:03 PM
138	outdated. some tagging involved in areas. no police enforcement patrolling.	1/26/2021 11:59 AM
139	Soccer field conditions are poor and small. Need turf field or level out the poorly maintained grass field	1/26/2021 11:54 AM
140	Indigent people in the restrooms	1/26/2021 11:45 AM
141	Bathrooms could be cleaner	1/26/2021 11:40 AM
142	None	1/26/2021 11:35 AM
143	A lot of homeless and drug users find syringes on the floor the kids play area	1/26/2021 11:34 AM
144	N/a	1/26/2021 11:18 AM
145	Many transients, a lot of illegal drug use, restrooms are always filthy.	1/26/2021 11:10 AM
146	rest room	1/26/2021 11:07 AM
147	Too much dog poop , every park, montebello, montebello need to cite people not picking up dog poop	1/26/2021 10:58 AM
148	Safety, accessibility	1/26/2021 10:38 AM
149	Too many transient homeless hanging out in and around the park consuming alcohol	1/26/2021 10:34 AM
150	No issues.	1/26/2021 10:33 AM
151	None	1/26/2021 10:30 AM
152	Running into homeless and people smoking pot in the park with kids nearby.	1/26/2021 10:30 AM
153	Graffiti and trash on the ground	1/26/2021 10:29 AM

#	RESPONSES	DATE
1	Looks very comprehensive. I would love to see activities or an area where Seniors could also conduct some outdoor activities since the Senior center is there. any thoughts on a small dog park area? This is smack in the middle of a high density area where I'm sure there are many dog owners.	2/16/2021 1:16 PM
2	Ecxited to see plan come alive!	2/16/2021 9:27 AM
3	no to #10 11	2/15/2021 6:29 PM
4	Pond with fish possibly recreational fishing	2/14/2021 5:38 PM
5	Great plan with updated features	2/13/2021 8:04 AM
6	None	2/12/2021 10:10 PM
7	There doesn't seem to be a lot of grass area for picnics or family gatherings.	2/12/2021 4:24 PM
8	Looks great!	2/12/2021 11:47 AM
9	Looks great, however, please consider placing shades over the play area for the children so they don't burn themselves during the summer with extensive heat/exposure when playing on the amenities. Please also consider a basketball court solely for younger "adolescent" children and a separate for older groups as well as a bike trail for all. Thank you.	2/12/2021 10:50 AM
10	None	2/11/2021 10:36 PM
11	Get rid of the amphitheater	2/11/2021 9:27 PM
12	Great plan	2/11/2021 8:36 PM
13	Looks nice Very welcoming	2/11/2021 8:23 PM
14	I like the design and layout of the plan. I think it is something to look forward to. Can’t wait to get to enjoy it!	2/11/2021 6:36 PM
15	This would be a blessing to many of us that coach these kids in our city of Montebello, something that I've been talking about for many years to our parents that I coached over The years!.	2/11/2021 4:59 PM
16	Soccer field seems small. It should be the main focal point in my opinion even if it means that the skate park and play area is smaller	2/11/2021 4:53 PM
17	No	2/11/2021 4:45 PM
18	I think it's great.	2/11/2021 4:44 PM
19	Make park's a better place to visit	2/11/2021 3:46 PM
20	seems ok!	2/11/2021 1:19 PM
21	This was the only tennis courts available in the city. The Basketball courts were well used. A rubber walking trail is needed in the perimeter of the park as many citizens have been seen utilizing the park as a walking path	2/3/2021 5:43 PM
22	I dont see walking paths are paved. Sidewalks should be improved with lighting for night walkers.	2/3/2021 4:37 PM
23	I think it will engage more families and young adults to come more often to the park!	2/2/2021 2:53 PM

24	No need for a splash pad when you have a pool. The pool needs to be recognized as a leader in aquatics for the city. It would be something that people could be proud of. There not not many Olympic sized pools in the area, this would make it a prominent place for people to come and visit our city and potentially spend money.	2/1/2021 4:19 PM
25	DG trail should loop around entire park to allow joggers to to run and stay in the park. Incorpoate environmental landscaping and education on California native plants.	2/1/2021 12:39 PM
26	How to say, now the epidemic virus is very serious, so if you can't complete it, please pay attention to safety, but I still hope you can lead us into this beautiful new environment as soon as possible.	2/1/2021 12:24 PM
27	If the actual effect is the same as that in this picture, it will be very good	2/1/2021 12:24 PM
28	many residents own dogs . please consider adding a dog park for Montebello residents. :)	2/1/2021 10:28 AM
29	13 and 5 places, can you replace a little, one plant is too few, one equipment is too many, this is a bit monotonous.	2/1/2021 9:15 AM
30	The content is very comprehensive, which will give us more choices	2/1/2021 9:14 AM
31	Only has one option how do you expect us to answer the next question	1/31/2021 12:48 AM
32	Good	1/30/2021 10:20 PM
33	The plan looks like a good idea.	1/30/2021 1:51 AM
34	Very good	1/29/2021 11:12 PM
35	Seating facilities as much as possible	1/29/2021 11:01 PM
36	Seating facilities as much as possible	1/29/2021 10:54 PM
37	I hope the lights are bright enough	1/29/2021 10:48 PM
38	The family gathering area could be expanded	1/29/2021 10:31 PM
39	The family area can be a little more	1/29/2021 10:23 PM
40	The light will be sufficient	1/29/2021 10:14 PM
41	Without the	1/29/2021 10:05 PM
42	Very good	1/29/2021 9:53 PM
43	Temporarily no	1/29/2021 8:33 PM
44	More shaded areas	1/29/2021 6:03 PM
45	Add some colorful plants and flowers and beautiful the park.	1/29/2021 5:13 PM
46	Great design, I love it!	1/29/2021 4:04 PM
47	Good	1/29/2021 2:20 PM
48	N/A	1/29/2021 2:12 PM
49	Our city cut the budget on our park patrol the homeless took over our parks now leaving liquor bottles and needles everywhere we need our park patrol back	1/29/2021 2:05 PM
50	Looks good for the space available. A cushioned running path is important to me more than it's attenede use, but it also makes people explore all ends of the park which is also good for safety. Almansor Park in Alhambra is an excellent park as a reference.	1/29/2021 1:23 PM
51	Good	1/29/2021 10:20 AM
52	A dog park is needed	1/29/2021 8:32 AM
53	It looks like it still has room for improvement. Very dull plan for the official city park. Seems like it is lacking in a lot of areas. What about the plans for the field across the street? The pool needs a male over as well. I hope the pool will remain. And why is it giving me a choice between two different options for the city park. I only see one plan/option.	1/28/2021 11:00 PM

54	Looks good.	1/28/2021 10:05 PM
55	it seems perfect like this	1/28/2021 8:43 PM
56	I love the area designated for dogs. Overall I'm excited about the plan.	1/28/2021 8:34 PM
57	None	1/28/2021 7:47 PM
58	Looks great!	1/28/2021 1:42 PM
59	I believe the existing parking system needs to also be redesigned for grant Rea, and the city park a walk path around the sidewalk and set backs, restrooms need to be updated even though they are park restrooms but are areas that are most visited by the people	1/28/2021 12:11 PM
60	Lauraborquez@att.net	1/28/2021 11:59 AM
61	Add good lightning, security on site, make park trails wheelchair friendly, add speed bumps to surrounding streets, clean the restrooms please	1/28/2021 9:14 AM
62	Looks great	1/28/2021 9:03 AM
63	I would be supportive of such arrangements.	1/28/2021 9:01 AM
64	Don’t see anything for dogs.	1/28/2021 8:49 AM
65	I appreciate a bigger skate park for the people. we should be seeing more people excited to be at the park.	1/28/2021 8:26 AM
66	Really like the enhanced amphitheater	1/28/2021 7:24 AM
67	no	1/27/2021 10:46 PM
68	I love how many different ways the community can interact with the park. Public art and a focus on nature play is great for young kids!	1/27/2021 9:39 PM
69	The plan seems good but will love a gated play area for our pets	1/27/2021 9:04 AM
70	N/A	1/27/2021 8:56 AM
71	N/A	1/27/2021 12:54 AM
72	More tennis courts needed.	1/27/2021 12:48 AM
73	I am visually impaired and not able to see it very clearly.	1/26/2021 11:34 PM
74	None	1/26/2021 11:11 PM
75	None	1/26/2021 10:34 PM
76	Replace the path to many uneven and roots from trees interfere the path not safe I’ve fallen once before	1/26/2021 8:13 PM
77	I like this plan. I would like more trails and walking areas throughout the park.	1/26/2021 6:45 PM
78	No	1/26/2021 6:00 PM
79	n/a	1/26/2021 5:03 PM
80	I really like the proposal.	1/26/2021 4:09 PM
81	Plan looks nice but hopefully the city can upkeep it and keep the homeless away, so us residents can enjoy all amenities with our children.	1/26/2021 4:06 PM
82	Enhance the Senior center.	1/26/2021 3:48 PM
83	No	1/26/2021 2:08 PM
84	No. The basketball courts could definetly use an upgrade.	1/26/2021 2:00 PM
85	No.	1/26/2021 1:58 PM
86	Looks good	1/26/2021 1:44 PM
87	More picnic tables. There may be more outdoor parties with the new plan.	1/26/2021 12:49 PM

88	Not problems	1/26/2021 12:46 PM
89	it looks great!	1/26/2021 12:01 PM
90	Larger soccer field	1/26/2021 12:00 PM
91	N/a	1/26/2021 11:00 AM
92	Special needs playground. Adaptive playground equipment for disabled children or very young children learning to walk. Rubber mats on the playground incase a child falls.	1/26/2021 10:39 AM
93	It'd be great if you focus on the lights for #12 and 4, upgrading #12, and splash pad first before other things.	1/26/2021 10:39 AM
94	Perfect	1/26/2021 10:33 AM

Q14 Out of the two optional vignettes, which do you prefer?

Q15 Please provide general comments based on the site plan and vignettes.

Answered: 86 Skipped: 113

#	RESPONSES	DATE
1	Only 1 option was provided. Seems reasonable especially since I do believe that this is a highly visited park by families.	2/16/2021 1:16 PM
2	The plan looks great, I just hope the quality of the playground, turf, equipment is durable.	2/16/2021 9:27 AM
3	Only able to see one	2/14/2021 5:38 PM
4	Great plan with updated festures	2/13/2021 8:04 AM
5	Looks great, more fields to play team games.	2/12/2021 10:10 PM
6	Interested in place where kids can run and have fun.	2/12/2021 11:35 AM
7	I only see one option for the Montebello City Park plan. Also, some of the survey questions do not pertain to Montebello City Park (i.e. zoo question, baseball/softball field).	2/12/2021 10:50 AM
8	Good	2/11/2021 10:36 PM
9	The plan looks good. Allows for plenty of parking	2/11/2021 9:27 PM
10	Na	2/11/2021 8:36 PM
11	Should be kept clean Free of homeless and car clubs from gathering	2/11/2021 8:23 PM
12	The second plan is viewer friendly. The details are easy to locate and the font makes reading a breeze.	2/11/2021 6:36 PM
13	Not enough parking to accommodate the demand. Strengthen youth sports leagues.	2/11/2021 6:27 PM
14	Really looks good but I don’t know I’ve been living here 58 years and Montebello has not updated their parks for nothing	2/11/2021 5:35 PM
15	Any upgrades wou,d be a blessing to the kids in our neighbohowould compared to what we have been dealing with for years!....I Am Looking forward to getting back to coaching our grandkids at the city parks & rec .	2/11/2021 4:59 PM
16	Soccer field could be bigger.	2/11/2021 4:53 PM
17	N/a	2/11/2021 4:45 PM
18	Na	2/11/2021 3:46 PM
19	Only one vignette is available. I would have liked to see other options for city park. Maybe add a dog park	2/3/2021 5:43 PM
20	Side walks should be lighted and paved walking trail through the park	2/3/2021 4:37 PM
21	I. Believe these questions are for Grant Rea Park.	2/2/2021 8:14 PM
22	I believe it will be a beautiful atmosphere and it will get residents to be more often, explore their neighborhood.	2/2/2021 2:53 PM
23	There was only one option not two. Comments were stated above.	2/1/2021 12:39 PM
24	There can be more trees or flowers	2/1/2021 12:24 PM
25	3.4.6.7.8 is it a bit crowded? Are there so many things there?	2/1/2021 12:24 PM
26	I only saw one vignette ...	2/1/2021 10:28 AM
27	Whether it's plants or equipment, it's appropriate, or we won't know how to choose.	2/1/2021 9:15 AM

28	I just hope you have more equipment for primary school children, so that we can save some time to stop their other bad behaviors.	2/1/2021 9:14 AM
29	Only has one option	1/31/2021 12:48 AM
30	Improved lighting by and inside the restrooms is a smart safety idea. The amphitheater should have more shade as well as more lighting behind the amphitheater.	1/30/2021 1:51 AM
31	It is not necessary to	1/29/2021 11:12 PM
32	Seating facilities as much as possible	1/29/2021 11:01 PM
33	Seating facilities as much as possible	1/29/2021 10:54 PM
34	I hope the lights are bright enough	1/29/2021 10:48 PM
35	The family gathering area could be expanded	1/29/2021 10:31 PM
36	The family area can be a little more	1/29/2021 10:23 PM
37	Not suggest	1/29/2021 10:14 PM
38	Anything is better than it is now but really looking at making each park have its own fiends so that the other kayaks can be used fir different sports. Kids need safe snd nice fields.	1/29/2021 10:08 PM
39	Without the	1/29/2021 10:05 PM
40	Very good	1/29/2021 9:53 PM
41	Not bad	1/29/2021 8:33 PM
42	I only see one option	1/29/2021 6:03 PM
43	I only see 1 option. Remodeling the interior of the community center to better utilize the facility. Ensure safety of the park.	1/29/2021 5:13 PM
44	It looks great	1/29/2021 4:26 PM
45	More areas for children can be designed.	1/29/2021 4:04 PM
46	Good	1/29/2021 2:20 PM
47	More grass	1/29/2021 2:12 PM
48	Take the money and put towards our park patrol or police departments	1/29/2021 2:05 PM
49	Well there was only on plan, yet you asked of the 2?	1/29/2021 1:23 PM
50	Looks good more trees and walk paths	1/29/2021 10:20 AM
51	Looks great	1/29/2021 1:07 AM
52	There could be many more improvements. This plan seems to simple for this being the city Park. Many evens happen there. And there is nothing about the city pool being improved or the field across the street.	1/28/2021 11:00 PM
53	no comment	1/28/2021 10:05 PM
54	i feel that there should be more vigilance because sometimes there are people smoking marijuana in front of children or even offereng them that should not happen.	1/28/2021 8:43 PM
55	I could not see vignettes. Nevertheless, I like the site plan.	1/28/2021 8:34 PM
56	It looks good and clean	1/28/2021 7:47 PM
57	I’m only able to see one on my screen but gives a well description of our Grant Rea Park to be updated and that continues to give our community the excitement to use our city parks more often	1/28/2021 12:11 PM
58	We need more baseball fields. Especially ina Park like this.	1/28/2021 11:59 AM
59	Add good lightning, security on site, make park trails wheelchair friendly, add speed bumps to surrounding streets, clean the restrooms please	1/28/2021 9:14 AM

60	It's inclusive for all to use	1/28/2021 9:03 AM
61	I have no comment by which to substantiate criticism. It looks very nice.	1/28/2021 9:01 AM
62	this actually looks like a park I would like to be at.	1/28/2021 8:26 AM
63	looks good	1/27/2021 10:46 PM
64	More playground equipment throughout the park. Not enough playground equipment in different areas - north part of park.	1/27/2021 9:24 AM
65	All seems good just remember to add shades on playing areas water mist for very hot days, will love to see more exciting games for kids in the playing are like merry go round, a sphere you go in and sit spin the steering wheel to make it go around, Aztec climers,diferente types of swings.	1/27/2021 9:04 AM
66	N/A	1/27/2021 12:54 AM
67	Good plan, please work on it as soon as possible.	1/27/2021 12:48 AM
68	lighted areas are really needed and working clean restrooms.	1/26/2021 11:34 PM
69	I like it better	1/26/2021 11:11 PM
70	There was only one option pictured.	1/26/2021 10:34 PM
71	The multi sports courts will make use of currently wasted space.	1/26/2021 6:45 PM
72	Na	1/26/2021 6:00 PM
73	I don’t see 2 options only one	1/26/2021 5:06 PM
74	There was only one option; I like the updates.	1/26/2021 4:09 PM
75	Improvements need to be done to the Senior center. The rooms need to updated and painted.	1/26/2021 3:48 PM
76	None	1/26/2021 2:08 PM
77	Plans are well	1/26/2021 1:58 PM
78	None	1/26/2021 1:44 PM
79	Looks good	1/26/2021 12:49 PM
80	Is a good idea to asking the community	1/26/2021 12:46 PM
81	I could only see one plan. Not a second option. As long as everything is modernized and updated, I will be happy.	1/26/2021 12:01 PM
82	Full size Soccer Fields needed and nice walking trails	1/26/2021 12:00 PM
83	N/a	1/26/2021 11:00 AM
84	That’s great	1/26/2021 10:57 AM
85	Didn't see the second one. 😕	1/26/2021 10:39 AM
86	I don't see any vignettes. Site plan looks great but like I mentioned, it'd be great if you focus on the lights for #12 and 4, upgrading #12, and splash pad first before other things.	1/26/2021 10:39 AM

#	RESPONSES	DATE
1	This is probably one of the most neglected parks and I hate to say it, it's on the South side where you have lots of families. This definitely needs a facelift and should be priority.	2/16/2021 4:55 PM
2	none	2/13/2021 8:52 PM
3	Trash on location	2/13/2021 8:40 AM
4	Homeless, and dirty bathroom with no toilet paper or hand soap or paper towels.	2/12/2021 11:44 PM
5	Teens making out	2/12/2021 10:42 PM
6	None	2/12/2021 10:03 PM
7	Deteriorated bathrooms, dirty playground and homeless at picnic areas.	2/12/2021 2:55 PM
8	Alot of bums and homeless	2/12/2021 2:02 PM
9	People smoking and drinking	2/12/2021 12:03 PM
10	Bathrooms not clean	2/12/2021 11:51 AM
11	Dirty Restrooms	2/12/2021 10:56 AM
12	Concerned with the safety of the park. I don't go to this park other than to watch the kids play baseball. In December a young man was killed and I'm concerned for the children and young individuals that use the park frequently.	2/12/2021 10:40 AM
13	Restrooms need to be cleaned and redone. It is a great area but needs to be updated. Sometimes wrong crowds of people hanging out there. Having patrol every so often would be nice.	2/12/2021 10:30 AM
14	Trash and homeless	2/12/2021 10:26 AM
15	It's dark	2/12/2021 10:13 AM
16	The bathrooms weren't properly working	2/12/2021 10:06 AM
17	We refuse to use the restrooms there because they are always very dirty. In the event one of us has to use the restroom, we eventually end up cutting our visit short so that we can drive home and use the restroom in the comfort of our own home. There has been times where my children had to rinse their hands with water after eating ice cream and I saw several razor blades thrown on the floor, used condoms, no toilet paper or seat covers, and we weren't able to dry our hands anywhere. I do not recall if the hand dryer/blower was not functioning or if there was not one in place. Regardless, the bathrooms are not kept up where children can access it comfortably. Also, the fact that any type of smoking and drinking alcoholic beverages are allowed in a zone where children play should be prohibited. This is a major factor why I limit park visits due to these encounters. I have respiratory issues and the smell of cigarettes, cigars, marijuana and vapes, triggers my asthma. My concern is that I do not want my children playing in a Park where they are constantly breathing these toxic fumes from someone who is less than 20 feet away. We eventually have to move to a further location and unfortunately, we come across the same situation where again, we have to end our visit to the park early due to the fumes.	2/12/2021 9:17 AM
18	Dirty restrooms	2/12/2021 7:27 AM
19	Homeless people	2/12/2021 5:04 AM
20	Not enough lighting at night. I don't feel safe after the evening.	2/12/2021 4:15 AM
21	Cleanliness, broken glass, people drinking and smoking weed in park, homeless, and dirty restrooms.	2/11/2021 11:49 PM

22	I saw many beer bottles I'm the parking area and I witnessed diarrhea in the wall next to the baseball field.	2/11/2021 10:15 PM
23	None	2/11/2021 8:53 PM
24	Dirty seats, dirty restroom	2/11/2021 8:03 PM
25	Some parks are unkept and not maintained and updated. Not safe at night. Our city needs a dog park too.	2/11/2021 7:00 PM
26	Homeless	2/11/2021 6:41 PM
27	No sports for my Kids to stay active.	2/11/2021 6:20 PM
28	Drug use ,dirty restroom, graffiti	2/11/2021 6:17 PM
29	Restrooms are dirty, basketball courts need enhancements, playground equipment enhancements, better lighting	2/11/2021 6:13 PM
30	Animal waste on the law. Men drinking alcohol and smoking.	2/11/2021 5:24 PM
31	Nothing	2/11/2021 4:58 PM
32	Sketchy people in the parking lot I do not feel safe having my children play there unless I am right beside them	2/11/2021 4:44 PM
33	A lot of people around smoking marijuana, and I have seen more homeless than before in this park.	2/11/2021 4:16 PM
34	Needs lighting at night, needs walking and jogging trails. Like to see nice level soccer field	2/11/2021 4:16 PM
35	Not child friendly	2/11/2021 4:01 PM
36	The bathroom are ugly	2/11/2021 3:53 PM
37	restroom are bad	2/11/2021 3:46 PM
38	The facility is fine. The lingering adults are skeptical.	2/11/2021 3:43 PM
39	Drug use/drinking. Sometimes poor conditions in bathroom	2/11/2021 3:42 PM
40	None	2/11/2021 3:39 PM
41	homeless/drug addict people	2/11/2021 3:34 PM
42	Suspicious carectors	2/11/2021 11:54 AM
43	Dead grass, graffiti, old fence	2/11/2021 9:35 AM
44	None	2/11/2021 9:31 AM
45	Dog poop litter and homeless. Also our parks seem outdated compared to local cities	2/11/2021 9:13 AM
46	Homeless	2/9/2021 8:50 PM
47	homelessness and substance users	2/9/2021 2:51 PM
48	Restrooms are not clean. We need better lit pathways for part of the year when there is less sunlight.	2/5/2021 1:43 PM
49	Reggie is unsafe. Not enough police patrol the area. You many homeless frequent the area. Restrooms are unkept. Never is there soap. Toilets are terribly maintained. Hand dryers fail often	2/3/2021 5:47 PM
50	Dogs not on leashes	2/3/2021 4:15 PM
51	Dog shit	2/3/2021 8:08 AM
52	Too dark at night	2/2/2021 8:15 PM
53	More lights at night	2/2/2021 10:44 AM
54	Safety	2/1/2021 10:46 PM

55	Closed. No workout area/pull up bars, etc. Basketball courts dirty. No basketball nets.	2/1/2021 3:02 PM
56	We would practice here for Soccer. The restrooms were never open and would have homeless people or people with shopping carts in the restroom vicinity. The lights would not turn on during practice. Did not feel safe after the sun goes down..	2/1/2021 12:27 PM
57	There are few rest areas	2/1/2021 11:44 AM
58	Needles Used Condoms All drugs/pills Blood Bullet casings Guns	2/1/2021 10:55 AM
59	There are few comfortable rest areas and related rest facilities	2/1/2021 10:44 AM
60	non applicable	2/1/2021 10:15 AM
61	There are few comfortable rest areas and related rest facilities	2/1/2021 9:10 AM
62	There are few scenic rest areas and related rest facilities	2/1/2021 5:41 AM
63	Worry about the danger of the facilities in the park to children	1/31/2021 9:05 PM
64	A person was killed there recently.	1/31/2021 8:56 PM
65	none	1/31/2021 7:29 PM
66	There are too few devices. Sometimes people queue up to use them	1/31/2021 6:40 PM
67	I didn't get any problem in using the facilities.	1/31/2021 6:24 PM
68	Poor lighting at night. Restroom needs repairs and hardly stocked with supplies.	1/31/2021 8:54 AM
69	There's too much trash	1/31/2021 6:01 AM
70	It 's good, I didn't have any issue.	1/31/2021 1:31 AM
71	So far , I didn't get any issues.	1/31/2021 12:31 AM
72	Restrooms are extremely dirty. Lots of people doing drugs near the restrooms, parking lot and throughout the park	1/31/2021 12:27 AM
73	There are often people walking around the basketball court	1/30/2021 9:48 PM
74	The basketball court is less equipped	1/30/2021 9:42 PM
75	There are fewer walking paths	1/30/2021 9:35 PM
76	Bad parking	1/30/2021 9:27 PM
77	The street lamps are a little dark at night	1/30/2021 9:21 PM
78	There are too few running surfaces in the park	1/30/2021 9:16 PM
79	The basketball court is a bit old	1/30/2021 9:09 PM
80	The children's amusement facilities are not very complete	1/30/2021 9:04 PM
81	At some times, the park is appeared crowded.	1/30/2021 9:03 PM
82	Toilet facilities are old and not cleaned in time	1/30/2021 8:58 PM
83	The picnic communal area is relatively small	1/30/2021 8:51 PM
84	The shared lawn would be better if it were bigger	1/30/2021 8:39 PM
85	There are fewer facilities for children	1/30/2021 8:27 PM
86	The elderly have less exercise equipment	1/30/2021 8:03 PM
87	The light is a little dim at night	1/30/2021 7:56 PM
88	However, there is a lack of monitoring equipment in the park and loopholes exist in safety supervision.There are also dilapidated park hedgerows, public facilities are not sound or damaged	1/30/2021 7:27 PM
89	Safety equipment	1/30/2021 9:05 AM

90	Occasionally many people, lack of peace and ease	1/30/2021 8:37 AM
91	Some items need to be queued	1/30/2021 8:19 AM
92	Swings seem old, before pandemic water fountains not working. Needs to be more cleaner and inviting	1/30/2021 5:36 AM
93	Aging of some facilities	1/30/2021 5:15 AM
94	Lack of an elderly activity area	1/30/2021 4:07 AM
95	The seats on the road are damaged	1/30/2021 3:54 AM
96	Public restrooms are a little sparse	1/30/2021 3:45 AM
97	The parkway is a little shabby	1/30/2021 3:29 AM
98	There aren't many places for children to play	1/30/2021 3:19 AM
99	There are still fewer sports	1/30/2021 3:08 AM
100	The park is not very clean	1/30/2021 2:55 AM
101	Public toilets are not very sanitary	1/30/2021 2:45 AM
102	Parkway was partially damaged	1/30/2021 2:35 AM
103	The sports equipment is partially damaged	1/30/2021 2:25 AM
104	The basketball hoop on the playground is a little crooked	1/30/2021 2:15 AM
105	There is some damage to the park seat	1/30/2021 2:06 AM
106	Several of the lawn stools are broken	1/30/2021 2:00 AM
107	Less green plants, summer is not heatstroke	1/30/2021 1:56 AM
108	Rest positions on the basketball court are a little short	1/30/2021 1:50 AM
109	The park road is not very smooth	1/30/2021 1:44 AM
110	Hygiene is not very good, the equipment is old	1/30/2021 1:42 AM
111	One of the toilets in the toilet is broken	1/30/2021 1:38 AM
112	The overall equipment is relatively simple	1/30/2021 1:30 AM
113	The fence around the football field has some bad spots	1/30/2021 1:28 AM
114	When playing basketball feel the basketball frame shaking, there are safety risks	1/30/2021 1:19 AM
115	Less fitness equipment	1/30/2021 1:12 AM
116	The toilet is not hygienic	1/30/2021 1:09 AM
117	One of the toilets doesn't come out when I go to the bathroom	1/30/2021 1:00 AM
118	The football gate is loose. It's a safety hazard	1/30/2021 12:51 AM
119	No problems, very good	1/30/2021 12:46 AM
120	There aren't many bathrooms	1/30/2021 12:39 AM
121	Some of the stools are broken	1/30/2021 12:39 AM
122	The grass on the football field is a little bad	1/30/2021 12:30 AM
123	The seats are a few wobbly	1/30/2021 12:16 AM
124	Facilities damage	1/30/2021 12:12 AM
125	Add public restrooms in parks	1/30/2021 12:06 AM
126	There is no	1/30/2021 12:00 AM
127	Some of the seats on the football field are broken	1/30/2021 12:00 AM

128	Add public restrooms in parks	1/29/2021 11:54 PM
129	Facilities damage	1/29/2021 11:48 PM
130	The basketball hoop seems to be broken. It's shaking. It's a safety hazard	1/29/2021 11:46 PM
131	Add public restrooms in parks	1/29/2021 11:45 PM
132	Add public restrooms in parks	1/29/2021 11:35 PM
133	Facilities damage	1/29/2021 11:32 PM
134	Add public restrooms in parks	1/29/2021 11:27 PM
135	Overloaded trash bins	1/29/2021 11:26 PM
136	Some of the seats are broken	1/29/2021 11:18 PM
137	Facility damage	1/29/2021 11:18 PM
138	Add public restrooms in parks	1/29/2021 11:17 PM
139	Inadequate public facilities	1/29/2021 11:17 PM
140	Too few lawn seats in the park	1/29/2021 11:08 PM
141	Unsound or damaged public facilities	1/29/2021 11:07 PM
142	Seating facilities are few	1/29/2021 11:05 PM
143	The disorderly	1/29/2021 10:54 PM
144	The basketball hoop can be replaced. It's starting to shake. It's not safe	1/29/2021 10:51 PM
145	When using public facilities while walking in the park, we found that some public facilities were damaged.	1/29/2021 10:49 PM
146	There are no lanes	1/29/2021 10:46 PM
147	No water park	1/29/2021 10:45 PM
148	Some areas need to be reinforced	1/29/2021 10:38 PM
149	A piece of the grass on the football pitch is broken and needs mending	1/29/2021 10:37 PM
150	Lots of holes in grass. Trip easily. High drug use. Smells like marijuana and even located needles by dugout. Increase of transient people. Park is poorly lit and monitored.	1/29/2021 10:37 PM
151	I had no problems	1/29/2021 10:37 PM
152	Poor facilities for children	1/29/2021 10:23 PM
153	There are so few benches in the park that some of the paint is off	1/29/2021 10:16 PM
154	It is not taken care of anymore. Restroom are dirty, the court is outdated, there are not enough picnic tables, and the playground is outdated. ALso, there seems to be a lot of scary ppl hanging out there.	1/29/2021 10:12 PM
155	Poor facilities for children	1/29/2021 10:01 PM
156	There are so many people on the basketball court that sometimes children can only watch but not play	1/29/2021 10:00 PM
157	Homeless people... teenagers smoking in the parking lot and doing other things not park related	1/29/2021 9:46 PM
158	Poor facilities for children	1/29/2021 9:44 PM
159	Clean and perfect	1/29/2021 9:43 PM
160	Children's facilities are not many, I took the children to, there is no, many children, children's facilities are few	1/29/2021 9:42 PM
161	Restroom	1/29/2021 9:39 PM

162	unleashed dogs, Homeless people that seem to be mentally ill	1/29/2021 8:46 PM
163	There are few recreational facilities for children	1/29/2021 8:42 PM
164	No, when the kids go to the basketball court, someone goes to the basketball court, can't play	1/29/2021 8:41 PM
165	Sometimes it's not convenient to go to the toilet	1/29/2021 8:13 PM
166	No issues	1/29/2021 8:01 PM
167	Very clean	1/29/2021 7:57 PM
168	Not much to do there	1/29/2021 7:24 PM
169	Litter, dirty benches, unsafe large gatherings	1/29/2021 5:42 PM
170	In the past.....loitering	1/29/2021 2:58 PM
171	Drug transactions and gang member gatherings	1/29/2021 2:37 PM
172	Restroom cleanliness	1/29/2021 1:39 PM
173	Just doesn’t feel safe since there is never security. Stopped going because does not feel safe.	1/29/2021 1:28 PM
174	Garbage scattered	1/29/2021 1:11 PM
175	No running path	1/29/2021 12:51 PM
176	The play grounds not staying open. Trash around area. Homeless sleeping around park.	1/29/2021 12:53 AM
177	Safety.	1/28/2021 10:55 PM
178	Weirdos hanging out at the benches.	1/28/2021 10:14 PM
179	i like that it has where to park comfortably	1/28/2021 8:46 PM
180	There’s not enough lighting. We’ve gone for baseball practices and it doesn’t feel safe anywhere away from the baseball fields at night.	1/28/2021 8:26 PM
181	None of the above	1/28/2021 7:59 PM
182	Lights for night walks	1/28/2021 7:15 PM
183	This is not the only park I utilize. I utilized Potrero heights park, 5 days a week for extended day care. There were issues with homeless, drug users, and people causing disorder. There is no park ranger and no park staff to deal with these issues.	1/28/2021 5:41 PM
184	I have seen personally but I have heard of bad people going there occasionally	1/28/2021 4:45 PM
185	The biggest issues we have are the transients that come and go. I do not feel safe having my kids around them. I also feel it does not have enough covered picnic areas.	1/28/2021 3:47 PM
186	No lights after dark in the summer	1/28/2021 2:47 PM
187	Homelessness	1/28/2021 1:32 PM
188	Drunks, drugees , and homeless	1/28/2021 1:01 PM
189	Homeless setting up in front of bathrooms, bleachers looked like they haven’t been sprayed down in months, Large holes in the lawn area	1/28/2021 12:42 PM
190	No maintenance, restroom is always closed. Poor lighting.	1/28/2021 11:44 AM
191	Not safe	1/28/2021 11:05 AM
192	Young teens having sex. My kid and I left and couldn't believe what I was seeing in broad daylight.	1/28/2021 9:40 AM
193	Dirty restroom, homeless people in parking lot all day and more at night.	1/28/2021 9:27 AM
194	None. I've driven by and the park does not offer much for active use besides walking around	1/28/2021 8:56 AM
195	None	1/28/2021 8:42 AM
196	Is not a clean park, restrooms are dirty park needs to get remodeled!.	1/28/2021 8:37 AM

197	it’s a really ugly park	1/28/2021 8:30 AM
198	needs improvement in bathrooms	1/28/2021 8:30 AM
199	None	1/28/2021 8:27 AM
200	Dirty, old, or closed restroom. Trash and graffiti on kids playground.	1/28/2021 12:06 AM
201	Bathroom is always very unwell kept. There is always trash in the playground area mixed with floor rubber. Its pretty dark in alot of areas.	1/27/2021 11:39 PM
202	Dirty restroom	1/27/2021 7:03 PM
203	Children playground needs to be update	1/27/2021 3:04 PM
204	More lighting Maybe even having security	1/27/2021 1:51 PM
205	Overall park needs to be updated.	1/27/2021 9:57 AM
206	people using drugs drinking alcohol and people getting kill in the park	1/27/2021 6:15 AM
207	It needs a better playground, better parking lot. No smoke signs. Workout machines for the public.	1/27/2021 1:17 AM
208	The restrooms don’t feel safe, they are too small and not clean.	1/27/2021 12:58 AM
209	Mariguana use	1/26/2021 10:52 PM
210	None	1/26/2021 8:17 PM
211	Not enough parking during sports activities and security	1/26/2021 8:02 PM
212	None	1/26/2021 7:02 PM
213	Bathrooms are sub standard.	1/26/2021 6:00 PM
214	Homeless and secluded and dark	1/26/2021 4:45 PM
215	Lot of homeless and stretchy encounters	1/26/2021 4:06 PM
216	Lack of lighting and the bathrooms could benefit from renovations.	1/26/2021 3:32 PM
217	There are to many homeless people around the park.	1/26/2021 3:00 PM
218	Drug abuse	1/26/2021 2:47 PM
219	Restroom, the ones outside not so clean. And wainos.	1/26/2021 2:43 PM
220	Nope	1/26/2021 2:35 PM
221	A lot of homeless and not a lot of police patrolling	1/26/2021 2:21 PM
222	I’m a mother trying to loose the baby weight a walking path or cement going all around the park would be nice. There’s only certain places I can walk with a stroller or the children can ride a bike.	1/26/2021 2:08 PM
223	There is suspicious looking men lurking the area	1/26/2021 12:51 PM
224	Dirty, druggies	1/26/2021 12:43 PM
225	People smoke mariguana most of the time we go smells.	1/26/2021 12:42 PM
226	Homeless people scare the kids	1/26/2021 12:35 PM
227	Bathrooms	1/26/2021 12:26 PM
228	Strange people	1/26/2021 12:17 PM
229	The only thing that bothers me is that people take their dogs and don’t have a leash on. Sometimes the dogs come and jump on us like playing but I don’t really appreciate that. I don’t have anything against dogs but I don’t want them all over me.	1/26/2021 12:17 PM
230	People drinking and cholos	1/26/2021 11:49 AM
231	Need an upgrade	1/26/2021 11:32 AM

232	Lack of supervision lack of lighting huge homeless issues dirty and some spray paint in area. The park needs to feel more welcoming with nice curb appeal. The restrooms definitely need to be addressed and made more modern and nicer. I feel from time to time police and staff spot checks would be helpful.	1/26/2021 11:29 AM
233	The Homeless that are by the parking area and restrooms. I don't feel the restrooms are clean and safe.	1/26/2021 11:24 AM
234	Bums smoking and drinking	1/26/2021 11:20 AM
235	It doesn't feel safe at night. Not necessarily the park itself but the surrounding areas.	1/26/2021 11:18 AM
236	People smoking weed and other illegal activities.	1/26/2021 11:14 AM
237	The park is outdated (including the courts, playarea and community center). I live really close by Reggie park but prefer to drive to Whittier to use their parks.	1/26/2021 11:14 AM
238	Homeless people hanging around.	1/26/2021 11:11 AM
239	Need a soccer field with goals and plenty of lighting. Need nice walking and jogging trails	1/26/2021 11:09 AM
240	Too many weed smokers and pet owners who don’t pick up their dog’s mess	1/26/2021 11:06 AM
241	Non, it’s pretty clean.	1/26/2021 11:01 AM
242	Safety and lighting	1/26/2021 10:57 AM
243	Sometimes on the lawn there are homeless sleeping in the grass and they urinate next to the trees. The restrooms are really dirty I don’t even want to use them. I have my kids go before we leave. The playground needs repair or update.	1/26/2021 10:54 AM
244	N/A	1/26/2021 10:50 AM
245	None	1/26/2021 10:45 AM
246	none	1/26/2021 10:44 AM
247	Dirty bathrooms, homeless	1/26/2021 10:39 AM
248	N/A	1/26/2021 10:35 AM
249	NA	1/26/2021 10:34 AM
250	A lot of homeless smoking. Or taking over tables	1/26/2021 10:33 AM
251	Dirty slides,poop on lawns. Dirty tables some kids can be mean random people seating in front of playground staring	1/26/2021 10:32 AM
252	security, cleanliness of restroom	1/26/2021 10:29 AM

#	RESPONSES	DATE
1	Looks pretty comprehensive. I definitely think that priority should be given to family areas and the soccer/sports fields and playground areas because I feel that would be highly utilized in this area, above the trail loop or even the fitness stations.	2/16/2021 4:59 PM
2	will the parking lot have permeable asphalt?	2/13/2021 8:57 PM
3	I would really add the bathroom sould only be used with a key given by personal to enter. To many homeless or drug addicts use and dirty bathrooms our children use.	2/12/2021 11:49 PM
4	None	2/12/2021 10:04 PM
5	Additional picnic areas	2/12/2021 2:58 PM
6	No	2/12/2021 2:05 PM
7	I'd like to see more open areas where sports can't take over. I have a 1 year old and 8 year old and they love to just run around on the grass	2/12/2021 12:08 PM
8	The plan looks very nice, i love all the new amenities and areas to play. My only concern would be that there are too many multi use sports fields. I believe the single baseball area is enough, or one other on the top left corner, seeing that a path would be near this area which could be open field for a multitude of activities. Everything else looks great.	2/12/2021 11:13 AM
9	No	2/12/2021 10:42 AM
10	Love the plan! Hope it gets approved and will be completed.	2/12/2021 10:34 AM
11	I think it would be nice to have a trail going around the perimeter of the park with lights for those who want to run in low light conditions	2/12/2021 10:13 AM
12	I would highly suggest a connected bike trail especially for the children where they can use the trail to circle the park completely (or at least a good portion of the park). Please consider this suggestion as my children love to ride their bikes, however, it is difficult to find any safe areas to do so nearby. I feel that the park is large enough to continue the trail loop from area 5/6 on the layout passing to the west side of area 7, east side of area 1 and finally connect to the opposite end of the orange dotted route. Again, I strongly encourage you take this suggestion into consideration and allow the lanes to be wide enough or consider a one way trail with sign's posted "One Way Only" to avoid bike accidents/injuries. Thank you.	2/12/2021 9:49 AM
13	Excited for the new walking trail and playground area. Definitely consider adding more lighting, for security purposes	2/12/2021 4:18 AM
14	I take my son to many parks to play sports, exercise, play in the playground, and have his birthday parties. Montebello has not fixed up their parks and neglect the cleanliness. Before COVID I put my son in sports in Pico Rivera because they have did an awesome job improving their parks and youth sports. I hope Montebello does the same. If there is more positivity in the city there will be much less negativity. Children deserve to feel safe.	2/12/2021 12:02 AM
15	I think that it's important for the city to keep parks and recreation clean and accessible for people of color and low income.	2/11/2021 10:18 PM
16	It's a small park. Less is more	2/11/2021 8:58 PM
17	Great ideas, hopefully all montebello parks can be enhanced with the layouts/pictures provided to a certain degree and along the city budget/grants	2/11/2021 6:19 PM

18	Overall this new plan should improve our parks for our children.	2/11/2021 5:34 PM
19	When visiting the park the basketball court is always occupied. I feel that a multi-purpose court would continue to be occupied mostly by the basketball players, leaving the other options completely unused	2/11/2021 4:47 PM
20	Needs nice trails to run, walk. Like to see a bigger soccer field	2/11/2021 4:23 PM
21	The plan is good, more than anything we need activities for our kids at low cost, and at a time were working parents are able to take them. The schedules that the city provide are no friendly for working parents. With a 8 hours normal schedule.	2/11/2021 4:22 PM
22	Would Love bike trail for my kids, often we leave the city to ride	2/11/2021 3:48 PM
23	Suspicious people hanging at the park	2/11/2021 11:56 AM
24	I hope the trees ate full grown from the beginning!	2/11/2021 9:43 AM
25	I really don't think this park needs charging stations. I know the park plan is probably set in stone, but putting a dog park would be cool.	2/11/2021 9:33 AM
26	Add water fountains for dogs and humans also poop baggies. I would also love to see a dog park.	2/11/2021 9:16 AM
27	Keeping it clean and safe.	2/9/2021 8:51 PM
28	safety and updated kids play area	2/9/2021 2:53 PM
29	Parking is an issue, perhaps allow for parking in the dead end zone on the west end of the park. Walking trail is too Short, a DG trail that loops east of the soccer field could easily fit	2/3/2021 5:55 PM
30	I dont see that a paved walking trail. That would be great.	2/3/2021 4:18 PM
31	No	2/2/2021 11:29 AM
32	What happens to the trail loop on the east side? Keep the fitness area way from game areas not to involve conflict. With players and spectators. Also, minimize the baseballs fields to two.... there really is t any parking for that many guests and the impact to the neighborhood would be worse off. Sometimes less is more.	2/1/2021 3:47 PM
33	Overall feel good, hope to ensure the lighting effect at night, ensure enough safety at night	2/1/2021 11:54 AM
34	No	2/1/2021 10:57 AM
35	Ensure the lighting effect at night, ensure enough safety at night	2/1/2021 10:49 AM
36	many residents own dogs . please consider adding a dog park for Montebello residents !!	2/1/2021 10:17 AM
37	Ensure the lighting effect at night, ensure enough safety at night	2/1/2021 9:12 AM
38	Good. Hope to make sure the lighting is good at night	2/1/2021 5:44 AM
39	I think the plan is great	1/31/2021 9:09 PM
40	Looks great, just want to be a safe space to go to.	1/31/2021 8:59 PM
41	no	1/31/2021 7:33 PM
42	It looks better to add some more greens In the right side corner of multi-use sports field.	1/31/2021 6:31 PM
43	not	1/31/2021 6:03 AM
44	The multi–sports courts is quite big.I 'm expecting to use it.	1/31/2021 1:40 AM
45	Please add more restrooms if possible.	1/31/2021 12:42 AM
46	Not quite good	1/30/2021 9:50 PM
47	Good good	1/30/2021 9:44 PM
48	Good. Finally, a nice place to walk every day	1/30/2021 9:38 PM
49	Good, good. Finally a good park	1/30/2021 9:31 PM

50	I hope you can take the lighting situation into account	1/30/2021 9:23 PM
51	The increase in the area of the playground makes it suitable for running and walking	1/30/2021 9:18 PM
52	I hope there are plenty of parking Spaces.	1/30/2021 9:15 PM
53	The basketball court is a bit old and I want to update it	1/30/2021 9:12 PM
54	Add more children's amusement facilities in the family area	1/30/2021 9:06 PM
55	I hope the bathroom can be redecorated	1/30/2021 9:01 PM
56	The lawn rest area was intended to be larger	1/30/2021 8:55 PM
57	Lawn playground area hope to be a little bigger	1/30/2021 8:47 PM
58	It is hoped that the facilities for children are well developed	1/30/2021 8:33 PM
59	Hope to build more places for elderly equipment activities	1/30/2021 8:10 PM
60	I wish I could rearrange the lighting	1/30/2021 7:59 PM
61	No water park	1/30/2021 7:32 PM
62	The overall effect is very good. I hope to pay attention to the lighting effect, which is very important	1/30/2021 8:42 AM
63	It's perfect	1/30/2021 8:27 AM
64	Looks great	1/30/2021 5:39 AM
65	I hope the infrastructure is improving	1/30/2021 5:21 AM
66	You can add a senior activity area	1/30/2021 4:09 AM
67	A special activity area for the elderly can be added	1/30/2021 4:01 AM
68	Two more public restrooms could be added	1/30/2021 3:48 AM
69	Don't complain	1/30/2021 3:38 AM
70	A special playground for children can be added	1/30/2021 3:22 AM
71	A sitting area could be added	1/30/2021 3:11 AM
72	The courthouse could be swapped for the basketball court	1/30/2021 3:00 AM
73	You can add more plants	1/30/2021 2:37 AM
74	You can add some sports, such as tennis, etc	1/30/2021 2:28 AM
75	The courthouse can be moved to a corner to avoid too much noise	1/30/2021 2:18 AM
76	The road is narrow	1/30/2021 2:08 AM
77	Toilet installs a few more, a little little, inconvenient	1/30/2021 2:02 AM
78	There are fewer places for children to play	1/30/2021 1:58 AM
79	There should be another basketball court,	1/30/2021 1:52 AM
80	There could be more plants	1/30/2021 1:46 AM
81	No water park	1/30/2021 1:45 AM
82	The parking lot is a little off. It's not easy to park	1/30/2021 1:40 AM
83	There are fewer toilet buildings	1/30/2021 1:32 AM
84	The bathroom's a little short	1/30/2021 1:32 AM
85	The facilities for children are a little sparse	1/30/2021 1:22 AM
86	Less fitness equipment	1/30/2021 1:15 AM
87	The parking lot is a little small.	1/30/2021 1:11 AM

88	Public toilets should be built a few more, a little less	1/30/2021 1:02 AM
89	The open beta is a little short	1/30/2021 12:53 AM
90	No problems, very good	1/30/2021 12:48 AM
91	The scale of family activities is too small	1/30/2021 12:45 AM
92	I think it's perfect,	1/30/2021 12:42 AM
93	Perfect, okay	1/30/2021 12:32 AM
94	The parking lot feels a little small, but otherwise it's perfect	1/30/2021 12:19 AM
95	No water park	1/30/2021 12:14 AM
96	Add public restrooms in parks	1/30/2021 12:09 AM
97	It feels good. It's a beautiful park	1/30/2021 12:06 AM
98	There is no	1/30/2021 12:05 AM
99	Add public restrooms in parks	1/30/2021 12:00 AM
100	No water park	1/29/2021 11:51 PM
101	Seat seven, can we put some facilities for children	1/29/2021 11:49 PM
102	Add public restrooms in parks	1/29/2021 11:47 PM
103	Add public restrooms in parks	1/29/2021 11:39 PM
104	No water park	1/29/2021 11:35 PM
105	More than willing to provide volunteers with construction materials	1/29/2021 11:29 PM
106	It feels good. I just feel like the kids' park has few facilities	1/29/2021 11:28 PM
107	No water park	1/29/2021 11:21 PM
108	Insufficient fitness equipment	1/29/2021 11:21 PM
109	Add public restrooms in parks	1/29/2021 11:20 PM
110	It feels very human to me, very reasonable	1/29/2021 11:10 PM
111	Add park seating and public restrooms	1/29/2021 11:10 PM
112	No water park	1/29/2021 11:10 PM
113	Green coverage rate is still a little less	1/29/2021 11:00 PM
114	I think the plan is very humanized, meeting people's travel needs. If the environment on the path is better, it will be more perfect.	1/29/2021 10:59 PM
115	Water park	1/29/2021 10:56 PM
116	I feel good, I feel very comfortable,	1/29/2021 10:56 PM
117	No water park	1/29/2021 10:51 PM
118	Very good, no suggestions	1/29/2021 10:50 PM
119	Water park	1/29/2021 10:48 PM
120	I feel the plan is perfect, very practical	1/29/2021 10:41 PM
121	Plan for parking or surveillance?	1/29/2021 10:40 PM
122	No water park	1/29/2021 10:38 PM
123	No water park	1/29/2021 10:25 PM
124	No water park	1/29/2021 10:19 PM
125	Just make the number one a children's playground	1/29/2021 10:19 PM

126	Bike paths would be awesome	1/29/2021 10:15 PM
127	No water park	1/29/2021 10:10 PM
128	No Waterborne Facilities	1/29/2021 10:03 PM
129	There are so many people on the basketball court that sometimes children can only watch but not play	1/29/2021 10:03 PM
130	Looks good	1/29/2021 9:49 PM
131	No water park	1/29/2021 9:47 PM
132	I personally like to have rockery in the park and I would like to see rockery with fountains	1/29/2021 9:46 PM
133	More equipment is expected to be added	1/29/2021 9:46 PM
134	I like it. You managed to squeeze everything in.	1/29/2021 8:48 PM
135	The overall effect is perfect, but I think there should be rockery and running river, more perfect	1/29/2021 8:48 PM
136	Water facilities	1/29/2021 8:47 PM
137	Very good plan I like it. Can not wait to visit	1/29/2021 8:08 PM
138	Add colorful plants and flowers to beautify the park	1/29/2021 7:28 PM
139	It would be great to extend the trail loop/path to the entrance on Walnut St. to make pedestrian access easier	1/29/2021 3:23 PM
140	All parks need more security surveillance as in cameras or more police patrolling	1/29/2021 2:39 PM
141	I think it is good feasible and really helpful to the people in community	1/29/2021 1:13 PM
142	Looks good for the space available. A cushioned running path is important to me more than it's attenede use, but it also makes people explore all ends of the park which is also good for safety. Almansor Park in Alhambra is an excellent park as a reference.	1/29/2021 12:58 PM
143	Please make this happen: we need better parks and need to feel safe.	1/28/2021 10:58 PM
144	i would like you to havr some whater area for the summer	1/28/2021 8:48 PM
145	I’m not sure how important the family activity area is, I think it’ll get tagged and messed up pretty quickly.	1/28/2021 8:30 PM
146	No	1/28/2021 8:00 PM
147	Lights?	1/28/2021 7:18 PM
148	The park was already well laid out. The inclusion of a soccer field, more baseball fields, and walking path are welcomed and will serve the community well - as long as there's increased lighting and less bushes covering path.	1/28/2021 5:43 PM
149	Snack bar for teams to utilize to fundraise.	1/28/2021 12:47 PM
150	Need more baseball fields to support our local league. Kids are going to other city's to play baseball.	1/28/2021 11:47 AM
151	Looks great!	1/28/2021 9:33 AM
152	That's a good site plan	1/28/2021 8:58 AM
153	Looks good	1/28/2021 8:44 AM
154	No	1/28/2021 8:32 AM
155	This would be amazing!!	1/28/2021 8:29 AM
156	Looks good, especially moving basketball area to be bigger. Hope there will be enough lighting so kids can practice here in the night. Also maybe adding in sanitation stations and dog bags for people with dogs.	1/27/2021 11:43 PM
157	I think it would be awesome	1/27/2021 7:06 PM

158	No	1/27/2021 3:08 PM
159	more police activity in the park not safe	1/27/2021 6:17 AM
160	No	1/27/2021 1:19 AM
161	Looks good	1/27/2021 1:00 AM
162	I'm ok.	1/26/2021 8:24 PM
163	Not at the moment	1/26/2021 7:04 PM
164	The large baseball field should be big enough to accommodate a large soccer field.	1/26/2021 6:18 PM
165	More lights	1/26/2021 4:07 PM
166	I like the layout being presented to us. :)	1/26/2021 3:41 PM
167	I think its a good plan but should work on something for the homeless.	1/26/2021 3:40 PM
168	Needs more lighting.	1/26/2021 2:45 PM
169	No	1/26/2021 2:36 PM
170	On #8 will the fitness trail have grass, rubber, sand, dirt or cement. Please have the community parents in mind when approving plans making it easier to get around with children either with a stroller, trikes, power wheel	1/26/2021 2:16 PM
171	None	1/26/2021 12:28 PM
172	Looks great!	1/26/2021 12:28 PM
173	I think a water play area would be good in the future.	1/26/2021 12:24 PM
174	No	1/26/2021 12:15 PM
175	I love it	1/26/2021 11:50 AM
176	That’s great!	1/26/2021 11:33 AM
177	Well done	1/26/2021 11:33 AM
178	It looks perfect! I can’t wait to get out there with my kids. If improvements are possible.	1/26/2021 11:22 AM
179	Soccer field looks too small. Like to see a full size turf field	1/26/2021 11:17 AM
180	Anything updated and more modern with walking areas is totally fine with me. So excited and hoping these roll out!	1/26/2021 11:16 AM
181	I like	1/26/2021 11:03 AM
182	No	1/26/2021 10:47 AM
183	N/a	1/26/2021 10:35 AM
184	looks greatr	1/26/2021 10:30 AM

Q14 As a part of the Prop 68 grant application, the District is looking for volunteers or partners that can assist with funding (as a donor with donor recognition), help provide materials, and/or assist with volunteer hours on activities such as: planting trees, helping with art in the park projects (paint murals, install mosaics, etc.), creating or restoring some of the natural habitat, and/or other similar activities. If you are interested in any of these partner or volunteer opportunities, please provide a comment below along with your email. Thank you!

Q15 In addition to the question above, we are looking for groups to partner with for the Prop 68 grant. This may include any church groups, sports groups, YMCA, or others. If you know of any groups that may be potential partners, please provide a comment below and include the groups name along with an email. Thank you!

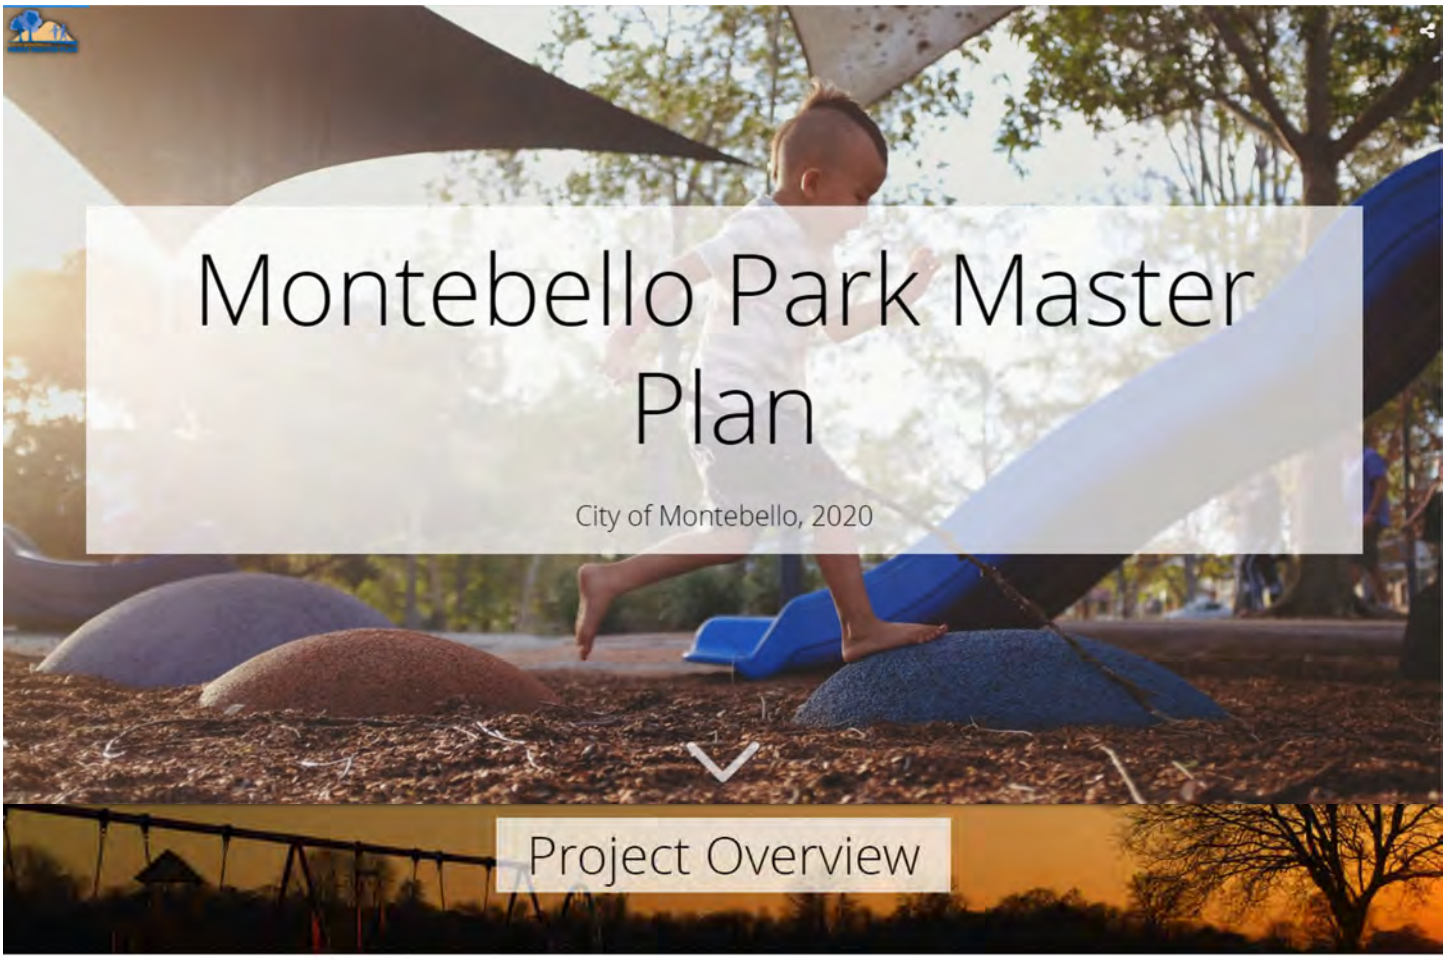
Storymap



Montebello Park Master Plan

City of Montebello, 2020

Project Overview

Parks and recreation facilities play an important role in today's communities. Numerous environmental, health, economic, and safety benefits are attributed to a sound park system with well-maintained parklands, trails, open spaces, and recreational amenities and programs.

The City of Montebello is developing a Parks Master Plan (PMP) to ensure that our park and recreation system is able to meet the current and future needs of community members of all ages and abilities.

The project team will assess community needs, evaluate current park and recreational amenity inventory, analyze current and future park level of service, identify and prioritize recommendations, and provide fiscal guidance to maintain and implement said recommendations. The result will be an action plan for future Montebello parks and recreational programs that support an active and high-quality lifestyle for our community.

The PMP will be developing various online engagement tools such as an interactive map survey, online text surveys, webinars, online live events, and email announcements during this unique and serious health crisis we're experiencing with the COVID-19 crisis.

Once the COVID-19 crisis is behind us, the PMP will continue the planning effort with a series of in-person workshops and "pop-up" events that are also accompanied with the online engagement tools previously mentioned

Our first online workshop was held on July 22th at 6:00 pm. The City is committed to making the planning process a collaborative effort with the community, stakeholders, and staff. The team introduced project goals, existing conditions mapping with a presentation, and explained how you can share your valuable feedback!

Missed the workshop? No worries! Check out the video recording below to see what you've missed.

City of Montebello Park Facilities Master Plan - Community Presentation

The second online workshop was held on September 10th at 6:00 pm. The team introduced project progress, park level of service analysis, and benchmarking with a presentation, conducted some quick polls, discussed key issues with the residents, and explained how you can share your valuable feedback!

Missed the workshop? No worries! Check out the video recording below to see what you've missed.

City of Montebello Park Facilities Master Plan - Community Workshop #2

The third online workshop was held on November 17th at 6:00 pm. The team gave a summary of the public survey, discussed some of the park amenity gaps, went over some potential infill opportunities, introduced the project draft recommendations, quickly reviewed some of the park specific plan sites, and closed with the project's next steps and a community raffle.

Missed the workshop? No worries! Check out the video recording below to see what you've missed.

The first online park specific workshop was held on December 15th at 6:00 pm. The team gave an overview of the project along with a summary of the public survey and the park amenity gaps. The workshop was primarily focused on design ideas for Reggie Rodriguez Park, Grant Rea Park, Montebello City Park. The team shared various design ideas including potential infill opportunities for each park and more wholistic modifications. The closed with general discussion, the project's next steps, and a community raffle.

Please participate in the following park surveys to provide your input and feedback on the park specific plans. In filling out the survey you will also be entered in for a community raffle. Thank you!

Significant/Systemic Findings and Deficiencies

Historical Summary

Montebello City Park was most likely constructed in the 1960s. The Restroom Building, City Park Pool, City Park Bandshell and the Storage Building appear to be original. The Senior and Youth Centers were constructed between 1996 and 2001.

Architectural

The Senior and the Youth Centers are constructed of brick and masonry bearing walls

The City Park Pool is constructed of brick bearing walls on cast-in place concrete foundation walls.

The City Park Bandshell is constructed of brick bearing walls on a concrete slab floor with a heavy timber framed roof.

The Restroom Building is constructed of concrete masonry units on a concrete slab floor with a heavy timber framed roof. The restrooms were not accessible as the doors were locked due to a shut-down because of the Corona (Covid-19) virus.

The Storage Building is constructed of wood framed construction on concrete slab.

Mechanical, Electrical, Plumbing and Fire (MEPF)

Heating and cooling at the Senior and the Youth Centers is provided by rooftop package units. The Youth Center also has had an air handling unit . The HVAC equipment is original to 1996 construction. One elevator provides access to the Senior Center's second floor.

Their electrical system and light fixtures are mostly original to the 1996 construction as evidenced by manufacture dates on the main electrical switchboard. LED light fixtures were recently added at limited locations.

Plumbing systems at the Senior and the Youth Centers consist of copper supply piping and cast-iron waste pipe with a gas and electric water heaters providing hot water to the restrooms and showers.

Heating and cooling is not provided at the Restroom, Storage, City Park Pool and the City Park Bandshell buildings.

The plumbing piping system at the Restroom Building is most likely original and will need replacement during the assessment period. Hot water is not provided. Plumbing fixtures could not be observed for the reason mentioned earlier.

The fire alarm and suppression systems at the Senior and the Youth Centers appear to be in fair condition. Typical lifecycle replacements and ongoing maintenance will be required. A fire alarm and suppression systems are not provided at the City Park Pool, City Bandshell and Restroom buildings.

Site

In general, the site has been well maintained. The site contains moderate landscaping, which is served by in-ground irrigation systems. There is one playground on site, and it is in fair condition. The concrete sidewalk and asphalt pathways are in fair overall condition. The asphalt paved parking areas and drive aisles are in fair condition and require sealing and striping. The site lighting is aged, and it is recommended that the system be upgraded to LED fixtures to improve energy efficiency.

Recommended Additional Studies

Some areas of the facilities were identified as having moderate accessibility issues. Bureau Veritas recommends a study be performed to take measurements, provide additional itemized details, research local requirements, and, if necessary, estimate the scope and cost of any required improvements. The cost of this study is included in the cost tables. Due to the lack of measurements and itemized findings at this point in time, the costs for any possible subsequent repairs or improvements are not currently included

Facility Condition Index (FCI)

One of the major goals of the FCA is to calculate each building's Facility Condition Index (FCI), which provides a theoretical objective indication of a building's overall condition. By definition, the FCI is defined as the ratio of the cost of current needs divided by current replacement value (CRV) of the facility. The chart below presents the industry standard ranges and cut-off points.

FCI Ranges and Description	
0 – 5%	In new or well-maintained condition, with little or no visual evidence of wear or deficiencies.
5 – 10%	Subjected to wear but is still in a serviceable and functioning condition.
10 – 30%	Subjected to hard or long-term wear. Nearing the end of its useful or serviceable life.
30% and above	Has reached the end of its useful or serviceable life. Renewal is now necessary.

The deficiencies and lifecycle needs identified in this assessment provide the basis for a portfolio-wide capital improvement funding strategy. In addition to the current FCI, extended FCI's have been developed to provide owners the intelligence needed to plan and budget for the "keep-up costs" for their facilities. As such the 3-year, 5-year, and 10-year FCI's are calculated by dividing the anticipated needs of those respective time periods by current replacement value. As a final point, the FCI's ultimately provide more value when used to relatively compare facilities across a portfolio instead of being over-analyzed and scrutinized as stand-alone values. The table below summarizes the individual findings for this FCA:

FCI Analysis

Facility (year built)	Cost/SF	Total SF	Replacement Value	Current	3-Year	5-Year	10-Year
Montebello City Park (12.93 acres) / City Park Bandshell	$225	1,600	$360,000	2.8%	2.8%	3.5%	13.0%
Montebello City Park (12.93 acres) / City Park Pool	$245	8,400	$2,058,000	0.5%	2.8%	12.2%	35.7%
Montebello City Park (12.93 acres) / Restroom Building	$225	950	$213,750	0.0%	0.0%	0.0%	3.2%
Montebello City Park (12.93 acres) / Senior Center	$325	15,000	$4,875,000	0.0%	0.0%	2.5%	13.1%
Montebello City Park (12.93 acres) / Site			$1	0.0%	0.0%	0.0%	0.0%
Montebello City Park (12.93 acres) / Storage Building	$175	900	$157,500	0.0%	3.9%	14.3%	46.1%
Montebello City Park (12.93 acres) / Youth Center and Gym	$325	15,000	$4,875,000	0.0%	0.0%	3.8%	14.9%

The orange line in the graph below forecasts what would happen to the FCI (left Y axis) over time, assuming zero capital expenditures. The capital expenditures allocated for each year (blue bars) are associated with the dollar amounts along the right Y axis.

Needs by Year with Unaddressed FCI Over Time

Dishwasher
Senior Center Kitchen

Uniformat Code: E1093
Recommendation: **Replace in 2021**

Priority Score: **82.0**

Plan Type:
Performance/Integrity

Cost Estimate: $2,000

**$**$$$

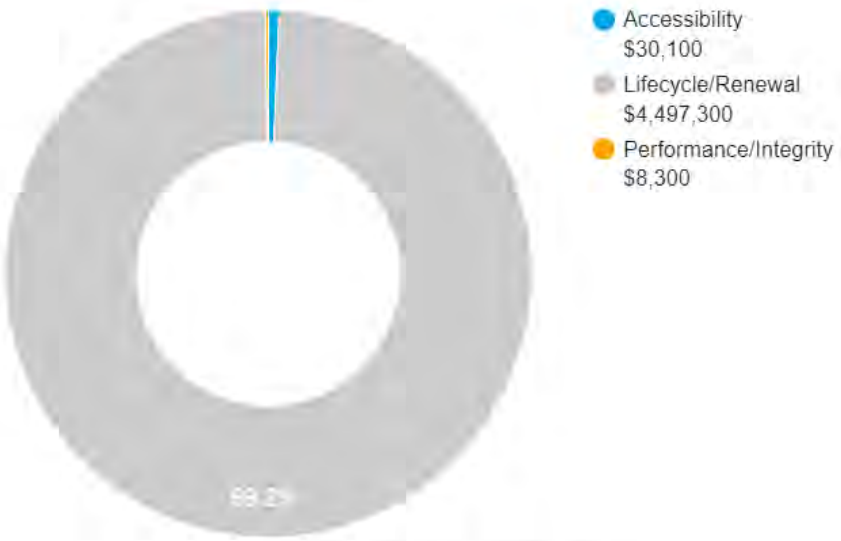
The unit is not working. - AssetCALC ID: 1822272

Plan Types

Each line item in the cost database is assigned a Plan Type, which is the primary reason or rationale for the recommended replacement, repair, or other corrective action. This is the "why" part of the equation. A cost or line item may commonly have more than one applicable Plan Type; however, only one Plan Type will be assigned based on the "best" fit, typically the one with the greatest significance.

Plan Type Descriptions		
Safety	■	An observed or reported unsafe condition that if left unaddressed could result in injury; a system or component that presents potential liability risk.
Performance/Integrity	■	Component or system has failed, is almost failing, performs unreliably, does not perform as intended, and/or poses risk to overall system stability.
Accessibility	■	Does not meet ADA, UFAS, and/or other handicap accessibility requirements.
Environmental	■	Improvements to air or water quality, including removal of hazardous materials from the building or site.
Retrofit/Adaptation	■	Components, systems, or spaces recommended for upgrades in in order to meet current standards, facility usage, or client/occupant needs.
Lifecycle/Renewal	■	Any component or system that is not currently deficient or problematic but for which future replacement or repair is anticipated and budgeted.

Plan Type Distribution (by Cost)



10-YEAR TOTAL: $4,535,700

9. Property Space Use and Observed Areas

Unit Allocation

All 12,93 Acres of the property are occupied by the City of Montebello. The spaces are mostly a combination of community and recreational facilities with supporting restrooms and storage/utility buildings.

Areas Observed

Most of the interior spaces were observed in order to gain a clear understanding of the property's overall condition. Other areas accessed included the site within the property boundaries, the exterior of the property, and the roofs.

The restroom building and the Pool building 2nd floor and roof were inaccessible during the visit.

Key Spaces Not Observed

Areas of note that were either inaccessible or not observed for other reasons are listed here:

- Restroom Building, Locked room and no key
- Pool building 2nd floor and roof, Locked room and no key

10. ADA Accessibility

Generally, Title II of the Americans with Disabilities Act (ADA) prohibits discrimination by entities to access and use of "areas of public accommodations" and "public facilities" on the basis of disability. Regardless of their age, these areas and facilities must be maintained and operated to comply with the Americans with Disabilities Act Accessibility Guidelines (ADAAG).

A public entity (i.e. city governments) shall operate each service, program, or activity so that the service, program, or activity, when viewed in its entirety, is readily accessible to and usable by individuals with disabilities.

However, this does not:

1. Necessarily require a public entity to make each of its existing facilities accessible to and usable by individuals with disabilities.
2. Require a public entity to take any action that would threaten or destroy the historic significance of an historic property; or
3. Require a public entity to take any action that it can demonstrate would result in a fundamental alteration in the nature of a service, program, or activity or in undue financial and administrative burdens. In those circumstances where personnel of the public entity believe that the proposed action would fundamentally alter the service, program, or activity or would result in undue financial and administrative burdens, a public entity has the burden of proving that compliance with 35.150(a) of this part would result in such alteration or burdens. The decision that compliance would result in such alteration or burdens must be made by the head of a public entity or his or her designee after considering all resources available for use in the funding and operation of the service, program, or activity, and must be accompanied by a written statement of the reasons for reaching that conclusion. If an action would result in such an alteration or such burdens, a public entity shall take any other action that would not result in such an alteration or such burdens but would nevertheless ensure that individuals with disabilities receive the benefits or services provided by the public entity.

During the FCA, Bureau Veritas performed a limited high-level accessibility review of the facility non-specific to any local regulations or codes. The scope of the visual observation was limited to those areas and categories set forth in the tables throughout this report. It is understood by the Client that the limited observations described herein do not comprise a full ADA Compliance Survey, and that such a survey is beyond the scope of Bureau Veritas's undertaking. Only a representative sample of areas was observed, and actual measurements were not taken to verify compliance.

An accessibility study has not been performed at the site. A comprehensive ADA Compliance Survey will reveal specific aspects of the property that are not in compliance. Since some areas or categories above were identified as having major or moderate associated issues, Bureau Veritas recommends such a study be performed to take measurements, provide additional itemized details, research local requirements, and, if necessary, estimate the scope and cost of any required improvements. The cost of this study is included in the cost tables. Due to the lack of measurements and itemized findings at this point in time, the costs for any possible subsequent repairs or improvements are not currently included.

Removal of barriers to accessibility should be addressed from a liability standpoint in order to comply with federal law, but the barriers may or may not be building code violations. The Americans with Disabilities Act Accessibility Guidelines are part of the ADA federal civil rights law pertaining to the disabled and are not a construction code. State and local jurisdictions have adopted the ADA Guidelines or have adopted other standards for accessibility as part of their construction codes.

Removal of barriers to accessibility should be addressed from a liability standpoint in order to comply with federal law, but the barriers may or may not be building code violations. Playground

Picnic Table

Exterior access route

The table below is intended to be used as a general reference guide to help differentiate the orders of magnitude between some of the more commonly observed accessibility issues. The table is not intended to be all-inclusive, and boxes checked in the tables above do not necessarily mean those specific problems or shortcomings cited as examples below exist at the subject buildings and sites. Reference the photos above and/or *Key Findings* section for visuals and/or more specifics about the subject site conditions.

Reference Guide

	Major Issues *(ADA study recommended)*	Moderate Issues *(ADA study recommended)*	Minor/No Issues
Parking	- Needs full reconstruction - Excessive slopes over 3% require major re-grading - No level locations to add required spaces	- No or non-compliant curb cuts - Moderate difficulty to add required accessible spaces - Slopes close to compliant	- Painting of markings needed - Signage height non-compliant - Signage missing
Exterior Path of Travel	- Large areas of sidewalks with excessive slopes - No ramp when needed - Ramps with excessive slopes	- Ramps need rails - Ramps need rail extensions - Need significant # of lever handles - All or most entrance door exterior maneuvering clearance areas with excessive slopes	- One entrance door exterior maneuvering clearance area with excessive slope - A few doorknobs instead of lever handles - Non-compliant signage
Interior Path of Travel	- All or most interior doors appear less than 32” wide - Corridors less than 36” wide - No ramp when needed - Ramps with excessive slopes - Non-compliant treads/risers at means of egress stairways	- Single height drinking fountains - Drinking fountain too high or protrudes into accessible route - Ramps need rails - Ramps need rail extensions - Need significant # of lever handles - Non-compliant rail extensions at egress stairways - All/most door thresholds high	- One door threshold too high - A few doorknobs instead of lever handles - Non-compliant door pressures - Non-compliant signage - Switches not within reach range
Public Use Restrooms	- No ADA RR on each accessible floor - Restroom(s) too small - Entire restroom(s) requires renovation - Water closet clearance requires moving walls	- Interior doors appear less than 32” wide - Missing or non-compliant grab bars - Easily fixable clearance issues	- Minor height adjustments required - Non-compliant door pressures - Missing a visual strobe (only required if audible fire alarm already present) - Missing lavatory pipe wraps - Signage not compliant
Elevators	- No elevator present when required - Elevator cab too small	- Panel control buttons not at compliant height - No hands-free emergency communication system - Elevator only has mechanical stops	- Audible/visual signals at every floor may be lacking - Minor signage / Braille issues
Kitchens/Kitchenettes	- Clear space for each appliance not present - Clearance between opposing counters too narrow	- Sink and counter too high - Sink knee and toe clearance not provided where required (built-in) - Less than 50% of cabinetry within reach range	- Dispensers not within reach range - Switches not within reach range - Missing sink pipe wraps if knee and toe clearance required

11. Purpose and Scope

Purpose

Bureau Veritas was retained by the client to render an opinion as to the Property's current general physical condition on the day of the site visit.

Based on the observations, interviews and document review outlined below, this report identifies significant deferred maintenance issues, existing deficiencies, and material code violations of record, which affect the Property's use. Opinions are rendered as to its structural integrity, building system condition and the Property's overall condition. The report also notes building systems or components that have realized or exceeded their typical expected useful lives.

The physical condition of building systems and related components are typically defined as being in one of five condition ratings. For the purposes of this report, the following definitions are used:

Condition Ratings	
Excellent	New or very close to new; component or system typically has been installed within the past year, sound and performing its function. Eventual repair or replacement will be required when the component or system either reaches the end of its useful life or fails in service.
Good	Satisfactory as-is. Component or system is sound and performing its function, typically within the first third of its lifecycle. However, it may show minor signs of normal wear and tear. Repair or replacement will be required when the component or system either reaches the end of its useful life or fails in service.
Fair	Showing signs of wear and use but still satisfactory as-is, typically near the median of its estimated useful life. Component or system is performing adequately at this time but may exhibit some signs of wear, deferred maintenance, or evidence of previous repairs. Repair or replacement will be required due to the component or system's condition and/or its estimated remaining useful life.
Poor	Component or system is significantly aged, flawed, functioning intermittently or unreliably; displays obvious signs of deferred maintenance; shows evidence of previous repair or workmanship not in compliance with commonly accepted standards; has become obsolete; or exhibits an inherent deficiency. The present condition could contribute to or cause the deterioration of contiguous elements or systems. Either full component replacement is needed or repairs are required to restore to good condition, prevent premature failure, and/or prolong useful life.
Failed	Component or system has ceased functioning or performing as intended. Replacement, repair, or other significant corrective action is recommended or required.
Not Applicable	Assigning a condition does not apply or make logical sense, most commonly due to the item in question not being present.

Scope

The standard scope of the Facility Condition Assessment includes the following:

- Visit the Property to evaluate the general condition of the building and site improvements, review available construction documents in order to familiarize ourselves with, and be able to comment on, the in-place construction systems, life safety, mechanical, electrical, and plumbing systems, and the general built environment.
- Identify those components that are exhibiting deferred maintenance issues and provide cost estimates for Immediate Costs and Replacement Reserves based on observed conditions, maintenance history and industry standard useful life estimates. This will include the review of documented capital improvements completed within the last five-year period and work currently contracted for, if applicable.
- Provide a full description of the Property with descriptions of in-place systems and commentary on observed conditions.
- Provide a high-level categorical general statement regarding the subject Property's compliance to Title III of the Americans with Disabilities Act. This will not constitute a full ADA survey, but will help identify exposure to issues and the need for further review.
- Obtain background and historical information about the facility from a building engineer, property manager, maintenance staff, or other knowledgeable source. The preferred methodology is to have the client representative or building occupant complete a Pre-Survey Questionnaire (PSQ) in advance of the site visit. Common alternatives include a verbal interview just prior to or during the walk-through portion of the assessment.
- Review maintenance records and procedures with the in-place maintenance personnel.
- Observe a representative sample of the interior spaces/units, including vacant spaces/units, to gain a clear understanding of the property's overall condition. Other areas to be observed include the exterior of the property, the roofs, interior common areas, and the significant mechanical, electrical and elevator equipment rooms.
- Provide recommendations for additional studies, if required, with related budgetary information.
- Provide an Executive Summary at the beginning of this report, which highlights key findings and includes a Facility Condition Index as a basis for comparing the relative conditions of the buildings within the portfolio.

12. Opinions of Probable Costs

Cost estimates are attached throughout this report, with the Replacement Reserves in the appendix.

These estimates are based on Invoice or Bid Document/s provided either by the Owner/facility and construction costs developed by construction resources such as *R.S. Means, CBRE Whitestone,* and *Marshall & Swift,* Bureau Veritas's experience with past costs for similar properties, city cost indexes, and assumptions regarding future economic conditions.

Opinions of probable costs should only be construed as preliminary, order of magnitude budgets. Actual costs most probably will vary from the consultant's opinions of probable costs depending on such matters as type and design of suggested remedy, quality of materials and installation, manufacturer and type of equipment or system selected, field conditions, whether a physical deficiency is repaired or replaced in whole, phasing or bundling of the work (if applicable), quality of contractor, quality of project management exercised, market conditions, use of subcontractors, and whether competitive pricing is solicited, etc. Certain opinions of probable costs cannot be developed within the scope of this guide without further study. Opinions of probable cost for further study should be included in the FCA.

Methodology

Based upon site observations, research, and judgment, along with referencing Expected Useful Life (EUL) tables from various industry sources, Bureau Veritas opines as to when a system or component will most probably necessitate replacement. Accurate historical replacement records, if provided, are typically the best source of information. Exposure to the elements, initial quality and installation, extent of use, the quality and amount of preventive maintenance exercised, etc., are all factors that impact the effective age of a system or component. As a result, a system or component may have an effective age that is greater or less than its actual chronological age. The Remaining Useful Life (RUL) of a component or system equals the EUL less its *effective age*, whether explicitly or implicitly stated. Projections of Remaining Useful Life (RUL) are based primarily on age and condition with the presumption of continued use and maintenance of the Property similar to the observed and reported past use and maintenance practices, in conjunction with the professional judgment of Bureau Veritas's assessors. Significant changes in occupants and/or usage may affect the service life of some systems or components.

Where quantities could not be or were not derived from an actual construction document take-off or facility walk-through, and/or where systemic costs are more applicable or provide more intrinsic value, budgetary square foot and gross square foot costs are used. Estimated costs are based on professional judgment and the probable or actual extent of the observed defect, inclusive of the cost to design, procure, construct and manage the corrections.

Definitions

Immediate Needs

Immediate Needs are line items that require immediate action as a result of: (1) material existing or potential unsafe conditions, (2) failed or imminent failure of mission critical building systems or components, or (3) conditions that, if not addressed, have the potential to result in, or contribute to, critical element or system failure within one year or will most probably result in a significant escalation of its remedial cost.

For database and reporting purposes the line items with RUL=0, and commonly associated with *Safety* or *Performance/Integrity* Plan Types, are considered Immediate Needs.

Replacement Reserves

Cost line items traditionally called Replacement Reserves (equivalently referred to as Lifecycle/Renewals) are for recurring probable renewals or expenditures, which are not classified as operation or maintenance expenses. The replacement reserves should be budgeted for in advance on an annual basis. Replacement Reserves are reasonably predictable both in terms of frequency and cost. However, Replacement Reserves may also include components or systems that have an indeterminable life but, nonetheless, have a potential for failure within an estimated time period.

Replacement Reserves generally exclude systems or components that are estimated to expire after the reserve term and are not considered material to the structural and mechanical integrity of the subject property. Furthermore, systems and components that are not deemed to have a material effect on the use of the Property are also excluded. Costs that are caused by acts of God, accidents, or other occurrences that are typically covered by insurance, rather than reserved for, are also excluded.

Replacement costs are solicited from ownership/property management, Bureau Veritas's discussions with service companies, manufacturers' representatives, and previous experience in preparing such schedules for other similar facilities. Costs for work performed by the ownership's or property management's maintenance staff are also considered.

Bureau Veritas's reserve methodology involves identification and quantification of those systems or components requiring capital reserve funds within the assessment period. The assessment period is defined as the effective age plus the reserve term. Additional information concerning system's or component's respective replacement costs (in today's dollars), typical expected useful lives, and remaining useful lives were estimated so that a funding schedule could be prepared. The Replacement Reserves Schedule presupposes that all required remedial work has been performed or that monies for remediation have been budgeted for items defined as Immediate Needs.

For the purposes of 'bucketizing' the System Expenditure Forecasts in this report, the Replacement Reserves have been subdivided and grouped as follows: Short Term (years 1-3), Near Term (years 4-5), Medium Term (years 6-10), and Long Term (years 11-20).

Key Findings

In an effort to highlight the most significant cost items and not be overwhelmed by the Replacement Reserves report in its totality, a subsection of Key Findings is included within the Executive Summary section of this report. Key Findings typically include repairs or replacements of deficient items within the first five-year window, as well as the most significant high-dollar line items that fall anywhere within the ten-year term. Note that while there is some subjectivity associated with identifying the Key Findings, the Immediate Needs are always included as a subset.

Exceedingly Aged

A fairly common scenario encountered during the assessment process, and a frequent source of debate, occurs when classifying and describing "very old" systems or components that are still functioning adequately and do not appear nor were reported to be in any way deficient. To help provide some additional intelligence on these items, such components will be tagged in the database as Exceedingly Aged. This designation will be reserved for mechanical or electrical systems or components that have aged well beyond their industry standard lifecycles, typically at least 15 years beyond and/or twice their Estimated Useful Life (EUL). In tandem with this designation, these items will be assigned a Remaining Useful Life (RUL) not less than two years but not greater than 1/3 of their standard EUL. As such the recommended replacement time for these components will reside outside the typical Short Term window but will not be pushed 'irresponsibly' (too far) into the future.

13. Certification

City of Montebello (the Client) retained Bureau Veritas to perform this Facility Condition Assessment in connection with its continued operation of Montebello City Park, 1301 West Whittier Boulevard, Montebello, California 90640, the "Property". It is our understanding that the primary interest of the Client is to locate and evaluate materials and building system defects that might significantly affect the value of the property and to determine if the present Property has conditions that will have a significant impact on its continued operations.
The conclusions and recommendations presented in this report are based on the brief review of the plans and records made available to our Project Manager during the site visit, interviews of available property management personnel and maintenance contractors familiar with the Property, appropriate inquiry of municipal authorities, our Project Manager's walk-through observations during the site visit, and our experience with similar properties.

No testing, exploratory probing, dismantling, or operating of equipment or in-depth studies were performed unless specifically required under the *Purpose and Scope* section of this report. This assessment did not include engineering calculations to determine the adequacy of the Property's original design or existing systems. Although walk-through observations were performed, not all areas may have been observed (see Section 1 for specific details). There may be defects in the Property, which were in areas not observed or readily accessible, may not have been visible, or were not disclosed by management personnel when questioned. The report describes property conditions at the time that the observations and research were conducted.

This report has been prepared on behalf of and exclusively for the use of the Client for the purpose stated within the *Purpose and Scope* section of this report. The report, or any excerpt thereof, shall not be used by any party other than the Client or for any other purpose than that specifically stated in our agreement or within the *Purpose and Scope* section of this report without the express written consent of Bureau Veritas.

Any reuse or distribution of this report without such consent shall be at the Client and the recipient's sole risk, without liability to Bureau Veritas.

Property Overview and Assessment Details

General Information	
Property Type	Public Park
Main Address	600 Rea Drive, Montebello, California 90640
Site Developed	1963 Renovated 2009
Site Area	24.9 acres (estimated)
Parking Spaces	215 total spaces all in open lots; 10 of which are accessible
Building Area	6,830 SF
Number of Stories	One
Outside Occupants / Leased Spaces	Rec center shared with local baseball/softball leagues
Date(s) of Visit	April 29, 2020
Management Point of Contact	City of Montebello/Park, Recreation and Community Services, David Sosnowski, Director 323.887.4588 phone dsosnowski@cityofmentebello.com email
On-site Point of Contact (POC)	Delfino Rangel
Assessment and Report Prepared By	Jonathan Levine

Significant/Systemic Findings and Deficiencies

Historical Summary

Grant Rea Park was constructed in 1963. A portion of the park was renovated in 2009.

Architectural

Most of the buildings consist of masonry bearing walls on a concrete slab with wood framed roofs. The Field 1 North Restroom consists of a wood structure on a concrete slab. The exterior façades at the Rec Center, Playground Restroom, and Concessions Stand consist of painted/exposed concrete masonry units. The façade at the Field 1 North Restroom consists of painted wood. The façade at the Field 1 South Restroom consists of painted CMU with aluminum windows. Most exterior doors are metal entry doors with the exception of the iron gated at the restrooms at the Rec Center and Field 1 South. The Rec Center and Concessions Stand roofs are gables with asphalt shingles. The playground Restroom and Field 1 North Restroom roofs are gables with metal finishes. The Field 1 South Restroom roof is a gable with asphalt shingles as well as flat modified bituminous roofing. The VCT flooring in the Rec Center recreation room is aged, damaged, and missing in some places. Typical lifecycle-based interior and exterior finish replacements are budgeted and anticipated.

Mechanical, Electrical, Plumbing and Fire (MEPF)

Cooling is provided to the Rec Center by a roof mounted evaporative cooler. No other heating or cooling components exist on the campus.

The plumbing systems are adequate for the facility and no major piping issues were found. No domestic water heating components exist on the campus.

The site is served by two main switchboards that were replaced in 2007. They are located in the electrical yard at the south end of the north parking lot. Interior lighting in the buildings primarily consist of LED fixtures.

None of the buildings are protected by fire alarm nor sprinkler suppression systems. Due to their size and functionality, it is recommended an alarm system be installed in the Rec Center and Field 1 South Restroom.

Site

The site consists of the Rec Center, Concessions Stand, restroom facilities, five baseball fields, a playground, batting cages, a petting zoo, concrete sidewalks/walkways, and two asphalt parking lots. The park contains grass and trees, play structures, benches and tables, gazebos, and barbecue grills throughout. There is a damaged trash receptacle near Picnic Shelter 2. The drinking fountain at the batting cages is also damaged. The baseball fields have chain link fencing, dugouts, bleachers, gazebos, scoreboards, and stadium pole lights. An irrigation system serves the park's landscaping features and fields. The petting zoo contains a barn and gazebos. The asphalt pavement in the parking lots has severe alligator cracking and potholes. The sealing and striping of the asphalt paving is also worn and should be replaced upon re-pavement.

Recommended Additional Studies

Some areas of the facility were identified as having major or moderate accessibility issues. Bureau Veritas recommends a study be performed to take measurements, provide additional itemized details, research local requirements, and, if necessary, estimate the scope and cost of any required improvements. The cost of this study is included in the cost tables. Due to the lack of measurements and itemized findings at this point in time, the costs for any possible subsequent repairs or improvements are not currently included.

Facility Condition Index (FCI)

One of the major goals of the FCA is to calculate each building's Facility Condition Index (FCI), which provides a theoretical objective indication of a building's overall condition. By definition, the FCI is defined as the ratio of the cost of current needs divided by current replacement value (CRV) of the facility. The chart below presents the industry standard ranges and cut-off points.

FCI Ranges and Description	
0 – 5%	In new or well-maintained condition, with little or no visual evidence of wear or deficiencies.
5 – 10%	Subjected to wear but is still in a serviceable and functioning condition.
10 – 30%	Subjected to hard or long-term wear. Nearing the end of its useful or serviceable life.
30% and above	Has reached the end of its useful or serviceable life. Renewal is now necessary.

The deficiencies and lifecycle needs identified in this assessment provide the basis for a portfolio-wide capital improvement funding strategy. In addition to the current FCI, extended FCI's have been developed to provide owners the intelligence needed to plan and budget for the "keep-up costs" for their facilities. As such the 3-year, 5-year, and 10-year FCI's are calculated by dividing the anticipated needs of those respective time periods by current replacement value. As a final point, the FCI's ultimately provide more value when used to relatively compare facilities across a portfolio instead of being over-analyzed and scrutinized as stand-alone values. The table below summarizes the individual findings for this FCA:

FCI Analysis

Facility (year built)	Cost/SF	Total SF	Replacement Value	Current	3-Year	5-Year	10-Year
Grant Rea Park (24.94 Acres) / Concessions Stand	$225	830	$186,750	0.0%	0.0%	0.0%	12.3%
Grant Rea Park (24.94 Acres) / Rec Center	$225	1,750	$393,750	0.0%	1.1%	3.3%	15.6%
Grant Rea Park (24.94 Acres) / Restroom - Field 1, North	$225	530	$119,250	0.0%	0.5%	0.5%	4.7%
Grant Rea Park (24.94 Acres) / Restroom - Field 1, South	$225	1,700	$382,500	0.0%	0.0%	4.2%	19.6%
Grant Rea Park (24.94 Acres) / Restroom - Playground	$225	320	$72,000	0.0%	0.0%	1.0%	30.2%
Grant Rea Park (24.94 Acres) / Site			$1	0.0%	0.0%	0.0%	0.0%

The orange line in the graph below forecasts what would happen to the FCI (left Y axis) over time, assuming zero capital expenditures. The capital expendituresuy allocated for each year (blue bars) are associated with the dollar amounts along the right Y axis.

Needs by Year with Unaddressed FCI Over Time

FCI Analysis: Grant Rea Park (24.94 Acres)

Replacement Value: $ 11,950,246; Inflation rate: 3.0%

Cost Estimate: $46,400

**$$**$$

Asphalt pavement sealing and striping is worn - AssetCALC ID: 1826621

Site Furnishings - Metal Trash Receptacles in Failed condition.

Site Picnic Shelter 2

Uniformat Code: G2045
Recommendation: **Replace in 2020**

Priority Score: **84.0**

Plan Type:
Performance/Integrity

Cost Estimate: $700

**$**$$$

Damaged trash receptacle - AssetCALC ID: 1826531

Interior Floor Finish in Poor condition.

Vinyl Tile (VCT)
Rec Center Recreation Room

Uniformat Code: C3024
Recommendation: **Replace in 2021**

Priority Score: **84.0**

Plan Type:
Performance/Integrity

Cost Estimate: $4,000

**$**$$$

Flooring is worn, damaged, and missing in some areas - AssetCALC ID: 1826455

Drinking Fountain in Poor condition.

Outside/Site Style
Site Batting Cages

Uniformat Code: D2018
Recommendation: **Replace in 2021**

Priority Score: **84.0**

Plan Type:
Performance/Integrity

Cost Estimate: $4,800

**$**$$$

Fountain is damaged - AssetCALC ID: 1826539

No photo provided.

Fire Alarm System

Basic/Zoned
Restroom - Field 1, South Throughout building

Uniformat Code: D5037
Recommendation: **Install in 2024**

Priority Score: **59.9**

Plan Type:
Modernization/Adaptation

Cost Estimate: $4,600

**$**$$$

Building lacks fire alarm system - AssetCALC ID: 1827011

No photo provided.

Fire Alarm System

Basic/Zoned
Rec Center Throughout building

Uniformat Code: D5037
Recommendation: **Install in 2024**

Priority Score: **59.9**

Plan Type:
Modernization/Adaptation

Cost Estimate: $7,800

**$**$$$

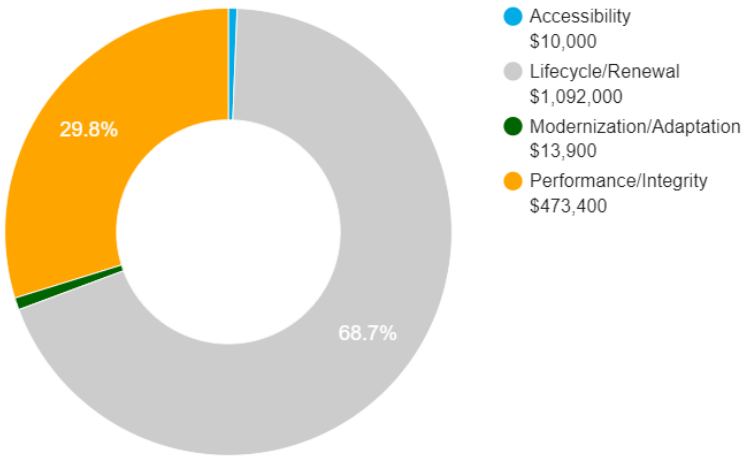
Building lacks fire alarm system - AssetCALC ID: 1826997

Plan Types

Each line item in the cost database is assigned a Plan Type, which is the primary reason or rationale for the recommended replacement, repair, or other corrective action. This is the "why" part of the equation. A cost or line item may commonly have more than one applicable Plan Type; however, only one Plan Type will be assigned based on the "best" fit, typically the one with the greatest significance.

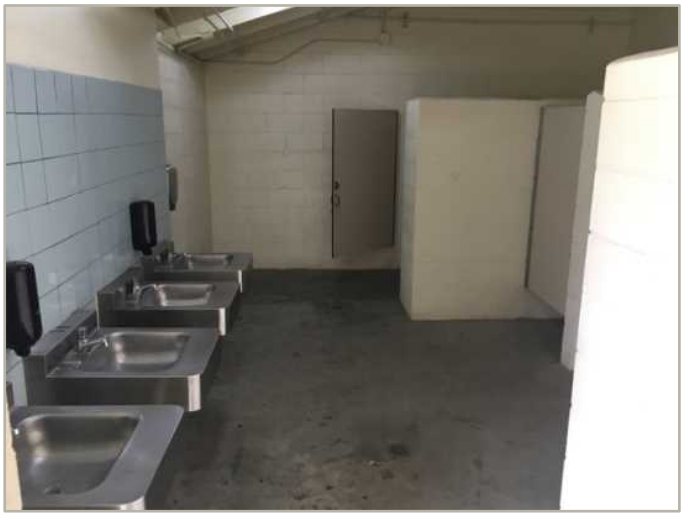
Plan Type Descriptions		
Safety		An observed or reported unsafe condition that if left unaddressed could result in injury; a system or component that presents potential liability risk.
Performance/Integrity		Component or system has failed, is almost failing, performs unreliably, does not perform as intended, and/or poses risk to overall system stability.
Accessibility		Does not meet ADA, UFAS, and/or other handicap accessibility requirements.
Environmental		Improvements to air or water quality, including removal of hazardous materials from the building or site.
Retrofit/Adaptation		Components, systems, or spaces recommended for upgrades in in order to meet current standards, facility usage, or client/occupant needs.
Lifecycle/Renewal		Any component or system that is not currently deficient or problematic but for which future replacement or repair is anticipated and budgeted.

Plan Type Distribution (by Cost)



10-YEAR TOTAL: $1,589,300

2. Rec Center



Rec Center: Systems Summary		
Address	600 Rea Drive; Montebello, California	
Constructed/Renovated	Unknown / 2009	
Building Size	2,900 SF	
Number of Stories	1	
System	*Description*	*Condition*
Structure	Masonry bearing walls and wood-framed roofs	Good
Façade	Painted CMU	Good
Roof	Primary: Gable construction with asphalt shingles	Fair
Interiors	Walls: Painted CMU, Unfinished Floors: VCT, Unfinished Ceilings: Painted gypsum board, Unfinished/exposed	Fair
Elevators	None	--
Plumbing	Copper supply and cast iron waste & venting No hot water Toilets, urinals, and sinks in all restrooms	Fair

Rec Center: Systems Summary		
HVAC	Evaporative Cooler	Fair
Fire Suppression	None	--
Electrical	Source & Distribution: Main panel with copper wiring Interior Lighting: LED	--
Fire Alarm	None	--
Equipment/Special	Commercial kitchen equipment	Fair
Accessibility	Presently it does not appear an accessibility study is needed for this property.	
Key Issues and Findings	Building lacks fire alarm and suppression systems, damaged and missing VCT flooring

8. Property Space Use and Observed Areas

Unit Allocation

All 24.9 acres of the property are occupied by the City of Montebello/Parks, Recreation, and Community Services. The space is a public park with a playground, picnic areas, baseball fields, batting cages, a petting zoo and supporting recreation and restroom facilities.

Areas Observed

The site within the property boundaries, the exterior of the property, and most of the interior spaces were observed in order to gain a clear understanding of the property's overall condition.

Key Spaces Not Observed

Areas of note that were either inaccessible or not observed for other reasons are listed here:

- Concessions Stand, Locked room and no key
- Kitchen, Rec Center, Locked room and no key
- Kitchen, Restroom – Field 1, South, Locked room and no key

9. ADA Accessibility

Generally, Title II of the Americans with Disabilities Act (ADA) prohibits discrimination by entities to access and use of "areas of public accommodations" and "public facilities" on the basis of disability. Regardless of their age, these areas and facilities must be maintained and operated to comply with the Americans with Disabilities Act Accessibility Guidelines (ADAAG).

A public entity (i.e. city governments) shall operate each service, program, or activity so that the service, program, or activity, when viewed in its entirety, is readily accessible to and usable by individuals with disabilities.

However, this does not:

1. Necessarily require a public entity to make each of its existing facilities accessible to and usable by individuals with disabilities.
2. Require a public entity to take any action that would threaten or destroy the historic significance of an historic property; or
3. Require a public entity to take any action that it can demonstrate would result in a fundamental alteration in the nature of a service, program, or activity or in undue financial and administrative burdens. In those circumstances where personnel of the public entity believe that the proposed action would fundamentally alter the service, program, or activity or would result in undue financial and administrative burdens, a public entity has the burden of proving that compliance with 35.150(a) of this part would result in such alteration or burdens. The decision that compliance would result in such alteration or burdens must be made by the head of a public entity or his or her designee after considering all resources available for use in the funding and operation of the service, program, or activity, and must be accompanied by a written statement of the reasons for reaching that conclusion. If an action would result in such an alteration or such burdens, a public entity shall take any other action that would not result in such an alteration or such burdens but would nevertheless ensure that individuals with disabilities receive the benefits or services provided by the public entity.

During the FCA, Bureau Veritas performed a limited high-level accessibility review of the facility non-specific to any local regulations or codes. The scope of the visual observation was limited to those areas and categories set forth in the tables throughout this report. It is understood by the Client that the limited observations described herein do not comprise a full ADA Compliance Survey, and that such a survey is beyond the scope of Bureau Veritas's undertaking. Only a representative sample of areas was observed, and actual measurements were not taken to verify compliance.

The facility was originally constructed in 1963. The facility was renovated in 2009. Complaints about accessibility issues have not been received by the property management. The property does not have associated prior litigation related to existing barriers or previously removed barriers.

An accessibility study has not been performed at the site. A comprehensive ADA Compliance Survey will reveal specific aspects of the property that are not in compliance. Since some areas or categories above were identified as having major or moderate associated issues, Bureau Veritas recommends such a study be performed to take measurements, provide additional itemized details, research local requirements, and, if necessary, estimate the scope and cost of any required improvements. The cost of this study is included in the cost tables. Due to the lack of measurements and itemized findings at this point in time, the costs for any possible subsequent repairs or improvements are not currently included.

Removal of barriers to accessibility should be addressed from a liability standpoint in order to comply with federal law, but the barriers may or may not be building code violations. The Americans with Disabilities Act Accessibility Guidelines are part of the ADA federal civil rights law pertaining to the disabled and are not a construction code. State and local jurisdictions have adopted the ADA Guidelines or have adopted other standards for accessibility as part of their construction codes.

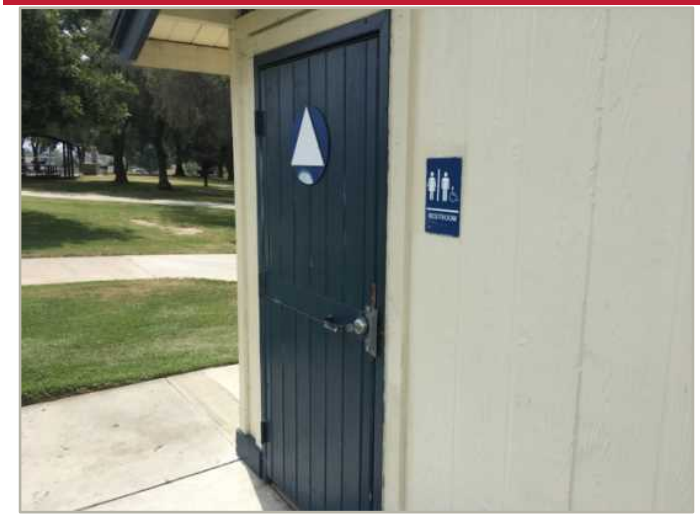
Campus Accessibility: Photographic Overview



Building entrance

Inaccessible building entrance

Accessible restroom accommodations

Accessible playground

Exterior path of travel

Accessible parking

The table below is intended to be used as a general reference guide to help differentiate the orders of magnitude between some of the more commonly observed accessibility issues. The table is not intended to be all-inclusive, and boxes checked in the tables above do not necessarily mean those specific problems or shortcomings cited as examples below exist at the subject buildings and sites. Reference the photos above and/or *Key Findings* section for visuals and/or more specifics about the subject site conditions.

Reference Guide

	Major Issues *(ADA study recommended)*	Moderate Issues *(ADA study recommended)*	Minor/No Issues
Parking	- Needs full reconstruction - Excessive slopes over 3% require major re-grading - No level locations to add required spaces	- No or non-compliant curb cuts - Moderate difficulty to add required accessible spaces - Slopes close to compliant	- Painting of markings needed - Signage height non-compliant - Signage missing
Exterior Path of Travel	- Large areas of sidewalks with excessive slopes - No ramp when needed - Ramps with excessive slopes	- Ramps need rails - Ramps need rail extensions - Need significant # of lever handles - All or most entrance door exterior maneuvering clearance areas with excessive slopes	- One entrance door exterior maneuvering clearance area with excessive slope - A few doorknobs instead of lever handles - Non-compliant signage
Interior Path of Travel	- All or most interior doors appear less than 32” wide - Corridors less than 36” wide - No ramp when needed - Ramps with excessive slopes - Non-compliant treads/risers at means of egress stairways	- Single height drinking fountains - Drinking fountain too high or protrudes into accessible route - Ramps need rails - Ramps need rail extensions - Need significant # of lever handles - Non-compliant rail extensions at egress stairways - All/most door thresholds high	- One door threshold too high - A few doorknobs instead of lever handles - Non-compliant door pressures - Non-compliant signage - Switches not within reach range
Public Use Restrooms	- No ADA RR on each accessible floor - Restroom(s) too small - Entire restroom(s) requires renovation - Water closet clearance requires moving walls	- Interior doors appear less than 32” wide - Missing or non-compliant grab bars - Easily fixable clearance issues	- Minor height adjustments required - Non-compliant door pressures - Missing a visual strobe (only required if audible fire alarm already present) - Missing lavatory pipe wraps - Signage not compliant
Elevators	- No elevator present when required - Elevator cab too small	- Panel control buttons not at compliant height - No hands-free emergency communication system - Elevator only has mechanical stops	- Audible/visual signals at every floor may be lacking - Minor signage / Braille issues
Kitchens/Kitchenettes	- Clear space for each appliance not present - Clearance between opposing counters too narrow	- Sink and counter too high - Sink knee and toe clearance not provided where required (built-in) - Less than 50% of cabinetry within reach range	- Dispensers not within reach range - Switches not within reach range - Missing sink pipe wraps if knee and toe clearance required

10. Purpose and Scope

Purpose

Bureau Veritas was retained by the client to render an opinion as to the Property's current general physical condition on the day of the site visit.

Based on the observations, interviews and document review outlined below, this report identifies significant deferred maintenance issues, existing deficiencies, and material code violations of record, which affect the Property's use. Opinions are rendered as to its structural integrity, building system condition and the Property's overall condition. The report also notes building systems or components that have realized or exceeded their typical expected useful lives.

The physical condition of building systems and related components are typically defined as being in one of five condition ratings. For the purposes of this report, the following definitions are used:

Condition Ratings	
Excellent	New or very close to new; component or system typically has been installed within the past year, sound and performing its function. Eventual repair or replacement will be required when the component or system either reaches the end of its useful life or fails in service.
Good	Satisfactory as-is. Component or system is sound and performing its function, typically within the first third of its lifecycle. However, it may show minor signs of normal wear and tear. Repair or replacement will be required when the component or system either reaches the end of its useful life or fails in service.
Fair	Showing signs of wear and use but still satisfactory as-is, typically near the median of its estimated useful life. Component or system is performing adequately at this time but may exhibit some signs of wear, deferred maintenance, or evidence of previous repairs. Repair or replacement will be required due to the component or system's condition and/or its estimated remaining useful life.
Poor	Component or system is significantly aged, flawed, functioning intermittently or unreliably; displays obvious signs of deferred maintenance; shows evidence of previous repair or workmanship not in compliance with commonly accepted standards; has become obsolete; or exhibits an inherent deficiency. The present condition could contribute to or cause the deterioration of contiguous elements or systems. Either full component replacement is needed, or repairs are required to restore to good condition, prevent premature failure, and/or prolong useful life.
Failed	Component or system has ceased functioning or performing as intended. Replacement, repair, or other significant corrective action is recommended or required.
Not Applicable	Assigning a condition does not apply or make logical sense, most commonly due to the item in question not being present.

Scope

The standard scope of the Facility Condition Assessment includes the following:

- Visit the Property to evaluate the general condition of the building and site improvements, review available construction documents in order to familiarize ourselves with, and be able to comment on, the in-place construction systems, life safety, mechanical, electrical, and plumbing systems, and the general built environment.
- Identify those components that are exhibiting deferred maintenance issues and provide cost estimates for Immediate Costs and Replacement Reserves based on observed conditions, maintenance history and industry standard useful life estimates. This will include the review of documented capital improvements completed within the last five-year period and work currently contracted for, if applicable.
- Provide a full description of the Property with descriptions of in-place systems and commentary on observed conditions.
- Provide a high-level categorical general statement regarding the subject Property's compliance to Title III of the Americans with Disabilities Act. This will not constitute a full ADA survey, but will help identify exposure to issues and the need for further review.
- Obtain background and historical information about the facility from a building engineer, property manager, maintenance staff, or other knowledgeable source. The preferred methodology is to have the client representative or building occupant complete a Pre-Survey Questionnaire (PSQ) in advance of the site visit. Common alternatives include a verbal interview just prior to or during the walk-through portion of the assessment.
- Review maintenance records and procedures with the in-place maintenance personnel.
- Observe a representative sample of the interior spaces/units, including vacant spaces/units, to gain a clear understanding of the property's overall condition. Other areas to be observed include the exterior of the property, the roofs, interior common areas, and the significant mechanical, electrical and elevator equipment rooms.
- Provide recommendations for additional studies, if required, with related budgetary information.
- Provide an Executive Summary at the beginning of this report, which highlights key findings and includes a Facility Condition Index as a basis for comparing the relative conditions of the buildings within the portfolio.

11. Opinions of Probable Costs

Cost estimates are attached throughout this report, with the Replacement Reserves in the appendix.

These estimates are based on Invoice or Bid Document/s provided either by the Owner/facility and construction costs developed by construction resources such as *R.S. Means, CBRE Whitestone,* and *Marshall & Swift,* Bureau Veritas's experience with past costs for similar properties, city cost indexes, and assumptions regarding future economic conditions.

Opinions of probable costs should only be construed as preliminary, order of magnitude budgets. Actual costs most probably will vary from the consultant's opinions of probable costs depending on such matters as type and design of suggested remedy, quality of materials and installation, manufacturer and type of equipment or system selected, field conditions, whether a physical deficiency is repaired or replaced in whole, phasing or bundling of the work (if applicable), quality of contractor, quality of project management exercised, market conditions, use of subcontractors, and whether competitive pricing is solicited, etc. Certain opinions of probable costs cannot be developed within the scope of this guide without further study. Opinions of probable cost for further study should be included in the FCA.

Methodology

Based upon site observations, research, and judgment, along with referencing Expected Useful Life (EUL) tables from various industry sources, Bureau Veritas opines as to when a system or component will most probably necessitate replacement. Accurate historical replacement records, if provided, are typically the best source of information. Exposure to the elements, initial quality and installation, extent of use, the quality and amount of preventive maintenance exercised, etc., are all factors that impact the effective age of a system or component. As a result, a system or component may have an effective age that is greater or less than its actual chronological age. The Remaining Useful Life (RUL) of a component or system equals the EUL less its *effective age*, whether explicitly or implicitly stated. Projections of Remaining Useful Life (RUL) are based primarily on age and condition with the presumption of continued use and maintenance of the Property similar to the observed and reported past use and maintenance practices, in conjunction with the professional judgment of Bureau Veritas's assessors. Significant changes in occupants and/or usage may affect the service life of some systems or components.

Where quantities could not be or were not derived from an actual construction document take-off or facility walk-through, and/or where systemic costs are more applicable or provide more intrinsic value, budgetary square foot and gross square foot costs are used. Estimated costs are based on professional judgment and the probable or actual extent of the observed defect, inclusive of the cost to design, procure, construct and manage the corrections.

Definitions

Immediate Needs

Immediate Needs are line items that require immediate action as a result of: (1) material existing or potential unsafe conditions, (2) failed or imminent failure of mission critical building systems or components, or (3) conditions that, if not addressed, have the potential to result in, or contribute to, critical element or system failure within one year or will most probably result in a significant escalation of its remedial cost.

For database and reporting purposes the line items with RUL=0, and commonly associated with *Safety* or *Performance/Integrity* Plan Types, are considered Immediate Needs.

Replacement Reserves

Cost line items traditionally called Replacement Reserves (equivalently referred to as Lifecycle/Renewals) are for recurring probable renewals or expenditures, which are not classified as operation or maintenance expenses. The replacement reserves should be budgeted for in advance on an annual basis. Replacement Reserves are reasonably predictable both in terms of frequency and cost. However, Replacement Reserves may also include components or systems that have an indeterminable life but, nonetheless, have a potential for failure within an estimated time period.

Replacement Reserves generally exclude systems or components that are estimated to expire after the reserve term and are not considered material to the structural and mechanical integrity of the subject property. Furthermore, systems and components that are not deemed to have a material effect on the use of the Property are also excluded. Costs that are caused by acts of God, accidents, or other occurrences that are typically covered by insurance, rather than reserved for, are also excluded.

Replacement costs are solicited from ownership/property management, Bureau Veritas's discussions with service companies, manufacturers' representatives, and previous experience in preparing such schedules for other similar facilities. Costs for work performed by the ownership's or property management's maintenance staff are also considered.

Bureau Veritas's reserve methodology involves identification and quantification of those systems or components requiring capital reserve funds within the assessment period. The assessment period is defined as the effective age plus the reserve term. Additional information concerning system's or component's respective replacement costs (in today's dollars), typical expected useful lives, and remaining useful lives were estimated so that a funding schedule could be prepared. The Replacement Reserves Schedule presupposes that all required remedial work has been performed or that monies for remediation have been budgeted for items defined as Immediate Needs.

For the purposes of 'bucketizing' the System Expenditure Forecasts in this report, the Replacement Reserves have been subdivided and grouped as follows: Short Term (years 1-3), Near Term (years 4-5), Medium Term (years 6-10), and Long Term (years 11-20).

Key Findings

In an effort to highlight the most significant cost items and not be overwhelmed by the Replacement Reserves report in its totality, a subsection of Key Findings is included within the Executive Summary section of this report. Key Findings typically include repairs or replacements of deficient items within the first five-year window, as well as the most significant high-dollar line items that fall anywhere within the ten-year term. Note that while there is some subjectivity associated with identifying the Key Findings, the Immediate Needs are always included as a subset.

Exceedingly Aged

A fairly common scenario encountered during the assessment process, and a frequent source of debate, occurs when classifying and describing "very old" systems or components that are still functioning adequately and do not appear nor were reported to be in any way deficient. To help provide some additional intelligence on these items, such components will be tagged in the database as Exceedingly Aged. This designation will be reserved for mechanical or electrical systems or components that have aged well beyond their industry standard lifecycles, typically at least 15 years beyond and/or twice their Estimated Useful Life (EUL). In tandem with this designation, these items will be assigned a Remaining Useful Life (RUL) not less than two years but not greater than 1/3 of their standard EUL. As such the recommended replacement time for these components will reside outside the typical Short Term window but will not be pushed 'irresponsibly' (too far) into the future.

12. Certification

The City of Montebello (the Client) retained Bureau Veritas to perform this Facility Condition Assessment in connection with its continued operation of Grant Rea Park, 600 Rea Drive, Montebello, California 90640, the "Property". It is our understanding that the primary interest of the Client is to locate and evaluate materials and building system defects that might significantly affect the value of the property and to determine if the present Property has conditions that will have a significant impact on its continued operations.

The conclusions and recommendations presented in this report are based on the brief review of the plans and records made available to our Project Manager during the site visit, interviews of available property management personnel and maintenance contractors familiar with the Property, appropriate inquiry of municipal authorities, our Project Manager's walk-through observations during the site visit, and our experience with similar properties.

No testing, exploratory probing, dismantling or operating of equipment or in-depth studies were performed unless specifically required under the *Purpose and Scope* section of this report. This assessment did not include engineering calculations to determine the adequacy of the Property's original design or existing systems. Although walk-through observations were performed, not all areas may have been observed (see Section 1 for specific details). There may be defects in the Property, which were in areas not observed or readily accessible, may not have been visible, or were not disclosed by management personnel when questioned. The report describes property conditions at the time that the observations and research were conducted.

This report has been prepared on behalf of and exclusively for the use of the Client for the purpose stated within the *Purpose and Scope* section of this report. The report, or any excerpt thereof, shall not be used by any party other than the Client or for any other purpose than that specifically stated in our agreement or within the *Purpose and Scope* section of this report without the express written consent of Bureau Veritas.

Any reuse or distribution of this report without such consent shall be at the Client and the recipient's sole risk, without liability to Bureau Veritas.

Appendix C:

Pre-Survey Questionnaire - Not Included

Appendix D:
ADA Checklist

Visual Checklist - 2010 ADA Standards for Accessible Design

Property Name: Grant Rea Park

EMG Project Number: 142318.20R000-002.354

Abbreviated Accessibility Checklist

Facility History & Interview

	Question	Yes	No	Unk	Comments
1	Has an ADA survey previously been completed for this property? If so, indicate when.		X		
2	Have any ADA improvements been made to the property since original construction? Elaborate, especially if fully or partially addressed as the result of a previous study.	X			
3	Has building ownership/management reported any ADA complaints or litigation?		X		

Playgrounds & Swimming Pools

Play structure

Acessbile path to play structure area

	Question	Yes	No	NA	Comments
1	Is there an accessible route to the play area/s?	X			
2	Has the play area been reviewed for accessibility?			X	Unknown
3	Are publicly accessible swimming pools equipped with an entrance lift?			X	No swimming pools

Abbreviated Accessibility Checklist

Parking

Accessible parking spots

Van accessbile parking stall

	Question	Yes	No	NA	Comments
1	Does the required number of standard ADA designated spaces appear to be provided?	X			
2	Does the required number of van-accessible designated spaces appear to be provided?	X			
3	Are accessible spaces on the shortest accessible route to an accessible building entrance?	X			
4	Does parking signage include the International Symbol of Accessibility?	X			
5	Does each accessible space have an adjacent access aisle?	X			
6	Do parking spaces and access aisles appear to be relatively level and without obstruction?	X			

Abbreviated Accessibility Checklist

Exterior Accessible Route

Exterior path of travel

Exterior path of travel

	Question	Yes	No	NA	Comments
1	Is an accessible route present from public transportation stops and municipal sidewalks on or immediately adjacent to the property?	X			
2	Does a minimum of one accessible route appear to connect all public areas on the exterior, such as parking and other outdoor amenities, to accessible building entrances?	X			
3	Are curb ramps present at transitions through raised curbs on all accessible routes?	X			
4	Do curb ramps appear to have compliant slopes for all components?	X			
5	Do ramp runs on an accessible route appear to have compliant slopes?			X	
6	Do ramp runs on an accessible route appear to have a compliant rise and width?			X	
7	Do ramps on an accessible route appear to have compliant end and intermediate landings?			X	
8	Do ramps on an accessible route appear to have compliant handrails?			X	

Abbreviated Accessibility Checklist

Building Entrances

Accessible building entrance

Innaccessible building entrance at playground restroom

	Question	Yes	No	NA	Comments
1	Do a sufficient number of accessible entrances appear to be provided?	X			
2	If the main entrance is not accessible, is an alternate accessible entrance provided?			X	
3	Is signage provided indicating the location of alternate accessible entrances?			X	
4	Do doors at accessible entrances appear to have compliant maneuvering clearance area on each side?	X			
5	Do doors at accessible entrances appear to have compliant hardware?	X			
6	Do doors at accessible entrances appear to have a compliant clear opening width?	X			
7	Do pairs of accessible entrance doors in series appear to have the minimum clear space between them?			X	
8	Do thresholds at accessible entrances appear to have a compliant height?	X			Inaccessible step at entrances to playground restrooms

Abbreviated Accessibility Checklist

Interior Accessible Route, Interior Doors & Amenities

Field 1 south restroom building interior

Rec center building interior

	Question	Yes	No	NA	Comments
1	Does an accessible route appear to connect all public areas inside the building?	X			
2	Do accessible routes appear free of obstructions and/or protruding objects?	X			
3	Do ramps on accessible routes appear to have compliant slopes?			X	
4	Do ramp runs on an accessible route appear to have a compliant rise and width?			X	
5	Do ramps on accessible routes appear to have compliant end and intermediate landings?			X	
6	Do ramps on accessible routes appear to have compliant handrails?			X	
7	Are accessible areas of refuge and the accessible means of egress to those areas identified with accessible signage?			X	
8	Do public transaction areas have an accessible, lowered service counter section?			X	
9	Do public telephones appear mounted with an accessible height and location?			X	
10	Do doors at interior accessible routes appear to have compliant maneuvering clearance area on each side?			X	
11	Do doors at interior accessible routes appear to have compliant hardware?			X	
12	Do non-fire hinged, sliding, or folding doors on interior accessible routes appear to have compliant opening force?			X	

13	Do doors on interior accessible routes appear to have a compliant clear opening width?			X	

Abbreviated Accessibility Checklist

Elevators

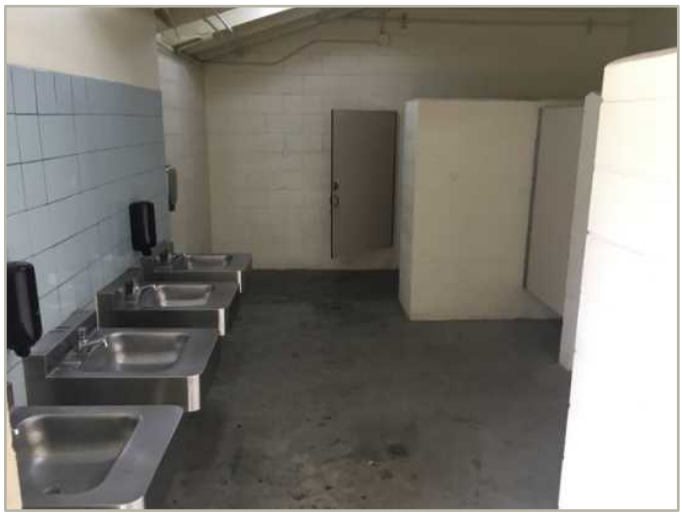
No elevator(s) present

No elevator(s) present

Question		Yes	No	NA	Comments
1	Are hallway call buttons configured with the “UP” button above the “DOWN” button?			X	
2	Is accessible floor identification signage present on the hoistway sidewalls on each level?			X	
3	Do the elevators have audible and visual arrival indicators at the lobby and hallway entrances?			X	
4	Do the elevator hoistway and car interior appear to have a minimum compliant clear floor area?			X	
5	Do the elevator car doors have automatic re-opening devices to prevent closure on obstructions?			X	
6	Do elevator car control buttons appear to be mounted at a compliant height?			X	
7	Are tactile and Braille characters mounted to the left of each elevator car control button?			X	
8	Are audible and visual floor position indicators provided in the elevator car?			X	
9	Is the emergency call system on or adjacent to the control panel and does it not require voice communication?			X	

Abbreviated Accessibility Checklist

Common Area Restrooms



Rec center restroom

Field 1 north restroom building restroom

	Question	Yes	No	NA	Comments
1	Do publicly accessible toilet rooms appear to have a minimum compliant floor area?	X			
2	Does the lavatory appear to be mounted at a compliant height and with compliant knee area?	X			
3	Does the lavatory faucet have compliant handles?	X			
4	Is the plumbing piping under lavatories configured to protect against contact?	X			
5	Are grab bars provided at compliant locations around the toilet?	X			
6	Do toilet stall doors appear to provide the minimum compliant clear width?	X			
7	Do toilet stalls appear to provide the minimum compliant clear floor area?	X			
8	Where more than one urinal is present in a multi-user restroom, does minimum one urinal appear to be mounted at a compliant height and with compliant approach width?	X			
9	Do accessories and mirrors appear to be mounted at a compliant height?	X

1. Executive Summary

Property Overview and Assessment Details

General Information	
Property Type	Public Park
Main Address	200 West Mines Avenue, Montebello, California 90640
Site Developed	1960's
Site Area	7.6 acres
Parking Spaces	30 total spaces in an open lot; 1 of which is accessible
Building Area	6,800 SF, Community Center Building 750 SF, Restroom Building
Number of Stories	2- Community Center Building 1- Restroom Building
Outside Occupants / Leased Spaces	None
Date(s) of Visit	April 17, 2020
Management Point of Contact	City of Montebello/Park, Recreation and Community Services, David Sosnowski, Director 323.887.4588 phone dsosnowski@cityofmentebello.com email
On-site Point of Contact (POC)	Steve Zaragoza
Assessment and Report Prepared By	Mouaz Alrayes

Significant/Systemic Findings and Deficiencies

Historical Summary

Reggie Rodriguez Park was originally constructed in the 1960's. The Restroom Building is original, and the Community Center Building was added in 2001.

Architectural

The Restroom Building is constructed of concrete masonry units on a concrete slab floor with a heavy timber framed roof. It has not been renovated in the recent years. The interiors were not accessible. The metal security doors were welded closed because there was recent vandalism and to keep people away due to the Corona (Covid-19) virus shut-down.

The Community Center Building consist of wood frame construction on concrete slab with integral footings. The majority of the interior and exterior building components appears to be original to the 2001 construction. The exterior enclosures consist of painted stucco, aluminum windows and steel entry doors with steel service sliding and roll-up doors. The roof membrane is flat modified bitumen membrane; the roof was observed but not accessible due to the lack of a tall ladder.

In general, the structures appear to be sound, with no significant areas of settlement or structural-related deficiencies observed.

Mechanical, Electrical, Plumbing and Fire (MEPF)

Heating and cooling are not provided for the Restroom Building. The plumbing piping system is original and will need replacement during the assessment period. Hot water is not provided. Plumbing fixtures could not be observed.

The Restroom Building's electrical system and lighting fixtures are reaching the end of their lifecycle and need replacement. The building is not provided with a fire alarm system or fire suppression system.

Heating and cooling at the Community Center Building is provided by rooftop package units. The package units could not be directly observed as the rooftop was inaccessible due to lack of a proper ladder. Cooling for the electrical/elevator room is provided by a ductless split system unit.

The Community Center Building's electrical system and light fixtures are mostly original to the 2000-2001 construction as evidenced by manufacture dates on the main electrical switchboard, a few LED light fixtures were recently added at limited locations on the ground floor.

Plumbing systems at the Community Center Building generally consist of copper supply piping and cast-iron waste pipe with a gas water heater providing hot water to the restrooms.

The fire alarm and suppression systems appear to be in fair condition. Typical lifecycle replacements and ongoing maintenance will be required. One elevator provides access to the Community Center Building's second floor.

Site

In general, the site has been well maintained. The site contains moderate landscaping, which is served by in-ground irrigation systems. There is one playground on site, and it is in fair condition. The concrete sidewalk is in fair overall condition with the exception of an area between the Restroom Building and the Community Center Building which require some repairs. The asphalt paved parking areas and drive aisles are in fair to poor condition and require sealing and striping. The site lighting is aged, and it is recommended that the system be upgraded to LED fixtures to improve energy efficiency.

Recommended Additional Studies

The parking lot does not have the required accessible stalls and the picnic shelter, the playground, and picnic tables throughout the park are not fully accessible. Bureau Veritas recommends a study be performed to take measurements, provide additional itemized details, research local requirements, and, if necessary, estimate the scope and cost of any required improvements. The cost of this study is included in the cost tables. Due to the lack of measurements and itemized findings at this point in time, the costs for any possible subsequent repairs or improvements are not currently included.

Park Amenities Observed

Facility Condition Index (FCI)

One of the major goals of the FCA is to calculate each building's Facility Condition Index (FCI), which provides a theoretical objective indication of a building's overall condition. By definition, the FCI is defined as the ratio of the cost of current needs divided by current replacement value (CRV) of the facility. The chart below presents the industry standard ranges and cut-off points.

FCI Ranges and Description	
0 – 5%	In new or well-maintained condition, with little or no visual evidence of wear or deficiencies.
5 – 10%	Subjected to wear but is still in a serviceable and functioning condition.
10 – 30%	Subjected to hard or long-term wear. Nearing the end of its useful or serviceable life.
30% and above	Has reached the end of its useful or serviceable life. Renewal is now necessary.

The deficiencies and lifecycle needs identified in this assessment provide the basis for a portfolio-wide capital improvement funding strategy. In addition to the current FCI, extended FCI's have been developed to provide owners the intelligence needed to plan and budget for the "keep-up costs" for their facilities. As such the 3-year, 5-year, and 10-year FCI's are calculated by dividing the anticipated needs of those respective time periods by current replacement value. As a final point, the FCI's ultimately provide more value when used to relatively compare facilities across a portfolio instead of being over-analyzed and scrutinized as stand-alone values. The table below summarizes the individual findings for this FCA:

FCI Analysis

FCI Analysis | Reggie Rodriguez Park (7.6 acres)

Replacement Value	*Total SF*	*Cost/SF*
$ 4,634,800	*331,056*	*$ 14*

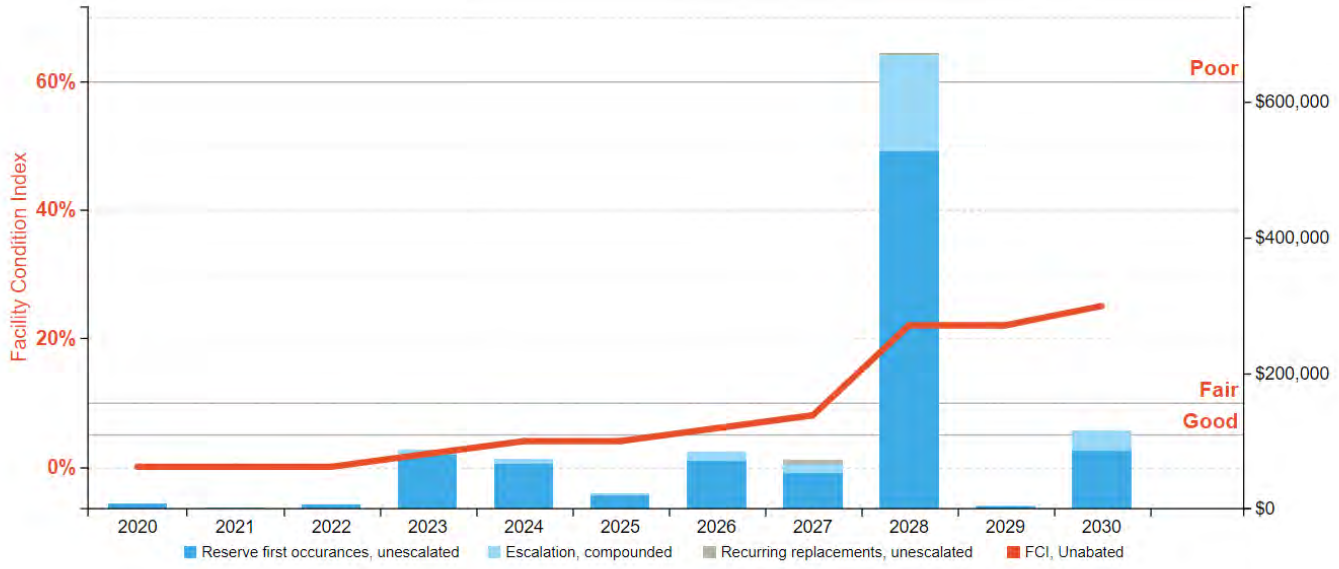
Current FCI	$ 8,300	**0.2 %**
3-Year	$ 104,600	2.3 %
5-Year	$ 201,200	4.3 %
10-Year	$ 1,137,600	24.5 %

The orange line in the graph below forecasts what would happen to the FCI (left Y axis) over time, assuming zero capital expenditures. The capital expenditures allocated for each year (blue bars) are associated with the dollar amounts along the right Y axis.

Needs by Year with Unaddressed FCI Over Time

FCI Analysis: Reggie Rodriguez Park (7.6 acres)

Replacement Value: $ 4,634,784; Inflation rate: 3.0%



Immediate Needs

Facility/Building	Total Items	Total Cost
Reggie Rodriguez Park (7.6 acres)	1	$8,235
Total	**1**	**$8,235**

Reggie Rodriguez Park (7.6 acres)

Total (1 items)						**$8,235**

Key Findings

Exterior Door in Poor condition.

Metal Wire Mesh
Restroom Building Restroom Building-Women's Restroom

Uniformat Code: B2039
Recommendation: **Replace in 2021**

Priority Score: **88.0**

Plan Type: Performance/Integrity

Cost Estimate: $2,100

**$**$$$

The door is badly rusted and deteriorated. - AssetCALC ID: 1821168

Interior Ceiling Finish in Poor condition.

Hard Tile Ceiling w/ ACT
Community Center Building Recreation Center-2nd Floor Offices

Uniformat Code: C3032
Recommendation: **Replace in 2022**

Priority Score: **83.0**

Plan Type: Performance/Integrity

Cost Estimate: $200

**$**$$$

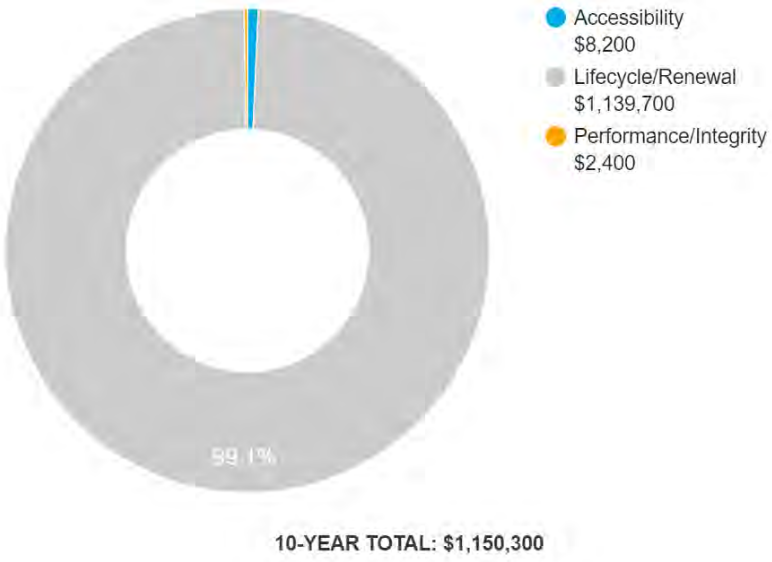
Some damaged ceiling tiles in the 2nd floor offices. - AssetCALC ID: 1821127

Plan Types

Each line item in the cost database is assigned a Plan Type, which is the primary reason or rationale for the recommended replacement, repair, or other corrective action. This is the "why" part of the equation. A cost or line item may commonly have more than one applicable Plan Type; however, only one Plan Type will be assigned based on the "best" fit, typically the one with the greatest significance.

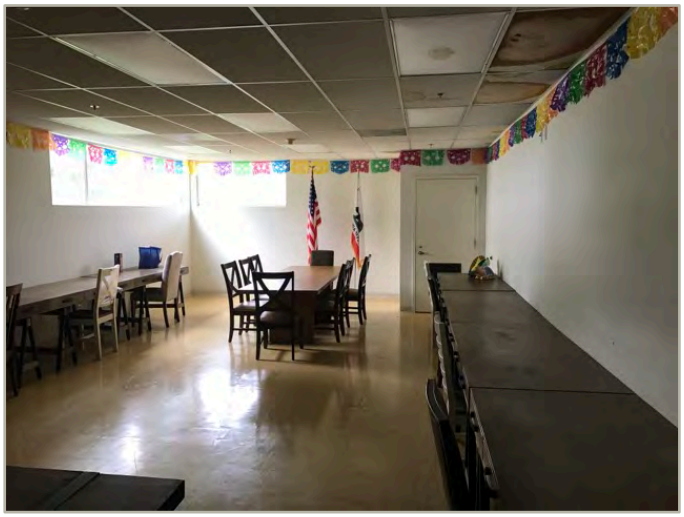
Plan Type Descriptions		
Safety		An observed or reported unsafe condition that if left unaddressed could result in injury; a system or component that presents potential liability risk.
Performance/Integrity		Component or system has failed, is almost failing, performs unreliably, does not perform as intended, and/or poses risk to overall system stability.
Accessibility		Does not meet ADA, UFAS, and/or other handicap accessibility requirements.
Environmental		Improvements to air or water quality, including removal of hazardous materials from the building or site.
Retrofit/Adaptation		Components, systems, or spaces recommended for upgrades in in order to meet current standards, facility usage, or client/occupant needs.
Lifecycle/Renewal		Any component or system that is not currently deficient or problematic but for which future replacement or repair is anticipated and budgeted.

Plan Type Distribution (by Cost)



10-YEAR TOTAL: $1,150,300

2. Community Center Building



Community Center: Systems Summary		
Address	200 West Mines Avenue, Montebello, California 90640	
Constructed/Renovated	2001	
Building Size	6,800 SF	
Number of Stories	2	
System	*Description*	*Condition*
Structure	Conventional wood frame structure on concrete slab	Good
Façade	Stucco with aluminum windows	Fair
Roof	Flat construction with modified bituminous finish	Fair
Interiors	Walls: Painted gypsum board, vinyl Floors: VCT, Concrete Ceilings: Painted gypsum board, ACT	Fair
Elevators	Hydraulic: 1 car	Fair
Plumbing	Copper supply and cast iron waste & venting Gas water heater Toilets, urinals, and sinks in all restrooms	Fair
HVAC	Individual package units Supplemental components: ductless split-systems	Fair

Community Center: Systems Summary		
Fire Suppression	Wet-pipe sprinkler system; fire extinguishers	Fair
Electrical	Source & Distribution: Main switchboard with copper wiring Interior Lighting: T-8, LED, CFL Emergency: None	Fair
Fire Alarm	Alarm panel, smoke detectors, alarms, strobes, pull stations, and exit signs	Fair
Equipment/Special	None	--
Accessibility	Presently it does not appear an accessibility study is needed for this property.	
Key Issues and Findings	NA

5. Property Space Use and Observed Areas

Unit Allocation

All 7.6 acres of the property are occupied by the City of Montebello. The spaces are mostly public park with supporting restrooms building, a community center, basketball court and a softball field.

Areas Observed

The interior spaces were observed in order to gain a clear understanding of the property's overall condition. The restrooms at the Restroom Building were not accessible (welded metal security doors) and a proper ladder could not be provided by the POC to access the Community Center Building's roof. Other areas accessed included the site within the property boundaries, the exterior of the property.

Key Spaces Not Observed

Areas of note that were either inaccessible or not observed for other reasons are listed here:

- Restroom Building interior- welded metal security doors
- Community Center roof, Lack of ladder or other means of egress

6. ADA Accessibility

Generally, Title II of the Americans with Disabilities Act (ADA) prohibits discrimination by entities to access and use of "areas of public accommodations" and "public facilities" on the basis of disability. Regardless of their age, these areas and facilities must be maintained and operated to comply with the Americans with Disabilities Act Accessibility Guidelines (ADAAG).

A public entity (i.e. city governments) shall operate each service, program, or activity so that the service, program, or activity, when viewed in its entirety, is readily accessible to and usable by individuals with disabilities.

However, this does not:

1. Necessarily require a public entity to make each of its existing facilities accessible to and usable by individuals with disabilities.
2. Require a public entity to take any action that would threaten or destroy the historic significance of an historic property; or
3. Require a public entity to take any action that it can demonstrate would result in a fundamental alteration in the nature of a service, program, or activity or in undue financial and administrative burdens. In those circumstances where personnel of the public entity believe that the proposed action would fundamentally alter the service, program, or activity or would result in undue financial and administrative burdens, a public entity has the burden of proving that compliance with 35.150(a) of this part would result in such alteration or burdens. The decision that compliance would result in such alteration or burdens must be made by the head of a public entity or his or her designee after considering all resources available for use in the funding and operation of the service, program, or activity, and must be accompanied by a written statement of the reasons for reaching that conclusion. If an action would result in such an alteration or such burdens, a public entity shall take any other action that would not result in such an alteration or such burdens but would nevertheless ensure that individuals with disabilities receive the benefits or services provided by the public entity.

During the FCA, Bureau Veritas performed a limited high-level accessibility review of the facility non-specific to any local regulations or codes. The scope of the visual observation was limited to those areas and categories set forth in the tables throughout this report. It is understood by the Client that the limited observations described herein do not comprise a full ADA Compliance Survey, and that such a survey is beyond the scope of Bureau Veritas's undertaking. Only a representative sample of areas was observed, and actual measurements were not taken to verify compliance.

An accessibility study has not been performed at the site. A comprehensive ADA Compliance Survey will reveal specific aspects of the property that are not in compliance. Since some areas or categories above were identified as having major or moderate associated issues, Bureau Veritas recommends such a study be performed to take measurements, provide additional itemized details, research local requirements, and, if necessary, estimate the scope and cost of any required improvements. The cost of this study is included in the cost tables. Due to the lack of measurements and itemized findings at this point in time, the costs for any possible subsequent repairs or improvements are not currently included.

Removal of barriers to accessibility should be addressed from a liability standpoint in order to comply with federal law, but the barriers may or may not be building code violations. The Americans with Disabilities Act Accessibility Guidelines are part of the ADA federal civil rights law pertaining to the disabled and are not a construction code. State and local jurisdictions have adopted the ADA Guidelines or have adopted other standards for accessibility as part of their construction codes.

Removal of barriers to accessibility should be addressed from a liability standpoint in order to comply with federal law, but the barriers may or may not be building code violations. Campus Accessibility: Photographic Overview

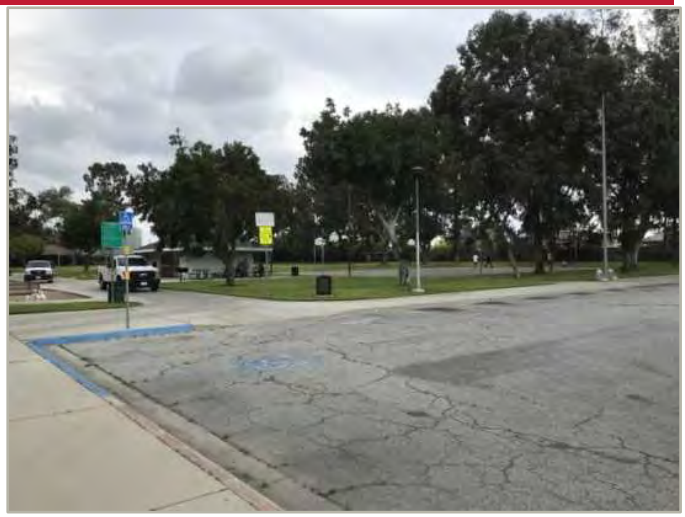
Parking Lot



Parking Lot

Picnic Shelter

BBQ Grill

Playground

Drinking Fountain

The table below is intended to be used as a general reference guide to help differentiate the orders of magnitude between some of the more commonly observed accessibility issues. The table is not intended to be all-inclusive, and boxes checked in the tables above do not necessarily mean those specific problems or shortcomings cited as examples below exist at the subject buildings and sites. Reference the photos above and/or *Key Findings* section for visuals and/or more specifics about the subject site conditions.

Reference Guide

	Major Issues *(ADA study recommended)*	Moderate Issues *(ADA study recommended)*	Minor/No Issues
Parking	- Needs full reconstruction - Excessive slopes over 3% require major re-grading - No level locations to add required spaces	- No or non-compliant curb cuts - Moderate difficulty to add required accessible spaces - Slopes close to compliant	- Painting of markings needed - Signage height non-compliant - Signage missing
Exterior Path of Travel	- Large areas of sidewalks with excessive slopes - No ramp when needed - Ramps with excessive slopes	- Ramps need rails - Ramps need rail extensions - Need significant # of lever handles - All or most entrance door exterior maneuvering clearance areas with excessive slopes	- One entrance door exterior maneuvering clearance area with excessive slope - A few doorknobs instead of lever handles - Non-compliant signage
Interior Path of Travel	- All or most interior doors appear less than 32” wide - Corridors less than 36” wide - No ramp when needed - Ramps with excessive slopes - Non-compliant treads/risers at means of egress stairways	- Single height drinking fountains - Drinking fountain too high or protrudes into accessible route - Ramps need rails - Ramps need rail extensions - Need significant # of lever handles - Non-compliant rail extensions at egress stairways - All/most door thresholds high	- One door threshold too high - A few doorknobs instead of lever handles - Non-compliant door pressures - Non-compliant signage - Switches not within reach range
Public Use Restrooms	- No ADA RR on each accessible floor - Restroom(s) too small - Entire restroom(s) requires renovation - Water closet clearance requires moving walls	- Interior doors appear less than 32” wide - Missing or non-compliant grab bars - Easily fixable clearance issues	- Minor height adjustments required - Non-compliant door pressures - Missing a visual strobe (only required if audible fire alarm already present) - Missing lavatory pipe wraps - Signage not compliant
Elevators	- No elevator present when required - Elevator cab too small	- Panel control buttons not at compliant height - No hands-free emergency communication system - Elevator only has mechanical stops	- Audible/visual signals at every floor may be lacking - Minor signage / Braille issues
Kitchens/Kitchenettes	- Clear space for each appliance not present - Clearance between opposing counters too narrow	- Sink and counter too high - Sink knee and toe clearance not provided where required (built-in) - Less than 50% of cabinetry within reach range	- Dispensers not within reach range - Switches not within reach range - Missing sink pipe wraps if knee and toe clearance required

7. Purpose and Scope

Purpose

Bureau Veritas was retained by the client to render an opinion as to the Property's current general physical condition on the day of the site visit.

Based on the observations, interviews and document review outlined below, this report identifies significant deferred maintenance issues, existing deficiencies, and material code violations of record, which affect the Property's use. Opinions are rendered as to its structural integrity, building system condition and the Property's overall condition. The report also notes building systems or components that have realized or exceeded their typical expected useful lives.

The physical condition of building systems and related components are typically defined as being in one of five condition ratings. For the purposes of this report, the following definitions are used:

Condition Ratings	
Excellent	New or very close to new; component or system typically has been installed within the past year, sound and performing its function. Eventual repair or replacement will be required when the component or system either reaches the end of its useful life or fails in service.
Good	Satisfactory as-is. Component or system is sound and performing its function, typically within the first third of its lifecycle. However, it may show minor signs of normal wear and tear. Repair or replacement will be required when the component or system either reaches the end of its useful life or fails in service.
Fair	Showing signs of wear and use but still satisfactory as-is, typically near the median of its estimated useful life. Component or system is performing adequately at this time but may exhibit some signs of wear, deferred maintenance, or evidence of previous repairs. Repair or replacement will be required due to the component or system's condition and/or its estimated remaining useful life.
Poor	Component or system is significantly aged, flawed, functioning intermittently or unreliably; displays obvious signs of deferred maintenance; shows evidence of previous repair or workmanship not in compliance with commonly accepted standards; has become obsolete; or exhibits an inherent deficiency. The present condition could contribute to or cause the deterioration of contiguous elements or systems. Either full component replacement is needed, or repairs are required to restore to good condition, prevent premature failure, and/or prolong useful life.
Failed	Component or system has ceased functioning or performing as intended. Replacement, repair, or other significant corrective action is recommended or required.
Not Applicable	Assigning a condition does not apply or make logical sense, most commonly due to the item in question not being present.

Scope

The standard scope of the Facility Condition Assessment includes the following:

- Visit the Property to evaluate the general condition of the building and site improvements, review available construction documents in order to familiarize ourselves with, and be able to comment on, the in-place construction systems, life safety, mechanical, electrical, and plumbing systems, and the general built environment.
- Identify those components that are exhibiting deferred maintenance issues and provide cost estimates for Immediate Costs and Replacement Reserves based on observed conditions, maintenance history and industry standard useful life estimates. This will include the review of documented capital improvements completed within the last five-year period and work currently contracted for, if applicable.
- Provide a full description of the Property with descriptions of in-place systems and commentary on observed conditions.
- Provide a high-level categorical general statement regarding the subject Property's compliance to Title III of the Americans with Disabilities Act. This will not constitute a full ADA survey, but will help identify exposure to issues and the need for further review.
- Obtain background and historical information about the facility from a building engineer, property manager, maintenance staff, or other knowledgeable source. The preferred methodology is to have the client representative or building occupant complete a Pre-Survey Questionnaire (PSQ) in advance of the site visit. Common alternatives include a verbal interview just prior to or during the walk-through portion of the assessment.
- Review maintenance records and procedures with the in-place maintenance personnel.
- Observe a representative sample of the interior spaces/units, including vacant spaces/units, to gain a clear understanding of the property's overall condition. Other areas to be observed include the exterior of the property, the roofs, interior common areas, and the significant mechanical, electrical and elevator equipment rooms.
- Provide recommendations for additional studies, if required, with related budgetary information.
- Provide an Executive Summary at the beginning of this report, which highlights key findings and includes a Facility Condition Index as a basis for comparing the relative conditions of the buildings within the portfolio.

8. Opinions of Probable Costs

Cost estimates are attached throughout this report, with the Replacement Reserves in the appendix.

These estimates are based on Invoice or Bid Document/s provided either by the Owner/facility and construction costs developed by construction resources such as *R.S. Means, CBRE Whitestone,* and *Marshall & Swift,* Bureau Veritas's experience with past costs for similar properties, city cost indexes, and assumptions regarding future economic conditions.

Opinions of probable costs should only be construed as preliminary, order of magnitude budgets. Actual costs most probably will vary from the consultant's opinions of probable costs depending on such matters as type and design of suggested remedy, quality of materials and installation, manufacturer and type of equipment or system selected, field conditions, whether a physical deficiency is repaired or replaced in whole, phasing or bundling of the work (if applicable), quality of contractor, quality of project management exercised, market conditions, use of subcontractors, and whether competitive pricing is solicited, etc. Certain opinions of probable costs cannot be developed within the scope of this guide without further study. Opinions of probable cost for further study should be included in the FCA.

Methodology

Based upon site observations, research, and judgment, along with referencing Expected Useful Life (EUL) tables from various industry sources, Bureau Veritas opines as to when a system or component will most probably necessitate replacement. Accurate historical replacement records, if provided, are typically the best source of information. Exposure to the elements, initial quality and installation, extent of use, the quality and amount of preventive maintenance exercised, etc., are all factors that impact the effective age of a system or component. As a result, a system or component may have an effective age that is greater or less than its actual chronological age. The Remaining Useful Life (RUL) of a component or system equals the EUL less its *effective age*, whether explicitly or implicitly stated. Projections of Remaining Useful Life (RUL) are based primarily on age and condition with the presumption of continued use and maintenance of the Property similar to the observed and reported past use and maintenance practices, in conjunction with the professional judgment of Bureau Veritas's assessors. Significant changes in occupants and/or usage may affect the service life of some systems or components.

Where quantities could not be or were not derived from an actual construction document take-off or facility walk-through, and/or where systemic costs are more applicable or provide more intrinsic value, budgetary square foot and gross square foot costs are used. Estimated costs are based on professional judgment and the probable or actual extent of the observed defect, inclusive of the cost to design, procure, construct, and manage the corrections.

Definitions

Immediate Needs

Immediate Needs are line items that require immediate action as a result of: (1) material existing or potential unsafe conditions, (2) failed or imminent failure of mission critical building systems or components, or (3) conditions that, if not addressed, have the potential to result in, or contribute to, critical element or system failure within one year or will most probably result in a significant escalation of its remedial cost.

For database and reporting purposes the line items with RUL=0, and commonly associated with *Safety* or *Performance/Integrity* Plan Types, are considered Immediate Needs.

Replacement Reserves

Cost line items traditionally called Replacement Reserves (equivalently referred to as Lifecycle/Renewals) are for recurring probable renewals or expenditures, which are not classified as operation or maintenance expenses. The replacement reserves should be budgeted for in advance on an annual basis. Replacement Reserves are reasonably predictable both in terms of frequency and cost. However, Replacement Reserves may also include components or systems that have an indeterminable life but, nonetheless, have a potential for failure within an estimated time period.

Replacement Reserves generally exclude systems or components that are estimated to expire after the reserve term and are not considered material to the structural and mechanical integrity of the subject property. Furthermore, systems and components that are not deemed to have a material effect on the use of the Property are also excluded. Costs that are caused by acts of God, accidents, or other occurrences that are typically covered by insurance, rather than reserved for, are also excluded.

Replacement costs are solicited from ownership/property management, Bureau Veritas's discussions with service companies, manufacturers' representatives, and previous experience in preparing such schedules for other similar facilities. Costs for work performed by the ownership's or property management's maintenance staff are also considered.

Bureau Veritas's reserve methodology involves identification and quantification of those systems or components requiring capital reserve funds within the assessment period. The assessment period is defined as the effective age plus the reserve term. Additional information concerning system's or component's respective replacement costs (in today's dollars), typical expected useful lives, and remaining useful lives were estimated so that a funding schedule could be prepared. The Replacement Reserves Schedule presupposes that all required remedial work has been performed or that monies for remediation have been budgeted for items defined as Immediate Needs.

For the purposes of 'bucketizing' the System Expenditure Forecasts in this report, the Replacement Reserves have been subdivided and grouped as follows: Short Term (years 1-3), Near Term (years 4-5), Medium Term (years 6-10), and Long Term (years 11-20).

Key Findings

In an effort to highlight the most significant cost items and not be overwhelmed by the Replacement Reserves report in its totality, a subsection of Key Findings is included within the Executive Summary section of this report. Key Findings typically include repairs or replacements of deficient items within the first five-year window, as well as the most significant high-dollar line items that fall anywhere within the ten-year term. Note that while there is some subjectivity associated with identifying the Key Findings, the Immediate Needs are always included as a subset.

Exceedingly Aged

A fairly common scenario encountered during the assessment process, and a frequent source of debate, occurs when classifying and describing "very old" systems or components that are still functioning adequately and do not appear nor were reported to be in any way deficient. To help provide some additional intelligence on these items, such components will be tagged in the database as Exceedingly Aged. This designation will be reserved for mechanical or electrical systems or components that have aged well beyond their industry standard lifecycles, typically at least 15 years beyond and/or twice their Estimated Useful Life (EUL). In tandem with this designation, these items will be assigned a Remaining Useful Life (RUL) not less than two years but not greater than 1/3 of their standard EUL. As such the recommended replacement time for these components will reside outside the typical Short Term window but will not be pushed 'irresponsibly' (too far) into the future.

9. Certification

City of Montebello (the Client) retained Bureau Veritas to perform this Facility Condition Assessment in connection with its continued operation of Reggie Rodriguez Park, 200 West Mines Avenue, Montebello, California 90640, the "Property". It is our understanding that the primary interest of the Client is to locate and evaluate materials and building system defects that might significantly affect the value of the property and to determine if the present Property has conditions that will have a significant impact on its continued operations.
The conclusions and recommendations presented in this report are based on the brief review of the plans and records made available to our Project Manager during the site visit, interviews of available property management personnel and maintenance contractors familiar with the Property, appropriate inquiry of municipal authorities, our Project Manager's walk-through observations during the site visit, and our experience with similar properties.

No testing, exploratory probing, dismantling, or operating of equipment or in-depth studies were performed unless specifically required under the *Purpose and Scope* section of this report. This assessment did not include engineering calculations to determine the adequacy of the Property's original design or existing systems. Although walk-through observations were performed, not all areas may have been observed (see Section 1 for specific details). There may be defects in the Property, which were in areas not observed or readily accessible, may not have been visible, or were not disclosed by management personnel when questioned. The report describes property conditions at the time that the observations and research were conducted.

This report has been prepared on behalf of and exclusively for the use of the Client for the purpose stated within the *Purpose and Scope* section of this report. The report, or any excerpt thereof, shall not be used by any party other than the Client or for any other purpose than that specifically stated in our agreement or within the *Purpose and Scope* section of this report without the express written consent of Bureau Veritas.

Any reuse or distribution of this report without such consent shall be at the Client and the recipient's sole risk, without liability to Bureau Veritas.

Property Overview and Assessment Details

General Information	
Property Type	Public Park
Main Address	1700 Victoria Avenue, Montebello, CA 90640
Site Developed	1960's Exact year is unknown
Site Area	7.4 acres (estimated)
Parking Spaces	34 total spaces all in diagonal street parking; 2 of which are accessible
Building Area	640 SF, Restroom Building
Number of Stories	1
Outside Occupants / Leased Spaces	None
Date(s) of Visit	April 2, 2020
Management Point of Contact	City of Montebello/Park, Recreation and Community Services, David Sosnowski, Director 323.887.4588 phone dsosnowski@cityofmentebello.com email
On-site Point of Contact (POC)	Same as above
Assessment and Report Prepared By	Nezar M. Tibi
Reviewed By	Mark Surdam Program Manager Mark.Surdam@bvna.com 800.733.0660 6251

Historical Summary

The Acuna Park was originally constructed in the 1960's. The restroom building was constructed at the same time.

Architectural

The restroom building is constructed of concrete masonry units on a concrete slab floor with a heavy timber framed roof. It has not been renovated in the recent years. Most interior finishes seem to be original to the building. The built-up roof is in a fair condition however will need to be replaced to repair dry-rot damage to the roof structure. The exterior CMU walls are in need for a fresh paint. Renovation for most interior and exterior finishes is recommended in the next three years.

Mechanical, Electrical, Plumbing and Fire (MEPF)

There is no heating or cooling system in the restroom building. The plumbing piping system exhibits evidence of corrosion and will need replacement. Hot water is not provided. Plumbing fixtures are reaching the end of their lifecycle and need replacement.

The Electrical system and lighting fixtures are reaching the end of their lifecycle and need replacement. The building is not provided with a fire alarm system or fire suppression system.

Site

In general, the site has been well maintained. The site contain heavy landscaping, which is served by in-ground irrigation systems. There is one playground on site and it is in fair condition. The concrete sidewalk is in fair overall condition with the exception of an areas adjacent to the restroom building which require some repair due to tree root caused uplift. The asphalt paved parking areas and drive aisles are in fair to poor condition and require sealing and striping. The site lighting is aged and it is recommended that the system be upgraded to LED fixtures to improve energy efficiency.

Recommended Additional Studies

Some areas of the restroom building were identified as having major or moderate accessibility issues. Bureau Veritas recommends a study be performed to take measurements, provide additional itemized details, research local requirements, and, if necessary, estimate the scope and cost of any required improvements. The cost of this study is included in the cost tables. Due to the lack of measurements and itemized findings at this point in time, the costs for any possible subsequent repairs or improvements are not currently included.

Park Amenities Observed

		Playground Equipment, Medium	1	Playground		X		

Facility Condition Index (FCI)

One of the major goals of the FCA is to calculate each building's Facility Condition Index (FCI), which provides a theoretical objective indication of a building's overall condition. By definition, the FCI is defined as the ratio of the cost of current needs divided by current replacement value (CRV) of the facility. The chart below presents the industry standard ranges and cut-off points.

FCI Ranges and Description	
0 – 5%	In new or well-maintained condition, with little or no visual evidence of wear or deficiencies.
5 – 10%	Subjected to wear but is still in a serviceable and functioning condition.
10 – 30%	Subjected to hard or long-term wear. Nearing the end of its useful or serviceable life.
30% and above	Has reached the end of its useful or serviceable life. Renewal is now necessary.

The deficiencies and lifecycle needs identified in this assessment provide the basis for a portfolio-wide capital improvement funding strategy. In addition to the current FCI, extended FCI's have been developed to provide owners the intelligence needed to plan and budget for the "keep-up costs" for their facilities. As such the 3-year, 5-year, and 10-year FCI's are calculated by dividing the anticipated needs of those respective time periods by current replacement value. As a final point, the FCI's ultimately provide more value when used to relatively compare facilities across a portfolio instead of being over-analyzed and scrutinized as stand-alone values. The table below summarizes the individual findings for this FCA:

FCI Analysis | Acuna Park

Replacement Value	*Total SF*	*Cost/SF*
$ 3,223,500	*322,344*	*$ 10*

	Est Reserve Cost	FCI
Current FCI	$ 12,200	**0.4 %**
3-Year	$ 97,400	3.0 %
5-Year	$ 172,100	5.3 %
10-Year	$ 893,900	27.7 %

The orange line in the graph below forecasts what would happen to the FCI (left Y axis) over time, assuming zero capital expenditures. The capital expenditures allocated for each year (blue bars) are associated with the dollar amounts along the right Y axis.

Needs by Year with Unaddressed FCI Over Time

FCI Analysis: Acuna Park

Replacement Value: $ 3,223,440; Inflation rate: 3.0%

Key Findings

Pedestrian Pavement in Poor condition.

Sidewalk, Concrete Sections/Small Areas
Acuna Park Sidewalk

Uniformat Code: G2031
Recommendation: **Replace in 2021**

Priority Score: **95.0**

Plan Type: Safety

Cost Estimate: $16,500

**$$**$$

Isolated areas of cracks and uneven surface. - AssetCALC ID: 1817938

Roof Structure in Poor condition.

Pitched, Wood Rafters
Acuna Park Roof

Uniformat Code: B1022
Recommendation: **Replace in 2021**

Priority Score: **90.0**

Plan Type: Performance/Integrity

Cost Estimate: $17,900

**$$**$$

Wood rafter are rotting throughout - AssetCALC ID: 1817917

Roof in Poor condition.

Built-Up
Acuna Park Roof

Uniformat Code: B3011
Recommendation: **Replace in 2021**

Priority Score: **90.0**

Plan Type: Performance/Integrity

Cost Estimate: $9,800

**$**$$$

Roof replacement to coincide with roof structural repair. - AssetCALC ID: 1817868

Exterior Wall in Poor condition.

Aluminum Screen
Acuna Park Throughout

Uniformat Code: B2011
Recommendation: **Replace in 2022**

Priority Score: **90.0**

Plan Type:
Performance/Integrity

Cost Estimate: $400

**$**$$$

The screen are corroded - AssetCALC ID: 1817930

Exterior Wall in Poor condition.

any Painted Surface, 1-2 Stories
Acuna Park Building exterior

Uniformat Code: B2011
Recommendation: **Prep & Paint in 2022**

Priority Score: **89.9**

Plan Type:
Performance/Integrity

Cost Estimate: $4,000

**$**$$$

The paint is faded and chipped off - AssetCALC ID: 1817877

Light Fixture in Poor condition.

Exterior Flood (any type w/ LED Replacement), 100 W
Acuna Park Building exterior

Uniformat Code: D5022
Recommendation: **Replace in 2021**

Priority Score: **88.0**

Plan Type:
Performance/Integrity

Cost Estimate: $200

**$**$$$

The light enclosure is corroded and not fully operational - AssetCALC ID: 1817861

Exterior Door in Poor condition.

Steel
Acuna Park Utility closet

Uniformat Code: B2032
Recommendation: **Replace in 2021**

Priority Score: **88.0**

Plan Type:
Performance/Integrity

Cost Estimate: $1,300

**$**$$$

The doors exhibit corrosion at the bottom - AssetCALC ID: 1817937

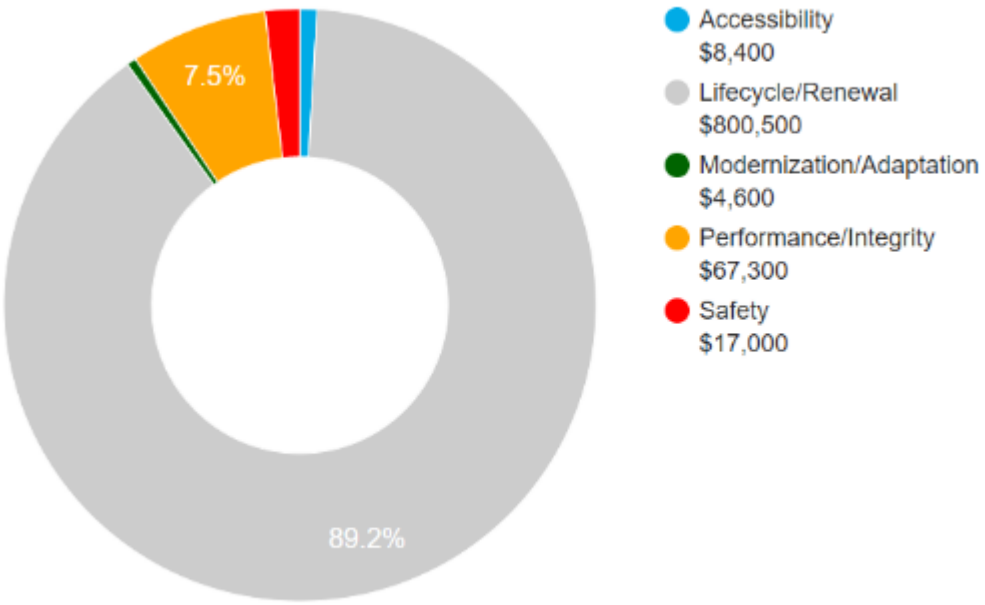
Plan Types

Each line item in the cost database is assigned a Plan Type, which is the primary reason or rationale for the recommended replacement, repair, or other corrective action. This is the "why" part of the equation. A cost or line item may commonly have more than one applicable Plan Type; however, only one Plan Type will be assigned based on the "best" fit, typically the one with the greatest significance.

Plan Type Descriptions

Safety	An observed or reported unsafe condition that if left unaddressed could result in injury; a system or component that presents potential liability risk.
Performance/Integrity	Component or system has failed, is almost failing, performs unreliably, does not perform as intended, and/or poses risk to overall system stability.
Accessibility	Does not meet ADA, UFAS, and/or other handicap accessibility requirements.
Environmental	Improvements to air or water quality, including removal of hazardous materials from the building or site.
Retrofit/Adaptation	Components, systems, or spaces recommended for upgrades in in order to meet current standards, facility usage, or client/occupant needs.
Lifecycle/Renewal	Any component or system that is not currently deficient or problematic but for which future replacement or repair is anticipated and budgeted.

Plan Type Distribution (by Cost)



10-YEAR TOTAL: $897,800

2. Building and Site Information

Systems Summary

System	Description	Condition
Structure	Masonry bearing walls and wood-framed roofs	Fair
Façade	Painted CMU with aluminum screen windows	Poor
Roof	Primary: Flat construction with built-up finish	Fair
Interiors	Walls: Painted CMU and Unfinished Floors: Elastomeric coating and Unfinished Ceilings: Painted wood and Unfinished/exposed	Fair
Elevators	None	--
Plumbing	Copper supply and cast iron waste & venting No hot water Toilets, urinals, and sinks in all restrooms	Fair

Systems Summary		
HVAC	No heating or cooling system	--
Fire Suppression	Hydrants	Fair
Electrical	Source & Distribution: Main panel with copper wiring Interior Lighting: T-8 Emergency: None	Fair
Fire Alarm	None	--
Equipment/Special	None	--
Site Pavement	Asphalt lots with areas of concrete and concrete sidewalks, curbs and ramps	Fair
Site Development	Property entrance signage Playgrounds with park benches and site lights Heavy park benches, picnic tables, trash receptacles Fountains	Fair
Landscaping and Topography	Moderate landscaping features Irrigation present One retaining wall Low to moderate site slopes throughout	Fair
Utilities	Municipal water and sewer	Good
Site Lighting	Pole-mounted: incandescent Building-mounted: incandescent	Fair
Ancillary Structures	None	--

Systems Summary

Accessibility	Potential major or moderate issues have been identified at this property and a detailed accessibility study is recommended.
Key Issues and Findings	Rusted entrance doors, galvanized or leaking supply piping, building lacks fire suppression, aged electrical infrastructure, rusty aluminum screens, heavy asphalt wear, significant sidewalk trip hazards, Clogged drinking fountain

Systems Expenditure Forecast

System	Immediate	Short Term (1-3 yr.)	Near Term (4-5 yr.)	Med Term (6-10 yr.)	Long Term (11-20 yr.)	TOTAL
Structure	-	$18,500	$600	-	$800	$19,800
Facade	$1,300	$6,700	-	-	$5,600	$13,600

TOTALS	**$12,100**	**$85,300**	**$74,800**	**$725,600**	**$465,600**	**$1,363,500**

3. Property Space Use and Observed Areas

Unit Allocation

All 7.4 acres of the property are occupied by the City of Montebello. The spaces are mostly public park with supporting restrooms building.

Areas Observed

The interior spaces were observed in order to gain a clear understanding of the property's overall condition. Other areas accessed included the site within the property boundaries, the exterior of the property, and the roof.

Key Spaces Not Observed

All key areas of the property were accessible and observed.

4. ADA Accessibility

Generally, Title II of the Americans with Disabilities Act (ADA) prohibits discrimination by entities to access and use of "areas of public accommodations" and "public facilities" on the basis of disability. Regardless of their age, these areas and facilities must be maintained and operated to comply with the Americans with Disabilities Act Accessibility Guidelines (ADAAG).

A public entity (i.e. city governments) shall operate each service, program, or activity so that the service, program, or activity, when viewed in its entirety, is readily accessible to and usable by individuals with disabilities.

However, this does not:

1. Necessarily require a public entity to make each of its existing facilities accessible to and usable by individuals with disabilities;
2. Require a public entity to take any action that would threaten or destroy the historic significance of an historic property; or
3. Require a public entity to take any action that it can demonstrate would result in a fundamental alteration in the nature of a service, program, or activity or in undue financial and administrative burdens. In those circumstances where personnel of the public entity believe that the proposed action would fundamentally alter the service, program, or activity or would result in undue financial and administrative burdens, a public entity has the burden of proving that compliance with 35.150(a) of this part would result in such alteration or burdens. The decision that compliance would result in such alteration or burdens must be made by the head of a public entity or his or her designee after considering all resources available for use in the funding and operation of the service, program, or activity, and must be accompanied by a written statement of the reasons for reaching that conclusion. If an action would result in such an alteration or such burdens, a public entity shall take any other action that would not result in such an alteration or such burdens but would nevertheless ensure that individuals with disabilities receive the benefits or services provided by the public entity.

During the FCA, Bureau Veritas performed a limited high-level accessibility review of the facility non-specific to any local regulations or codes. The scope of the visual observation was limited to those areas and categories set forth in the tables throughout this report. It is understood by the Client that the limited observations described herein do not comprise a full ADA Compliance Survey, and that such a survey is beyond the scope of Bureau Veritas's undertaking. Only a representative sample of areas was observed and actual measurements were not taken to verify compliance.

An accessibility study has not been performed at the site. A comprehensive ADA Compliance Survey will reveal specific aspects of the property that are not in compliance. Since some areas or categories above were identified as having major or moderate associated issues, Bureau Veritas recommends such a study be performed to take measurements, provide additional itemized details, research local requirements, and, if necessary, estimate the scope and cost of any required improvements. The cost of this study is included in the cost tables. Due to the lack of measurements and itemized findings at this point in time, the costs for any possible subsequent repairs or improvements are not currently included.

Removal of barriers to accessibility should be addressed from a liability standpoint in order to comply with federal law, but the barriers may or may not be building code violations. The Americans with Disabilities Act Accessibility Guidelines are part of the ADA federal civil rights law pertaining to the disabled and are not a construction code. State and local jurisdictions have adopted the ADA Guidelines or have adopted other standards for accessibility as part of their construction codes.

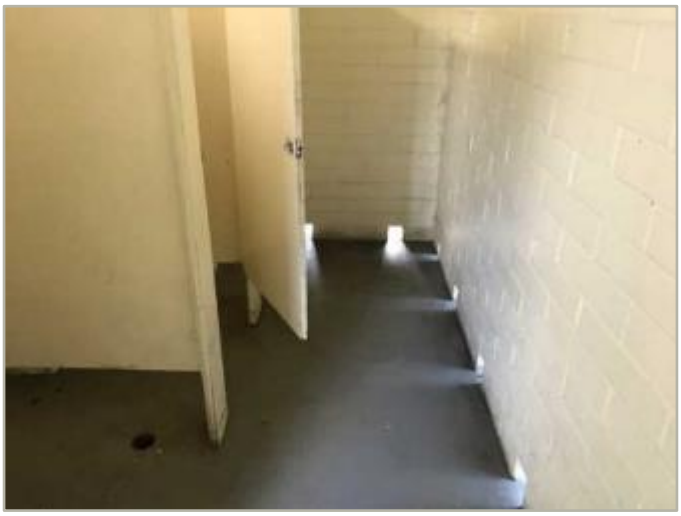
Campus Accessibility: Photographic Overview

Building entrance

Main entrance



Lack of Accessible restroom

Lack of Accessible restroom

Accessible parking

Accessible exterior path of travel

The table below is intended to be used as a general reference guide to help differentiate the orders of magnitude between some of the more commonly observed accessibility issues. The table is not intended to be all-inclusive, and boxes checked in the tables above do not necessarily mean those specific problems or shortcomings cited as examples below exist at the subject buildings and sites. Reference the photos above and/or *Key Findings* section for visuals and/or more specifics about the subject site conditions.

Reference Guide

	Major Issues *(ADA study recommended)*	Moderate Issues *(ADA study recommended)*	Minor/No Issues
Parking	- Needs full reconstruction - Excessive slopes over 3% require major re-grading - No level locations to add required spaces	- No or non-compliant curb cuts - Moderate difficulty to add required accessible spaces - Slopes close to compliant	- Painting of markings needed - Signage height non-compliant - Signage missing
Exterior Path of Travel	- Large areas of sidewalks with excessive slopes - No ramp when needed - Ramps with excessive slopes	- Ramps need rails - Ramps need rail extensions - Need significant # of lever handles - All or most entrance door exterior maneuvering clearance areas with excessive slopes	- One entrance door exterior maneuvering clearance area with excessive slope - A few doorknobs instead of lever handles - Non-compliant signage
Public Use Restrooms	- No ADA RR on each accessible floor - Restroom(s) too small - Entire restroom(s) requires renovation - Water closet clearance requires moving walls	- Interior doors appear less than 32” wide - Missing or non-compliant grab bars - Easily fixable clearance issues	- Minor height adjustments required - Non-compliant door pressures - Missing a visual strobe (only required if audible fire alarm already present) - Missing lavatory pipe wraps - Signage not compliant

5. Purpose and Scope

Purpose

Bureau Veritas was retained by the client to render an opinion as to the Property's current general physical condition on the day of the site visit.

Based on the observations, interviews and document review outlined below, this report identifies significant deferred maintenance issues, existing deficiencies, and material code violations of record, which affect the Property's use. Opinions are rendered as to its structural integrity, building system condition and the Property's overall condition. The report also notes building systems or components that have realized or exceeded their typical expected useful lives.

The physical condition of building systems and related components are typically defined as being in one of five condition ratings. For the purposes of this report, the following definitions are used:

Condition Ratings	
Excellent	New or very close to new; component or system typically has been installed within the past year, sound and performing its function. Eventual repair or replacement will be required when the component or system either reaches the end of its useful life or fails in service.
Good	Satisfactory as-is. Component or system is sound and performing its function, typically within the first third of its lifecycle. However, it may show minor signs of normal wear and tear. Repair or replacement will be required when the component or system either reaches the end of its useful life or fails in service.
Fair	Showing signs of wear and use but still satisfactory as-is, typically near the median of its estimated useful life. Component or system is performing adequately at this time but may exhibit some signs of wear, deferred maintenance, or evidence of previous repairs. Repair or replacement will be required due to the component or system's condition and/or its estimated remaining useful life.
Poor	Component or system is significantly aged, flawed, functioning intermittently or unreliably; displays obvious signs of deferred maintenance; shows evidence of previous repair or workmanship not in compliance with commonly accepted standards; has become obsolete; or exhibits an inherent deficiency. The present condition could contribute to or cause the deterioration of contiguous elements or systems. Either full component replacement is needed or repairs are required to restore to good condition, prevent premature failure, and/or prolong useful life.
Failed	Component or system has ceased functioning or performing as intended. Replacement, repair, or other significant corrective action is recommended or required.
Not Applicable	Assigning a condition does not apply or make logical sense, most commonly due to the item in question not being present.

Scope

The standard scope of the Facility Condition Assessment includes the following:

- Visit the Property to evaluate the general condition of the building and site improvements, review available construction documents in order to familiarize ourselves with, and be able to comment on, the in-place construction systems, life safety, mechanical, electrical, and plumbing systems, and the general built environment.
- Identify those components that are exhibiting deferred maintenance issues and provide cost estimates for Immediate Costs and Replacement Reserves based on observed conditions, maintenance history and industry standard useful life estimates. This will include the review of documented capital improvements completed within the last five-year period and work currently contracted for, if applicable.
- Provide a full description of the Property with descriptions of in-place systems and commentary on observed conditions.
- Provide a high-level categorical general statement regarding the subject Property's compliance to Title III of the Americans with Disabilities Act. This will not constitute a full ADA survey, but will help identify exposure to issues and the need for further review.
- Obtain background and historical information about the facility from a building engineer, property manager, maintenance staff, or other knowledgeable source. The preferred methodology is to have the client representative or building occupant complete a Pre-Survey Questionnaire (PSQ) in advance of the site visit. Common alternatives include a verbal interview just prior to or during the walk-through portion of the assessment.
- Review maintenance records and procedures with the in-place maintenance personnel.
- Observe a representative sample of the interior spaces/units, including vacant spaces/units, to gain a clear understanding of the property's overall condition. Other areas to be observed include the exterior of the property, the roofs, interior common areas, and the significant mechanical, electrical and elevator equipment rooms.
- Provide recommendations for additional studies, if required, with related budgetary information.
- Provide an Executive Summary at the beginning of this report, which highlights key findings and includes a Facility Condition Index as a basis for comparing the relative conditions of the buildings within the portfolio.

6. Opinions of Probable Costs

Cost estimates are attached throughout this report, with the Replacement Reserves in the appendix.

These estimates are based on Invoice or Bid Document/s provided either by the Owner/facility and construction costs developed by construction resources such as *R.S. Means, CBRE Whitestone,* and *Marshall & Swift,* Bureau Veritas's experience with past costs for similar properties, city cost indexes, and assumptions regarding future economic conditions.

Opinions of probable costs should only be construed as preliminary, order of magnitude budgets. Actual costs most probably will vary from the consultant's opinions of probable costs depending on such matters as type and design of suggested remedy, quality of materials and installation, manufacturer and type of equipment or system selected, field conditions, whether a physical deficiency is repaired or replaced in whole, phasing or bundling of the work (if applicable), quality of contractor, quality of project management exercised, market conditions, use of subcontractors, and whether competitive pricing is solicited, etc. Certain opinions of probable costs cannot be developed within the scope of this guide without further study. Opinions of probable cost for further study should be included in the FCA.

Methodology

Based upon site observations, research, and judgment, along with referencing Expected Useful Life (EUL) tables from various industry sources, Bureau Veritas opines as to when a system or component will most probably necessitate replacement. Accurate historical replacement records, if provided, are typically the best source of information. Exposure to the elements, initial quality and installation, extent of use, the quality and amount of preventive maintenance exercised, etc., are all factors that impact the effective age of a system or component. As a result, a system or component may have an effective age that is greater or less than its actual chronological age. The Remaining Useful Life (RUL) of a component or system equals the EUL less its *effective age*, whether explicitly or implicitly stated. Projections of Remaining Useful Life (RUL) are based primarily on age and condition with the presumption of continued use and maintenance of the Property similar to the observed and reported past use and maintenance practices, in conjunction with the professional judgment of Bureau Veritas's assessors. Significant changes in occupants and/or usage may affect the service life of some systems or components.

Where quantities could not be or were not derived from an actual construction document take-off or facility walk-through, and/or where systemic costs are more applicable or provide more intrinsic value, budgetary square foot and gross square foot costs are used. Estimated costs are based on professional judgment and the probable or actual extent of the observed defect, inclusive of the cost to design, procure, construct and manage the corrections.

Definitions

Immediate Needs

Immediate Needs are line items that require immediate action as a result of: (1) material existing or potential unsafe conditions, (2) failed or imminent failure of mission critical building systems or components, or (3) conditions that, if not addressed, have the potential to result in, or contribute to, critical element or system failure within one year or will most probably result in a significant escalation of its remedial cost.

For database and reporting purposes the line items with RUL=0, and commonly associated with *Safety* or *Performance/Integrity* Plan Types, are considered Immediate Needs.

Replacement Reserves

Cost line items traditionally called Replacement Reserves (equivalently referred to as Lifecycle/Renewals) are for recurring probable renewals or expenditures, which are not classified as operation or maintenance expenses. The replacement reserves should be budgeted for in advance on an annual basis. Replacement Reserves are reasonably predictable both in terms of frequency and cost. However, Replacement Reserves may also include components or systems that have an indeterminable life but, nonetheless, have a potential for failure within an estimated time period.

Replacement Reserves generally exclude systems or components that are estimated to expire after the reserve term and are not considered material to the structural and mechanical integrity of the subject property. Furthermore, systems and components that are not deemed to have a material effect on the use of the Property are also excluded. Costs that are caused by acts of God, accidents, or other occurrences that are typically covered by insurance, rather than reserved for, are also excluded.

Replacement costs are solicited from ownership/property management, Bureau Veritas's discussions with service companies, manufacturers' representatives, and previous experience in preparing such schedules for other similar facilities. Costs for work performed by the ownership's or property management's maintenance staff are also considered.

Bureau Veritas's reserve methodology involves identification and quantification of those systems or components requiring capital reserve funds within the assessment period. The assessment period is defined as the effective age plus the reserve term. Additional information concerning system's or component's respective replacement costs (in today's dollars), typical expected useful lives, and remaining useful lives were estimated so that a funding schedule could be prepared. The Replacement Reserves Schedule presupposes that all required remedial work has been performed or that monies for remediation have been budgeted for items defined as Immediate Needs.

For the purposes of 'bucketizing' the System Expenditure Forecasts in this report, the Replacement Reserves have been subdivided and grouped as follows: Short Term (years 1-3), Near Term (years 4-5), Medium Term (years 6-10), and Long Term (years 11-20).

Key Findings

In an effort to highlight the most significant cost items and not be overwhelmed by the Replacement Reserves report in its totality, a subsection of Key Findings is included within the Executive Summary section of this report. Key Findings typically include repairs or replacements of deficient items within the first five-year window, as well as the most significant high-dollar line items that fall anywhere within the ten-year term. Note that while there is some subjectivity associated with identifying the Key Findings, the Immediate Needs are always included as a subset.

Exceedingly Aged

A fairly common scenario encountered during the assessment process, and a frequent source of debate, occurs when classifying and describing "very old" systems or components that are still functioning adequately and do not appear nor were reported to be in any way deficient. To help provide some additional intelligence on these items, such components will be tagged in the database as Exceedingly Aged. This designation will be reserved for mechanical or electrical systems or components that have aged well beyond their industry standard lifecycles, typically at least 15 years beyond and/or twice their Estimated Useful Life (EUL). In tandem with this designation, these items will be assigned a Remaining Useful Life (RUL) not less than two years but not greater than 1/3 of their standard EUL. As such the recommended replacement time for these components will reside outside the typical Short Term window but will not be pushed 'irresponsibly' (too far) into the future.

7. Certification

The City of Montebello (the Client) retained Bureau Veritas to perform this Facility Condition Assessment in connection with its continued operation of Acuna Park, 1700 Victoria Avenue, Montebello, CA 90640, the "Property". It is our understanding that the primary interest of the Client is to locate and evaluate materials and building system defects that might significantly affect the value of the property and to determine if the present Property has conditions that will have a significant impact on its continued operations.

The conclusions and recommendations presented in this report are based on the brief review of the plans and records made available to our Project Manager during the site visit, interviews of available property management personnel and maintenance contractors familiar with the Property, appropriate inquiry of municipal authorities, our Project Manager's walk-through observations during the site visit, and our experience with similar properties.

No testing, exploratory probing, dismantling or operating of equipment or in-depth studies were performed unless specifically required under the *Purpose and Scope* section of this report. This assessment did not include engineering calculations to determine the adequacy of the Property's original design or existing systems. Although walk-through observations were performed, not all areas may have been observed (see Section 1 for specific details). There may be defects in the Property, which were in areas not observed or readily accessible, may not have been visible, or were not disclosed by management personnel when questioned. The report describes property conditions at the time that the observations and research were conducted.

This report has been prepared on behalf of and exclusively for the use of the Client for the purpose stated within the *Purpose and Scope* section of this report. The report, or any excerpt thereof, shall not be used by any party other than the Client or for any other purpose than that specifically stated in our agreement or within the *Purpose and Scope* section of this report without the express written consent of Bureau Veritas.

Any reuse or distribution of this report without such consent shall be at the Client and the recipient's sole risk, without liability to Bureau Veritas.

1. Executive Summary

Property Overview and Assessment Details

General Information	
Property Type	Public Museum
Main Address	946 North Adobe Avenue, Montebello, California 90640
Site Developed	1960's
Site Area	1.48 acres (estimated)
Parking Spaces	4 total spaces all in open lots; 1 of which are accessible
Building Area	7,720 SF
Number of Stories	One
Outside Occupants / Leased Spaces	None
Date(s) of Visit	April 23, 2020
Management Point of Contact	City of Montebello/Park, Recreation and Community Services, David Sosnowski, Director 323.887.4588 phone dsosnowski@cityofmentebello.com email
On-site Point of Contact (POC)	Michael Singleton 619.294.4477 X134 phone
Assessment and Report Prepared By	Nezar M. Tibi

Significant/Systemic Findings and Deficiencies

Historical Summary

The Sanchez Adobe Museum was originally constructed in the 1960's. The restroom building was constructed around 1990's.

Architectural

The main building consists of wood frame construction on concrete slab with integral footings. The asphalt shingle roof is in fair condition with exception of isolated areas of deterioration. The restroom building is constructed of concrete masonry units on a concrete slab floor with a heavy timber framed roof. Areas of deteriorated roof wood rafter are in need of repairs. It has not been renovated in the recent years. The exterior CMU walls are in need for a fresh paint and repair of the women's restroom entrance.

In general, the structures appear to be sound, with no significant areas of settlement or structural-related deficiencies observed Most interior finishes seem to be original to the building. Renovation for most interior and exterior finishes is recommended in the next three years. Renovation for most interior and exterior finishes is recommended in the next three years.

Mechanical, Electrical, Plumbing and Fire (MEPF)

There are no heating or cooling systems. The plumbing piping system is only in the restroom building and it is in fair condition and it has been renovated in the last few years. Hot water is not provided. Typical lifecycle replacements of the plumbing fixtures are budgeted and anticipated.

The electrical system and lighting fixtures are in fair condition. The buildings are not provided with a fire alarm system or fire suppression system.

Site

In general, the site has been well maintained. The site contains moderate landscaping, which is served by in-ground irrigation systems. There is one lunch and barbeque shelter on site, and they are in fair condition. A brick fire pit is located at the rear of the main building and it is in fair condition. The concrete sidewalk is in fair overall condition with the exception of an areas require some repair. The parking lot area is in fair to poor condition and require sealing and striping.

Recommended Additional Studies

No additional studies recommended at this time.

Facility Condition Index (FCI)

One of the major goals of the FCA is to calculate each building's Facility Condition Index (FCI), which provides a theoretical objective indication of a building's overall condition. By definition, the FCI is defined as the ratio of the cost of current needs divided by current replacement value (CRV) of the facility. The chart below presents the industry standard ranges and cut-off points.

FCI Ranges and Description	
0 – 5%	In new or well-maintained condition, with little or no visual evidence of wear or deficiencies.
5 – 10%	Subjected to wear but is still in a serviceable and functioning condition.
10 – 30%	Subjected to hard or long-term wear. Nearing the end of its useful or serviceable life.
30% and above	Has reached the end of its useful or serviceable life. Renewal is now necessary.

The deficiencies and lifecycle needs identified in this assessment provide the basis for a portfolio-wide capital improvement funding strategy. In addition to the current FCI, extended FCI's have been developed to provide owners the intelligence needed to plan and budget for the "keep-up costs" for their facilities. As such the 3-year, 5-year, and 10-year FCI's are calculated by dividing the anticipated needs of those respective time periods by current replacement value. As a final point, the FCI's ultimately provide more value when used to relatively compare facilities across a portfolio instead of being over-analyzed and scrutinized as stand-alone values. The table below summarizes the individual findings for this FCA:

FCI Analysis

Facility (year built)	Cost/SF	Total SF	Replacement Value	Current	3-Year	5-Year	10-Year
Sanchez Adobe Museum / Main Building	$320	7,080	$2,265,600	0.2%	0.6%	5.8%	9.9%
Sanchez Adobe Museum / Restrooms Building	$225	640	$144,000	1.8%	4.8%	15.5%	44.8%
Sanchez Adobe Museum / Site	$0	0	$1	0.0%	0.0%	0.0%	0.0%

Immediate Needs

Key Findings

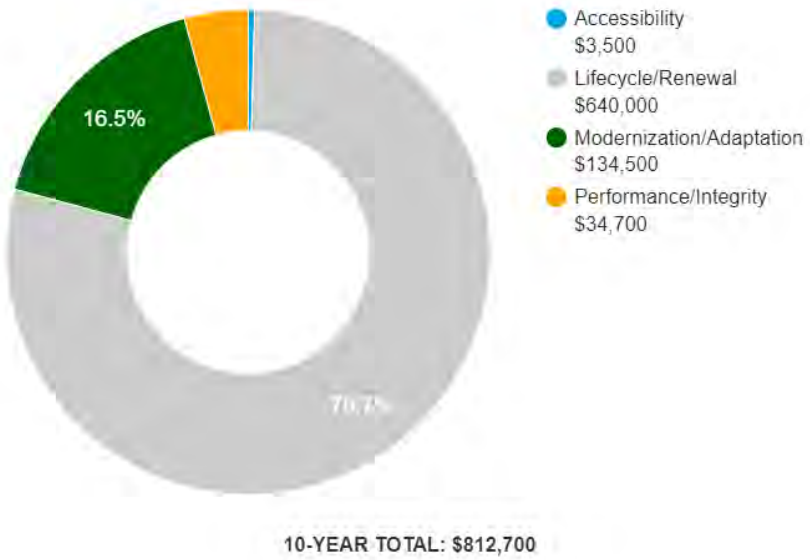
Not applicable

Plan Types

Each line item in the cost database is assigned a Plan Type, which is the primary reason or rationale for the recommended replacement, repair, or other corrective action. This is the "why" part of the equation. A cost or line item may commonly have more than one applicable Plan Type; however, only one Plan Type will be assigned based on the "best" fit, typically the one with the greatest significance.

Plan Type Descriptions		
Safety	■	An observed or reported unsafe condition that if left unaddressed could result in injury; a system or component that presents potential liability risk.
Performance/Integrity	■	Component or system has failed, is almost failing, performs unreliably, does not perform as intended, and/or poses risk to overall system stability.
Accessibility	■	Does not meet ADA, UFAS, and/or other handicap accessibility requirements.
Environmental	■	Improvements to air or water quality, including removal of hazardous materials from the building or site.
Retrofit/Adaptation	■	Components, systems, or spaces recommended for upgrades in in order to meet current standards, facility usage, or client/occupant needs.
Lifecycle/Renewal	■	Any component or system that is not currently deficient or problematic but for which future replacement or repair is anticipated and budgeted.

Plan Type Distribution (by Cost)



2. Main Building

Main Building: Systems Summary		
Address	946 North Adobe Avenue, Montebello, California	
Constructed/Renovated	1960's	
Building Size	7,080 SF	
Number of Stories	One	
System	*Description*	*Condition*
Structure	Conventional wood frame structure on concrete slab/ with raised floor	Fair
Façade	Stucco with wood windows	Fair
Roof	Primary: Gable construction with wood shake/shingle	Fair
Interiors	Walls: Painted gypsum board Floors: wood Ceilings: Painted wood	Fair
Elevators	None	--
Plumbing	None	--
HVAC	None	--

Main Building: Systems Summary

Fire Suppression	None	--
Electrical	Source & Distribution: Main panel with copper wiring Interior Lighting: T-8 Emergency: None	Fair
Fire Alarm	None	--
Equipment/Special	None	--
Accessibility	Presently it does not appear an accessibility study is needed for this property.	
Key Issues and Findings	Building lacks fire suppression, isolated areas of roof repair, isolated areas of wood flooring repair, building lacks fire alarm system	

Main Building: Systems Expenditure Forecast

System Expenditure Forecast

The orange line in the graph below forecasts what would happen to the FCI (left axis) over time, assuming zero capital expenditures. The capital expenditures for each year (blue bars) are associated with the dollar amounts along the right Y axis.

Needs by Year with Unaddressed FCI Over Time

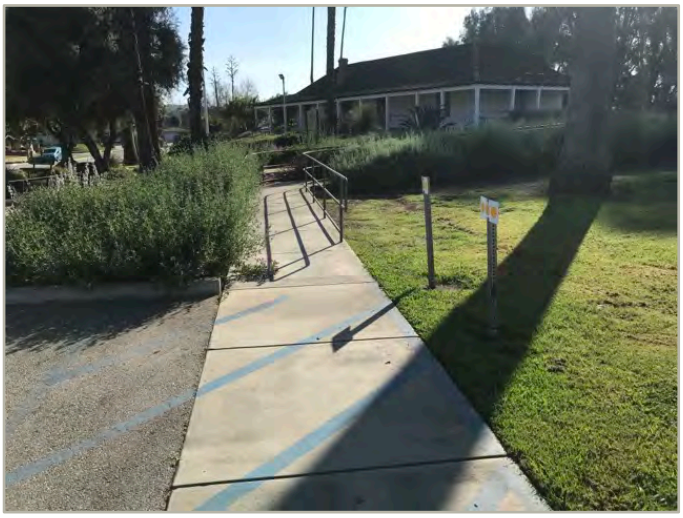
4. Site Summary



Site Information		
Lot Size	1.48 acres (estimated)	
Parking Spaces	4 total spaces all in open lots; 1 of which are accessible	
System	*Description*	*Condition*
Pavement/Flatwork	Asphalt lots with areas of concrete and concrete sidewalks, curbs, ramps, and stairs	Fair
Site Development	Property entrance signage, wrought iron fencing Limited park benches, picnic tables, trash receptacles, lunch shelter, barbeque, flagpole	Fair
Landscaping and Topography	Moderate landscaping features Irrigation present No retaining walls Low to moderate site slopes throughout	Fair
Utilities	Municipal water and sewer Local utility-provided electric	Fair
Site Lighting	Pole-mounted: LED Building-mounted: incandescent	Fair
Ancillary Structures	Fire pit, barbecue area	Fair
Accessibility	Presently it does not appear an accessibility study is needed for the exterior site areas. See Appendix C.	
Key Issues and Findings	Concrete sidewalk cracks, large eroded landscaping area	

Site: Systems Expenditure Forecast

System Expenditure Forecast

System	Immediate	Short Term (1-3 yr)	Near Term (4-5 yr)	Med Term (6-10 yr)	Long Term (11-20 yr)	TOTAL
Structure	-	-	$200	-	$2,700	$2,900
Facade	-	-	-	-	$10,300	$10,300
Roofing	-	-	-	-	$3,900	$3,900

Accessibility	$3,300	-	-	-	-	$3,300
TOTALS	**$10,000**	**$9,500**	**$200**	**$41,700**	**$311,200**	**$372,600**

5. Property Space Use and Observed Areas

Unit Allocation

All 7,720 square feet of the property are occupied by the City of Montebello. The spaces are mostly a museum building and common restroom building with storage areas.

Areas Observed

The interior spaces were observed in order to gain a clear understanding of the property's overall condition. Other areas accessed included the site within the property boundaries, the exterior of the property, and the roofs.

Key Spaces Not Observed

Areas of note that were either inaccessible or not observed for other reasons are listed here:

- Women's restroom, Locked room and no key
- Roof at restroom building, Lack of ladder or other means of egress

6. ADA Accessibility

Generally, Title II of the Americans with Disabilities Act (ADA) prohibits discrimination by entities to access and use of "areas of public accommodations" and "public facilities" on the basis of disability. Regardless of their age, these areas and facilities must be maintained and operated to comply with the Americans with Disabilities Act Accessibility Guidelines (ADAAG).

A public entity (i.e. city governments) shall operate each service, program, or activity so that the service, program, or activity, when viewed in its entirety, is readily accessible to and usable by individuals with disabilities.

However, this does not:

1. Necessarily require a public entity to make each of its existing facilities accessible to and usable by individuals with disabilities;
2. Require a public entity to take any action that would threaten or destroy the historic significance of an historic property; or
3. Require a public entity to take any action that it can demonstrate would result in a fundamental alteration in the nature of a service, program, or activity or in undue financial and administrative burdens. In those circumstances where personnel of the public entity believe that the proposed action would fundamentally alter the service, program, or activity or would result in undue financial and administrative burdens, a public entity has the burden of proving that compliance with 35.150(a) of this part would result in such alteration or burdens. The decision that compliance would result in such alteration or burdens must be made by the head of a public entity or his or her designee after considering all resources available for use in the funding and operation of the service, program, or activity, and must be accompanied by a written statement of the reasons for reaching that conclusion. If an action would result in such an alteration or such burdens, a public entity shall take any other action that would not result in such an alteration or such burdens but would nevertheless ensure that individuals with disabilities receive the benefits or services provided by the public entity.

During the FCA, Bureau Veritas performed a limited high-level accessibility review of the facility non-specific to any local regulations or codes. The scope of the visual observation was limited to those areas and categories set forth in the tables throughout this report. It is understood by the Client that the limited observations described herein do not comprise a full ADA Compliance Survey, and that such a survey is beyond the scope of Bureau Veritas's undertaking. Only a representative sample of areas was observed and actual measurements were not taken to verify compliance.

The facility was originally constructed in 1960's. The facility was not subsequently renovated. Complaints about accessibility issues have not been received by the property management. The property does not have associated prior or pending litigation related to existing barriers or previously removed barriers.

An accessibility study has not been performed at the site. Although no significant issues were identified, a comprehensive ADA Compliance Survey may reveal specific aspects of the property that are not in full compliance.

Removal of barriers to accessibility should be addressed from a liability standpoint in order to comply with federal law, but the barriers may or may not be building code violations. The Americans with Disabilities Act Accessibility Guidelines are part of the ADA federal civil rights law pertaining to the disabled and are not a construction code. State and local jurisdictions have adopted the ADA Guidelines or have adopted other standards for accessibility as part of their construction codes.

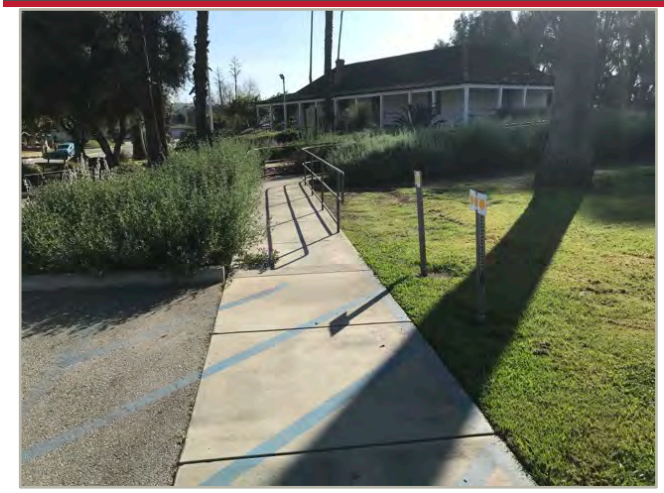
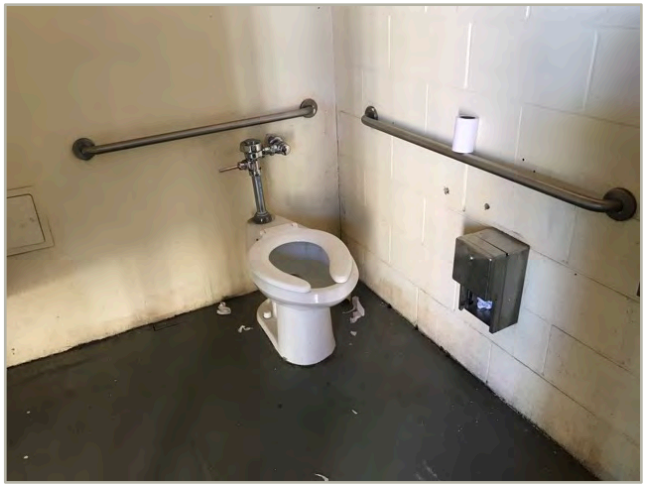
Campus Accessibility: Photographic Overview



Building entrance with ramp

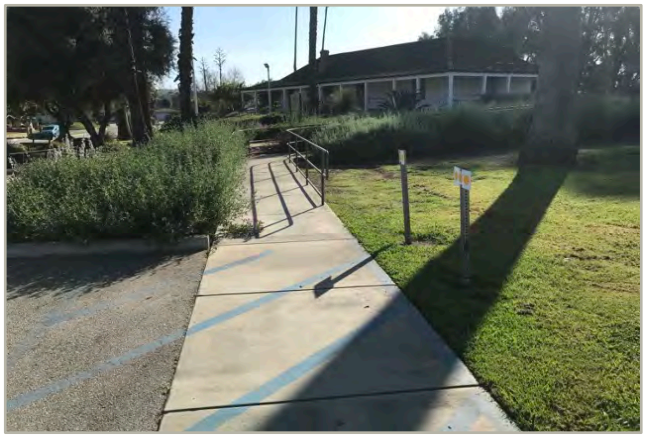
Restroom building entrance

Accessible restroom accommodations



Accessible restroom accommodations

Accessible parking



Accessible parking

The table below is intended to be used as a general reference guide to help differentiate the orders of magnitude between some of the more commonly observed accessibility issues. The table is not intended to be all-inclusive, and boxes checked in the tables above do not necessarily mean those specific problems or shortcomings cited as examples below exist at the subject buildings and sites. Reference the photos above and/or *Key Findings* section for visuals and/or more specifics about the subject site conditions.

Reference Guide

	Major Issues *(ADA study recommended)*	Moderate Issues *(ADA study recommended)*	Minor/No Issues
Parking	- Needs full reconstruction - Excessive slopes over 3% require major re-grading - No level locations to add required spaces	- No or non-compliant curb cuts - Moderate difficulty to add required accessible spaces - Slopes close to compliant	- Painting of markings needed - Signage height non-compliant - Signage missing
Exterior Path of Travel	- Large areas of sidewalks with excessive slopes - No ramp when needed - Ramps with excessive slopes	- Ramps need rails - Ramps need rail extensions - Need significant # of lever handles - All or most entrance door exterior maneuvering clearance areas with excessive slopes	- One entrance door exterior maneuvering clearance area with excessive slope - A few door knobs instead of lever handles - Non-compliant signage
Interior Path of Travel	- All or most interior doors appear less than 32” wide - Corridors less than 36” wide - No ramp when needed - Ramps with excessive slopes - Non-compliant treads/risers at means of egress stairways	- Single height drinking fountains - Drinking fountain too high or protrudes into accessible route - Ramps need rails - Ramps need rail extensions - Need significant # of lever handles - Non-compliant rail extensions at egress stairways - All/most door thresholds high	- One door threshold too high - A few door knobs instead of lever handles - Non-compliant door pressures - Non-compliant signage - Switches not within reach range
Public Use Restrooms	- No ADA RR on each accessible floor - Restroom(s) too small - Entire restroom(s) requires renovation - Water closet clearance requires moving walls	- Interior doors appear less than 32” wide - Missing or non-compliant grab bars - Easily fixable clearance issues	- Minor height adjustments required - Non-compliant door pressures - Missing a visual strobe (only required if audible fire alarm already present) - Missing lavatory pipe wraps - Signage not compliant
Elevators	- No elevator present when required - Elevator cab too small	- Panel control buttons not at compliant height - No hands-free emergency communication system - Elevator only has mechanical stops	- Audible/visual signals at every floor may be lacking - Minor signage / Braille issues
Kitchens/Kitchenettes	- Clear space for each appliance not present - Clearance between opposing counters too narrow	- Sink and counter too high - Sink knee and toe clearance not provided where required (built-in) - Less than 50% of cabinetry within reach range	- Dispensers not within reach range - Switches not within reach range - Missing sink pipe wraps if knee and toe clearance required

7. Purpose and Scope

Purpose

Bureau Veritas was retained by the client to render an opinion as to the Property's current general physical condition on the day of the site visit.

Based on the observations, interviews and document review outlined below, this report identifies significant deferred maintenance issues, existing deficiencies, and material code violations of record, which affect the Property's use. Opinions are rendered as to its structural integrity, building system condition and the Property's overall condition. The report also notes building systems or components that have realized or exceeded their typical expected useful lives.

The physical condition of building systems and related components are typically defined as being in one of five condition ratings. For the purposes of this report, the following definitions are used:

Condition Ratings	
Excellent	New or very close to new; component or system typically has been installed within the past year, sound and performing its function. Eventual repair or replacement will be required when the component or system either reaches the end of its useful life or fails in service.
Good	Satisfactory as-is. Component or system is sound and performing its function, typically within the first third of its lifecycle. However, it may show minor signs of normal wear and tear. Repair or replacement will be required when the component or system either reaches the end of its useful life or fails in service.
Fair	Showing signs of wear and use but still satisfactory as-is, typically near the median of its estimated useful life. Component or system is performing adequately at this time but may exhibit some signs of wear, deferred maintenance, or evidence of previous repairs. Repair or replacement will be required due to the component or system's condition and/or its estimated remaining useful life.
Poor	Component or system is significantly aged, flawed, functioning intermittently or unreliably; displays obvious signs of deferred maintenance; shows evidence of previous repair or workmanship not in compliance with commonly accepted standards; has become obsolete; or exhibits an inherent deficiency. The present condition could contribute to or cause the deterioration of contiguous elements or systems. Either full component replacement is needed or repairs are required to restore to good condition, prevent premature failure, and/or prolong useful life.
Failed	Component or system has ceased functioning or performing as intended. Replacement, repair, or other significant corrective action is recommended or required.
Not Applicable	Assigning a condition does not apply or make logical sense, most commonly due to the item in question not being present.

Scope

The standard scope of the Facility Condition Assessment includes the following:

- Visit the Property to evaluate the general condition of the building and site improvements, review available construction documents in order to familiarize ourselves with, and be able to comment on, the in-place construction systems, life safety, mechanical, electrical, and plumbing systems, and the general built environment.
- Identify those components that are exhibiting deferred maintenance issues and provide cost estimates for Immediate Costs and Replacement Reserves based on observed conditions, maintenance history and industry standard useful life estimates. This will include the review of documented capital improvements completed within the last five-year period and work currently contracted for, if applicable.
- Provide a full description of the Property with descriptions of in-place systems and commentary on observed conditions.
- Provide a high-level categorical general statement regarding the subject Property's compliance to Title III of the Americans with Disabilities Act. This will not constitute a full ADA survey, but will help identify exposure to issues and the need for further review.
- Obtain background and historical information about the facility from a building engineer, property manager, maintenance staff, or other knowledgeable source. The preferred methodology is to have the client representative or building occupant complete a Pre-Survey Questionnaire (PSQ) in advance of the site visit. Common alternatives include a verbal interview just prior to or during the walk-through portion of the assessment.
- Review maintenance records and procedures with the in-place maintenance personnel.
- Observe a representative sample of the interior spaces/units, including vacant spaces/units, to gain a clear understanding of the property's overall condition. Other areas to be observed include the exterior of the property, the roofs, interior common areas, and the significant mechanical, electrical and elevator equipment rooms.
- Provide recommendations for additional studies, if required, with related budgetary information.
- Provide an Executive Summary at the beginning of this report, which highlights key findings and includes a Facility Condition Index as a basis for comparing the relative conditions of the buildings within the portfolio.

8. Opinions of Probable Costs

Cost estimates are attached throughout this report, with the Replacement Reserves in the appendix.

These estimates are based on Invoice or Bid Document/s provided either by the Owner/facility and construction costs developed by construction resources such as *R.S. Means, CBRE Whitestone,* and *Marshall & Swift,* Bureau Veritas's experience with past costs for similar properties, city cost indexes, and assumptions regarding future economic conditions.

Opinions of probable costs should only be construed as preliminary, order of magnitude budgets. Actual costs most probably will vary from the consultant's opinions of probable costs depending on such matters as type and design of suggested remedy, quality of materials and installation, manufacturer and type of equipment or system selected, field conditions, whether a physical deficiency is repaired or replaced in whole, phasing or bundling of the work (if applicable), quality of contractor, quality of project management exercised, market conditions, use of subcontractors, and whether competitive pricing is solicited, etc. Certain opinions of probable costs cannot be developed within the scope of this guide without further study. Opinions of probable cost for further study should be included in the FCA.

Methodology

Based upon site observations, research, and judgment, along with referencing Expected Useful Life (EUL) tables from various industry sources, Bureau Veritas opines as to when a system or component will most probably necessitate replacement. Accurate historical replacement records, if provided, are typically the best source of information. Exposure to the elements, initial quality and installation, extent of use, the quality and amount of preventive maintenance exercised, etc., are all factors that impact the effective age of a system or component. As a result, a system or component may have an effective age that is greater or less than its actual chronological age. The Remaining Useful Life (RUL) of a component or system equals the EUL less its *effective age*, whether explicitly or implicitly stated. Projections of Remaining Useful Life (RUL) are based primarily on age and condition with the presumption of continued use and maintenance of the Property similar to the observed and reported past use and maintenance practices, in conjunction with the professional judgment of Bureau Veritas's assessors. Significant changes in occupants and/or usage may affect the service life of some systems or components.

Where quantities could not be or were not derived from an actual construction document take-off or facility walk-through, and/or where systemic costs are more applicable or provide more intrinsic value, budgetary square foot and gross square foot costs are used. Estimated costs are based on professional judgment and the probable or actual extent of the observed defect, inclusive of the cost to design, procure, construct and manage the corrections.

Definitions

Immediate Needs

Immediate Needs are line items that require immediate action as a result of: (1) material existing or potential unsafe conditions, (2) failed or imminent failure of mission critical building systems or components, or (3) conditions that, if not addressed, have the potential to result in, or contribute to, critical element or system failure within one year or will most probably result in a significant escalation of its remedial cost.

For database and reporting purposes the line items with RUL=0, and commonly associated with *Safety* or *Performance/Integrity* Plan Types, are considered Immediate Needs.

Replacement Reserves

Cost line items traditionally called Replacement Reserves (equivalently referred to as Lifecycle/Renewals) are for recurring probable renewals or expenditures, which are not classified as operation or maintenance expenses. The replacement reserves should be budgeted for in advance on an annual basis. Replacement Reserves are reasonably predictable both in terms of frequency and cost. However, Replacement Reserves may also include components or systems that have an indeterminable life but, nonetheless, have a potential for failure within an estimated time period.

Replacement Reserves generally exclude systems or components that are estimated to expire after the reserve term and are not considered material to the structural and mechanical integrity of the subject property. Furthermore, systems and components that are not deemed to have a material effect on the use of the Property are also excluded. Costs that are caused by acts of God, accidents, or other occurrences that are typically covered by insurance, rather than reserved for, are also excluded.

Replacement costs are solicited from ownership/property management, Bureau Veritas's discussions with service companies, manufacturers' representatives, and previous experience in preparing such schedules for other similar facilities. Costs for work performed by the ownership's or property management's maintenance staff are also considered.

Bureau Veritas's reserve methodology involves identification and quantification of those systems or components requiring capital reserve funds within the assessment period. The assessment period is defined as the effective age plus the reserve term. Additional information concerning system's or component's respective replacement costs (in today's dollars), typical expected useful lives, and remaining useful lives were estimated so that a funding schedule could be prepared. The Replacement Reserves Schedule presupposes that all required remedial work has been performed or that monies for remediation have been budgeted for items defined as Immediate Needs.

For the purposes of 'bucketizing' the System Expenditure Forecasts in this report, the Replacement Reserves have been subdivided and grouped as follows: Short Term (years 1-3), Near Term (years 4-5), Medium Term (years 6-10), and Long Term (years 11-20).

Key Findings

In an effort to highlight the most significant cost items and not be overwhelmed by the Replacement Reserves report in its totality, a subsection of Key Findings is included within the Executive Summary section of this report. Key Findings typically include repairs or replacements of deficient items within the first five-year window, as well as the most significant high-dollar line items that fall anywhere within the ten-year term. Note that while there is some subjectivity associated with identifying the Key Findings, the Immediate Needs are always included as a subset.

Exceedingly Aged

A fairly common scenario encountered during the assessment process, and a frequent source of debate, occurs when classifying and describing "very old" systems or components that are still functioning adequately and do not appear nor were reported to be in any way deficient. To help provide some additional intelligence on these items, such components will be tagged in the database as Exceedingly Aged. This designation will be reserved for mechanical or electrical systems or components that have aged well beyond their industry standard lifecycles, typically at least 15 years beyond and/or twice their Estimated Useful Life (EUL). In tandem with this designation, these items will be assigned a Remaining Useful Life (RUL) not less than two years but not greater than 1/3 of their standard EUL. As such the recommended replacement time for these components will reside outside the typical Short Term window but will not be pushed 'irresponsibly' (too far) into the future.

9. Certification

City of Montebello (the Client) retained Bureau Veritas to perform this Facility Condition Assessment in connection with its continued operation of Sanchez Adobe Museum, 946 North Adobe Avenue, Montebello, California 90640, the "Property". It is our understanding that the primary interest of the Client is to locate and evaluate materials and building system defects that might significantly affect the value of the property and to determine if the present Property has conditions that will have a significant impact on its continued operations.

The conclusions and recommendations presented in this report are based on the brief review of the plans and records made available to our Project Manager during the site visit, interviews of available property management personnel and maintenance contractors familiar with the Property, appropriate inquiry of municipal authorities, our Project Manager's walk-through observations during the site visit, and our experience with similar properties.

No testing, exploratory probing, dismantling or operating of equipment or in-depth studies were performed unless specifically required under the *Purpose and Scope* section of this report. This assessment did not include engineering calculations to determine the adequacy of the Property's original design or existing systems. Although walk-through observations were performed, not all areas may have been observed (see Section 1 for specific details). There may be defects in the Property, which were in areas not observed or readily accessible, may not have been visible, or were not disclosed by management personnel when questioned. The report describes property conditions at the time that the observations and research were conducted.

This report has been prepared on behalf of and exclusively for the use of the Client for the purpose stated within the *Purpose and Scope* section of this report. The report, or any excerpt thereof, shall not be used by any party other than the Client or for any other purpose than that specifically stated in our agreement or within the *Purpose and Scope* section of this report without the express written consent of Bureau Veritas.

Any reuse or distribution of this report without such consent shall be at the Client and the recipient's sole risk, without liability to Bureau Veritas.

Property Overview and Assessment Details

General Information	
Property Type	Public Park
Main Address	1060 South Greenwood Avenue, Montebello, California 90640
Site Developed	1960s
Site Area	6.55 acres
Parking Spaces	50 total spaces in an open lot; 4 of which are accessible
Building Area	1,300 SF, Concession Stand (Storage) 1,400 SF, Pool House (Office) 350 SF, Pool Equipment room 750 SF, Restroom Building
Number of Stories	1- Concession Stand (Storage) 1- Pool House 1- Restroom Building
Outside Occupants / Leased Spaces	None
Date(s) of Visit	April 17, 2020
Management Point of Contact	City of Montebello/Park, Recreation and Community Services, David Sosnowski, Director 323.887.4588 phone dsosnowski@cityofmentebello.com email
On-site Point of Contact (POC)	Steve Zaragoza
Assessment and Report Prepared By	Mouaz Alrayes

Significant/Systemic Findings and Deficiencies

Historical Summary

Chet Holifield Park was originally constructed in the 1960's. The Restroom Building, Pool House, Concession Stand, the Scout House, and Rangers Office buildings appear to be original.

According to the POC, the Scout House and Rangers Office buildings are scheduled to be demolished over the next few months. They were inaccessible and they will not be included in this report although some assets are included in AssetCALC for reference.

Architectural

The Concession Stand, the Restroom Building, and the Pool House are constructed of concrete masonry units on a concrete slab floor with a heavy timber framed roof. They have not been renovated in the recent years. The Pool House restrooms were not accessible as their metal doors were bolted shut due to the Corona (Covid-19) virus shut-down.

The Rangers Office building consist of wood frame construction on concrete slabs with integral footings. And the Scout House is constructed of bricks on a concrete slab floor with a heavy timber framed roof.

In general, the structures appear to be sound, with no significant areas of settlement or structural-related deficiencies observed.

Mechanical, Electrical, Plumbing and Fire (MEPF)

Heating and cooling are not provided for any of the buildings within the park boundaries. Only the park Ranger Office building has a condensing unit along its exterior wall, but the building interior was inaccessible.

The plumbing system at the Restroom Building and Pool House building are original and will need replacement during the assessment period. Hot water is not provided. Plumbing fixtures in the Restroom Building are reaching the end of their lifecycle and need replacement.

The electrical system and lighting fixtures in the Restroom Building and the Pool House building are reaching the end of their lifecycle and need replacement. The interior light fixtures in the Concession Stand building were recently upgraded to LED.

None of the buildings are provided with a fire alarm system or fire suppression system.

Site

In general, the site has been well maintained. The site contains moderate landscaping, which is served by in-ground irrigation systems. There are two playgrounds on site, both in a fair condition. The concrete sidewalk is in fair overall condition with the exception of an area between the Pool Equipment Building and the picnic shelter which require some repairs.

The asphalt paved parking lot is shared with the public library, the community center, and the park. The parking lot asphalt pavement is weathered throughout the lot with isolated areas of significant deterioration and in a poor overall condition. The site lighting is aged, and it is recommended that the system be upgraded to LED fixtures to improve energy efficiency.

Recommended Additional Studies

The parking lot, the Pool House, the playgrounds, and the picnic tables throughout the park are not fully accessible. Bureau Veritas recommends a study be performed to take measurements, provide additional itemized details, research local requirements, and, if necessary, estimate the scope and cost of any required improvements. The cost of this study is included in the cost tables. Due to the lack of measurements and itemized findings at this point in time, the costs for any possible subsequent repairs or improvements are not currently included.

Facility Condition Index (FCI)

One of the major goals of the FCA is to calculate each building's Facility Condition Index (FCI), which provides a theoretical objective indication of a building's overall condition. By definition, the FCI is defined as the ratio of the cost of current needs divided by current replacement value (CRV) of the facility. The chart below presents the industry standard ranges and cut-off points.

FCI Ranges and Description	
0 – 5%	In new or well-maintained condition, with little or no visual evidence of wear or deficiencies.
5 – 10%	Subjected to wear but is still in a serviceable and functioning condition.
10 – 30%	Subjected to hard or long-term wear. Nearing the end of its useful or serviceable life.
30% and above	Has reached the end of its useful or serviceable life. Renewal is now necessary.

The deficiencies and lifecycle needs identified in this assessment provide the basis for a portfolio-wide capital improvement funding strategy. In addition to the current FCI, extended FCI's have been developed to provide owners the intelligence needed to plan and budget for the "keep-up costs" for their facilities. As such the 3-year, 5-year, and 10-year FCI's are calculated by dividing the anticipated needs of those respective time periods by current replacement value. As a final point, the FCI's ultimately provide more value when used to relatively compare facilities across a portfolio instead of being over-analyzed and scrutinized as stand-alone values. The table below summarizes the individual findings for this FCA:

FCI Analysis

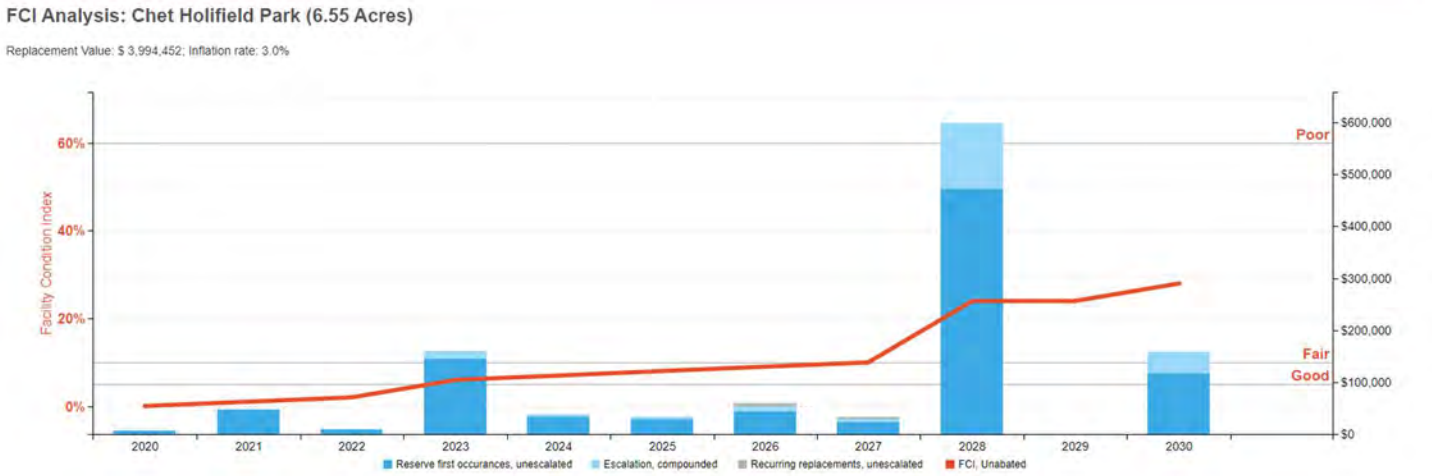
FCI Analysis | Chet Holifield Park (6.55 Acres)

Replacement Value	*Total SF*	*Cost/SF*
$ 3,994,500	*285,318*	*$ 14*

Current FCI	$ 8,300	0.2 %
3-Year	$ 228,100	5.7 %
5-Year	$ 300,200	7.5 %
10-Year	$ 1,136,700	28.5 %

The orange line in the graph below forecasts what would happen to the FCI (left Y axis) over time, assuming zero capital expenditures. The capital expenditures allocated for each year (blue bars) are associated with the dollar amounts along the right Y axis.

Needs by Year with Unaddressed FCI Over Time



Immediate Needs

Facility/Building	Total Items	Total Cost
Chet Holifield Park (6.55 Acres)	1	$8,235
Total	**1**	**$8,235**

Key Findings

Parking Lots in Poor condition.

Asphalt Pavement
Site Parking lot

Uniformat Code: G2022
Recommendation: **Overlay in 2021**

Priority Score: **87.0**

Plan Type:
Performance/Integrity

Cost Estimate: $35,900

**$$**$$

Heavy weathering and alligator cracks all over the parking lot. - AssetCALC ID: 1821272

Parking Lots in Poor condition.

Asphalt Pavement
Site Parking lot

Uniformat Code: G2022
Recommendation: **Seal & Stripe in 2021**

Priority Score: **87.0**

Plan Type:
Performance/Integrity

Cost Estimate: $8,100

**$**$$$

Heavy weathering and alligator cracks all over the parking lot. - AssetCALC ID: 1821267

Drinking Fountain in Poor condition.

Outside/Site Style
Site Picnic Shelter

Uniformat Code: D2018
Recommendation: **Replace in 2021**

Priority Score: **84.0**

Plan Type:
Performance/Integrity

Cost Estimate: $4,000

**$**$$$

Broken - water dispenser does not exist. - AssetCALC ID: 1821319

Dumpster Accessories in Fair condition.

Enclosures, Concrete Block (CMU), 8' High
Site

Uniformat Code: G2049
Recommendation: **Replace/Install in 2045**

Priority Score: **56.9**

Plan Type:
Modernization/Adaptation

Cost Estimate: $3,500

**$**$$$

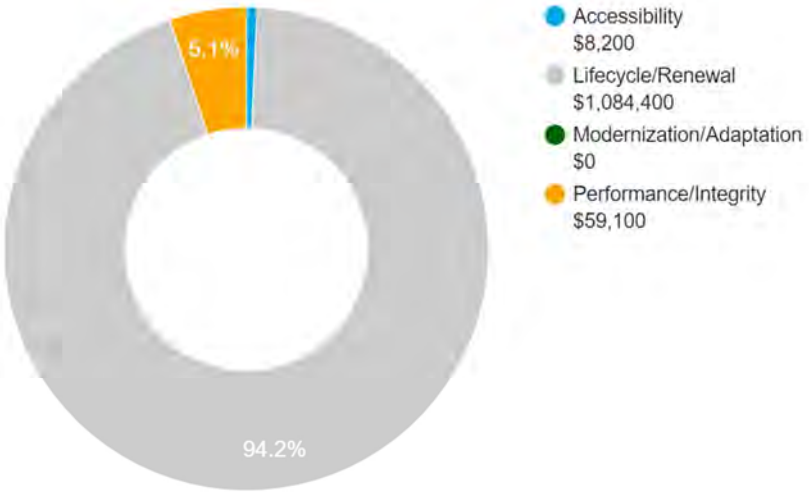
- AssetCALC ID: 1821337

Plan Types

Each line item in the cost database is assigned a Plan Type, which is the primary reason or rationale for the recommended replacement, repair, or other corrective action. This is the "why" part of the equation. A cost or line item may commonly have more than one applicable Plan Type; however, only one Plan Type will be assigned based on the "best" fit, typically the one with the greatest significance.

Plan Type Descriptions		
Safety	■	An observed or reported unsafe condition that if left unaddressed could result in injury; a system or component that presents potential liability risk.
Performance/Integrity	■	Component or system has failed, is almost failing, performs unreliably, does not perform as intended, and/or poses risk to overall system stability.
Accessibility	■	Does not meet ADA, UFAS, and/or other handicap accessibility requirements.
Environmental	■	Improvements to air or water quality, including removal of hazardous materials from the building or site.
Retrofit/Adaptation	■	Components, systems, or spaces recommended for upgrades in in order to meet current standards, facility usage, or client/occupant needs.
Lifecycle/Renewal	■	Any component or system that is not currently deficient or problematic but for which future replacement or repair is anticipated and budgeted.

Plan Type Distribution (by Cost)



10-YEAR TOTAL: $1,151,700

2. Concession Stand Building

Concession Stand Building: Systems Summary

Address	1060 South Greenwood Avenue, Montebello	
Constructed/Renovated	1960's	
Building Size	1,300 SF	
Number of Stories	1	
System	*Description*	*Condition*
Structure	Masonry bearing walls and wood-framed roofs	Good
Façade	Painted CMU with aluminum windows	Fair
Roof	Gable construction with asphalt shingles	Fair
Interiors	Walls: Painted CMU Floors: VCT Ceilings: Painted gypsum board	Fair
Elevators	None	--
Plumbing	Copper supply and cast-iron waste & venting	Fair
HVAC	None	--

Concession Stand Building: Systems Summary

Fire Suppression	None	--
Electrical	Source & Distribution: Main panel with copper wiring Interior Lighting: LED Emergency: None	Fair
Fire Alarm	None	--
Equipment/Special	None	--
Accessibility	Presently it does not appear an accessibility study is needed for this property.	
Key Issues and Findings	None	

Concession Stand Building: Systems Expenditure Forecast

6. Property Space Use and Observed Areas

Unit Allocation

All 6.55 acres of the property are occupied by the City of Montebello. The spaces are mostly public park with supporting restrooms building, a community center, basketball court and a softball field.

Areas Observed

The interior spaces were observed in order to gain a clear understanding of the property's overall condition. The restrooms at the Pool House building and the Scout House and Rangers office were not accessible. Other areas accessed included the site within the property boundaries, the exterior of the property.

Key Spaces Not Observed

Areas of note that were either inaccessible or not observed for other reasons are listed here:

- Pool House building restroom, bolted metal doors
- Scout House & Rangers Office, Down unit or area

7. ADA Accessibility

Generally, Title II of the Americans with Disabilities Act (ADA) prohibits discrimination by entities to access and use of "areas of public accommodations" and "public facilities" on the basis of disability. Regardless of their age, these areas and facilities must be maintained and operated to comply with the Americans with Disabilities Act Accessibility Guidelines (ADAAG).

A public entity (i.e. city governments) shall operate each service, program, or activity so that the service, program, or activity, when viewed in its entirety, is readily accessible to and usable by individuals with disabilities.

However, this does not:

1. Necessarily require a public entity to make each of its existing facilities accessible to and usable by individuals with disabilities;
2. Require a public entity to take any action that would threaten or destroy the historic significance of an historic property; or
3. Require a public entity to take any action that it can demonstrate would result in a fundamental alteration in the nature of a service, program, or activity or in undue financial and administrative burdens. In those circumstances where personnel of the public entity believe that the proposed action would fundamentally alter the service, program, or activity or would result in undue financial and administrative burdens, a public entity has the burden of proving that compliance with 35.150(a) of this part would result in such alteration or burdens. The decision that compliance would result in such alteration or burdens must be made by the head of a public entity or his or her designee after considering all resources available for use in the funding and operation of the service, program, or activity, and must be accompanied by a written statement of the reasons for reaching that conclusion. If an action would result in such an alteration or such burdens, a public entity shall take any other action that would not result in such an alteration or such burdens but would nevertheless ensure that individuals with disabilities receive the benefits or services provided by the public entity.

During the FCA, Bureau Veritas performed a limited high-level accessibility review of the facility non-specific to any local regulations or codes. The scope of the visual observation was limited to those areas and categories set forth in the tables throughout this report. It is understood by the Client that the limited observations described herein do not comprise a full ADA Compliance Survey, and that such a survey is beyond the scope of Bureau Veritas's undertaking. Only a representative sample of areas was observed and actual measurements were not taken to verify compliance.

The facility was originally constructed in 1960s. The facility was not subsequently renovated.

A full ADA Compliance Survey has been previously performed for the following park locations at the site. ; Park Restroom, Park Picnic Shelter, and Park Pool Building.

The accessibility study was completed in 2015. The associated recommendations have been partially addressed.

Removal of barriers to accessibility should be addressed from a liability standpoint in order to comply with federal law, but the barriers may or may not be building code violations. The Americans with Disabilities Act Accessibility Guidelines are part of the ADA federal civil rights law pertaining to the disabled and are not a construction code. State and local jurisdictions have adopted the ADA Guidelines or have adopted other standards for accessibility as part of their construction codes.

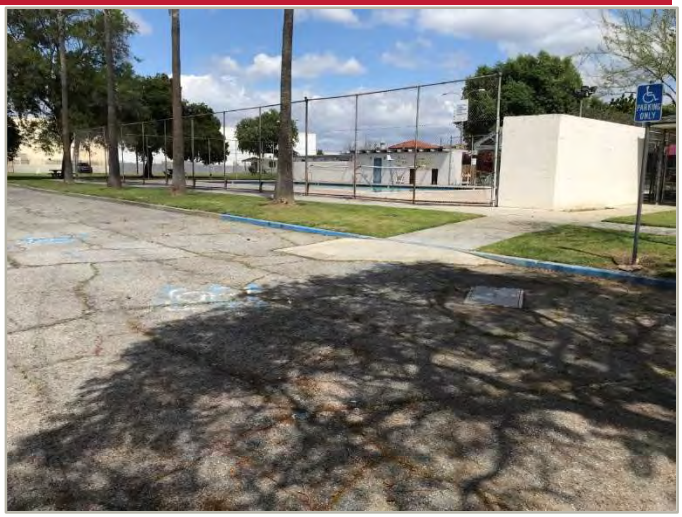
Campus Accessibility: Photographic Overview

Parking Lot



Parking Lot

Picnic Table

BBQ Grill

Playground

Restrooms

Drinking Fountain

Restrooms

The table below is intended to be used as a general reference guide to help differentiate the orders of magnitude between some of the more commonly observed accessibility issues. The table is not intended to be all-inclusive, and boxes checked in the tables above do not necessarily mean those specific problems or shortcomings cited as examples below exist at the subject buildings and sites. Reference the photos above and/or *Key Findings* section for visuals and/or more specifics about the subject site conditions.

Reference Guide

	Major Issues *(ADA study recommended)*	Moderate Issues *(ADA study recommended)*	Minor/No Issues
Parking	- Needs full reconstruction - Excessive slopes over 3% require major re-grading - No level locations to add required spaces	- No or non-compliant curb cuts - Moderate difficulty to add required accessible spaces - Slopes close to compliant	- Painting of markings needed - Signage height non-compliant - Signage missing
Exterior Path of Travel	- Large areas of sidewalks with excessive slopes - No ramp when needed - Ramps with excessive slopes	- Ramps need rails - Ramps need rail extensions - Need significant # of lever handles - All or most entrance door exterior maneuvering clearance areas with excessive slopes	- One entrance door exterior maneuvering clearance area with excessive slope - A few doorknobs instead of lever handles - Non-compliant signage
Interior Path of Travel	- All or most interior doors appear less than 32” wide - Corridors less than 36” wide - No ramp when needed - Ramps with excessive slopes - Non-compliant treads/risers at means of egress stairways	- Single height drinking fountains - Drinking fountain too high or protrudes into accessible route - Ramps need rails - Ramps need rail extensions - Need significant # of lever handles - Non-compliant rail extensions at egress stairways - All/most door thresholds high	- One door threshold too high - A few doorknobs instead of lever handles - Non-compliant door pressures - Non-compliant signage - Switches not within reach range

Reference Guide

	Major Issues *(ADA study recommended)*	Moderate Issues *(ADA study recommended)*	Minor/No Issues
Public Use Restrooms	- No ADA RR on each accessible floor - Restroom(s) too small - Entire restroom(s) requires renovation - Water closet clearance requires moving walls	- Interior doors appear less than 32” wide - Missing or non-compliant grab bars - Easily fixable clearance issues	- Minor height adjustments required - Non-compliant door pressures - Missing a visual strobe (only required if audible fire alarm already present) - Missing lavatory pipe wraps - Signage not compliant
Elevators	- No elevator present when required - Elevator cab too small	- Panel control buttons not at compliant height - No hands-free emergency communication system - Elevator only has mechanical stops	- Audible/visual signals at every floor may be lacking - Minor signage / Braille issues
Kitchens/Kitchenettes	- Clear space for each appliance not present - Clearance between opposing counters too narrow	- Sink and counter too high - Sink knee and toe clearance not provided where required (built-in) - Less than 50% of cabinetry within reach range	- Dispensers not within reach range - Switches not within reach range - Missing sink pipe wraps if knee and toe clearance required

8. Purpose and Scope

Purpose

Bureau Veritas was retained by the client to render an opinion as to the Property's current general physical condition on the day of the site visit.

Based on the observations, interviews and document review outlined below, this report identifies significant deferred maintenance issues, existing deficiencies, and material code violations of record, which affect the Property's use. Opinions are rendered as to its structural integrity, building system condition and the Property's overall condition. The report also notes building systems or components that have realized or exceeded their typical expected useful lives.

The physical condition of building systems and related components are typically defined as being in one of five condition ratings. For the purposes of this report, the following definitions are used:

Condition Ratings	
Excellent	New or very close to new; component or system typically has been installed within the past year, sound and performing its function. Eventual repair or replacement will be required when the component or system either reaches the end of its useful life or fails in service.
Good	Satisfactory as-is. Component or system is sound and performing its function, typically within the first third of its lifecycle. However, it may show minor signs of normal wear and tear. Repair or replacement will be required when the component or system either reaches the end of its useful life or fails in service.
Fair	Showing signs of wear and use but still satisfactory as-is, typically near the median of its estimated useful life. Component or system is performing adequately at this time but may exhibit some signs of wear, deferred maintenance, or evidence of previous repairs. Repair or replacement will be required due to the component or system's condition and/or its estimated remaining useful life.
Poor	Component or system is significantly aged, flawed, functioning intermittently or unreliably; displays obvious signs of deferred maintenance; shows evidence of previous repair or workmanship not in compliance with commonly accepted standards; has become obsolete; or exhibits an inherent deficiency. The present condition could contribute to or cause the deterioration of contiguous elements or systems. Either full component replacement is needed or repairs are required to restore to good condition, prevent premature failure, and/or prolong useful life.
Failed	Component or system has ceased functioning or performing as intended. Replacement, repair, or other significant corrective action is recommended or required.
Not Applicable	Assigning a condition does not apply or make logical sense, most commonly due to the item in question not being present.

Scope

The standard scope of the Facility Condition Assessment includes the following:

- Visit the Property to evaluate the general condition of the building and site improvements, review available construction documents in order to familiarize ourselves with, and be able to comment on, the in-place construction systems, life safety, mechanical, electrical, and plumbing systems, and the general built environment.
- Identify those components that are exhibiting deferred maintenance issues and provide cost estimates for Immediate Costs and Replacement Reserves based on observed conditions, maintenance history and industry standard useful life estimates. This will include the review of documented capital improvements completed within the last five-year period and work currently contracted for, if applicable.
- Provide a full description of the Property with descriptions of in-place systems and commentary on observed conditions.
- Provide a high-level categorical general statement regarding the subject Property's compliance to Title III of the Americans with Disabilities Act. This will not constitute a full ADA survey, but will help identify exposure to issues and the need for further review.
- Obtain background and historical information about the facility from a building engineer, property manager, maintenance staff, or other knowledgeable source. The preferred methodology is to have the client representative or building occupant complete a Pre-Survey Questionnaire (PSQ) in advance of the site visit. Common alternatives include a verbal interview just prior to or during the walk-through portion of the assessment.
- Review maintenance records and procedures with the in-place maintenance personnel.
- Observe a representative sample of the interior spaces/units, including vacant spaces/units, to gain a clear understanding of the property's overall condition. Other areas to be observed include the exterior of the property, the roofs, interior common areas, and the significant mechanical, electrical and elevator equipment rooms.
- Provide recommendations for additional studies, if required, with related budgetary information.
- Provide an Executive Summary at the beginning of this report, which highlights key findings and includes a Facility Condition Index as a basis for comparing the relative conditions of the buildings within the portfolio.

9. Opinions of Probable Costs

Cost estimates are attached throughout this report, with the Replacement Reserves in the appendix.

These estimates are based on Invoice or Bid Document/s provided either by the Owner/facility and construction costs developed by construction resources such as *R.S. Means, CBRE Whitestone,* and *Marshall & Swift,* Bureau Veritas's experience with past costs for similar properties, city cost indexes, and assumptions regarding future economic conditions.

Opinions of probable costs should only be construed as preliminary, order of magnitude budgets. Actual costs most probably will vary from the consultant's opinions of probable costs depending on such matters as type and design of suggested remedy, quality of materials and installation, manufacturer and type of equipment or system selected, field conditions, whether a physical deficiency is repaired or replaced in whole, phasing or bundling of the work (if applicable), quality of contractor, quality of project management exercised, market conditions, use of subcontractors, and whether competitive pricing is solicited, etc. Certain opinions of probable costs cannot be developed within the scope of this guide without further study. Opinions of probable cost for further study should be included in the FCA.

Methodology

Based upon site observations, research, and judgment, along with referencing Expected Useful Life (EUL) tables from various industry sources, Bureau Veritas opines as to when a system or component will most probably necessitate replacement. Accurate historical replacement records, if provided, are typically the best source of information. Exposure to the elements, initial quality and installation, extent of use, the quality and amount of preventive maintenance exercised, etc., are all factors that impact the effective age of a system or component. As a result, a system or component may have an effective age that is greater or less than its actual chronological age. The Remaining Useful Life (RUL) of a component or system equals the EUL less its *effective age*, whether explicitly or implicitly stated. Projections of Remaining Useful Life (RUL) are based primarily on age and condition with the presumption of continued use and maintenance of the Property similar to the observed and reported past use and maintenance practices, in conjunction with the professional judgment of Bureau Veritas's assessors. Significant changes in occupants and/or usage may affect the service life of some systems or components.

Where quantities could not be or were not derived from an actual construction document take-off or facility walk-through, and/or where systemic costs are more applicable or provide more intrinsic value, budgetary square foot and gross square foot costs are used. Estimated costs are based on professional judgment and the probable or actual extent of the observed defect, inclusive of the cost to design, procure, construct and manage the corrections.

Definitions

Immediate Needs

Immediate Needs are line items that require immediate action as a result of: (1) material existing or potential unsafe conditions, (2) failed or imminent failure of mission critical building systems or components, or (3) conditions that, if not addressed, have the potential to result in, or contribute to, critical element or system failure within one year or will most probably result in a significant escalation of its remedial cost.

For database and reporting purposes the line items with RUL=0, and commonly associated with *Safety* or *Performance/Integrity* Plan Types, are considered Immediate Needs.

Replacement Reserves

Cost line items traditionally called Replacement Reserves (equivalently referred to as Lifecycle/Renewals) are for recurring probable renewals or expenditures, which are not classified as operation or maintenance expenses. The replacement reserves should be budgeted for in advance on an annual basis. Replacement Reserves are reasonably predictable both in terms of frequency and cost. However, Replacement Reserves may also include components or systems that have an indeterminable life but, nonetheless, have a potential for failure within an estimated time period.

Replacement Reserves generally exclude systems or components that are estimated to expire after the reserve term and are not considered material to the structural and mechanical integrity of the subject property. Furthermore, systems and components that are not deemed to have a material effect on the use of the Property are also excluded. Costs that are caused by acts of God, accidents, or other occurrences that are typically covered by insurance, rather than reserved for, are also excluded.

Replacement costs are solicited from ownership/property management, Bureau Veritas's discussions with service companies, manufacturers' representatives, and previous experience in preparing such schedules for other similar facilities. Costs for work performed by the ownership's or property management's maintenance staff are also considered.

Bureau Veritas's reserve methodology involves identification and quantification of those systems or components requiring capital reserve funds within the assessment period. The assessment period is defined as the effective age plus the reserve term. Additional information concerning system's or component's respective replacement costs (in today's dollars), typical expected useful lives, and remaining useful lives were estimated so that a funding schedule could be prepared. The Replacement Reserves Schedule presupposes that all required remedial work has been performed or that monies for remediation have been budgeted for items defined as Immediate Needs.

For the purposes of 'bucketizing' the System Expenditure Forecasts in this report, the Replacement Reserves have been subdivided and grouped as follows: Short Term (years 1-3), Near Term (years 4-5), Medium Term (years 6-10), and Long Term (years 11-20).

Key Findings

In an effort to highlight the most significant cost items and not be overwhelmed by the Replacement Reserves report in its totality, a subsection of Key Findings is included within the Executive Summary section of this report. Key Findings typically include repairs or replacements of deficient items within the first five-year window, as well as the most significant high-dollar line items that fall anywhere within the ten-year term. Note that while there is some subjectivity associated with identifying the Key Findings, the Immediate Needs are always included as a subset.

Exceedingly Aged

A fairly common scenario encountered during the assessment process, and a frequent source of debate, occurs when classifying and describing "very old" systems or components that are still functioning adequately and do not appear nor were reported to be in any way deficient. To help provide some additional intelligence on these items, such components will be tagged in the database as Exceedingly Aged. This designation will be reserved for mechanical or electrical systems or components that have aged well beyond their industry standard lifecycles, typically at least 15 years beyond and/or twice their Estimated Useful Life (EUL). In tandem with this designation, these items will be assigned a Remaining Useful Life (RUL) not less than two years but not greater than 1/3 of their standard EUL. As such the recommended replacement time for these components will reside outside the typical Short Term window but will not be pushed 'irresponsibly' (too far) into the future.

10. Certification

City of Montebello (the Client) retained Bureau Veritas to perform this Facility Condition Assessment in connection with its continued operation of Chet Holifield Park, 1060 South Greenwood Avenue, Montebello, California 90640, the "Property". It is our understanding that the primary interest of the Client is to locate and evaluate materials and building system defects that might significantly affect the value of the property and to determine if the present Property has conditions that will have a significant impact on its continued operations.
The conclusions and recommendations presented in this report are based on the brief review of the plans and records made available to our Project Manager during the site visit, interviews of available property management personnel and maintenance contractors familiar with the Property, appropriate inquiry of municipal authorities, our Project Manager's walk-through observations during the site visit, and our experience with similar properties.

No testing, exploratory probing, dismantling or operating of equipment or in-depth studies were performed unless specifically required under the *Purpose and Scope* section of this report. This assessment did not include engineering calculations to determine the adequacy of the Property's original design or existing systems. Although walk-through observations were performed, not all areas may have been observed (see Section 1 for specific details). There may be defects in the Property, which were in areas not observed or readily accessible, may not have been visible, or were not disclosed by management personnel when questioned. The report describes property conditions at the time that the observations and research were conducted.

This report has been prepared on behalf of and exclusively for the use of the Client for the purpose stated within the *Purpose and Scope* section of this report. The report, or any excerpt thereof, shall not be used by any party other than the Client or for any other purpose than that specifically stated in our agreement or within the *Purpose and Scope* section of this report without the express written consent of Bureau Veritas.

Any reuse or distribution of this report without such consent shall be at the Client and the recipient's sole risk, without liability to Bureau Veritas.

Property Overview and Assessment Details

General Information	
Property Type	Public Park
Main Address	8051 Arroyo Drive, Montebello, California 90640
Site Developed	1976 Renovated 2012
Site Area	6.78 acres (estimated)
Parking Spaces	21 total spaces all in open lots; 2 of which are accessible
Building Area	1,300 SF, Recreation/Restroom Building
Number of Stories	One
Outside Occupants	None
Date(s) of Visit	April 23, 2020
Management Point of Contact	City of Montebello/Park, Recreation and Community Services, David Sosnowski, Director 323.887.4588 phone dsosnowski@cityofmentebello.com email
On-site Point of Contact (POC)	Steve Zaragoza
Assessment and Report Prepared By	Jonathan Levine

Significant/Systemic Findings and Deficiencies

Historical Summary

Potrero Heights Park was originally built in 1976. The recreation/restroom facility was constructed at the same time. The park and facility were renovated in 2012. The neighboring Senior Center, to the south west, and baseball field, to the north, are maintained by the County and were out of scope for this assessment.

Architectural

The recreation/restroom facility consists of a concrete masonry unit structure on a concrete slab with a wood framed roof. The exterior façade consists of painted CMU with steel windows. Exterior doors are metal entry doors for the recreation room and iron gates for the restrooms. The recreation room roof is of pyramid construction with asphalt shingles and the restroom roof is a flat construction with a modified bituminous finish. Typical lifecycle-based interior and exterior finish replacements are budgeted and anticipated.

Mechanical, Electrical, Plumbing and Fire (MEPF)

The recreation room is heated and cooled by an electric furnace located in the furnace closet. No heating or cooling is provided to the restroom portion of the building.

The plumbing systems are adequate for the facility and no major piping issues were found. Domestic hot water is provided by an electric water heater located in the mechanical room. There was no evidence suggesting any problems with the general plumbing and sewage systems.

The building is served by a main distribution panel located in the mechanical room. The panel appears to be original and will require lifecycle replacement. Interior lighting consists of LED light fixtures.

The building is not protected by a fire alarm nor sprinkler suppression system. It is recommended an alarm system be installed for safety systems modernization.

Site

The site consists of the park, the recreation/restroom facility, concrete sidewalks/walkways, and an asphalt parking lot. In general, the site appears to be well maintained. The park contains grass and trees, play structures, benches and tables, gazebos, and barbecue grills. An irrigation serves the landscaping features. The parking lot asphalt pavement sealing and striping is worn and should be replaced. A portion of the pedestrian concrete pavement near the recreation/restroom building requires joint caulking. Site lighting consists of building mounted and scattered pole fixtures.

Recommended Additional Studies

Some areas of the facility were identified as having major or moderate accessibility issues. Bureau Veritas recommends a study be performed to take measurements, provide additional itemized details, research local requirements, and, if necessary, estimate the scope and cost of any required improvements. The cost of this study is included in the cost tables. Due to the lack of measurements and itemized findings at this point in time, the costs for any possible subsequent repairs or improvements are not currently included.

Park Amenities Observed

Facility Condition Index (FCI)

One of the major goals of the FCA is to calculate each building's Facility Condition Index (FCI), which provides a theoretical objective indication of a building's overall condition. By definition, the FCI is defined as the ratio of the cost of current needs divided by current replacement value (CRV) of the facility. The chart below presents the industry standard ranges and cut-off points.

FCI Ranges and Description	
0 – 5%	In new or well-maintained condition, with little or no visual evidence of wear or deficiencies.
5 – 10%	Subjected to wear but is still in a serviceable and functioning condition.
10 – 30%	Subjected to hard or long-term wear. Nearing the end of its useful or serviceable life.
30% and above	Has reached the end of its useful or serviceable life. Renewal is now necessary.

The deficiencies and lifecycle needs identified in this assessment provide the basis for a portfolio-wide capital improvement funding strategy. In addition to the current FCI, extended FCI's have been developed to provide owners the intelligence needed to plan and budget for the "keep-up costs" for their facilities. As such the 3-year, 5-year, and 10-year FCI's are calculated by dividing the anticipated needs of those respective time periods by current replacement value. As a final point, the FCI's ultimately provide more value when used to relatively compare facilities across a portfolio instead of being over-analyzed and scrutinized as stand-alone values. The table below summarizes the individual findings for this FCA:

FCI Analysis

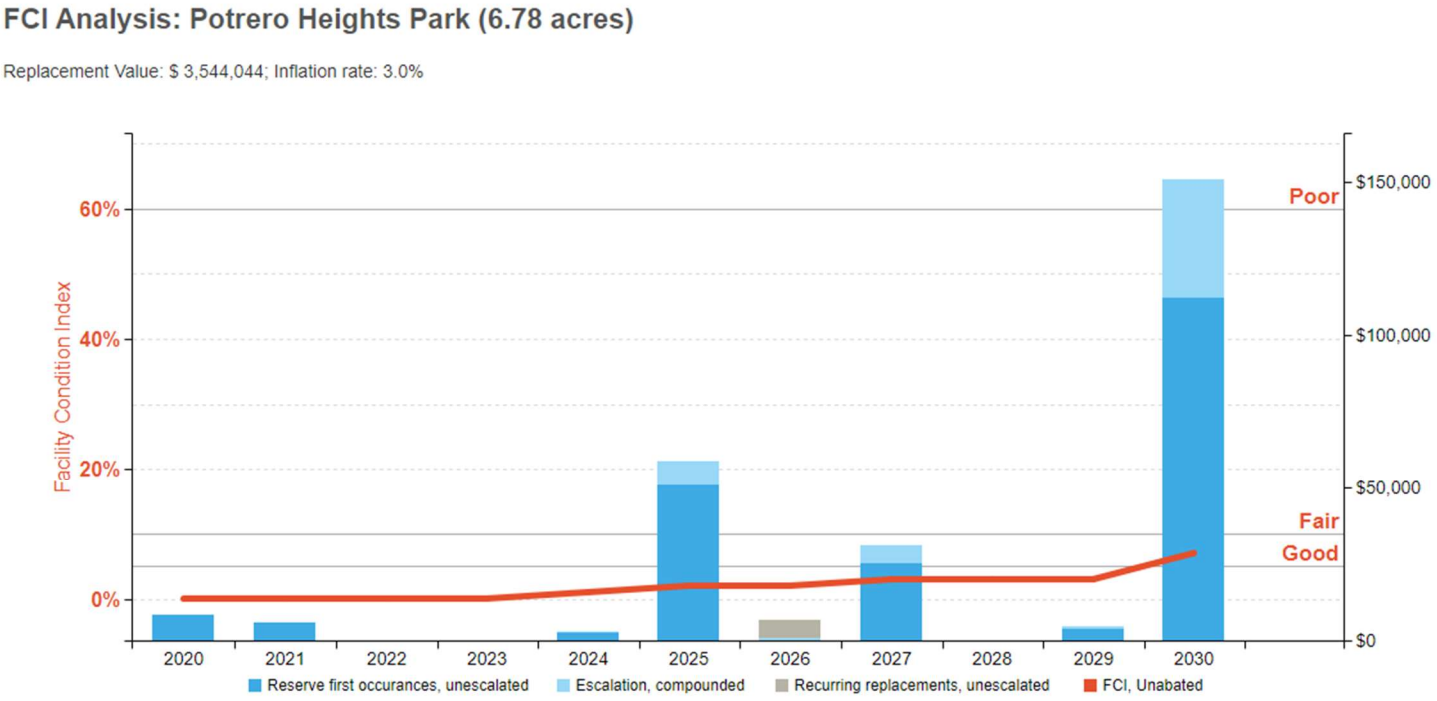
FCI Analysis | Potrero Heights Park (6.78 acres)

Replacement Value	*Total SF*	*Cost/SF*
$ 3,544,100	*295,337*	*$ 12*

Current FCI	$ 8,800	**0.2 %**
3-Year	$ 14,900	0.4 %
5-Year	$ 77,200	2.2 %
10-Year	$ 264,100	7.5 %

The orange line in the graph below forecasts what would happen to the FCI (left Y axis) over time, assuming zero capital expenditures. The capital expenditures allocated for each year (blue bars) are associated with the dollar amounts along the right Y axis.

Needs by Year with Unaddressed FCI Over Time



Immediate Needs

None

Key Findings

None

Plan Types

Each line item in the cost database is assigned a Plan Type, which is the primary reason or rationale for the recommended replacement, repair, or other corrective action. This is the “why” part of the equation. A cost or line item may commonly have more than one applicable Plan Type; however, only one Plan Type will be assigned based on the “best” fit, typically the one with the greatest significance.

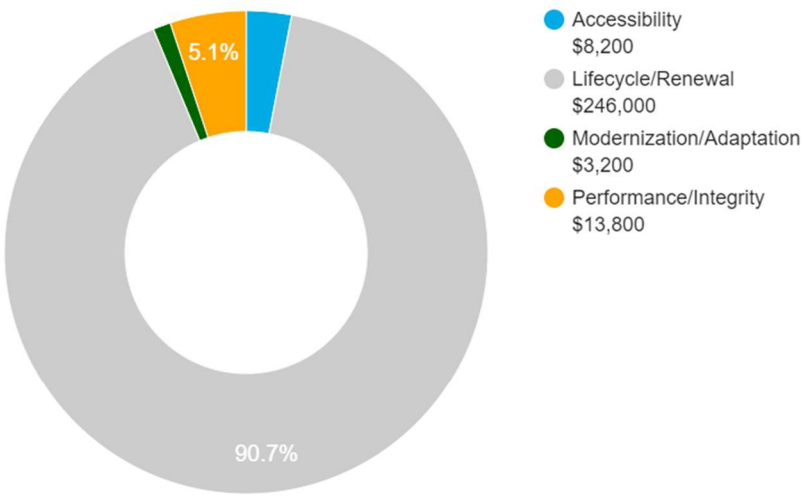
Plan Type Descriptions

Safety	■	An observed or reported unsafe condition that if left unaddressed could result in injury; a system or component that presents potential liability risk.

Plan Type Descriptions

Performance/Integrity	■	Component or system has failed, is almost failing, performs unreliably, does not perform as intended, and/or poses risk to overall system stability.
Accessibility	■	Does not meet ADA, UFAS, and/or other handicap accessibility requirements.
Environmental	■	Improvements to air or water quality, including removal of hazardous materials from the building or site.
Retrofit/Adaptation	■	Components, systems, or spaces recommended for upgrades in in order to meet current standards, facility usage, or client/occupant needs.
Lifecycle/Renewal	■	Any component or system that is not currently deficient or problematic but for which future replacement or repair is anticipated and budgeted.

Plan Type Distribution (by Cost)



10-YEAR TOTAL: $271,200

2. Building and Site Information

Systems Summary

System	*Description*	*Condition*
Structure	Masonry bearing walls and wood-framed roofs	Good
Façade	Painted CMU with steel windows	Fair
Roof	Primary: Pyramid construction with asphalt shingles Primary: Flat construction with modified bituminous finish	Fair
Interiors	Walls: Painted CMU, Unfinished Floors: VCT, Unfinished Ceilings: Wood, Unfinished/exposed	Fair
Elevators	None	--
Plumbing	Copper supply and cast iron waste & venting Electric water heater Toilets, urinals, and sinks in all restrooms	Fair
HVAC	Electric Furnace	Fair
Fire Suppression	None	--

Systems Summary

Electrical	Source & Distribution: Main panel with copper wiring Interior Lighting: LED	Fair
Fire Alarm	None	--
Equipment/Special	None	--
Site Pavement	Asphalt lots with concrete sidewalks, curbs, ramps, and stairs	Good
Site Development	Property entrance signage, CMU dumpster enclosures Playgrounds and site lights Heavily furnished park benches, picnic tables, grills, and trash receptacles	Good
Landscaping and Topography	Moderate landscaping features Irrigation present Severe site slopes along south boundary	Good
Utilities	Municipal water and sewer Local utility-provided electric	Good
Site Lighting	Pole-mounted: LED Building-mounted: LED	Good
Ancillary Structures	Gazebos	Good
Accessibility	Potential moderate/major issues have been identified at this property and a detailed accessibility study is recommended.	
Key Issues and Findings	Recreation/restroom building lacks fire alarm and suppression systems, asphalt parking lot pavement needs sealing and striping, pedestrian concrete pavement requires joint caulking	

Systems Expenditure Forecast

System Expenditure Forecast

System	Immediate	Short Term (1-3 yr)	Near Term (4-5 yr)	Med Term (6-10 yr)	Long Term (11-20 yr)	TOTAL
Structure	-	-	$800	-	$1,000	$1,800

Pavement	$500	$6,200	$53,900	$7,100	$17,900	$85,600
Landscaping	-	-	-	$150,800	-	$150,800
Accessibility	$8,200	-	-	-	-	$8,200
TOTALS	**$8,700**	**$6,200**	**$62,300**	**$194,000**	**$279,000**	**$550,100**

3. Property Space Use and Observed Areas

Unit Allocation

All 6.78 acres of the property are occupied by the City of Montebello/Parks, Recreation, and Community Services. The space is a public park with a supporting recreation/restroom facility.

Areas Observed

The interior spaces, the site within the property boundaries, and the exterior of the property were observed in order to gain a clear understanding of the property's overall condition.

Key Spaces Not Observed

Areas of note that were either inaccessible or not observed for other reasons are listed here:

- Roofs, Lack of ladder or other means of egress

4. ADA Accessibility

Generally, Title II of the Americans with Disabilities Act (ADA) prohibits discrimination by entities to access and use of "areas of public accommodations" and "public facilities" on the basis of disability. Regardless of their age, these areas and facilities must be maintained and operated to comply with the Americans with Disabilities Act Accessibility Guidelines (ADAAG).

A public entity (i.e. city governments) shall operate each service, program, or activity so that the service, program, or activity, when viewed in its entirety, is readily accessible to and usable by individuals with disabilities.

However, this does not:

1. Necessarily require a public entity to make each of its existing facilities accessible to and usable by individuals with disabilities;
2. Require a public entity to take any action that would threaten or destroy the historic significance of an historic property; or
3. Require a public entity to take any action that it can demonstrate would result in a fundamental alteration in the nature of a service, program, or activity or in undue financial and administrative burdens. In those circumstances where personnel of the public entity believe that the proposed action would fundamentally alter the service, program, or activity or would result in undue financial and administrative burdens, a public entity has the burden of proving that compliance with 35.150(a) of this part would result in such alteration or burdens. The decision that compliance would result in such alteration or burdens must be made by the head of a public entity or his or her designee after considering all resources available for use in the funding and operation of the service, program, or activity, and must be accompanied by a written statement of the reasons for reaching that conclusion. If an action would result in such an alteration or such burdens, a public entity shall take any other action that would not result in such an alteration or such burdens but would nevertheless ensure that individuals with disabilities receive the benefits or services provided by the public entity.

During the FCA, Bureau Veritas performed a limited high-level accessibility review of the facility non-specific to any local regulations or codes. The scope of the visual observation was limited to those areas and categories set forth in the tables throughout this report. It is understood by the Client that the limited observations described herein do not comprise a full ADA Compliance Survey, and that such a survey is beyond the scope of Bureau Veritas's undertaking. Only a representative sample of areas was observed and actual measurements were not taken to verify compliance.

The facility was originally constructed in 1976. The facility was significantly renovated in 2012. Complaints about accessibility issues have not been received by the property management. The property does not have associated prior litigation related to existing barriers or previously removed barriers.

An accessibility study has not been performed at the site. A comprehensive ADA Compliance Survey will reveal specific aspects of the property that are not in compliance. Since some areas or categories above were identified as having major or moderate associated issues, Bureau Veritas recommends such a study be performed to take measurements, provide additional itemized details, research local requirements, and, if necessary, estimate the scope and cost of any required improvements. The cost of this study is included in the cost tables. Due to the lack of measurements and itemized findings at this point in time, the costs for any possible subsequent repairs or improvements are not currently included.

Removal of barriers to accessibility should be addressed from a liability standpoint in order to comply with federal law, but the barriers may or may not be building code violations. The Americans with Disabilities Act Accessibility Guidelines are part of the ADA federal civil rights law pertaining to the disabled and are not a construction code. State and local jurisdictions have adopted the ADA Guidelines or have adopted other standards for accessibility as part of their construction codes.

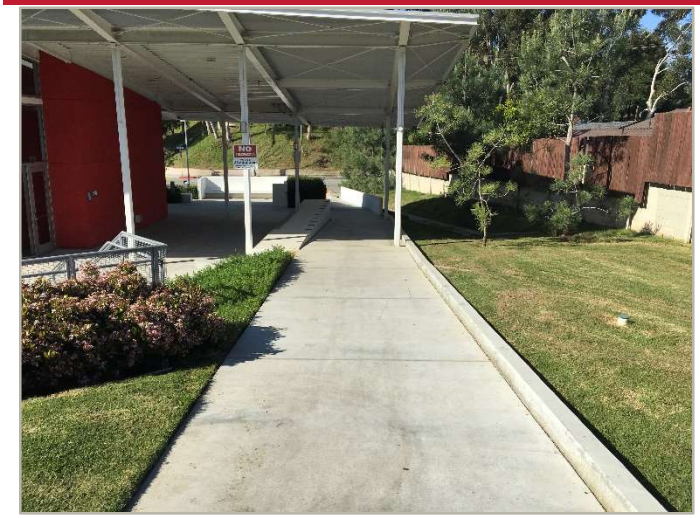
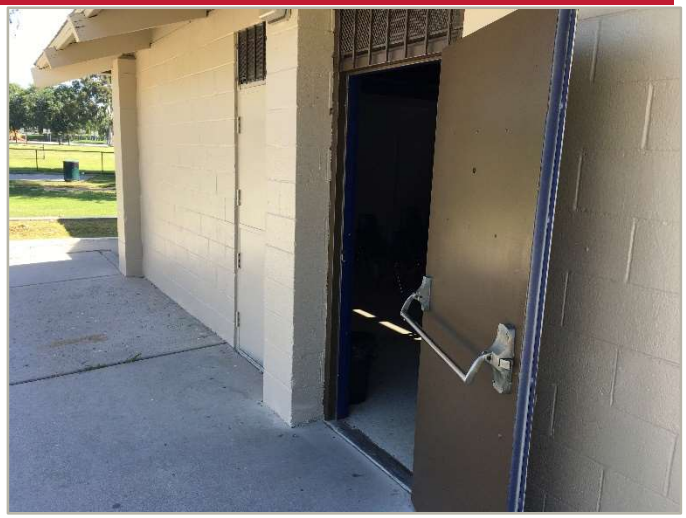
Campus Accessibility: Photographic Overview



Park entrance ramp

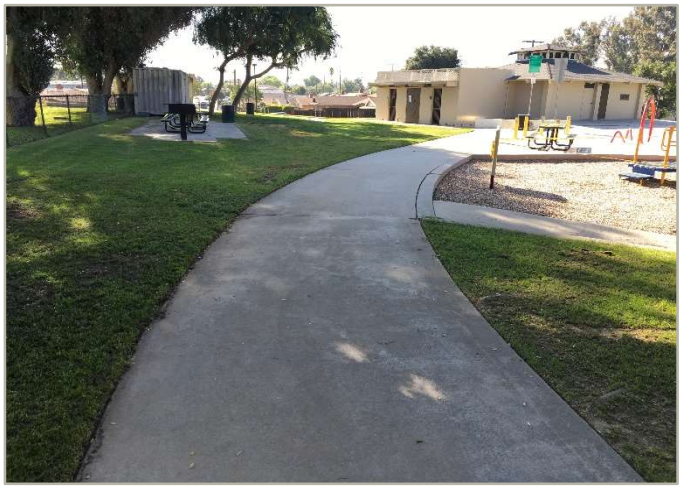


Accessible building entrance

Restroom

Playground

Accessible parking



Exterior path of travel

The table below is intended to be used as a general reference guide to help differentiate the orders of magnitude between some of the more commonly observed accessibility issues. The table is not intended to be all-inclusive, and boxes checked in the tables above do not necessarily mean those specific problems or shortcomings cited as examples below exist at the subject buildings and sites. Reference the photos above and/or *Key Findings* section for visuals and/or more specifics about the subject site conditions.

Reference Guide

	Major Issues *(ADA study recommended)*	Moderate Issues *(ADA study recommended)*	Minor/No Issues
Parking	- Needs full reconstruction - Excessive slopes over 3% require major re-grading - No level locations to add required spaces	- No or non-compliant curb cuts - Moderate difficulty to add required accessible spaces - Slopes close to compliant	- Painting of markings needed - Signage height non-compliant - Signage missing
Exterior Path of Travel	- Large areas of sidewalks with excessive slopes - No ramp when needed - Ramps with excessive slopes	- Ramps need rails - Ramps need rail extensions - Need significant # of lever handles - All or most entrance door exterior maneuvering clearance areas with excessive slopes	- One entrance door exterior maneuvering clearance area with excessive slope - A few door knobs instead of lever handles - Non-compliant signage
Interior Path of Travel	- All or most interior doors appear less than 32” wide - Corridors less than 36” wide - No ramp when needed - Ramps with excessive slopes - Non-compliant treads/risers at means of egress stairways	- Single height drinking fountains - Drinking fountain too high or protrudes into accessible route - Ramps need rails - Ramps need rail extensions - Need significant # of lever handles - Non-compliant rail extensions at egress stairways - All/most door thresholds high	- One door threshold too high - A few door knobs instead of lever handles - Non-compliant door pressures - Non-compliant signage - Switches not within reach range
Public Use Restrooms	- No ADA RR on each accessible floor - Restroom(s) too small - Entire restroom(s) requires renovation - Water closet clearance requires moving walls	- Interior doors appear less than 32” wide - Missing or non-compliant grab bars - Easily fixable clearance issues	- Minor height adjustments required - Non-compliant door pressures - Missing a visual strobe (only required if audible fire alarm already present) - Missing lavatory pipe wraps - Signage not compliant
Elevators	- No elevator present when required - Elevator cab too small	- Panel control buttons not at compliant height - No hands-free emergency communication system - Elevator only has mechanical stops	- Audible/visual signals at every floor may be lacking - Minor signage / Braille issues
Kitchens/Kitchenettes	- Clear space for each appliance not present - Clearance between opposing counters too narrow	- Sink and counter too high - Sink knee and toe clearance not provided where required (built-in) - Less than 50% of cabinetry within reach range	- Dispensers not within reach range - Switches not within reach range - Missing sink pipe wraps if knee and toe clearance required

5. Purpose and Scope

Purpose

Bureau Veritas was retained by the client to render an opinion as to the Property's current general physical condition on the day of the site visit.

Based on the observations, interviews and document review outlined below, this report identifies significant deferred maintenance issues, existing deficiencies, and material code violations of record, which affect the Property's use. Opinions are rendered as to its structural integrity, building system condition and the Property's overall condition. The report also notes building systems or components that have realized or exceeded their typical expected useful lives.

The physical condition of building systems and related components are typically defined as being in one of five condition ratings. For the purposes of this report, the following definitions are used:

Condition Ratings	
Excellent	New or very close to new; component or system typically has been installed within the past year, sound and performing its function. Eventual repair or replacement will be required when the component or system either reaches the end of its useful life or fails in service.
Good	Satisfactory as-is. Component or system is sound and performing its function, typically within the first third of its lifecycle. However, it may show minor signs of normal wear and tear. Repair or replacement will be required when the component or system either reaches the end of its useful life or fails in service.
Fair	Showing signs of wear and use but still satisfactory as-is, typically near the median of its estimated useful life. Component or system is performing adequately at this time but may exhibit some signs of wear, deferred maintenance, or evidence of previous repairs. Repair or replacement will be required due to the component or system's condition and/or its estimated remaining useful life.
Poor	Component or system is significantly aged, flawed, functioning intermittently or unreliably; displays obvious signs of deferred maintenance; shows evidence of previous repair or workmanship not in compliance with commonly accepted standards; has become obsolete; or exhibits an inherent deficiency. The present condition could contribute to or cause the deterioration of contiguous elements or systems. Either full component replacement is needed or repairs are required to restore to good condition, prevent premature failure, and/or prolong useful life.
Failed	Component or system has ceased functioning or performing as intended. Replacement, repair, or other significant corrective action is recommended or required.
Not Applicable	Assigning a condition does not apply or make logical sense, most commonly due to the item in question not being present.

Scope

The standard scope of the Facility Condition Assessment includes the following:

- Visit the Property to evaluate the general condition of the building and site improvements, review available construction documents in order to familiarize ourselves with, and be able to comment on, the in-place construction systems, life safety, mechanical, electrical, and plumbing systems, and the general built environment.
- Identify those components that are exhibiting deferred maintenance issues and provide cost estimates for Immediate Costs and Replacement Reserves based on observed conditions, maintenance history and industry standard useful life estimates. This will include the review of documented capital improvements completed within the last five-year period and work currently contracted for, if applicable.
- Provide a full description of the Property with descriptions of in-place systems and commentary on observed conditions.
- Provide a high-level categorical general statement regarding the subject Property's compliance to Title III of the Americans with Disabilities Act. This will not constitute a full ADA survey, but will help identify exposure to issues and the need for further review.
- Obtain background and historical information about the facility from a building engineer, property manager, maintenance staff, or other knowledgeable source. The preferred methodology is to have the client representative or building occupant complete a Pre-Survey Questionnaire (PSQ) in advance of the site visit. Common alternatives include a verbal interview just prior to or during the walk-through portion of the assessment.
- Review maintenance records and procedures with the in-place maintenance personnel.
- Observe a representative sample of the interior spaces/units, including vacant spaces/units, to gain a clear understanding of the property's overall condition. Other areas to be observed include the exterior of the property, the roofs, interior common areas, and the significant mechanical, electrical and elevator equipment rooms.
- Provide recommendations for additional studies, if required, with related budgetary information.
- Provide an Executive Summary at the beginning of this report, which highlights key findings and includes a Facility Condition Index as a basis for comparing the relative conditions of the buildings within the portfolio.

6. Opinions of Probable Costs

Cost estimates are attached throughout this report, with the Replacement Reserves in the appendix.

These estimates are based on Invoice or Bid Document/s provided either by the Owner/facility and construction costs developed by construction resources such as *R.S. Means, CBRE Whitestone,* and *Marshall & Swift,* Bureau Veritas's experience with past costs for similar properties, city cost indexes, and assumptions regarding future economic conditions.

Opinions of probable costs should only be construed as preliminary, order of magnitude budgets. Actual costs most probably will vary from the consultant's opinions of probable costs depending on such matters as type and design of suggested remedy, quality of materials and installation, manufacturer and type of equipment or system selected, field conditions, whether a physical deficiency is repaired or replaced in whole, phasing or bundling of the work (if applicable), quality of contractor, quality of project management exercised, market conditions, use of subcontractors, and whether competitive pricing is solicited, etc. Certain opinions of probable costs cannot be developed within the scope of this guide without further study. Opinions of probable cost for further study should be included in the FCA.

Methodology

Based upon site observations, research, and judgment, along with referencing Expected Useful Life (EUL) tables from various industry sources, Bureau Veritas opines as to when a system or component will most probably necessitate replacement. Accurate historical replacement records, if provided, are typically the best source of information. Exposure to the elements, initial quality and installation, extent of use, the quality and amount of preventive maintenance exercised, etc., are all factors that impact the effective age of a system or component. As a result, a system or component may have an effective age that is greater or less than its actual chronological age. The Remaining Useful Life (RUL) of a component or system equals the EUL less its *effective age*, whether explicitly or implicitly stated. Projections of Remaining Useful Life (RUL) are based primarily on age and condition with the presumption of continued use and maintenance of the Property similar to the observed and reported past use and maintenance practices, in conjunction with the professional judgment of Bureau Veritas's assessors. Significant changes in occupants and/or usage may affect the service life of some systems or components.

Where quantities could not be or were not derived from an actual construction document take-off or facility walk-through, and/or where systemic costs are more applicable or provide more intrinsic value, budgetary square foot and gross square foot costs are used. Estimated costs are based on professional judgment and the probable or actual extent of the observed defect, inclusive of the cost to design, procure, construct and manage the corrections.

Definitions

Immediate Needs

Immediate Needs are line items that require immediate action as a result of: (1) material existing or potential unsafe conditions, (2) failed or imminent failure of mission critical building systems or components, or (3) conditions that, if not addressed, have the potential to result in, or contribute to, critical element or system failure within one year or will most probably result in a significant escalation of its remedial cost.

For database and reporting purposes the line items with RUL=0, and commonly associated with *Safety* or *Performance/Integrity* Plan Types, are considered Immediate Needs.

Replacement Reserves

Cost line items traditionally called Replacement Reserves (equivalently referred to as Lifecycle/Renewals) are for recurring probable renewals or expenditures, which are not classified as operation or maintenance expenses. The replacement reserves should be budgeted for in advance on an annual basis. Replacement Reserves are reasonably predictable both in terms of frequency and cost. However, Replacement Reserves may also include components or systems that have an indeterminable life but, nonetheless, have a potential for failure within an estimated time period.

Replacement Reserves generally exclude systems or components that are estimated to expire after the reserve term and are not considered material to the structural and mechanical integrity of the subject property. Furthermore, systems and components that are not deemed to have a material effect on the use of the Property are also excluded. Costs that are caused by acts of God, accidents, or other occurrences that are typically covered by insurance, rather than reserved for, are also excluded.

Replacement costs are solicited from ownership/property management, Bureau Veritas's discussions with service companies, manufacturers' representatives, and previous experience in preparing such schedules for other similar facilities. Costs for work performed by the ownership's or property management's maintenance staff are also considered.

Bureau Veritas's reserve methodology involves identification and quantification of those systems or components requiring capital reserve funds within the assessment period. The assessment period is defined as the effective age plus the reserve term. Additional information concerning system's or component's respective replacement costs (in today's dollars), typical expected useful lives, and remaining useful lives were estimated so that a funding schedule could be prepared. The Replacement Reserves Schedule presupposes that all required remedial work has been performed or that monies for remediation have been budgeted for items defined as Immediate Needs.

For the purposes of 'bucketizing' the System Expenditure Forecasts in this report, the Replacement Reserves have been subdivided and grouped as follows: Short Term (years 1-3), Near Term (years 4-5), Medium Term (years 6-10), and Long Term (years 11-20).

Key Findings

In an effort to highlight the most significant cost items and not be overwhelmed by the Replacement Reserves report in its totality, a subsection of Key Findings is included within the Executive Summary section of this report. Key Findings typically include repairs or replacements of deficient items within the first five-year window, as well as the most significant high-dollar line items that fall anywhere within the ten-year term. Note that while there is some subjectivity associated with identifying the Key Findings, the Immediate Needs are always included as a subset.

Exceedingly Aged

A fairly common scenario encountered during the assessment process, and a frequent source of debate, occurs when classifying and describing "very old" systems or components that are still functioning adequately and do not appear nor were reported to be in any way deficient. To help provide some additional intelligence on these items, such components will be tagged in the database as Exceedingly Aged. This designation will be reserved for mechanical or electrical systems or components that have aged well beyond their industry standard lifecycles, typically at least 15 years beyond and/or twice their Estimated Useful Life (EUL). In tandem with this designation, these items will be assigned a Remaining Useful Life (RUL) not less than two years but not greater than 1/3 of their standard EUL. As such the recommended replacement time for these components will reside outside the typical Short Term window but will not be pushed 'irresponsibly' (too far) into the future.

7. Certification

The City of Montebello (the Client) retained Bureau Veritas to perform this Facility Condition Assessment in connection with its continued operation of Potrero Heights Park, 8051 Arroyo Drive, Montebello, California 90640, the "Property". It is our understanding that the primary interest of the Client is to locate and evaluate materials and building system defects that might significantly affect the value of the property and to determine if the present Property has conditions that will have a significant impact on its continued operations.

The conclusions and recommendations presented in this report are based on the brief review of the plans and records made available to our Project Manager during the site visit, interviews of available property management personnel and maintenance contractors familiar with the Property, appropriate inquiry of municipal authorities, our Project Manager's walk-through observations during the site visit, and our experience with similar properties.

No testing, exploratory probing, dismantling or operating of equipment or in-depth studies were performed unless specifically required under the *Purpose and Scope* section of this report. This assessment did not include engineering calculations to determine the adequacy of the Property's original design or existing systems. Although walk-through observations were performed, not all areas may have been observed (see Section 1 for specific details). There may be defects in the Property, which were in areas not observed or readily accessible, may not have been visible, or were not disclosed by management personnel when questioned. The report describes property conditions at the time that the observations and research were conducted.

This report has been prepared on behalf of and exclusively for the use of the Client for the purpose stated within the *Purpose and Scope* section of this report. The report, or any excerpt thereof, shall not be used by any party other than the Client or for any other purpose than that specifically stated in our agreement or within the *Purpose and Scope* section of this report without the express written consent of Bureau Veritas.

Any reuse or distribution of this report without such consent shall be at the Client and the recipient's sole risk, without liability to Bureau Veritas.

3	Are curb ramps present at transitions through raised curbs on all accessible routes?	X			
4	Do curb ramps appear to have compliant slopes for all components?	X			
5	Do ramp runs on an accessible route appear to have compliant slopes?	X			
6	Do ramp runs on an accessible route appear to have a compliant rise and width?	X			
7	Do ramps on an accessible route appear to have compliant end and intermediate landings?		X		Entrance ramp does not have intermediate landings as required due to its length
8	Do ramps on an accessible route appear to have compliant handrails?		X		Entrance ramp does not have handrails

Abbreviated Accessibility Checklist

Building Entrances

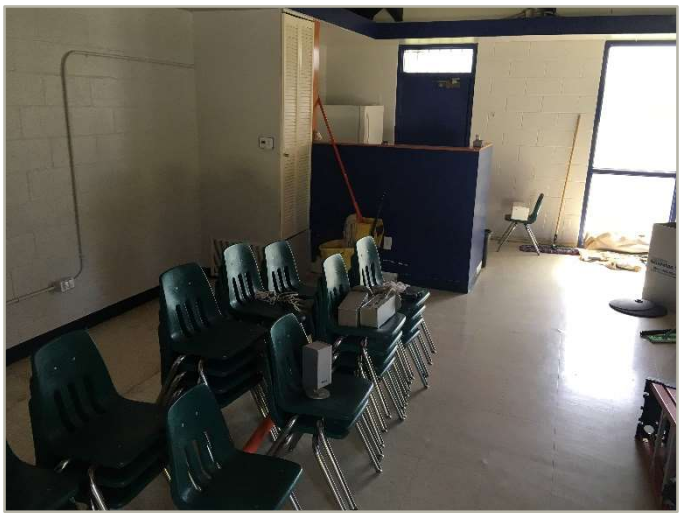
Accessible building entrance

Accessible building exit

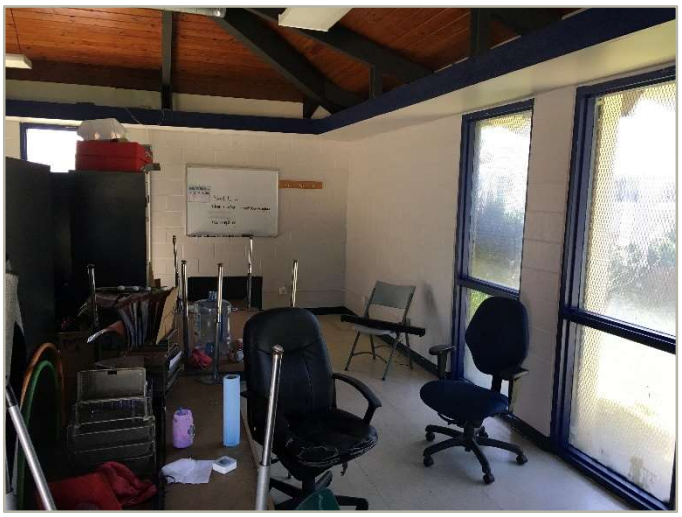
	Question	Yes	No	NA	Comments
1	Do a sufficient number of accessible entrances appear to be provided?	X			
2	If the main entrance is not accessible, is an alternate accessible entrance provided?			X	
3	Is signage provided indicating the location of alternate accessible entrances?		X		No accessibility signage present
4	Do doors at accessible entrances appear to have compliant maneuvering clearance area on each side?	X			
5	Do doors at accessible entrances appear to have compliant hardware?	X			
6	Do doors at accessible entrances appear to have a compliant clear opening width?	X			
7	Do pairs of accessible entrance doors in series appear to have the minimum clear space between them?			X	
8	Do thresholds at accessible entrances appear to have a compliant height?	X			

Abbreviated Accessibility Checklist

Interior Accessible Route, Interior Doors & Amenities



Recreation room



Recreation room

	Question	Yes	No	NA	Comments
1	Does an accessible route appear to connect all public areas inside the building?	X			
2	Do accessible routes appear free of obstructions and/or protruding objects?	X			
3	Do ramps on accessible routes appear to have compliant slopes?			X	
4	Do ramp runs on an accessible route appear to have a compliant rise and width?			X	
5	Do ramps on accessible routes appear to have compliant end and intermediate landings?			X	
6	Do ramps on accessible routes appear to have compliant handrails?			X	
7	Are accessible areas of refuge and the accessible means of egress to those areas identified with accessible signage?		X		No accessibility signage present
8	Do public transaction areas have an accessible, lowered service counter section?			X	
9	Do public telephones appear mounted with an accessible height and location?			X	
10	Do doors at interior accessible routes appear to have compliant maneuvering clearance area on each side?			X	
11	Do doors at interior accessible routes appear to have compliant hardware?			X	
12	Do non-fire hinged, sliding, or folding doors on interior accessible routes appear to have compliant opening force?			X	

	Question	Yes	No	NA	Comments
13	Do doors on interior accessible routes appear to have a compliant clear opening width?			X	

Abbreviated Accessibility Checklist

Elevators

No elevator(s) present

No elevator(s) present

	Question	Yes	No	NA	Comments
1	Are hallway call buttons configured with the “UP” button above the “DOWN” button?			X	
2	Is accessible floor identification signage present on the hoistway sidewalls on each level?			X	
3	Do the elevators have audible and visual arrival indicators at the lobby and hallway entrances?			X	
4	Do the elevator hoistway and car interior appear to have a minimum compliant clear floor area?			X	
5	Do the elevator car doors have automatic re-opening devices to prevent closure on obstructions?			X	
6	Do elevator car control buttons appear to be mounted at a compliant height?			X	
7	Are tactile and Braille characters mounted to the left of each elevator car control button?			X	
8	Are audible and visual floor position indicators provided in the elevator car?			X	
9	Is the emergency call system on or adjacent to the control panel and does it not require voice communication?			X	

Abbreviated Accessibility Checklist

Common Area Restrooms

Restroom

Restroom

	Question	Yes	No	NA	Comments
1	Do publicly accessible toilet rooms appear to have a minimum compliant floor area?	X			
2	Does the lavatory appear to be mounted at a compliant height and with compliant knee area?	X			
3	Does the lavatory faucet have compliant handles?	X			
4	Is the plumbing piping under lavatories configured to protect against contact?		X		Missing toe wraps under sinks
5	Are grab bars provided at compliant locations around the toilet?		X		Missing rear wall grab bar
6	Do toilet stall doors appear to provide the minimum compliant clear width?		X		Accessible toilet stalls not large enough
7	Do toilet stalls appear to provide the minimum compliant clear floor area?		X		Accessible toilet stalls not large enough
8	Where more than one urinal is present in a multi-user restroom, does minimum one urinal appear to be mounted at a compliant height and with compliant approach width?	X			
9	Do accessories and mirrors appear to be mounted at a compliant height?		X		Soap dispensers too high

Property Overview and Assessment Details

General Information	
Property Type	Public Park
Main Address	2700 West Beverly Boulevard, Montebello, California 90640
Site Developed	1960s Exact year is unknown
Site Area	7.93 acres (estimated)
Parking Spaces	2 total spaces all in open lots; 2 of which are accessible
Building Area	800 SF
Number of Stories	1
Outside Occupants / Leased Spaces	None
Date(s) of Visit	April 16, 2020
Management Point of Contact	City of Montebello/Park, Recreation and Community Services, David Sosnowski, Director 323.887.4588 phone dsosnowski@cityofmentebello.com email
On-site Point of Contact (POC)	Matthew Wilkins
Assessment and Report Prepared By	Nezar M. Tibi
Reviewed By	Mark Surdam Program Manager Mark.Surdam@bvna.com 800.733.0660 6251

Significant/Systemic Findings and Deficiencies

Historical Summary

Ashiya Park was originally constructed in the 1960's. The restroom building was constructed at the same time.

Architectural

The restroom building is constructed of concrete masonry units on a concrete slab floor with a heavy timber framed roof. It has not been renovated in the recent years. Most interior finishes seem to be original to the building. The asphalt shingle roof is in a fair condition. The exterior CMU walls are in need of painting and the north east section needs repair. Renovation for most interior and exterior finishes is recommended in the next three years.

Mechanical, Electrical, Plumbing and Fire (MEPF)

There is no heating or cooling system in the restroom building. The plumbing piping system is in fair condition and it has been renovated in the last few years. Hot water is not provided. Plumbing fixtures are reaching the end of their lifecycle and need replacement.

The electrical system and lighting fixtures are reaching the end of their lifecycle and need replacement. The building is not provided with a fire alarm system or fire suppression system.

Site

In general, the site has been well maintained. The site contains heavy landscaping, which is served by in-ground irrigation systems. There are two playgrounds on site, and they are in fair condition. The concrete sidewalk is in fair overall condition with the exception of an area adjacent to the restroom building which requires repair due to uplift from tree roots.

The asphalt paved accessible parking area and drive aisles are in fair to poor condition and require sealing and striping. There is no site lighting available, it is recommended that LED fixtures lighting system be installed.

Recommended Additional Studies

No additional studies recommended at this time.

Park Amenities Observed

Amenity Type			Qty / ~Area	Description	Condition			Comments
					Good	Fair	Poor	
Site Development								
G2020	**Parking**							
		Number of Cars		N/A				
		Accessible Parking	2				X	Needs seal and stripe
G2030	**Walks**							
		Concrete	19,300	Sidewalk		X	X	Some areas need repair
		Asphalt	26,000	Driveway			X	Needs seal
G4020	**Lighting**							
		Pathway (8'-12')		N/A				
G2050	**Landscape**							
		Grass (Turf)	298,000	Throughout park		X		
		Trees		Throughout park		X

G2050	**Miscellaneous Recreation**							
		Playground Equipment, Medium	1	North Playground		X		
		Playground Equipment, Medium	1	South Playground		X		

Facility Condition Index (FCI)

One of the major goals of the FCA is to calculate each building's Facility Condition Index (FCI), which provides a theoretical objective indication of a building's overall condition. By definition, the FCI is defined as the ratio of the cost of current needs divided by current replacement value (CRV) of the facility. The chart below presents the industry standard ranges and cut-off points.

FCI Ranges and Description	
0 – 5%	In new or well-maintained condition, with little or no visual evidence of wear or deficiencies.
5 – 10%	Subjected to wear but is still in a serviceable and functioning condition.
10 – 30%	Subjected to hard or long-term wear. Nearing the end of its useful or serviceable life.
30% and above	Has reached the end of its useful or serviceable life. Renewal is now necessary.

The deficiencies and lifecycle needs identified in this assessment provide the basis for a portfolio-wide capital improvement funding strategy. In addition to the current FCI, extended FCI's have been developed to provide owners the intelligence needed to plan and budget for the "keep-up costs" for their facilities. As such the 3-year, 5-year, and 10-year FCI's are calculated by dividing the anticipated needs of those respective time periods by current replacement value. As a final point, the FCI's ultimately provide more value when used to relatively compare facilities across a portfolio instead of being over-analyzed and scrutinized as stand-alone values. The table below summarizes the individual findings for this FCA:

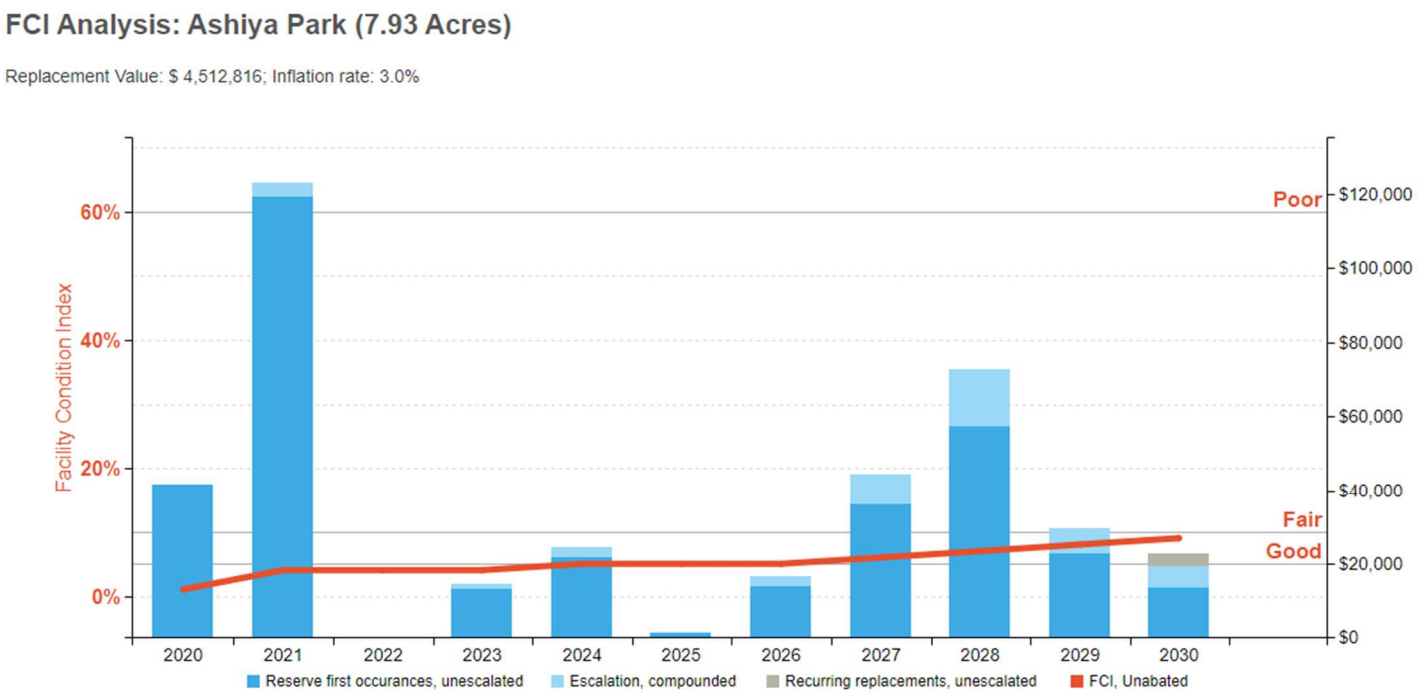
FCI Analysis

FCI Analysis | Ashiya Park (7.93 Acres)

Replacement Value	*Total SF*		*Cost/SF*
$ 4,512,900	*322,344*		*$ 14*
Current FCI		$ 41,600	**0.9 %**
3-Year		$ 178,900	4.0 %
5-Year		$ 204,800	4.5 %
10-Year		$ 385,900	8.6 %

The orange line in the graph below forecasts what would happen to the FCI (left Y axis) over time, assuming zero capital expenditures. The capital expenditures allocated for each year (blue bars) are associated with the dollar amounts along the right Y axis.

Needs by Year with Unaddressed FCI Over Time



Immediate Needs

None

Key Findings

None

Plan Types

Each line item in the cost database is assigned a Plan Type, which is the primary reason or rationale for the recommended replacement, repair, or other corrective action. This is the “why” part of the equation. A cost or line item may commonly have more than one applicable Plan Type; however, only one Plan Type will be assigned based on the “best” fit, typically the one with the greatest significance.

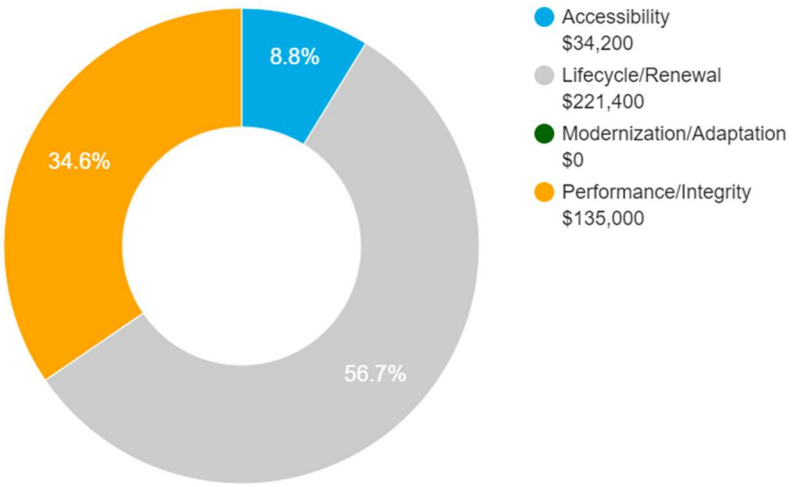
Plan Type Descriptions

Safety	■	An observed or reported unsafe condition that if left unaddressed could result in injury; a system or component that presents potential liability risk.

Plan Type Descriptions

Performance/Integrity	■	Component or system has failed, is almost failing, performs unreliably, does not perform as intended, and/or poses risk to overall system stability.
Accessibility	■	Does not meet ADA, UFAS, and/or other handicap accessibility requirements.
Environmental	■	Improvements to air or water quality, including removal of hazardous materials from the building or site.
Retrofit/Adaptation	■	Components, systems, or spaces recommended for upgrades in in order to meet current standards, facility usage, or client/occupant needs.
Lifecycle/Renewal	■	Any component or system that is not currently deficient or problematic but for which future replacement or repair is anticipated and budgeted.

Plan Type Distribution (by Cost)



10-YEAR TOTAL: $390,600

2. Building and Site Information

Systems Summary

System	*Description*	*Condition*
Structure	Masonry bearing walls and wood-framed roofs	Fair
Façade	Painted CMU with aluminum screen windows	Fair
Roof	Primary: Gable construction with asphalt shingles	Fair
Interiors	Walls: Painted stucco & Unfinished Floors: Elastomeric coating and Unfinished Ceilings: Painted stucco and Unfinished/exposed	Fair
Elevators	None	--
Plumbing	Copper supply and cast iron waste & venting No hot water Toilets, urinals, and sinks in all restrooms	Fair
HVAC	No heating or cooling system	--
Fire Suppression		--

Systems Summary

Electrical	Source & Distribution: Main panel with copper wiring Interior Lighting: T-8 Emergency: None	Fair
Fire Alarm	None	--
Equipment/Special	None	--
Site Pavement	Asphalt lots with areas of concrete and concrete sidewalks, curbs and ramps	Fair
Site Development	Property entrance signage Playgrounds and sport court with benches Heavily park benches, picnic tables, trash receptacles Drinking fountains	Fair
Landscaping and Topography	Moderate landscaping features Irrigation present No retaining walls Low to moderate site slopes throughout with an exception of one Severe site slopes along the north boundary	Fair
Utilities	Municipal water and sewer Local utility-provided electric	Good
Site Lighting	Building-mounted: incandescent	Fair
Ancillary Structures	None	--
Accessibility	Presently it does not appear an accessibility study is needed for this property.	
Key Issues and Findings	Building lacks fire suppression, rusty aluminum screens, Interior and exterior wall repairs, eroded sections at landscaping areas, heavy asphalt wear, None operational restroom hand dryers, significant sidewalk trip hazards, rusty drinking fountain enclosure, repair storm piping at north playground, lack of site lighting, missing interior door. Repair roof structure.	

Systems Expenditure Forecast

System Expenditure Forecast

System	Immediate	Short Term (1-3 yr)	Near Term (4-5 yr)	Med Term (6-10 yr)	Long Term (11-20 yr)	TOTAL
Structure	-	$1,400	-	-	$2,300	$3,700
Facade	$500	$300	$7,100	$4,600	$10,000	$22,600

3. Property Space Use and Observed Areas

Unit Allocation

All 7.93 acres of the property are occupied by City of Montebello. The spaces are mostly public park with supporting restrooms building.

Areas Observed

The interior spaces were observed in order to gain a clear understanding of the property's overall condition. Other areas accessed included the site within the property boundaries, the exterior of the property, and the roof.

Key Spaces Not Observed

All key areas of the property were accessible and observed.

4. ADA Accessibility

Generally, Title II of the Americans with Disabilities Act (ADA) prohibits discrimination by entities to access and use of "areas of public accommodations" and "public facilities" on the basis of disability. Regardless of their age, these areas and facilities must be maintained and operated to comply with the Americans with Disabilities Act Accessibility Guidelines (ADAAG).

A public entity (i.e. city governments) shall operate each service, program, or activity so that the service, program, or activity, when viewed in its entirety, is readily accessible to and usable by individuals with disabilities.

However, this does not:

1. Necessarily require a public entity to make each of its existing facilities accessible to and usable by individuals with disabilities;
2. Require a public entity to take any action that would threaten or destroy the historic significance of an historic property; or
3. Require a public entity to take any action that it can demonstrate would result in a fundamental alteration in the nature of a service, program, or activity or in undue financial and administrative burdens. In those circumstances where personnel of the public entity believe that the proposed action would fundamentally alter the service, program, or activity or would result in undue financial and administrative burdens, a public entity has the burden of proving that compliance with 35.150(a) of this part would result in such alteration or burdens. The decision that compliance would result in such alteration or burdens must be made by the head of a public entity or his or her designee after considering all resources available for use in the funding and operation of the service, program, or activity, and must be accompanied by a written statement of the reasons for reaching that conclusion. If an action would result in such an alteration or such burdens, a public entity shall take any other action that would not result in such an alteration or such burdens but would nevertheless ensure that individuals with disabilities receive the benefits or services provided by the public entity.

During the FCA, Bureau Veritas performed a limited high-level accessibility review of the facility non-specific to any local regulations or codes. The scope of the visual observation was limited to those areas and categories set forth in the tables throughout this report. It is understood by the Client that the limited observations described herein do not comprise a full ADA Compliance Survey, and that such a survey is beyond the scope of Bureau Veritas's undertaking. Only a representative sample of areas was observed, and actual measurements were not taken to verify compliance.

An accessibility study has not been performed at the site. Although no significant issues were identified, a comprehensive ADA Compliance Survey may reveal specific aspects of the property that are not in full compliance.

Removal of barriers to accessibility should be addressed from a liability standpoint in order to comply with federal law, but the barriers may or may not be building code violations. The Americans with Disabilities Act Accessibility Guidelines are part of the ADA federal civil rights law pertaining to the disabled and are not a construction code. State and local jurisdictions have adopted the ADA Guidelines or have adopted other standards for accessibility as part of their construction codes.

Exterior path of travel

Accessible restroom accommodations

Accessible restroom accommodations

Accessible parking

Exterior path of travel

The table below is intended to be used as a general reference guide to help differentiate the orders of magnitude between some of the more commonly observed accessibility issues. The table is not intended to be all-inclusive, and boxes checked in the tables above do not necessarily mean those specific problems or shortcomings cited as examples below exist at the subject buildings and sites. Reference the photos above and/or *Key Findings* section for visuals and/or more specifics about the subject site conditions.

Reference Guide

	Major Issues *(ADA study recommended)*	Moderate Issues *(ADA study recommended)*	Minor/No Issues
Parking	- Needs full reconstruction - Excessive slopes over 3% require major re-grading - No level locations to add required spaces	- No or non-compliant curb cuts - Moderate difficulty to add required accessible spaces - Slopes close to compliant	- Painting of markings needed - Signage height non-compliant - Signage missing
Exterior Path of Travel	- Large areas of sidewalks with excessive slopes - No ramp when needed - Ramps with excessive slopes	- Ramps need rails - Ramps need rail extensions - Need significant # of lever handles - All or most entrance door exterior maneuvering clearance areas with excessive slopes	- One entrance door exterior maneuvering clearance area with excessive slope - A few doorknobs instead of lever handles - Non-compliant signage
Interior Path of Travel	- All or most interior doors appear less than 32” wide - Corridors less than 36” wide - No ramp when needed - Ramps with excessive slopes - Non-compliant treads/risers at means of egress stairways	- Single height drinking fountains - Drinking fountain too high or protrudes into accessible route - Ramps need rails - Ramps need rail extensions - Need significant # of lever handles - Non-compliant rail extensions at egress stairways - All/most door thresholds high	- One door threshold too high - A few doorknobs instead of lever handles - Non-compliant door pressures - Non-compliant signage - Switches not within reach range
Public Use Restrooms	- No ADA RR on each accessible floor - Restroom(s) too small - Entire restroom(s) requires renovation - Water closet clearance requires moving walls	- Interior doors appear less than 32” wide - Missing or non-compliant grab bars - Easily fixable clearance issues	- Minor height adjustments required - Non-compliant door pressures - Missing a visual strobe (only required if audible fire alarm already present) - Missing lavatory pipe wraps - Signage not compliant
Elevators	- No elevator present when required - Elevator cab too small	- Panel control buttons not at compliant height - No hands-free emergency communication system - Elevator only has mechanical stops	- Audible/visual signals at every floor may be lacking - Minor signage / Braille issues
Kitchens/Kitchenettes	- Clear space for each appliance not present - Clearance between opposing counters too narrow	- Sink and counter too high - Sink knee and toe clearance not provided where required (built-in) - Less than 50% of cabinetry within reach range	- Dispensers not within reach range - Switches not within reach range - Missing sink pipe wraps if knee and toe clearance required

5. Purpose and Scope

Purpose

Bureau Veritas was retained by the client to render an opinion as to the Property's current general physical condition on the day of the site visit.

Based on the observations, interviews and document review outlined below, this report identifies significant deferred maintenance issues, existing deficiencies, and material code violations of record, which affect the Property's use. Opinions are rendered as to its structural integrity, building system condition and the Property's overall condition. The report also notes building systems or components that have realized or exceeded their typical expected useful lives.

The physical condition of building systems and related components are typically defined as being in one of five condition ratings. For the purposes of this report, the following definitions are used:

Condition Ratings	
Excellent	New or very close to new; component or system typically has been installed within the past year, sound and performing its function. Eventual repair or replacement will be required when the component or system either reaches the end of its useful life or fails in service.
Good	Satisfactory as-is. Component or system is sound and performing its function, typically within the first third of its lifecycle. However, it may show minor signs of normal wear and tear. Repair or replacement will be required when the component or system either reaches the end of its useful life or fails in service.
Fair	Showing signs of wear and use but still satisfactory as-is, typically near the median of its estimated useful life. Component or system is performing adequately at this time but may exhibit some signs of wear, deferred maintenance, or evidence of previous repairs. Repair or replacement will be required due to the component or system's condition and/or its estimated remaining useful life.
Poor	Component or system is significantly aged, flawed, functioning intermittently or unreliably; displays obvious signs of deferred maintenance; shows evidence of previous repair or workmanship not in compliance with commonly accepted standards; has become obsolete; or exhibits an inherent deficiency. The present condition could contribute to or cause the deterioration of contiguous elements or systems. Either full component replacement is needed or repairs are required to restore to good condition, prevent premature failure, and/or prolong useful life.
Failed	Component or system has ceased functioning or performing as intended. Replacement, repair, or other significant corrective action is recommended or required.
Not Applicable	Assigning a condition does not apply or make logical sense, most commonly due to the item in question not being present.

Scope

The standard scope of the Facility Condition Assessment includes the following:

- Visit the Property to evaluate the general condition of the building and site improvements, review available construction documents in order to familiarize ourselves with, and be able to comment on, the in-place construction systems, life safety, mechanical, electrical, and plumbing systems, and the general built environment.
- Identify those components that are exhibiting deferred maintenance issues and provide cost estimates for Immediate Costs and Replacement Reserves based on observed conditions, maintenance history and industry standard useful life estimates. This will include the review of documented capital improvements completed within the last five-year period and work currently contracted for, if applicable.
- Provide a full description of the Property with descriptions of in-place systems and commentary on observed conditions.
- Provide a high-level categorical general statement regarding the subject Property's compliance to Title III of the Americans with Disabilities Act. This will not constitute a full ADA survey, but will help identify exposure to issues and the need for further review.
- Obtain background and historical information about the facility from a building engineer, property manager, maintenance staff, or other knowledgeable source. The preferred methodology is to have the client representative or building occupant complete a Pre-Survey Questionnaire (PSQ) in advance of the site visit. Common alternatives include a verbal interview just prior to or during the walk-through portion of the assessment.
- Review maintenance records and procedures with the in-place maintenance personnel.
- Observe a representative sample of the interior spaces/units, including vacant spaces/units, to gain a clear understanding of the property's overall condition. Other areas to be observed include the exterior of the property, the roofs, interior common areas, and the significant mechanical, electrical and elevator equipment rooms.
- Provide recommendations for additional studies, if required, with related budgetary information.
- Provide an Executive Summary at the beginning of this report, which highlights key findings and includes a Facility Condition Index as a basis for comparing the relative conditions of the buildings within the portfolio.

6. Opinions of Probable Costs

Cost estimates are attached throughout this report, with the Replacement Reserves in the appendix.

These estimates are based on Invoice or Bid Document/s provided either by the Owner/facility and construction costs developed by construction resources such as *R.S. Means, CBRE Whitestone,* and *Marshall & Swift,* Bureau Veritas's experience with past costs for similar properties, city cost indexes, and assumptions regarding future economic conditions.

Opinions of probable costs should only be construed as preliminary, order of magnitude budgets. Actual costs most probably will vary from the consultant's opinions of probable costs depending on such matters as type and design of suggested remedy, quality of materials and installation, manufacturer and type of equipment or system selected, field conditions, whether a physical deficiency is repaired or replaced in whole, phasing or bundling of the work (if applicable), quality of contractor, quality of project management exercised, market conditions, use of subcontractors, and whether competitive pricing is solicited, etc. Certain opinions of probable costs cannot be developed within the scope of this guide without further study. Opinions of probable cost for further study should be included in the FCA.

Methodology

Based upon site observations, research, and judgment, along with referencing Expected Useful Life (EUL) tables from various industry sources, Bureau Veritas opines as to when a system or component will most probably necessitate replacement. Accurate historical replacement records, if provided, are typically the best source of information. Exposure to the elements, initial quality and installation, extent of use, the quality and amount of preventive maintenance exercised, etc., are all factors that impact the effective age of a system or component. As a result, a system or component may have an effective age that is greater or less than its actual chronological age. The Remaining Useful Life (RUL) of a component or system equals the EUL less its *effective age*, whether explicitly or implicitly stated. Projections of Remaining Useful Life (RUL) are based primarily on age and condition with the presumption of continued use and maintenance of the Property similar to the observed and reported past use and maintenance practices, in conjunction with the professional judgment of Bureau Veritas's assessors. Significant changes in occupants and/or usage may affect the service life of some systems or components.

Where quantities could not be or were not derived from an actual construction document take-off or facility walk-through, and/or where systemic costs are more applicable or provide more intrinsic value, budgetary square foot and gross square foot costs are used. Estimated costs are based on professional judgment and the probable or actual extent of the observed defect, inclusive of the cost to design, procure, construct and manage the corrections.

Definitions

Immediate Needs

Immediate Needs are line items that require immediate action as a result of: (1) material existing or potential unsafe conditions, (2) failed or imminent failure of mission critical building systems or components, or (3) conditions that, if not addressed, have the potential to result in, or contribute to, critical element or system failure within one year or will most probably result in a significant escalation of its remedial cost.

For database and reporting purposes the line items with RUL=0, and commonly associated with *Safety* or *Performance/Integrity* Plan Types, are considered Immediate Needs.

Replacement Reserves

Cost line items traditionally called Replacement Reserves (equivalently referred to as Lifecycle/Renewals) are for recurring probable renewals or expenditures, which are not classified as operation or maintenance expenses. The replacement reserves should be budgeted for in advance on an annual basis. Replacement Reserves are reasonably predictable both in terms of frequency and cost. However, Replacement Reserves may also include components or systems that have an indeterminable life but, nonetheless, have a potential for failure within an estimated time period.

Replacement Reserves generally exclude systems or components that are estimated to expire after the reserve term and are not considered material to the structural and mechanical integrity of the subject property. Furthermore, systems and components that are not deemed to have a material effect on the use of the Property are also excluded. Costs that are caused by acts of God, accidents, or other occurrences that are typically covered by insurance, rather than reserved for, are also excluded.

Replacement costs are solicited from ownership/property management, Bureau Veritas's discussions with service companies, manufacturers' representatives, and previous experience in preparing such schedules for other similar facilities. Costs for work performed by the ownership's or property management's maintenance staff are also considered.

Bureau Veritas's reserve methodology involves identification and quantification of those systems or components requiring capital reserve funds within the assessment period. The assessment period is defined as the effective age plus the reserve term. Additional information concerning system's or component's respective replacement costs (in today's dollars), typical expected useful lives, and remaining useful lives were estimated so that a funding schedule could be prepared. The Replacement Reserves Schedule presupposes that all required remedial work has been performed or that monies for remediation have been budgeted for items defined as Immediate Needs.

For the purposes of 'bucketizing' the System Expenditure Forecasts in this report, the Replacement Reserves have been subdivided and grouped as follows: Short Term (years 1-3), Near Term (years 4-5), Medium Term (years 6-10), and Long Term (years 11-20).

Key Findings

In an effort to highlight the most significant cost items and not be overwhelmed by the Replacement Reserves report in its totality, a subsection of Key Findings is included within the Executive Summary section of this report. Key Findings typically include repairs or replacements of deficient items within the first five-year window, as well as the most significant high-dollar line items that fall anywhere within the ten-year term. Note that while there is some subjectivity associated with identifying the Key Findings, the Immediate Needs are always included as a subset.

Exceedingly Aged

A fairly common scenario encountered during the assessment process, and a frequent source of debate, occurs when classifying and describing "very old" systems or components that are still functioning adequately and do not appear nor were reported to be in any way deficient. To help provide some additional intelligence on these items, such components will be tagged in the database as Exceedingly Aged. This designation will be reserved for mechanical or electrical systems or components that have aged well beyond their industry standard lifecycles, typically at least 15 years beyond and/or twice their Estimated Useful Life (EUL). In tandem with this designation, these items will be assigned a Remaining Useful Life (RUL) not less than two years but not greater than 1/3 of their standard EUL. As such the recommended replacement time for these components will reside outside the typical Short Term window but will not be pushed 'irresponsibly' (too far) into the future.

7. Certification

The City of Montebello (the Client) retained Bureau Veritas to perform this Facility Condition Assessment in connection with its continued operation of Ashiya Park, 2700 West Beverly Boulevard, Montebello, California 90640 the "Property". It is our understanding that the primary interest of the Client is to locate and evaluate materials and building system defects that might significantly affect the value of the property and to determine if the present Property has conditions that will have a significant impact on its continued operations.

The conclusions and recommendations presented in this report are based on the brief review of the plans and records made available to our Project Manager during the site visit, interviews of available property management personnel and maintenance contractors familiar with the Property, appropriate inquiry of municipal authorities, our Project Manager's walk-through observations during the site visit, and our experience with similar properties.

No testing, exploratory probing, dismantling or operating of equipment or in-depth studies were performed unless specifically required under the *Purpose and Scope* section of this report. This assessment did not include engineering calculations to determine the adequacy of the Property's original design or existing systems. Although walk-through observations were performed, not all areas may have been observed (see Section 1 for specific details). There may be defects in the Property, which were in areas not observed or readily accessible, may not have been visible, or were not disclosed by management personnel when questioned. The report describes property conditions at the time that the observations and research were conducted.

This report has been prepared on behalf of and exclusively for the use of the Client for the purpose stated within the *Purpose and Scope* section of this report. The report, or any excerpt thereof, shall not be used by any party other than the Client or for any other purpose than that specifically stated in our agreement or within the *Purpose and Scope* section of this report without the express written consent of Bureau Veritas.

Any reuse or distribution of this report without such consent shall be at the Client and the recipient's sole risk, without liability to Bureau Veritas.

Abbreviated Accessibility Checklist

Facility History & Interview

	Question	Yes	No	Unk	Comments
1	Has an ADA survey previously been completed for this property? If so, indicate when.			X	This should match PSQ question #18. Please cross-reference and ensure consistency.
2	Have any ADA improvements been made to the property since original construction? Elaborate, especially if fully or partially addressed as the result of a previous study.			X	This should match PSQ question #19. Please cross-reference and ensure consistency.
3	Has building ownership/management reported any ADA complaints or litigation?		X		This should match PSQ question #20. Please cross-reference and ensure consistency.

Playgrounds & Swimming Pools

Playground

Basketball Court

	Question	Yes	No	NA	Comments
1	Is there an accessible route to the play area/s?	X			if NOT: this could be a MINOR, MODERATE, or MAJOR issue depending on the required fix (reference other exterior route costs)
2	Has the play area been reviewed for accessibility?			X	Unknown
3	Are publicly accessible swimming pools equipped with an entrance lift?			X	if NOT: use AC ID 23650 for matrix: a MAJOR ($10k+) issue

Abbreviated Accessibility Checklist

Parking

ADA Parking

ADA Parking

	Question	Yes	No	NA	Comments
1	Does the required number of standard ADA designated spaces appear to be provided?	X			if NOT: this is a MINOR issue if 1 space or less and only painting/signage modifications are needed (AC ID: 23614 for paint + signs; 23613 for striping only; use 23617 or 23618 if signage issues only) this is a MODERATE issue if 2 spaces or more (use same AC line items above) this is a MAJOR issue if redesigning/regrading/repaving (AC ID: 23616)
2	Does the required number of van-accessible designated spaces appear to be provided?		X		use same methodology and line items above
3	Are accessible spaces on the shortest accessible route to an accessible building entrance?	X			if space/s need to be “moved” use same methodology and line items above
4	Does parking signage include the International Symbol of Accessibility?	X			if NOT: this is a MINOR issue if 2 spaces or less and only signage modifications are needed (AC ID: 23617 or 23618) this is a MODERATE issue if 3 spaces or more (use same AC line items above)
5	Does each accessible space have an adjacent access aisle?	X			if NOT: use AC ID 23612 MINOR issue if <= $1000; MODERATE issue if > $1000
6	Do parking spaces and access aisles appear to be relatively level and without obstruction?	X			if NOT: this is a MAJOR issue if redesigning/regrading/ repaving is necessary (AC ID: 23616)

Abbreviated Accessibility Checklist

Exterior Accessible Route

Exterior Route Access

Exterior Route Access

	Question	Yes	No	NA	Comments
1	Is an accessible route present from public transportation stops and municipal sidewalks on or immediately adjacent to the property?	X			if NOT: difficult to cost from standard AC items – probably need a custom item for scopes where we are providing costs – else use generic item 23586 & edit cost/description for MATRIX purposes: probably a MODERATE ($1k to $10k) or MAJOR fix ($10k+)
2	Does a minimum of one accessible route appear to connect all public areas on the exterior, such as parking and other outdoor amenities, to accessible building entrances?	X			if NOT: difficult to cost from standard AC items – probably need a custom item for scopes where we are providing costs – else use generic item 23586 & edit cost/description for MATRIX purposes: probably a MODERATE ($1k to $10k) or MAJOR fix ($10k+)
3	Are curb ramps present at transitions through raised curbs on all accessible routes?	X			if NOT: this is a MODERATE issue and use AC ID 23658
4	Do curb ramps appear to have compliant slopes for all components?	X			if NOT: this is a MODERATE issue and use AC ID 23658
5	Do ramp runs on an accessible route appear to have compliant slopes?	X			if NOT: use AC ID's 23652 or 26353 to rebuild, and add a +50% mark-up if demolishing an old bad ramp likely a MODERATE ($1k to $10k) or MAJOR ($10k+) issue

Question		Yes	No	NA	Comments
6	Do ramp runs on an accessible route appear to have a compliant rise and width?	X			if NOT: use AC ID's 23652 or 26353 to rebuild, and add a +50% mark-up if demolishing an old bad ramp likely a MODERATE ($1k to $10k) or MAJOR ($10k+) issue
7	Do ramps on an accessible route appear to have compliant end and intermediate landings?			X	if NOT: use AC ID's 23652 or 26353 to rebuild, and add a +50% mark-up if demolishing an old bad ramp likely a MODERATE ($1k to $10k) or MAJOR ($10k+) issue
8	Do ramps on an accessible route appear to have compliant handrails?			X	if NOT: use AC ID 23604 as-is for full handrail replacements or installations; to just add 'extensions' to the ends of existing rails use AC ID 30868 per instance likely a MINOR (less than $1k) or MODERATE ($1k to $10k) issue depending on number of rails affected

Abbreviated Accessibility Checklist

Building Entrances

Building Entrance

Building Entrance

	Question	Yes	No	NA	Comments
1	Do a sufficient number of accessible entrances appear to be provided?	X			if NOT: use mix of costs below (in AC as “ADA, Door…”) to achieve accessibility
2	If the main entrance is not accessible, is an alternate accessible entrance provided?			X	if NOT: use mix of costs below (in AC as “ADA, Door…”) to achieve accessibility
3	Is signage provided indicating the location of alternate accessible entrances?			X	if NOT and main entrance is not accessible: use AC ID 23609 for 1-3 locations; likely a just MINOR issue
4	Do doors at accessible entrances appear to have compliant maneuvering clearance area on each side?	X			if NOT: could be ‘zero-cost maintenance’ to move things out of the way OR use generic item 23586 & edit cost/description to reconfigure the geometry as-needed
5	Do doors at accessible entrances appear to have compliant hardware?	X			if NOT: use AC ID 23557 to install lever handles likely a MINOR (less than $1k) or MODERATE ($1k to $10k) issue depending on number of doors
6	Do doors at accessible entrances appear to have a compliant clear opening width?	X			if NOT: use AC ID 23561 or 23562 to widen likely a MODERATE ($1k to $10k) or MAJOR ($10k+) issue depending on number of doors
7	Do pairs of accessible entrance doors in series appear to have the minimum clear space between them?	X			if NOT: use generic item 23586 & edit cost/description to reconfigure vestibule/etc

Question		Yes	No	NA	Comments
8	Do thresholds at accessible entrances appear to have a compliant height?	X			if NOT: use AC ID 23560 to install lever handles likely a MINOR (less than $1k) or MODERATE ($1k to $10k) issue depending on number of doors

Abbreviated Accessibility Checklist

Interior Accessible Route, Interior Doors & Amenities

Interior Route

Interior Route

	Question	Yes	No	NA	Comments
1	Does an accessible route appear to connect all public areas inside the building?	X			if NOT: use mix of costs in library to achieve accessibility if not otherwise accounted for below
2	Do accessible routes appear free of obstructions and/or protruding objects?	X			if NOT: could be 'zero-cost maintenance' to move things out of the way OR use 23602 OR use generic item 23586 & edit cost/description to reconfigure the geometry as-needed
3	Do ramps on accessible routes appear to have compliant slopes?			X	if NOT: use AC ID's 23652 or 26353 to rebuild, and add a +50% mark-up if demolishing an old bad ramp likely a MODERATE ($1k to $10k) or MAJOR ($10k+) issue
4	Do ramp runs on an accessible route appear to have a compliant rise and width?			X	if NOT: use AC ID's 23652 or 26353 to rebuild, and add a +50% mark-up if demolishing an old bad ramp likely a MODERATE ($1k to $10k) or MAJOR ($10k+) issue
5	Do ramps on accessible routes appear to have compliant end and intermediate landings?			X	if NOT: use AC ID's 23652 or 26353 to rebuild, and add a +50% mark-up if demolishing an old bad ramp likely a MODERATE ($1k to $10k) or MAJOR ($10k+) issue

Question		Yes	No	NA	Comments
6	Do ramps on accessible routes appear to have compliant handrails?			X	if NOT: use AC ID 23604 as-is for full handrail replacements or installations; to just add 'extensions' to the ends of existing rails use AC ID 30868 per instance likely a MINOR (less than $1k) or MODERATE ($1k to $10k) issue depending on number of rails affected
7	Are accessible areas of refuge and the accessible means of egress to those areas identified with accessible signage?			X	if NOT use AC ID 23609 while estimating # of signs needed; likely a just MINOR issue
8	Do public transaction areas have an accessible, lowered service counter section?			X	if NOT use AC ID 23605 (MINOR issue) or 23608 (MODERATE issue)
9	Do public telephones appear mounted with an accessible height and location?			X	if NOT use AC ID 23603; likely a just MINOR issue
10	Do doors at interior accessible routes appear to have compliant maneuvering clearance area on each side?	X			if NOT: could be 'zero-cost maintenance' to move things out of the way OR use generic item 23586 & edit cost/description to reconfigure the geometry as-needed
11	Do doors at interior accessible routes appear to have compliant hardware?	X			if NOT: use AC ID 23557 to install lever handles likely a MINOR (less than $1k) or MODERATE ($1k to $10k) issue depending on number of doors
12	Do non-fire hinged, sliding, or folding doors on interior accessible routes appear to have compliant opening force?			X	if NOT: use AC ID 23556 to adjust force/pressure likely a MINOR (less than $1k) or MODERATE ($1k to $10k) issue depending on number of doors
13	Do doors on interior accessible routes appear to have a compliant clear opening width?	X			if NOT: use AC ID 23561 or 23562 to widen likely a MODERATE ($1k to $10k) or MAJOR ($10k+) issue depending on number of doors

Abbreviated Accessibility Checklist

Common Area Restrooms

Accessible Restroom

Accessible Restroom

	Question	Yes	No	NA	Comments
1	Do publicly accessible toilet rooms appear to have a minimum compliant floor area?	X			if NOT: consider using AC ID 23621 or 23640 for matrix: likely a MAJOR ($10k+) issue
2	Does the lavatory appear to be mounted at a compliant height and with compliant knee area?	X			if NOT: use either AC ID 23626 or 23625 likely a MINOR (< $1k) or MODERATE ($1k to $10k) issue
3	Does the lavatory faucet have compliant handles?	X			if NOT: use AC ID 23627 likely a MINOR (< $1k) or MODERATE ($1k to $10k) issue
4	Is the plumbing piping under lavatories configured to protect against contact?		X		if NOT: use AC ID 23628 or 23626 likely a MINOR (< $1k) or MODERATE ($1k to $10k) issue
5	Are grab bars provided at compliant locations around the toilet?	X			One is missing
6	Do toilet stall doors appear to provide the minimum compliant clear width?	X			if NOT: use AC ID 23637 or 23638 likely a MINOR (< $1k) or MODERATE ($1k to $10k) issue
7	Do toilet stalls appear to provide the minimum compliant clear floor area?	X			if NOT: use AC ID 23637 or 23638 likely a MINOR (< $1k) or MODERATE ($1k to $10k) issue
8	Where more than one urinal is present in a multi-user restroom, does minimum one urinal appear to be mounted at a compliant height and with compliant approach width?	X			if NOT: use AC ID 30875 likely a MINOR (< $1k) or MODERATE ($1k to $10k) issue

	Question	Yes	No	NA	Comments
9	Do accessories and mirrors appear to be mounted at a compliant height?	X			if NOT: use AC ID 23639, 23624, 23629, 23630, 23634, or 23636 likely a MINOR (< $1k) or MODERATE ($1k to $10k) issue

Property Overview and Assessment Details

General Information	
Property Type	Public Park
Main Address	901 Via San Clemente, Montebello, California 90640
Site Developed	1968
Site Area	7.61 acres (estimated)
Parking Spaces	380 total spaces all in open lots; 2 of which are accessible
Building Area	2,000 SF
Number of Stories	1
Outside Occupants / Leased Spaces	None
Date(s) of Visit	April 16, 2020
Management Point of Contact	City of Montebello/Park, Recreation and Community Services, David Sosnowski, Director 323.887.4588 phone dsosnowski@cityofmentebello.com email

Significant/Systemic Findings and Deficiencies

Historical Summary

The Bicknell Park was originally developed in 1968 and lies within the boundaries of the Montebello Golf Course. The park contains a single monument structure dedicated to the victims of the Armenian Genocide of 1915 and Crimes Against Humanity

Architectural

The monument structure is a 75' high, 8 arch concrete tower standing on a poured in place concrete platform with brick pavers and low stone veneered walls. It has not been renovated in the recent years. Finishes throughout are original to the structure. The monument and platform structure are in fair condition, repairs to the monument up-lighting surrounding finishes are in poor condition.

Mechanical, Electrical, Plumbing and Fire (MEPF)

The monument area and park do not contain mechanical equipment.

The electrical system serves monument up-lights and park and parking light pole lighting. The fixtures are reaching the end of their lifecycle and will require replacement.

Plumbing consists of domestic water service for the irrigation system and drinking fountain.

Site

In general, the site has been well maintained. The site contains moderate landscaping consisting of trees and grass, which are served by in-ground irrigation systems. Amenities consist of a water fountain and trash receptacles, which are in poor condition. The concrete sidewalk is in fair overall condition. The asphalt paved parking lot areas are in fair to poor condition and require overlay, sealing and striping. Site lighting is located throughout the parking lot.

Recommended Additional Studies

No additional studies recommended at this time.

Park Amenities Observed

Amenity Type			Qty / ~Area	Description	Condition			Comments
					Good	Fair	Poor	
Site Development								
G2020	**Parking**							
		Number of Cars	380	Asphalt pavement			X	Needs seal and stripe
		Accessible Parking	2	Asphalt pavement			X	No Van parking
G2030	**Walks**							
		Concrete	8,500	Sidewalk		X		Some areas need repair
G4020	**Lighting**							
		Pathway (8'-12')		N/A				
G2050	**Landscape**							
		Grass (Turf)	112,000	Throughout park		X		
		Trees		Throughout park		X		
G2057	**Irrigation**							
		Sprinkler system		Throughout park		X		
G2045	**Site Furnishings**							
		Drinking Fountain	1	Monument platform		X		
		Receptacle, Trash	3	Throughout park			X	
G2046	**Fountains, Pools, & Watercourses**							
		No Water Facilities Present						
G2047	**Playing Fields**							
		No Playing Fields Present						

Amenity Type			Qty / ~Area	Description	Condition			Comments
					Good	Fair	Poor	
G2049	**Miscellaneous Structures**							
		Monument building	1	Monument is at 75 feet high		X		
G2050	**Miscellaneous Recreation**							
		There is no Miscellaneous Recreation						

Facility Condition Index (FCI)

One of the major goals of the FCA is to calculate each building's Facility Condition Index (FCI), which provides a theoretical objective indication of a building's overall condition. By definition, the FCI is defined as the ratio of the cost of current needs divided by current replacement value (CRV) of the facility. The chart below presents the industry standard ranges and cut-off points.

FCI Ranges and Description	
0 – 5%	In new or well-maintained condition, with little or no visual evidence of wear or deficiencies.
5 – 10%	Subjected to wear but is still in a serviceable and functioning condition.
10 – 30%	Subjected to hard or long-term wear. Nearing the end of its useful or serviceable life.
30% and above	Has reached the end of its useful or serviceable life. Renewal is now necessary.

The deficiencies and lifecycle needs identified in this assessment provide the basis for a portfolio-wide capital improvement funding strategy. In addition to the current FCI, extended FCI's have been developed to provide owners the intelligence needed to plan and budget for the "keep-up costs" for their facilities. As such the 3-year, 5-year, and 10-year FCI's are calculated by dividing the anticipated needs of those respective time periods by current replacement value. As a final point, the FCI's ultimately provide more value when used to relatively compare facilities across a portfolio instead of being over-analyzed and scrutinized as stand-alone values. The table below summarizes the individual findings for this FCA:

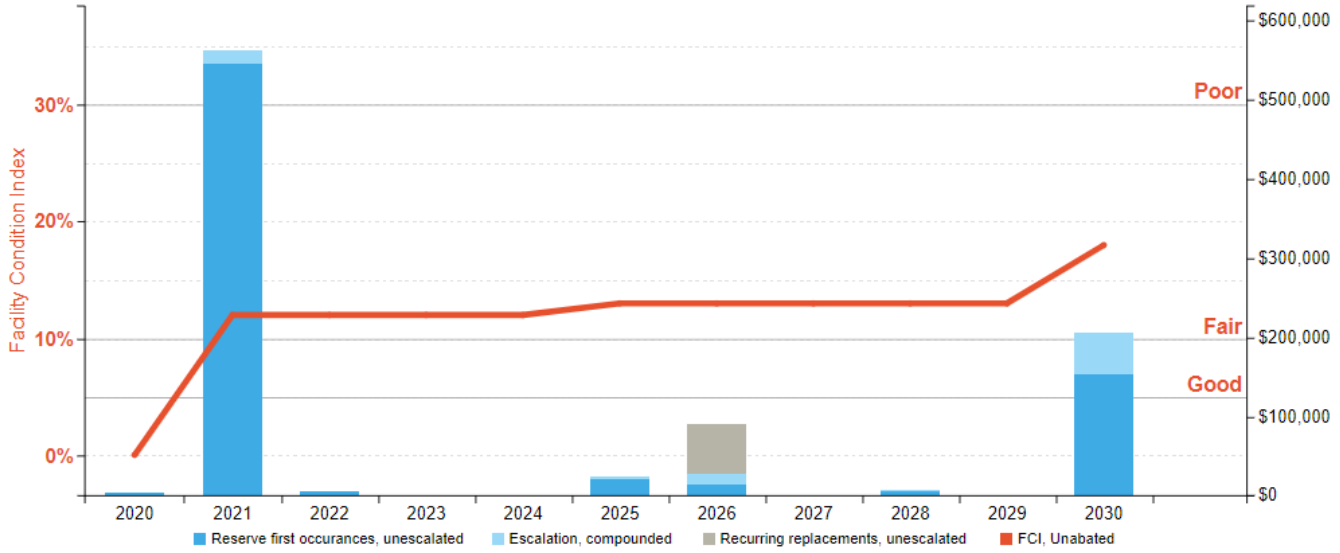
FCI Analysis | Bicknell Park (7.61 acres)		
Replacement Value *$ 4,640,900*	*Total SF* *331,491*	*Cost/SF* *$ 14*
Current FCI	$ 4,800	0.1 %
3-Year	$ 573,400	12.4 %
5-Year	$ 598,600	12.9 %
10-Year	$ 827,500	17.8 %

The orange line in the graph below forecasts what would happen to the FCI (left Y axis) over time, assuming zero capital expenditures. The capital expenditures allocated for each year (blue bars) are associated with the dollar amounts along the right Y axis.

Needs by Year with Unaddressed FCI Over Time

FCI Analysis: Bicknell Park (7.61 acres)

Replacement Value: $ 4,640,874; Inflation rate: 3.0%



Immediate Needs

Facility/Building	Total Items	Total Cost

Cost Estimate: $5,600

**$**$$$

The trash containers are damaged. - AssetCALC ID: 1821381

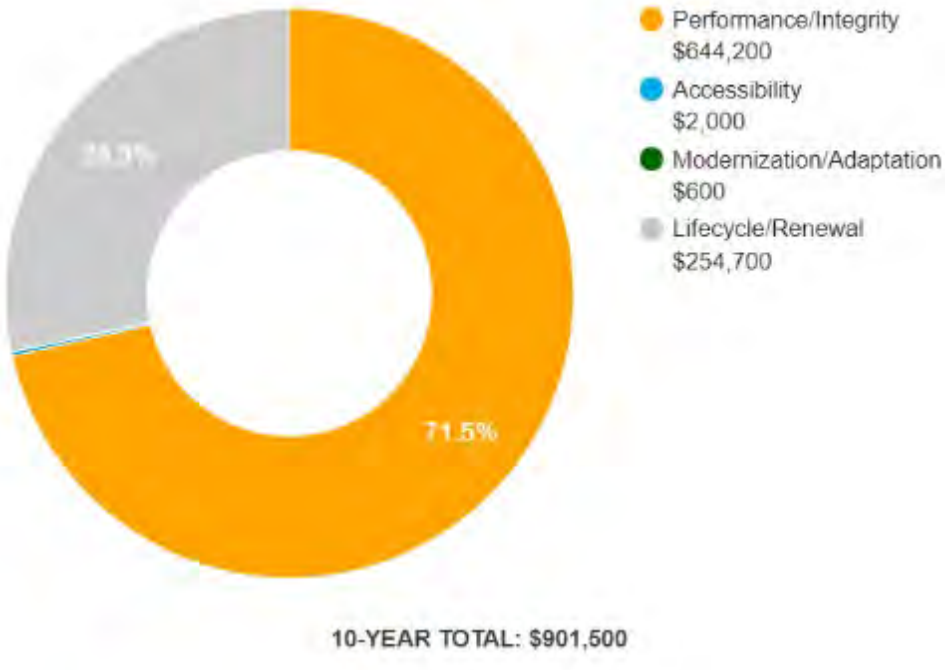
Plan Types

Each line item in the cost database is assigned a Plan Type, which is the primary reason or rationale for the recommended replacement, repair, or other corrective action. This is the "why" part of the equation. A cost or line item may commonly have more than one applicable Plan Type; however, only one Plan Type will be assigned based on the "best" fit, typically the one with the greatest significance.

Plan Type Descriptions

Safety	■	An observed or reported unsafe condition that if left unaddressed could result in injury; a system or component that presents potential liability risk.
Performance/Integrity	■	Component or system has failed, is almost failing, performs unreliably, does not perform as intended, and/or poses risk to overall system stability.
Accessibility	■	Does not meet ADA, UFAS, and/or other handicap accessibility requirements.
Environmental	■	Improvements to air or water quality, including removal of hazardous materials from the building or site.
Retrofit/Adaptation	■	Components, systems, or spaces recommended for upgrades in in order to meet current standards, facility usage, or client/occupant needs.
Lifecycle/Renewal	■	Any component or system that is not currently deficient or problematic but for which future replacement or repair is anticipated and budgeted.

Plan Type Distribution (by Cost)



2. Building and Site Information

Systems Summary

System	Description	Condition
Structure	Concrete columns and concrete-framed roof	Good
Façade	Exposed concrete	Fair
Roof	Primary: Vaulted construction with concrete finishes	Fair
Interiors	Not Applicable	Fair
Elevators	None	--
Plumbing	Domestic water for drinking fountain	--
HVAC	No heating or cooling system	--
Fire Suppression	Hydrants	Fair

Systems Summary

Electrical	Source & Distribution: Main panel with copper wiring Interior Lighting: In-ground well lights Emergency: None	Fair
Fire Alarm	None	--
Equipment/Special	Security system	--
Site Pavement	Brick pavers on platform at base of monument Asphalt lots with areas of concrete and concrete sidewalks, curbs and ramps	Fair Poor
Site Development	Property signage Trash receptacles Drinking fountain	Fair
Landscaping and Topography	Moderate landscaping features Irrigation present No retaining walls Low to moderate site slopes throughout	Fair
Utilities	Municipal water and sewer Local utility-provided electric	Good
Site Lighting	Pole-mounted: HPS	Fair
Ancillary Structures	None	--
Accessibility	Presently it does not appear an accessibility study is needed for this property.	
Key Issues and Findings	Heavy asphalt wear, damaged trash receptacle, pavers around well lights	

Systems Expenditure Forecast

System	Immediate	Short Term (1-2 yr)	Near Term (3-5 yr)	Med Term (6-10 yr)	Long Term (11-20 yr)	TOTAL
Structure	-	-	-	-	-	-
Facade	-	-	$19,566	-	$26,295	$45,861
Interiors	-	-	-	-	$69,193	$69,193

Site Development	-	$5,988	-	-	$766,919	$772,787
Accessibility	$2,009	-	-	-	-	$2,009
TOTALS	**$4,800**	**$567,400**	**$26,500**	**$303,100**	**$1,074,500**	**$1,976,100**

3. Property Space Use and Observed Areas

Unit Allocation

All 7.61 acres of the property are occupied by City of Montebello. The spaces are mostly public park with single monument structure at the center.

Areas Observed

The interior spaces were observed in order to gain a clear understanding of the property's overall condition. Other areas accessed included the site within the property boundaries, the exterior of the property.

Key Spaces Not Observed

Areas of note that were either inaccessible or not observed for other reasons are listed here:

- Roof, Lack of ladder or other means of egress

4. ADA Accessibility

Generally, Title II of the Americans with Disabilities Act (ADA) prohibits discrimination by entities to access and use of "areas of public accommodations" and "public facilities" on the basis of disability. Regardless of their age, these areas and facilities must be maintained and operated to comply with the Americans with Disabilities Act Accessibility Guidelines (ADAAG).

A public entity (i.e. city governments) shall operate each service, program, or activity so that the service, program, or activity, when viewed in its entirety, is readily accessible to and usable by individuals with disabilities.

However, this does not:

1. Necessarily require a public entity to make each of its existing facilities accessible to and usable by individuals with disabilities;
2. Require a public entity to take any action that would threaten or destroy the historic significance of an historic property; or
3. Require a public entity to take any action that it can demonstrate would result in a fundamental alteration in the nature of a service, program, or activity or in undue financial and administrative burdens. In those circumstances where personnel of the public entity believe that the proposed action would fundamentally alter the service, program, or activity or would result in undue financial and administrative burdens, a public entity has the burden of proving that compliance with 35.150(a) of this part would result in such alteration or burdens. The decision that compliance would result in such alteration or burdens must be made by the head of a public entity or his or her designee after considering all resources available for use in the funding and operation of the service, program, or activity, and must be accompanied by a written statement of the reasons for reaching that conclusion. If an action would result in such an alteration or such burdens, a public entity shall take any other action that would not result in such an alteration or such burdens but would nevertheless ensure that individuals with disabilities receive the benefits or services provided by the public entity.

During the FCA, Bureau Veritas performed a limited high-level accessibility review of the facility non-specific to any local regulations or codes. The scope of the visual observation was limited to those areas and categories set forth in the tables throughout this report. It is understood by the Client that the limited observations described herein do not comprise a full ADA Compliance Survey, and that such a survey is beyond the scope of Bureau Veritas's undertaking. Only a representative sample of areas was observed and actual measurements were not taken to verify compliance.

An accessibility study has not been performed at the site. Although no significant issues were identified, a comprehensive ADA Compliance Survey may reveal specific aspects of the property that are not in full compliance.

Removal of barriers to accessibility should be addressed from a liability standpoint in order to comply with federal law, but the barriers may or may not be building code violations. The Americans with Disabilities Act Accessibility Guidelines are part of the ADA federal civil rights law pertaining to the disabled and are not a construction code. State and local jurisdictions have adopted the ADA Guidelines or have adopted other standards for accessibility as part of their construction codes.

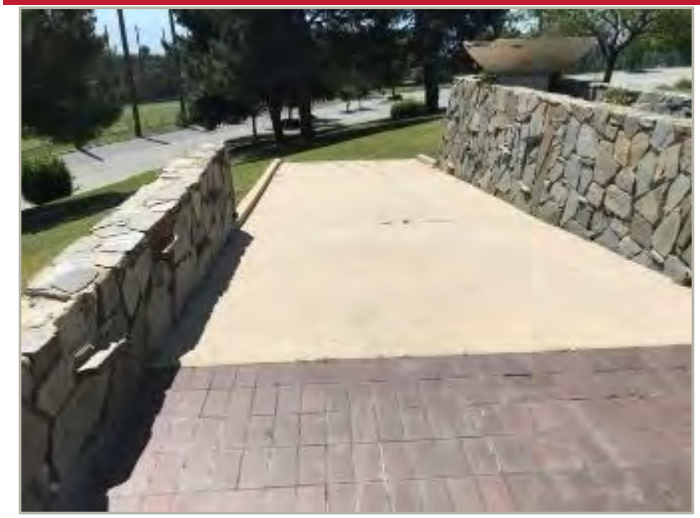
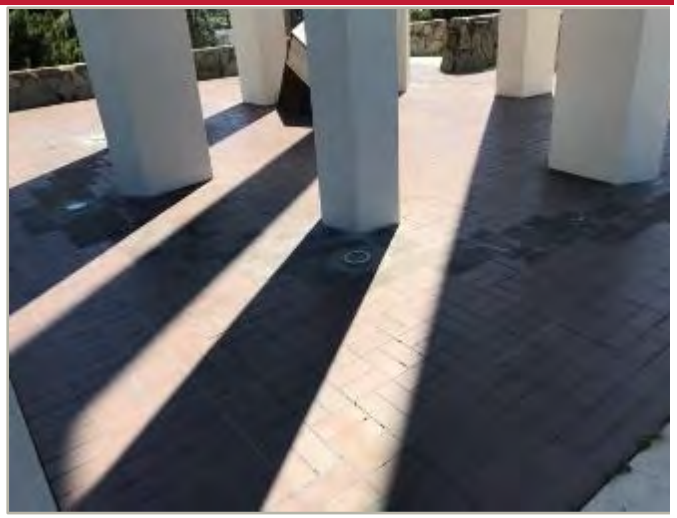
Campus Accessibility: Photographic Overview



Building ramp entrance



Interior path of travel

Interior path of travel

Interior path of travel

Accessible parking

Exterior path of travel

The table below is intended to be used as a general reference guide to help differentiate the orders of magnitude between some of the more commonly observed accessibility issues. The table is not intended to be all-inclusive, and boxes checked in the tables above do not necessarily mean those specific problems or shortcomings cited as examples below exist at the subject buildings and sites. Reference the photos above and/or *Key Findings* section for visuals and/or more specifics about the subject site conditions.

Reference Guide

	Major Issues *(ADA study recommended)*	Moderate Issues *(ADA study recommended)*	Minor/No Issues
Parking	- Needs full reconstruction - Excessive slopes over 3% require major re-grading - No level locations to add required spaces	- No or non-compliant curb cuts - Moderate difficulty to add required accessible spaces - Slopes close to compliant	- Painting of markings needed - Signage height non-compliant - Signage missing
Exterior Path of Travel	- Large areas of sidewalks with excessive slopes - No ramp when needed - Ramps with excessive slopes	- Ramps need rails - Ramps need rail extensions - Need significant # of lever handles - All or most entrance door exterior maneuvering clearance areas with excessive slopes	- One entrance door exterior maneuvering clearance area with excessive slope - A few door knobs instead of lever handles - Non-compliant signage
Interior Path of Travel	- All or most interior doors appear less than 32” wide - Corridors less than 36” wide - No ramp when needed - Ramps with excessive slopes - Non-compliant treads/risers at means of egress stairways	- Single height drinking fountains - Drinking fountain too high or protrudes into accessible route - Ramps need rails - Ramps need rail extensions - Need significant # of lever handles - Non-compliant rail extensions at egress stairways - All/most door thresholds high	- One door threshold too high - A few door knobs instead of lever handles - Non-compliant door pressures - Non-compliant signage - Switches not within reach range
Public Use Restrooms	- No ADA RR on each accessible floor - Restroom(s) too small - Entire restroom(s) requires renovation - Water closet clearance requires moving walls	- Interior doors appear less than 32” wide - Missing or non-compliant grab bars - Easily fixable clearance issues	- Minor height adjustments required - Non-compliant door pressures - Missing a visual strobe (only required if audible fire alarm already present) - Missing lavatory pipe wraps - Signage not compliant
Elevators	- No elevator present when required - Elevator cab too small	- Panel control buttons not at compliant height - No hands-free emergency communication system - Elevator only has mechanical stops	- Audible/visual signals at every floor may be lacking - Minor signage / Braille issues
Kitchens/Kitchenettes	- Clear space for each appliance not present - Clearance between opposing counters too narrow	- Sink and counter too high - Sink knee and toe clearance not provided where required (built-in) - Less than 50% of cabinetry within reach range	- Dispensers not within reach range - Switches not within reach range - Missing sink pipe wraps if knee and toe clearance required

5. Purpose and Scope

Purpose

Bureau Veritas was retained by the client to render an opinion as to the Property's current general physical condition on the day of the site visit.

Based on the observations, interviews and document review outlined below, this report identifies significant deferred maintenance issues, existing deficiencies, and material code violations of record, which affect the Property's use. Opinions are rendered as to its structural integrity, building system condition and the Property's overall condition. The report also notes building systems or components that have realized or exceeded their typical expected useful lives.

The physical condition of building systems and related components are typically defined as being in one of five condition ratings. For the purposes of this report, the following definitions are used:

Condition Ratings	
Excellent	New or very close to new; component or system typically has been installed within the past year, sound and performing its function. Eventual repair or replacement will be required when the component or system either reaches the end of its useful life or fails in service.
Good	Satisfactory as-is. Component or system is sound and performing its function, typically within the first third of its lifecycle. However, it may show minor signs of normal wear and tear. Repair or replacement will be required when the component or system either reaches the end of its useful life or fails in service.
Fair	Showing signs of wear and use but still satisfactory as-is, typically near the median of its estimated useful life. Component or system is performing adequately at this time but may exhibit some signs of wear, deferred maintenance, or evidence of previous repairs. Repair or replacement will be required due to the component or system's condition and/or its estimated remaining useful life.
Poor	Component or system is significantly aged, flawed, functioning intermittently or unreliably; displays obvious signs of deferred maintenance; shows evidence of previous repair or workmanship not in compliance with commonly accepted standards; has become obsolete; or exhibits an inherent deficiency. The present condition could contribute to or cause the deterioration of contiguous elements or systems. Either full component replacement is needed or repairs are required to restore to good condition, prevent premature failure, and/or prolong useful life.
Failed	Component or system has ceased functioning or performing as intended. Replacement, repair, or other significant corrective action is recommended or required.
Not Applicable	Assigning a condition does not apply or make logical sense, most commonly due to the item in question not being present.

Scope

The standard scope of the Facility Condition Assessment includes the following:

- Visit the Property to evaluate the general condition of the building and site improvements, review available construction documents in order to familiarize ourselves with, and be able to comment on, the in-place construction systems, life safety, mechanical, electrical, and plumbing systems, and the general built environment.
- Identify those components that are exhibiting deferred maintenance issues and provide cost estimates for Immediate Costs and Replacement Reserves based on observed conditions, maintenance history and industry standard useful life estimates. This will include the review of documented capital improvements completed within the last five-year period and work currently contracted for, if applicable.
- Provide a full description of the Property with descriptions of in-place systems and commentary on observed conditions.
- Provide a high-level categorical general statement regarding the subject Property's compliance to Title III of the Americans with Disabilities Act. This will not constitute a full ADA survey, but will help identify exposure to issues and the need for further review.
- Obtain background and historical information about the facility from a building engineer, property manager, maintenance staff, or other knowledgeable source. The preferred methodology is to have the client representative or building occupant complete a Pre-Survey Questionnaire (PSQ) in advance of the site visit. Common alternatives include a verbal interview just prior to or during the walk-through portion of the assessment.
- Review maintenance records and procedures with the in-place maintenance personnel.
- Observe a representative sample of the interior spaces/units, including vacant spaces/units, to gain a clear understanding of the property's overall condition. Other areas to be observed include the exterior of the property, the roofs, interior common areas, and the significant mechanical, electrical and elevator equipment rooms.
- Provide recommendations for additional studies, if required, with related budgetary information.
- Provide an Executive Summary at the beginning of this report, which highlights key findings and includes a Facility Condition Index as a basis for comparing the relative conditions of the buildings within the portfolio.

6. Opinions of Probable Costs

Cost estimates are attached throughout this report, with the Replacement Reserves in the appendix.

These estimates are based on Invoice or Bid Document/s provided either by the Owner/facility and construction costs developed by construction resources such as *R.S. Means, CBRE Whitestone,* and *Marshall & Swift,* Bureau Veritas's experience with past costs for similar properties, city cost indexes, and assumptions regarding future economic conditions.

Opinions of probable costs should only be construed as preliminary, order of magnitude budgets. Actual costs most probably will vary from the consultant's opinions of probable costs depending on such matters as type and design of suggested remedy, quality of materials and installation, manufacturer and type of equipment or system selected, field conditions, whether a physical deficiency is repaired or replaced in whole, phasing or bundling of the work (if applicable), quality of contractor, quality of project management exercised, market conditions, use of subcontractors, and whether competitive pricing is solicited, etc. Certain opinions of probable costs cannot be developed within the scope of this guide without further study. Opinions of probable cost for further study should be included in the FCA.

Methodology

Based upon site observations, research, and judgment, along with referencing Expected Useful Life (EUL) tables from various industry sources, Bureau Veritas opines as to when a system or component will most probably necessitate replacement. Accurate historical replacement records, if provided, are typically the best source of information. Exposure to the elements, initial quality and installation, extent of use, the quality and amount of preventive maintenance exercised, etc., are all factors that impact the effective age of a system or component. As a result, a system or component may have an effective age that is greater or less than its actual chronological age. The Remaining Useful Life (RUL) of a component or system equals the EUL less its *effective age*, whether explicitly or implicitly stated. Projections of Remaining Useful Life (RUL) are based primarily on age and condition with the presumption of continued use and maintenance of the Property similar to the observed and reported past use and maintenance practices, in conjunction with the professional judgment of Bureau Veritas's assessors. Significant changes in occupants and/or usage may affect the service life of some systems or components.

Where quantities could not be or were not derived from an actual construction document take-off or facility walk-through, and/or where systemic costs are more applicable or provide more intrinsic value, budgetary square foot and gross square foot costs are used. Estimated costs are based on professional judgment and the probable or actual extent of the observed defect, inclusive of the cost to design, procure, construct and manage the corrections.

Definitions

Immediate Needs

Immediate Needs are line items that require immediate action as a result of: (1) material existing or potential unsafe conditions, (2) failed or imminent failure of mission critical building systems or components, or (3) conditions that, if not addressed, have the potential to result in, or contribute to, critical element or system failure within one year or will most probably result in a significant escalation of its remedial cost.

For database and reporting purposes the line items with RUL=0, and commonly associated with *Safety* or *Performance/Integrity* Plan Types, are considered Immediate Needs.

Replacement Reserves

Cost line items traditionally called Replacement Reserves (equivalently referred to as Lifecycle/Renewals) are for recurring probable renewals or expenditures, which are not classified as operation or maintenance expenses. The replacement reserves should be budgeted for in advance on an annual basis. Replacement Reserves are reasonably predictable both in terms of frequency and cost. However, Replacement Reserves may also include components or systems that have an indeterminable life but, nonetheless, have a potential for failure within an estimated time period.

Replacement Reserves generally exclude systems or components that are estimated to expire after the reserve term and are not considered material to the structural and mechanical integrity of the subject property. Furthermore, systems and components that are not deemed to have a material effect on the use of the Property are also excluded. Costs that are caused by acts of God, accidents, or other occurrences that are typically covered by insurance, rather than reserved for, are also excluded.

Replacement costs are solicited from ownership/property management, Bureau Veritas's discussions with service companies, manufacturers' representatives, and previous experience in preparing such schedules for other similar facilities. Costs for work performed by the ownership's or property management's maintenance staff are also considered.

Bureau Veritas's reserve methodology involves identification and quantification of those systems or components requiring capital reserve funds within the assessment period. The assessment period is defined as the effective age plus the reserve term. Additional information concerning system's or component's respective replacement costs (in today's dollars), typical expected useful lives, and remaining useful lives were estimated so that a funding schedule could be prepared. The Replacement Reserves Schedule presupposes that all required remedial work has been performed or that monies for remediation have been budgeted for items defined as Immediate Needs.

For the purposes of 'bucketizing' the System Expenditure Forecasts in this report, the Replacement Reserves have been subdivided and grouped as follows: Short Term (years 1-3), Near Term (years 4-5), Medium Term (years 6-10), and Long Term (years 11-20).

Key Findings

In an effort to highlight the most significant cost items and not be overwhelmed by the Replacement Reserves report in its totality, a subsection of Key Findings is included within the Executive Summary section of this report. Key Findings typically include repairs or replacements of deficient items within the first five-year window, as well as the most significant high-dollar line items that fall anywhere within the ten-year term. Note that while there is some subjectivity associated with identifying the Key Findings, the Immediate Needs are always included as a subset.

Exceedingly Aged

A fairly common scenario encountered during the assessment process, and a frequent source of debate, occurs when classifying and describing "very old" systems or components that are still functioning adequately and do not appear nor were reported to be in any way deficient. To help provide some additional intelligence on these items, such components will be tagged in the database as Exceedingly Aged. This designation will be reserved for mechanical or electrical systems or components that have aged well beyond their industry standard lifecycles, typically at least 15 years beyond and/or twice their Estimated Useful Life (EUL). In tandem with this designation, these items will be assigned a Remaining Useful Life (RUL) not less than two years but not greater than 1/3 of their standard EUL. As such the recommended replacement time for these components will reside outside the typical Short Term window but will not be pushed 'irresponsibly' (too far) into the future.

7. Certification

The City of Montebello (the Client) retained Bureau Veritas to perform this Facility Condition Assessment in connection with its continued operation of Bicknell Park, 901 Via San Clemente, Montebello, California 90640 the "Property". It is our understanding that the primary interest of the Client is to locate and evaluate materials and building system defects that might significantly affect the value of the property and to determine if the present Property has conditions that will have a significant impact on its continued operations.

The conclusions and recommendations presented in this report are based on the brief review of the plans and records made available to our Project Manager during the site visit, interviews of available property management personnel and maintenance contractors familiar with the Property, appropriate inquiry of municipal authorities, our Project Manager's walk-through observations during the site visit, and our experience with similar properties.

No testing, exploratory probing, dismantling or operating of equipment or in-depth studies were performed unless specifically required under the *Purpose and Scope* section of this report. This assessment did not include engineering calculations to determine the adequacy of the Property's original design or existing systems. Although walk-through observations were performed, not all areas may have been observed (see Section 1 for specific details). There may be defects in the Property, which were in areas not observed or readily accessible, may not have been visible, or were not disclosed by management personnel when questioned. The report describes property conditions at the time that the observations and research were conducted.

This report has been prepared for and is exclusively for the use and benefit of the Client identified on the cover page of this report. The purpose for which this report shall be used shall be limited to the use as stated in the contract between the client and Bureau Veritas.

This report, or any of the information contained therein, is not for the use or benefit of, nor may it be relied upon by any other person or entity, for any purpose without the advance written consent of Bureau Veritas. Any reuse or distribution without such consent shall be at the client's or recipient's sole risk, without liability to Bureau Veritas.

Any reuse or distribution of this report without such consent shall be at the Client and the recipient's sole risk, without liability to Bureau Veritas.

Significant/Systemic Findings and Deficiencies

Historical Summary

The Dutcher Tot Lot was originally constructed in the 1960's. There are no restroom buildings or any other structures, the facility is an open field with grass and trees. The site is not open to the public and appears to have been abandoned for some time.

Architectural

The Dutcher Tot Lot is surrounded with a chain-link fence and gates. The site is on a small hill sloped from north to south with a drainage swale located in the south west of the site.

Mechanical, Electrical, Plumbing and Fire (MEPF)

There are no heating or cooling systems. There are no structures at this facility.

There is no electrical system at this facility.

The only plumbing piping system or any source for water is the irrigation system, according to the POC,.

Site

There is no access to the public on this site. It is closed and it is not being utilized for any use at the present time. Only one small driveway for service vehicle at the main entrance.

Recommended Additional Studies

No additional studies recommended at this time.

Facility Condition Index (FCI)

One of the major goals of the FCA is to calculate each building's Facility Condition Index (FCI), which provides a theoretical objective indication of a building's overall condition. By definition, the FCI is defined as the ratio of the cost of current needs divided by current replacement value (CRV) of the facility. The chart below presents the industry standard ranges and cut-off points.

FCI Ranges and Description	
0 – 5%	In new or well-maintained condition, with little or no visual evidence of wear or deficiencies.
5 – 10%	Subjected to wear but is still in a serviceable and functioning condition.
10 – 30%	Subjected to hard or long-term wear. Nearing the end of its useful or serviceable life.
30% and above	Has reached the end of its useful or serviceable life. Renewal is now necessary.

The deficiencies and lifecycle needs identified in this assessment provide the basis for a portfolio-wide capital improvement funding strategy. In addition to the current FCI, extended FCI's have been developed to provide owners the intelligence needed to plan and budget for the "keep-up costs" for their facilities. As such the 3-year, 5-year, and 10-year FCI's are calculated by dividing the anticipated needs of those respective time periods by current replacement value. As a final point, the FCI's ultimately provide more value when used to relatively compare facilities across a portfolio instead of being over-analyzed and scrutinized as stand-alone values. The table below summarizes the individual findings for this FCA:

FCI Analysis

Not applicable since there are not any structures.

The orange line in the graph below forecasts what would happen to the FCI (left Y axis) over time, assuming zero capital expenditures. The capital expenditures allocated for each year (blue bars) are associated with the dollar amounts along the right Y axis.

Needs by Year with Unaddressed FCI Over Time

Not applicable since there are not any structures.

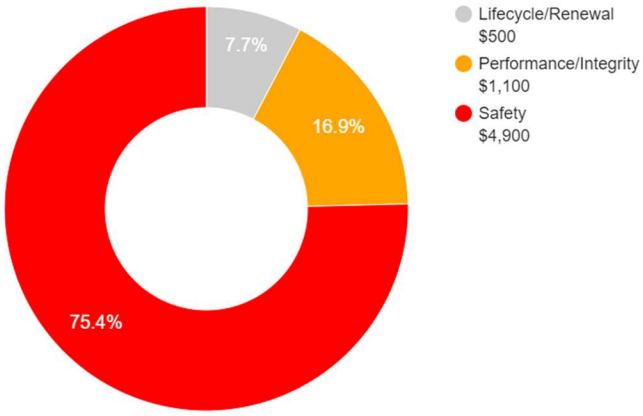
Plan Types

Each line item in the cost database is assigned a Plan Type, which is the primary reason or rationale for the recommended replacement, repair, or other corrective action. This is the "why" part of the equation. A cost or line item may commonly have more than one applicable Plan Type; however, only one Plan Type will be assigned based on the "best" fit, typically the one with the greatest significance.

Plan Type Descriptions	
Safety	An observed or reported unsafe condition that if left unaddressed could result in injury; a system or component that presents potential liability risk.
Performance/Integrity	Component or system has failed, is almost failing, performs unreliably, does not perform as intended, and/or poses risk to overall system stability.
Accessibility	Does not meet ADA, UFAS, and/or other handicap accessibility requirements.
Environmental	Improvements to air or water quality, including removal of hazardous materials from the building or site.
Retrofit/Adaptation	Components, systems, or spaces recommended for upgrades in in order to meet current standards, facility usage, or client/occupant needs.
Lifecycle/Renewal	Any component or system that is not currently deficient or problematic but for which future replacement or repair is anticipated and budgeted.

Plan Type Distribution (by Cost)



10-YEAR TOTAL: $6,500

2. Building and Site Information

Systems Summary

TOTALS	**$4,900**	**$1,500**	**-**	**$100**	**$91,600**	**$98,100**

3. Property Space Use and Observed Areas

Unit Allocation

All 0.040 acres of the property are occupied by City of Montebello. The spaces are mostly open field with trees and grass and is not in use at the time of this assessment.

Areas Observed

The interior spaces were observed from outside the fence in order to gain a clear understanding of the property's overall condition. Other areas accessed included the site within the property boundaries, the exterior of the property.

Key Spaces Not Observed

Areas of note that were either inaccessible or not observed for other reasons are listed here:

- Field, locked gate with no keys.

4. ADA Accessibility

Generally, Title II of the Americans with Disabilities Act (ADA) prohibits discrimination by entities to access and use of "areas of public accommodations" and "public facilities" on the basis of disability. Regardless of their age, these areas and facilities must be maintained and operated to comply with the Americans with Disabilities Act Accessibility Guidelines (ADAAG).

A public entity (i.e. city governments) shall operate each service, program, or activity so that the service, program, or activity, when viewed in its entirety, is readily accessible to and usable by individuals with disabilities.

However, this does not:

1. Necessarily require a public entity to make each of its existing facilities accessible to and usable by individuals with disabilities;
2. Require a public entity to take any action that would threaten or destroy the historic significance of an historic property; or
3. Require a public entity to take any action that it can demonstrate would result in a fundamental alteration in the nature of a service, program, or activity or in undue financial and administrative burdens. In those circumstances where personnel of the public entity believe that the proposed action would fundamentally alter the service, program, or activity or would result in undue financial and administrative burdens, a public entity has the burden of proving that compliance with 35.150(a) of this part would result in such alteration or burdens. The decision that compliance would result in such alteration or burdens must be made by the head of a public entity or his or her designee after considering all resources available for use in the funding and operation of the service, program, or activity, and must be accompanied by a written statement of the reasons for reaching that conclusion. If an action would result in such an alteration or such burdens, a public entity shall take any other action that would not result in such an alteration or such burdens but would nevertheless ensure that individuals with disabilities receive the benefits or services provided by the public entity.

During the FCA, Bureau Veritas performed a limited high-level accessibility review of the facility non-specific to any local regulations or codes. The scope of the visual observation was limited to those areas and categories set forth in the tables throughout this report. It is understood by the Client that the limited observations described herein do not comprise a full ADA Compliance Survey, and that such a survey is beyond the scope of Bureau Veritas's undertaking. Only a representative sample of areas was observed and actual measurements were not taken to verify compliance.

The facility was originally constructed in 1960's. The facility was not subsequently renovated. Complaints about accessibility issues have not been received by the property management. The property does not have associated prior litigation related to existing barriers or previously removed barriers.

An accessibility study has not been performed at the site. Although no significant issues were identified, a comprehensive ADA Compliance Survey may reveal specific aspects of the property that are not in full compliance.

Removal of barriers to accessibility should be addressed from a liability standpoint in order to comply with federal law, but the barriers may or may not be building code violations. The Americans with Disabilities Act Accessibility Guidelines are part of the ADA federal civil rights law pertaining to the disabled and are not a construction code. State and local jurisdictions have adopted the ADA Guidelines or have adopted other standards for accessibility as part of their construction codes.

Campus Accessibility: Photographic Overview

Main Entrance

Interior space

Sidewalk

Service vehicle driveway

The table below is intended to be used as a general reference guide to help differentiate the orders of magnitude between some of the more commonly observed accessibility issues. The table is not intended to be all-inclusive, and boxes checked in the tables above do not necessarily mean those specific problems or shortcomings cited as examples below exist at the subject buildings and sites. Reference the photos above and/or *Key Findings* section for visuals and/or more specifics about the subject site conditions.

Reference Guide

	Major Issues *(ADA study recommended)*	Moderate Issues *(ADA study recommended)*	Minor/No Issues
Parking	- Needs full reconstruction - Excessive slopes over 3% require major re-grading - No level locations to add required spaces	- No or non-compliant curb cuts - Moderate difficulty to add required accessible spaces - Slopes close to compliant	- Painting of markings needed - Signage height non-compliant - Signage missing
Exterior Path of Travel	- Large areas of sidewalks with excessive slopes - No ramp when needed - Ramps with excessive slopes	- Ramps need rails - Ramps need rail extensions - Need significant # of lever handles - All or most entrance door exterior maneuvering clearance areas with excessive slopes	- One entrance door exterior maneuvering clearance area with excessive slope - A few doorknobs instead of lever handles - Non-compliant signage
Interior Path of Travel	- All or most interior doors appear less than 32” wide - Corridors less than 36” wide - No ramp when needed - Ramps with excessive slopes - Non-compliant treads/risers at means of egress stairways	- Single height drinking fountains - Drinking fountain too high or protrudes into accessible route - Ramps need rails - Ramps need rail extensions - Need significant # of lever handles - Non-compliant rail extensions at egress stairways - All/most door thresholds high	- One door threshold too high - A few doorknobs instead of lever handles - Non-compliant door pressures - Non-compliant signage - Switches not within reach range
Public Use Restrooms	- No ADA RR on each accessible floor - Restroom(s) too small - Entire restroom(s) requires renovation - Water closet clearance requires moving walls	- Interior doors appear less than 32” wide - Missing or non-compliant grab bars - Easily fixable clearance issues	- Minor height adjustments required - Non-compliant door pressures - Missing a visual strobe (only required if audible fire alarm already present) - Missing lavatory pipe wraps - Signage not compliant
Elevators	- No elevator present when required - Elevator cab too small	- Panel control buttons not at compliant height - No hands-free emergency communication system - Elevator only has mechanical stops	- Audible/visual signals at every floor may be lacking - Minor signage / Braille issues
Kitchens/Kitchenettes	- Clear space for each appliance not present - Clearance between opposing counters too narrow	- Sink and counter too high - Sink knee and toe clearance not provided where required (built-in) - Less than 50% of cabinetry within reach range	- Dispensers not within reach range - Switches not within reach range - Missing sink pipe wraps if knee and toe clearance required

5. Purpose and Scope

Purpose

Bureau Veritas was retained by the client to render an opinion as to the Property's current general physical condition on the day of the site visit.

Based on the observations, interviews and document review outlined below, this report identifies significant deferred maintenance issues, existing deficiencies, and material code violations of record, which affect the Property's use. Opinions are rendered as to its structural integrity, building system condition and the Property's overall condition. The report also notes building systems or components that have realized or exceeded their typical expected useful lives.

The physical condition of building systems and related components are typically defined as being in one of five condition ratings. For the purposes of this report, the following definitions are used:

Condition Ratings	
Excellent	New or very close to new; component or system typically has been installed within the past year, sound and performing its function. Eventual repair or replacement will be required when the component or system either reaches the end of its useful life or fails in service.
Good	Satisfactory as-is. Component or system is sound and performing its function, typically within the first third of its lifecycle. However, it may show minor signs of normal wear and tear. Repair or replacement will be required when the component or system either reaches the end of its useful life or fails in service.
Fair	Showing signs of wear and use but still satisfactory as-is, typically near the median of its estimated useful life. Component or system is performing adequately at this time but may exhibit some signs of wear, deferred maintenance, or evidence of previous repairs. Repair or replacement will be required due to the component or system's condition and/or its estimated remaining useful life.
Poor	Component or system is significantly aged, flawed, functioning intermittently or unreliably; displays obvious signs of deferred maintenance; shows evidence of previous repair or workmanship not in compliance with commonly accepted standards; has become obsolete; or exhibits an inherent deficiency. The present condition could contribute to or cause the deterioration of contiguous elements or systems. Either full component replacement is needed or repairs are required to restore to good condition, prevent premature failure, and/or prolong useful life.
Failed	Component or system has ceased functioning or performing as intended. Replacement, repair, or other significant corrective action is recommended or required.
Not Applicable	Assigning a condition does not apply or make logical sense, most commonly due to the item in question not being present.

Scope

The standard scope of the Facility Condition Assessment includes the following:

- Visit the Property to evaluate the general condition of the building and site improvements, review available construction documents in order to familiarize ourselves with, and be able to comment on, the in-place construction systems, life safety, mechanical, electrical, and plumbing systems, and the general built environment.
- Identify those components that are exhibiting deferred maintenance issues and provide cost estimates for Immediate Costs and Replacement Reserves based on observed conditions, maintenance history and industry standard useful life estimates. This will include the review of documented capital improvements completed within the last five-year period and work currently contracted for, if applicable.
- Provide a full description of the Property with descriptions of in-place systems and commentary on observed conditions.
- Provide a high-level categorical general statement regarding the subject Property's compliance to Title III of the Americans with Disabilities Act. This will not constitute a full ADA survey, but will help identify exposure to issues and the need for further review.
- Obtain background and historical information about the facility from a building engineer, property manager, maintenance staff, or other knowledgeable source. The preferred methodology is to have the client representative or building occupant complete a Pre-Survey Questionnaire (PSQ) in advance of the site visit. Common alternatives include a verbal interview just prior to or during the walk-through portion of the assessment.
- Review maintenance records and procedures with the in-place maintenance personnel.
- Observe a representative sample of the interior spaces/units, including vacant spaces/units, to gain a clear understanding of the property's overall condition. Other areas to be observed include the exterior of the property, the roofs, interior common areas, and the significant mechanical, electrical and elevator equipment rooms.
- Provide recommendations for additional studies, if required, with related budgetary information.
- Provide an Executive Summary at the beginning of this report, which highlights key findings and includes a Facility Condition Index as a basis for comparing the relative conditions of the buildings within the portfolio.

6. Opinions of Probable Costs

Cost estimates are attached throughout this report, with the Replacement Reserves in the appendix.

These estimates are based on Invoice or Bid Document/s provided either by the Owner/facility and construction costs developed by construction resources such as *R.S. Means, CBRE Whitestone,* and *Marshall & Swift,* Bureau Veritas's experience with past costs for similar properties, city cost indexes, and assumptions regarding future economic conditions.

Opinions of probable costs should only be construed as preliminary, order of magnitude budgets. Actual costs most probably will vary from the consultant's opinions of probable costs depending on such matters as type and design of suggested remedy, quality of materials and installation, manufacturer and type of equipment or system selected, field conditions, whether a physical deficiency is repaired or replaced in whole, phasing or bundling of the work (if applicable), quality of contractor, quality of project management exercised, market conditions, use of subcontractors, and whether competitive pricing is solicited, etc. Certain opinions of probable costs cannot be developed within the scope of this guide without further study. Opinions of probable cost for further study should be included in the FCA.

Methodology

Based upon site observations, research, and judgment, along with referencing Expected Useful Life (EUL) tables from various industry sources, Bureau Veritas opines as to when a system or component will most probably necessitate replacement. Accurate historical replacement records, if provided, are typically the best source of information. Exposure to the elements, initial quality and installation, extent of use, the quality and amount of preventive maintenance exercised, etc., are all factors that impact the effective age of a system or component. As a result, a system or component may have an effective age that is greater or less than its actual chronological age. The Remaining Useful Life (RUL) of a component or system equals the EUL less its *effective age*, whether explicitly or implicitly stated. Projections of Remaining Useful Life (RUL) are based primarily on age and condition with the presumption of continued use and maintenance of the Property similar to the observed and reported past use and maintenance practices, in conjunction with the professional judgment of Bureau Veritas's assessors. Significant changes in occupants and/or usage may affect the service life of some systems or components.

Where quantities could not be or were not derived from an actual construction document take-off or facility walk-through, and/or where systemic costs are more applicable or provide more intrinsic value, budgetary square foot and gross square foot costs are used. Estimated costs are based on professional judgment and the probable or actual extent of the observed defect, inclusive of the cost to design, procure, construct and manage the corrections.

Definitions

Immediate Needs

Immediate Needs are line items that require immediate action as a result of: (1) material existing or potential unsafe conditions, (2) failed or imminent failure of mission critical building systems or components, or (3) conditions that, if not addressed, have the potential to result in, or contribute to, critical element or system failure within one year or will most probably result in a significant escalation of its remedial cost.

For database and reporting purposes the line items with RUL=0, and commonly associated with *Safety* or *Performance/Integrity* Plan Types, are considered Immediate Needs.

Replacement Reserves

Cost line items traditionally called Replacement Reserves (equivalently referred to as Lifecycle/Renewals) are for recurring probable renewals or expenditures, which are not classified as operation or maintenance expenses. The replacement reserves should be budgeted for in advance on an annual basis. Replacement Reserves are reasonably predictable both in terms of frequency and cost. However, Replacement Reserves may also include components or systems that have an indeterminable life but, nonetheless, have a potential for failure within an estimated time period.

Replacement Reserves generally exclude systems or components that are estimated to expire after the reserve term and are not considered material to the structural and mechanical integrity of the subject property. Furthermore, systems and components that are not deemed to have a material effect on the use of the Property are also excluded. Costs that are caused by acts of God, accidents, or other occurrences that are typically covered by insurance, rather than reserved for, are also excluded.

Replacement costs are solicited from ownership/property management, Bureau Veritas's discussions with service companies, manufacturers' representatives, and previous experience in preparing such schedules for other similar facilities. Costs for work performed by the ownership's or property management's maintenance staff are also considered.

Bureau Veritas's reserve methodology involves identification and quantification of those systems or components requiring capital reserve funds within the assessment period. The assessment period is defined as the effective age plus the reserve term. Additional information concerning system's or component's respective replacement costs (in today's dollars), typical expected useful lives, and remaining useful lives were estimated so that a funding schedule could be prepared. The Replacement Reserves Schedule presupposes that all required remedial work has been performed or that monies for remediation have been budgeted for items defined as Immediate Needs.

For the purposes of 'bucketizing' the System Expenditure Forecasts in this report, the Replacement Reserves have been subdivided and grouped as follows: Short Term (years 1-3), Near Term (years 4-5), Medium Term (years 6-10), and Long Term (years 11-20).

Key Findings

In an effort to highlight the most significant cost items and not be overwhelmed by the Replacement Reserves report in its totality, a subsection of Key Findings is included within the Executive Summary section of this report. Key Findings typically include repairs or replacements of deficient items within the first five-year window, as well as the most significant high-dollar line items that fall anywhere within the ten-year term. Note that while there is some subjectivity associated with identifying the Key Findings, the Immediate Needs are always included as a subset.

Exceedingly Aged

A fairly common scenario encountered during the assessment process, and a frequent source of debate, occurs when classifying and describing "very old" systems or components that are still functioning adequately and do not appear nor were reported to be in any way deficient. To help provide some additional intelligence on these items, such components will be tagged in the database as Exceedingly Aged. This designation will be reserved for mechanical or electrical systems or components that have aged well beyond their industry standard lifecycles, typically at least 15 years beyond and/or twice their Estimated Useful Life (EUL). In tandem with this designation, these items will be assigned a Remaining Useful Life (RUL) not less than two years but not greater than 1/3 of their standard EUL. As such the recommended replacement time for these components will reside outside the typical Short Term window but will not be pushed 'irresponsibly' (too far) into the future.

7. Certification

The City of Montebello (the Client) retained Bureau Veritas to perform this Facility Condition Assessment in connection with its continued operation of Dutcher Tot Lot, North Garfield Avenue, Montebello, California 90640 the "Property". It is our understanding that the primary interest of the Client is to locate and evaluate materials and building system defects that might significantly affect the value of the property and to determine if the present Property has conditions that will have a significant impact on its continued operations.

The conclusions and recommendations presented in this report are based on the brief review of the plans and records made available to our Project Manager during the site visit, interviews of available property management personnel and maintenance contractors familiar with the Property, appropriate inquiry of municipal authorities, our Project Manager's walk-through observations during the site visit, and our experience with similar properties.

No testing, exploratory probing, dismantling or operating of equipment or in-depth studies were performed unless specifically required under the *Purpose and Scope* section of this report. This assessment did not include engineering calculations to determine the adequacy of the Property's original design or existing systems. Although walk-through observations were performed, not all areas may have been observed (see Section 1 for specific details). There may be defects in the Property, which were in areas not observed or readily accessible, may not have been visible, or were not disclosed by management personnel when questioned. The report describes property conditions at the time that the observations and research were conducted.

This report has been prepared on behalf of and exclusively for the use of the Client for the purpose stated within the *Purpose and Scope* section of this report. The report, or any excerpt thereof, shall not be used by any party other than the Client or for any other purpose than that specifically stated in our agreement or within the *Purpose and Scope* section of this report without the express written consent of Bureau Veritas.

Any reuse or distribution of this report without such consent shall be at the Client and the recipient's sole risk, without liability to Bureau Veritas.

Significant/Systemic Findings and Deficiencies

Historical Summary

Northridge Mini Park was renovated in 2012. Its exact year of construction is unknown.

Architectural

There are no buildings/structures on the site premises.

Mechanical, Electrical, Plumbing and Fire (MEPF)

There is no heating or cooling on site.

There is no plumbing on site.

There is no facility-use electricity on site.

There are no fire alarm nor suppression systems on site.

Site

The site consists of the park and concrete sidewalks/walkways. The park contains grass, trees, shrubs, a bench, a picnic table, and a barbecue grill. An irrigation system serves the landscaping features. A portion of the pedestrian concrete pavement near the bottom of the steps requires joint caulking. There are two tripping hazards, one at the southwest corner and one at the northeast corner, in the pedestrian concrete pavement due to spalled concrete.

Recommended Additional Studies

Some areas of the facility were identified as having major or moderate accessibility issues. Bureau Veritas recommends a study be performed to take measurements, provide additional itemized details, research local requirements, and, if necessary, estimate the scope and cost of any required improvements. The cost of this study is included in the cost tables. Due to the lack of measurements and itemized findings at this point in time, the costs for any possible subsequent repairs or improvements are not currently included.

Park Amenities Observed

Amenity Type			Qty / ~Area	Description	Condition			Comments
					Good	Fair	Poor	
Site Development								
G2020	**Parking**							
		No parking on site						
G2030	**Walks**							
		Concrete	1,200 SF	Throughout site	X			Joint caulking required, two tripping hazards
G4020	**Lighting**

		No playing fields present						
G2049	**Miscellaneous Structures**							
		None						
G2050	**Miscellaneous Recreation**							
		None						

Facility Condition Index (FCI)

One of the major goals of the FCA is to calculate each building's Facility Condition Index (FCI), which provides a theoretical objective indication of a building's overall condition. By definition, the FCI is defined as the ratio of the cost of current needs divided by current replacement value (CRV) of the facility. The chart below presents the industry standard ranges and cut-off points.

FCI Ranges and Description	
0 – 5%	In new or well-maintained condition, with little or no visual evidence of wear or deficiencies.
5 – 10%	Subjected to wear but is still in a serviceable and functioning condition.
10 – 30%	Subjected to hard or long-term wear. Nearing the end of its useful or serviceable life.
30% and above	Has reached the end of its useful or serviceable life. Renewal is now necessary.

The deficiencies and lifecycle needs identified in this assessment provide the basis for a portfolio-wide capital improvement funding strategy. In addition to the current FCI, extended FCI's have been developed to provide owners the intelligence needed to plan and budget for the "keep-up costs" for their facilities. As such the 3-year, 5-year, and 10-year FCI's are calculated by dividing the anticipated needs of those respective time periods by current replacement value. As a final point, the FCI's ultimately provide more value when used to relatively compare facilities across a portfolio instead of being over-analyzed and scrutinized as stand-alone values. The table below summarizes the individual findings for this FCA:

FCI Analysis

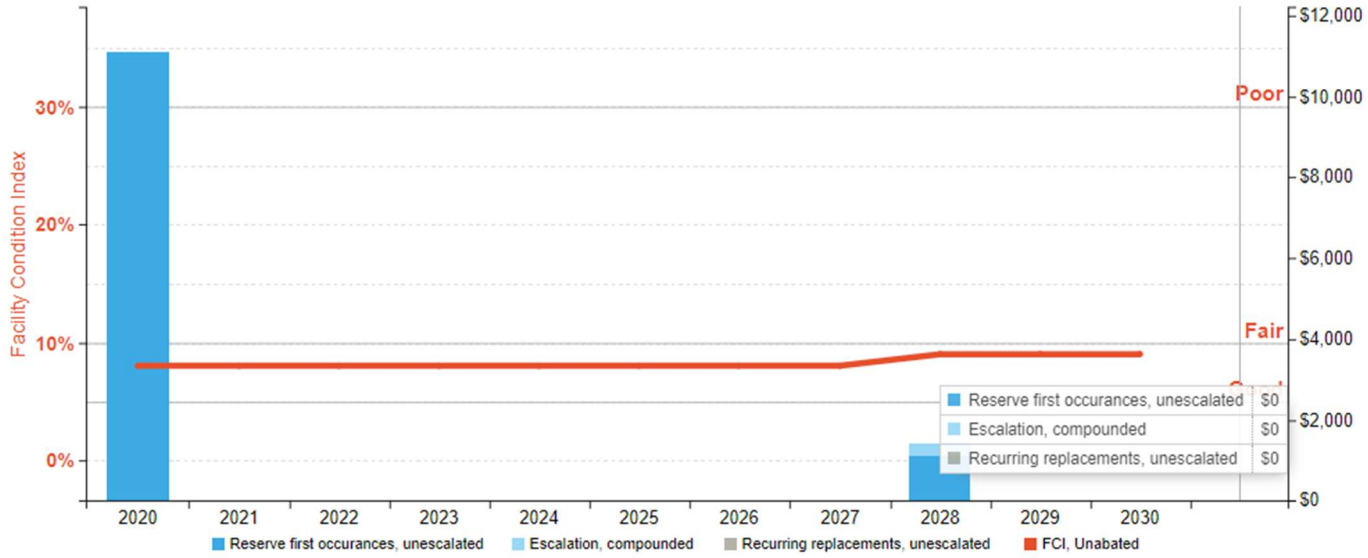
FCI Analysis | Northridge Mini Park (.21 acres)		
Replacement Value *$ 146,400*	*Total SF* *9,148*	*Cost/SF* *$ 16*
Current FCI	$ 11,100	7.6 %
3-Year	$ 11,100	7.6 %
5-Year	$ 11,100	7.6 %
10-Year	$ 12,600	8.5 %

The orange line in the graph below forecasts what would happen to the FCI (left Y axis) over time, assuming zero capital expenditures. The capital expenditures allocated for each year (blue bars) are associated with the dollar amounts along the right Y axis.

Needs by Year with Unaddressed FCI Over Time

FCI Analysis: Northridge Mini Park (.21 acres)

Replacement Value: $ 146,368; Inflation rate: 3.0%



Immediate Needs

Facility/Building	Total Items	Total Cost
Northridge Mini Park (.21 acres)	4	$11,092

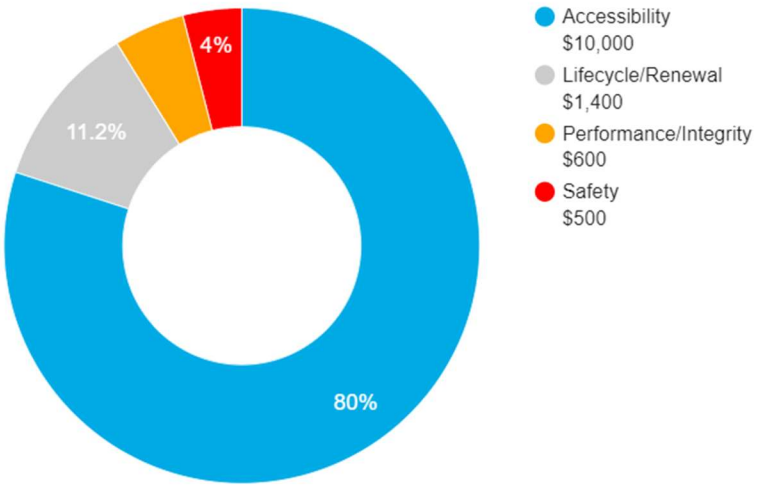
Caulk concrete pavement joints near bottom of steps - AssetCALC ID: 1822072

Plan Types

Each line item in the cost database is assigned a Plan Type, which is the primary reason or rationale for the recommended replacement, repair, or other corrective action. This is the "why" part of the equation. A cost or line item may commonly have more than one applicable Plan Type; however, only one Plan Type will be assigned based on the "best" fit, typically the one with the greatest significance.

Plan Type Descriptions	
Safety	An observed or reported unsafe condition that if left unaddressed could result in injury; a system or component that presents potential liability risk.
Performance/Integrity	Component or system has failed, is almost failing, performs unreliably, does not perform as intended, and/or poses risk to overall system stability.
Accessibility	Does not meet ADA, UFAS, and/or other handicap accessibility requirements.
Environmental	Improvements to air or water quality, including removal of hazardous materials from the building or site.
Retrofit/Adaptation	Components, systems, or spaces recommended for upgrades in in order to meet current standards, facility usage, or client/occupant needs.
Lifecycle/Renewal	Any component or system that is not currently deficient or problematic but for which future replacement or repair is anticipated and budgeted.

Plan Type Distribution (by Cost)



10-YEAR TOTAL: $12,500

3. Property Space Use and Observed Areas

Unit Allocation

All 0.21 acres of the property are occupied by the City of Montebello/Parks, Recreation, and Community Services. The space is a public park.

Areas Observed

The site within the property boundaries was observed in order to gain a clear understanding of the property's overall condition.

Key Spaces Not Observed

All key areas of the property were accessible and observed.

4. ADA Accessibility

Generally, Title II of the Americans with Disabilities Act (ADA) prohibits discrimination by entities to access and use of “areas of public accommodations” and “public facilities” on the basis of disability. Regardless of their age, these areas and facilities must be maintained and operated to comply with the Americans with Disabilities Act Accessibility Guidelines (ADAAG).

A public entity (i.e. city governments) shall operate each service, program, or activity so that the service, program, or activity, when viewed in its entirety, is readily accessible to and usable by individuals with disabilities.

However, this does not:

1. Necessarily require a public entity to make each of its existing facilities accessible to and usable by individuals with disabilities.
2. Require a public entity to take any action that would threaten or destroy the historic significance of an historic property; or
3. Require a public entity to take any action that it can demonstrate would result in a fundamental alteration in the nature of a service, program, or activity or in undue financial and administrative burdens. In those circumstances where personnel of the public entity believe that the proposed action would fundamentally alter the service, program, or activity or would result in undue financial and administrative burdens, a public entity has the burden of proving that compliance with 35.150(a) of this part would result in such alteration or burdens. The decision that compliance would result in such alteration or burdens must be made by the head of a public entity or his or her designee after considering all resources available for use in the funding and operation of the service, program, or activity, and must be accompanied by a written statement of the reasons for reaching that conclusion. If an action would result in such an alteration or such burdens, a public entity shall take any other action that would not result in such an alteration or such burdens but would nevertheless ensure that individuals with disabilities receive the benefits or services provided by the public entity.

During the FCA, Bureau Veritas performed a limited high-level accessibility review of the facility non-specific to any local regulations or codes. The scope of the visual observation was limited to those areas and categories set forth in the tables throughout this report. It is understood by the Client that the limited observations described herein do not comprise a full ADA Compliance Survey, and that such a survey is beyond the scope of Bureau Veritas’s undertaking. Only a representative sample of areas was observed, and actual measurements were not taken to verify compliance.

The facility was significantly renovated in 2012. Complaints about accessibility issues have not been received by the property management. The property does not have associated prior litigation related to existing barriers or previously removed barriers.

An accessibility study has not been performed at the site. A comprehensive ADA Compliance Survey will reveal specific aspects of the property that are not in compliance. Since some areas or categories above were identified as having major or moderate associated issues, Bureau Veritas recommends such a study be performed to take measurements, provide additional itemized details, research local requirements, and, if necessary, estimate the scope and cost of any required improvements. The cost of this study is included in the cost tables. Due to the lack of measurements and itemized findings at this point in time, the costs for any possible subsequent repairs or improvements are not currently included.

Removal of barriers to accessibility should be addressed from a liability standpoint in order to comply with federal law, but the barriers may or may not be building code violations. The Americans with Disabilities Act Accessibility Guidelines are part of the ADA federal civil rights law pertaining to the disabled and are not a construction code. State and local jurisdictions have adopted the ADA Guidelines or have adopted other standards for accessibility as part of their construction codes.

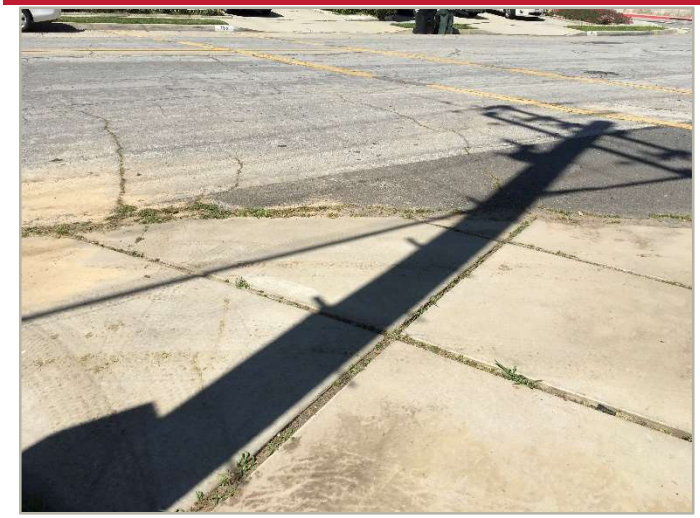
Campus Accessibility: Photographic Overview



Main entrance from street

Main entrance walkway to park

Inaccessible site stairs to main park area

Main park area

The table below is intended to be used as a general reference guide to help differentiate the orders of magnitude between some of the more commonly observed accessibility issues. The table is not intended to be all-inclusive, and boxes checked in the tables above do not necessarily mean those specific problems or shortcomings cited as examples below exist at the subject buildings and sites. Reference the photos above and/or *Key Findings* section for visuals and/or more specifics about the subject site conditions.

Reference Guide

	Major Issues *(ADA study recommended)*	Moderate Issues *(ADA study recommended)*	Minor/No Issues
Parking	- Needs full reconstruction - Excessive slopes over 3% require major re-grading - No level locations to add required spaces	- No or non-compliant curb cuts - Moderate difficulty to add required accessible spaces - Slopes close to compliant	- Painting of markings needed - Signage height non-compliant - Signage missing

Reference Guide

	Major Issues *(ADA study recommended)*	Moderate Issues *(ADA study recommended)*	Minor/No Issues
Exterior Path of Travel	- Large areas of sidewalks with excessive slopes - No ramp when needed - Ramps with excessive slopes	- Ramps need rails - Ramps need rail extensions - Need significant # of lever handles - All or most entrance door exterior maneuvering clearance areas with excessive slopes	- One entrance door exterior maneuvering clearance area with excessive slope - A few doorknobs instead of lever handles - Non-compliant signage
Interior Path of Travel	- All or most interior doors appear less than 32” wide - Corridors less than 36” wide - No ramp when needed - Ramps with excessive slopes - Non-compliant treads/risers at means of egress stairways	- Single height drinking fountains - Drinking fountain too high or protrudes into accessible route - Ramps need rails - Ramps need rail extensions - Need significant # of lever handles - Non-compliant rail extensions at egress stairways - All/most door thresholds high	- One door threshold too high - A few doorknobs instead of lever handles - Non-compliant door pressures - Non-compliant signage - Switches not within reach range
Public Use Restrooms	- No ADA RR on each accessible floor - Restroom(s) too small - Entire restroom(s) requires renovation - Water closet clearance requires moving walls	- Interior doors appear less than 32” wide - Missing or non-compliant grab bars - Easily fixable clearance issues	- Minor height adjustments required - Non-compliant door pressures - Missing a visual strobe (only required if audible fire alarm already present) - Missing lavatory pipe wraps - Signage not compliant
Elevators	- No elevator present when required - Elevator cab too small	- Panel control buttons not at compliant height - No hands-free emergency communication system - Elevator only has mechanical stops	- Audible/visual signals at every floor may be lacking - Minor signage / Braille issues
Kitchens/Kitchenettes	- Clear space for each appliance not present - Clearance between opposing counters too narrow	- Sink and counter too high - Sink knee and toe clearance not provided where required (built-in) - Less than 50% of cabinetry within reach range	- Dispensers not within reach range - Switches not within reach range - Missing sink pipe wraps if knee and toe clearance required

5. Purpose and Scope

Purpose

Bureau Veritas was retained by the client to render an opinion as to the Property's current general physical condition on the day of the site visit.

Based on the observations, interviews and document review outlined below, this report identifies significant deferred maintenance issues, existing deficiencies, and material code violations of record, which affect the Property's use. Opinions are rendered as to its structural integrity, building system condition and the Property's overall condition. The report also notes building systems or components that have realized or exceeded their typical expected useful lives.

The physical condition of building systems and related components are typically defined as being in one of five condition ratings. For the purposes of this report, the following definitions are used:

Condition Ratings	
Excellent	New or very close to new; component or system typically has been installed within the past year, sound and performing its function. Eventual repair or replacement will be required when the component or system either reaches the end of its useful life or fails in service.
Good	Satisfactory as-is. Component or system is sound and performing its function, typically within the first third of its lifecycle. However, it may show minor signs of normal wear and tear. Repair or replacement will be required when the component or system either reaches the end of its useful life or fails in service.
Fair	Showing signs of wear and use but still satisfactory as-is, typically near the median of its estimated useful life. Component or system is performing adequately at this time but may exhibit some signs of wear, deferred maintenance, or evidence of previous repairs. Repair or replacement will be required due to the component or system's condition and/or its estimated remaining useful life.
Poor	Component or system is significantly aged, flawed, functioning intermittently or unreliably; displays obvious signs of deferred maintenance; shows evidence of previous repair or workmanship not in compliance with commonly accepted standards; has become obsolete; or exhibits an inherent deficiency. The present condition could contribute to or cause the deterioration of contiguous elements or systems. Either full component replacement is needed, or repairs are required to restore to good condition, prevent premature failure, and/or prolong useful life.
Failed	Component or system has ceased functioning or performing as intended. Replacement, repair, or other significant corrective action is recommended or required.
Not Applicable	Assigning a condition does not apply or make logical sense, most commonly due to the item in question not being present.

Scope

The standard scope of the Facility Condition Assessment includes the following:

- Visit the Property to evaluate the general condition of the building and site improvements, review available construction documents in order to familiarize ourselves with, and be able to comment on, the in-place construction systems, life safety, mechanical, electrical, and plumbing systems, and the general built environment.
- Identify those components that are exhibiting deferred maintenance issues and provide cost estimates for Immediate Costs and Replacement Reserves based on observed conditions, maintenance history and industry standard useful life estimates. This will include the review of documented capital improvements completed within the last five-year period and work currently contracted for, if applicable.
- Provide a full description of the Property with descriptions of in-place systems and commentary on observed conditions.
- Provide a high-level categorical general statement regarding the subject Property's compliance to Title III of the Americans with Disabilities Act. This will not constitute a full ADA survey, but will help identify exposure to issues and the need for further review.
- Obtain background and historical information about the facility from a building engineer, property manager, maintenance staff, or other knowledgeable source. The preferred methodology is to have the client representative or building occupant complete a Pre-Survey Questionnaire (PSQ) in advance of the site visit. Common alternatives include a verbal interview just prior to or during the walk-through portion of the assessment.
- Review maintenance records and procedures with the in-place maintenance personnel.
- Observe a representative sample of the interior spaces/units, including vacant spaces/units, to gain a clear understanding of the property's overall condition. Other areas to be observed include the exterior of the property, the roofs, interior common areas, and the significant mechanical, electrical and elevator equipment rooms.
- Provide recommendations for additional studies, if required, with related budgetary information.
- Provide an Executive Summary at the beginning of this report, which highlights key findings and includes a Facility Condition Index as a basis for comparing the relative conditions of the buildings within the portfolio.

6. Opinions of Probable Costs

Cost estimates are attached throughout this report, with the Replacement Reserves in the appendix.

These estimates are based on Invoice or Bid Document/s provided either by the Owner/facility and construction costs developed by construction resources such as *R.S. Means, CBRE Whitestone,* and *Marshall & Swift,* Bureau Veritas's experience with past costs for similar properties, city cost indexes, and assumptions regarding future economic conditions.

Opinions of probable costs should only be construed as preliminary, order of magnitude budgets. Actual costs most probably will vary from the consultant's opinions of probable costs depending on such matters as type and design of suggested remedy, quality of materials and installation, manufacturer and type of equipment or system selected, field conditions, whether a physical deficiency is repaired or replaced in whole, phasing or bundling of the work (if applicable), quality of contractor, quality of project management exercised, market conditions, use of subcontractors, and whether competitive pricing is solicited, etc. Certain opinions of probable costs cannot be developed within the scope of this guide without further study. Opinions of probable cost for further study should be included in the FCA.

Methodology

Based upon site observations, research, and judgment, along with referencing Expected Useful Life (EUL) tables from various industry sources, Bureau Veritas opines as to when a system or component will most probably necessitate replacement. Accurate historical replacement records, if provided, are typically the best source of information. Exposure to the elements, initial quality and installation, extent of use, the quality and amount of preventive maintenance exercised, etc., are all factors that impact the effective age of a system or component. As a result, a system or component may have an effective age that is greater or less than its actual chronological age. The Remaining Useful Life (RUL) of a component or system equals the EUL less its *effective age*, whether explicitly or implicitly stated. Projections of Remaining Useful Life (RUL) are based primarily on age and condition with the presumption of continued use and maintenance of the Property similar to the observed and reported past use and maintenance practices, in conjunction with the professional judgment of Bureau Veritas's assessors. Significant changes in occupants and/or usage may affect the service life of some systems or components.

Where quantities could not be or were not derived from an actual construction document take-off or facility walk-through, and/or where systemic costs are more applicable or provide more intrinsic value, budgetary square foot and gross square foot costs are used. Estimated costs are based on professional judgment and the probable or actual extent of the observed defect, inclusive of the cost to design, procure, construct and manage the corrections.

Definitions

Immediate Needs

Immediate Needs are line items that require immediate action as a result of: (1) material existing or potential unsafe conditions, (2) failed or imminent failure of mission critical building systems or components, or (3) conditions that, if not addressed, have the potential to result in, or contribute to, critical element or system failure within one year or will most probably result in a significant escalation of its remedial cost.

For database and reporting purposes the line items with RUL=0, and commonly associated with *Safety* or *Performance/Integrity* Plan Types, are considered Immediate Needs.

Replacement Reserves

Cost line items traditionally called Replacement Reserves (equivalently referred to as Lifecycle/Renewals) are for recurring probable renewals or expenditures, which are not classified as operation or maintenance expenses. The replacement reserves should be budgeted for in advance on an annual basis. Replacement Reserves are reasonably predictable both in terms of frequency and cost. However, Replacement Reserves may also include components or systems that have an indeterminable life but, nonetheless, have a potential for failure within an estimated time period.

Replacement Reserves generally exclude systems or components that are estimated to expire after the reserve term and are not considered material to the structural and mechanical integrity of the subject property. Furthermore, systems and components that are not deemed to have a material effect on the use of the Property are also excluded. Costs that are caused by acts of God, accidents, or other occurrences that are typically covered by insurance, rather than reserved for, are also excluded.

Replacement costs are solicited from ownership/property management, Bureau Veritas's discussions with service companies, manufacturers' representatives, and previous experience in preparing such schedules for other similar facilities. Costs for work performed by the ownership's or property management's maintenance staff are also considered.

Bureau Veritas's reserve methodology involves identification and quantification of those systems or components requiring capital reserve funds within the assessment period. The assessment period is defined as the effective age plus the reserve term. Additional information concerning system's or component's respective replacement costs (in today's dollars), typical expected useful lives, and remaining useful lives were estimated so that a funding schedule could be prepared. The Replacement Reserves Schedule presupposes that all required remedial work has been performed or that monies for remediation have been budgeted for items defined as Immediate Needs.

For the purposes of 'bucketizing' the System Expenditure Forecasts in this report, the Replacement Reserves have been subdivided and grouped as follows: Short Term (years 1-3), Near Term (years 4-5), Medium Term (years 6-10), and Long Term (years 11-20).

Key Findings

In an effort to highlight the most significant cost items and not be overwhelmed by the Replacement Reserves report in its totality, a subsection of Key Findings is included within the Executive Summary section of this report. Key Findings typically include repairs or replacements of deficient items within the first five-year window, as well as the most significant high-dollar line items that fall anywhere within the ten-year term. Note that while there is some subjectivity associated with identifying the Key Findings, the Immediate Needs are always included as a subset.

Exceedingly Aged

A fairly common scenario encountered during the assessment process, and a frequent source of debate, occurs when classifying and describing "very old" systems or components that are still functioning adequately and do not appear nor were reported to be in any way deficient. To help provide some additional intelligence on these items, such components will be tagged in the database as Exceedingly Aged. This designation will be reserved for mechanical or electrical systems or components that have aged well beyond their industry standard lifecycles, typically at least 15 years beyond and/or twice their Estimated Useful Life (EUL). In tandem with this designation, these items will be assigned a Remaining Useful Life (RUL) not less than two years but not greater than 1/3 of their standard EUL. As such the recommended replacement time for these components will reside outside the typical Short Term window but will not be pushed 'irresponsibly' (too far) into the future.

7. Certification

The City of Montebello (the Client) retained Bureau Veritas to perform this Facility Condition Assessment in connection with its continued operation of Northridge Mini Park, 140 East Arroyo Drive, Montebello, California 90640, the "Property". It is our understanding that the primary interest of the Client is to locate and evaluate materials and building system defects that might significantly affect the value of the property and to determine if the present Property has conditions that will have a significant impact on its continued operations.

The conclusions and recommendations presented in this report are based on the brief review of the plans and records made available to our Project Manager during the site visit, interviews of available property management personnel and maintenance contractors familiar with the Property, appropriate inquiry of municipal authorities, our Project Manager's walk-through observations during the site visit, and our experience with similar properties.

No testing, exploratory probing, dismantling or operating of equipment or in-depth studies were performed unless specifically required under the *Purpose and Scope* section of this report. This assessment did not include engineering calculations to determine the adequacy of the Property's original design or existing systems. Although walk-through observations were performed, not all areas may have been observed (see Section 1 for specific details). There may be defects in the Property, which were in areas not observed or readily accessible, may not have been visible, or were not disclosed by management personnel when questioned. The report describes property conditions at the time that the observations and research were conducted.

This report has been prepared on behalf of and exclusively for the use of the Client for the purpose stated within the *Purpose and Scope* section of this report. The report, or any excerpt thereof, shall not be used by any party other than the Client or for any other purpose than that specifically stated in our agreement or within the *Purpose and Scope* section of this report without the express written consent of Bureau Veritas.

Any reuse or distribution of this report without such consent shall be at the Client and the recipient's sole risk, without liability to Bureau Veritas.

1. Executive Summary

Property Overview and Assessment Details

General Information	
Property Type	Transit facility offices, parking structure, warehouse, and maintenance shop
Main Address	400 South Taylor Avenue, Montebello, California 90640
Site Developed	1996
Site Area	6 acres
Parking Spaces	Building 311 parking lot: 32 total spaces in an open lot; 1 of which is accessible Administration Building parking lot: 9 total spaces in an open lot; 2 of which are accessible Upper Parking Structure: 52 Bus parking stalls & 18 Standard stalls Lower Parking Structure: 124 parking stalls (Some stalls are fenced off and used for storage)
Building Area	Administration Office: 15,000 SF Maintenance Building, Warehouse and Shop: 42,300 SF Fuel Station and Bus Wash: 8,000 SF Parking Structure: 164,000 SF
Number of Stories	2- Main Office Building and Shop 1- Building 311, Warehouse and Maintenance shop 1- Fuel Station and Bus wash
Outside Occupants / Leased Spaces	None
Date(s) of Visit	May 12, 2020
Management Point of Contact	City of Montebello/Park, Recreation and Community Services, David Sosnowski, Director 323.887.4588 phone dsosnowski@cityofmentebello.com email
On-site Point of Contact (POC)	Antonio Montanez
Assessment and Report Prepared By	Mouaz Alrayes
Reviewed By	Mark Surdam Program Manager Mark.Surdam@bvna.com 800.733.0660 6251

Significant/Systemic Findings and Deficiencies

Historical Summary

The buildings were originally constructed in 1996.

Architectural

The Administration Building is a steel frame structure on a concrete slab floor with concrete topped metal decks. The building has been renovated in the recent years and is in a good to fair over all condition.

The Warehouse and Maintenance Shop have tilt-up concrete bearing walls and a metal deck roof.

The Fueling Station and Bus Wash Building has load bearing CMU walls with steel frame and metal deck roofs.

The exterior enclosures consist of painted stucco and painted concrete. The Administration Building has metal siding with aluminum windows and steel entry doors with steel service roll-up service doors. Roofs are flat and sloped modified bitumen membrane.

In general, the structures appear to be sound, however minor cracks were observed on the maintenance shop's tilt up concrete walls on the south elevation.

Mechanical, Electrical, Plumbing and Fire (MEPF)

The majority of the MEPF systems and components are original to the 1996 construction with some HVAC components dating to 2012.

Heating and cooling at the Administration Building, Warehouse & Maintenance Shop is provided by rooftop package units and individual heat pumps units.

Heating and cooling at Building 311 is provided by a central system with a boiler, air handling unit and a remote chiller located on the roof.

Heating in the Maintenance Shop is provided by electric unit heaters and infrared electric tubes. No cooling is provided in the maintenance shop.

Heating and cooling at the Fueling Station office is provide by a duct-less split system.

The plumbing piping system throughout the site is original and will need replacement during the assessment period. Hot water is provided by multiple gas and electric domestic water heaters.

The fire alarm and suppression systems appear to be in fair condition. Typical lifecycle replacements and ongoing maintenance will be required.

One elevator provides access to the Administration Building's second floor.

Site

In general, the site has been fairly maintained. The asphalt paved parking areas and drive aisles are in fair to poor condition and require sealing and striping. throughout the site there are areas with damaged concrete pavement. The site lighting is aged, and it is recommended that the system be upgraded to LED fixtures to improve energy efficiency.

Recommended Additional Studies

Possible structural issues and cracks were noticed on the south elevation tilt up concrete walls. A professional consultant must be retained to analyze the existing condition, provide recommendations and, if necessary, estimate the scope and cost of any required repairs. The cost of this study is included in the cost tables. Due to the ambiguity of the required repair scope at the time of this assessment, the cost for any possible subsequent repairs is not included.

Some areas of the facility were identified as having major or moderate accessibility issues. Bureau Veritas recommends a study be performed to take measurements, provide additional itemized details, research local requirements, and, if necessary, estimate the scope and cost of any required improvements. The cost of this study is included in the cost tables. Due to the lack of measurements and itemized findings at this point in time, the costs for any possible subsequent repairs or improvements are not currently included.

Facility Condition Index (FCI)

One of the major goals of the FCA is to calculate each building's Facility Condition Index (FCI), which provides a theoretical objective indication of a building's overall condition. By definition, the FCI is defined as the ratio of the cost of current needs divided by current replacement value (CRV) of the facility. The chart below presents the industry standard ranges and cut-off points.

FCI Ranges and Description	
0 – 5%	In new or well-maintained condition, with little or no visual evidence of wear or deficiencies.
5 – 10%	Subjected to wear but is still in a serviceable and functioning condition.
10 – 30%	Subjected to hard or long-term wear. Nearing the end of its useful or serviceable life.
30% and above	Has reached the end of its useful or serviceable life. Renewal is now necessary.

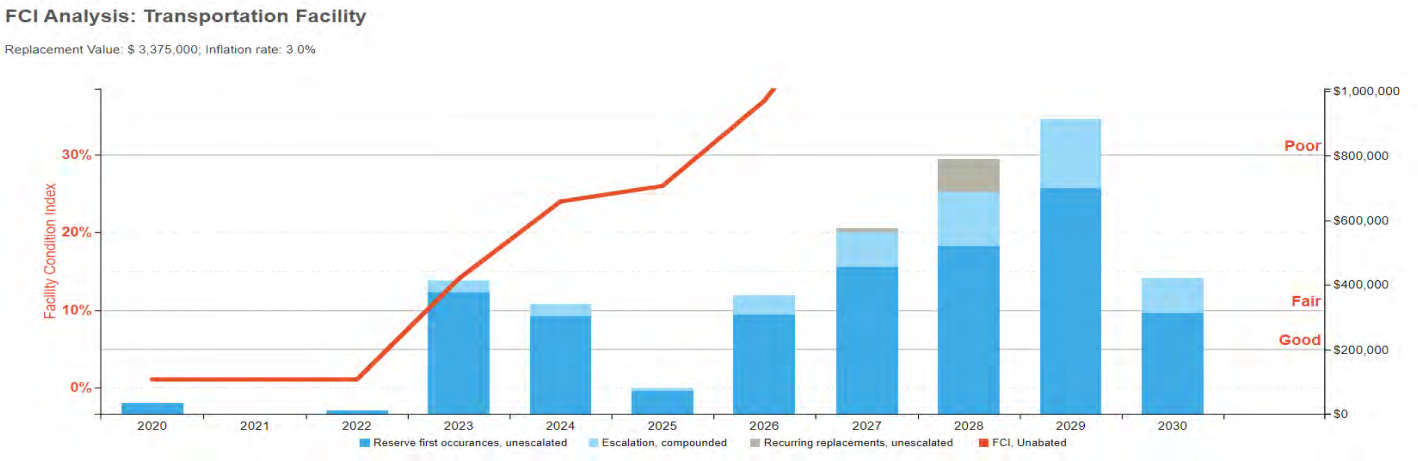
The deficiencies and lifecycle needs identified in this assessment provide the basis for a portfolio-wide capital improvement funding strategy. In addition to the current FCI, extended FCI's have been developed to provide owners the intelligence needed to plan and budget for the "keep-up costs" for their facilities. As such the 3-year, 5-year, and 10-year FCI's are calculated by dividing the anticipated needs of those respective time periods by current replacement value. As a final point, the FCI's ultimately provide more value when used to relatively compare facilities across a portfolio instead of being over-analyzed and scrutinized as stand-alone values. The table below summarizes the individual findings for this FCA:

FCI Analysis

Facility (year built)	Cost/SF	Total SF	Replacement Value	Current	3-Year	5-Year	10-Year
Transportation Facility	$225	15,000	$3,375,000	1.1%	1.4%	23.6%	100.4%
Transportation Facility / Fueling Station & Bus Wash Building	$312	8,000	$2,496,000	0.0%	0.0%	0.7%	3.4%
Transportation Facility / Parking Structure	$235	164,000	$38,540,000	0.0%	0.0%	0.3%	0.3%

The orange line in the graph below forecasts what would happen to the FCI (left Y axis) over time, assuming zero capital expenditures. The capital expenditures allocated for each year (blue bars) are associated with the dollar amounts along the right Y axis.

Needs by Year with Unaddressed FCI Over Time



Immediate Needs

Facility/Building	Total Items	Total Cost
Transportation Facility	4	$35,766
Total	**4**	**$35,766**

- AssetCALC ID: 1832699

Plan Types

Each line item in the cost database is assigned a Plan Type, which is the primary reason or rationale for the recommended replacement, repair, or other corrective action. This is the "why" part of the equation. A cost or line item may commonly have more than one applicable Plan Type; however, only one Plan Type will be assigned based on the "best" fit, typically the one with the greatest significance.

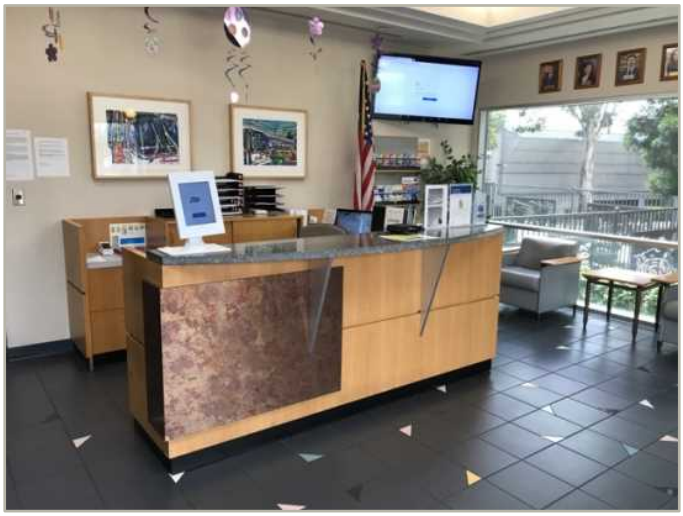
Plan Type Descriptions		
Safety	■	An observed or reported unsafe condition that if left unaddressed could result in injury; a system or component that presents potential liability risk.
Performance/Integrity	■	Component or system has failed, is almost failing, performs unreliably, does not perform as intended, and/or poses risk to overall system stability.
Accessibility	■	Does not meet ADA, UFAS, and/or other handicap accessibility requirements.
Environmental	■	Improvements to air or water quality, including removal of hazardous materials from the building or site.
Retrofit/Adaptation	■	Components, systems, or spaces recommended for upgrades in in order to meet current standards, facility usage, or client/occupant needs.
Lifecycle/Renewal	■	Any component or system that is not currently deficient or problematic but for which future replacement or repair is anticipated and budgeted.

Plan Type Descriptions

Plan Type Distribution (by Cost)

10-YEAR TOTAL: $3,952,900

2. Administration Building, Warehou and Maintenance Shop



Administration Building, Warehouse & Maintenance Shop: Systems Summary		
Address	400 S. Taylor Avenue, Montebello	
Constructed/Renovated	1996	
Building Size	57,300 SF	
Number of Stories	2 At the Main Office Building and Shop 1 At Building 311, Warehouse and Maintenance shop	
System	*Description*	*Condition*
Structure	Administration Building: Steel frame with concrete-topped metal decks Warehouse & Maintenance Shop: Concrete tilt-up bearing walls with concrete-topped metal decks	Good
Façade	Painted Concrete with aluminum windows and metal siding at section of the main Administration office building	Fair
Roof	Flat construction with modified bituminous finish at most roofs with a shed type roof with modified bituminous finish above section of the warehouse and a metal walkway/breezeway roof	Fair
Interiors	Walls: Painted gypsum board, ceramic tiles Floors: VCT, Concrete, carpet, ceramic tiles, elastomeric coating Ceilings: Exposed, Painted gypsum board, ACT	Fair
Elevators	Hydraulic: 1 car (Administration Building)	Fair
Plumbing	Copper supply and cast iron waste & venting Gas & Electric water heater Toilets, urinals, and sinks in all restrooms	Fair

Administration Building, Warehouse and Maintenance Shop: Systems Summary		
HVAC	Central system with boiler, remote chiller & air handler at the building along the east elevation. Individual package units & heat pumps, evaporative coolers Supplemental components: ductless split-systems & hydronic and electric unit's heaters, infrared heater, exhaust fans and air supply fans	Fair
Fire Suppression	Wet-pipe sprinkler system at the main administration office and parts of the warehouse. Fire extinguishers at the remaining of the buildings.	Fair
Electrical	Source & Distribution: Main switchboards with copper wiring Interior Lighting: T-8, LED, CFL Emergency: Diesel generator	Fair
Fire Alarm	Alarm panel, smoke detectors, alarms, strobes, pull stations, and exit signs	Fair
Equipment/Special	Maintenance shop fume exhaust, security surveillance system and drinking fountains.	Fair
Accessibility	Potential moderate issues have been identified at this property and a detailed accessibility study is recommended specially to address issues with parking and exterior access routes.	
Key Issues and Findings	Cracks on south tilt up concrete walls.	

Administration Building, Warehouse and Maintenance Shop: Systems Summary: Systems Expenditure Forecast

System Expenditure Forecast

System	Immediate	Short Term (1-2 yr)	Near Term (3-5 yr)	Med Term (6-10 yr)	Long Term (11-20 yr)	TOTAL

6. Property Space Use and Observed Areas

Unit Allocation

All 6 acres of the property are occupied by the City of Montebello transit. The spaces are mostly administration offices, Maintenance Shops, Warehouse, and bus wash/fuel Station with supporting restrooms building and gym.

Areas Observed

The interior spaces were observed in order to gain a clear understanding of the property's overall condition. Other areas accessed included the site within the property boundaries, the exterior of the property, and the roofs.

Key Spaces Not Observed

- All key areas of the property were accessible and observed.

7. ADA Accessibility

Generally, Title II of the Americans with Disabilities Act (ADA) prohibits discrimination by entities to access and use of "areas of public accommodations" and "public facilities" on the basis of disability. Regardless of their age, these areas and facilities must be maintained and operated to comply with the Americans with Disabilities Act Accessibility Guidelines (ADAAG).

A public entity (i.e. city governments) shall operate each service, program, or activity so that the service, program, or activity, when viewed in its entirety, is readily accessible to and usable by individuals with disabilities.

However, this does not:

1. Necessarily require a public entity to make each of its existing facilities accessible to and usable by individuals with disabilities;
2. Require a public entity to take any action that would threaten or destroy the historic significance of an historic property; or
3. Require a public entity to take any action that it can demonstrate would result in a fundamental alteration in the nature of a service, program, or activity or in undue financial and administrative burdens. In those circumstances where personnel of the public entity believe that the proposed action would fundamentally alter the service, program, or activity or would result in undue financial and administrative burdens, a public entity has the burden of proving that compliance with 35.150(a) of this part would result in such alteration or burdens. The decision that compliance would result in such alteration or burdens must be made by the head of a public entity or his or her designee after considering all resources available for use in the funding and operation of the service, program, or activity, and must be accompanied by a written statement of the reasons for reaching that conclusion. If an action would result in such an alteration or such burdens, a public entity shall take any other action that would not result in such an alteration or such burdens but would nevertheless ensure that individuals with disabilities receive the benefits or services provided by the public entity.

During the FCA, Bureau Veritas performed a limited high-level accessibility review of the facility non-specific to any local regulations or codes. The scope of the visual observation was limited to those areas and categories set forth in the tables throughout this report. It is understood by the Client that the limited observations described herein do not comprise a full ADA Compliance Survey, and that such a survey is beyond the scope of Bureau Veritas's undertaking. Only a representative sample of areas was observed, and actual measurements were not taken to verify compliance.

An accessibility study has not been performed at the site. A comprehensive ADA Compliance Survey will reveal specific aspects of the property that are not in compliance. Since some areas or categories above were identified as having major or moderate associated issues, Bureau Veritas recommends such a study be performed to take measurements, provide additional itemized details, research local requirements, and, if necessary, estimate the scope and cost of any required improvements. The cost of this study is included in the cost tables. Due to the lack of measurements and itemized findings at this point in time, the costs for any possible subsequent repairs or improvements are not currently included.

Removal of barriers to accessibility should be addressed from a liability standpoint in order to comply with federal law, but the barriers may or may not be building code violations. The Americans with Disabilities Act Accessibility Guidelines are part of the ADA federal civil rights law pertaining to the disabled and are not a construction code. State and local jurisdictions have adopted the ADA Guidelines or have adopted other standards for accessibility as part of their construction codes.

Removal of barriers to accessibility should be addressed from a liability standpoint in order to comply with federal law, but the barriers may or may not be building code violations. The Americans with Disabilities Act Accessibility Guidelines are part of the ADA federal civil rights law pertaining to the disabled and are not a construction code. The table below is intended to be used as a general reference guide to help differentiate the orders of magnitude between some of the more commonly observed accessibility issues. The table is not intended to be all-inclusive, and boxes checked in the tables above do not necessarily mean those specific problems or shortcomings cited as examples below exist at the subject buildings and sites. Reference the photos above and/or *Key Findings* section for visuals and/or more specifics about the subject site conditions.

Reference Guide

	Major Issues *(ADA study recommended)*	Moderate Issues *(ADA study recommended)*	Minor/No Issues
Parking	- Needs full reconstruction - Excessive slopes over 3% require major re-grading - No level locations to add required spaces	- No or non-compliant curb cuts - Moderate difficulty to add required accessible spaces - Slopes close to compliant	- Painting of markings needed - Signage height non-compliant - Signage missing
Exterior Path of Travel	- Large areas of sidewalks with excessive slopes - No ramp when needed - Ramps with excessive slopes	- Ramps need rails - Ramps need rail extensions - Need significant # of lever handles - All or most entrance door exterior maneuvering clearance areas with excessive slopes	- One entrance door exterior maneuvering clearance area with excessive slope - A few door knobs instead of lever handles - Non-compliant signage
Interior Path of Travel	- All or most interior doors appear less than 32” wide - Corridors less than 36” wide - No ramp when needed - Ramps with excessive slopes - Non-compliant treads/risers at means of egress stairways	- Single height drinking fountains - Drinking fountain too high or protrudes into accessible route - Ramps need rails - Ramps need rail extensions - Need significant # of lever handles - Non-compliant rail extensions at egress stairways - All/most door thresholds high	- One door threshold too high - A few door knobs instead of lever handles - Non-compliant door pressures - Non-compliant signage - Switches not within reach range

Reference Guide

	Major Issues *(ADA study recommended)*	Moderate Issues *(ADA study recommended)*	Minor/No Issues
Public Use Restrooms	- No ADA RR on each accessible floor - Restroom(s) too small - Entire restroom(s) requires renovation - Water closet clearance requires moving walls	- Interior doors appear less than 32” wide - Missing or non-compliant grab bars - Easily fixable clearance issues	- Minor height adjustments required - Non-compliant door pressures - Missing a visual strobe (only required if audible fire alarm already present) - Missing lavatory pipe wraps - Signage not compliant
Elevators	- No elevator present when required - Elevator cab too small	- Panel control buttons not at compliant height - No hands-free emergency communication system - Elevator only has mechanical stops	- Audible/visual signals at every floor may be lacking - Minor signage / Braille issues
Kitchens/Kitchenettes	- Clear space for each appliance not present - Clearance between opposing counters too narrow	- Sink and counter too high - Sink knee and toe clearance not provided where required (built-in) - Less than 50% of cabinetry within reach range	- Dispensers not within reach range - Switches not within reach range - Missing sink pipe wraps if knee and toe clearance required

8. Purpose and Scope

Purpose

Bureau Veritas was retained by the client to render an opinion as to the Property's current general physical condition on the day of the site visit.

Based on the observations, interviews and document review outlined below, this report identifies significant deferred maintenance issues, existing deficiencies, and material code violations of record, which affect the Property's use. Opinions are rendered as to its structural integrity, building system condition and the Property's overall condition. The report also notes building systems or components that have realized or exceeded their typical expected useful lives.

The physical condition of building systems and related components are typically defined as being in one of five condition ratings. For the purposes of this report, the following definitions are used:

Condition Ratings	
Excellent	New or very close to new; component or system typically has been installed within the past year, sound and performing its function. Eventual repair or replacement will be required when the component or system either reaches the end of its useful life or fails in service.
Good	Satisfactory as-is. Component or system is sound and performing its function, typically within the first third of its lifecycle. However, it may show minor signs of normal wear and tear. Repair or replacement will be required when the component or system either reaches the end of its useful life or fails in service.
Fair	Showing signs of wear and use but still satisfactory as-is, typically near the median of its estimated useful life. Component or system is performing adequately at this time but may exhibit some signs of wear, deferred maintenance, or evidence of previous repairs. Repair or replacement will be required due to the component or system's condition and/or its estimated remaining useful life.
Poor	Component or system is significantly aged, flawed, functioning intermittently or unreliably; displays obvious signs of deferred maintenance; shows evidence of previous repair or workmanship not in compliance with commonly accepted standards; has become obsolete; or exhibits an inherent deficiency. The present condition could contribute to or cause the deterioration of contiguous elements or systems. Either full component replacement is needed or repairs are required to restore to good condition, prevent premature failure, and/or prolong useful life.
Failed	Component or system has ceased functioning or performing as intended. Replacement, repair, or other significant corrective action is recommended or required.
Not Applicable	Assigning a condition does not apply or make logical sense, most commonly due to the item in question not being present.

Scope

The standard scope of the Facility Condition Assessment includes the following:

- Visit the Property to evaluate the general condition of the building and site improvements, review available construction documents in order to familiarize ourselves with, and be able to comment on, the in-place construction systems, life safety, mechanical, electrical, and plumbing systems, and the general built environment.
- Identify those components that are exhibiting deferred maintenance issues and provide cost estimates for Immediate Costs and Replacement Reserves based on observed conditions, maintenance history and industry standard useful life estimates. This will include the review of documented capital improvements completed within the last five-year period and work currently contracted for, if applicable.
- Provide a full description of the Property with descriptions of in-place systems and commentary on observed conditions.
- Provide a high-level categorical general statement regarding the subject Property's compliance to Title III of the Americans with Disabilities Act. This will not constitute a full ADA survey, but will help identify exposure to issues and the need for further review.
- Obtain background and historical information about the facility from a building engineer, property manager, maintenance staff, or other knowledgeable source. The preferred methodology is to have the client representative or building occupant complete a Pre-Survey Questionnaire (PSQ) in advance of the site visit. Common alternatives include a verbal interview just prior to or during the walk-through portion of the assessment.
- Review maintenance records and procedures with the in-place maintenance personnel.
- Observe a representative sample of the interior spaces/units, including vacant spaces/units, to gain a clear understanding of the property's overall condition. Other areas to be observed include the exterior of the property, the roofs, interior common areas, and the significant mechanical, electrical and elevator equipment rooms.
- Provide recommendations for additional studies, if required, with related budgetary information.
- Provide an Executive Summary at the beginning of this report, which highlights key findings and includes a Facility Condition Index as a basis for comparing the relative conditions of the buildings within the portfolio.

9. Opinions of Probable Costs

Cost estimates are attached throughout this report, with the Replacement Reserves in the appendix.

These estimates are based on Invoice or Bid Document/s provided either by the Owner/facility and construction costs developed by construction resources such as *R.S. Means, CBRE Whitestone,* and *Marshall & Swift,* Bureau Veritas's experience with past costs for similar properties, city cost indexes, and assumptions regarding future economic conditions.

Opinions of probable costs should only be construed as preliminary, order of magnitude budgets. Actual costs most probably will vary from the consultant's opinions of probable costs depending on such matters as type and design of suggested remedy, quality of materials and installation, manufacturer and type of equipment or system selected, field conditions, whether a physical deficiency is repaired or replaced in whole, phasing or bundling of the work (if applicable), quality of contractor, quality of project management exercised, market conditions, use of subcontractors, and whether competitive pricing is solicited, etc. Certain opinions of probable costs cannot be developed within the scope of this guide without further study. Opinions of probable cost for further study should be included in the FCA.

Methodology

Based upon site observations, research, and judgment, along with referencing Expected Useful Life (EUL) tables from various industry sources, Bureau Veritas opines as to when a system or component will most probably necessitate replacement. Accurate historical replacement records, if provided, are typically the best source of information. Exposure to the elements, initial quality and installation, extent of use, the quality and amount of preventive maintenance exercised, etc., are all factors that impact the effective age of a system or component. As a result, a system or component may have an effective age that is greater or less than its actual chronological age. The Remaining Useful Life (RUL) of a component or system equals the EUL less its *effective age*, whether explicitly or implicitly stated. Projections of Remaining Useful Life (RUL) are based primarily on age and condition with the presumption of continued use and maintenance of the Property similar to the observed and reported past use and maintenance practices, in conjunction with the professional judgment of Bureau Veritas's assessors. Significant changes in occupants and/or usage may affect the service life of some systems or components.

Where quantities could not be or were not derived from an actual construction document take-off or facility walk-through, and/or where systemic costs are more applicable or provide more intrinsic value, budgetary square foot and gross square foot costs are used. Estimated costs are based on professional judgment and the probable or actual extent of the observed defect, inclusive of the cost to design, procure, construct and manage the corrections.

Definitions

Immediate Needs

Immediate Needs are line items that require immediate action as a result of: (1) material existing or potential unsafe conditions, (2) failed or imminent failure of mission critical building systems or components, or (3) conditions that, if not addressed, have the potential to result in, or contribute to, critical element or system failure within one year or will most probably result in a significant escalation of its remedial cost.

For database and reporting purposes the line items with RUL=0, and commonly associated with *Safety* or *Performance/Integrity* Plan Types, are considered Immediate Needs.

Replacement Reserves

Cost line items traditionally called Replacement Reserves (equivalently referred to as Lifecycle/Renewals) are for recurring probable renewals or expenditures, which are not classified as operation or maintenance expenses. The replacement reserves should be budgeted for in advance on an annual basis. Replacement Reserves are reasonably predictable both in terms of frequency and cost. However, Replacement Reserves may also include components or systems that have an indeterminable life but, nonetheless, have a potential for failure within an estimated time period.

Replacement Reserves generally exclude systems or components that are estimated to expire after the reserve term and are not considered material to the structural and mechanical integrity of the subject property. Furthermore, systems and components that are not deemed to have a material effect on the use of the Property are also excluded. Costs that are caused by acts of God, accidents, or other occurrences that are typically covered by insurance, rather than reserved for, are also excluded.

Replacement costs are solicited from ownership/property management, Bureau Veritas's discussions with service companies, manufacturers' representatives, and previous experience in preparing such schedules for other similar facilities. Costs for work performed by the ownership's or property management's maintenance staff are also considered.

Bureau Veritas's reserve methodology involves identification and quantification of those systems or components requiring capital reserve funds within the assessment period. The assessment period is defined as the effective age plus the reserve term. Additional information concerning system's or component's respective replacement costs (in today's dollars), typical expected useful lives, and remaining useful lives were estimated so that a funding schedule could be prepared. The Replacement Reserves Schedule presupposes that all required remedial work has been performed or that monies for remediation have been budgeted for items defined as Immediate Needs.

For the purposes of 'bucketizing' the System Expenditure Forecasts in this report, the Replacement Reserves have been subdivided and grouped as follows: Short Term (years 1-3), Near Term (years 4-5), Medium Term (years 6-10), and Long Term (years 11-20).

Key Findings

In an effort to highlight the most significant cost items and not be overwhelmed by the Replacement Reserves report in its totality, a subsection of Key Findings is included within the Executive Summary section of this report. Key Findings typically include repairs or replacements of deficient items within the first five-year window, as well as the most significant high-dollar line items that fall anywhere within the ten-year term. Note that while there is some subjectivity associated with identifying the Key Findings, the Immediate Needs are always included as a subset.

Exceedingly Aged

A fairly common scenario encountered during the assessment process, and a frequent source of debate, occurs when classifying and describing "very old" systems or components that are still functioning adequately and do not appear nor were reported to be in any way deficient. To help provide some additional intelligence on these items, such components will be tagged in the database as Exceedingly Aged. This designation will be reserved for mechanical or electrical systems or components that have aged well beyond their industry standard lifecycles, typically at least 15 years beyond and/or twice their Estimated Useful Life (EUL). In tandem with this designation, these items will be assigned a Remaining Useful Life (RUL) not less than two years but not greater than 1/3 of their standard EUL. As such the recommended replacement time for these components will reside outside the typical Short Term window but will not be pushed 'irresponsibly' (too far) into the future.

10. Certification

City of Montebello (the Client) retained Bureau Veritas to perform this Facility Condition Assessment in connection with its continued operation of Transporation Facility, 400 South Taylor Avenue, Montebello California 90640, the “Property”. It is our understanding that the primary interest of the Client is to locate and evaluate materials and building system defects that might significantly affect the value of the property and to determine if the present Property has conditions that will have a significant impact on its continued operations.
The conclusions and recommendations presented in this report are based on the brief review of the plans and records made available to our Project Manager during the site visit, interviews of available property management personnel and maintenance contractors familiar with the Property, appropriate inquiry of municipal authorities, our Project Manager’s walk-through observations during the site visit, and our experience with similar properties.

No testing, exploratory probing, dismantling or operating of equipment or in-depth studies were performed unless specifically required under the *Purpose and Scope* section of this report. This assessment did not include engineering calculations to determine the adequacy of the Property’s original design or existing systems. Although walk-through observations were performed, not all areas may have been observed (see Section 1 for specific details). There may be defects in the Property, which were in areas not observed or readily accessible, may not have been visible, or were not disclosed by management personnel when questioned. The report describes property conditions at the time that the observations and research were conducted.

This report has been prepared on behalf of and exclusively for the use of the Client for the purpose stated within the *Purpose and Scope* section of this report. The report, or any excerpt thereof, shall not be used by any party other than the Client or for any other purpose than that specifically stated in our agreement or within the *Purpose and Scope* section of this report without the express written consent of Bureau Veritas.

Any reuse or distribution of this report without such consent shall be at the Client and the recipient’s sole risk, without liability to Bureau Veritas.

Property Overview and Assessment Details

General Information	
Property Type	Office building
Main Address	1700 West Victoria Avenue, Montebello, California 90640
Site Developed	1998
Site Area	0.42 acres (estimated)
Parking Spaces	7 total spaces all in open lots; 0 of which are accessible Accessible parking is shared with street public parking
Building Area	6,300 SF
Number of Stories	One
Outside Occupants / Leased Spaces	None
Date(s) of Visit	May 12, 2020
Management Point of Contact	City of Montebello/Park, Recreation and Community Services, David Sosnowski, Director 323.887.4588 phone dsosnowski@cityofmentebello.com email
On-site Point of Contact (POC)	same as above
Assessment and Report Prepared By	Nezar M. Tibi

Significant/Systemic Findings and Deficiencies

Historical Summary

The building was constructed in 1998. It has a single story with no basement and is occupied by the Park and Recreation Office.

Architectural

The building consists of metal frame construction on concrete slabs with integral footings. In general, the structure appears to be sound, with no significant areas of settlement or structural-related deficiencies observed. The exterior envelope systems and components were observed to be performing adequately. The roof is flat with a modified bituminous finish in fair condition. The interior finishes have been well maintained throughout the building. Finishes have been replaced as needed and are anticipated for lifecycle replacement based on useful life and normal wear.

Mechanical, Electrical, Plumbing and Fire (MEPF)

The majority of the MEPF systems and components are from 1998 and 2002. Heating and cooling are provided by rooftop packaged units. Domestic hot water is provided by two small local domestic water heaters. The main switchgear located in the utility closet. Building is protected by a fire alarm system but lacks a fire sprinkler system. Lifecycle replacement of the majority of the MEPF system is anticipated.

Site

The parking lot and sidewalks have been periodically repaved and sectionally replaced as needed over the years. The site contains limited landscaping, which is served by in-ground irrigation systems.

Recommended Additional Studies

No additional studies recommended at this time.

Facility Condition Index (FCI)

One of the major goals of the FCA is to calculate each building's Facility Condition Index (FCI), which provides a theoretical objective indication of a building's overall condition. By definition, the FCI is defined as the ratio of the cost of current needs divided by current replacement value (CRV) of the facility. The chart below presents the industry standard ranges and cut-off points.

FCI Ranges and Description	
0 – 5%	In new or well-maintained condition, with little or no visual evidence of wear or deficiencies.
5 – 10%	Subjected to wear but is still in a serviceable and functioning condition.
10 – 30%	Subjected to hard or long-term wear. Nearing the end of its useful or serviceable life.
30% and above	Has reached the end of its useful or serviceable life. Renewal is now necessary.

The deficiencies and lifecycle needs identified in this assessment provide the basis for a portfolio-wide capital improvement funding strategy. In addition to the current FCI, extended FCI's have been developed to provide owners the intelligence needed to plan and budget for the "keep-up costs" for their facilities. As such the 3-year, 5-year, and 10-year FCI's are calculated by dividing the anticipated needs of those respective time periods by current replacement value. As a final point, the FCI's ultimately provide more value when used to relatively compare facilities across a portfolio instead of being over-analyzed and scrutinized as stand-alone values. The table below summarizes the individual findings for this FCA:

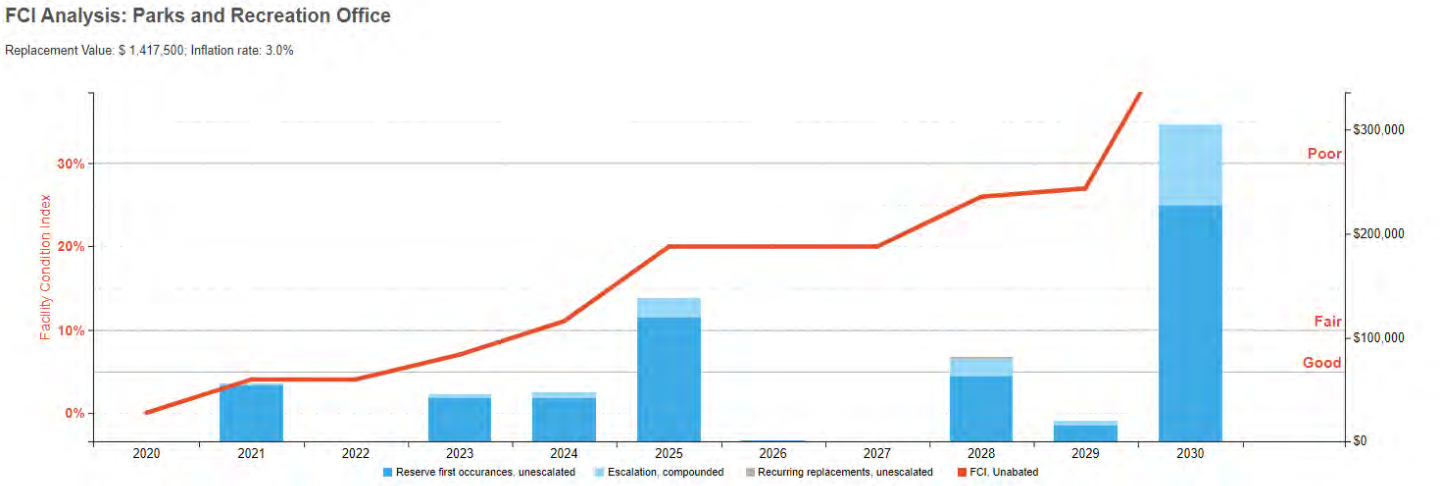
FCI Analysis

FCI Analysis | Parks and Recreation Office

Replacement Value *$ 1,417,500*	*Total SF* *6,300*	*Cost/SF* *$ 225*
Current FCI	$ 0	0.0 %
3-Year	$ 101,900	7.2 %
5-Year	$ 287,100	20.3 %
10-Year	$ 692,700	48.9 %

The orange line in the graph below forecasts what would happen to the FCI (left Y axis) over time, assuming zero capital expenditures. The capital expenditures allocated for each year (blue bars) are associated with the dollar amounts along the right Y axis.

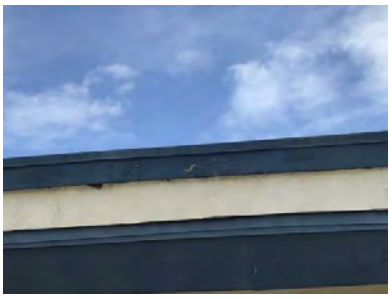
Needs by Year with Unaddressed FCI Over Time



Immediate Needs

None

Key Findings



Exterior Wall in Poor condition.

any Painted Surface, 1-2 Stories
Parks and Recreation Office Building exterior

Uniformat Code: B2011
Recommendation: **Prep & Paint in 2021**

Priority Score: **89.9**

Plan Type: Performance/Integrity

Cost Estimate: $600

**$**$$$

The fascia exhibits areas of deteriorated paint. - AssetCALC ID: 1832390

Interior Ceiling Finish in Poor condition.

Suspended Acoustical Tile (ACT)
Parks and Recreation Office Throughout building

Uniformat Code: C3032
Recommendation: **Replace in 2021**

Priority Score: **83.0**

Plan Type: Performance/Integrity

Cost Estimate: $400

**$**$$$

Stain areas were observed. Replacement of the effected tiles is recommended. - AssetCALC ID: 1832438

Building/Main Switchboard in Poor condition.

120/208 V, 400 Amp
Parks and Recreation Office Utility closet

Uniformat Code: D5012
Recommendation: **Replace in 2058**

Priority Score: **61.9**

Plan Type: Modernization/Adaptation

Cost Estimate: $53,600

**$$$**$

Zinsco switchboard can had safety issue - AssetCALC ID: 1832419

Parks and Recreation Office Throughout building

Uniformat Code: C3032
Recommendation: **Replace in 2033**

Priority Score: **55.9**

Plan Type: Modernization/Adaptation

Cost Estimate: $26,700

**$$**$$

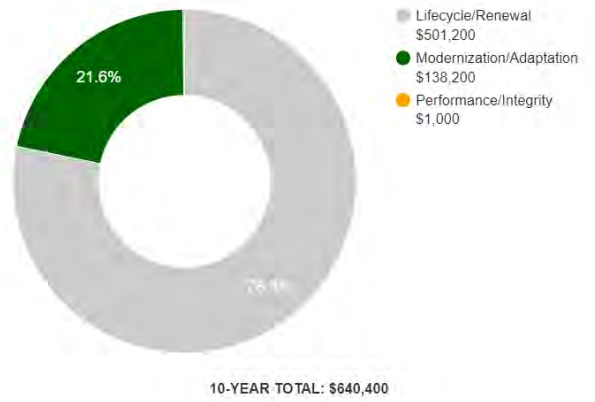
- AssetCALC ID: 1832420

Plan Types

Each line item in the cost database is assigned a Plan Type, which is the primary reason or rationale for the recommended replacement, repair, or other corrective action. This is the "why" part of the equation. A cost or line item may commonly have more than one applicable Plan Type; however, only one Plan Type will be assigned based on the "best" fit, typically the one with the greatest significance.

Plan Type Descriptions		
Safety	■	An observed or reported unsafe condition that if left unaddressed could result in injury; a system or component that presents potential liability risk.
Performance/Integrity	■	Component or system has failed, is almost failing, performs unreliably, does not perform as intended, and/or poses risk to overall system stability.
Accessibility	■	Does not meet ADA, UFAS, and/or other handicap accessibility requirements.
Environmental	■	Improvements to air or water quality, including removal of hazardous materials from the building or site.
Retrofit/Adaptation	■	Components, systems, or spaces recommended for upgrades in in order to meet current standards, facility usage, or client/occupant needs.
Lifecycle/Renewal	■	Any component or system that is not currently deficient or problematic but for which future replacement or repair is anticipated and budgeted.

Plan Type Distribution (by Cost)



2. Building and Site Information

Systems Summary

System	Description	Condition
Structure	Steel frame with concrete-topped metal decks	Good
Façade	Stucco with aluminum windows	Fair
Roof	Primary: Flat construction with modified bituminous finish	Fair
Interiors	Walls: Painted gypsum board & ceramic tile Floors: Carpet, VCT and ceramic tile Ceilings: Painted gypsum board and ACT	Fair
Elevators	None	--
Plumbing	Copper supply and cast-iron waste & venting Electric water heaters Toilets, urinals, and sinks in all restrooms	Fair
HVAC	Individual rooftop package units	Fair

Systems Summary		
Fire Suppression	Fire extinguishers	Fair
Electrical	Source & Distribution: Main switchgear with copper wiring Interior Lighting: T-8 Emergency: none	Fair
Fire Alarm	Alarm panel, smoke detectors and exit signs	Fair
Equipment/Special	None	--
Site Pavement	Asphalt lots with areas of concrete and concrete sidewalks, curbs and ramps	Fair
Site Development	Building-mounted signage, chain-link fencing and CMU wall Site lights Trash receptacle	Fair
Landscaping and Topography	Limited landscaping features Irrigation present No retaining walls Low to moderate site slopes throughout	Fair
Utilities	Municipal water and sewer Local utility-provided electric and natural gas	Good
Site Lighting	Pole-mounted: incandescent, T-8, T-12, metal halide Building-mounted: LED	Fair
Ancillary Structures	None	--
Accessibility	Presently it does not appear an accessibility study is needed for this property.	
Key Issues and Findings	Building lacks fire suppression, repair deteriorated paint on the east fascia, replace damaged ACT tiles, switch gear is obsolete.	

Systems Expenditure Forecast

System Expenditure Forecast

System	Immediate	Short Term (1-3 yr)	Near Term (4-5 yr)	Med Term (6-10 yr)	Long Term (11-20 yr)	TOTAL
Facade	-	$600	$39,600	-	$102,800	$143,000
Roofing	-	-	$1,100	$114,600	$1,400	$117,100
Interiors	-	$400	$66,800	$20,100	$160,200	$247,500
Plumbing	-	-	-	$1,600	$30,900	$32,500
Fire Suppression	-	-	$48,800	-	$1,700	$50,500
HVAC	-	$43,200	-	$45,400	-	$88,500
Electrical	-	$55,200	$3,100	$94,100	$278,500	$430,900
Fire Alarm & Comm	-	-	$26,100	$78,900	$83,200	$188,200
Equipment/Special	-	-	-	$6,500	$14,900	$21,300
Pavement	-	$2,400	-	$26,100	$7,100	$35,600
Site Development	-	-	-	$2,700	$14,300	$17,000
Site Lighting	-	-	-	$14,400	-	$14,400
Landscaping	-	-	-	$4,000	-	$4,000
TOTALS	**-**	**$101,800**	**$185,500**	**$408,400**	**$695,000**	**$1,390,500**

3. Property Space Use and Observed Areas

Unit Allocation

All 6,300 square feet of the property are occupied by the City of Montebello. The spaces are mostly a combination of offices, conference rooms with supporting restrooms, administrative offices, and other utility spaces.

Areas Observed

The interior spaces were observed in order to gain a clear understanding of the property's overall condition. Other areas accessed included the site within the property boundaries, the exterior of the property, and the roof.

Key Spaces Not Observed

All key areas of the property were accessible and observed.

4. ADA Accessibility

Generally, Title II of the Americans with Disabilities Act (ADA) prohibits discrimination by entities to access and use of "areas of public accommodations" and "public facilities" on the basis of disability. Regardless of their age, these areas and facilities must be maintained and operated to comply with the Americans with Disabilities Act Accessibility Guidelines (ADAAG).

A public entity (i.e. city governments) shall operate each service, program, or activity so that the service, program, or activity, when viewed in its entirety, is readily accessible to and usable by individuals with disabilities.

However, this does not:

1. Necessarily require a public entity to make each of its existing facilities accessible to and usable by individuals with disabilities.
2. Require a public entity to take any action that would threaten or destroy the historic significance of an historic property; or
3. Require a public entity to take any action that it can demonstrate would result in a fundamental alteration in the nature of a service, program, or activity or in undue financial and administrative burdens. In those circumstances where personnel of the public entity believe that the proposed action would fundamentally alter the service, program, or activity or would result in undue financial and administrative burdens, a public entity has the burden of proving that compliance with 35.150(a) of this part would result in such alteration or burdens. The decision that compliance would result in such alteration or burdens must be made by the head of a public entity or his or her designee after considering all resources available for use in the funding and operation of the service, program, or activity, and must be accompanied by a written statement of the reasons for reaching that conclusion. If an action would result in such an alteration or such burdens, a public entity shall take any other action that would not result in such an alteration or such burdens but would nevertheless ensure that individuals with disabilities receive the benefits or services provided by the public entity.

During the FCA, Bureau Veritas performed a limited high-level accessibility review of the facility non-specific to any local regulations or codes. The scope of the visual observation was limited to those areas and categories set forth in the tables throughout this report. It is understood by the Client that the limited observations described herein do not comprise a full ADA Compliance Survey, and that such a survey is beyond the scope of Bureau Veritas's undertaking. Only a representative sample of areas was observed, and actual measurements were not taken to verify compliance.

The facility was originally constructed in 1998. The facility was not subsequently renovated. Complaints about accessibility issues have not been received by the property management. The property does not have associated prior litigation related to existing barriers or previously removed barriers.

An accessibility study has not been performed at the site. Although no significant issues were identified, a comprehensive ADA Compliance Survey may reveal specific aspects of the property that are not in full compliance.

Removal of barriers to accessibility should be addressed from a liability standpoint in order to comply with federal law, but the barriers may or may not be building code violations. The Americans with Disabilities Act Accessibility Guidelines are part of the ADA federal civil rights law pertaining to the disabled and are not a construction code. State and local jurisdictions have adopted the ADA Guidelines or have adopted other standards for accessibility as part of their construction codes.

Accessible restroom accommodations

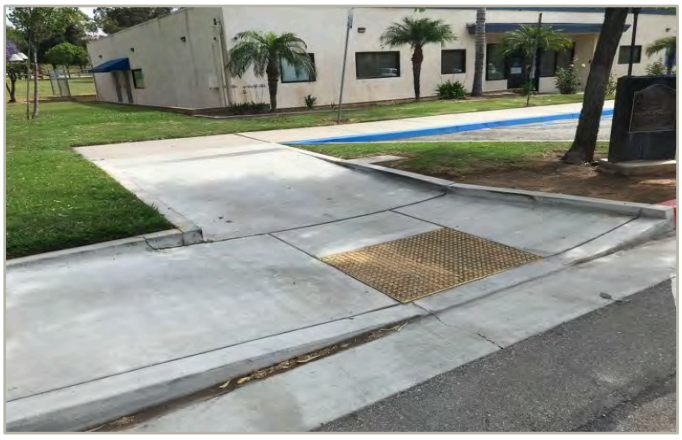
Accessible parking



Exterior path of travel

The table below is intended to be used as a general reference guide to help differentiate the orders of magnitude between some of the more commonly observed accessibility issues. The table is not intended to be all-inclusive, and boxes checked in the tables above do not necessarily mean those specific problems or shortcomings cited as examples below exist at the subject buildings and sites. Reference the photos above and/or *Key Findings* section for visuals and/or more specifics about the subject site conditions.

Reference Guide

	Major Issues *(ADA study recommended)*	Moderate Issues *(ADA study recommended)*	Minor/No Issues
Parking	- Needs full reconstruction - Excessive slopes over 3% require major re-grading - No level locations to add required spaces	- No or non-compliant curb cuts - Moderate difficulty to add required accessible spaces - Slopes close to compliant	- Painting of markings needed - Signage height non-compliant - Signage missing
Exterior Path of Travel	- Large areas of sidewalks with excessive slopes - No ramp when needed - Ramps with excessive slopes	- Ramps need rails - Ramps need rail extensions - Need significant # of lever handles - All or most entrance door exterior maneuvering clearance areas with excessive slopes	- One entrance door exterior maneuvering clearance area with excessive slope - A few doorknobs instead of lever handles - Non-compliant signage
Interior Path of Travel	- All or most interior doors appear less than 32” wide - Corridors less than 36” wide - No ramp when needed - Ramps with excessive slopes - Non-compliant treads/risers at means of egress stairways	- Single height drinking fountains - Drinking fountain too high or protrudes into accessible route - Ramps need rails - Ramps need rail extensions - Need significant # of lever handles - Non-compliant rail extensions at egress stairways - All/most door thresholds high	- One door threshold too high - A few doorknobs instead of lever handles - Non-compliant door pressures - Non-compliant signage - Switches not within reach range
Public Use Restrooms	- No ADA RR on each accessible floor - Restroom(s) too small - Entire restroom(s) requires renovation - Water closet clearance requires moving walls	- Interior doors appear less than 32” wide - Missing or non-compliant grab bars - Easily fixable clearance issues	- Minor height adjustments required - Non-compliant door pressures - Missing a visual strobe (only required if audible fire alarm already present) - Missing lavatory pipe wraps - Signage not compliant
Elevators	- No elevator present when required - Elevator cab too small	- Panel control buttons not at compliant height - No hands-free emergency communication system - Elevator only has mechanical stops	- Audible/visual signals at every floor may be lacking - Minor signage / Braille issues
Kitchens/Kitchenettes	- Clear space for each appliance not present - Clearance between opposing counters too narrow	- Sink and counter too high - Sink knee and toe clearance not provided where required (built-in) - Less than 50% of cabinetry within reach range	- Dispensers not within reach range - Switches not within reach range - Missing sink pipe wraps if knee and toe clearance required

5. Purpose and Scope

Purpose

Bureau Veritas was retained by the client to render an opinion as to the Property's current general physical condition on the day of the site visit.

Based on the observations, interviews and document review outlined below, this report identifies significant deferred maintenance issues, existing deficiencies, and material code violations of record, which affect the Property's use. Opinions are rendered as to its structural integrity, building system condition and the Property's overall condition. The report also notes building systems or components that have realized or exceeded their typical expected useful lives.

The physical condition of building systems and related components are typically defined as being in one of five condition ratings. For the purposes of this report, the following definitions are used:

Condition Ratings	
Excellent	New or very close to new; component or system typically has been installed within the past year, sound and performing its function. Eventual repair or replacement will be required when the component or system either reaches the end of its useful life or fails in service.
Good	Satisfactory as-is. Component or system is sound and performing its function, typically within the first third of its lifecycle. However, it may show minor signs of normal wear and tear. Repair or replacement will be required when the component or system either reaches the end of its useful life or fails in service.
Fair	Showing signs of wear and use but still satisfactory as-is, typically near the median of its estimated useful life. Component or system is performing adequately at this time but may exhibit some signs of wear, deferred maintenance, or evidence of previous repairs. Repair or replacement will be required due to the component or system's condition and/or its estimated remaining useful life.
Poor	Component or system is significantly aged, flawed, functioning intermittently or unreliably; displays obvious signs of deferred maintenance; shows evidence of previous repair or workmanship not in compliance with commonly accepted standards; has become obsolete; or exhibits an inherent deficiency. The present condition could contribute to or cause the deterioration of contiguous elements or systems. Either full component replacement is needed, or repairs are required to restore to good condition, prevent premature failure, and/or prolong useful life.
Failed	Component or system has ceased functioning or performing as intended. Replacement, repair, or other significant corrective action is recommended or required.
Not Applicable	Assigning a condition does not apply or make logical sense, most commonly due to the item in question not being present.

Scope

The standard scope of the Facility Condition Assessment includes the following:

- Visit the Property to evaluate the general condition of the building and site improvements, review available construction documents in order to familiarize ourselves with, and be able to comment on, the in-place construction systems, life safety, mechanical, electrical, and plumbing systems, and the general built environment.
- Identify those components that are exhibiting deferred maintenance issues and provide cost estimates for Immediate Costs and Replacement Reserves based on observed conditions, maintenance history and industry standard useful life estimates. This will include the review of documented capital improvements completed within the last five-year period and work currently contracted for, if applicable.
- Provide a full description of the Property with descriptions of in-place systems and commentary on observed conditions.
- Provide a high-level categorical general statement regarding the subject Property's compliance to Title III of the Americans with Disabilities Act. This will not constitute a full ADA survey, but will help identify exposure to issues and the need for further review.
- Obtain background and historical information about the facility from a building engineer, property manager, maintenance staff, or other knowledgeable source. The preferred methodology is to have the client representative or building occupant complete a Pre-Survey Questionnaire (PSQ) in advance of the site visit. Common alternatives include a verbal interview just prior to or during the walk-through portion of the assessment.
- Review maintenance records and procedures with the in-place maintenance personnel.
- Observe a representative sample of the interior spaces/units, including vacant spaces/units, to gain a clear understanding of the property's overall condition. Other areas to be observed include the exterior of the property, the roofs, interior common areas, and the significant mechanical, electrical and elevator equipment rooms.
- Provide recommendations for additional studies, if required, with related budgetary information.
- Provide an Executive Summary at the beginning of this report, which highlights key findings and includes a Facility Condition Index as a basis for comparing the relative conditions of the buildings within the portfolio.

6. Opinions of Probable Costs

Cost estimates are attached throughout this report, with the Replacement Reserves in the appendix.

These estimates are based on Invoice or Bid Document/s provided either by the Owner/facility and construction costs developed by construction resources such as *R.S. Means, CBRE Whitestone,* and *Marshall & Swift,* Bureau Veritas's experience with past costs for similar properties, city cost indexes, and assumptions regarding future economic conditions.

Opinions of probable costs should only be construed as preliminary, order of magnitude budgets. Actual costs most probably will vary from the consultant's opinions of probable costs depending on such matters as type and design of suggested remedy, quality of materials and installation, manufacturer and type of equipment or system selected, field conditions, whether a physical deficiency is repaired or replaced in whole, phasing or bundling of the work (if applicable), quality of contractor, quality of project management exercised, market conditions, use of subcontractors, and whether competitive pricing is solicited, etc. Certain opinions of probable costs cannot be developed within the scope of this guide without further study. Opinions of probable cost for further study should be included in the FCA.

Methodology

Based upon site observations, research, and judgment, along with referencing Expected Useful Life (EUL) tables from various industry sources, Bureau Veritas opines as to when a system or component will most probably necessitate replacement. Accurate historical replacement records, if provided, are typically the best source of information. Exposure to the elements, initial quality and installation, extent of use, the quality and amount of preventive maintenance exercised, etc., are all factors that impact the effective age of a system or component. As a result, a system or component may have an effective age that is greater or less than its actual chronological age. The Remaining Useful Life (RUL) of a component or system equals the EUL less its *effective age*, whether explicitly or implicitly stated. Projections of Remaining Useful Life (RUL) are based primarily on age and condition with the presumption of continued use and maintenance of the Property similar to the observed and reported past use and maintenance practices, in conjunction with the professional judgment of Bureau Veritas's assessors. Significant changes in occupants and/or usage may affect the service life of some systems or components.

Where quantities could not be or were not derived from an actual construction document take-off or facility walk-through, and/or where systemic costs are more applicable or provide more intrinsic value, budgetary square foot and gross square foot costs are used. Estimated costs are based on professional judgment and the probable or actual extent of the observed defect, inclusive of the cost to design, procure, construct and manage the corrections.

Definitions

Immediate Needs

Immediate Needs are line items that require immediate action as a result of: (1) material existing or potential unsafe conditions, (2) failed or imminent failure of mission critical building systems or components, or (3) conditions that, if not addressed, have the potential to result in, or contribute to, critical element or system failure within one year or will most probably result in a significant escalation of its remedial cost.

For database and reporting purposes the line items with RUL=0, and commonly associated with *Safety* or *Performance/Integrity* Plan Types, are considered Immediate Needs.

Replacement Reserves

Cost line items traditionally called Replacement Reserves (equivalently referred to as Lifecycle/Renewals) are for recurring probable renewals or expenditures, which are not classified as operation or maintenance expenses. The replacement reserves should be budgeted for in advance on an annual basis. Replacement Reserves are reasonably predictable both in terms of frequency and cost. However, Replacement Reserves may also include components or systems that have an indeterminable life but, nonetheless, have a potential for failure within an estimated time period.

Replacement Reserves generally exclude systems or components that are estimated to expire after the reserve term and are not considered material to the structural and mechanical integrity of the subject property. Furthermore, systems and components that are not deemed to have a material effect on the use of the Property are also excluded. Costs that are caused by acts of God, accidents, or other occurrences that are typically covered by insurance, rather than reserved for, are also excluded.

Replacement costs are solicited from ownership/property management, Bureau Veritas's discussions with service companies, manufacturers' representatives, and previous experience in preparing such schedules for other similar facilities. Costs for work performed by the ownership's or property management's maintenance staff are also considered.

Bureau Veritas's reserve methodology involves identification and quantification of those systems or components requiring capital reserve funds within the assessment period. The assessment period is defined as the effective age plus the reserve term. Additional information concerning system's or component's respective replacement costs (in today's dollars), typical expected useful lives, and remaining useful lives were estimated so that a funding schedule could be prepared. The Replacement Reserves Schedule presupposes that all required remedial work has been performed or that monies for remediation have been budgeted for items defined as Immediate Needs.

For the purposes of 'bucketizing' the System Expenditure Forecasts in this report, the Replacement Reserves have been subdivided and grouped as follows: Short Term (years 1-3), Near Term (years 4-5), Medium Term (years 6-10), and Long Term (years 11-20).

Key Findings

In an effort to highlight the most significant cost items and not be overwhelmed by the Replacement Reserves report in its totality, a subsection of Key Findings is included within the Executive Summary section of this report. Key Findings typically include repairs or replacements of deficient items within the first five-year window, as well as the most significant high-dollar line items that fall anywhere within the ten-year term. Note that while there is some subjectivity associated with identifying the Key Findings, the Immediate Needs are always included as a subset.

Exceedingly Aged

A fairly common scenario encountered during the assessment process, and a frequent source of debate, occurs when classifying and describing "very old" systems or components that are still functioning adequately and do not appear nor were reported to be in any way deficient. To help provide some additional intelligence on these items, such components will be tagged in the database as Exceedingly Aged. This designation will be reserved for mechanical or electrical systems or components that have aged well beyond their industry standard lifecycles, typically at least 15 years beyond and/or twice their Estimated Useful Life (EUL). In tandem with this designation, these items will be assigned a Remaining Useful Life (RUL) not less than two years but not greater than 1/3 of their standard EUL. As such the recommended replacement time for these components will reside outside the typical Short Term window but will not be pushed 'irresponsibly' (too far) into the future.

7. Certification

The City of Montebello (the Client) retained Bureau Veritas to perform this Facility Condition Assessment in connection with its continued operation of Park and Recreation Office, 1700 West Victoria Avenue, Montebello, California 90640, the "Property". It is our understanding that the primary interest of the Client is to locate and evaluate materials and building system defects that might significantly affect the value of the property and to determine if the present Property has conditions that will have a significant impact on its continued operations.

The conclusions and recommendations presented in this report are based on the brief review of the plans and records made available to our Project Manager during the site visit, interviews of available property management personnel and maintenance contractors familiar with the Property, appropriate inquiry of municipal authorities, our Project Manager's walk-through observations during the site visit, and our experience with similar properties.

No testing, exploratory probing, dismantling or operating of equipment or in-depth studies were performed unless specifically required under the *Purpose and Scope* section of this report. This assessment did not include engineering calculations to determine the adequacy of the Property's original design or existing systems. Although walk-through observations were performed, not all areas may have been observed (see Section 1 for specific details). There may be defects in the Property, which were in areas not observed or readily accessible, may not have been visible, or were not disclosed by management personnel when questioned. The report describes property conditions at the time that the observations and research were conducted.

This report has been prepared on behalf of and exclusively for the use of the Client for the purpose stated within the *Purpose and Scope* section of this report. The report, or any excerpt thereof, shall not be used by any party other than the Client or for any other purpose than that specifically stated in our agreement or within the *Purpose and Scope* section of this report without the express written consent of Bureau Veritas.

Any reuse or distribution of this report without such consent shall be at the Client and the recipient's sole risk, without liability to Bureau Veritas.

Property Overview and Assessment Details

General Information	
Property Type	City Hall / Office building
Main Address	1600 West Beverly Boulevard, Montebello, California 90640
Site Developed	1960's Partially Renovated 2020 at Southeast wing
Site Area	5.25 acres (estimated)
Parking Spaces	228 total spaces all in open lots; 6 of which are accessible
Building Area	40,250 SF
Number of Stories	Two
Outside Occupants / Leased Spaces	None
Date(s) of Visit	May 5, 2020
Management Point of Contact	City of Montebello/Park, Recreation and Community Services, David Sosnowski, Director 323.887.4588 phone dsosnowski@cityofmentebello.com email
On-site Point of Contact (POC)	Same as above
Assessment and Report Prepared By	Nezar M. Tibi

Significant/Systemic Findings and Deficiencies

Historical Summary

The City Hall Building was originally constructed in 1960's. The building had limited renovation throughout the years. The basement is used for the maintenance and tools department.

Architectural

The building consists of metal frame construction on concrete slabs with integral footings. In general, the structure appears to be sound, with no significant areas of settlement or structural-related deficiencies observed. The exterior envelope systems and components were observed to be performing adequately. The southeast wing was completely renovated in 2020. The roof was completely replaced with a PVC roofing materials in 2020 as well. The interior finishes have been well maintained throughout the building. Finishes have been replaced as needed, and are anticipated for lifecycle replacement based on useful life and normal wear.

Mechanical, Electrical, Plumbing and Fire (MEPF)

The majority of the MEPF systems and components are 2008 and 2010. Heating and cooling are provided by rooftop packaged units. Domestic hot water is provided by local domestic water heaters. A main switchboard located in the electrical room at the basement. Buildings are protected by a fire alarm system but lacks a fire sprinkler system. Lifecycle replacement of the majority of the MEPF system is anticipated.

Site

The parking lots and sidewalks have been periodically repaved and sectionally replaced as-needed over the years. Isolated areas of alligator asphalt and cracking concrete sidewalks were observed. The site contains moderate landscaping, which is served by in-ground irrigation systems.

Recommended Additional Studies

No additional studies recommended at this time.

Some areas of the facility were identified as having major or moderate accessibility issues. Bureau Veritas recommends a study be performed to take measurements, provide additional itemized details, research local requirements, and, if necessary, estimate the scope and cost of any required improvements. The cost of this study is included in the cost tables. Due to the lack of measurements and itemized findings at this point in time, the costs for any possible subsequent repairs or improvements are not currently included.

Facility Condition Index (FCI)

One of the major goals of the FCA is to calculate each building's Facility Condition Index (FCI), which provides a theoretical objective indication of a building's overall condition. By definition, the FCI is defined as the ratio of the cost of current needs divided by current replacement value (CRV) of the facility. The chart below presents the industry standard ranges and cut-off points.

FCI Ranges and Description	
0 – 5%	In new or well-maintained condition, with little or no visual evidence of wear or deficiencies.
5 – 10%	Subjected to wear but is still in a serviceable and functioning condition.
10 – 30%	Subjected to hard or long-term wear. Nearing the end of its useful or serviceable life.
30% and above	Has reached the end of its useful or serviceable life. Renewal is now necessary.

The deficiencies and lifecycle needs identified in this assessment provide the basis for a portfolio-wide capital improvement funding strategy. In addition to the current FCI, extended FCI's have been developed to provide owners the intelligence needed to plan and budget for the "keep-up costs" for their facilities. As such the 3-year, 5-year, and 10-year FCI's are calculated by dividing the anticipated needs of those respective time periods by current replacement value. As a final point, the FCI's ultimately provide more value when used to relatively compare facilities across a portfolio instead of being over-analyzed and scrutinized as stand-alone values. The table below summarizes the individual findings for this FCA:

FCI Analysis

FCI Analysis | City Hall

Replacement Value *$ 15,093,800*	*Total SF* *40,250*	*Cost/SF* *$ 375*
Current FCI	$ 75,600	0.5 %
3-Year	$ 190,000	1.3 %
5-Year	$ 676,500	4.5 %
10-Year	$ 2,585,600	17.1 %

The orange line in the graph below forecasts what would happen to the FCI (left Y axis) over time, assuming zero capital expenditures. The capital expenditures allocated for each year (blue bars) are associated with the dollar amounts along the right Y axis.

Needs by Year with Unaddressed FCI Over Time

FCI Analysis: City Hall

Replacement Value: $ 15,093,750; Inflation rate: 3.0%

City Hall Throughout building

Uniformat Code: C3032
Recommendation: **Replace in 2021**

Priority Score: **56.0**

Plan Type: Modernization/Adaptation

Cost Estimate: $2,300

**$**$$$

Replace stained tiles due to previous leaks. - AssetCALC ID: 1829637

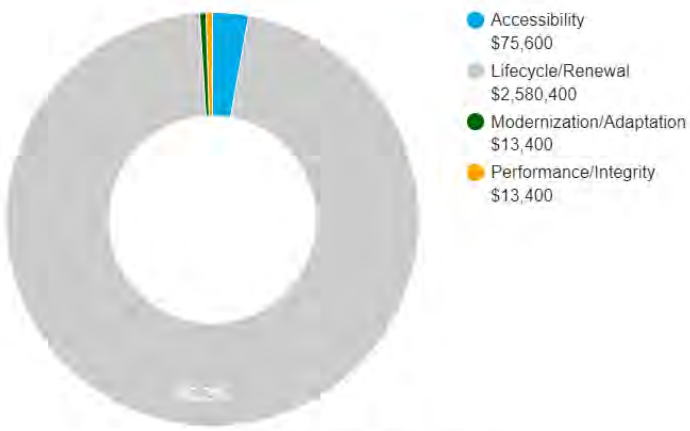
Plan Types

Each line item in the cost database is assigned a Plan Type, which is the primary reason or rationale for the recommended replacement, repair, or other corrective action. This is the “why” part of the equation. A cost or line item may commonly have more than one applicable Plan Type; however, only one Plan Type will be assigned based on the “best” fit, typically the one with the greatest significance.

Plan Type Descriptions		
Safety	■	An observed or reported unsafe condition that if left unaddressed could result in injury; a system or component that presents potential liability risk.
Performance/Integrity	■	Component or system has failed, is almost failing, performs unreliably, does not perform as intended, and/or poses risk to overall system stability.
Accessibility	■	Does not meet ADA, UFAS, and/or other handicap accessibility requirements.
Environmental	■	Improvements to air or water quality, including removal of hazardous materials from the building or site.
Retrofit/Adaptation	■	Components, systems, or spaces recommended for upgrades in in order to meet current standards, facility usage, or client/occupant needs.
Lifecycle/Renewal	■	Any component or system that is not currently deficient or problematic but for which future replacement or repair is anticipated and budgeted.

Plan Type Descriptions

Plan Type Distribution (by Cost)



10-YEAR TOTAL: $2,682,800

2. Building and Site Information

Systems Summary

System	Description	Condition
Structure	Masonry bearing walls and wood-framed roofs	Good
Façade	Stucco with aluminum windows	Fair
Roof	Primary: Flat construction with single-ply TPO/PVC membrane	Good
Interiors	Walls: Painted gypsum board, wood paneling, ceramic tiles and Unfinished Floors: Carpet, VCT, ceramic tile, vinyl sheeting, terrazzo and Unfinished Ceilings: Painted gypsum board, ACT and Unfinished/exposed	Fair
Elevators	None	--
Plumbing	Copper supply and cast iron waste & venting Gas water Toilets, urinals, and sinks in all restrooms	Fair
HVAC	Individual package units and condensing unit Supplemental components: CRAC Air cooled units	Fair

Systems Summary		
Fire Suppression	Fire extinguishers, hose cabinets	Fair
Electrical	Source & Distribution: Main switchboard and panels with copper wiring Interior Lighting: T-8, T-12 and incandescent Emergency: Diesel generator	Fair
Fire Alarm	Alarm panel, smoke detectors, alarms, back-up emergency lights, and exit signs	Fair
Equipment/Special	None	--
Site Pavement	Asphalt lots with areas of concrete and concrete sidewalks, bricks, curbs, ramps, and stairs	Fair
Site Development	Property entrance signage, chain-link fencing, CMU dumpster enclosure Site lights Limited picnic tables, trash receptacles Water Fountain	Fair
Landscaping and Topography	Limited landscaping features Irrigation present Front retaining walls Low to moderate site slopes throughout	Fair
Utilities	Municipal water and sewer Local utility-provided electric and natural gas	Fair
Site Lighting	Pole-mounted: LED Building-mounted: LED Pedestrian walkway lighting	Fair
Ancillary Structures	Lunch shelter	--
Accessibility	Presently it does not appear an accessibility study is needed for this property.	
Key Issues and Findings	Building lacks fire suppression, isolated areas of alligator cracking, isolated areas of sidewalk cracking, replace stained ceiling tiles (ACT), repair roof hatch hinges at west wing

TOTALS	**$75,600**	**$114,400**	**$486,500**	**$2,006,400**	**$7,994,300**	**$10,677,000**

3. Property Space Use and Observed Areas

Unit Allocation

All 40,250 square feet of the property are occupied by the City of Montebello. The spaces are mostly a combination of offices, conference rooms and chamber with supporting restrooms, administrative offices, and mechanical and other utility spaces.

Areas Observed

The interior spaces were observed in order to gain a clear understanding of the property's overall condition. Other areas accessed included the site within the property boundaries, the exterior of the property, and the roof.

Key Spaces Not Observed

All key areas of the property were accessible and observed.

4. ADA Accessibility

Generally, Title II of the Americans with Disabilities Act (ADA) prohibits discrimination by entities to access and use of "areas of public accommodations" and "public facilities" on the basis of disability. Regardless of their age, these areas and facilities must be maintained and operated to comply with the Americans with Disabilities Act Accessibility Guidelines (ADAAG).

A public entity (i.e. city governments) shall operate each service, program, or activity so that the service, program, or activity, when viewed in its entirety, is readily accessible to and usable by individuals with disabilities.

However, this does not:

1. Necessarily require a public entity to make each of its existing facilities accessible to and usable by individuals with disabilities;
2. Require a public entity to take any action that would threaten or destroy the historic significance of an historic property; or
3. Require a public entity to take any action that it can demonstrate would result in a fundamental alteration in the nature of a service, program, or activity or in undue financial and administrative burdens. In those circumstances where personnel of the public entity believe that the proposed action would fundamentally alter the service, program, or activity or would result in undue financial and administrative burdens, a public entity has the burden of proving that compliance with 35.150(a) of this part would result in such alteration or burdens. The decision that compliance would result in such alteration or burdens must be made by the head of a public entity or his or her designee after considering all resources available for use in the funding and operation of the service, program, or activity, and must be accompanied by a written statement of the reasons for reaching that conclusion. If an action would result in such an alteration or such burdens, a public entity shall take any other action that would not result in such an alteration or such burdens but would nevertheless ensure that individuals with disabilities receive the benefits or services provided by the public entity.

During the FCA, Bureau Veritas performed a limited high-level accessibility review of the facility non-specific to any local regulations or codes. The scope of the visual observation was limited to those areas and categories set forth in the tables throughout this report. It is understood by the Client that the limited observations described herein do not comprise a full ADA Compliance Survey, and that such a survey is beyond the scope of Bureau Veritas's undertaking. Only a representative sample of areas was observed and actual measurements were not taken to verify compliance.

The facility was originally constructed in 1960's. The facility was subsequently renovated over the last few years. The southeast wing had a complete renovation in 2020. Complaints about accessibility issues have not been received by the property management. The property does not have associated prior or pending litigation related to existing barriers or previously removed barriers.

An accessibility study has not been performed at the site. A comprehensive ADA Compliance Survey will reveal specific aspects of the property that are not in compliance. Since some areas or categories above were identified as having major or moderate associated issues, Bureau Veritas recommends such a study be performed to take measurements, provide additional itemized details, research local requirements, and, if necessary, estimate the scope and cost of any required improvements. The cost of this study is included in the cost tables. Due to the lack of measurements and itemized findings at this point in time, the costs for any possible subsequent repairs or improvements are not currently included.

Removal of barriers to accessibility should be addressed from a liability standpoint in order to comply with federal law, but the barriers may or may not be building code violations. The Americans with Disabilities Act Accessibility Guidelines are part of the ADA federal civil rights law pertaining to the disabled and are not a construction code. State and local jurisdictions have adopted the ADA Guidelines or have adopted other standards for accessibility as part of their construction codes.

Interior ramp

Accessible restroom accommodations

Interior path of travel

Accessible parking

Accessible parking with ramp

The table below is intended to be used as a general reference guide to help differentiate the orders of magnitude between some of the more commonly observed accessibility issues. The table is not intended to be all-inclusive, and boxes checked in the tables above do not necessarily mean those specific problems or shortcomings cited as examples below exist at the subject buildings and sites. Reference the photos above and/or *Key Findings* section for visuals and/or more specifics about the subject site conditions.

Reference Guide

	Major Issues *(ADA study recommended)*	Moderate Issues *(ADA study recommended)*	Minor/No Issues
Parking	- Needs full reconstruction - Excessive slopes over 3% require major re-grading - No level locations to add required spaces	- No or non-compliant curb cuts - Moderate difficulty to add required accessible spaces - Slopes close to compliant	- Painting of markings needed - Signage height non-compliant - Signage missing
Exterior Path of Travel	- Large areas of sidewalks with excessive slopes - No ramp when needed - Ramps with excessive slopes	- Ramps need rails - Ramps need rail extensions - Need significant # of lever handles - All or most entrance door exterior maneuvering clearance areas with excessive slopes	- One entrance door exterior maneuvering clearance area with excessive slope - A few door knobs instead of lever handles - Non-compliant signage
Interior Path of Travel	- All or most interior doors appear less than 32” wide - Corridors less than 36” wide - No ramp when needed - Ramps with excessive slopes - Non-compliant treads/risers at means of egress stairways	- Single height drinking fountains - Drinking fountain too high or protrudes into accessible route - Ramps need rails - Ramps need rail extensions - Need significant # of lever handles - Non-compliant rail extensions at egress stairways - All/most door thresholds high	- One door threshold too high - A few door knobs instead of lever handles - Non-compliant door pressures - Non-compliant signage - Switches not within reach range
Public Use Restrooms	- No ADA RR on each accessible floor - Restroom(s) too small - Entire restroom(s) requires renovation - Water closet clearance requires moving walls	- Interior doors appear less than 32” wide - Missing or non-compliant grab bars - Easily fixable clearance issues	- Minor height adjustments required - Non-compliant door pressures - Missing a visual strobe (only required if audible fire alarm already present) - Missing lavatory pipe wraps - Signage not compliant
Elevators	- No elevator present when required - Elevator cab too small	- Panel control buttons not at compliant height - No hands-free emergency communication system - Elevator only has mechanical stops	- Audible/visual signals at every floor may be lacking - Minor signage / Braille issues
Kitchens/Kitchenettes	- Clear space for each appliance not present - Clearance between opposing counters too narrow	- Sink and counter too high - Sink knee and toe clearance not provided where required (built-in) - Less than 50% of cabinetry within reach range	- Dispensers not within reach range - Switches not within reach range - Missing sink pipe wraps if knee and toe clearance required

5. Purpose and Scope

Purpose

Bureau Veritas was retained by the client to render an opinion as to the Property's current general physical condition on the day of the site visit.

Based on the observations, interviews and document review outlined below, this report identifies significant deferred maintenance issues, existing deficiencies, and material code violations of record, which affect the Property's use. Opinions are rendered as to its structural integrity, building system condition and the Property's overall condition. The report also notes building systems or components that have realized or exceeded their typical expected useful lives.

The physical condition of building systems and related components are typically defined as being in one of five condition ratings. For the purposes of this report, the following definitions are used:

Condition Ratings	
Excellent	New or very close to new; component or system typically has been installed within the past year, sound and performing its function. Eventual repair or replacement will be required when the component or system either reaches the end of its useful life or fails in service.
Good	Satisfactory as-is. Component or system is sound and performing its function, typically within the first third of its lifecycle. However, it may show minor signs of normal wear and tear. Repair or replacement will be required when the component or system either reaches the end of its useful life or fails in service.
Fair	Showing signs of wear and use but still satisfactory as-is, typically near the median of its estimated useful life. Component or system is performing adequately at this time but may exhibit some signs of wear, deferred maintenance, or evidence of previous repairs. Repair or replacement will be required due to the component or system's condition and/or its estimated remaining useful life.
Poor	Component or system is significantly aged, flawed, functioning intermittently or unreliably; displays obvious signs of deferred maintenance; shows evidence of previous repair or workmanship not in compliance with commonly accepted standards; has become obsolete; or exhibits an inherent deficiency. The present condition could contribute to or cause the deterioration of contiguous elements or systems. Either full component replacement is needed or repairs are required to restore to good condition, prevent premature failure, and/or prolong useful life.
Failed	Component or system has ceased functioning or performing as intended. Replacement, repair, or other significant corrective action is recommended or required.
Not Applicable	Assigning a condition does not apply or make logical sense, most commonly due to the item in question not being present.

Scope

The standard scope of the Facility Condition Assessment includes the following:

- Visit the Property to evaluate the general condition of the building and site improvements, review available construction documents in order to familiarize ourselves with, and be able to comment on, the in-place construction systems, life safety, mechanical, electrical, and plumbing systems, and the general built environment.
- Identify those components that are exhibiting deferred maintenance issues and provide cost estimates for Immediate Costs and Replacement Reserves based on observed conditions, maintenance history and industry standard useful life estimates. This will include the review of documented capital improvements completed within the last five-year period and work currently contracted for, if applicable.
- Provide a full description of the Property with descriptions of in-place systems and commentary on observed conditions.
- Provide a high-level categorical general statement regarding the subject Property's compliance to Title III of the Americans with Disabilities Act. This will not constitute a full ADA survey, but will help identify exposure to issues and the need for further review.
- Obtain background and historical information about the facility from a building engineer, property manager, maintenance staff, or other knowledgeable source. The preferred methodology is to have the client representative or building occupant complete a Pre-Survey Questionnaire (PSQ) in advance of the site visit. Common alternatives include a verbal interview just prior to or during the walk-through portion of the assessment.
- Review maintenance records and procedures with the in-place maintenance personnel.
- Observe a representative sample of the interior spaces/units, including vacant spaces/units, to gain a clear understanding of the property's overall condition. Other areas to be observed include the exterior of the property, the roofs, interior common areas, and the significant mechanical, electrical and elevator equipment rooms.
- Provide recommendations for additional studies, if required, with related budgetary information.
- Provide an Executive Summary at the beginning of this report, which highlights key findings and includes a Facility Condition Index as a basis for comparing the relative conditions of the buildings within the portfolio.

6. Opinions of Probable Costs

Cost estimates are attached throughout this report, with the Replacement Reserves in the appendix.

These estimates are based on Invoice or Bid Document/s provided either by the Owner/facility and construction costs developed by construction resources such as *R.S. Means, CBRE Whitestone,* and *Marshall & Swift,* Bureau Veritas's experience with past costs for similar properties, city cost indexes, and assumptions regarding future economic conditions.

Opinions of probable costs should only be construed as preliminary, order of magnitude budgets. Actual costs most probably will vary from the consultant's opinions of probable costs depending on such matters as type and design of suggested remedy, quality of materials and installation, manufacturer and type of equipment or system selected, field conditions, whether a physical deficiency is repaired or replaced in whole, phasing or bundling of the work (if applicable), quality of contractor, quality of project management exercised, market conditions, use of subcontractors, and whether competitive pricing is solicited, etc. Certain opinions of probable costs cannot be developed within the scope of this guide without further study. Opinions of probable cost for further study should be included in the FCA.

Methodology

Based upon site observations, research, and judgment, along with referencing Expected Useful Life (EUL) tables from various industry sources, Bureau Veritas opines as to when a system or component will most probably necessitate replacement. Accurate historical replacement records, if provided, are typically the best source of information. Exposure to the elements, initial quality and installation, extent of use, the quality and amount of preventive maintenance exercised, etc., are all factors that impact the effective age of a system or component. As a result, a system or component may have an effective age that is greater or less than its actual chronological age. The Remaining Useful Life (RUL) of a component or system equals the EUL less its *effective age*, whether explicitly or implicitly stated. Projections of Remaining Useful Life (RUL) are based primarily on age and condition with the presumption of continued use and maintenance of the Property similar to the observed and reported past use and maintenance practices, in conjunction with the professional judgment of Bureau Veritas's assessors. Significant changes in occupants and/or usage may affect the service life of some systems or components.

Where quantities could not be or were not derived from an actual construction document take-off or facility walk-through, and/or where systemic costs are more applicable or provide more intrinsic value, budgetary square foot and gross square foot costs are used. Estimated costs are based on professional judgment and the probable or actual extent of the observed defect, inclusive of the cost to design, procure, construct and manage the corrections.

Definitions

Immediate Needs

Immediate Needs are line items that require immediate action as a result of: (1) material existing or potential unsafe conditions, (2) failed or imminent failure of mission critical building systems or components, or (3) conditions that, if not addressed, have the potential to result in, or contribute to, critical element or system failure within one year or will most probably result in a significant escalation of its remedial cost.

For database and reporting purposes the line items with RUL=0, and commonly associated with *Safety* or *Performance/Integrity* Plan Types, are considered Immediate Needs.

Replacement Reserves

Cost line items traditionally called Replacement Reserves (equivalently referred to as Lifecycle/Renewals) are for recurring probable renewals or expenditures, which are not classified as operation or maintenance expenses. The replacement reserves should be budgeted for in advance on an annual basis. Replacement Reserves are reasonably predictable both in terms of frequency and cost. However, Replacement Reserves may also include components or systems that have an indeterminable life but, nonetheless, have a potential for failure within an estimated time period.

Replacement Reserves generally exclude systems or components that are estimated to expire after the reserve term and are not considered material to the structural and mechanical integrity of the subject property. Furthermore, systems and components that are not deemed to have a material effect on the use of the Property are also excluded. Costs that are caused by acts of God, accidents, or other occurrences that are typically covered by insurance, rather than reserved for, are also excluded.

Replacement costs are solicited from ownership/property management, Bureau Veritas's discussions with service companies, manufacturers' representatives, and previous experience in preparing such schedules for other similar facilities. Costs for work performed by the ownership's or property management's maintenance staff are also considered.

Bureau Veritas's reserve methodology involves identification and quantification of those systems or components requiring capital reserve funds within the assessment period. The assessment period is defined as the effective age plus the reserve term. Additional information concerning system's or component's respective replacement costs (in today's dollars), typical expected useful lives, and remaining useful lives were estimated so that a funding schedule could be prepared. The Replacement Reserves Schedule presupposes that all required remedial work has been performed or that monies for remediation have been budgeted for items defined as Immediate Needs.

For the purposes of 'bucketizing' the System Expenditure Forecasts in this report, the Replacement Reserves have been subdivided and grouped as follows: Short Term (years 1-3), Near Term (years 4-5), Medium Term (years 6-10), and Long Term (years 11-20).

Key Findings

In an effort to highlight the most significant cost items and not be overwhelmed by the Replacement Reserves report in its totality, a subsection of Key Findings is included within the Executive Summary section of this report. Key Findings typically include repairs or replacements of deficient items within the first five-year window, as well as the most significant high-dollar line items that fall anywhere within the ten-year term. Note that while there is some subjectivity associated with identifying the Key Findings, the Immediate Needs are always included as a subset.

Exceedingly Aged

A fairly common scenario encountered during the assessment process, and a frequent source of debate, occurs when classifying and describing "very old" systems or components that are still functioning adequately and do not appear nor were reported to be in any way deficient. To help provide some additional intelligence on these items, such components will be tagged in the database as Exceedingly Aged. This designation will be reserved for mechanical or electrical systems or components that have aged well beyond their industry standard lifecycles, typically at least 15 years beyond and/or twice their Estimated Useful Life (EUL). In tandem with this designation, these items will be assigned a Remaining Useful Life (RUL) not less than two years but not greater than 1/3 of their standard EUL. As such the recommended replacement time for these components will reside outside the typical Short Term window but will not be pushed 'irresponsibly' (too far) into the future.

7. Certification

City of Montebello (the Client) retained Bureau Veritas to perform this Facility Condition Assessment in connection with its continued operation of City Hall, 1600 West Beverly Boulevard, Montebello, California 90640, the "Property". It is our understanding that the primary interest of the Client is to locate and evaluate materials and building system defects that might significantly affect the value of the property and to determine if the present Property has conditions that will have a significant impact on its continued operations.

The conclusions and recommendations presented in this report are based on the brief review of the plans and records made available to our Project Manager during the site visit, interviews of available property management personnel and maintenance contractors familiar with the Property, appropriate inquiry of municipal authorities, our Project Manager's walk-through observations during the site visit, and our experience with similar properties.

No testing, exploratory probing, dismantling or operating of equipment or in-depth studies were performed unless specifically required under the *Purpose and Scope* section of this report. This assessment did not include engineering calculations to determine the adequacy of the Property's original design or existing systems. Although walk-through observations were performed, not all areas may have been observed (see Section 1 for specific details). There may be defects in the Property, which were in areas not observed or readily accessible, may not have been visible, or were not disclosed by management personnel when questioned. The report describes property conditions at the time that the observations and research were conducted.

This report has been prepared on behalf of and exclusively for the use of the Client for the purpose stated within the *Purpose and Scope* section of this report. The report, or any excerpt thereof, shall not be used by any party other than the Client or for any other purpose than that specifically stated in our agreement or within the *Purpose and Scope* section of this report without the express written consent of Bureau Veritas.

Any reuse or distribution of this report without such consent shall be at the Client and the recipient's sole risk, without liability to Bureau Veritas.

Property Overview and Assessment Details

General Information	
Property Type	Police department
Main Address	1600 West Beverly Boulevard, Montebello, California 90640
Site Developed	1960s Addition and Renovated 1990's
Site Area	1.96 acres (estimated)
Parking Spaces	94 total spaces all in open lots; 0 of which are accessible Shares accessible spaces with City Hall parking
Building Area	63,400 SF (estimated)
Number of Stories	Two and basement
Outside Occupants / Leased Spaces	None
Date(s) of Visit	May 6, 2020
Management Point of Contact	City of Montebello/Park, Recreation and Community Services, David Sosnowski, Director 323.887.4588 phone dsosnowski@cityofmentebello.com email
On-site Point of Contact (POC)	Same as above
Assessment and Report Prepared By	Nezar M. Tibi

Significant/Systemic Findings and Deficiencies

Historical Summary

The Police Department Building was originally constructed in the 1960's. Additional space was added in 1990's. The basement is used as a jail with holding cells.

Architectural

The building is constructed of metal frame on concrete slabs with integral footings. In general, the structure appears to be sound, with no significant areas of settlement or structural-related deficiencies observed. The exterior envelope system and components were observed to be performing adequately. The additional space added in the 1990's almost quadrupled the original building area. The interior finishes have been well maintained throughout the building. Finishes have been replaced as needed, and are anticipated for lifecycle replacement based on useful life and normal wear.

Mechanical, Electrical, Plumbing and Fire (MEPF)

The majority of the MEPF systems and components are from 1993. Heating and cooling are provided by four air handlers and two rooftop packaged units. Domestic hot water is provided by two local domestic boilers. A main switchboard is located at the building exterior. The building is protected by a fire alarm system and a fire sprinkler system. Lifecycle replacement of the majority of the MEPF systems is anticipated.

Site

The asphalt parking lots must be sealed and striped. Part of the City Hall parking lot is shared with the Police Department. The sidewalks have been periodically replaced as-needed over the years. The site contains moderate landscaping, which is served by in-ground irrigation systems.

Recommended Additional Studies

No additional studies recommended at this time.

Facility Condition Index (FCI)

One of the major goals of the FCA is to calculate each building's Facility Condition Index (FCI), which provides a theoretical objective indication of a building's overall condition. By definition, the FCI is defined as the ratio of the cost of current needs divided by current replacement value (CRV) of the facility. The chart below presents the industry standard ranges and cut-off points.

FCI Ranges and Description	
0 – 5%	In new or well-maintained condition, with little or no visual evidence of wear or deficiencies.
5 – 10%	Subjected to wear but is still in a serviceable and functioning condition.
10 – 30%	Subjected to hard or long-term wear. Nearing the end of its useful or serviceable life.
30% and above	Has reached the end of its useful or serviceable life. Renewal is now necessary.

The deficiencies and lifecycle needs identified in this assessment provide the basis for a portfolio-wide capital improvement funding strategy. In addition to the current FCI, extended FCI's have been developed to provide owners the intelligence needed to plan and budget for the "keep-up costs" for their facilities. As such the 3-year, 5-year, and 10-year FCI's are calculated by dividing the anticipated needs of those respective time periods by current replacement value. As a final point, the FCI's ultimately provide more value when used to relatively compare facilities across a portfolio instead of being over-analyzed and scrutinized as stand-alone values. The table below summarizes the individual findings for this FCA:

FCI Analysis

FCI Analysis | Police Department		
Replacement Value *$ 23,775,000*	*Total SF* *63,400*	*Cost/SF* *$ 375*
Current FCI	$ 4,900	0.0 %
3-Year	$ 96,800	0.4 %
5-Year	$ 759,200	3.2 %
10-Year	$ 3,738,300	15.7 %

The orange line in the graph below forecasts what would happen to the FCI (left Y axis) over time, assuming zero capital expenditures. The capital expenditures allocated for each year (blue bars) are associated with the dollar amounts along the right Y axis.

Needs by Year with Unaddressed FCI Over Time

FCI Analysis: Police Department

Replacement Value: $ 23,775,000; Inflation rate: 3.0%

Plan Type: Modernization/Adaptation

Cost Estimate: $77,200

**$$$**$

- AssetCALC ID: 1831411

Toilet in Fair condition.

GPF
Police Department Restroom- lobby

Uniformat Code: D2011
Recommendation: **Replace in 2035**

Priority Score: **57.9**

Plan Type: Modernization/Adaptation

Cost Estimate: $7,000

**$**$$$

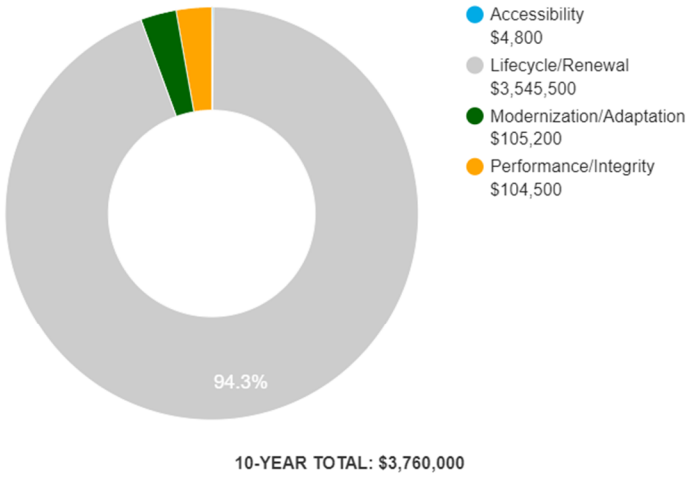
- AssetCALC ID: 1831380

Plan Types

Each line item in the cost database is assigned a Plan Type, which is the primary reason or rationale for the recommended replacement, repair, or other corrective action. This is the "why" part of the equation. A cost or line item may commonly have more than one applicable Plan Type; however, only one Plan Type will be assigned based on the "best" fit, typically the one with the greatest significance.

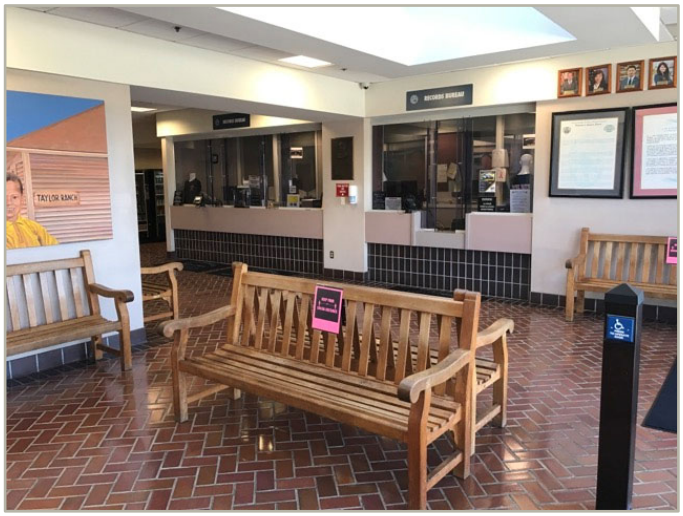
Plan Type Descriptions		
Safety		An observed or reported unsafe condition that if left unaddressed could result in injury; a system or component that presents potential liability risk.
Performance/Integrity		Component or system has failed, is almost failing, performs unreliably, does not perform as intended, and/or poses risk to overall system stability.
Accessibility		Does not meet ADA, UFAS, and/or other handicap accessibility requirements.
Environmental		Improvements to air or water quality, including removal of hazardous materials from the building or site.
Retrofit/Adaptation		Components, systems, or spaces recommended for upgrades in in order to meet current standards, facility usage, or client/occupant needs.
Lifecycle/Renewal		Any component or system that is not currently deficient or problematic but for which future replacement or repair is anticipated and budgeted.

Plan Type Distribution (by Cost)



10-YEAR TOTAL: $3,760,000

2. Building and Site Information



Systems Summary

System	Description	Condition
Structure	Masonry bearing walls and wood-framed roofs	Good
Façade	Brick with aluminum windows	Fair
Roof	Primary: Flat construction with modified bituminous finish Secondary: Bricks	Fair
Interiors	Walls: Painted gypsum board, ceramic tiles and Unfinished Floors: Carpet, VCT, ceramic tile, quarry tiles, rubber tiles, elastomeric coating and Unfinished Ceilings: Painted gypsum board, ACT and Unfinished/exposed	Fair
Elevators	Hydraulic: two cars serving all three floors	Fair
Plumbing	Copper supply and cast iron waste & venting Gas domestic boilers with storage tank Toilets, urinals, showers and sinks in all restrooms	Fair
HVAC	Central system with boilers, air handlers, and dry cooler condenser Individual roof top package units and exhaust fans. Supplemental components: None	Fair

Systems Summary

Fire Suppression	Wet-pipe sprinkler system; hydrants, fire extinguishers, hose cabinets	Fair
Electrical	Source & Distribution: Main switchboard and panels with copper wiring Interior Lighting: T-8, T-12 and incandescent Emergency: Diesel generator and UPS	Fair
Fire Alarm	Alarm panel, smoke detectors, alarms, back-up emergency lights, and exit signs	Fair
Equipment/Special	Residential and Commercial kitchen equipment	Fair
Site Pavement	Asphalt lots with areas of concrete and concrete sidewalks, curbs, ramps, and stairs	Fair
Site Development	Building-mounted signage wrought iron fence, flagpole and metal trash dumpster gate. Site lights	Fair
Landscaping and Topography	Limited landscaping features Irrigation present Low to moderate site slopes throughout	Fair
Utilities	Municipal water and sewer Local utility-provided electric and natural gas	Fair
Site Lighting	Pole-mounted: LED Building-mounted: LED Pedestrian walkway lighting	Fair
Ancillary Structures	None	--
Accessibility	Presently it does not appear an accessibility study is needed for this property.	
Key Issues and Findings	Asphalt parking lots need new seal and stripe, replace corroded transformers, replace old roof top package units. replace old exhaust fan

3. Property Space Use and Observed Areas

Unit Allocation

All 63,400 square feet of the property are occupied by the City of Montebello. The spaces are mostly a combination of offices, conference rooms and shooting range with supporting restrooms, administrative offices, and mechanical and other utility spaces.

Areas Observed

The interior spaces were observed in order to gain a clear understanding of the property's overall condition. Other areas accessed included the site within the property boundaries, the exterior of the property, and the roof.

Key Spaces Not Observed

All key areas of the property were accessible and observed.

4. ADA Accessibility

Generally, Title II of the Americans with Disabilities Act (ADA) prohibits discrimination by entities to access and use of "areas of public accommodations" and "public facilities" on the basis of disability. Regardless of their age, these areas and facilities must be maintained and operated to comply with the Americans with Disabilities Act Accessibility Guidelines (ADAAG).

A public entity (i.e. city governments) shall operate each service, program, or activity so that the service, program, or activity, when viewed in its entirety, is readily accessible to and usable by individuals with disabilities.

However, this does not:

1. Necessarily require a public entity to make each of its existing facilities accessible to and usable by individuals with disabilities.
2. Require a public entity to take any action that would threaten or destroy the historic significance of an historic property; or
3. Require a public entity to take any action that it can demonstrate would result in a fundamental alteration in the nature of a service, program, or activity or in undue financial and administrative burdens. In those circumstances where personnel of the public entity believe that the proposed action would fundamentally alter the service, program, or activity or would result in undue financial and administrative burdens, a public entity has the burden of proving that compliance with 35.150(a) of this part would result in such alteration or burdens. The decision that compliance would result in such alteration or burdens must be made by the head of a public entity or his or her designee after considering all resources available for use in the funding and operation of the service, program, or activity, and must be accompanied by a written statement of the reasons for reaching that conclusion. If an action would result in such an alteration or such burdens, a public entity shall take any other action that would not result in such an alteration or such burdens but would nevertheless ensure that individuals with disabilities receive the benefits or services provided by the public entity.

During the FCA, Bureau Veritas performed a limited high-level accessibility review of the facility non-specific to any local regulations or codes. The scope of the visual observation was limited to those areas and categories set forth in the tables throughout this report. It is understood by the Client that the limited observations described herein do not comprise a full ADA Compliance Survey, and that such a survey is beyond the scope of Bureau Veritas's undertaking. Only a representative sample of areas was observed, and actual measurements were not taken to verify compliance.

The facility was originally constructed in 1960's. Additional spaces were added in 1990s. Complaints about accessibility issues have not been received by the property management. The property does not have associated prior or pending litigation related to existing barriers or previously removed barriers.

An accessibility study has not been performed at the site. Although no significant issues were identified, a comprehensive ADA Compliance Survey may reveal specific aspects of the property that are not in full compliance.

Removal of barriers to accessibility should be addressed from a liability standpoint in order to comply with federal law, but the barriers may or may not be building code violations. The Americans with Disabilities Act Accessibility Guidelines are part of the ADA federal civil rights law pertaining to the disabled and are not a construction code. State and local jurisdictions have adopted the ADA Guidelines or have adopted other standards for accessibility as part of their construction codes.

The table below is intended to be used as a general reference guide to help differentiate the orders of magnitude between some of the more commonly observed accessibility issues. The table is not intended to be all-inclusive, and boxes checked in the tables above do not necessarily mean those specific problems or shortcomings cited as examples below exist at the subject buildings and sites. Reference the photos above and/or *Key Findings* section for visuals and/or more specifics about the subject site conditions.

Reference Guide

	Major Issues *(ADA study recommended)*	Moderate Issues *(ADA study recommended)*	Minor/No Issues
Parking	- Needs full reconstruction - Excessive slopes over 3% require major re-grading - No level locations to add required spaces	- No or non-compliant curb cuts - Moderate difficulty to add required accessible spaces - Slopes close to compliant	- Painting of markings needed - Signage height non-compliant - Signage missing
Exterior Path of Travel	- Large areas of sidewalks with excessive slopes - No ramp when needed - Ramps with excessive slopes	- Ramps need rails - Ramps need rail extensions - Need significant # of lever handles - All or most entrance door exterior maneuvering clearance areas with excessive slopes	- One entrance door exterior maneuvering clearance area with excessive slope - A few doorknobs instead of lever handles - Non-compliant signage
Interior Path of Travel	- All or most interior doors appear less than 32” wide - Corridors less than 36” wide - No ramp when needed - Ramps with excessive slopes - Non-compliant treads/risers at means of egress stairways	- Single height drinking fountains - Drinking fountain too high or protrudes into accessible route - Ramps need rails - Ramps need rail extensions - Need significant # of lever handles - Non-compliant rail extensions at egress stairways - All/most door thresholds high	- One door threshold too high - A few doorknobs instead of lever handles - Non-compliant door pressures - Non-compliant signage - Switches not within reach range
Public Use Restrooms	- No ADA RR on each accessible floor - Restroom(s) too small - Entire restroom(s) requires renovation - Water closet clearance requires moving walls	- Interior doors appear less than 32” wide - Missing or non-compliant grab bars - Easily fixable clearance issues	- Minor height adjustments required - Non-compliant door pressures - Missing a visual strobe (only required if audible fire alarm already present) - Missing lavatory pipe wraps - Signage not compliant
Elevators	- No elevator present when required - Elevator cab too small	- Panel control buttons not at compliant height - No hands-free emergency communication system - Elevator only has mechanical stops	- Audible/visual signals at every floor may be lacking - Minor signage / Braille issues
Kitchens/Kitchenettes	- Clear space for each appliance not present - Clearance between opposing counters too narrow	- Sink and counter too high - Sink knee and toe clearance not provided where required (built-in) - Less than 50% of cabinetry within reach range	- Dispensers not within reach range - Switches not within reach range - Missing sink pipe wraps if knee and toe clearance required

5. Purpose and Scope

Purpose

Bureau Veritas was retained by the client to render an opinion as to the Property's current general physical condition on the day of the site visit.

Based on the observations, interviews and document review outlined below, this report identifies significant deferred maintenance issues, existing deficiencies, and material code violations of record, which affect the Property's use. Opinions are rendered as to its structural integrity, building system condition and the Property's overall condition. The report also notes building systems or components that have realized or exceeded their typical expected useful lives.

The physical condition of building systems and related components are typically defined as being in one of five condition ratings. For the purposes of this report, the following definitions are used:

Condition Ratings	
Excellent	New or awfully close to new; component or system typically has been installed within the past year, sound and performing its function. Eventual repair or replacement will be required when the component or system either reaches the end of its useful life or fails in service.
Good	Satisfactory as-is. Component or system is sound and performing its function, typically within the first third of its lifecycle. However, it may show minor signs of normal wear and tear. Repair or replacement will be required when the component or system either reaches the end of its useful life or fails in service.
Fair	Showing signs of wear and use but still satisfactory as-is, typically near the median of its estimated useful life. Component or system is performing adequately at this time but may exhibit some signs of wear, deferred maintenance, or evidence of previous repairs. Repair or replacement will be required due to the component or system's condition and/or its estimated remaining useful life.
Poor	Component or system is significantly aged, flawed, functioning intermittently or unreliably; displays obvious signs of deferred maintenance; shows evidence of previous repair or workmanship not in compliance with commonly accepted standards; has become obsolete; or exhibits an inherent deficiency. The present condition could contribute to or cause the deterioration of contiguous elements or systems. Either full component replacement is needed, or repairs are required to restore to good condition, prevent premature failure, and/or prolong useful life.
Failed	Component or system has ceased functioning or performing as intended. Replacement, repair, or other significant corrective action is recommended or required.
Not Applicable	Assigning a condition does not apply or make logical sense, most commonly due to the item in question not being present.

Scope

The standard scope of the Facility Condition Assessment includes the following:

- Visit the Property to evaluate the general condition of the building and site improvements, review available construction documents in order to familiarize ourselves with, and be able to comment on, the in-place construction systems, life safety, mechanical, electrical, and plumbing systems, and the general built environment.
- Identify those components that are exhibiting deferred maintenance issues and provide cost estimates for Immediate Costs and Replacement Reserves based on observed conditions, maintenance history and industry standard useful life estimates. This will include the review of documented capital improvements completed within the last five-year period and work currently contracted for, if applicable.
- Provide a full description of the Property with descriptions of in-place systems and commentary on observed conditions.
- Provide a high-level categorical general statement regarding the subject Property's compliance to Title III of the Americans with Disabilities Act. This will not constitute a full ADA survey, but will help identify exposure to issues and the need for further review.
- Obtain background and historical information about the facility from a building engineer, property manager, maintenance staff, or other knowledgeable source. The preferred methodology is to have the client representative or building occupant complete a Pre-Survey Questionnaire (PSQ) in advance of the site visit. Common alternatives include a verbal interview just prior to or during the walk-through portion of the assessment.
- Review maintenance records and procedures with the in-place maintenance personnel.
- Observe a representative sample of the interior spaces/units, including vacant spaces/units, to gain a clear understanding of the property's overall condition. Other areas to be observed include the exterior of the property, the roofs, interior common areas, and the significant mechanical, electrical and elevator equipment rooms.
- Provide recommendations for additional studies, if required, with related budgetary information.
- Provide an Executive Summary at the beginning of this report, which highlights key findings and includes a Facility Condition Index as a basis for comparing the relative conditions of the buildings within the portfolio.

6. Opinions of Probable Costs

Cost estimates are attached throughout this report, with the Replacement Reserves in the appendix.

These estimates are based on Invoice or Bid Document/s provided either by the Owner/facility and construction costs developed by construction resources such as *R.S. Means, CBRE Whitestone,* and *Marshall & Swift,* Bureau Veritas's experience with past costs for similar properties, city cost indexes, and assumptions regarding future economic conditions.

Opinions of probable costs should only be construed as preliminary, order of magnitude budgets. Actual costs most probably will vary from the consultant's opinions of probable costs depending on such matters as type and design of suggested remedy, quality of materials and installation, manufacturer and type of equipment or system selected, field conditions, whether a physical deficiency is repaired or replaced in whole, phasing or bundling of the work (if applicable), quality of contractor, quality of project management exercised, market conditions, use of subcontractors, and whether competitive pricing is solicited, etc. Certain opinions of probable costs cannot be developed within the scope of this guide without further study. Opinions of probable cost for further study should be included in the FCA.

Methodology

Based upon site observations, research, and judgment, along with referencing Expected Useful Life (EUL) tables from various industry sources, Bureau Veritas opines as to when a system or component will most probably necessitate replacement. Accurate historical replacement records, if provided, are typically the best source of information. Exposure to the elements, initial quality and installation, extent of use, the quality and amount of preventive maintenance exercised, etc., are all factors that impact the effective age of a system or component. As a result, a system or component may have an effective age that is greater or less than its actual chronological age. The Remaining Useful Life (RUL) of a component or system equals the EUL less its *effective age*, whether explicitly or implicitly stated. Projections of Remaining Useful Life (RUL) are based primarily on age and condition with the presumption of continued use and maintenance of the Property similar to the observed and reported past use and maintenance practices, in conjunction with the professional judgment of Bureau Veritas's assessors. Significant changes in occupants and/or usage may affect the service life of some systems or components.

Where quantities could not be or were not derived from an actual construction document take-off or facility walk-through, and/or where systemic costs are more applicable or provide more intrinsic value, budgetary square foot and gross square foot costs are used. Estimated costs are based on professional judgment and the probable or actual extent of the observed defect, inclusive of the cost to design, procure, construct and manage the corrections.

Definitions

Immediate Needs

Immediate Needs are line items that require immediate action as a result of: (1) material existing or potential unsafe conditions, (2) failed or imminent failure of mission critical building systems or components, or (3) conditions that, if not addressed, have the potential to result in, or contribute to, critical element or system failure within one year or will most probably result in a significant escalation of its remedial cost.

For database and reporting purposes the line items with RUL=0, and commonly associated with *Safety* or *Performance/Integrity* Plan Types, are considered Immediate Needs.

Replacement Reserves

Cost line items traditionally called Replacement Reserves (equivalently referred to as Lifecycle/Renewals) are for recurring probable renewals or expenditures, which are not classified as operation or maintenance expenses. The replacement reserves should be budgeted for in advance on an annual basis. Replacement Reserves are reasonably predictable both in terms of frequency and cost. However, Replacement Reserves may also include components or systems that have an indeterminable life but, nonetheless, have a potential for failure within an estimated time period.

Replacement Reserves generally exclude systems or components that are estimated to expire after the reserve term and are not considered material to the structural and mechanical integrity of the subject property. Furthermore, systems and components that are not deemed to have a material effect on the use of the Property are also excluded. Costs that are caused by acts of God, accidents, or other occurrences that are typically covered by insurance, rather than reserved for, are also excluded.

Replacement costs are solicited from ownership/property management, Bureau Veritas's discussions with service companies, manufacturers' representatives, and previous experience in preparing such schedules for other similar facilities. Costs for work performed by the ownership's or property management's maintenance staff are also considered.

Bureau Veritas's reserve methodology involves identification and quantification of those systems or components requiring capital reserve funds within the assessment period. The assessment period is defined as the effective age plus the reserve term. Additional information concerning system's or component's respective replacement costs (in today's dollars), typical expected useful lives, and remaining useful lives were estimated so that a funding schedule could be prepared. The Replacement Reserves Schedule presupposes that all required remedial work has been performed or that monies for remediation have been budgeted for items defined as Immediate Needs.

For the purposes of 'bucketizing' the System Expenditure Forecasts in this report, the Replacement Reserves have been subdivided and grouped as follows: Short Term (years 1-3), Near Term (years 4-5), Medium Term (years 6-10), and Long Term (years 11-20).

Key Findings

In an effort to highlight the most significant cost items and not be overwhelmed by the Replacement Reserves report in its totality, a subsection of Key Findings is included within the Executive Summary section of this report. Key Findings typically include repairs or replacements of deficient items within the first five-year window, as well as the most significant high-dollar line items that fall anywhere within the ten-year term. Note that while there is some subjectivity associated with identifying the Key Findings, the Immediate Needs are always included as a subset.

Exceedingly Aged

A fairly common scenario encountered during the assessment process, and a frequent source of debate, occurs when classifying and describing "very old" systems or components that are still functioning adequately and do not appear nor were reported to be in any way deficient. To help provide some additional intelligence on these items, such components will be tagged in the database as Exceedingly Aged. This designation will be reserved for mechanical or electrical systems or components that have aged well beyond their industry standard lifecycles, typically at least 15 years beyond and/or twice their Estimated Useful Life (EUL). In tandem with this designation, these items will be assigned a Remaining Useful Life (RUL) not less than two years but not greater than 1/3 of their standard EUL. As such the recommended replacement time for these components will reside outside the typical Short Term window but will not be pushed 'irresponsibly' (too far) into the future.

7. Certification

City of Montebello (the Client) retained Bureau Veritas to perform this Facility Condition Assessment in connection with its continued operation of Police Department, 1600 West Beverly Boulevard, Montebello, California 90640, the "Property". It is our understanding that the primary interest of the Client is to locate and evaluate materials and building system defects that might significantly affect the value of the property and to determine if the present Property has conditions that will have a significant impact on its continued operations.

The conclusions and recommendations presented in this report are based on the brief review of the plans and records made available to our Project Manager during the site visit, interviews of available property management personnel and maintenance contractors familiar with the Property, appropriate inquiry of municipal authorities, our Project Manager's walk-through observations during the site visit, and our experience with similar properties.

No testing, exploratory probing, dismantling or operating of equipment or in-depth studies were performed unless specifically required under the *Purpose and Scope* section of this report. This assessment did not include engineering calculations to determine the adequacy of the Property's original design or existing systems. Although walk-through observations were performed, not all areas may have been observed (see Section 1 for specific details). There may be defects in the Property, which were in areas not observed or readily accessible, may not have been visible, or were not disclosed by management personnel when questioned. The report describes property conditions at the time that the observations and research were conducted.

This report has been prepared on behalf of and exclusively for the use of the Client for the purpose stated within the *Purpose and Scope* section of this report. The report, or any excerpt thereof, shall not be used by any party other than the Client or for any other purpose than that specifically stated in our agreement or within the *Purpose and Scope* section of this report without the express written consent of Bureau Veritas.

Any reuse or distribution of this report without such consent shall be at the Client and the recipient's sole risk, without liability to Bureau Veritas.
