Potential Contamin of Concern:

DIOXIN (AS 2,3,7,8-TCDD TEQ)
POLYCHLORINATED BIPHENYLS (PCBS)
VOLATILE ORGANICS (8260B VOCS)

Site History:

The property is located at 8226 East Whittier Boulevard in Pico Rivera, California, bounded by Whittier Boulevard on the north, Van Norman Road on the west, the Union Pacific Railroad (UPRR) 12-15-foot elevated tracks on the south.

The Site is largely flat, at an elevation of approximately 170 feet above mean sea level, in an urbanized alluvial plain in the Los Angeles Basin. The Site is surrounded to the west and south by industrial facilities and to the north by small business, residences and a church.

From 1948 to the 1980s, REEC and its predecessor(s) reclaimed copper from the cores of used electrical transformers. Used old or surplus transformers were obtained from entities, including but not limited to, utility companies, municipalities and the federal government. On occasion, oils from transformers were released into the environment as the transformers were handled, reclaimed and/or stored.
Because of operations at the former facility, surface and subsurface soils were impacted with hazardous wastes such as polychlorinated biphenyls (PCBs), petroleum hydrocarbons, volatile organic compounds (VOCs), metals, dioxins and furans. These compounds were found in different matrix media as result of waste discharge to the surface. Previously investigations performed at the former Facility associated the presence of these compounds in different matrix media to oils from transformers formerly serviced at the site, maintenance activities and fugitive dust from on-site furnaces used to remove materials from recyclables.

Transformers were handled and stored on and adjacent to the former unpaved area located in the southeastern quadrant of the former Facility. Recycling furnaces were located approximately 70 feet (ft.) from the southeastern quadrant of the former Facility.
REEC relocated its operation from the Site in 2008. On or about July 6, 2010, the REEC's property was sold to Whittier Pine LLC by TC Pan (Whittier Pine LLC) and leased to Pacific Eagle Construction Supply Inc. (Pacific Eagle). Currently, the Site is used as a storage yard and staging area.

Site Regulatory History Regarding to the Presence of PCBs at the Site:

• From April 2, 1975 to March 30, 1983, City of Pico Rivera issued three Notices of Violations and Orders to Comply to the facility.

• On April 7, 1975, Los Angeles Regional Water Quality Control Board (LARWQCB) notified RECC that discharges of water used to cool transformers during copper recovery operations into an adjacent drainage ditch was not in accordance with the California Water Code.

• On April 6, 1981, Department of County Engineer – Facilities Sanitation Division issued an investigation report that wastewater from transformer washing operation was been discharged to the ground.

• On July 8, 1981, County of Los Angeles, Office of the District Attorney, Consumer and Environment Protection Division, notified the facility that the County of Los Angeles would file a lawsuit against REEC due multiple violations of Section 17200 of the California Business and Professions Code and have indicated that soil samples collected at the facility reported concentrations of PCBs ranging from 92 to 21,000 mg/kg.

• On January 10, 1984, USEPA, Region 9, issued a Toxic Substances Control Act (TSCA) PCB Investigation Report. The report indicated potential violations according to 40 CFR 761.180, since no annual document had been prepared for 1981, 1982 and 1983 covering shipments of PCB-contaminated soil and PCB capacitors.

• On March 27, 1984, County of Los Angeles, Department of Health Services issued a letter directing the facility to comply with California Health and Safety Code (HSC) sections 25189 and 25191.

• On June 22, 1984, State of California- Health and Welfare Agency, Department of Health Services issued a Notice of Violation and Directive to Comply to the facility.

• On January 1986, State of California- Health and Welfare Agency, Department of Health Services issued a Preliminary Assessment Summary. This document indicated that was unknown whether the Site had been adequately assessed for removal of contaminated soils. Off-site subsurface contamination was assessed as potentially extensive because of the facility's historical discharges of wastewater into the unlined Arroyo Ditch.

• On June 17, 1986, Ecology and Environment performed a site inspection under USEPA contract no. 68-01-6692. Inspection recommendations included referral of the Site to the United States Environmental Protection Agency (USEPA)'s enforcement section for possible TSCA violations, and referral to the local Health Department for additional sampling activities.

• On May 5, 1993, DTSC assumed lead agency status for REEC facility based on the fact there is known groundwater contamination and LARWQCB refused to accept oversight alleging that the environmental concerns at the subject property was more related to exposures and potential risk from soil and equipment contaminations, not groundwater concerns.

• On February 2, 1996, DTSC issued an Imminent and Substantial Endangerment Determination and Order and Remedial Action Order's (I&SE-RAO), Docket No. I&SE-RAO 05/06-002 to the Respondent (REEC). The purpose of this Order was to ensure that any release or threatened release of hazardous substances to the air, soil, surface water and ground water at or from the Site would be thoroughly investigated and that a plan to take appropriate removal/remedial actions would be prepared. DTSC alleged that the Responsible Party (REEC) and several other parties were potentially responsible for the contamination of the Site.

• From August 1997 through August 1999, a formal remedial investigation (RI) was conducted at the Site. Results from the RI indicated that the lateral and vertical extent of PCBs-impacted soil in the former unpaved area in the southeast quadrant was consistent with localized releases from previous operations at the facility. Released oil containing PCBs locally infiltrated the former unpaved area and seeped vertically into the deeper sandy soil vadose zone. The RI data indicated that the vertical distribution of PCBs with concentrations above 10 mg/kg extended to 60 feet below grade surface (bgs) near monitoring well RMW-2 and boring BD-1 (later converted into monitoring well RDW-1). The presence of PCBs in the porous media at a depth below the ground water was interpreted in the RI as result of past spills at periods of deep groundwater levels, due to recurrent groundwater piezometric elevation fluctuations, consequently, promoting a large smear profile area and inducing downward vertical transport of PCBs.

• The final Remedial Investigation/Feasibility Study (RI/FS) Report was submitted to the DTSC in October 1999, and was approved by the DTSC on June 18, 2000. A Remedial Action Plan (RAP) was submitted to DTSC in August 2003. The remedial actions proposed in the RAP included excavation and removal of PCB contaminated soils beneath specific areas of the Site, installation of an engineered cap, placement of a deed restriction on the property where contamination would be left in place at levels that prevent unrestricted use, and groundwater monitoring. The chosen remedy was implemented on both facility's area of concerns (AOC)#1 (the south-central portion of the former unpaved area located in the southeast corner of the Facility) and AOC#2 (along a surface drainage path adjacent to the south of the RECC's property within the railroad right-of-way). The RAP was approved by DTSC on December 16, 2004.

• On July 19, 2005, DTSC issued an I&SE-RAO, Docket No. I&SE-RAO 95/96-002, to the Respondents: REEC, Aaron Berman, an individual, Berman Steel Company, Pacific Gas and Electric Company, Southern California Edison Company, San Diego Gas and Electric, City of Anaheim, City of Los Angeles Department of Water and Power, City of Pasadena Water and Power Department, Sacramento Municipal Utility District and United States of America, by and through the Defense Logistics Agency. The Order determined that the Respondents must continue interim groundwater monitoring in accordance with DTSC's approved RAP, furnishing a Public Participation Plan, provide a Remedial Design (RD) describing in detail the technical and operational plans for implementation of the Final RAP, implementation of Final RAP, O&M requirements in accordance with the Final RAP and Five-Year Review to review and reevaluate the remedial action after a period of 5 years from the date of completion and every 5 years thereafter.

Because the Site will remain as an industrial parcel for foreseeable future, the Non-Governmental Respondents selected soil excavation of impacted soils at the two areas of concerns, off-site disposal of the unearthed soil materials to permitted facility(s) (landfill), installation of an engineering cap on both areas of concerns (AOCs), placement of a deed restriction on the properties where contamination will be left in place to allow oversight access to conduct groundwater monitoring and restrict beneficial end use. Additionally, long term post-closure groundwater monitoring and maintenance of AOC#1 and AOC#2 engineering caps were recommended to preclude unacceptable impacts to groundwater quality.

• The RAP was implemented from September 2006 through February 2007 and involved the removal and off-site disposal of some of the contaminated soil to permitted facility(s) (landfill). Both AOC#1 and AOC#2 excavation areas were backfilled with clean fill to meet requirements set forth on October 2001 DTSC's fact sheet "Information Advisory – Clean Fill Material", and covered with engineered surface cap.

Following excavation and back filling with clean soil, areas designed as AOCs were covered with an impermeable engineering cap. Final Closure Report was submitted to DTSC in April 2007 and approved in September 2007.

According to 2007 Final Closure Report, construction of AOC#1 engineered cap included final site grading, placement of cap foundation layer, base layer, and asphalt cover and associated drainage structures. Prior to placement of low permeability asphalt material at the areas of concern, a test batch was conducted at the asphalt batch plant and tested for conformance with the design mix and performance specifications. Testing results indicated that batch material met the performance for permeability, but had a lower than desired structural stability. Further, due to narrow space availability for construction within AOC#2, an alternate approach for achieving the cap permeability requirements was implemented. As a result, a double-coat pavement seal was placed over the low permeability mix asphalt in AOC#2. It was assumed that due to AOC#2 is in a non-traffic area, the seal coat would not experience any wear from point surface loads, such as vehicles.

• On October 12, 2009, a Covenant to restrict the use of a limited portion of former REEC property was made by and between Boardwalk Company, LLC (previous Site Owner) and DTSC pursuant to Civil Code section 1471. The restricted areas were located in the areas now generally bounded by a drainage ditch on the east, the northern boundary of the transformer repair building on the north, the machine shop on the west, and the UPRR's Right of Way on the south, containing the area referred to as AOC#).

• On October 28, 2009, a Covenant to restrict the use of property was made by and between the UPRR and DTSC pursuant to Civil Code section 1471. The property is a portion of Covenantor's railroad Right of Way, which is also generally describes as Los Angeles County Assessor's Parcel No. 6348-021-807, containing the area referred to as AOC#2.

• On November 30, 2009, DTSC, Non-Governmental Respondents, Local Governmental Respondents, and Federal Governmental Respondent entered into an Operation and Maintenance Consent Agreement (Consent Agreement), Docket No. HAS-CA 08/09-130, pursuant to HSC sections 25355.59a)(1)(C), 58009, and 58010, and sections 113(f)(2) and 113(f)(3)(B) of Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). The Consent Agreement directed that the Non-Governmental Respondent shall be responsible for carrying out all activities and obligations determined in the O&M Plan that was submitted to DTSC in April 2007 and approved in September 5, 2007. Among the scheduled activities listed in the O&M Plan; ground water shall be monitored annually; groundwater wells (alternative point of compliance wells) shall be inspected semi-annually; final cover shall be inspected quarterly in the first year, semi-annually in the second and third years, and from the fourth year forward, annually; drainage system inspection shall be conducted on a quarterly basis; and the Non-Governmental Respondents shall review and reevaluate the remedial action after a period of 5 years from the date of completion and every 5 years thereafter.

• On June 15, 2010, DTSC issued a Removal Action Certification Form. DTSC determined that all appropriate removal/remedial action were completed and that all acceptable engineering practices implemented; however, the Site requires ongoing O&M and monitoring efforts according to the approved 2009 O&M Plan. O&M activities have been performed at the Site pursuant to 2005 I&SE-RAO and 2009 Consent Agreement, which includes annual groundwater monitoring, maintenance of groundwater monitoring systems, inspection and maintenance of the engineered asphalt cap, monitoring and maintenance of settlement monuments and drainage system inspection and maintenance, as well as associated reporting to DTSC. Alternative point of compliance wells have been monitored since 1999 and O&M activities, including post-closure monitoring and maintenance of AOC#1 and AOC#2, have been performed at the Site since February 2007, subsequent to completion of PCBs impacted soils removal and AOC capping activities.

Alternative point of compliance wells consist of five (5) monitoring wells. RMW-2 is located within the limits of the AOC#1 capped area. RMW-4 is located just beyond the southwestern facility boundary. RMW-5 is located to the southwest of the former Facility, south of RMW-4 and approximately 340 ft. from RMW-2. RMW-6 is located just beyond the northwestern facility boundary. RMW-7 is located approximately 320 ft. beyond the south.

Based on the information provided in the 2016 FYR Report, DTSC has concurred with the Non-Governmental Respondents' determination that: (i) the implemented remedy continues to be protective of human health; and (ii) the asphalt cover installed in the AOC#1 is currently preventing surface water infiltration that would promote/enhance percolation of chemical of concerns that may reside/be present in the unsaturated porous media beneath the asphalt cover.

Asphalt cover installed in AOC#2 was rectified to ensure that the remedy functions as intended. The following repairing actions were conducted at AOC#2: (i) placement of seal coat or binder in a gap between the REEC's southern perimeter wall and the ground surface along the AOC#2 northern limits; (ii) cleaning out gravels/vegetation that have been deposited/grown in the culvert outlets that transect the UPRR elevated rail track adjacent to the AOC#2 southern limits; and (iii) resealing the asphalt cover 2.

Groundwater elevations have decreased to levels below the alternative point of compliance (POC) monitoring wells' screens. Since 2014 this has prevented the Non-Governmental Respondents from collecting environmental groundwater samples to determine whether the remedy's objectives of protecting groundwater quality are being met.

Comments: LA County referred site to DTSC for state oversight on March 3, 1993. The county was responsible for the oversight of investigations over the last three years. The referral is based on the state's experience with GW investigations. Investigations indicate soil contamiantion as high as 2400 ppm, 17 ppb of PCB degredation products (ie. 1,4 - dichloro- benzene) in GW, and C12-C30 chains of oil as deep as twenty feet bgs in the saturated zone.

Document Type: Operation and Maintenance Report
Date Completed: 1/29/2014
Comments: During calendar year 2013, inspections were performed at the Site on March 26, June 28, September 10 and December 10. Other activities performed during the 2013 calendar year included groundwater monitoring on March 15 and 16, 2012 and surveying of settlement markers on September 10, 2013.
During the groundwater monitoring event in March 2013, only the monitoring well RMW-2 had sufficient groundwater for purging and sample collection; wells RMW-4 through RMW-7 yielded insufficient water, therefore, they were not able to be sample during this event.

Comments:

SAMPLE RESULTS SOIL SAMPLES: 11000 PPM PCB'S,21000PPM PCB'S. ON CORTESE LIST DHS Rcvd FIT SSI (REASSESSMENT)-EPA recommends NFA 9/12/90. INSPECTION(FED) EPA TSCA INSP. VIO FOR NOT REPORTING WASTES TRANSPORTED OFFSITE. CO CONFIRMS CLEAN UP ON 05-11-82. A consent order was signed between DTSC and 9 of the 10 PRPs for the site. The I&S/E Order was recinded for all those signing the consent order. The I&S/E order remains in effect for the 1 PRP not signing. Letters were sent to Rosen's and nine generators notifying them of their potential liability for the site and inform- ing them that they have 45 days to form a group and enter into an agreement with DTSC. Facility cited in 1981 for handling PCB capacitor without an EPA ID NO. Soil samples collected at SE corner of property showed 11,000 PPM PCB's. Remedial action revealed offsite contamination east of site in the unlined Arroyo ditch. 21,000 PPM PCBs found off-site north of railroad tracks. Capacitors and contaminated soil removed in 1982 under directive of LA County. Cited for additional discharge in 1983. Subsequent soil samples showed 600 PPM PCB's. Being evaluated for ranking/further cleanup SOURCE ACT: DHS INSP 1/3/86 Dismantling of transformers for reclamation of copper wire. Sale of waste oils. Yr of Oper: DHS/ASP Survey 11/16/81 1947 to present. Submit to EPA INSPECTION(LOCAL) CO PUB WRK. WASTEWATER DISCH TO UNLINED TRENCH.ORDERED TO CEASE & TO C-U. FAC WROTE LETTER 04/12/83. NOTIFYING REPAIRS & CLEANUP. INSPECTION(LOCAL)

CO PUB WRK. COMPLAINT RESPONSE. OBSERVED WASTE OIL DISCH TO GROUND. OFFSITE WASTE WATER DISCH. PARTIAL C-U 4/14/75. The RI/FS Workplan for the site was approved. Fifty additional samples and groundwater monitoring will be required for the first phase of the investigation. INSPECTION(LOCAL) CO REPRESENTATIVE STATES CONTAMINATED SOIL REMOVED TO PUENTE HILLS LDFL. WASTE WATER DISCH TO DRAINAGE CHANNEL. INSPECTION(LOCAL) CO PUB WRK. DISCH WASTEWTER INTO UNLINED STORM TRENCH. FACILITY IDENTIFIED FAC ID LACE CO ENGR. STORAGE & SCRAPING OF TRANSFORM PONDING OF LIQUIDS ON PROPERTY. Additional soil sampling both on-site and off-site completed. Two new groundwater monitoring wells placed both on-site and off-site to define groundwater contamination plume. INSPECTION(FED) EPA-FIT INSP. E&E C(86)C125. Recycle reformers contamination PCB's. Soil contamination remains, subsequent soil sample by DHS showed high PCBs still in site soil. 1984 warehouse fire may have spread contamination around site. Refer to DHS/ENF. 9/30/94 A database including pertinent information from PRPs who responded to the Department's Information Request Letter is being completed. An ISE Order is being prepared and will be issued to Rosen's and to those PRPs that the Department determines to be Responsible Parties. INSPECTION(LOCAL) REFERRAL TO DHS FROM CO HLTH. UNLAWFUL STORAGE & TRANSPORTATION OF WASTE. SOILS CONTAMINATED W/PCB'S. A Removal Action (RA) was completed at the site. The RA consisted of the installation of fencing to restrict public access to soil contaminated with polychlorinated biphenyls, metals and petroleum hydrocarbons. Warning signs in both English and Spanish were posted on the installed fencing. HRS package completed. SAMPLE RESULTS SOIL SAMPLES - 620 PPM PCB'S. The Remedial Investigation showed on-site PCB, dioxin-furan soil contamination; on-site PCB and VOC groundwater contamination; and off-site PCB soil and groundwater contamination. Detailed analysis of alternatives in the Feasibility Study included an asphalt cap, thermal blankets and wells, and excavation. ENFORCEMENT ACTION CO DISTRICT ATTORNEY THREATENS OPER W/ LAWSUIT.CASE DROPPED 1/82. LA County referred site to DTSC for state oversight on March 3, 1993. The county was responsible for the oversight of investigations over the last three years. The referral is based on the state's experience with GW investigations. Investigations indicate soil contamiantion as high as 2400 ppm, 17 ppb of PCB degredation products (ie. 1,4 - dichloro- benzene) in GW, and C12-C30 chains of oil as deep as twenty feet bgs in the saturated zone. REPORTED FOR PROP65 A database including pertinent information from PRPs who responded to the Department's Information Request Letter is being completed. An I & SE Order is being prepared and will be issued to Rosen's Electrical Equipment and to those PRPs that the Department determines to be Responsible Parties. Q RETURNED - SCRAPING OF TRANSFORMERS, ELECT EQUIP. WHOLESALE. PCB STORAGFE PERMIT #3-2147. INSPECTION(LOCAL) CO HLTH. ELEVATED PCB LEVELS IN STORM DRAIN. A meeting was held among the Department, the site owner, and parties who sent transformers to Rosen Electric. The Department announced that, up to the time of the meeting, there was insufficient information to name any of the parites except Rosen Electric as a PRP. The Department sent out information request letters to identified PRPs. Rosen Electric's attorney presents new information on the parties who sent transformers to Rosen Electric. Facility Drive-by. Secured site, unable to adequately see in- side. Evidence of a large number of stored drums. Final Strategy SITE REFERRED: TO HWMB/ENF The RAP includes excavation of 4,000 cu. yds. of PCB-contaminated soil, cap, deed restriction, ground water monitoring - Public comments were addressed.

An Initial Study, Negative Declaration, and De Minimus Finding were completed for this PCB-contaminated site. No comments on the draft Negative Declaration were received. After extensive efforts to negotiate a consent order were not successful, DTSC issued an imminent and substantial endanger- ment determination and remedial action order for the Rosen's Electrical Equipment Company Site. The consultant for the RP group is preparing a revised Risk Assessment for the Remedial Investigation and Fesibility Study (RI/FS).

Background:

LA County was responsible for the oversight of investigations that occurred in the past. The county referred the site to the Department for state oversight on March 3, 1993 based on the state's experience with groundwater investigations. Investi- gations indicate PCB soil contamination as high as 2400 ppm; 17 ppb (1,4 - dichlorobenzene) in groundwater; and C12-C30 chains of oil as deep as 20 feet bgs in the saturated zone.

In 1996 a Consent Order was issued to nine RPs to investigate the site. The RI/FS was campleted in 1997, and concluded that PB soil and groundwater contamination existed int he Southeastern corner that pose a risk to human health. A RAP approved in 2004 chose excavation of soil, groundwater monitoring, capping and placement of a deed restriction on the property.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

Formerly Utilized Sites Remedial Action Program: DOE FUSRAP

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

Government Publication Date: Mar 4, 2017

National Priority List: NPL

National Priorities List (Superfund)-NPL: EPA's (United States Environmental Protection Agency) list of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action.

Government Publication Date: Aug 25, 2021

National Priority List - Proposed: PROPOSED NPL

Includes sites proposed (by the EPA, the state, or concerned citizens) for addition to the NPL due to contamination by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment.

Government Publication Date: Aug 25, 2021

Deleted NPL: DELETED NPL

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Government Publication Date: Aug 25, 2021

SEMS List 8R Active Site Inventory: SEMS

The Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted.

Government Publication Date: Jul 29, 2021

SEMS List 8R Archive Sites: SEMS ARCHIVE

The Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

Government Publication Date: Jul 29, 2021

Inventory of Open Dumps, June 1985: ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

Comprehensive Environmental Response, Compensation and Liability Information System - CERCLIS: CERCLIS

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands: IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned: CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens: CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action: RCRA CORRACTS

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Jun 14, 2021

RCRA non-CORRACTS TSD Facilities: RCRA TSD

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

Government Publication Date: Jun 14, 2021

RCRA Generator List: RCRA LQG

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Jun 14, 2021

RCRA Small Quantity Generators List: RCRA SQG

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Jun 14, 2021

RCRA Very Small Quantity Generators List: RCRA VSQG

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Jun 14, 2021

RCRA Non-Generators: RCRA NON GEN

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Jun 14, 2021

Federal Engineering Controls-ECs: FED ENG

Engineering controls (ECs) encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Feb 23, 2021

Federal Institutional Controls- ICs: FED INST

Institutional controls are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's (United States Environmental Protection Agency) expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site.

Government Publication Date: Feb 23, 2021

Land Use Control Information System: LUCIS

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

Government Publication Date: Sep 1, 2006

Emergency Response Notification System: ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System: ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System: ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Jul 26, 2021

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database: FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Aug 20, 2021

FEMA Underground Storage Tank Listing: FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Facility Response Plan: FRP

List of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Dec 2, 2020

Historical Gas Stations: HIST GAS STATIONS

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries: REFN

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

Government Publication Date: Jul 10, 2020

Petroleum Product and Crude Oil Rail Terminals: BULK TERMINAL

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

Government Publication Date: Apr 28, 2020

LIEN on Property: SEMS LIEN

The EPA Superfund Enterprise Management System (SEMS) provides LIEN information on properties under the EPA Superfund Program.

Government Publication Date: Jul 29, 2021

Superfund Decision Documents: SUPERFUND ROD

This database contains a listing of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD), along with other associated memos and files. This information is maintained and made available by the US EPA (Environmental Protection Agency).

Government Publication Date: Jun 28, 2021

State

State Response Sites: RESPONSE

A list of identified confirmed release sites where the Department of Toxic Substances Control (DTSC) is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. This database is state equivalent NPL.

Government Publication Date: Jun 14, 2021

EnviroStor Database: ENVIROSTOR

The EnviroStor Data Management System is made available by the Department of Toxic Substances Control (DTSC). Includes Corrective Action sites, Tiered Permit sites, Historical Sites and Evaluation/Investigation sites. This database is state equivalent CERCLIS.

Government Publication Date: Jun 14, 2021

Delisted State Response Sites: DELISTED ENVS

Sites removed from the list of State Response Sites made available by the EnviroStor Data Management System, Department of Toxic Substances Control (DTSC).

Government Publication Date: Jun 14, 2021

Solid Waste Information System (SWIS): SWF/LF

The Solid Waste Information System (SWIS) database made available by the Department of Resources Recycling and Recovery (CalRecycle) contains information on solid waste facilities, operations, and disposal sites throughout the State of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites.

Government Publication Date: Jul 20, 2021

Solid Waste Disposal Sites with Waste Constituents Above Hazardous Waste Levels: SWRCB SWF

This is a list of solid waste disposal sites identified by California State Water Resources Control Board with waste constituents above hazardous waste levels outside the waste management unit.

Government Publication Date: Sep 20, 2006

EnviroStor Hazardous Waste Facilities: HWP

A list of hazardous waste facilities including permitted, post-closure and historical facilities found in the Department of Toxic Substances Control (DTSC) EnviroStor database.

Government Publication Date: Jun 14, 2021

Sites Listed in the Solid Waste Assessment Test (SWAT) Program Report: SWAT

In a 1993 Memorandum of Understanding, the State Water Resources Control Board (SWRCB) agreed to submit a comprehensive report on the Solid Waste Assessment Test (SWAT) Program to the California Integrated Waste Management Board (CIWMB). This report summarizes the work completed to date on the SWAT Program, and addresses both the impacts that leakage from solid waste disposal sites (SWDS) may have upon waters of the State and the actions taken to address such leakage.

Government Publication Date: Dec 31, 1995

Construction and Demolition Debris Recyclers: C&D DEBRIS RECY

This listing of Construction and Demolition Debris Recyclers is maintained by the California Intergrated Waste Management Board-common C&D materials include lumber, drywall, metals, masonry (brick, concrete, etc.), carpet, plastic, pipe, rocks, dirt, paper, cardboard, or green waste related to land development.

Government Publication Date: Jun 20, 2018

Recycling Centers: RECYCLING

This list of Certified Recycling Centers that are operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Nov 2, 2020

Listing of Certified Processors: PROCESSORS

This list of Certified Processors that are operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Oct 27, 2020

Listing of Certified Dropoff, Collection, and Community Service Programs: CONTAINER RECY

This list of Certified Dropoff, Collection, and Community Service Programs (non-buyback) operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Dec 16, 2020

Land Disposal Sites: LDS

Land Disposal Sites in GeoTracker, the State Water Resources Control Board (SWRCB)'s data management system. The Land Disposal program regulates of waste discharge to land for treatment, storage and disposal in waste management units. Waste management units include waste piles, surface impoundments, and landfills.

Government Publication Date: Jun 22, 2021

Leaking Underground Fuel Tank Reports: LUST

List of Leaking Underground Storage Tanks within the Cleanup Sites data in GeoTracker database. GeoTracker is the State Water Resources Control Board's (SWRCB) data management system for managing sites that impact groundwater, especially those that require groundwater cleanup (Underground Storage Tanks, Department of Defense and Site Cleanup Program) as well as permitted facilities such as operating Underground Storage Tanks. The Leak Prevention Program that overlooks LUST sites is the SWRCB in California's Environmental Protection Agency.

Government Publication Date: Jun 22, 2021

Delisted Leaking Storage Tanks: DELISTED LST

List of Leaking Underground Storage Tanks (LUST) cleanup sites removed from GeoTracker, the State Water Resources Control Board (SWRCB)'s database system, as well as sites removed from the SWRCB's list of UST Case closures.

Government Publication Date: Jun 22, 2021

Permitted Underground Storage Tank (UST) in GeoTracker: UST

List of Permitted Underground Storage Tank (UST) sites made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA).

Government Publication Date: Jul 25, 2021

Proposed Closure of Underground Storage Tank Cases: UST CLOSURE

List of UST cases that are being considered for closure by either the California Environmental Protection Agency, State Water Resources Control Board or the Executive Director that have been posted for a 60-day public comment period.

Government Publication Date: May 5, 2021

Historical Hazardous Substance Storage Information Database: HHSS

The Historical Hazardous Substance Storage database contains information collected in the 1980s from facilities that stored hazardous substances. The information was originally collected on paper forms, was later transferred to microfiche, and recently indexed as a searchable database. When using this database, please be aware that it is based upon self-reported information submitted by facilities which has not been independently verified. It is unlikely that every facility responded to the survey and the database should not be expected to be a complete inventory of all facilities that were operating at that time. This database is maintained by the California State Water Resources Control Board's (SWRCB) Geotracker.

Government Publication Date: Aug 27, 2015

Statewide Environmental Evaluation and Planning System: UST SWEEPS

The Statewide Environmental Evaluation and Planning System (SWEEPS) is a historical listing of active and inactive underground storage tanks made available by the California State Water Resources Control Board (SWRCB).

Government Publication Date: Oct 1, 1994

Aboveground Storage Tanks: AST

A statewide list from 2009 of aboveground storage tanks (ASTs) made available by the Cal FIRE Office of the State Fire Marshal (OSFM). This list is no longer maintained or updated by the Cal FIRE OSFM.

Government Publication Date: Aug 31, 2009

SWRCB Historical Aboveground Storage Tanks: AST SWRCB

A list of aboveground storage tanks made available by the California State Water Resources Control Board (SWRCB). Effective January 1, 2008, the Certified Unified Program Agencies (CUPAs) are vested with the responsibility and authority to implement the Aboveground Petroleum Storage Act (APSA).

Government Publication Date: Dec 1, 2007

Oil and Gas Facility Tanks: TANK OIL GAS

Locations of oil and gas tanks that fall under the jurisdiction of the Geologic Energy Management Division of the California Department of Conservation (CalGEM) (CCR 1760). CalGEM was formerly the Division of Oil, Gas, and Geothermal Resources (DOGGR).

Government Publication Date: Sep 13, 2021

Delisted Storage Tanks: DELISTED TNK

This database contains a list of storage tank sites that were removed by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA) and the Cal FIRE Office of State Fire Marshal (OSFM).

Government Publication Date: Sep 13, 2021

California Environmental Reporting System (CERS) Tanks: CERS TANK

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Sep 24, 2021

Delisted California Environmental Reporting System (CERS) Tanks: DELISTED CTNK

This database contains a list of Aboveground Petroleum Storage and Underground Storage Tank sites that were removed from in the California Environmental Protection Agency (CalEPA) Regulated Site Portal.

Government Publication Date: Sep 24, 2021

Historical Hazardous Substance Storage Container Information - Facility Summary: HIST TANK

The State Water Resources Control Board maintained the Hazardous Substance Storage Containers listing and inventory in th 1980s. This facility summary lists historic tank sites where the following container types were present: farm motor vehicle fuel tanks; waste tanks; sumps; pits, ponds, lagoons, and others; and all other product tanks. This set, published in May 1988, lists facility and owner information, as well as the number of containers. This data is historic and will not be updated.

Government Publication Date: May 27, 1988

Site Mitigation and Brownfields Reuse Program Facility Sites with Land Use Restrictions: LUR

The Department of Toxic Substances Control (DTSC) Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents land use restrictions that are active. Some sites have multiple land use restrictions.

Government Publication Date: Jun 14, 2021

CALSITES Database: CALSITES

This historical database was maintained by the Department of Toxic Substance Control (DTSC) for more than a decade. CALSITES contains information on Brownfield properties with confirmed or potential hazardous contamination. In 2006, DTSC introduced EnviroStor as the latest Brownfields site database.

Government Publication Date: May 1, 2004

Hazardous Waste Management Program Facility Sites with Deed / Land Use Restrictions: HLUR

The Department of Toxic Substances Control (DTSC) Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Government Publication Date: Feb 18, 2021

Deed Restrictions and Land Use Restrictions: DEED

List of Deed Restrictions, Land Use Restrictions and Covenants in GeoTracker made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency. A deed restriction (land use covenant) may be required to facilitate the remediation of past environmental contamination and to protect human health and the environment by reducing the risk of exposure to residual hazardous materials.

Government Publication Date: Jun 22, 2021

Voluntary Cleanup Program: VCP

List of sites in the Voluntary Cleanup Program made available by the Department of Toxic Substances and Control (DTSC). The Voluntary Cleanup Program was designed to respond to lower priority sites. Under the Voluntary Cleanup Program, DTSC enters site-specific agreements with project proponents for DTSC oversight of site assessment, investigation, and/or removal or remediation activities, and the project proponents agree to pay DTSC's reasonable costs for those services.

Government Publication Date: Jun 14, 2021

GeoTracker Cleanup Program Sites: CLEANUP SITES

A list of Cleanup Program sites in the state of California made available by The State Water Resources Control Board (SWRCB) of the California Environmental Protection Agency (EPA). SWRCB tracks leaking underground storage tank cleanups as well as other water board cleanups.

Government Publication Date: Jun 22, 2021

Delisted County Records: DELISTED COUNTY

Records removed from county or CUPA databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.

Government Publication Date: Oct 7, 2021

Tribal

Leaking Underground Storage Tanks (LUSTs) on Indian Lands: INDIAN LUST
LUSTs on Tribal/Indian Lands in Region 9, which includes California.
Government Publication Date: Apr 8, 2020

Underground Storage Tanks (USTs) on Indian Lands: INDIAN UST
USTs on Tribal/Indian Lands in Region 9, which includes California.
Government Publication Date: Apr 8, 2020

Delisted Tribal Leaking Storage Tanks: DELISTED ILST
Leaking Underground Storage Tank facilities which have been removed from the Regional Tribal LUST lists made available by the EPA.
Government Publication Date: Apr 14, 2020

Delisted Tribal Underground Storage Tanks: DELISTED IUST
Underground Storage Tank facilities which have been removed from the Regional Tribal UST lists made available by the EPA.
Government Publication Date: Apr 14, 2020

County

Los Angeles County - Site Mitigation List: SML LA
A Site Mitigation List in the County of Los Angeles. The list is made available by Los Angeles County Fire Department. Site mitigation is handled by the Site Mitigation Unit (SMU) which facilitates completion of site clean-up projects of contaminated sites in an expeditious manner in all cities of the Los Angeles County except El Segundo, Glendale, Long Beach, Santa Fe Springs, and Vernon.
Government Publication Date: Mar 2, 2021

Los Angeles County - Solid Waste Sites: SWF LA COUNTY
List of permitted solid waste facilities, closed landfills, historical dumpsites and other solid waste sites in Los Angeles County, made available by the Department of Public Works in Los Angeles County.
Government Publication Date: Jun 18, 2021

Los Angeles County - CUPA Program Records: CUPA LA COUNTY
A list of inspection and enforcement records for active and inactive CUPA Program facilities, made available by the Health Hazardous Materials Division (HHMD) of the County of Los Angeles Fire Department. Includes Hazardous Materials Business Plan (HMBP), California Accidental Release Prevention Plan (CalARP), Hazardous Waste Generator (HWG), and the Aboveground Petroleum Storage Act Programs (APSA). Inactive programs include facilities that are out of business or no longer regulated by the HHMD.
Government Publication Date: Mar 25, 2020

Los Angeles County - HMS List: HMS LA
List of sites in the Los Angeles County Department of Public Works Hazardous Materials System (HMS) Database which have or have had permits for Industrial Waste, Underground Storage Tanks, or Stormwater in the county of Los Angeles.
Government Publication Date: Nov 5, 2020

Los Angeles County - Santa Fe Springs Underground Storage Tank: UST SANTAFESP
A list of registered active Underground Storage Tanks (USTs) in the City of Santa Fe Springs. This list is made available by Santa Fe Springs Department of Fire-Rescue.
Government Publication Date: Jul 19, 2021

Los Angeles County - Long Beach UST List: UST LONGB
List of registered Underground Storage Tanks (USTs) in the City of Long Beach, Los Angeles County, made available by the Long Beach Certified Unified Program Agency (CUPA). The Long Beach CUPA operates under oversight shared by the Long Beach Fire Department and Health Department.
Government Publication Date: Jul 9, 2018

Los Angeles County - Burbank City CUPA List: CUPA BURBANK

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in the City of Burbank. This list is made available by the City of Burbank Fire Department.

Government Publication Date: Aug 21, 2019

Los Angeles County - El Segundo City Underground Storage Tanks List: UST ELSEGUNDO

List of registered Underground Storage Tanks (USTs) in the City of El Segundo of Los Angeles County, made available by El Segundo City Fire Department.

Government Publication Date: Jan 17, 2017

Los Angeles County - Santa Monica City Underground Storage Tank List: UST SANTA MONICA

A list of registered active Underground Storage Tanks (USTs) in the City of Santa Monica made available by Santa Monica Fire Prevention Division.

Government Publication Date: Dec 3, 2020

Los Angeles County - Santa Monica City Aboveground Storage Tank List: AST SANTAMON

List of registered Aboveground Storage Tanks (ASTs) made available by the Santa Monica Fire Department in the City of Santa Monica of Los Angeles County, California.

Government Publication Date: Dec 3, 2020

Los Angeles County - Santa Monica City CUPA Facilities List: CUPA SANTAMON

The Santa Monica Fire Department's office maintains a list of CUPA Facilities located in Santa Monica city.

Government Publication Date: Dec 3, 2020

Los Angeles County - Torrance City Underground Storage Tanks: UST TORRANCE

A list of registered Underground Storage Tank (UST) sites in Torrance City of Los Angeles County. This list is made available by Torrance City Office of Clerk.

Government Publication Date: Feb 2, 2021

Los Angeles County - Vernon City UST List: UST VERNON

A list of Underground Storage Tanks (UST) in Vernon City provided by the Vernon City Fire Department.

Government Publication Date: Jun 7, 2021

Los Angeles County - Vernon City CUPA List: CUPA VERNON

The Vernon City Fire Department's office maintains a list of CUPA Facilities located in Vernon city.

Government Publication Date: Jun 3, 2021

Los Angeles County - City of Los Angeles UST List: UST LA CITY

A list of active and inactive underground storage tank facilities made available by the Los Angeles Fire Department CUPA.

Government Publication Date: Jun 1, 2019

Los Angeles County - City of Los Angeles AST List: AST LA CITY

A list of active and inactive above ground petroleum storage tanks made available by the Los Angeles Fire Department CUPA.

Government Publication Date: Jun 1, 2019

Los Angeles County - City of Los Angeles Hazardous Materials Facilities: HAZMAT LA CITY

A list of active and inactive hazardous materials facilities made available by the Los Angeles Fire Department CUPA.

Government Publication Date: Jun 1, 2019

Additional Environmental Record Sources

Federal

PFOA/PFOS Contaminated Sites: PFAS NPL

List of sites where PFOA or PFOS contaminants have been found in drinking water or soil. Made available by the Federal Environmental Protection Agency (EPA).

Government Publication Date: Sep 17, 2021

Facility Registry Service/Facility Index: FINDS/FRS

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Nov 2, 2020

Toxics Release Inventory (TRI) Program: TRIS

The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U. S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

Government Publication Date: Aug 24, 2021

Perfluorinated Alkyl Substances (PFAS) Releases: PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a Per- or polyfluorinated alkyl substance (PFAS) included in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances. The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment.

Government Publication Date: Aug 24, 2021

Perfluorinated Alkyl Substances (PFAS) Water Quality: PFAS WATER

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances.

Government Publication Date: Jul 20, 2020

Hazardous Materials Information Reporting System: HMIRS

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

Government Publication Date: Sep 1, 2020

National Clandestine Drug Labs: NCDL

The U.S. Department of Justice ("the Department") provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Oct 5, 2020

Toxic Substances Control Act: TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Apr 11, 2019

Hist TSCA: HIST TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing: FTTS ADMIN

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing: FTTS INSP

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List: PRP

Early in the cleanup process, the Environmental Protection Agency (EPA) conducts a search to find the potentially responsible parties (PRPs). EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site.

Government Publication Date: Jun 25, 2021

State Coalition for Remediation of Drycleaners Listing: SCRD DRYCLEANER

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS): ICIS

The Integrated Compliance Information System (ICIS) is a system that provides information for the Federal Enforcement and Compliance (FE&C) and the National Pollutant Discharge Elimination System (NPDES) programs. The FE&C component supports the Environmental Protection Agency's (EPA) Civil Enforcement and Compliance program activities. These activities include Compliance Assistance, Compliance Monitoring and Enforcement. The NPDES program supports tracking of NPDES permits, limits, discharge monitoring data and other program reports.

Government Publication Date: Jun 14, 2021

Drycleaner Facilities: FED DRYCLEANERS

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) online search. The Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: May 5, 2021

Delisted Drycleaner Facilities: DELISTED FED DRY

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: May 5, 2021

Formerly Used Defense Sites: FUDS

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DoD) is responsible for an environmental restoration. This list is published by the U.S. Army Corps of Engineers.

Government Publication Date: May 26, 2021

Former Military Nike Missile Sites: FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 2, 1984

PHMSA Pipeline Safety Flagged Incidents: PIPELINE INCIDENT

A list of flagged pipeline incidents made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types.

Government Publication Date: Jul 7, 2020

Material Licensing Tracking System (MLTS): MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: May 11, 2021

Historic Material Licensing Tracking System (MLTS) sites: HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File: MINES

The Master Index File (MIF) contains mine identification numbers issued by the Department of Labor Mine Safety and Health Administration (MSHA) for mines active or opened since 1971. Note that addresses may or may not correspond with the physical location of the mine itself.

Government Publication Date: Nov 3, 2020

Surface Mining Control and Reclamation Act Sites: SMCRA

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of Abandoned Mine Land (AML) impacts, as well as information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Government Publication Date: Dec 18, 2020

Mineral Resource Data System: MRDS

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2006

Uranium Mill Tailings Radiation Control Act Sites: URANIUM

The Legacy Management Office of the Department of Energy (DOE) manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The L.M. Office manages this database of sites registered under the Uranium Mill Tailings Control Act (UMTRCA).

Government Publication Date: Mar 4, 2017

Alternative Fueling Stations: ALT FUELS

List of alternative fueling stations made available by the US Department of Energy's Office of Energy Efficiency & Renewable Energy. Includes Biodiesel stations, Ethanol (E85) stations, Liquefied Petroleum Gas (Propane) stations, Ethanol (E85) stations, Natural Gas stations, Hydrogen stations, and Electric Vehicle Supply Equipment (EVSE). The National Renewable Energy Laboratory (NREL) obtains information about new stations from trade media, Clean Cities coordinators, a Submit New Station form on the Station Locator website, and through collaborating with infrastructure equipment and fuel providers, original equipment manufacturers (OEMs), and industry groups.

Government Publication Date: Jul 12, 2021

Registered Pesticide Establishments: SSTS

List of active EPA-registered foreign and domestic pesticide-producing and device-producing establishments based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that facilities producing pesticides, active ingredients, or devices be registered. The list of establishments is made available by the EPA.

Government Publication Date: Apr 13, 2021

Polychlorinated Biphenyl (PCB) Notifiers: PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: Nov 19, 2020

State

Dry Cleaning Facilities: DRYCLEANERS

A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial, linen supply, commercial laundry, dry cleaning and pressing machines - Coin Operated Laundry and Dry Cleaning. This is provided by the Department of Toxic Substance Control.

Government Publication Date: Aug 27, 2021

Delisted Drycleaners: DELISTED DRYCLEANERS

Sites removed from the list of drycleaner related facilities that have EPA ID numbers, made available by the California Department of Toxic Substance Control.

Government Publication Date: Aug 27, 2021

Non-Toxic Dry Cleaning Incentive Program: DRYC GRANT

A list of grant recipients of the Non-Toxic Dry Cleaning Incentive Program made available by the California Air Resources Board (CARB). The program provides grants to eligible dry cleaning businesses to assist them in transitioning away from PERC machines to alternative non-toxic and non-smog forming technologies.

Government Publication Date: Feb 28, 2018

Per- and Polyfluoroalkyl Substances (PFAS): PFAS

List of sites from the State Water Resources Control Board (SWRCB)'s GeoTracker at which one or more of the potential contaminants of concern are in the PFAS Master List of PFAS Substances made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Jun 22, 2021

PFOA/PFOS Groundwater: PFAS GW

A list of water wells from the Groundwater Ambient Monitoring and Assessment Program (GAMA) Groundwater Information System with the groundwater chemical perfluorooctanoic acid (PFOA) (NL = 0.014 UG/L) or perfluorooctanoic sulfonate (PFOS) (NL = 0.013 UG/L). The GAMA Groundwater Information System search is made available by California Water Boards.

Government Publication Date: Oct 22, 2020

Hazardous Waste and Substances Site List - Site Cleanup: HWSS CLEANUP

The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements in providing information about the location of hazardous materials release sites. This list is published by California Department of Toxic Substance Control.

Government Publication Date: May 20, 2021

List of Hazardous Waste Facilities Subject to Corrective Action: DTSC HWF

This is a list of hazardous waste facilities identified in Health and Safety Code (HSC) § 25187.5. These facilities are those where Department of Toxic Substances Control (DTSC) has taken or contracted for corrective action because a facility owner/operator has failed to comply with a date for taking corrective action in an order issued under HSC § 25187, or because DTSC determined that immediate corrective action was necessary to abate an imminent or substantial endangerment.

Government Publication Date: Jul 18, 2016

EnviroStor Inspection, Compliance, and Enforcement: INSP COMP ENF

A list of permitted facilities with inspections and enforcements tracked in the Department of Toxic Substance Control (DTSC) EnviroStor.

Government Publication Date: Apr 29, 2021

School Property Evaluation Program Sites: SCH

A list of sites registered with The Department of Toxic Substances Control (DTSC) School Property Evaluation and Cleanup (SPEC) Division. SPEC is responsible for assessing, investigating and cleaning up proposed school sites. The Division ensures that selected properties are free of contamination or, if the properties were previously contaminated, that they have been cleaned up to a level that protects the students and staff who will occupy the new school.

Government Publication Date: Jun 14, 2021

California Hazardous Material Incident Report System (CHMIRS): CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS). This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Aug 1, 2021

Historical California Hazardous Material Incident Report System (CHMIRS): HIST CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS) prior to 1993. This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Jan 1, 1993

Hazardous Waste Manifest Data: HAZNET

A list of hazardous waste manifests received each year by Department of Toxic Substances Control (DTSC). The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Government Publication Date: Oct 24, 2016

Historical Hazardous Waste Manifest Data: HIST MANIFEST

A list of historic hazardous waste manifests received by the Department of Toxic Substances Control (DTSC) from year the 1980 to 1992. The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Government Publication Date: Dec 31, 1992

DTSC Registered Hazardous Waste Transporters: HW TRANSPORT

The California Department of Toxic Substances Control (DTSC) maintains this list of Registered Hazardous Waste Transporters.

Government Publication Date: Oct 19, 2020

Registered Waste Tire Haulers: WASTE TIRE

This list of registered waste tire haulers is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Dec 16, 2020

California Medical Waste Management Program Facility List: MEDICAL WASTE

This list of Medical Waste Management Program Facilities is maintained by the California Department of Public Health. The Medical Waste Management Program (MWMP) regulates the generation, handling, storage, treatment, and disposal of medical waste by providing oversight for the implementation of the Medical Waste Management Act (MWMA). The MWMP permits and inspects all medical waste off-site treatment facilities, medical waste transporters, and medical waste transfer stations. This list contains transporters, treatment, and transfer facilities.

Government Publication Date: Dec 31, 2020

Historical Cortese List: HIST CORTESE

List of sites which were once included on the Cortese list. The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements for providing information about the location of hazardous sites.

Government Publication Date: Nov 13, 2008

Cease and Desist Orders and Cleanup and Abatement Orders: CDO/CAO

The California Environment Protection Agency "Cortese List" of active Cease and Desist Orders (CDO) and Cleanup and Abatement Orders (CAO). This list contains many CDOs and CAOs that do NOT concern the discharge of wastes that are hazardous materials. Many of the listed orders concern, as examples, discharges of domestic sewage, food processing wastes, or sediment that do not contain hazardous materials, but the Water Boards' database does not distinguish between these types of orders.

Government Publication Date: Jul 19, 2020

California Environmental Reporting System (CERS) Hazardous Waste Sites: CERS HAZ

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Sep 24, 2021

Delisted Environmental Reporting System (CERS) Hazardous Waste Sites: DELISTED HAZ

This database contains a list of sites that were removed from the California Environmental Protection Agency (CalEPA) in the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator.

Government Publication Date: Nov 29, 2018

Sites in GeoTracker: GEOTRACKER

GeoTracker is the State Water Resource Control Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater. This is a list of sites in GeoTracker that aren't otherwise categorized as LUST, Land Disposal Sites (LDS), Cleanup Sites, or sites having Waste Discharge Requirements (WDR). This listing includes program types such as Underground Injection Control (UIC), Confined Animal Facilities (CAF), Irrigated Lands Regulatory Program, plans, and non-case information.

Government Publication Date: Jun 22, 2021

Mines Listing: MINE

This list includes mine site locations extracted from the Mines Online database, maintained by the California Department of Conservation. Mines Online (MOL) is an interactive web map designed with GIS features that provide information such as the mine name, mine status, commodity sold, location, and other mine specific data. Please note: Mine location information is provided to assist experts in determining the location of mine operators in accordance with California Civil Code section 1103.4 and reflects information reported by mine operators in annual reports provided under Public Resources Code section 2207. While the Division of Mine Reclamation (DMR) attempts to populate MOL with accurate location information, the DMR cannot guarantee the accuracy of operator reported location information.

Government Publication Date: Jan 12, 2021

Recorded Environmental Cleanup Liens: LIEN

The California Department of Toxic Substance Control (DTSC) maintains this list of liens placed upon real properties. A lien is utilized by the DTSC to obtain reimbursement from responsible parties for costs associated with the remediation of contaminated properties.

Government Publication Date: Nov 16, 2020

Waste Discharge Requirements: WASTE DISCHG

List of sites in California State Water Resources Control Board (SWRCB) Waste Discharge Requirements (WDRs) Program in California, made available by the SWRCB via GeoTracker. The WDR program regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

Government Publication Date: Jun 22, 2021

Toxic Pollutant Emissions Facilities: EMISSIONS

A list of criteria and toxic pollutant emissions data for facilities in California made available by the California Environmental Protection Agency - Air Resources Board (ARB). Risk data may be based on previous inventory submittals. The toxics data are submitted to the ARB by the local air districts as requirement of the Air Toxics "Hot Spots" Program. This program requires emission inventory updates every four years.

Government Publication Date: Dec 31, 2019

Clandestine Drug Lab Sites: CDL

The Department of Toxic Substances Control (DTSC) maintains a listing of drug lab sites. DTSC is responsible for removal and disposal of hazardous substances discovered by law enforcement officials while investigating illegal/clandestine drug laboratories.

Government Publication Date: Jan 19, 2021

Tribal

No Tribal additional environmental record sources available for this State.

County

Los Angeles County - Santa Monica City Hazardous Materials Facilities: HAZMAT SANTAMON

A list of Hazardous Materials Facilities in the City of Santa Monica, Los Angeles county. This list is made available by Santa Monica Fire Prevention Division which has been designated as the CUPA for the City.

Government Publication Date: Mar 12, 2020

Los Angeles County - Santa Monica City Hazardous Waste Facilities: HAZ WST SANTAMON

A list of Hazardous Waste Facilities in Los Angeles County, City of Santa Monica. This list is made available by Santa Monica Fire Prevention Division.

Government Publication Date: Dec 3, 2020

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

The ERIS ***Physical Setting Report - PSR*** provides comprehensive information about the physical setting around a site and includes a complete overview of topography and surface topology, in addition to hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, public water systems and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

Radon Information

This section lists any relevant radon information found for the target property.

Federal EPA Radon Zone for *LOS ANGELES* County: **2**

Zone 1: Counties with predicted average indoor radon screening levels greater than 4 pCi/L
Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L
Zone 3: Counties with predicted average indoor radon screening levels less than 2 pCi/L

Federal Area Radon Information for *LOS ANGELES* County

No Measures/Homes:	69
Geometric Mean:	0.4
Arithmetic Mean:	0.7
Median:	0.5
Standard Deviation:	1
Maximum:	5.6
% >4 pCi/L:	1
% >20 pCi/L:	0
Notes on Data Table:	TABLE 1. Screening indoor radon data from the EPA/State Residential Radon Survey of California conducted during 1989-90. Data represent 2-7 day charcoal canister measurements from the lowest level of each home tested.

Appendix

Federal Sources

FEMA National Flood Hazard Layer — **FEMA FLOOD**

The National Flood Hazard Layer (NFHL) data incorporates Flood Insurance Rate Map (FIRM) databases published by the Federal Emergency Management Agency (FEMA), and any Letters Of Map Revision (LOMRs) that have been issued against those databases since their publication date. The FIRM Database is the digital, geospatial version of the flood hazard information shown on the published paper FIRMs. The FIRM Database depicts flood risk information and supporting data used to develop the risk data. The FIRM Database is derived from Flood Insurance Studies (FISs), previously published FIRMs, flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available.

Indoor Radon Data — **INDOOR RADON**

Indoor radon measurements tracked by the Environmental Protection Agency(EPA) and the State Residential Radon Survey.

Public Water Systems Violations and Enforcement Data — **PWSV**

List of drinking water violations and enforcement actions from the Safe Drinking Water Information System (SDWIS) made available by the Drinking Water Protection Division of the US EPA's Office of Groundwater and Drinking Water. Enforcement sensitive actions are not included in the data released by the EPA. Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Radon Zone Level — **RADON ZONE**

Areas showing the level of Radon Zones (level 1, 2 or 3) by county. This data is maintained by the Environmental Protection Agency (EPA).

Safe Drinking Water Information System (SDWIS) — **SDWIS**

The Safe Drinking Water Information System (SDWIS) contains information about public water systems as reported to US Environmental Protection Agency (EPA) by the states. Addresses may correspond with the location of the water system, or with a contact address.

Soil Survey Geographic database — **SSURGO**

The Soil Survey Geographic database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Soil maps outline areas called map units. The map units are linked to soil properties in a database. Each map unit may contain one to three major components and some minor components.

U.S. Fish & Wildlife Service Wetland Data — **US WETLAND**

The U.S. Fish & Wildlife Service Wetland layer represents the approximate location and type of wetlands and deepwater habitats in the United States.

USGS Current Topo — **US TOPO**

US Topo topographic maps are produced by the National Geospatial Program of the U.S. Geological Survey (USGS). The project was launched in late 2009, and the term "US Topo" refers specifically to quadrangle topographic maps published in 2009 and later.

USGS Geology — **US GEOLOGY**

Seamless maps depicting geological information provided by the United States Geological Survey (USGS).

USGS National Water Information System — **FED USGS**

The U.S. Geological Survey (USGS)'s National Water Information System (NWIS) is the nation's principal repository of water resources data. This database includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data.

State Sources

Oil and Gas Wells — **OGW**

A list of Oil and Gas well locations. This is provided by California's Department of Conservation Division of

Appendix

Oil, Gas and Geothermal Resources.

Periodic Groundwater Level Measurement Locations **MONITOR WELLS**

Locations of groundwater level monitoring wells in the Department of Water Resources (DWR)'s Periodic Groundwater Levels dataset. The DWR Periodic Groundwater Levels dataset contains seasonal and long-term groundwater level measurements collected by the Department of Water Resources and cooperating agencies.

Well Completion Reports **WATER WELLS**

List of wells from the Well Completion Reports data made available by the California Department of Water Resources' (DWR) Online System for Well Completion Reports (OSWCR). Please note that the majority of well completion reports have been spatially registered to the center of the 1x1 mile Public Land Survey System section that the well is located in.

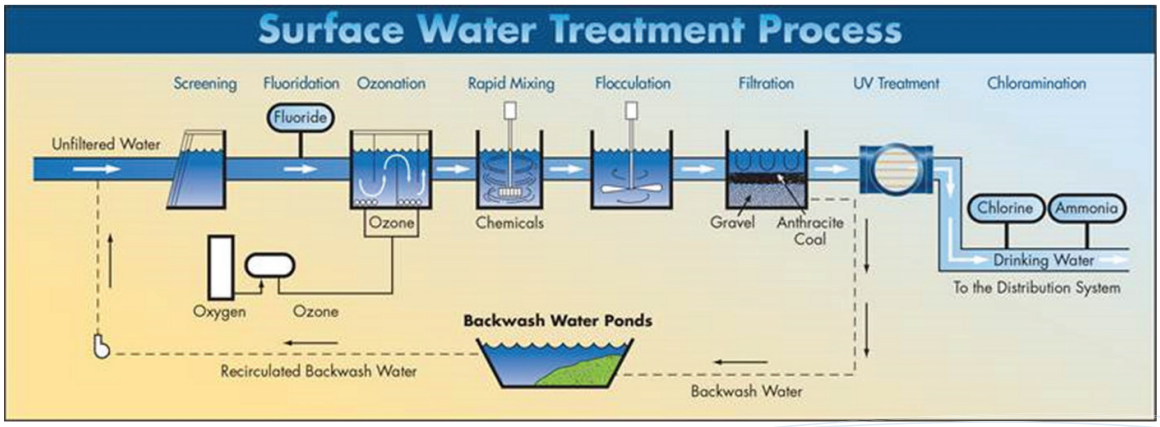
SAFEGUARDING L.A.'S DRINKING WATER

A Message from Razmik Manoukian

Director of Water Quality

It's been a tough year with many adjustments for all of Los Angeles, but one thing we didn't have to worry about was the safety of our drinking water supply. Throughout 2020, LADWP maintained the highest water quality standards by adhering to all treatment, monitoring and safety protocols.



The City of Los Angeles water supply is approximately 89 percent surface water, 9 percent groundwater, and 2 percent recycled water. The surface water is purified using a multibarrier approach as depicted in the treatment process figure below. The water is purified by screening, ozonation, filtration, ultra-violet disinfection, chlorination, and ammoniation. LADWP also disinfects extracted groundwater with chlorine to safeguard against microorganisms. Every step of the treatment process achieves a certain level of microorganism and contaminant removal. When it comes to viruses, including COVID-19, the most effective treatment process is chlorination. A very small amount of chlorine is highly effective in killing viruses. This is important because chlorine protects the water supply as it travels through the distribution system to your tap.

The use of water chlorination to disinfect public water supplies began in the early 1900s. Its use has had a major impact on the incidence of waterborne disease such as cholera, typhoid fever and dysentery in the U.S. and worldwide. Chlorination of drinking water has been credited for increasing life expectancy in developed countries during the twentieth century. It continues to be a primary method for disinfecting water today and an effective treatment step in stopping the COVID-19 virus. LADWP uses chlorination and other state-of-art water treatment methods because we are committed to the safety and quality of your drinking water.

The U.S. Environmental Protection Agency (U.S. EPA) and the State Water Resources Control Board, Division of Drinking Water (SWRCB-DDW) require that all water agencies produce an annual report informing customers about the quality of their drinking water. To ensure compliance with these drinking water standards, LADWP employees actively safeguard our water. Every day, we effectively manage state-of-the-art water treatment facilities and diligently test the water to make certain the highest quality water is delivered to you. Over 37,000 samples are tested for hundreds of constituents throughout the distribution system annually.

As you read through this report, you will find references to tables that depict the actual levels of specific substances or "constituents" we have found in the city's water supply. Looking at the tables, I am proud to state that all regulated constituents detected were at very low levels. In fact, LADWP water quality performance was at least 50 percent better than safety levels set by the US EPA and SWRCB-DDW. Out of the 104 constituents we are required to monitor, none were found at levels considered unsafe by health agencies and only 32 were detected at very low levels as listed in Tables I and II.

We are proud to serve safe, refreshing, high quality drinking water to all our customers across the city—at home, work, and neighborhood parks. At LADWP, we are committed to customer service. If you have any questions or concerns about your water quality or need advice on how to improve water quality at your home or workplace, please do not hesitate to call our Water Quality Hotline at (213) 367-3182.

LOS ANGELES IS WATER STRONG

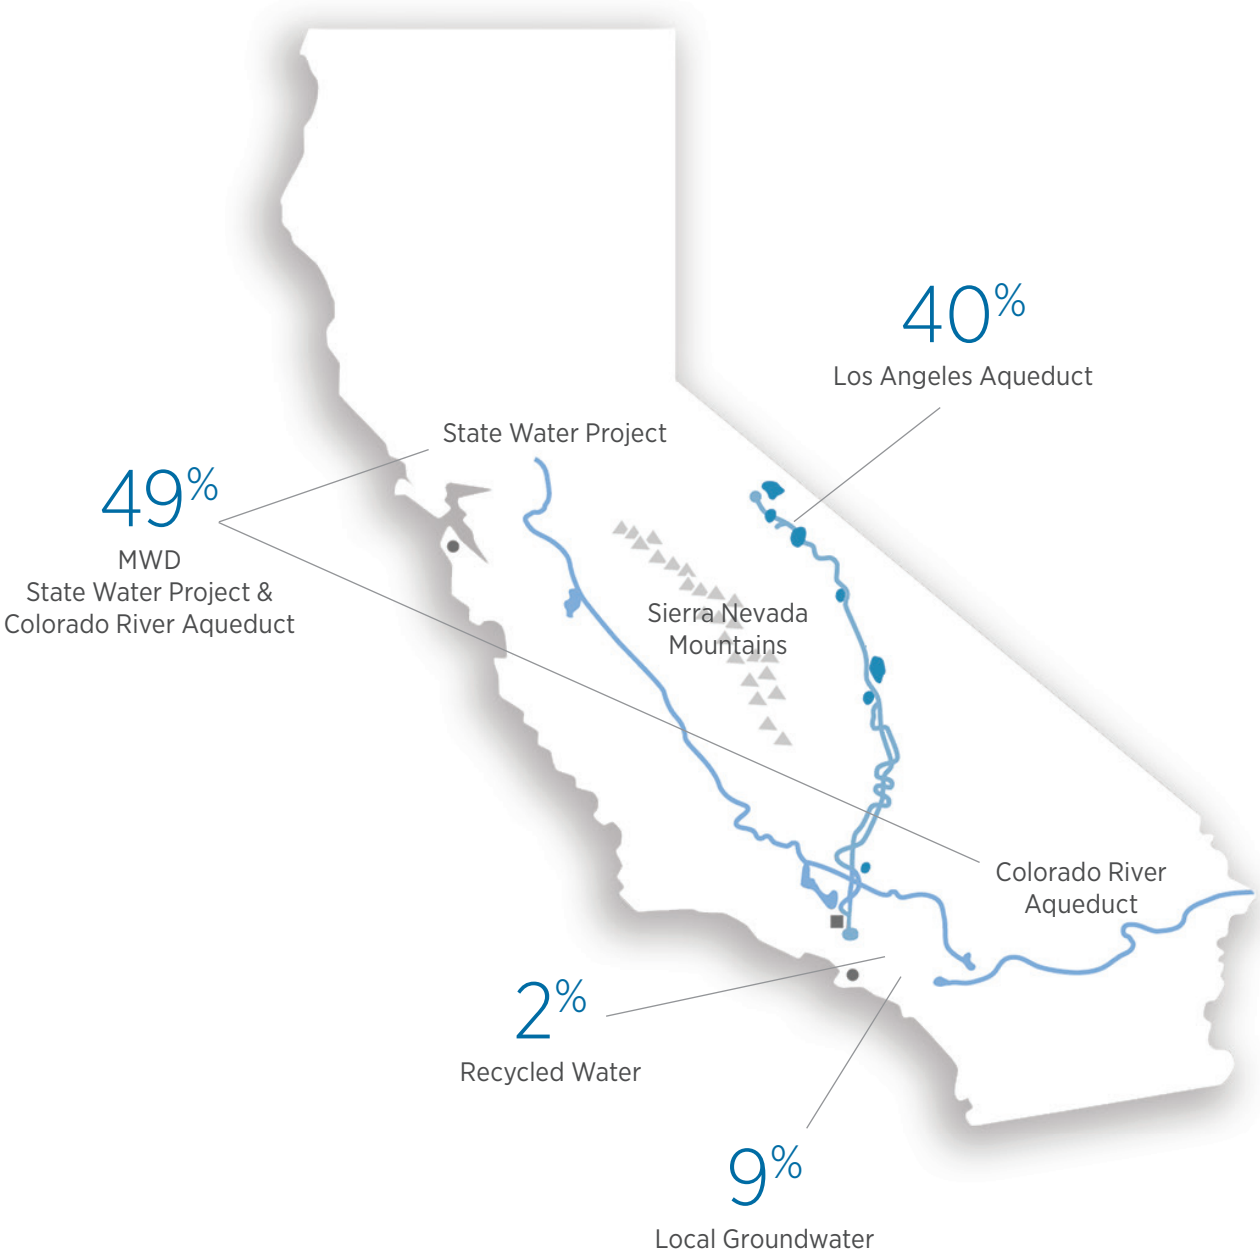
A Message from Richard Harasick

LADWP Senior Assistant General Manager, Water System

LADWP remains water strong despite all the challenges of 2020. Through the dedication and commitment of our essential workforce we continue to serve you safe, high quality drinking water. Our skilled personnel ensure water treatment facilities are maintained and water quality is monitored, sampled, and tested regularly. All water served to you and your family is treated and tested rigorously to meet state and federal standards. As your local utility, LADWP never stopped providing essential services during the pandemic, amidst the wildfires, and through periods of civil unrest.

Our workforce remains strong because we are taking stringent precautions to stay healthy on the job. We take our responsibility to safeguard the city's water supply seriously, especially during the COVID-19 pandemic.

Due to our investments in infrastructure, we continue to make our water system resilient and responsive to your needs and the community we serve. We continue to upgrade and fortify our distribution system through multiple improvement projects. These include strategic pipe replacement, earthquake resilient pipe installation, and ongoing maintenance of tanks and reservoirs. Also, investments in a diverse water supply portfolio of stormwater capture, water conservation, and water recycling further help us to prepare for dry periods and make us less dependent on purchased imported water supplies. Strong water infrastructure allows us to serve safe, high quality water and secure a sustainable water future.



We have every confidence in the quality, reliability, and safety of the water being delivered to your tap. We work in partnership with our regulators to maintain the water system to the highest standards, and we keep a watchful eye on any emerging contaminants. While we continue to navigate these difficult times together, we're working diligently to provide you with the essential services you need. Together, Los Angeles is Water Strong.

A lab technician collects water samples at the Tujunga Treatment Plant. In 2020, we tested the water for more than 148 constituents and performed more than 112,000 tests on samples taken throughout our vast water system.

L.A.'S WATER SOURCES IN 2020

Los Angeles receives water from several sources. In 2020, the Los Angeles Aqueduct (LAA) supplied 40 percent of the water that was treated at the Los Angeles Aqueduct Filtration Plant. Purchased imported water from the Metropolitan Water District of Southern California (MWD) amounted to 49 percent. The remaining water supply was sourced from local groundwater at 9 percent and recycled water at 2 percent.

Drinking Water and Your Health

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and, in some cases, radioactive material. It can pick up substances resulting from the presence of animals or from human activity.

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the U.S. EPA Safe Drinking Water Hotline: (800) 426-4791.

Health Advisory for People with Weakened Immune Systems

Although LADWP treats its water to meet drinking water standards, some people may be more vulnerable to constituents in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These individuals should seek advice about drinking water from their health care providers. U.S. EPA Centers for Disease Control (CDC) guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Drinking Water Hotline: (800) 426-4791.

Contaminants That May Be Present

Water agencies are required to use the following language to discuss the source of contaminants that may reasonably be expected to be found in drinking water, including tap and bottled water.

Contaminants that may be present in source water include:

- Microbial contaminants, such as viruses and bacteria that may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.
- Inorganic contaminants, such as salts and metals, that can be naturally-occurring or result from urban stormwater runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.
- Pesticides and herbicides that may come from a variety of sources such as agriculture, urban stormwater runoff, and residential uses.
- Organic chemical contaminants, including synthetic and volatile organic chemicals that are by-products of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff, agricultural application, and septic systems.
- Radioactive contaminants that can be naturally-occurring or be the result of oil and gas production and mining activities.

To ensure that tap water is safe to drink, the U.S. EPA and the State Water Resources Control Board (State Board) prescribe regulations that limit the amount of certain contaminants in water provided by public water systems.

The U.S. Food and Drug Administration regulations and California law also establish limits for contaminants in bottled water that provide the same protection for public health.

One of LADWP's frontline employees takes a break from installing critical water pipelines that ensure the reliability of our water infrastructure.

LADWP STAYS FOCUSED ON CUSTOMER SERVICE DURING THE PANDEMIC

LADWP continues to serve safe, high quality water despite the COVID-19 pandemic. The city's drinking water undergoes a multi-step treatment process that is closely monitored throughout the distribution system. This critical work is carried out by our frontline workers — engineers, microbiologists, chemists, sample collectors, and laboratory technicians as well as our everyday water utility workers installing and maintaining the vital water pipe distribution system. LADWP has remained water strong throughout these challenging times. With our capable and dedicated team behind every refreshing glass of tap water, we want to remind you that purchasing expensive single-use plastic water bottles is not necessary.

It is important that our customers feel confidence in the safety of the water we serve. LADWP offers free water quality testing at your residence or place of business. Upon request, one of our experts will collect a water sample and submit it for testing at our state-of-the-art water quality laboratory. A customized report will be provided to you. This report describes your water quality and identifies potential plumbing system issues, if any, at your property.

The inspectors help our customers understand the data provided in the report and identify low- and no-cost solutions to everyday water-related inquiries. This is a job that we take very seriously. In fact, we've completed over 97 percent of customer-initiated inspection requests by the end of the next business day.

Like many organizations this past year, we needed time to rethink and adjust our services to comply with social-distancing guidelines. These adjustments helped ensure the safety of customers, employees, and the general public. Where possible, we addressed many customer concerns over the phone and provided recommendations to improve their water quality. Additionally, we provided online resources such as a FAQ page and step-by-step instructions for common customer concerns. Following public health guidelines for COVID safety and prevention, we made some modifications to our processes and were able to conduct some in-person services in a responsible, safe, and customer focused manner.

LADWP remains committed to assisting our customers and we appreciate the opportunity to serve you. If you have any water quality concerns, please contact us at (213) 367-3182 or by email at waterquality@ladwp.com.

An LADWP worker replaces one of the lamps on an ultraviolet reactor. These reactors treat water at the microbial level and help us provide reliable high-quality water to our customers on a daily basis.

REGULATORY COMPLIANCE HOW DID WE MEASURE UP?

LADWP works around the clock to ensure that the drinking water we deliver to our customers is of the highest quality and meets all safety requirements. Highly trained, certified treatment operators monitor our water treatment operations continuously, thereby helping meet federal and state standards for drinking water. In 2020, we tested for more than 148 constituents in the water and performed more than 112,000 tests on samples taken throughout our water system. LADWP received no violations and met all primary drinking water standards in 2020.

PFAS and Drinking Water in California

Poly- and Perfluoroalkyl Substances (PFAS) are a group of synthetic (man-made) chemicals which include Perfluorooctanoic acid (PFOA) and Perfluorooctanoic sulfonic acid (PFOS). They have been used for decades in manufacturing; they are suspected carcinogens and don't breakdown. Most U.S. manufacturers voluntarily phased out production of PFOS between 2000 and 2002, and PFOA in 2006.

Studies indicate potential health consequences from exposure to significant levels of PFAS. Health effects may include high cholesterol, liver and thyroid cancer risks, immunotoxicity, pregnancy-induced hypertension, low birth weights, and decreased fertility. More information is available on US EPA's webpage https://www.epa.gov/ground-water-and-drinking-water/drinking-water-health-advisories-pfoa-and-pfos.

During the course of 2020, some states agencies released new PFAS requirements that included monitoring, compliance determination and reporting. A growing number of state agencies are actively sampling for PFAS to determine their occurrence, levels and potential environmental pathways. The State Board has been actively investigating and sampling for PFAS since 2019. Updated drinking water response levels were released for PFOA (10 parts per trillion) and PFOS (40 parts per trillion).

At the federal level, the U.S. EPA is yet to release its final determination if PFAS will become regulated. However, at the state level, the State Board has requested that the California

Office of Environmental Health Hazard Assessment begin the process to develop public health goals for PFOA and PFOS. The next step will be establishing regulatory standards, and maximum contaminant levels in drinking water.

LADWP began testing for PFAS in fiscal year 2013-14 and has continued to monitor its local groundwater sources for both PFOA and PFOS. Although PFAS were detected in a few samples from individual wells, no single well represents water provided to our customers. Water from individual wells is blended with water from other wells, and is further diluted by blending with much larger volumes of surface water before entering the distribution system. LADWP has not found PFAS contamination in its water distribution system. Customers can be confident that LADWP is providing high quality drinking water.

If you have questions, please contact our Water Quality Hotline at (213) 367-3182 or email us at waterquality@ladwp.com.

Compliance with Lead and Copper Rule (LCR)

LADWP has a long and successful history of controlling corrosion and minimizing lead exposure to customers. Between 1978 and 2006, LADWP cleaned and cement-lined approximately 2,600 miles of unlined iron pipes 4 inches in diameter and greater. Since 1994, we have been replacing our utility portion of galvanized iron service lines. The number of galvanized service lines in our inventory decreased from approximately 45,000 in 1994 to about 16,900 in 2020. LADWP initiated another program in 1998 to replace low-lead (8 percent lead) water meters with lead-free (0.25 percent lead) water meters. There are currently over 700,000 active water meters in LADWP's water distribution system, and approximately 31,500 meters are being replaced annually. Approximately 514,300 (71 percent) water meters have been replaced. In another proactive effort, our staff had located and removed approximately 12,000 known lead goosenecks from its water distribution system by the year 2005. In 2018, we completed an inventory of its remaining unknown utility-owned services lines—none consisted of lead material.

LADWP conducted LCR residential sampling in 2020. During the sampling program, 100 first draw samples were obtained from customers' homes and analyzed at LADWP's water quality laboratory. The results showed a 90th percentile of 5.0 parts per billion (ppb) for lead and 394 ppb for copper. Both values were well below the respective Action Levels of 15 ppb for lead and 1300 ppb for copper.

LCR Program Requirements

The LCR sampling program focuses on single family residences which were built within 1982 to 1987 that have copper pipes plumbed with lead solder. Customers with qualifying homes that participate in the sampling program will get their tap water tested for lead and copper at no cost.

If your home qualifies, you can participate in LADWP's next round of LCR sampling between June and September. Contact the Water Quality Hotline at (213) 367-3182 or by email at waterquality@ladwp.com.

Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is also available from the Safe Drinking Water Hotline: (800) 426-4791, or at www.epa.gov/lead

Assessment Programs for Surface and Groundwater Resources

Source water assessment updates are required by the SWRCB-DDW and must be included in the annual drinking water quality report. LADWP completed an initial source water assessment in 2002 and is required to provide an updated assessment every five years through a watershed sanitary survey. Watershed sanitary surveys examine possible contamination to sources of drinking water and recommend actions to better protect these water sources.

Below is an update of LADWP's source water assessment.

Surface Supply:
In 2020, LADWP completed an assessment of the Owens Valley and Mono Basin watersheds that supply the Los Angeles Aqueduct. These sources are most vulnerable to geothermal activities that release naturally occurring arsenic into creeks which feed the Owens River. Assessments were also completed for the Lower Stone Canyon Reservoir Watershed in 2019 and Encino Reservoir Watershed in 2020. Activities that impact water quality in these watersheds are livestock grazing, wildlife, and unauthorized public use of storage reservoirs. The impact to water quality from these activities is deemed to be minimal.

LADWP regularly monitors for cryptosporidium and giardia. Results indicate that their presence is infrequent and remain at very low levels in these watersheds.

Groundwater Supply:
Assessment of groundwater sources in the San Fernando Basin was updated in 2018. Assessment of groundwater sources in the Central and Sylmar Basins was completed in February 2019. Located in highly urbanized areas, the wells within these aquifers are most vulnerable to the following activities: dry cleaning, manufacturing, metal finishing, septic systems, chemical processing, and storage of fertilizer, pesticides, and chemicals. These local water supplies are treated and blended with water from other sources to ensure compliance with drinking water standards.

Purchased Imported Supplies from MWD:
The most recent surveys for MWD's source waters are the

Granular Activated Carbon vessels at North Hollywood West Remediation Project are helping us clean our local groundwater, providing a sustainable water supply as a viable alternative to costly, imported water.

Colorado River Watershed Sanitary Survey – 2020 Update, and the State Water Project Watershed Sanitary Survey – 2016 Update. Each source water used by MWD — the Colorado River and State Water Project — has different water quality challenges. Both are exposed to stormwater runoff, recreational activities, wastewater discharges, wildlife, fires and other watershed-related factors that could affect water quality. Treatment to remove specific contaminants can be more expensive than measures to protect water at the source. This is why MWD and other water agencies invest resources to support improved watershed protection programs.

Three of the five MWD treatment plants -- F.E. Weymouth, Robert B. Diemer, and Joseph Jensen -- supply water to the Los Angeles area. MWD tests its water for nearly 400 constituents and performs about 250,000 water quality tests per year on samples gathered from its vast distribution system. Analysis of these samples is undertaken at MWD's water quality laboratory. Results from MWD are provided to LADWP and are included in the report on Tables I, II and III.

Safeguarding our Surface Water

Administered by the SWRCB-DDW, the Surface Water Treatment Rule (SWTR) is a set of drinking water regulations that establish specific treatment requirements for surface water to reduce the risk of waterborne diseases.

The last update to the SWTR is the Long Term 2 Enhanced Surface Water Treatment Rule (LT2) which was put into effect in 2006. This rule protects treated water reservoirs from microbiological contamination by requiring one of three actions: 1) covering, 2) removing from service, or 3) providing additional treatment. LT2 applied to the six remaining uncovered reservoirs at the time: Los Angeles, Upper Stone Canyon, Santa Ynez, Ivanhoe, Silver Lake, and Elysian.

In March 2009, a compliance agreement for LT2 was executed between LADWP and SWRCB-DDW. The Los Angeles Reservoir is the only remaining reservoir awaiting completion of additional treatment.

Los Angeles Reservoir will remain in compliance with the LT2 through a combination of shade balls and construction of a new ultraviolet (UV) treatment plant. The "shading" of the reservoir was completed in 2015 with nearly 96 million shade balls deployed. The new UV treatment facility will disinfect water leaving the Los Angeles Reservoir to satisfy the LT2 water quality regulation. Construction began in June 2017 and will be completed July 2021.

Visit www.ladwp.com/waterquality to learn more about water quality projects and issues. For more information on the latest watershed sanitary surveys contact (213) 367-3182.

DRINKING WATER QUALITY MONITORING RESULTS

Tables I, II and III list the results of water tests performed by the LADWP and MWD from January to December 2020. LADWP tests for over 148 substances. These tables include only substances with values that are detected. No substance was detected above the maximum contaminant level.

Terms used in Tables:

Compliance: A drinking water standard based on the health risk (primary standards) and aesthetic (secondary standards) exposure of a contaminant to consumers. For example, bacteria and nitrate have strict limits that must be met at all times due to the acute effects they can cause. Other standards, like small amounts of disinfection by-products and man-made chemicals, have standards that are based on a lifetime of exposure because the risk to consumers is very low. Compliance with most standards is based on an average of samples collected within a year. This allows for some fluctuation above and below the numerical standard, while still protecting public health.

Detection Level for Reporting (DLR):
A detected contaminant at or above its detection level for reporting purposes. DLRs are set by the SWRCB-DDW. Data reported in Tables I through III reflect DLRs.

Federal Minimum Reporting Level (MRL): Minimum concentration of a contaminant which can be detected in drinking water using analytical methods established by the U.S. EPA. Data reported in Table IV reflect MRLs.

Maximum Contaminant Level (MCL): Highest level of a contaminant that is allowed in drinking water. Primary MCLs are set as close to the PHGs (or MCLGs) as is economically and technologically feasible. Secondary MCLs are set to protect the odor, taste, and appearance of drinking water.

Maximum Contaminant Level Goal (MCLG): Level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs are set by the U.S. EPA.

Maximum Residual Disinfectant Level (MRDL): Highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

Maximum Residual Disinfectant Level Goal (MRDLG): Level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the beneficial use of disinfectants to control microbial contaminants. MRDLGs are set by U.S. EPA.

Notification Level (NL): Health-based advisory level established by SWRCB-DDW for chemicals in drinking water that lack MCLs.

Primary Drinking Water Standard (PDWS): MCLs, MRDLs and treatment techniques (TTs) for contaminants that affect health, along with their monitoring and reporting requirements.

Public Health Goal (PHG): Level of a contaminant in drinking water below which there is no known or expected risk to health. PHGs are set by the California Environmental Protection Agency.

Regulatory Action Level (AL): Concentration of a contaminant which, if exceeded, triggers treatment or other requirements that a water system must follow.

Secondary Maximum Contaminant Level (SMCL): Highest level a constituent allowed in drinking water that may affect the taste, odor or appearance. SMCLs are set by the U.S. EPA.

Treatment Technique (TT): Required process intended to reduce the level of a contaminant in drinking water. For example, the filtration process is a treatment technique used to reduce turbidity (cloudiness in water) and microbial contaminants from surface water. High turbidities may be indicative of poor or inadequate filtration.

Microbiologists testing water samples at LADWP's state-of-the-art water quality lab

HOW TO READ THE TABLES

The substances found in the water served in your area are listed as follows:

- For San Fernando Valley Area – water test results are under the Los Angeles Aqueduct Filtration Plant (LAAFP), the Northern Combined Wells (NCW), and the Metropolitan Water District (MWD) Jensen Plant columns.
- For Central Los Angeles Area – water test results are under the LAAFP and the Southern Combined Wells (SCW) columns.
- For Western Los Angeles Area – water test results are under the LAAFP columns.
- For Harbor/Eastern Los Angeles Area – water test results are under MWD Weymouth, Diemer, and Jensen Plants columns.

Some substances are reported on a citywide basis as required by SWRCB-DDW.

Abbreviations and Footnotes

ACU = apparent color unit

CFU/mL = colony-forming unit per milliliter

< = less than the detection limit for reporting purposes

µg/L = micrograms per liter (equivalent to ppb)

µS/cm = microsiemens per centimeter

mg/L = milligrams per liter (equivalent to ppm)

NTU = nephelometric turbidity units

NA = not applicable

NR = not reported

NT = not tested

NUM/100 mL = number per 100 milliliter

% = percentage

pCi/L = picocuries per liter

TON = threshold odor number

TABLE I

Calendar Year 2020 Water Quality Monitoring Results

Health-based Primary Drinking Water Standards (MCLs)
Substances Detected in Treated Water

Substances	Major Sources in Drinking Water	Units	Meets Primary Standard (YES / NO)	State Primary Standard MCL	State PHG	"Los Angeles Aqueduct Filtration Plant"		"Northern Combined Wells"		"Southern Combined Wells"		"MWD Weymouth Plant"		"MWD Diemer Plant"		"MWD Jensen Plant"	
						Average	Range	Average	Range	Average	Range	Average	Range	Average	Range	Average	Range
Aluminum	Erosion of natural deposits; residue from surface water treatment processes	µg/L	YES	1000	600	<50	<50	<50	<50	<50	<50 - 91	149 (a)	80 - 210	137 (a)	<50 - 260	116 (a)	<50 - 220

Total Organic Carbon (TOC)	Erosion of natural deposits	mg/L	YES	TT	none	1.6	1.5 - 1.7	1.3	1.1 - 1.6	1.3	0.3 - 2.2	2.4	2.1 - 2.6	2.4	2.2 - 2.7	2.2	1.8 - 2.3
Total Zylenes	Discharge from petroleum and chemical refineries; fuel solvent	µg/L	YES	1750	1800	<0.5	<0.5	<0.5	<0.5	<0.5	<0.5 - 0.6	<0.5	<0.5	<0.5	<0.5	<0.5	<0.5
Trichloroethylene (TCE)	Discharge from metal degreasing sites and other factories	µg/L	YES	5	1.7	<0.5	<0.5	<0.5	<0.5 - 1.2	<0.5	<0.5 - 1.5	<0.5	<0.5	<0.5	<0.5	<0.5	<0.5
Turbidity (c)	Soil runoff	NTU	YES	TT = 1	none	0.108	NA	NA	NA	NA	NA	.04	NA	0.04	NA	0.04	NA
		%		TT = 95% of samples ≤0.3 NTU		100						100		100		100	
Uranium (d)	Erosion of natural deposits	pCi/L	YES	20	0.43	2.9	2.5 - 3.6	2.7	2.1 - 3.5	2.7	2.1 - 6.2	2	1 - 3	2	1 - 3	<1	<1 - 3

(a) Values reflect Highest Running Annual Average (HRAA). HRAA is the highest of all Running Annual Averages (RAAs) in the reported calendar year. RAA is a calculated average of all samples collected within the previous 12-month period, which may include test data from the previous calendar year. HRAA may be higher than the range, which is based on the test data in the reported calendar year.

(b) Bromate is formed in water treated with ozone in the presence of bromide. Bromate has also been found in water treated with chlorine in some uncovered reservoirs in LADWP that have elevated bromide levels and are exposed to sunlight. MWD tests for bromate at its Diemer and Jensen Filtration Plants, which use ozone. Weymouth Plant has tested for bromate for less than 12-month period and so RAA is not calculated. All LADWP distribution reservoirs are now shielded with flexible covers or shade balls to minimize bromate formation.

(c) Turbidity is a measure of the cloudiness of water and is a good indicator of water quality and filtration performance. High turbidity can hinder the effectiveness of disinfectants. The Primary Drinking Water Standard for turbidity (included in this table) at water filtration plants is less than or equal to 0.3 NTU in at least 95 percent of the measurements taken in any month and shall not exceed 1.0 NTU at any time. The reporting requirement for treatment plant turbidity is to report the highest single measurement in the calendar year as well as the lowest monthly percentage of measurements that are less than or equal to 0.3 NTU.

(d) Radiological monitoring is performed in cycles of various frequencies in LADWP for treated sources water and at the blend points. Monitoring for Gross Alpha Particle Activity is performed in six year cycle and was conducted in 2016. Monitoring of Combined Radium-226 and Radium-228 is performed in three year cycle and was conducted in 2019. Monitoring of Gross Beta Particle Activity, Strontium-90, Tritium and Uranium is performed annually. MWD conducted all radiological monitoring in 2020.

TABLE I (CONT'D)

Calendar Year 2020 Water Quality Monitoring Results

Health-based Primary Drinking Water Standards (MCLs)
Substances Detected in Treated Water and Reported on Citywide Basis

Substances	Major Sources in Drinking Water	Units	Meets Primary Standard (YES/NO)	State Primary Standard MCL or (MRDL)	State PHG / (MRDLG)	Average	Range
Bromate (uncovered reservoirs)	Byproduct of ozone disinfection; formed under sunlight for chlorinated water	µg/L	YES	10	0.1	HRAA = <1 (a)	Range = <1
Chlorine Residual, Total	Drinking water disinfectant added for treatment	mg/L	YES	(4)	(4)	HRAA = 1.9 (a)	Range = 1.8 – 2.0
Copper (at-the-tap) Action LeveL = 1300 (e)	Internal corrosion of household water plumbing systems	µg/L	YES	TT	300	90th Percentile value = 394	"Number of samples exceeding AL = 0 out of 100"
Fluoride	Erosion of natural deposits; water additive that promotes good dental health	mg/L	YES	2	1	Average = 0.7	Range = 0.7 - 0.9
Haloacetic Acids (Five) (HAA5)	Byproduct of drinking water disinfection	µg/L	YES	60	none	HLRAA = 11 (f)	Range = 3 – 12
Lead (at-the-tap) Action Level = 15 (e)	Internal corrosion of household water plumbing systems	µg/L	YES	TT	0.2	90th Percentile value = 5.0	"Number of samples exceeding AL = 1 out of 100"
Total Coliform Bacteria	Naturally present in the environment	% Positives	YES	≤5% of monthly samples are coliform positive	0	Highest monthly % positive samples = 0.7%	Range = % positive samples 0% – 0.7%
Total Trihalomethanes (TTHM)	Byproduct of drinking water disinfection	µg/L	YES	80	none	HLRAA = 27 (f)	Range = 7 - 29

(a) Values reflect Highest Running Annual Average (HRAA). HRAA is the highest of all Running Annual Averages (RAAs) in the reported calendar year. RAA is a calculated average of all samples collected within the previous 12-month period, which may include test data from the previous calendar year. HRAA may be higher than the range, which is based on the test data in the reported calendar year.

(e) At-the-tap monitoring of lead and copper is conducted as required by the federal Lead and Copper Rule. A system is out of compliance if the federal Action Level is exceeded in more than 10 percent of all samples collected at the customers' tap. The most recent monitoring was conducted in 2020. Although the City's treated water has little or no detectable lead, studies were conducted and corrosion control implementation started. A corrosion control study was completed in 2019 which found that LADWP's corrosion control treatment is optimized and that it does not require the continued addition of a corrosion inhibitor.

(f) The federal Stage 2 Disinfectants/Disinfection Byproducts Rule (Stage 2 D/DBPR) requires compliance monitoring and reporting for total trihalomethanes (TTHM) and five haloacetic acids (HAA5) based on Locational Running Annual Averages (LRAAs) of established monitoring locations. The Highest Locational Running Annual Averages (HLRAAs) of all LRAAs in the current calendar year for TTHM and HAA5 are reported.

TABLE II

Calendar Year 2020 Water Quality Monitoring Results

Aesthetic-based Secondary Drinking Water Standards (SMCLs)
Substances Detected in Treated Water

Substances	Major Sources in Drinking Water	Units	Meets Secondary Standard (YES/NO)	State SMCL or Federal (SMCL)	"Los Angeles Aqueduct Filtration Plant"		"Northern Combined Wells"		"Southern Combined Wells"		"MWD Weymouth Plant"		"MWD Diemer Plant"		"MWD Jensen Plant"	
					Average	Range	Average	Range	Average	Range	Average	Range	Average	Range	Average	Range
Aluminum	Erosion of natural deposits; residue from some surface water treatment processes	µg/L	YES	200	<50	<50	<50	<50	<50	<50 - 91	149 (a)	80 - 210	137 (a)	<50 - 260	116 (a)	<50 - 220

Color, Apparent (unfiltered)	Naturally-occurring organic materials	ACU	YES	15	4	3 - 4	4	3 - 4	4	<3 - 5	1	1	1	1	2	1 - 3
Iron	Discharge from steel/ metal, plastic, and fertilizer factories	µg/L	YES	300	<20	<20	<20	<20	<20	<20 - 41.5	<20	<20	<20	<20	<20	<20
Odor	Naturally-occurring organic materials	TON	YES	3	<1	<1	<1	<1	<1	<1	2	2	2	2	2	2
pH	Naturally-occurring dissolved gases and minerals	Unit	YES	6.5 - 8.5	7.7	7.0 - 8.5	7.9	6.9 - 8.7	7.9	7.0 - 8.7	8.1	8.1	8.1	8.1	8.4	8.4
Specific Conductance	Substances that form ions when in water; seawater influence	µS/cm	YES	1600	357	270 - 750	535	290 - 780	535	300 - 780	966	963 - 968	970	964 - 975	460	451 - 468
Sulfate (as SO4)	Runoff / leaching from natural deposits	mg/L	YES	500	34	30 - 42	48	39 - 69	48	39 - 204	213	211 - 215	216	215 - 217	54	53 - 56
Total Dissolved Solids (TDS)	Runoff / leaching from natural deposits	mg/L	YES	1000	215	205 - 234	288	220 - 412	288	220 - 572	590	587 - 593	592	582 - 603	260	255 - 264
Turbidity (g)	Soil runoff	NTU	YES	5	<0.1	<0.1 - 0.1	0.1	<0.1 - 0.3	0.1	<0.1 - 0.3	<0.1	<0.1	<0.1	<0.1	<0.1	<0.1
Zinc	Runoff / leaching from natural deposits; industrial waste	µg/L	YES	5000	<50	<50	<50	<50	<50	<50	<50	<50	<50	<50	<50	<50

(a) Values reflect Highest Running Annual Average (HRAA). HRAA is the highest of all Running Annual Averages (RAAs) in the reported calendar year. RAA is a calculated average of all samples collected within the previous 12-month period, which may include test data from the previous calendar year. Hence, HRAA may be higher than the range, which is based on the test data in the reported calendar year.

(g) The Secondary Maximum Contaminant Level for turbidity of treated water in the distribution system is 5 NTU at the entry points to the distribution system.

Unregulated Contaminant Monitoring Rule

The Unregulated Contaminant Monitoring Rule (UCMR) is a special program developed by the U.S. EPA that requires public water systems to monitor up to 30 selected contaminants of emerging concerns (CECs) once every five years.

During the fourth UCMR (UCMR4), LADWP monitored 29 unregulated contaminants. The contaminants monitored were total microcystins, microcystin-LA, microcystin-LF, microcystin-L, microcystin-LY, microcystin-RR, microcystin-YR, nodularin, anatoxin-a, cylindrospermopsin, germanium, manganese, alpha-hexachlorocyclohexane, chlorpyrifos, dimethipin, ethoprop, profenofos, tebuconazole, total permethrin (cis- & trans-), tribufos, oxyfluorfen, HAA5, HAA6Br, HAA9,1-butanol, 2-methoxyethanol, 2-propen-1-ol, butylated hydroxyanisole, o-toluidine and quinolone.

Most of the contaminants were not detected. Table IV below provides the contaminants that were detected during UCMR4. Contaminants that were detected were lower than the MCLs. Algal bloom and cyanotoxin were monitored at the source locations for each sampling event, and were not detected.

TABLE IV

Calendar Year 2020 Water Quality Monitoring Results

The Fourth U.S. EPA Unregulated Contaminant Monitoring Rule (UCMR4) Substances Detected In Treated Water

Substances	Units	Meets MCL or NL (YES / NO)	State Primary Standard MCL or (NL)	State PHG or Federal (MCLG)	San Fernando Valley				Central LA		Western LA		Harbor/Eastern LA	
					Los Angeles Aqueduct Filtration Plant		Northern Combined Wells		Southern Combined Wells		Los Angeles Aqueduct Filtration plant		Distribution System Sampling Locations	
					Average	Range	Average	Range	Average	Range	Average	Range	Average	Range
Bromide	mg/L	NA	NA	NA	0.06	0.04 - 0.09	0.07	0.03 - 0.11	0.07	0.03 - 0.2	0.06	0.04 - 0.09	NT	NT
Manganese NL = 500	µg/L	YES	(500)	NA	<0.4	<0.4 - 0.45	0.76	0.55 - 0.87	0.76	0.70 - 0.82	<0.4	<0.4 - 0.45	1.34	0.60 - 1.86
Total Organic Carbon (TOC)	mg/L	NA	NA	NA	1.6	1.5 - 1.7	1.3	1.1 - 1.6	1.3	0.3 - 2.2	1.6	1.5 - 1.7	7	4.4 - 12.8
HAA5	µg/L	YES	60	NA	3.3 (h)	1.9 - 4.4 (h)	3.3 (h)	1.9 - 4.4 (h)	3.6 (h)	2.7 - 5.0 (h)	4.0 (h)	2.7 - 7.4 (h)	6.0 (h)	5.3 - 7.0 (h)
HAABr6	µg/L	NA	NA	NA	2.1 (h)	1.0 - 3.7 (h)	2.1 (h)	1.0 - 3.7 (h)	2.7 (h)	2.2 - 3.8 (h)	2.6 (h)	1.5 - 4.6 (h)	3.7 (h)	3.3 - 4.3 (h)
HAA9	µg/L	NA	NA	NA	1.5 (h)	0.8 - 2.9 (h)	1.5 (h)	0.8 - 2.9 (h)	1.6 (h)	1.1 - 2.4 (h)	1.8 (h)	1.2 - 3.7 (h)	3.3 (h)	2.8 - 4.3 (h)

(h) For UCMR4 sampling, LADWP used the same established sampling locations as used for the Stage 2 Disinfectants/Disinfection By-Products Rule compliance monitoring. HAA5, HAABr6 and HAA9 were based on locational averages. These sample points are located throughout LADWP's distribution system. Data has been grouped by geographical area for the HAA results.

General Information

This annual Drinking Water Quality Report (also known as a Consumer Confidence Report) is required by the California State Water Resources Control Board, Division of Drinking Water (SWRCB-DDW) and is prepared in accordance with their guidelines. The report is available online at www.ladwp.com/waterqualityreport. Copies may be requested by calling (213) 367-3182.

LADWP, the largest municipal utility in the nation, was established more than 100 years ago and provides a safe, reliable water and power supply to the city's more than 4 million residents and businesses. LADWP is governed by a five-member Board of Water and Power Commissioners, appointed by the Mayor and confirmed by the City Council. The Board meets regularly on the second and fourth Tuesdays of each month at 10:00 a.m.

Meetings are held at:

Los Angeles Department of Water and Power
111 North Hope Street, Room 1555H
Los Angeles, CA 90012-2694

The meeting agenda is available to the public on the Thursday prior to the week of the meeting. You can access the Board agenda and view the meetings live online at www.ladwp.com/board or by calling (213) 367-1351.

For general information about LADWP, call (800) 342-5397 or visit www.ladwp.com.

For questions regarding this report, please call the Water Quality Hotline at (213) 367-3182.

THIS MESSAGE IS FOR NON-ENGLISH SPEAKING LADWP CUSTOMERS

116 North Poplar Avenue, Montebello, CA 90640

In response to the above referenced application for a policy of title insurance, OLD REPUBLIC TITLE COMPANY, as issuing Agent of Old Republic National Title Insurance Company, hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a Policy or Policies of Title Insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an Exception below or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations of said policy forms.

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said Policy or Policies are set forth in Exhibit I attached. The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. Limitations on Covered Risks applicable to the Homeowner's Policy of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Exhibit I. Copies of the Policy forms should be read. They are available from the office which issued this report.

Please read the exceptions shown or referred to below and the exceptions and exclusions set forth in Exhibit I of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.
It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects, and encumbrances affecting title to the land.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

Dated as of September 24, 2021, at 7:30 AM

OLD REPUBLIC TITLE COMPANY
For Exceptions Shown or Referred to, See Attached

The form of policy of title insurance contemplated by this report is:

ALTA Loan Policy - 2006. A specific request should be made if another form or additional coverage is desired.

The estate or interest in the land hereinafter described or referred or covered by this Report is:

Fee

Title to said estate or interest at the date hereof is vested in:

Magna & Magna, Inc., a California corporation

The land referred to in this Report is situated in the County of Los Angeles, City of Montebello, State of California, and is described as follows:

THAT PORTION OF LOT "B" OF MONTEBELLO, IN THE CITY OF MONTEBELLO, AS PER MAP RECORDED IN BOOK 78 PAGE 19 OF MISCELLANEOUS RECORDS, IN THE OFFICE OF THE COUNTY RECORDER OF SAID COUNTY, DESCRIBED AS FOLLOWS:

BEGINNING AT THE SOUTHWEST CORNER OF LOT 102 OF SAID MONTEBELLO, THENCE SOUTH 75° 53' 40" EAST ALONG THE SOUTHERLY LINE OF SAID LOT 102, 300 00 FEET, THENCE SOUTHWESTERLY 277 94 FEET, MORE OR LESS, TO THE NORTHEAST CORNER OF THE LAND CONVEYED TO W. W. BLACK, BY DEED RECORDED IN BOOK 6621 PAGE 288 OF DEEDS, THENCE NORTHWESTERLY ALONG THE NORTHERLY LINE THEREOF, AND PARALLEL WITH THE NORTHERLY LINE OF WHITTIER AVENUE 102.68 FEET TO THE WESTERLY LINE OF SAID LOT "B" BEING ALSO THE EASTERLY LINE OF POPLAR AVENUE, THENCE NORTHEASTERLY 169 70 FEET TO THE POINT OF BEGINNING.

EXCEPT THEREFROM THAT PORTION LYING SOUTHEASTERLY OF THE FOLLOWING:

DESCRIBED LINE BEGINNING AT SAID NORTHEAST CORNER OF THE LAND CONVEYED TO SAID W. W. BLACK, THENCE NORTH 50° 22" 02" EAST 1 87 FEET, THENCE NORTH 56° 48' 03" EAST 45.04 FEET, THENCE NORTH 50° 37' 43" EAST 19710 FEET TO THE SOUTHERLY LINE OF SAID LOT 102 DISTANT THEREON SOUTH 75° 53' 40" EAST 148.96 FEET FROM THE INTERSECTION OF SAID SOUTHERLY LINE WITH THE EASTERLY LINE OF A STRIP OF LAND OF UNIFORM DEPTH OF 100 00 FEET, EXTENDING ALONG THE EAST LINE OF POPLAR AVENUE FROM THE NORTH LINE OF WHITTIER AVENUE (NOW WHITTIER BOULEVARD) TO SAID LOT 102. AS DESCRIBED IN THE DEED RECORDED IN BOOK 2720 PAGE 129 OF DEEDS.

EXCEPT ALL OIL, GAS, MINERALS AND OTHER HYDROCARBON SUBSTANCES LYING BELOW A DEPTH OF 500 FEET OR MORE FROM THE SURFACE OF THE FOLLOWING DESCRIBED LAND, BUT WITHOUT THE RIGHT TO ENTER AND USE THE SURFACE OR THE SUBSURFACE LYING ABOVE A DEPTH OF 500 FEET FROM THE SURFACE THEREOF. AS GRANTED TO FAR WEST OIL CO, A LIMITED PARTNERSHIP. BY DEED RECORDED AUGUST 16, 1971 AS INSTRUMENT NO. 3238.

At the date hereof exceptions to coverage in addition to the Exceptions and Exclusions in said policy form would be as follows:

1. Taxes and assessments, general and special, for the fiscal year 2021 - 2022, as follows:

Assessor's Parcel No	:	6347-012-008	
Code No.	:	06330	
1st Installment	:	$8,210.80	NOT Marked Paid
2nd Installment	:	$8,210.79	NOT Marked Paid
Land Value	:	$97,364.00	
Imp. Value	:	$717,353.00	

2. The lien of supplemental taxes, if any, assessed pursuant to the provisions of Section 75, et seq., of the Revenue and Taxation Code of the State of California.

3. Water rights, claims or title to water, whether or not shown by the public records.

4. An easement affecting that portion of said land and for the purposes stated herein and incidental purposes as provided in the following

Granted To	:	Francis M. Dyke and wife
For	:	pipes for conducting water for irrigation
Recorded	:	in Book 2720 of Deeds, Page 129
Affects	:	As described therein

5. The right to conduct water in pipes or ditches from the place of development to any reservoir or other lands owned by Kaspare Cohn, his heirs or assigns, as contained in the deed from Kaspare Cohn and wife, recorded in Book 2507, Page 98 of Deeds.

6. Covenants, conditions and restrictions, but omitting any covenants or restrictions if any, based on race, color, religion, sex, handicap, familial status or national origin unless and only to the extent that said covenant (A) is exempt under Chapter 42, Section 3607 of the United States code or (B) relates to handicap but does not discriminate against handicapped persons, in the instrument above mentioned.

NOTE: "If this document contains any restriction based on race, color, religion, sex, gender, gender identity, gender expression, sexual orientation, familial status, marital status, disability, veteran or military status, genetic information, national origin, source of income as defined in subdivision (p) of Section 12955, or ancestry, that restriction violates state and federal fair housing laws and is void, and may be removed pursuant to Section 12956.2 of the Government Code. Lawful restrictions under state and federal law on the age of occupants in senior housing or housing for older persons shall not be construed as restrictions based on familial status."

7. An easement affecting that portion of said land and for the purposes stated herein and incidental purposes as provided in the following

Granted To	:	The Standard Oil Company
For	:	transportation of all oil, petroleum, gas or water for the erection maintenance and operation of telegraph or telephone pole lines
Recorded	:	in Book 6568 of Deeds, Page 107
Affects	:	As described therein

And recorded in Book 6557 of Deeds, Page 340 .

8. An easement affecting that portion of said land and for the purposes stated herein and incidental purposes as provided in the following

For	:	waterline
Recorded	:	April 1, 1974 in Official Records As Instrument No. 4296
Affects	:	As described therein

9. An easement affecting that portion of said land and for the purposes stated herein and incidental purposes as provided in the following

Granted To	:	Standard Oil Company of California, a Corporation and Standard Gasoline Company, a Corporation
For	:	pipe lines
Recorded	:	May 23, 1962 in Book D-1624 of Official Records, Page 757 As Instrument No. 4832
Affects	:	As described therein

10. An easement affecting that portion of said land and for the purposes stated herein and incidental purposes as provided in the following

Granted To	:	Joseph A. Magna and Hedy A. Magna
For	:	waterline
Recorded	:	December 29, 1987 in Official Records As Instrument No. 87-2043659
Affects	:	As described therein

11. An unrecorded lease upon the terms, covenants, and conditions contained or referred to therein,

Lessor	:	Magna & Magna Incorporated
Lessee	:	Web Service Company, Inc.
Disclosed by	:	Memorandum of Lease
Recorded	:	February 28, 2000 in Official Records As Instrument No. 00-0292848

NOTE: The present ownership of said leasehold or leaseholds and other matters affecting the interest of the lessee or lessees are not shown herein.

12. Deed of Trust to secure an indebtedness of the amount stated below and any other amounts payable under the terms thereof,

Amount	:	$2,000,000.00
Trustor/Borrower	:	Magna & Magna, Inc., a California corporation
Trustee	:	First Mortgage Solutions
Beneficiary/Lender	:	KeyPoint Credit Union
Dated	:	June 5, 2020
Recorded	:	June 12, 2020 in Official Records As Instrument No. 20200644152
Loan No.	:	528207380

In Connection therewith, said trustors executed an Assignment of Rents,

Dated	:	June 5, 2020
Recorded	:	June 12, 2020 in Official Records As Instrument No. 20200644153

Covenants, conditions and restrictions contained in an instrument, which instrument is additional security for said deed of trust.

Entitled	:	Hazardous Substances Certificate and Indemnity Agreement
Executed By	:	Magna & Magna, Inc., a California corporation, Joseph A. MAGNA Living trust, DTD 01-13-15 and KeyPoint Credit Union
Recorded	:	June 12, 2020 in Official Records As Instrument No. 20200644154

Upon the recordation of a full reconveyance of said deed of trust, the covenants, conditions and restrictions will have no further force or effect.

13. Any unrecorded and subsisting leases.

14. Satisfactory evidence furnished to this Company:

(a) as to the due formation and continued existence of Magna & Magna, Inc., a California corporation as a legal entity under the laws of California; and

(b) documents from its board of directors authorizing this transaction and specifying the officers to execute on behalf of the corporation.

15. The requirement that this Company be provided with an opportunity to inspect the land (the Company reserves the right to make additional exceptions and/or requirements upon completion of its inspection).

16. Underwriting approval is required prior to our acceptance of instructions, recording of instruments and issuance of a title insurance policy or other product. If the application is approved, this report may be amended; additional exceptions from coverage may be shown, and additional conditions or requirements may be made.

---------- Informational Notes ----------

A. The applicable rate(s) for the policy(s) being offered by this report or commitment appears to be section(s) 4.2.

B. The above numbered report (including any supplements or amendments thereto) is hereby modified and/or supplemented to reflect the following additional items relating to the issuance of an American Land Title Association loan form policy:

NONE

NOTE: Our investigation has been completed and there is located on said land a multi-family residence known as 116 North Poplar Avenue, City of Montebello, California.

The ALTA loan policy, when issued, will contain the CLTA 100 Endorsement and 116 series Endorsement.

Unless shown elsewhere in the body of this report, there appear of record no transfers or agreements to transfer the land described herein within the last three years prior to the date hereof, except as follows:

NONE

Exhibit I

AMERICAN LAND TITLE ASSOCIATION LOAN POLICY OF TITLE INSURANCE (06/17/06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection; or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13, or 14); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   (a) a fraudulent conveyance or fraudulent transfer, or
   (b) a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

SCHEDULE B - PART I

Except as provided in Schedule B - Part II, this policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material unless such lien is shown by the Public Records at Date of Policy.

OLD REPUBLIC TITLE

FACTS	WHAT DOES OLD REPUBLIC TITLE DO WITH YOUR PERSONAL INFORMATION?

Why?	Financial companies choose how they share your personal information. Federal law gives consumers the right to limit some but not all sharing. Federal law also requires us to tell you how we collect, share, and protect your personal information. Please read this notice carefully to understand what we do.
What?	The types of personal information we collect and share depend on the product or service you have with us. This information can include: • Social Security number and employment information • Mortgage rates and payments and account balances • Checking account information and wire transfer instructions When you are no longer our customer, we continue to share your information as described in this notice.
How?	All financial companies need to share customers' personal information to run their everyday business. In the section below, we list the reasons financial companies can share their customers' personal information; the reasons Old Republic Title chooses to share; and whether you can limit this sharing.

Reasons we can share your personal information	Does Old Republic Title share?	Can you limit this sharing?
For our everyday business purposes — such as to process your transactions, maintain your account(s), or respond to court orders and legal investigations, or report to credit bureaus	**Yes**	**No**
For our marketing purposes — to offer our products and services to you	**No**	**We don't share**
For joint marketing with other financial companies	**No**	**We don't share**
For our affiliates' everyday business purposes — information about your transactions and experiences	**Yes**	**No**
For our affiliates' everyday business purposes — information about your creditworthiness	**No**	**We don't share**
For our affiliates to market to you	**No**	**We don't share**
For non-affiliates to market to you	**No**	**We don't share**

	Go to www.oldrepublictitle.com (Contact Us)

Who we are	
Who is providing this notice?	Companies with an Old Republic Title name and other affiliates. Please see below for a list of affiliates.

What we do	
How does Old Republic Title protect my personal information?	To protect your personal information from unauthorized access and use, we use security measures that comply with federal law. These measures include computer safeguards and secured files and buildings. For more information, visit https://www.oldrepublictitle.com/privacy-policy
How does Old Republic Title collect my personal information?	We collect your personal information, for example, when you: • Give us your contact information or show your driver's license • Show your government-issued ID or provide your mortgage information • Make a wire transfer We also collect your personal information from others, such as credit bureaus, affiliates, or other companies.
Why can't I limit all sharing?	Federal law gives you the right to limit only: • Sharing for affiliates' everyday business purposes - information about your creditworthiness • Affiliates from using your information to market to you • Sharing for non-affiliates to market to you State laws and individual companies may give you additional rights to limit sharing. See the State Privacy Rights section location at https://www.oldrepublictitle.com/privacy-policy for your rights under state law.

Definitions	
Affiliates	Companies related by common ownership or control. They can be financial and nonfinancial companies. • Our affiliates include companies with an Old Republic Title name, and financial companies such as Attorneys' Title Fund Services, LLC, Lex Terrae National Title Services, Inc., Mississippi Valley Title Services Company, and The Title Company of North Carolina.
Non-affiliates	Companies not related by common ownership or control. They can be financial and non-financial companies. • Old Republic Title does not share with non-affiliates so they can market to you
Joint marketing	A formal agreement between non-affiliated financial companies that together market financial products or services to you. • Old Republic Title doesn't jointly market.

Privacy Notice for California Consumers

This Privacy Notice for California Consumers supplements the information contained in the Master Privacy Notice for Old Republic Title and applies to consumers that reside in the State of California. The terms used in this Privacy Notice have the same meaning as the terms defined in the California Consumer Privacy Act ("CCPA").

What Personal Information We Collect

In accordance with the CCPA, personal information is information that identifies, relates to, describes, is capable of being associated with, or could reasonably be linked, directly or indirectly, with a particular consumer or household. Personal information does not include:
Information outside the scope of the CCPA such as:

- Health or medical information covered by the Health Insurance Portability Act of 1996 (HIPAA) and the California Confidentiality of Medical Information Act (CMIA).
- Personal Information covered by the Gramm-Leach-Bliley Act (GLBA), the Fair Credit Reporting Act (FCRA), the California Financial Information Privacy Act (FIPA), and the Driver's Privacy Protection Act of 1994,
- Publicly available information that is available from federal, state, or local government records, and
- De-identified or aggregated consumer information.

Please see the chart below to learn what categories of personal information we may have collected about California consumers within the preceding twelve months, the sources of and business purposes for that collection and the third parties with whom the information is shared, if any.

Category	**Examples**	**Collected**	**Sources**	**Business Purpose for Collection**	**Categories of Third Parties with Whom Information is Shared**
Identifiers	Real name, alias, postal address, unique personal identifier, online identifier, Internet protocol address, email address, account name, social security number, driver's license number, passport number or other similar identifiers	Yes	Consumers, Lenders, Brokers, Attorneys, Real Estate Agents, and Title Agents associated with the transaction	Underwriting or providing other products or services, responding to policyholder/consumer claims, inquiries or complaints, detecting security incidents, protecting against malicious,	Service providers associated with the transaction for a business purpose

				deceptive, fraudulent, or illegal activity. Other audit or operational purposes.	
Personal information described in California Customer Records statute (Cal. Civ. Code § 1798.80(e))	Name, signature, social security number, physical characteristics or description, address, telephone number, passport number, driver's license or state identification card number, insurance policy number, education, employment, employment history, bank account number, credit card number, debit card number, or any other financial information, medical information, or health insurance information. "Personal information" does not include publicly available information that is lawfully made available to the general public from federal, state, or local government records.	Yes	Consumers, Lenders, Brokers, Attorneys, Real Estate Agents, and Title Agents associated with the transaction	Underwriting or providing other products or services, responding to policyholder/consumer claims, inquiries or complaints, detecting security incidents, protecting against malicious, deceptive, fraudulent, or illegal activity. Other audit or operational purposes.	Service providers associated with the transaction for a business purpose
Characteristics of protected classifications under California or federal law	Age (40 years or older), race, color, ancestry, national origin, citizenship, religions or creed, marital status, medical condition, physical or mental disability, sex (including gender, gender identity, gender expression, pregnancy or childbirth and related	Yes	Consumers, Lenders, Brokers, Attorneys, Real Estate Agents, and Title Agents associated with the transaction	Underwriting or providing other products or services, responding to policyholder/consumer claims, inquiries or complaints. Other audit or operational purposes.	Service providers associated with the transaction for a business purpose

	medical conditions), sexual orientation, veteran or military status, or genetic information (including familial genetic information).				
Internet or other electronic network activity	Browsing history, search history, information about a consumer's interaction with a website, application, or advertisement.	Yes	Consumers, Lenders, Brokers, Attorneys, Real Estate Agents, and Title Agents associated with the transaction	To provide access to certain online services. To understand the interests of visitors to our online services, to support certain features of our site, for navigation and to display certain features more effectively. Detecting security incidents, protecting against malicious, deceptive, fraudulent, or illegal activity. Other audit or operational purposes.	Not Disclosed
Geolocation data	Geographic tracking data, physical location and movements	Yes	Consumers, Lenders, Brokers, Attorneys, Real Estate Agents, and Title Agents associated with the transaction	To provide access to certain online services. To understand the interests of visitors to our online services, to support certain features of our site, for navigation and to display certain features more effectively. Other audit or operational purposes.	Not Disclosed

What Personal Information We Share and Why We Share It

The CCPA requires us to tell you what categories of personal information we "sell" or "disclose." We do not sell and will not sell your personal information as that term is commonly understood. We also do not sell and will not sell your personal information, including the personal information of persons under 16 years of age, as that term is defined by the CCPA. When it is necessary for a business purpose, we share or disclose your personal information with a service provider, and we enter a contract with the service provider that limits how the information may be used and requires the service provider to protect the confidentiality of the information.

In the preceding twelve months, we have disclosed the following categories of personal information for the following business purposes. Where the personal information is shared with third parties, as that term is defined in the CCPA, the category of the third party is indicated.

Category	**Examples**	**Business Purpose for Disclosure**	**Categories of Third Parties with Whom Information is Shared**
Identifiers	Real name, alias, postal address, unique personal identifier, online identifier, internet protocol address, email address, account name, social security number, driver's license number, passport number or other similar identifiers	Underwriting or providing other products or services, responding to policyholder/consumer claims, inquiries or complaints, detecting security incidents, protecting against malicious, deceptive, fraudulent, or illegal activity. Other audit or operational purposes.	Service providers associated with the transaction for a business purpose
Personal information described in California Customer Records statute (Cal. Civ. Code § 1798.80(e))	Name, signature, social security number, physical characteristics or description, address, telephone number, passport number, driver's license or state identification card number, insurance policy number, education, employment, employment history, bank account number, credit card number, debit card number, or any other financial information, medical information, or health insurance information. "Personal information" does not include publicly available information that is lawfully made available to the general public from federal, state, or local government records.	Underwriting or providing other products or services, responding to policyholder/consumer claims, inquiries or complaints, detecting security incidents, protecting against malicious, deceptive, fraudulent, or illegal activity. Other audit or operational purposes.	Service providers associated with the transaction for a business purpose

2

Characteristics of protected classifications under California or federal law	Age (40 years or older), race, color, ancestry, national origin, citizenship, religions or creed, marital status, medical condition, physical or mental disability, sex (including gender, gender identity, gender expression, pregnancy or childbirth and related medical conditions), sexual orientation, veteran or military status, or genetic information (including familial genetic information).	Underwriting or providing other products or services, responding to policyholder/consumer claims, inquiries or complaints. Other audit or operational purposes.	Service providers associated with the transaction for a business purpose
Internet or other electronic network activity	Browsing history, search history, information about a consumer's interaction with a website, application, or advertisement.	To provide access to certain online services. To understand the interests of visitors to our online services, to support certain features of our site, for navigation and to display certain features more effectively. Detecting security incidents, protecting against malicious, deceptive, fraudulent, or illegal activity. Other audit or operational purposes.	Not Disclosed
Geolocation data	Geographic tracking data, physical location and movements	To provide access to certain online services. To understand the interests of visitors to our online services, to support certain features of our site, for navigation and to display certain features more effectively. Other audit or operational purposes.	Not Disclosed

We may also transfer to a third party the personal information of a consumer as an asset that is part of a merger, acquisition, bankruptcy, or other transaction in which the third party assumes control of all or part of the business.

Your Rights and Choices

The CCPA provides California consumers with certain rights regarding their personal information. This chart describes those rights and certain limitations to those rights.

Right	What This Means
Notice	At or before the time your personal information is collected, you will be given written notice of the categories of personal information to be collected and the purposes for which the categories of personal information will be used.
Access	At your verifiable request, but no more than twice in a twelve month period, we shall disclose to you: 1) the categories of personal information we have collected about you, 2) the

	categories of sources for the personal information we collected about you, 3) our business and commercial purpose for collecting or selling your personal information, 4) the categories of third parties with whom we share your personal information, 5) The specific pieces of information we have collected about you, 6) the categories of personal information disclosed for a business purpose, and 7) If we sold personal information, the categories of personal information sold and the categories of third parties to whom it was sold.
Deletion	You have the right to request that we delete any of your personal information that we collected from you, subject to certain exceptions. Once we receive and verify your request, we will delete (and direct our service providers to delete) your personal information from our records unless an exception applies. We may deny your request if retention of the information is necessary for us or our service providers to: • Complete the transaction for which we collected the personal information, provide a good or service that you requested, take actions reasonably anticipated within the context of our ongoing business relationship with you, or otherwise perform our contract with you. • Detect security incidents, protect against malicious, deceptive, fraudulent, or illegal activity, or prosecute those responsible for such activities. • Debug products to identify and repair errors that impair existing intended functionality. • Exercise free speech, ensure the right of another consumer to exercise their free speech rights, or exercise another right provided for by law. • Comply with the California Electronic Communications Privacy Act (Cal. Penal Code §1546 et seq.) • Engage in public or peer reviewed scientific, historical, or statistical research in the public interest that adheres to all other applicable ethics and privacy laws, when the information's deletion may likely render impossible or seriously impair the research's achievement, if you previously provided informed consent. • Enable solely internal uses that are reasonably aligned with consumer expectations based on your relationship with us. • Comply with a legal obligation. • Make other internal and lawful uses of that information that are compatible with the context in which you provided it. • Or if it is the type of personal information that falls outside the scope of the CCPA, (HIPAA, CIMA, GLBA, or publicly available information)
Opt-Out of Sale Opt-In to Sale	With some limitations, you may direct a business that sells personal information to third parties not to sell the personal information to these third parties. A business may not sell the personal information of persons less than sixteen years of age without their affirmative consent, and in the case of those less than thirteen years of age, the consent must come from a parent.
Non-Discrimination	We will not discriminate against you for exercising your rights under the CCPA. Unless otherwise permitted by the CCPA we will not: • Deny you goods or service • Charge you different prices or rates for goods or services, including through granting discounts or other benefits, or imposing penalties • Provide a different level or quality of goods or services • Suggest that you will receive a different price or rate for goods or services or a different level or quality of goods or services

2

To Exercise Your Rights

To Opt-out of the Sale of Your Personal Information

The CCPA gives consumers the right to direct a business that sells personal information about the consumer to third parties not to sell the consumer's personal information. We do not sell and will not sell your personal information as that term is commonly understood. We also do not sell and will not sell your personal information, as that term is defined by the CCPA.

To Request Access to or Deletion of Your Personal Information

To exercise your access or deletion rights described above, please submit a verifiable consumer request to us by either: Calling us at 1-855-557-8437 or contacting us through our website CCPA Consumer Request.

Only you or your representative that you authorize to act on your behalf (Authorized Agent) can make a verifiable consumer request for your personal information. You may also make a request for your minor child. The verifiable request must provide enough information that allows us to reasonably verify you are the person about whom we collected personal information. We cannot respond to your request or provide you with personal information if we cannot verify your identity or authority to make the request and to confirm the personal information relates to you.

We work to respond to a verifiable consumer request within 45 days of its receipt. If we require additional time, we will inform you of the extension period (up to an additional 45 days), and the reason for the extension in writing. If you have an account with us, we will deliver our response to that account. If you do not have an account with us, we will deliver our response by mail or electronically, depending on your preference. The response we provide will also explain any reasons why we cannot comply with a request.

You may only make a consumer request for access twice within a twelve-month period.
Any disclosures we provide will apply to the twelve-month period preceding the consumer request's receipt.

Contact Us

If you have any questions regarding our Privacy Notice or practices, please contact us via phone at 1-855-557-8437 or send your written request to: CCPA@oldrepublictitle.com, or Old Republic Title c/o CCPA Consumer Request Group, 275 Battery Street, Suite1500, San Francisco, CA 94111-3334.

EDI CONSULTANTS

ASTM E-1527-13 PHASE I ENVIRONMENTAL SITE ASSESSMENT
PRE-SURVEY QUESTIONNAIRE AND DISCLOSURE STATEMENT

Site Contact: Please complete this questionnaire before the Consultant's site visit. For those questions that are not applicable to the subject please respond with an "N/A". This document must be signed by the Owner or his/her representative (Item No. 2). If you have any questions about how to answer any of the questions please call EDI. If additional pages for response are necessary please attach them to this form. Clearly mark all references to the appropriate question number(s). This document and your written response to same will be an exhibit in EDI's report.

1. PROPERTY INFORMATION:

Property Name:		
Property Address: 129 & 133 Poplar Ave		
City: Montebello	State: CA	Zip: 90640
Assessor's Parcel Number:		

2. COMPLETED BY

Signature	Date 12/20/21
Printed Name Mike Magna	Title Pres.

3. ASTM-REQUIRED INQUIRIES

Property Owner: Name: Magnor & Magna, Inc Phone: 323 721 1621 Fax	
Key Site Manager (Site contact): Name: Mike Magna Phone: Fax:	
If not residential Property, please provide list of tenants, including contact names and phone numbers.	
Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law. If so, please documents along with completed questionnaire to EDI	☐ Yes ☑ No
Are you aware of any Activity Use Limitations (AULs) such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? If so, please send documents along with completed questionnaire to EDI	☐ Yes ☑ No
Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	☐ Yes ☑ No
Do you have any specialized knowledge that would be material in identifying recognized environmental conditions in connection with the Property?	☐ Yes ☑ No
Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the Property?	☐ Yes ☑ No
Are you aware if commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example: Do you know the past use of the property? Do you know specific chemicals that are present	☐ Yes ☑ No

Please return completed form and any attachments via fax to:
EDI Consultants, Inc., 21151 S. Western Ave., Suite 100, Torrance, CA 90501
Telephone: 310-832-2300 Fax: 310-362-8843

or once were present at the property? Do you know of spills or other chemical releases that have taken place at the property? Do you know of any environmental cleanups that have taken place at the property?	
Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?	☐ Yes ☑ No

Please attach explanation of all affirmative answers.

8) Please state reason for procuring this Phase 1 ESA:

☐ Qualify for Innocent Landowner defense to CERCLA Liability.

☐ Other: (state below)

4. PLEASE PROVIDE A GENERAL SITE DESCRIPTION BY COMPLETING THE FOLLOWING TABLE:

Legal description/ boundary survey/ plat available (please send to EDI if "yes")	☐ Yes ☐ No
Total Property Size	
Total number of buildings 2 Single Family Homes.	
Total square footage of buildings	
Date of construction	
Dates of significant renovation	
Waste water discharge ☒ Municipal Sanitary Sewer ☐ On-site septic system ☐ Other	
Potable water source ☒ Community Water Supplier ☐ On-site well ☐ Other	
Please describe prior use of property, if known:	

5. PREVIOUS INVESTIGATIONS:

Have any previous environmental investigations been performed at the site?

☐ Yes ☒ No

INVESTIGATION TYPE **If yes, please describe conclusions, and attach copy of report(s)**	
☐ Phase 1 ESA	
☐ Phase 2 ESA	
☐ Tank Tightness Testing	

Have any previous environmental investigations been performed at the site? ☐ Yes ☒ No	
INVESTIGATION TYPE **If yes, please describe conclusions, and attach copy of report(s)**	
☐ Asbestos Survey/ O&M	
☐ Radon	
☐ Lead-based Paint	
☐ Lead in Water	
☐ Operations & Maintenance Plan(s)	
☐ Other	

6. ON SITE OPERATIONS

Are you aware of any of the following conditions, either past or present, on the site?		
Condition	**Response**	**If yes, please describe**
1. Stored Chemicals	☐ Yes ☐ No	
2. Underground Storage Tanks	☐ Yes ☐ No	
3. Aboveground Storage Tanks	☐ Yes ☐ No	
4. Spills or Releases	☐ Yes ☐ No	
5. Dump Areas/ Landfills	☐ Yes ☐ No	
6. Waste Treatment Systems	☐ Yes ☐ No	
7. Clarifies/ Separators	☐ Yes ☐ No	
8. Air stacks/ Vents/ Odors	☐ Yes ☐ No	
9. Floor Drains/Sumps	☐ Yes ☐ No	
10. Stained Soil/ Impacted Vegetation	☐ Yes ☐ No	
11. On-site OWNED Electrical Transformers	☐ Yes ☐ No	
12. Hydraulic lifts/ Elevators	☐ Yes ☐ No	
13. Dry Cleaning Operations	☐ Yes ☐ No	
14. Wetlands/ Flooding	☐ Yes ☐ No	
15. Oil/ Gas/ Water/ Monitoring Wells	☐ Yes ☐ No	
16. Environmental Cleanups	☐ Yes ☐ No	
17. Environmental Permits	☐ Yes ☐ No	If **yes**, please describe and ATTACH ALL COPIES of permits. Please attach last three waste manifests.
a) Industrial Discharge	☐ Yes ☐ No	
b) POTW (NPDES)	☐ Yes ☐ No	
c) Hazardous Waste Generator	☐ Yes ☐ No	
d) Air Quality	☐ Yes ☐ No	
e) Flammable Materials	☐ Yes ☐ No	
f) AST/UST	☐ Yes ☐ No	

Are you aware of any of the following conditions, either past or present, on the site?		
Condition	**Response**	**If yes, please describe**
g) Waste Manifest(s)	☐ Yes ☐ No	
h) Other	☐ Yes ☐ No	

7. OFF SITE ENVIRONMENTAL CONCERNS

Are you aware of any of the following conditions, either past or present, Adjacent to the site?		
Condition	**Response**	**If yes, please describe**
Gasoline Stations	☐ Yes ☐ No	
Dry Cleaners	☐ Yes ☐ No	
Industrial Uses	☐ Yes ☐ No	
Other	☐ Yes ☐ No	

Appendix I - Personnel Profile

SUMMARY OF EXPERIENCE

Brian Tang is a Senior Project Manager at EDI Consultants, Inc. (EDI) in Torrance, California. Mr. Tang has more than 6 year of experience in projects involving due diligence environmental site assessments, property condition assessments, data management, Geographic Information Systems (GIS), subsurface investigations of soil and groundwater contamination, environmental and geotechnical engineering projects for high profile clients throughout the nation.

At EDI, Mr. Tang manages a team performing Phase I and II Environmental Site Assessments, Property Condition Assessments, and other environmental risk assessments for major U.S. banks and lending institutions throughout the nation. In addition, he prepares and reviews technical documents for Phase I and II Environmental Site Assessments.

Mr. Tang is an Environmental Professional who possesses sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases on, at, in, or to a property, sufficient to meet the objectives and performance factors. As an Environmental Professional, Mr. Tang must hold a current Professional Engineer's or Professional Geologist's license or registration from a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) and have the equivalent of three (3) years of full-time relevant experience; or (ii) be licensed or certified by the federal government, a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) to perform environmental inquiries and have the equivalent of three (3) years of full-time relevant experience; or (iii) have a Baccalaureate or higher degree from an accredited institution of higher education in a discipline of engineering or science and the equivalent of five (5) years of full-time relevant experience; or (iv) have the equivalent of ten (10) years of full-time relevant experience.

RELEVANT PROJECT EXPERIENCE

Phase I & Phase II Environmental Site Assessments, Nationwide
Project Manager of Phase I and Phase II environmental site assessments for industrial and commercial real estate as well as multifamily dwellings for major U.S. banks and lending institutions throughout the nation. Conducted subsurface investigations of soil, groundwater and soil vapor contamination to assess and determine the need for further investigation and/or remediation as well as underground storage tank removals, cleanup and coordination with local and State governmental agencies for closure of same.

Property Condition Assessments, Nationwide
Project manager for more than 100 property condition assessments (PCAs) for a wide range of clients throughout the western United States. PCAs provide reliable and detailed information on the building's operating systems, overall design and architectural features, and any signs of material physical deterioration or functional obsolescence that could detract from the building's potential to generate income. In addition, he has examined the impact of local zoning regulations, building codes, and any special hazards that may affect the income stability of the property.

EDUCATION

B.S. Environmental Engineering, University of California, Irvine, 2013

Undergraduate Experience

Well Water Treatment
The purpose of this project is to design two shallow ground water wells for the City of Corona to reduce the demand on the Colorado River by 3,600 acre-ft per year. The project includes the design of an 11,500 ft pipeline to transport the raw well water as well as a treatment facility to treat for turbidity, nitrates, and perchlorates.

Site Planning Report
The goal of this project is to complete a Site Planning Report incompliance of the City of Irvine General Plan for the development of a 1,200 acre planning area centered on a transportation theme of alternative fuels. The planning area is composed of 3,200 dwelling units, a shopping center, a high school, recreational parks and open space to support a population of about 13,000 residents.

EDI CONSULTANTS, INC.

Darrin Domingo, MBA, REPA, CHMM **Principal**

SUMMARY OF EXPERIENCE

Darrin Domingo is the Principal and founder of EDI Consultants, Inc. (EDI) in Torrance, California. Mr. Domingo has more than 27 years of experience in projects involving due diligence environmental site assessments, property condition assessments, data management and database design, Geographic Information Systems (GIS), cost engineering, subsurface investigations of soil and groundwater contamination, and environmental and geotechnical engineering projects including civil and remediation design.

RELEVANT PROJECT EXPERIENCE

Various Clients, Phase I, Phase II Environmental Site Assessments, Nationwide. Project manager for more than 5,000 combined Phase I, Phase II environmental site assessments for industrial and commercial real estate as well as multifamily dwellings for major U.S. banks and lending institutions throughout the nation. Conducted subsurface investigations of soil, soil gas and groundwater contamination to assess and determine the need for further investigation and/or remediation as well as underground storage tank removals, cleanup and coordination with local and State governmental agencies for closure of same.

Various Clients, Property Condition Assessments, Nationwide. Project manager for more than 100 property condition assessments (PCAs) for a wide range of clients throughout the western United States. PCAs provide reliable and detailed information on the building's operating systems, overall design and architectural features, and any signs of material physical deterioration or functional obsolescence that could detract from the building's potential to generate income. In addition, he has examined the impact of local zoning regulations, building codes, and any special hazards that may affect the income stability of the property.

SWDiv CLEAN, Environmental Baseline Survey (EBS), El Toro MCAS, California
GIS and database administrator for the Environmental Baseline Survey of over 1000 structures at El Toro MCAS. Prepared comprehensive maps of the MCAS El Toro in a Geographic Information System (GIS), by combining information gathered during the site evaluation with existing and planned information. The GIS was developed in ArcView for GIS analysis and the preparation of maps; and Microsoft Access for the storage and analysis of attribute data. Attribute data was collected in the field via a customized Palm Pilot interface. Responsible for application development of the Palm Pilot EBS Form for data acquisition in the field and seamless downloading of information into the database. Attribute data encompassed site information including pertinent environmental, land use, and watershed data. Also, field sketches and digital photo notes were entered into the Palm Pilot and converted to bitmap images within the database for retrieval of same. Responsible for uploading and management of all data for queries, analyses, and either output for use in the GIS maps; or Report Tables within the EBS.

SWDiv CLEAN, Naval Environmental Data Transfer Standard (NEDTS), El Toro MCAS, California. GIS and database administrator for groundwater, soil and vapor analytical data. Developed the Navy Environmental Data Transfer Standard (NEDTS) database and Data Management Plan (DMP) for the Southwest Division Comprehensive Long-Term Environmental Action Navy, El Toro Marine Corps Air Station. The NEDTS provides an open, platform independent standard that permits the Navy to describe information to be captured and delivered electronically without imposing any hardware or software requirements on the contracting community. This application automates day-to-day activities of integrating electronic data deliverables (EDD) from analytical laboratories and presenting the information in customized forms and reports. The application is developed utilizing MS Access as the data repository. ESRI's ArcView GIS and Autodesk's Volo View technology are integrated with the database to provide dynamic maps of on-site monitoring wells. A customized switchboard interface allows for automated retrieval of as-built drawings, charts, reports, and GIS views.

Lockheed Martin Corporation, Metadata Reference System, Redlands, California. Lead technical and database administrator for the Metadata Reference System for the Redlands site. Developed records management plan for administration of office-wide project data and records management system for efficient gathering, storage, and retrieval of all related electronic and hardcopy data.

SWDiv RAC, Naval Environmental Data Transfer Standard (NEDTS), Yermo and Nebo Marine Corp Logistics Bases, Barstow, California. Database design and management of the Navy's Southwest Division Remedial Action Contract (SWDiv RAC) databases for both Yermo and Nebo MCLBs. Developed and implemented NEDTS in a client/server architecture (Access 2000/SQL Server) for integration of data into ArcView GIS for mapping and spatial analysis of various subsurface contaminants. Used ESRI's Spatial Analyst and ModelBuilder extensions to map and analyze areas of contaminant influence, delineate plume extents, and generate contours.

New Cure, Inc., OII Landfill MIS/GIS System, Monterey Park, California. GIS Analyst and Database Administrator working in a design-build capacity to facilitate implementation of a remedial cap design for an EPA Superfund site. Provided AutoCAD and LDD civil/remediation design, hazardous waste management via programming and development of the management information system (MIS) using MS Access and the GIS for associated landfill hazardous materials and gases integrating ESRI's ArcView. Conducted environmental modeling and statistical and trend analysis of methane migration via ESRI's ArcView Spatial Analyst and 3D Analyst extensions. In coordination with the landfill gas consultant, designed and implemented the Well Adjustment Decision Tree programmed in Access for automated well adjustments in the field. Created automated data transfer procedure from GEM 2000 units into Access for analyzing gas composition and calculating flow. Trained staff technicians on effective use of the MIS/GIS System, Well Adjustment Decision Tree, as well as data collection and importing procedures.

Owner, Kyoto Plaza, Gardena, California. Operated and maintained soil vapor extraction system at Kyoto Plaza. Collected air (vapor) samples and conducted evaluation of vacuum, influent/effluent data. Developed MS Access data repository, which included but were not limited to integration of historical vapor extraction data into a standardized relational database design. Responsible for data management and modeling.

Southern California Gas Company, PAH Removal and Geotechnical Investigation, Hanford, California. Supervised and managed the removal of PAH-impacted soil, including subsurface investigation, sampling, and recompaction of fill soil. Ensured and designed proper grading of site utilizing Autodesk's Survey.

Home Savings of America, UST Removal and Upgrade, Irwindale, California. Supervised the removal and replacement of underground storage tanks, clarifiers, and hydraulic lifts at the corporate headquarters of Home Savings of America in Irwindale, CA. Also, performed subsurface investigation and confirmation sampling to achieve closure within the required Los Angeles County and state regulations.

Metropolitan Transportation Authority, Geotechnical Oversight for Red Line Segment 2 and 3, Los Angeles/Hollywood, California. Geotechnical engineer responsible for subsurface investigation and construction monitoring of geological conditions via geological/geotechnical mapping at the tunnel face. Performed geotechnical engineering analysis of settlement data in cooperation with land survey teams and staff geologists/geotechs at the tunnel face during tunnel excavation along Hollywood and Vermont Boulevards. Performed laboratory testing and interpretation of soils, field observation, fill testing, geotechnical engineering analysis including slope stability analysis, utilization of AutoCAD for grading and drainage plans, hydrologic analysis, and geotechnical report preparation.

California Department of Transportation (Caltrans), Advanced Public Transportation Systems Group, Los Angeles, California. Provided computer mapping and analysis of traffic data via MapInfo GIS. Created maps using MapInfo in support of various transportation tasks and updated traffic data in the APTS data repository built in MS Access. Assisted in the project management of the Smart Traveler Kiosk Project and the I-110 Vanpool Support Program.

Dear Mr. Magna,

Pursuant to your request, LK Geotechnical Engineering, Inc. has completed a geotechnical investigation and prepared this report for the subject proposed development at the site. The primary objective of this investigation was to provide our best estimate of the geotechnical factors that pertain to the gross stability of the proposed improvement and to evaluate alternatives for a foundation system for the proposed structures.

The report includes a description and an evaluation of the soil materials and provides soils engineering recommendations for construction of the proposed improvement. This report is intended for submittal to the appropriate governmental authorities that control the issuance of necessary permits.

Based on our findings, the proposed project is geotechnically feasible, provided that the recommendations in this report are incorporated into the design and are implemented during construction of the project.

If you have any questions regarding the information contained in this report, please feel free to call this office.

Sincerely,
LK GEOTECHNICAL ENGINEERING, INC.

1. SCOPE OF WORK

To prepare this report, we have performed the tasks described in the following subsections:

1.1. Literature Review

We reviewed geological literature including geologic maps, topographic maps and aerial photographs relevant to the subject site in preparation of this report. A list of literature reviewed is presented in the "References" section of this report.

1.2. Field Exploration

We performed a field exploration consisting of logging of five (5) exploratory soil borings on July 23, 2020. The exploration was performed using an 8-inch diameter hollow-stem auger drill rig and hand tools. The borings were advanced to a maximum depth of approximately 61 feet below the existing grade. The approximate locations of the geotechnical exploration are shown on Plate 1. Detailed descriptions of the soils encountered during drilling are presented in Appendix A – Field Exploration.

1.3. Geotechnical Laboratory Testing

Representative soil samples collected from our field exploration were delivered to the E.G.L., Inc. (EGL) of Arcadia, California for testing, and to evaluate relevant engineering properties. The detailed laboratory test results are presented in Appendix B – Laboratory Testing. Based on our review of the laboratory data, LKGE concurs with and accept the laboratory testing results performed by E.G.L., Inc.

1.4. Engineering Analysis and Report Preparation

We compiled all geological and geotechnical data obtained from literature review, field exploration and laboratory test results, and then prepared this report to present our findings and the geotechnical recommendations, including seismic considerations, grading, foundations, foundation setback, retaining walls, floor slabs, temporary excavations, and drainage.

2. PROPOSED DEVELOPMENT AND SITE DESCRIPTION

2.1. Proposed Development

It is our understanding that the proposed project consists of removing the existing structures and constructing a 140-unit, 4-story apartment building over 2-level subterranean parking garage. The proposed basement finish grade is approximately 22 feet below the existing street grade. The proposed building is shown on Plate 1 – Site Plan and Geotechnical Exploration Map and Plate CS-1 – Proposed Building Sections.

2.2. Site Description

The project site is located at 116 – 136 N. Poplar Avenue, in the City of Montebello, California. The site is bounded by Poplar Avenue on the west, a 2-story motel on the south, single family house to the north, and a retaining wall to the east.

The site consists of three lots: 116, 128 and 136 N. Poplar Avenue. The structures at site consists of a 2- to 3-story apartment complex and parking lot (116 N. Poplar), and 1- to 2-story multi-family dwellings (128 and 136 N. Poplar), retaining wall, landscape and mature trees. The eastern property line rear portion

The site exhibits elevation relief of approximately 15 feet across the site. The rear parking lot of 116 and 128 N. Poplar Avenue is supported by an existing 12- to 15-feet retaining wall along eastern property line. Drainage across the site is by uncontrolled sheet flow to the adjacent sidewalks and drainage course, as well as by infiltration within unpaved area.

3. SITE GEOLOGY AND SUBSURFACE CONDITIONS

3.1. Regional Geology

According to the Geologic Map of the El Monte and Baldwin Park Quadrangle (Dibblee and Ehrenspeck, 1999), the project the site is underlain by Older Alluvium (geologic map symbol Qae). This material composes primarily sandy silt to silty sand. A portion of the geologic map is reproduced as Plate 2 – Regional Geologic Map.

3.2. Subsurface Earth Materials

Based on our field exploration, the earth materials observed at the site consist of artificial fill and older alluvium.

3.2.1. Artificial Fill (Af)

Artificial fill consisting of red brown to dark brown sandy clay, clayey sand and silty sand with man-made debris was encountered in our exploratory borings. The observed maximum thickness of the artificial fill was on the order of 15- to 16-feet in our borings B-1 and B-2 where appears to be the backfill placed behind the existing perimeter retaining walls to create level parking lot. We anticipate the artificial fill depths may vary across the site. This material is considered unsuitable for foundation or slab support or for receiving new compacted fill.

3.2.2. Older Alluvium (Qae)

Older Alluvium consisting of orange brown to brown sandy clay to clayey sand/ silty sand and gravelly silty sand was encountered in our exploratory borings at the site. Older alluvium was observed to be medium stiff to very stiff and dry to moist. The undisturbed older alluvium is considered suitable for foundation or slab support for the proposed structures and/or for support of new compacted fill, provided that our recommendations are followed and integrated into the improvement plans.

3.3. Groundwater

Groundwater was not encountered within our exploratory boring to a maximum depth of 61 feet below existing grade. According to the State of California, Seismic Hazard Zone Report of the El Monte Quadrangle, the site is located within an area with historically highest groundwater level reportedly at approximately between 20- and 50-feet below ground surface (Plate 4). It appears the 20-feet historical groundwater contour line is based on the ground elevation along Rio Hondo channel, which is approximately 30 feet below the Poplar Avenue. Therefore, the groundwater level appears to be well below the level of the proposed structures. It should be noted that local fluctuations in groundwater levels may occur due to seasonal variations in rainfall, irrigation and water line leaks.

4. GEOLOGIC AND SEISMIC HAZARDS EVALUATION

4.1. Seismic Hazard Zones Evaluation

The southern California region is seismically active and commonly experiences strong ground shaking resulting from earthquakes along active faults. Ground shaking resulting from a moderate to major earthquake (Magnitude 6.0 or greater) can be expected during the lifespan of the existing and/or proposed structures. Property owners and the general public should be aware that any structure or slope in the southern California region could be subject to significant damage as a result of a moderate or major earthquake. The hazards associated with seismic activity in the vicinity of the site are discussed and evaluated in the following sections.

4.1.1. Earthquake Fault Zone

The State of California established the Alquist-Priolo Earthquake Fault Zoning Act in 1972 which went into effect in 1973. The purpose of this Act is to prohibit the construction of most structures for human occupancy across the traces of active faults and to mitigate the hazard of fault rupture. An "active fault" is defined by the State Mining and Geology Board as one which had surface displacement within the Holocene era (+/- 11,000 years) and is well defined at the surface. The term “sufficiently active” has been used if there is evidence of Holocene surface displacement along one or more of its segments or branches.

The Act was renamed the Alquist-Priolo Special Studies Zones Act in 1975 and then Alquist-Priolo Earthquake Fault Zoning Act in 1994. The original designation “Special Studies Zones” has been renamed “Earthquake Fault Zones”. Under the Act, the State Geologist is required to delineate Earthquake Fault Zones (EFZ) along active faults in California. Development within these zones must include geologic investigations demonstrating that the sites are not threatened by surface displacement from future faulting. The California Geologic Survey (CGS) is required to delineate active faults, compile maps of EFZs and submit such Official Maps to the public and continually review and revise EFZs based on new geologic and seismic data. EFZ boundaries on early maps were positioned about 660 feet (200 meters) away from the fault traces to accommodate imprecise locations of the faults and possible existence of active branches. The policy since 1997 is to position the EFZ boundaries about 500 feet (150

meters) away from major active faults and about 200 to 300 feet (60 to 90 meters) away from well defined, minor faults.

Based on our review of California Geological Survey 2018 seismic hazard zones map (Plate 3), the site is not located within an Earthquake Fault Zone. The closest known fault is the Elsinore Fault which is mapped about 2.5 miles east of the site.

4.1.2. Soil Liquefaction Potential

Soil liquefaction occurs when the pore pressures generated within a soil mass approach the effective overburden pressure. Liquefaction of soils may be caused by cyclic loading such as that imposed by ground shaking during earthquakes. The increase in pore pressure results in a loss of strength, and the soil then can undergo both horizontal and vertical movements, depending on the site conditions. Other phenomena associated with soil liquefaction include sand boils, ground oscillation, and loss of foundation bearing capacity. Liquefaction is generally known to occur in loose, saturated, relatively clean, fine-grained cohesionless soils at depths shallower than approximately 50 feet. Factors to consider in the evaluation of soil liquefaction potential include groundwater conditions, soil type, grain size distribution, relative density, degree of saturation, and both the intensity and duration of ground motion.

Based on our review of California Geological Survey Seismic Hazard Zones Map (Plate 3), the site is not located within a potential liquefaction hazard zone. Based on dense older alluvium and lack of shallow groundwater, the soil liquefaction potential at the site is considered low. Consequently seismically-induced settlement is negligible.

4.2. CBC Seismic Design Parameters

The future structures should be designed by the structural engineer in accordance with the applicable seismic building code. Based on our geotechnical investigation, the subject site is classified as Site Class D in accordance with the 2019 California Building Code that refers to the ASCE 7-16.

Per Section 11.4.8 of ASCE 7-16, structures shall be designed for the seismic response coefficient C_s determined by Eq. (12.8-2) for values of $T \leq 1.5\ T_s$ and taken as equal to 1.5 times the value computed in accordance with either Eq. (12.8-3) for $T_L \geq T > 1.5\ T_s$ or Eq. (12.8-4) for $T > T_L$, where

T = the fundamental period of the building
$T_s = S_{D1}/S_{DS}$
T_L = long-period transition period

The design spectral response acceleration parameters presented on the following table generated by the Applied Technology Council (ATC) website, may be utilized for seismic design:

Site location (latitude, longitude): (34.0090, -118.0992)				
Spectral Period, T (second)	MCE_R ground motion (g)	Site-modified Spectral acceleration (g)		**Seismic design acceleration (g)**
0.2	S_s = 1.881	F_a = 1.0	S_{MS} = 1.881	**S_{DS} = 1.254**
1.0	S_1 = 0.671	F_v = 1.7	S_{M1} = 1.140	**S_{D1} = 0.760**
Site modified peak ground acceleration PGA_M = 0.893 g				
Long-period transition period T_L = 8 second				
Seismic Design Category = D				

If seismic response coefficient C_s recommended above is not applicable for structural design, our office can perform a site-specific ground motion hazard analysis upon the project structural engineer's request.

Present building codes and construction practices, and the recommendations presented in this report, are intended to minimize structural damage to buildings and prevent loss of life as a result of a moderate or a major earthquake. They are not intended to totally prevent damage to structures, graded slopes and natural hillsides due to moderate or major earthquakes. While it may be possible to design structures and graded slopes to withstand strong ground motion, the construction costs associated with such designs are usually prohibitive, and the design restrictions may be severely limiting. Earthquake insurance is often the only economically feasible form of protection for your property against major earthquake damage. Damage to sidewalks, steps, decks, patios and similar exterior improvements can be expected as these are not normally controlled by the building code.

5. GEOTECHNICAL ENGINEERING RECOMMENDATIONS

5.1. Geotechnical Overview

Based on the findings of our investigation, the site is considered to be suitable from a soils engineering standpoint for construction of the proposed structures, provided the recommendations included herein are followed and integrated into the building and/or grading plans.

The following is a list of geotechnical considerations for this project:

- Up to 16-feet-thick undocumented artificial fill was encountered in the eastern portion of the site. The bottom of fill is situated at elevation of 184 feet approximately based on our borings. This material is not suitable for foundation support. We recommend all existing fill be removed and recompacted. Because the undocumented fill depths are various across the site. We recommend that the proposed building be supported entirely on a uniform compacted fill blanket per our recommendations presented in "Site Preparation and Earthwork" section.

- Temporary shoring will be required along the property lines where space constraint is present. The recommendations are presented in “Temporary Shoring” section.

- Based on our review of laboratory testing results, the on-site soil has “low” expansive potential. Our recommendations have been incorporated the expansive soil mitigation.

- On-site near surface soil is considered “corrosive” to ferrous metal based on the laboratory testing results.

Our geotechnical engineering analyses performed for this report were based on the preliminary information provided to us. If the design substantially changes, then our geotechnical engineering recommendations would be subject to revision based on our evaluation of the changes.

5.2. Expansive Soil Evaluation

Expansive soils are characterized by their ability to undergo significant volume changes (shrink or swell) due to variations in moisture content. Changes in soil moisture content can result from rainfall, landscape irrigation, utility leakage, roof drainage, perched groundwater, drought, or other factors, and may cause unacceptable settlement or heave of structures, concrete slabs supported on-grade, or pavements supported over these materials. Depending on the extent and location below finished subgrade, these soils could have a detrimental effect on the proposed construction.

Based on our review of laboratory testing results, the on-site near surface soil has “medium” expansive potential. Our recommendations have been incorporated the expansive soil mitigation.

5.3. Collapsible Soil Evaluation

Based on our review of the laboratory testing results, the on-site near surface soil has “slightly” collapsible potential. Our recommendations have been incorporated the mitigation for collapsible soil.

5.4. Corrosive Soil Evaluation

The potential for the near-surface on-site materials to corrode buried steel and concrete improvements was evaluated preliminarily. In accordance with the Caltrans Corrosive Guidelines, corrosive soil is defined as the soil has a pH less than 5.5, or chloride concentration greater than 500 ppm, or sulfate concentration in soils greater than 2,000 ppm, or minimum resistivity less than 1,000 ohm-centimeters. Laboratory testing was performed to evaluate pH and electrical resistivity, as well as chloride and sulfate contents. These laboratory test results are presented in Appendix B.

Based on our review of laboratory test results, the followings are our findings:

- The potential for chloride attack of reinforcing steel in concrete structures and pipes in contact with on-site soil is negligible.

- The potential for sulfate attack on concrete in contact with the on-site soil is negligible in accordance with ACI 318, Table 4.3.1. As a minimum, we recommend that Type I or II cement and a water-cement ratio of no greater than 0.5 be used on the project.

- Based on soil resistivity results, the on-site soil is considerred corrosive to buried ferrous metals. In general, conventional corrosion protection measures for metal in contact with soil may include the following:

    - Underground steel utilities should be given a high-quality protective coating such as 40 mil extruded polyethylene, 20 mil plastic tape over primer per AWWA Standard C209, or hot applied coal tar enamel or tape per AWWA Standard C203.

    - All underground steel should be electrically insulated from above ground steel, dissimilar metals, and cement-mortar or concrete coated steel.

    - Underground steel pipe should be bonded for electrical continuity if rubber-gasketed, mechanical, grooved-end, or other non-conductive type joints are used. In addition, cathode protection is recommended for underground steel utilities.

If special corrosion protection is required for certain performance criteria determined by the project designer, a corrosion specialist should be consulted regarding suitable types of piping and appropriate protection for underground metal conduits.

5.5. Stormwater Infiltration Evaluation

The proposed building covers essentially the entire property. It is our opinion that it is very difficult to design an efficient “infiltration-type” stormwater treatment system with appropriate foundation setback at the site. In addition, infiltration of stormwater at the site may change groundwater level and increase the potential of soil liquefaction hazard that ultimately impacts foundation stability. On this basis, it is our opinion that it is not suitable to use the “infiltration-type” stormwater treatment system for LID design at the site. We recommend that an alternative system (i.e. filtration-type bio-planter, etc.) be evaluated by the project civil engineer.

5.6. Site Preparation and Earthwork

Prior to construction/grading, the area of the proposed development should be clear of any loose surficial soils, vegetation and/or man-made debris. Demolition debris and other unsuitable materials should be stripped and removed from the site. Water lines or other old utility lines or installations to be abandoned should be removed or crushed in place. Holes resulting from removal of buried obstructions which extend below finished site grades should be backfilled with compacted soils.

5.6.1. Over-Excavation and Subgrade Preparation

The proposed subterranean garage floor elevation is expected to be approximately 22 feet below Poplar Avenue. Artificial fill and older alluvium are expected to be exposed at the proposed garage floor elevation. To create a uniform foundation support, we recommend over-excavate at least 5 feet below the proposed finish grade, or 3 feet below footings, or to the depth of undocumented fill, whichever is deeper. The lateral extent of the over-excavation should be at least 5 feet beyond the building line (where space permits) or equidistant to the thickness of fill below footing, whichever is greater.

For any light-weight ancillary structures (i.e. property line fence walls, canopies, trash enclosure, etc.), we recommend over-excavate at least 1 foot below the proposed footing bottom, or to the depth of undocumented fill, whichever is deeper. The lateral extent of the over-excavation should be equidistant to the thickness of fill below footing (where space permits).

For on-grade pavement and hardscape (patios, steps, walkways, etc.), we recommend over-excavate at least 1 foot below the subgrade, or to the depth of undocumented fill, whichever is deeper, and then recompact to 90% relative compaction.

Any excavated bottoms for footings or to receive new compacted fill should be inspected and approved by a representative from LKGE. prior to compaction work. Deeper excavations may be required in areas where soft, saturated, or unsuitable materials, for example, tree root balls or undocumented fill are encountered.

5.6.2. Compaction

On-site materials are considered to be suitable for compaction, provided that all deleterious materials and oversized rocks (larger than 6-inches in size) are removed from the site prior to compaction.

All new compacted fill should be supported on firm native soil and compacted to at least 90 percent of the maximum dry density, as determined by the current ASTM D1557 and at about 2 percent above optimum moisture content. Fill should be placed in horizontal lifts of approximately 8 inches in loose thickness, and then compacted by mechanical methods, using sheepsfoot rollers, multiple wheel pneumatic tired rollers, or other appropriate compacting rollers.

It may be necessary to import soils to the site to be used as compacted fill. Imported materials should be a sandy type of material and approved by the geotechnical engineer prior to transporting to the job site. The sandy material should not have an Expansion Index exceeding 20 and should not contain rocks larger than 6-inches in size.

5.6.3. Shrinkage/Bulking Due to Compaction

Based on our review of the in-situ soil density data, preliminary volumetric shrinkage on the order of 10 to 15 percent as a result of compaction of onsite soil may be assumed.

5.6.4. Excavation Characteristics

The earth materials underlying the site should be generally excavatable with heavy-duty earthwork equipment in good working condition. Some gravels, cobbles and man-made debris should be anticipated within the fill soils. Local caved-in conditions should be anticipated in the sandy soil during temporary excavation.

5.6.5. Weather Related Grading Considerations

When rain is forecasted, we recommend all critical excavated bottoms, footings or trenches be covered with plastic sheeting to minimize subgrade soil saturation, and for the ease of removal of water.

Fill soil that has been spread and awaits compaction shall be properly compacted prior to rains. These fills, once compacted, shall have the surface sloped to drain to an area (temporary catch basin/detention basin) where water can be removed.

Temporary drainage devices should be installed to collect and transfer excess water to the street in non-erosive drainage devices. Drainage should not be allowed to pond anywhere on the site, and especially not against any foundation or retaining wall. Drainage should not be allowed to flow uncontrolled over any descending slope.

Once the earthwork is ready to resume after rainfall, the excavations and/or compaction conditions should be observed by this firm. Any soils saturated by the rain shall be removed and air-dried/mixed with dry materials for proper compaction. We will recommend additional mitigation measures based on the actual site conditions, if needed.

5.7. Temporary Excavation

Based on the proposed subterranean garage floor and over-excavation & recompaction, the height of temporary excavation is expected to be up to 27 feet. Where the space constraint is present, temporary shoring will be required and the recommendations are presented in “Temporary Shoring” section.

For other general temporary excavations, the maximum recommended height of unsurcharged, temporary vertical excavations in the earth materials at the site is 5 feet. Excavations above this height should be trimmed to a 1:1 (H:V) ratio where the space is available. Surcharge loads, including construction vehicles and materials, should not be placed within five (5) feet of the unsupported excavation edge. Some sloughing of cohesionless sandy materials encountered at the site should be expected.

Excavations shall not remove the lateral support from a public way, from an adjacent property or from an existing structure**.** Where space for sloped excavations is not available, slot-cut or temporary shoring (trench box) may be utilized.

Surfaces exposed in slope excavations should be kept moist but not saturated to minimize raveling and sloughing during construction. Adequate provisions should be made to protect the slopes from erosion during periods of rainfall. Water should not be allowed to pond on

the top of the excavation or to flow towards it. All excavations should be stabilized within 30 days of initial excavation.

All excavations shall be made in accordance with the regulations of the State of California, Division of Occupational Safety and Health, (Cal/OSHA). These recommended temporary excavation slopes do not preclude local raveling and sloughing. Provided our recommendations are followed, the resulting temporary excavations are anticipated to be safe from a geotechnical standpoint for the proposed construction operations and should not expose workers to hazards due to cave-ins, provided that geologic conditions exposed by the excavations are as anticipated.

Confined or trench excavations (i.e. retaining walls or utility trench excavations) should be made in accordance with the regulations of the State of California, Division of Occupational Safety and Health (Cal/OSHA). We recommend that confined excavations should be shored using hydraulic shoring, screw jacks or timber shoring, as determined by the project engineer.

All temporary excavations at the site should be observed and monitored by our representative to verify soil conditions so that any necessary modifications can be made based on variations of soil encountered at the site. Surcharged temporary excavations and shoring should be continuously observed by our representative. If adverse conditions are encountered during excavations, additional recommendations will be provided.

It is recommended that a pre-excavation site meeting be attended by the grading contractor, the soils engineer and an agency representative to discuss methods and sequence of excavation.

5.8. Temporary Shoring

Based on the proposed subterranean garage floor and foundation elevations, the height of temporary excavation is expected to be up to 27 feet. Due to the space constrains of property lines, temporary shoring will be required.

In general, for excavations less than 15 feet in height, a cantilevered shoring system may be used. For excavations greater than 15 feet in height, a restrained (i.e. tied-back or braced) shoring system may be used. All shoring systems shall have lagging to support the cut face between soldier piles.

Shoring shall be designed by a California licensed engineer experienced in the design and construction of shoring under similar conditions. Once the final excavation and shoring plans are complete, the plans and the design should be reviewed by LKGE for conformance with the design intent and recommendations.

- **Lateral Earth Pressures**

The cantilevered or restrained shoring walls should be designed using the lateral earth pressure presented in the attached Plate SW-1 and the following table:

Shoring Type	Lateral Earth Pressure*	Pressure Distribution
Cantilevered Shoring	36H psf	Triangular Distribution
Restrained Shoring (Tied-back/Braced Shoring)	23H psf	Trapezoidal Distribution (see Plate SW-1)

* H = wall height

- **Surcharge Loads**

Any surcharge (live, including traffic, or dead load) located within a 1:1 plane projected upward from the base of the shored excavation, including adjacent structures, should be added to the lateral earth pressures. The lateral contribution of a uniform surcharge load located immediately behind the temporary shoring may be calculated by multiplying the vertical surcharge pressure by 0.30. Lateral load contributions of surcharges located at a distance behind the shored wall may be provided once the load configurations and layouts are known. As a minimum, a 240 psf vertical uniform surcharge is recommended to account for nominal construction and/or traffic loads. More detailed lateral pressure and loading information can be provided, if needed, for specific loading scenarios as recognized through the design process.

- **Soldier Piles for Shoring**

Soldier piles should be at least 18-inch in diameter and should be designed for an allowable passive resistance of 300 pcf (equivalent fluid weight). The passive resistance value can be doubled If pile spacing is greater than 2.5D on center where D is the diameter of the drilled shaft for the soldier piles. The downward axial capacity of soldier pile can be designed for an allowable skin friction of 400 psf. The upper 1.5D should be neglected when calculating the axial capacity below the excavated level. Structural concrete should be used for the soldier piles below the excavation, sand-cement slurry may be used above the excavation where lagging will be installed.

Drilling of the soldier pile shafts can be accomplished using conventional drilling equipment. In the event of soil caving, it may be necessary to use casing and/or drilling mud to permit the installation of the soldier piles. Drilled holes for soldier piles should not be left open overnight. Concrete for piles should be placed immediately after the drilling of the hole is complete.

The concrete should be pumped to the bottom of the drilled shaft using a tremie. Once concrete pumping is initiated, the bottom of the tremie should remain below the surface of the concrete to prevent contamination of the concrete by soil inclusions. If steel casing is used, the casing should be removed as the concrete is placed.

Due to the proximity of the excavation to existing improvements, some means of monitoring the performance of the shoring system is recommended. Monitoring should consist of periodic surveying of lateral and vertical locations at the tops of all soldier piles. We will be pleased to discuss this further with the design consultants and the contractor when the

design of the shoring system has been finalized. Also, we should review the shoring plans and calculations to evaluate whether our recommendations have been incorporated into the design.

- **Lagging**

Continuous treated timber lagging should be used between the soldier piles. The lagging can be designed for the recommended lateral earth pressure but limited to a maximum of 400 psf with consideration of soil arching. If treated timber is used, the lagging may remain in place. To develop the full lateral resistance, provisions should be taken to assure firm contact between the soldier piles and the soils; for this, we recommend that at least 1.5-sack sand-cement slurry fill be used behind the lagging.

- **Tie-back Anchors**

For design of the tieback anchors, it may be assumed that the active wedge adjacent to the shoring is defined by a plane drawn at 35 degrees from the vertical through the bottom of the excavation. These anchors should extend to a minimum of 20 feet beyond the potential active wedge and to a greater length as necessary to develop the desired capacities. Only the frictional resistance developed beyond the assumed active wedge should be included in the tie-back design. Tie-back anchors may be installed at angles of 15 to 40 degrees below a horizontal plane.

For the design of pressure-grouted anchors, the grout-to-ground bond strength of 2,500 psf along the bonded zone may be used. The capacity of the anchors should be determined by testing of the initial anchors as presented in “Tie-back Anchor Testing” Section.

The anchors should be filled with concrete/grout by pumping from the tip out. To minimize caving, we suggest that the portion of the anchor shaft within the active wedge be backfilled with sand-cement slurry. The sand-cement mixture should fill the portion of the tieback anchor tightly and should be flush with the face of the shoring when finished.

After tie-back anchor is no longer needed to support the excavation, stress should be carefully released and shoring system including tieback may be able to be left in place.

Installation Guidelines

1. Tie-back installation shall be performed during continuous observation by LK Geotechnical Engineering, Inc. to confirm that the recommended earth materials are penetrated, that the dimensions of the installed anchors are at least as large as that indicated on the shoring plan, and that anchor installation has been performed as specified. The Contractor shall provide access and necessary facilities, including lighting, at their expense, to accommodate observations.

2. All anchors shall be installed at the specified locations, to the required depth, and at the specified angle of inclination. A tolerance of 3^{o} will be permitted on the required angle of inclination.

3. After drilling, all holes shall be cleaned of loose soils. Concrete shall be placed by pumping from the tip of the anchor to the active wedge. Concrete placement shall begin within four hours after completion of drilling. The portion of the anchor within the active wedge shall be backfilled with sand-cement slurry after the anchor has been tested as specified below. However, if excessive caving occurs, the active wedge portion of the excavation can be filled with slurry as the casing is pulled. A zone of soft soil shall (in this case) be placed between the anchor and slurry (before testing).

4. If a hollow-stem auger or casing is used due to caving, concrete shall be placed by pumping as the auger or casing is withdrawn while always maintaining a head of concrete inside the casing or auger.

5. Concrete placement shall be continuous without interruption, and at such a rate that fresh concrete will not be deposited on concrete hardened sufficiently to form seams and planes of weakness.

6. Any anchor deemed by the Owner or Geotechnical Consultant to be defective shall be replaced with substitute anchor(s) as directed by the Owner or Shoring Designer. The cost of installation of such substitute anchors shall be borne by the Contractor. Costs associated with analysis and design of substitute anchor(s) shall also be borne by the Contractor.

- **Tie-back Anchor Testing**

As an initial guideline, tie-back anchor testing should include 150% and 200% load tests. We recommend all anchors be check-tested to at least 150% of the designed working load in accordance with the following procedures:

a. Test load anchors to 150% of the design-working load, incrementally noting loads, tendon extensions and soldier pile deflections. Hold load for 15 minutes. After pulling slack, the anchor movement shall not exceed 0.10 inch during the 15-minute load period. If the deflection is acceptable, reduce load to 100% of the design load and lock off.

b. Where an anchor shows excessive movement for additional 15-minute intervals, the load should be reduced until the rate of movement is 0.10 inch per 15 minutes or less. The load at which acceptable movement is attained should be divided by 1.5 to establish the working load of the anchor and additional measures taken to carry the required load.

Geotechnical Consultant shall designate at least 5% of all proposed anchors for 200% load tests. Additional anchor steel reinforcement will likely be required for the 200 percent load test anchors and should be appropriately considered prior to anchor installation. Half of the 200% Test Anchors shall be tested for 30 minutes. The remaining Test Anchors shall be tested for a 24-hour period. Test anchors shall be tested in the following procedures:

a. For the 30-minute test anchors, incrementally load the anchors to 200% of the design-working load noting loads, tendon/bar extensions and soldier pile deflections. Hold load for 30 minutes. Anchor movement shall not exceed 0.3 inch during the 30-minute load

period. If the deflection is acceptable, reduce load to design load and lock off; otherwise, reduce the test load by 50% and repeat this step.

b. For 24-hour test anchors, incrementally load to 200% and hold for 24 hours; check load after 24 hours. If a pre-stress loss of 8% or less is recorded, restore load to 100% of working load and lock off. If loss of pre-stress exceeds 8%, restore load to 150% of working load and hold for an additional 24 hours. Check load after second 24-hour hold and, if loss of pre-stress is less than 8%; restore to 100% and lock off as before.

c. Where an anchor shows a continuous loss of pre-stress during a subsequent 24-hour period, the test load shall continue to be reduced by 50% until loss of pre-stress is negligible. Then the test load shall be divided by 1.5 to establish the working load of that anchor and additional measures taken to carry the required shoring load.

Please note that any anchor pulled more than 12 inches shall not be used. Immediately after testing, the active wedge portion of tieback excavations should be filled with slurry.

- **Deflections**

Certain amount of deflection of a shored embankment will occur. For design of shoring, the maximum deflection shall not exceed ½ inch at the top of the shored embankment where a structure is within 1:1 (H:V) plane projected up from the base of the temporary excavation and for a maximum lateral deflection of 1 inch provided there are no structures within a 1:1 (H:V) plane projected up from the base of temporary excavation.

If greater deflection occurs during construction, additional bracing/anchoring may be necessary to minimize settlement and loss of support of adjacent buildings, streets and/or utilities in adjacent streets and alleys. If desired to reduce the deflection, a greater active pressure could be used in the shoring design.

5.9. Conventional Footings for Building

Conventional footings can be used for support of the proposed structures, provided footings are founded on compacted fill. The reinforcement of footings shall be designed by the project structural engineer.

Continuous footings should be at least 18 inches in width and at least 24 inches deep from the lowest adjacent grade founded on compacted fill, and may be designed using an allowable bearing pressure of 3,000 psf.

Square footings should be at least 24 inches in width and at least 24 inches deep from the lowest adjacent grade founded on compacted fill, and may be designed using an allowable bearing pressure of 3,000 psf.

The allowable bearing capacity can increase 350 psf for each additional foot of width, and 450 psf for each additional foot of depth to a maximum allowable capacity of 6,000 psf.

The bearing pressure given is for the total of dead and frequently applied live loads and may be increased by one-third for short duration loading which includes the effects of wind or seismic forces.

The estimated static settlement is expected to be less than ¾ inch with differential settlement estimated to be less than ¼ inch within a span of 30 feet. Settlement of the proposed foundation system is expected to occur on initial load application.

Resistance to lateral loading may be provided by friction acting at the base of foundations and by passive earth pressure within alluvium. An allowable coefficient of friction of 0.3 may be used with the dead load forces. Passive earth pressure may be computed as an equivalent fluid having a density of 300 pcf with a maximum earth pressure of 4,500 psf. When combining passive and friction for lateral resistance, the passive component should be reduced by one-third.

5.10. Conventional Footings for Ancillary Structures

For light-weight ancillary structures (e.g. fence walls, trash enclosures, planter walls, etc.), conventional shallow footings can be used, provided that footings are placed on compacted fill per our “Site Preparation and Earthwork” recommendations.

For the design of spread footings for other light-weight structures, we recommend the bottom of square or continuous footings be founded at least 12 inches below the proposed ground surface. A minimum footing width of 18 inches is recommended for square footings and 12 inches for continuous footings. The allowable bearing value for footings with above minimum sizes is 1,500 psf for dead plus live load. Based on the allowable net bearing pressures presented above, static settlement is anticipated to be less than ½ inch. Differential settlement is expected to be up to one-half of the total settlement over a 30-foot span. Most of the static settlement at the project site is expected to occur immediately after the application of the load.

Resistance to lateral loading may be provided by friction acting at the base of foundations and by passive earth pressure. An allowable coefficient of friction of 0.3 may be used with the dead load forces. Passive earth pressure may be computed as an equivalent fluid having a density of 300 pcf with a maximum earth pressure of 4,500 psf. When combining passive and friction for lateral resistance, the passive component should be reduced by one-third.

5.11. Floor Slab-on-Grade

Concrete slab-on-grade may be used for the proposed building and should be supported on compacted fill, per the “Site Preparation and Earthwork” recommendations.

Concrete slabs should be at least 4 inches thick and should be reinforced with a minimum of #4 rebar spaced not exceeding 16 inches on center, each way. The project structural engineer should design the reinforcement of slab based on the design performance criteria.

5.12. Moisture Retarder

Slabs to be covered with flooring should be protected by an acceptable plastic vapor retarder/barrier (minimum 10 mil thickness) placed on the firm subgrade. If moisture vapor transmission is a concern to the facility owner, an expert should be consulted to provide additional recommendations for the design and construction of slabs in moisture sensitive flooring areas.

5.13. Retaining Walls

The proposed retaining walls should be designed using the lateral earth pressure in accordance with the attached Plate RW-1 and the following table. Retaining walls greater than 6 feet in height should be designed considering the incremental seismic earth pressures.

Backslope of Retained Material Horizontal to Vertical	Active Equivalent Fluid Weight (pcf)	At-Rest Equivalent Fluid Weight (pcf)
Level	43	60

The subterranean basement slab and retaining walls should have adequate waterproofing to prevent wall staining and water infiltration within the basement.

In addition to lateral earth pressures recommended above, any proposed retaining walls should be designed to resist the surcharge imposed by adjacent structures, proposed structures, footings, and/or by adjacent traffic surcharge.

The lateral pressure due to adjacent vertical uniformly distributed loads may be considered lateral pressure equal to 33 percent (K_a = 0.33) of the vertical uniformly distributed loads for the active condition. The lateral pressure due to adjacent vertical uniformly distributed loads may be considered lateral pressure equal to 50 percent (K_o = 0.50) of the vertical uniformly distributed loads for the at-rest condition.

All walls should be effectively waterproofed, provided with an adequate subdrainage system, and backfilled in accordance with the attached “retaining wall backfill and subdrain details” (Plate RWD-1).

Where shoring not allowing standard subdrain outside the wall, the rock pockets may be utilized. The pockets should be a minimum of 12 inches in length, width and depth behind the wood lagging, and be spaced no more than 8 feet on center. The rock pockets shall drain through the wall via a solid pipe to approved non-erosive drainage devices.

The subdrainage system, including outlet locations, should be clearly shown on the building and/or grading plans. The contractor is responsible to ensure that all subdrain outlets are constructed per plan. While all backfill should be compacted to the required density, care should be taken when working close to new walls to prevent excessive lateral pressure.

Retaining wall waterproofing in preventing moisture intrusion is beyond our scope of work and not the responsibility of LK Geotechnical Engineering, Inc. We recommend you retain a waterproofing expert to provide waterproofing details, application methods or effectiveness and installations per the project design requirements (if applicable).

5.14. Hardscape

Patios, steps, walkways, etc. are not normally subject to building code requirements for structural support. In order to reduce the potential for distress due to potential settlement, the hardscape should be supported by compacted fill per our “Site Preparation and Earthwork” recommendations. Hardscape slabs reinforcement and control joints should be designed by the structural engineer or architect based on the design performance criteria.

5.15. Pavement

Prior to placing pavement structural section, the subgrade shall be prepared in accordance with the recommendations in “Site Preparation and Earthwork” section.

A flexible pavement section consisting of 3 inches of asphalt concrete over 4 inches of base material should be used. A flexible pavement section consisting of 4 inches of concrete over 6 inches of base material should be used for service lanes (truck and loading area), if applicable. The base material should be crushed aggregate base.

As an alternative, a rigid pavement section consisting of Portland Cement Concrete (PCC) can be used. The traffic loading is expected to be primarily light vehicles. Recommendations for the rigid concrete pavement design is provided herein on the following table.

Concrete Thickness	5 inches
90 Percent Compacted Subgrade	12 inches
Contraction Joint Spacing	10 ft.
Depth of Joint	1 inch
Compressive Strength of Concrete @ 28 days	3500 psi
Modulus of Rupture of Concrete @ 28 days	550 psi

Concrete slabs should be separated from other structures or fixed objects within or abutting the paved area by isolation joints. This serves to offset the effects of the differential horizontal and vertical movements of the structures which may fracture the concrete slab. When isolation joints are located where wheel and other loads are applied, the pavement edge at the joint should be thickened by 20 percent or two inches, whichever is greater.

A joint filler should be applied to any new isolated joints within the concrete slab. The joint filler should extend through the slab thickness and should be recessed below the pavement surface so that the joint can be sealed with joint sealant material. The types of joint filler materials recommended include bituminous mastic, bituminous impregnated cellulose or

cork, sponge rubber, or resin-bound cork. Joint filler materials should be installed in accordance with the recommendations of the manufacturer.

5.16. Drainage Protection

All pad and roof drainage should be collected and transferred to the street or an approved area in non-erosive drainage devices. Drainage should not be allowed to pond on the pad or against any foundation or retaining wall.

We recommend a minimum 5 percent slope away from the building foundations for a horizontal distance of 3 feet be established for any landscape areas immediately adjacent to the building foundations. In addition, we recommend a minimum 2 percent slope away from the building foundations be established for any impervious surfaces immediately adjacent to the building foundations for a minimum horizontal distance of 10 feet. Lastly, we recommend the installation of roof gutters and downspouts which deposit water into a buried drain system be installed instead of discharging surface water into planter areas adjacent to structures.

It is the responsibility of the contractor and ultimately the developer and/or property owner to insure that all drainage devices are installed and maintained in accordance with the approved plans, our recommendations, and the requirements of all applicable municipal agencies. This includes installation and maintenance of all subdrain outlets and surface drainage devices.

It is recommended that watering be limited or stop altogether during the rainy season when little irrigation is required. Over-saturation of the ground can cause major subsurface damage. Maintaining a proper drainage system will minimize the shrink/swell potential of sub-soils.

5.17. Pre-Construction Survey

We recommend that the client's representative prepare a pre-construction survey prior to site development. The pre-construction survey should document existing site conditions and performance of offsite structures (i.e. property line block walls and fences) prior to construction (where applicable). If adverse conditions are encountered during excavations, additional recommendations may be necessary.

6. SECTION 111 STATEMENT

It is the finding of this firm that the proposed structures will be safe and that they will not be affected by any hazard from landslide, liquefaction, lateral spreading, slope instability, flood hazard, tsunamis, seiches, settlement or slippage and the completed work will not adversely affect adjacent property, in compliance with the Los Angeles County code, provided that our recommendations are followed.

7. GENERAL INFORMATION

Accuracy of Provided Drawings

LK Geotechnical Engineering, Inc. (LKGE) investigation, analysis, findings and/or recommendations of a site, with respect to the proposed improvements, are often dependent on several factors or information provided to LKGE by the client and/or the client's representative(s). Provided information or Drawings may include topographic surveys, architectural drawings, engineering plans and/or grading plans. It is LKGE's assumption that the provided Drawings, to be utilized as part of our investigation, accurately depict topographic conditions, existing and/or proposed structures and grades, property lines, easements, etc. It should be understood that LKGE's use of the provided Drawings does not mean or confirm that the provided Drawings are accurate. If revisions are made to the site Drawings, these documents should be submitted to LKGE as soon as possible. Additional exploration, analysis and/or revised recommendations may be necessary depending upon our review of the revised Drawings, etc.

Environmentally Hazardous or Non-Hazardous Materials

It should be clearly understood that environmental geologic services are not within the scope of this study. Environmental geologic services may include the detection of hazardous or non-hazardous materials, wastes or substances existing on the site from research of available records, exploratory methods, sampling, laboratory analysis, etc. or the recommended treatment and/or disposal of these materials, wastes or substances. If hazardous or non-hazardous materials, wastes or substances are revealed by supplementary investigations or studies or are encountered during construction or grading operations, appropriate environmental investigation(s) and analysis may be required. In this case, mitigation and/or treatment of hazardous or non-hazardous materials, wastes or substances may be necessary. It should be understood that the property owner and potential future property owner(s) shall acknowledge and/or indemnify that LKGE has neither created or contributed to the creation or existence of any hazardous or non-hazardous materials, wastes or substances or otherwise dangerous conditions at the site. All site generated hazardous or non-hazardous materials, wastes or substances are the possession and responsibility of the property owner and potential future property owner(s).

Plan Review

This report is based on the development plans provided to our office. We recommend that the client's representative(s) provide a complete set of the construction, building and/or grading plans to our office for review and/or approval, prior to initiation of construction. Any change in the scope of the project, from that addressed herein, may require additional geotechnical services by LKGE. Formal plans should be reviewed and approved by LKGE, prior to initiation of construction. The appropriate government reviewing agency may require that the building and/or grading plans be signed by a licensed geotechnical engineer and/or a licensed engineering geologist, prior to initiation of construction. The plan review fees will be billed in accordance with our current fee schedule.

Government Reviewing Agency and Additional Geotechnical Services

This report is intended for submittal to the appropriate governmental authorities that control the issuance of necessary permits. The client or client's representative should submit the geotechnical reports to the appropriate government reviewing agency, unless specific arrangements are made with this office. It should be noted that the government reviewing agency has various fees for reviewing geotechnical reports, the fees for which are not included within our scope of work. If applicable, the report submittal fees will be billed in accordance with our current fee schedule. All geotechnical and/or engineering geologic aspects of the proposed development are subject to review and approval by the government reviewing agency. It should be understood that the government reviewing agency may approve or deny any portion of the proposed development, which may require additional geotechnical services by this office. Additional geotechnical services may include review responses, supplemental letters, plan review and signature, construction observations, meetings, etc. The fees for generating additional reports, letters, exploration, analysis, etc. will be billed on a time and material basis, per our previously approved work acknowledgment or a pre-determined, agreed fee.

Site Observations during Construction

The appropriate government reviewing agency or building department requires that the geotechnical consultant of record provide site observations during grading and construction. The purpose of the site inspections is to verify site geotechnical and/or engineering geologic conditions and conformance with the intensions of the recommendations addressed herein. Although certain geotechnical and/or engineering geologic observations may not be required by the building department, the more site inspections typically reduce the risk for future problems. It is the client's or the client's representative(s) responsibility to contact the appropriate building department or building official regarding approval for all required inspections. Following is a general list of inspections required by this firm.

a) Pre-grade meetings
b) Foundation excavations for all structures (residence, retaining walls, pools, etc.)
c) Temporary excavations/shoring
d) Bottom excavations for primary and/or secondary structural fills
e) Keyway excavations
f) Compaction testing for primary and secondary structural fills
g) Compaction testing for retaining wall backfill and utility trenches
h) Subdrains for retaining walls, swimming pools or ponds

It is recommended that all foundation excavations be approved by this firm prior to placing forms, steel reinforcement and/or concrete. Any fill which is placed at the site should be tested for compaction, especially if used for engineering purposes. All cut-slopes and temporary excavations should be observed by a representative of this firm. Should the observation reveal any unforeseen hazard, appropriate action will be recommended.

Representatives of LKGE will observe work in progress, perform tests on soil, and observe excavations and trenches. Excavation bottom observations should be requested before the placement of subdrains or compacted fill. The approved plans and permits should be on the job site and available for review by this office. The site inspections during construction will be billed on a time and material basis in accordance with our current fee schedule.

It is advised that the client contact LKGE at least 1 week in advance of commencing constructing and/or grading to allow for contractual agreements for geotechnical services during the construction phases of your project. Please advise this office at least 48 hours prior to any required verification or approval.

Construction Site Maintenance

It is the responsibility of the contractor to maintain a safe construction site and for the safe operation of all equipment. When excavations exist on the site, the areas should be secured by placing appropriate coverings, fencing, warning signs, etc. All excavations should be properly covered and secured. Excavation stock piles or spoil piles should either be removed from the site or be property compacted, in accordance with recommendations presented herein. Fill temporarily stock-piled on the site should be placed in stable or approved areas and away from slopes, excavations or improvements. Earth materials generated from grading should not be disposed of along slopes or other unapproved locations. Workers should not be allowed to enter any un-shored excavations over 5-feet in depth, or depth specified herein. Water should not be allowed to saturate open footing trenches. Temporary erosion control measures and proper drainage control should be followed, especially during the rainy season.

It should be understood that the project contractor or others shall supervise and direct the work and they shall be solely responsible for all construction means, methods, techniques, sequences and procedures, and shall be solely and completely responsible for conditions of the job site, including safety of all persons and property during the performance of the work.

Periodic or continuous observation by LKGE is not intended to include verification of dimensions or review of the adequacy of the contractor's safety measures in, on, or near the construction site.

Final As-built Reports

During or upon completion of the project or grading, the appropriate government reviewing agency or building department often requires interim or final as-built geotechnical reports prepared by this firm to document that foundations and/or fill placement were conducted per the recommendations addressed herein and/or the approved building and/or grading plans. Interim or final geotechnical reports are often required for placement of primary or secondary structural fill, retaining wall backfill, slope repairs, pile observations, etc. The interim or final geotechnical reports will be billed on a time and material basis, in accordance with our current fee schedule.

8. LIMITATIONS

This report has been compiled for the exclusive use of the addressee(s) of the report, and their authorized representatives. It shall not be transferred to, or used by, a third party, to another project or applied to any other project on this site, other than as described herein, without the written consent and/or thorough review by this firm.

This report and the exploration are subject to the following conditions. Please read this section carefully, it limits our liability.

This report is based on the development plans provided to our office. In the event that any significant changes (from those discussed herein) in the design and/or location of the proposed structure(s) are planned, the conclusions and recommendations contained in this report may not be considered valid unless the changes are reviewed by LKGE and the conclusions and recommendations are modified and/or approved by this firm after such review.

The conclusions and recommendations contained herein are based on the findings and observations made at the test pit, trench and/or boring locations. While no great variations in fill, soil and/or bedrock conditions are anticipated, if conditions are encountered during construction which appears to differ from those disclosed herein, this firm should be notified immediately, so as to consider the need for modifications or revised geotechnical recommendations. Compliance with the design concepts, specifications or recommendations during construction requires our review during construction which pertains to the specific recommendations contained herein.

The subsurface conditions, excavations, characteristics and geologic structure described herein and shown on the enclosed cross-section(s) have been projected from individual test pits, trenches and/or borings placed on the subject property. The subsurface conditions and excavation characteristics, and geologic structure shown should in no way be construed to reflect any variations which may occur between or away from these exploratory excavations. The projection of geologic data is based on available information and experience and should not be considered exact.

It should be noted that fluctuations in the level of the groundwater may occur at the site due to variations in rainfall, temperature, irrigation, water line leaks, sewage disposal and/or other factors not evident at the time of measurements reported herein. LKGE assumes no responsibility for groundwater variations which may occur across the site. High groundwater levels can be extremely hazardous and saturation of earth materials can cause subsidence, settlement and/or slippage at the site.

The intent of this report is to advise our client and/or client's representative(s) on soils and engineering geologic conditions at the site with respect to the proposed improvements. Implementation of the advice presented in the Recommendations Section of this report is intended to reduce the risk associated with the proposed project and should not be construed to imply total performance of the project. It should be understood that geotechnical consulting and the contents of this report are not perfect. Any errors or omissions noted by any party reviewing this report, and/or any other geotechnical aspect of this project, should be reported to this firm as soon as possible.

Geotechnical engineering is characterized by uncertainty or is described as an inexact science or art. The conclusions and recommendations presented herein are partly based on; 1) the evaluation of technical data gathered by this firm, 2) standard of practice, 3) experience, and, 4) professional judgment. The conclusions and recommendations presented herein should be considered advice. Other geotechnical consultants could arrive at different conclusions and recommendations. This report has been prepared in accordance with generally accepted practice. No warranties, either expressed or implied, are made as to the professional advice provided under the terms of the agreement and included in this report.

It should be understood that LKGE's services are limited to the disciplines of soils engineering and/or engineering geology. While LKGE may refer various professionals or outside services,

working in associated disciplines, to their client's or client's representatives, LKGE is not responsible for the performance of work by third parties, which may include, but are not limited to, surveyors, civil or structural engineers, architects, contractors, etc. It should be clearly understood that LKGE is not a licensed surveyor, architect, civil or structural engineer or contractor. LKGE's periodic or continuous inspection(s) of geotechnical work on an LKGE project shall not relieve third party professionals of their responsibility to perform their work in accordance with the applicable and/or approved geotechnical reports, plans, specifications, safety requirements, etc. It should be understood that LKGE's periodic or continuous inspection(s) of geotechnical work on an LKGE project does not imply that LKGE is observing, verifying and/or approving all site work. LKGE will only make site inspections, per our approved work authorization agreement(s) and/or related to the appropriate geotechnical field services provided by LKGE and will not relieve others of their professional responsibilities.

Should the project be delayed beyond the period of one year after the date of this report, the site should be observed and the report reviewed to consider possible changed conditions.

This report is issued with the understanding that it is the responsibility of the owner, or his representative, to assure that the information and recommendations contained herein are called to the attention of the designers and builders for the project.

Appendix A
Field Exploration

We performed a field exploration consisting of logging of five (5) exploratory soil borings on July 23, 2020. The exploration was performed using an 8-inch diameter hollow-stem auger drill rig and hand tools. The borings were advanced to a maximum depth of approximately 61 feet below existing grade. The approximate locations of our geotechnical exploration borings are shown on Plate 1.

The Boring Log is presented on Plates A-1 through A-5. The Boring Logs describe the earth materials encountered, samples obtained, and show the field and laboratory tests performed. The borings were logged by an engineer or geologist using the Unified Soil Classification System. Drive and bulk samples of representative earth materials were obtained from the borings and delivered to the geotechnical laboratory for testing.

A California modified sampler was used to obtain drive samples of the soil encountered. This sampler consists of a 3-inch outside diameter (O.D.), 2.4-inch inside diameter (I.D.) split barrel shaft that was driven a total of 6-inches into the soil at the bottom of the boring. The soil was retained in brass rings for laboratory testing. Additional soil from each drive remaining in the cutting shoe was usually discarded after visually classifying the soil.

In addition, a Standard Penetration Test (SPT) sampler was used to obtain drive samples of soil encountered. SPT sampler consists of a 2-inch O.D., 1.4-inch I.D. split barrel shaft that is advanced into the soil at the bottom of the drilled hole a total of 18 inches. Soil samples obtained by the SPT were retained in plastic bags.

Upon completion of the geologic and geotechnical logging, the borings were backfilled with soil from the cuttings.

Appendix B
Laboratory Testing

Representative soil samples collected from our field exploration were delivered to the EGL, Inc. of Arcadia, California for testing, and to evaluate relevant engineering properties. Based on our review of the laboratory data, LKGE concurs with and accept the laboratory testing results performed by EGL, Inc.

Laboratory Moisture Content and Density Tests

The moisture content and dry densities of selected driven samples obtained from the exploratory borings were evaluated in general accordance with the latest version of ASTM D 2937. The results are shown on the attached EGL report.

Sieve Analysis – Passing #200 Sieve

Soil fine content analysis utilizing #200 sieves was performed on representative soil sample(s) per the ASTM C136/C117 Method. The test results are presented in the attached EGL report.

Direct Shear Test

Direct shear testing was conducted on representative soil samples to determine their shear strength in accordance with the ASTM D3080. The sample was saturated under normal load before testing. For each test, three samples were placed, one at a time, into the test apparatus and subjected to a range of normal loads appropriate for the anticipated conditions. The samples were then sheared at a constant shear rate of 0.01-inches per minute. Shear deformation was recorded until a maximum of about 0.3 inches of horizontal displacement was achieved. Ultimate shear strengths for each sample were selected from the shear stress-displacement data. Based on the test data, the stress generally becomes constant beyond 0.2 inch of displacement and it is our opinion that the samples were sheared to its ultimate strength status. The shear strength parameters are presented in the following table and on the attached EGL report.

Sample Location	Depth (ft.)	Soil Type	Soil Description	Ultimate Strength Parameters	
				Cohesion (psf)	Friction Angle (degrees)
B-2	30	Qae	Silty SAND	156	30
B-3	6	Qae	Sandy CLAY	195	28

Consolidation Test

Consolidation testing was performed on representative soil samples under consolidated drained conditions per the ASTM D2435 Method. Axial loads were carried to a maximum of 8,000 psf. To hasten consolidation, investigate the collapsibility potential and similar possible adverse field conditions, water was added to an axial load of 2,000 psf. Compressibility of the soils within the zone of significant stress was investigated and the results are provided on the attached EGL report. The collapse/swell potential is tabulated below:

Sample Location	Depth (ft.)	Soil Type	Soil Description	Percent of Collapse (-)/ Swell (+)	Collapse Index
B-2	5	Af	Lean CLAY	-0.2	Slightly
B-2	20	Qae	Lean CLAY/Clayey SAND	-0.2	Slightly
B-4	10	Qae	Lean CLAY/Clayey SAND	-0.1	None

Corrosivity Tests

Soil pH and resistivity tests were performed on a representative soil sample in general accordance with the latest version of California Test Method 643. The chloride content of the selected sample was evaluated in general accordance with the latest version of California Test Method 422. The sulfate content of the selected samples was evaluated in general accordance with the latest version of California Test Method 417. The test results are presented in the attached EGL report.

RE: LABORATORY TEST RESULTS/REPORT
Project Name: 116 Poplar Avenue, Montebello
Project No: 20-0707
EGL Job No. 20-122-035

Dear Mr. Lin:

We have completed the testing program conducted on samples from the above project. The tests were performed in accordance with testing procedures as follows:

TEST	METHOD
Moisture & Dry Density	ASTM D2937
Consolidation	ASTM D2435
Direct Shear	ASTM D3080
Corrosion	CT-417,422,643
% Passing #200 Sieve	ASTM D1140

Enclosed is the Summary of Test Results.

We appreciate the opportunity to provide testing services to LK Geotechnical Engineering, Inc. Should you have any questions, please call the undersigned.

Sincerely yours,
EGLAB, Inc.

Ryan Jones, GE
Principal Engineer

Freeboard Detail

General Notes:

a) Retaining wall plans should be reviewed and approved by the geotechnical engineer.

b) These details apply only to retaining walls not surcharged by adjacent structures or adverse geologic conditions. See report for specific backfill recommendations if these conditions exist.

c) Walls over 12 feet in height are subject to a special review by the geotechnical engineer and modifications to the above requirements may be necessary (See Report).

d) Waterproofing should be provided where moisture intrusion through the wall is undesirable. Waterproofing of the walls is not under purview of the geotechnical engineer or geologist.

e) All drains should be sloped at a minimum 1 percent gradient to daylight.

f) Outlet portion of the subdrain should have a 4-inch diameter solid pipe discharged into a suitable disposal area designed by the project engineer. The subdrain outlet pipe should be accessible for maintenance and must remain clear at all times.

g) Other subdrain and backfill options are subject to the review by the geotechnical engineer and modification of design parameters.

h) Subdrain(s) should consist of 4-inch diameter perforated PVC pipe encased in 1 cubic foot per linear foot of 3/4-inch gravel or CalTrans Class II permeable material. If 3/4-inch gravel is used, the gravel should be wrapped with filter fabric. If CalTrans Class II permeable material is used, the pipe should be wrapped with filter fabric.

i) Subdrain type should be SDR35, Schedule 40 or approved equivalent. Pipe should be installed with perforations pointing down. Perforations should be 3/8-inches in diameter placed at the ends of a 120-degree arc in two rows at 3-inches on center (staggered).

j) Weepholes should be minimum 3-inches in diameter and provided at 10-foot maximum intervals. If exposure is permitted, weepholes should be located 12-inches above finished grade. If exposure is not permitted, such as for a wall adjacent to a sidewalk/curb, a pipe under the sidewalk discharging through the curb face or equivalent should be provided. For a basement type retaining wall, a proper subdrain outlet system should be provided.

k) All man-made fill shall be compacted to a minimum 90 percent of the maximum dry density of the fill material per the latest version of ASTM D1557. Where Cohesionless soil having less than 15% finer than 0.005 millimeters is used for fill, it shall be compacted to a minimum of 95% relative compaction based on maximum dry density (ASTM D1556). Placement of gravel in lieu of compacted fill is allowed only if complying with Section 91.7011.3 of the Los Angeles Building Code.

l) Additional or revised backfilling and compaction procedures may be required by the local governing agency.

m) All man-made fill, gravel or Class 2 filter material should be compacted at every 2-feet of vertical elevation rise using vibratory compaction equipment. Gravel backfill should be compacted to an equivalency of 95% relative density. All placement and compaction of backfill should be observed and verified by our field representative.

n) A modification or variance from the building official may be necessary for gravel backfill which exceeds 24-inches in width and 10-feet in height. Granular soil backfill compacted to 90% or 95% relative density should be placed where space between wall and face of excavation exceeds 24-inches in width (adjacent to gravel chimney).

Montebello, California

Dear Mr. Magna,

Pursuant to your request, LK Geotechnical Engineering, Inc. has completed a geotechnical investigation and prepared this report for the proposed improvements at the subject site. The primary objective of this investigation was to provide our best estimate of the geotechnical factors that pertain to the gross stability of the proposed improvements and to evaluate alternatives for a foundation system for the proposed structures.

The report includes a description and an evaluation of the soil materials and provides soils engineering recommendations for construction of the proposed improvements. This report is intended for submittal to the appropriate governmental authorities that control the issuance of necessary permits.

Based on our findings, the proposed project is geotechnically feasible, provided that the recommendations in this report are incorporated into the design and are implemented during construction of the project.

If you have any questions regarding the information contained in this report, please feel free to call this office.

Sincerely,
LK GEOTECHNICAL ENGINEERING, INC.

Sean Lin, G.E. 2921
Principal Engineer

1. SCOPE OF WORK

To prepare this report, we have performed the tasks described in the following subsections:

1.1. Literature Review

We reviewed geological literature including geologic maps, topographic maps and aerial photographs relevant to the subject site in preparation of this report. A list of literature reviewed is presented in the "References" section of this report.

1.2. Field Exploration

We performed field exploration consisting of logging of three (3) exploratory soil borings on July 23, 2020. The exploration was performed using hollow-stem auger drill rig and hand labor. The borings were advanced to a maximum depth of approximately 21 feet below the existing grade. The approximate locations of the borings are shown on Plate 1. Detailed descriptions of the soils encountered during drilling are presented in Appendix A – Field Exploration.

1.3. Field Percolation Testing

We performed a percolation testing by using one of the exploratory borings to determine the infiltration rate of on-site soil. Detailed testing data is presented in Appendix A – Field Exploration.

1.4. Geotechnical Laboratory Testing

Representative soil samples collected from our field exploration were delivered to the EGL, Inc. (EGL) of Arcadia, California for testing, and to evaluate relevant engineering properties. The detailed laboratory test results are presented in Appendix B – Laboratory Testing. Based on our review of the laboratory data, LKGE concurs with and accept the laboratory testing results performed by EGL, Inc.

1.5. Engineering Analysis and Report Preparation

We compiled all geological and geotechnical data obtained from literature review, field exploration and laboratory test results, and then prepared this report to present our findings and the geotechnical recommendations, including seismic considerations, grading, foundations, foundation setback, retaining walls, floor slabs, temporary excavations, and drainage.

2. PROPOSED DEVELOPMENT AND SITE DESCRIPTION

2.1. Proposed Development

It is our understanding that the proposed project consists of removing the existing structures and then constructing a 16-unit, 3-Story apartment building. The new structure comprises of

2-level of residential dwelling unit over at-grade parking. No subterranean basement is proposed. The proposed structure is shown on Plate 1 – Site Plan and Geotechnical Exploration Map.

2.2. Site Description

The project site is located at 129 & 133 N. Poplar Avenue in the City of Montebello, California. The site is bounded by N. Poplar Avenue to the east, 2-story apartment to the south, 1-story single-family house to the north, and an alley to the west.

The site is currently occupied by two, 1-story single-family houses and a detached garages, landscape, and mature trees.

The site is essentially level. The regional topographic gradient is approximately 0.5 percent toward the south. Drainage across the site is by uncontrolled sheet flow to the adjacent sidewalks, alley and drainage course, as well as by infiltration within unpaved areas.

3. SITE GEOLOGY AND SUBSURFACE CONDITIONS

3.1. Regional Geology

According to the Geologic Map of the El Monte and Baldwin Park Quadrangle (Dibblee and Ehrenspeck, 1999), the project the site is underlain by Older Alluvium (geologic map symbol Qae). This material composes primarily sandy silt to silty sand. A portion of the geologic map is reproduced as Plate 2 – Regional Geologic Map.

3.2. Subsurface Earth Materials

Based on our field exploration, the earth materials observed at the site consist of older alluvium.

3.2.1. Older Alluvium (Qae)

Older alluvium consisting of brown to orange brown sandy clay to clayey sand/ silty sand was encountered in our exploratory borings at the site. Older alluvium was observed to be medium stiff to very stiff and dry to moist. The upper 18 inches of the older alluvium is considered disturbed and not suitable for foundation support. The undisturbed older alluvium is considered suitable for foundation or slab support for the proposed structures and/or for support of new compacted fill, provided that our recommendations are followed and integrated into the improvement plans.

3.3. Groundwater

No groundwater was observed on the site or in our exploratory borings to a maximum depth of 21.5 feet below existing grade. According to the State of California, Seismic Hazard Zone Report of the El Monte Quadrangle, the site is located within an area with historically highest groundwater level reportedly at approximately between 20- and 50-feet below ground surface (Plate 4). It appears the 20-feet historical groundwater contour line is below the

ground elevation along Rio Hondo channel which is approximately 30 feet below the Poplar Avenue. Therefore, the groundwater level appears to be well below the level of the proposed structures. It should be noted that local fluctuations in groundwater levels may occur due to seasonal variations in rainfall, irrigation and water line leaks.

4. GEOLOGIC AND SEISMIC HAZARDS EVALUATION

4.1. Seismic Hazard Zones Evaluation

The southern California region is seismically active and commonly experiences strong ground shaking resulting from earthquakes along active faults. Ground shaking resulting from a moderate to major earthquake (Magnitude 6.0 or greater) can be expected during the lifespan of the existing and/or proposed structures. Property owners and the general public should be aware that any structure or slope in the southern California region could be subject to significant damage as a result of a moderate or major earthquake. The hazards associated with seismic activity in the vicinity of the site are discussed and evaluated in the following sections.

4.1.1. Earthquake Fault Zone

The State of California established the Alquist-Priolo Earthquake Fault Zoning Act in 1972 which went into effect in 1973. The purpose of this Act is to prohibit the construction of most structures for human occupancy across the traces of active faults and to mitigate the hazard of fault rupture. An "active fault" is defined by the State Mining and Geology Board as one which had surface displacement within the Holocene era (+/- 11,000 years) and is well defined at the surface. The term “sufficiently active” has been used if there is evidence of Holocene surface displacement along one or more of its segments or branches.

The Act was renamed the Alquist-Priolo Special Studies Zones Act in 1975 and then Alquist-Priolo Earthquake Fault Zoning Act in 1994. The original designation “Special Studies Zones” has been renamed “Earthquake Fault Zones”. Under the Act, the State Geologist is required to delineate Earthquake Fault Zones (EFZ) along active faults in California. Development within these zones must include geologic investigations demonstrating that the sites are not threatened by surface displacement from future faulting. The California Geologic Survey (CGS) is required to delineate active faults, compile maps of EFZs and submit such Official Maps to the public and continually review and revise EFZs based on new geologic and seismic data. EFZ boundaries on early maps were positioned about 660 feet (200 meters) away from the fault traces to accommodate imprecise locations of the faults and possible existence of active branches. The policy since 1997 is to position the EFZ boundaries about 500 feet (150 meters) away from major active faults and about 200 to 300 feet (60 to 90 meters) away from well defined, minor faults.

Based on our review of California Geological Survey 2018 seismic hazard zones map (Plate 3), the site is not located within an Earthquake Fault Zone. The closest known fault is the Elsinore Fault which is mapped about 2.5 miles east of the site.

4.1.2. Soil Liquefaction Potential

Soil liquefaction occurs when the pore pressures generated within a soil mass approach the effective overburden pressure. Liquefaction of soils may be caused by cyclic loading such as that imposed by ground shaking during earthquakes. The increase in pore pressure results in a loss of strength, and the soil then can undergo both horizontal and vertical movements, depending on the site conditions. Other phenomena associated with soil liquefaction include sand boils, ground oscillation, and loss of foundation bearing capacity. Liquefaction is generally known to occur in loose, saturated, relatively clean, fine-grained cohesionless soils at depths shallower than approximately 50 feet. Factors to consider in the evaluation of soil liquefaction potential include groundwater conditions, soil type, grain size distribution, relative density, degree of saturation, and both the intensity and duration of ground motion.

Based on our review of California Geological Survey Seismic Hazard Zones Map (Plate 3), the site is not located within a potential liquefaction hazard zone. The soil liquefaction potential at the site is considered low. Consequently seismically-induced settlement is negligible.

4.2. CBC Seismic Design Parameters

The future structures should be designed by the structural engineer in accordance with the applicable seismic building code. Based on our geotechnical investigation, the subject site is classified as Site Class D in accordance with the 2019 California Building Code that refers to the ASCE 7-16.

Per Section 11.4.8 of ASCE 7-16, structures shall be designed for the seismic response coefficient C_s determined by Eq. (12.8-2) for values of $T \leq 1.5\ T_s$ and taken as equal to 1.5 times the value computed in accordance with either Eq. (12.8-3) for $T_L \geq T > 1.5\ T_s$ or Eq. 37.5 (12.8-4) for $T > T_L$, where

T = the fundamental period of the building
$T_s = S_{D1}/S_{DS}$
T_L = long-period transition period

The design spectral response acceleration parameters presented on the following table generated by the Applied Technology Council (ATC) website, may be utilized for seismic design:

Site location (latitude, longitude): (34.0095, -118.0996)				
Spectral Period, T (second)	MCE_R ground motion (g)	Site-modified Spectral acceleration (g)		**Seismic design acceleration (g)**
0.2	S_s = 1.882	F_a = 1.0	S_{MS} = 1.882	**S_{DS} = 1.254**
1.0	S_1 = 0.674	F_v = 1.7	S_{M1} = 1.146	**S_{D1} = 0.764**
Site modified peak ground acceleration PGA_M = 0.893 g				
Long-period transition period T_L = 8 second				
Seismic Design Category = D				

If seismic response coefficient C_s recommended above is not applicable for structural design, our office can perform a site-specific ground motion hazard analysis upon the project structural engineer's request.

Present building codes and construction practices, and the recommendations presented in this report, are intended to minimize structural damage to buildings and prevent loss of life as a result of a moderate or a major earthquake. They are not intended to totally prevent damage to structures, graded slopes and natural hillsides due to moderate or major earthquakes. While it may be possible to design structures and graded slopes to withstand strong ground motion, the construction costs associated with such designs are usually prohibitive, and the design restrictions may be severely limiting. Earthquake insurance is often the only economically feasible form of protection for your property against major earthquake damage. Damage to sidewalks, steps, decks, patios and similar exterior improvements can be expected as these are not normally controlled by the building code.

5. GEOTECHNICAL ENGINEERING RECOMMENDATIONS

5.1. Geotechnical Overview

Based on the findings of our investigation, the site is considered to be suitable from a soils engineering standpoint for construction of the proposed structures, provided the recommendations included herein are followed and integrated into the building and/or grading plans.

The following is a list of geotechnical considerations for this project:

- Surficial disturbed/loose soils were encountered at various locations within the property. We recommend that the proposed buildings be supported on a uniform compacted fill blanket per our recommendations presented in "Site Preparation and Earthwork" section.

- The near surface soil has "Low" expansive potential. Our recommendations have been incorporated the mitigation for expansive soil.

- The near surface soil has “slightly” collapsible potential. Our recommendations have been incorporated the mitigation for collapsible soil.

- On-site near surface soil is not considered as “corrosive soil” based on the laboratory testing results.

Our geotechnical engineering analyses performed for this report were based on the preliminary information provided to us. If the design substantially changes, then our geotechnical engineering recommendations would be subject to revision based on our evaluation of the changes.

5.2. Expansive Soil Evaluation

Expansive soils are characterized by their ability to undergo significant volume changes (shrink or swell) due to variations in moisture content. Changes in soil moisture content can result from rainfall, landscape irrigation, utility leakage, roof drainage, perched groundwater, drought, or other factors, and may cause unacceptable settlement or heave of structures, concrete slabs supported on-grade, or pavements supported over these materials. Depending on the extent and location below finished subgrade, these soils could have a detrimental effect on the proposed construction.

Based on our review of laboratory testing results, the near surface soil has “Low” expansive potential. Our recommendations have been incorporated the mitigation for expansive soil.

5.3. Collapsible Soil Evaluation

Based on our review of the laboratory testing results, the on-site near surface soil has “slightly” collapsible potential. Our recommendations have been incorporated the mitigation for collapsible soil.

5.4. Corrosive Soil Evaluation

The potential for the near-surface on-site materials to corrode buried steel and concrete improvements was evaluated preliminarily. In accordance with the Caltrans Corrosive Guidelines, corrosive soil is defined as the soil has a pH less than 5.5, or chloride concentration greater than 500 ppm, or sulfate concentration in soils greater than 2,000 ppm, or minimum resistivity less than 1,000 ohm-centimeters. Laboratory testing was performed to evaluate pH and electrical resistivity, as well as chloride and sulfate contents. These laboratory test results are presented in Appendix B.

Based on our review of laboratory test results, the followings are our findings:

- The potential for chloride attack of reinforcing steel in concrete structures and pipes in contact with on-site soil is negligible.

- The potential for sulfate attack on concrete in contact with the on-site soil is negligible in accordance with ACI 318, Table 4.3.1. As a minimum, we recommend that Type I or II cement and a water-cement ratio of no greater than 0.5 be used on the project.

- Based on soil resistivity results, the on-site soil is not considerred corrosive to buried ferrous metals. In general, conventional corrosion protection measures for metal in contact with soil may include the following:

    - Underground steel utilities should be given a high-quality protective coating such as 40 mil extruded polyethylene, 20 mil plastic tape over primer per AWWA Standard C209, or hot applied coal tar enamel or tape per AWWA Standard C203.

    - All underground steel should be electrically insulated from above ground steel, dissimilar metals, and cement-mortar or concrete coated steel.

    - Underground steel pipe should be bonded for electrical continuity if rubber-gasketed, mechanical, grooved-end, or other non-conductive type joints are used. In addition, cathode protection is recommended for underground steel utilities.

If special corrosion protection is required for certain performance criteria determined by the project designer, a corrosion specialist should be consulted regarding suitable types of piping and appropriate protection for underground metal conduits.

5.5. Stormwater Infiltration Evaluation

Percolation testing was performed using the falling head boring test method in accordance with the Los Angeles County “Guidelines. The water level was measured to the nearest tenth of a foot and converted to inches in the calculation. The infiltration rate is shown in the table below and the raw data is attached in Appendix A.

Soil Infiltration Rate

Boring No.	Total Depth of Boring (ft)	Depth of Testing Zone (ft)	Soil Description of Testing Zone	Infiltration Rate (inch/hour)
B-1	20	15 – 20	Sandy Silt	0.72

The project Civil Engineer should review the raw data of percolation test to determine infiltration rate for design of the proposed infiltration system. The proposed infiltration system should comply with the following setbacks in accordance with Los Angeles County guideline.

Stormwater Infiltration Facility Setback Requirements

Setback from	Distance
Property lines and public right of way	5 feet
Any foundation	15 feet or within 1:1 plane drawn up from the bottom of foundation, whichever is greater
Face of any slope	H/2 or 5 feet minimum (H is height of slope)
Water well used for drinking water	100 feet

5.6. Site Preparation and Earthwork

Prior to construction/grading, the area of the proposed development should be clear of any loose surficial soils, vegetation and/or man-made debris. Demolition debris and other unsuitable materials should be stripped and removed from the site. Water lines or other old utility lines or installations to be abandoned should be removed or crushed in place. Holes resulting from removal of buried obstructions which extend below finished site grades should be backfilled with compacted soils.

5.6.1. Over-Excavation and Subgrade Preparation

For building foundation support, we recommend over-excavate at least 3 foot below the proposed footing bottom, or 5 feet below the existing grade, or to the depth of undocumented fill, whichever is deeper. The lateral extent of the over-excavation should be at least 5 feet beyond the building line (where space permits) or equidistant to the thickness of fill below footing, whichever is greater.

For any ancillary structures (i.e. fence walls, canopies, trash enclosure, etc.), we recommend over-excavate at least 1 foot below the proposed footing bottom, or to the depth of undocumented fill, whichever is deeper. The lateral extent of the over-excavation should be equidistant to the thickness of fill below footing (where space permits).

For hardscape (patios, steps, walkways, etc.), we recommend scarify 12 inches below the subgrade, or to the depth of undocumented fill, whichever is deeper, and then recompact to 90% relative compaction.

For pavement, we recommend scarify at least 12 inches below the subgrade, or to the depth of undocumented fill, whichever is deeper, and then recompact to 95% relative compaction.

Any excavated bottoms for footings or to receive new compacted fill should be inspected and approved by a representative from LKGE. prior to compaction work. Deeper excavations may be required in areas where soft, saturated, or unsuitable materials, for example, tree root balls or undocumented fill are encountered.

5.6.2. Compaction

On-site materials are considered to be suitable for compaction, provided that all deleterious materials are removed from the site prior to compaction.

All new compacted fill should be compacted to at least 90 percent of the maximum dry density, as determined by the current ASTM D1557 and at about 2 percent above optimum moisture content. Fill should be placed in horizontal lifts of approximately 8 inches in loose thickness, and then compacted by mechanical methods, using sheepsfoot rollers, multiple wheel pneumatic tired rollers, or other appropriate compacting rollers.

It may be necessary to import soils to the site to be used as compacted fill. Imported materials should be a sandy type of material and approved by the geotechnical engineer prior to transporting to the job site. The sandy material should not have an Expansion Index which exceeds 20 and should not contain rocks larger than 8-inches maximum size.

5.6.3. Shrinkage/Bulking Due to Compaction

Based on our review of the in-situ soil density data, preliminary volumetric shrinkage on the order of 10 to 15 percent as a result of compaction of onsite soil may be assumed.

5.6.4. Excavation Characteristics

The earth materials underlying the site should be generally excavatable with heavy-duty earthwork equipment in good working condition. Some gravels and man-made debris should be anticipated within the fill soils. Caved-in conditions should be anticipated in the sandy soil during temporary excavation.

5.7. Temporary Excavation

The maximum recommended height of unsurcharged, temporary vertical excavations in the earth materials at the site is 5 feet. Excavations above this height should be trimmed to a 1:1 (H:V) ratio where the space is available. Surcharge loads, including construction vehicles and materials, should not be placed within five (5) feet of the unsupported excavation edge.

Excavations shall not remove the lateral support from a public way, from an adjacent property or from an existing structure. Where proper temporary vertical excavations are not feasible due to space constraints, slot-cut or temporary shoring may be utilized. Temporary excavation may be proceeded with the “A-B-C” slot cut method with a maximum 8-foot slot width to a maximum height of 8 feet (Plate SC-1). The excavated slots should not be left open overnight and should be backfilled on the same day it was excavated before the next set of slots are excavated.

Temporary shoring consisting of “trench box” system may be used for surcharged footing or trench excavations (if applicable). It is the contractor’s responsibility to provide sufficient shoring during construction.

Surfaces exposed in slope excavations should be kept moist but not saturated to minimize raveling and sloughing during construction. Adequate provisions should be made to protect the slopes from erosion during periods of rainfall. Water should not be allowed to pond on the top of the excavation or to flow towards it. All excavations should be stabilized within 30 days of initial excavation.

All excavations shall be made in accordance with the regulations of the State of California, Division of Occupational Safety and Health, (Cal/OSHA). These recommended temporary excavation slopes do not preclude local raveling and sloughing. Provided our recommendations are followed, the resulting temporary excavations are anticipated to be safe from a geotechnical standpoint for the proposed construction operations and should not expose workers to hazards due to cave-ins, provided that geologic conditions exposed by the excavations are as anticipated.

Confined or trench excavations (i.e. retaining walls or utility trench excavations) should be made in accordance with the regulations of the State of California, Division of Occupational Safety and Health (Cal/OSHA). We recommend that confined excavations should be shored using hydraulic shoring, screw jacks or timber shoring, as determined by the project engineer.

All temporary excavations at the site should be observed and monitored by our representative to verify soil conditions so that any necessary modifications can be made based on variations of soil encountered at the site. Surcharged temporary excavations and shoring should be continuously observed by our representative. If adverse conditions are encountered during excavations, additional recommendations will be provided.

It is recommended that a pre-excavation site meeting be attended by the grading contractor, the soils engineer and an agency representative to discuss methods and sequence of excavation.

5.8. Conventional Footings

Conventional footings can be used for support of the proposed structures, provided footings are founded on compacted fill. The reinforcement of footings shall be designed by the project structural engineer.

Continuous footings should be at least 18 inches in width and at least 24 inches deep founded on compacted fill, and may be designed using an allowable bearing pressure of 2,000 psf.

Square footings should be at least 24 inches in width and at least 24 inches deep founded on compacted fill, and may be designed using an allowable bearing pressure of 2,000 psf.

The allowable bearing capacity can increase 300 psf for each additional foot of width, and 450 psf for each additional foot of depth to a maximum allowable capacity of 4,500 psf.

The bearing pressure given is for the total of dead and frequently applied live loads and may be increased by one-third for short duration loading which includes the effects of wind or seismic forces.

The estimated static settlement is expected to be less than ½ inch with differential settlement estimated to be less than ¼ inch within a span of 30 feet. Settlement of the proposed foundation system supported in dense sand is expected to occur on initial load application.

Resistance to lateral loading may be provided by friction acting at the base of foundations and by passive earth pressure within compacted fill. An allowable coefficient of friction of 0.3 may be used with the dead load forces. Passive earth pressure may be computed as an equivalent fluid having a density of 300 pcf with a maximum earth pressure of 4,500 psf. When combining passive and friction for lateral resistance, the passive component should be reduced by one-third.

5.9. Conventional Footings for Ancillary Structures

For light-weight ancillary structures (e.g. fence walls, trash enclosures, planter walls, etc.), conventional shallow footings can be used, provided that footings are placed on compacted fill per our “Site Preparation and Earthwork” recommendations.

For the design of spread footings for other light-weight structures, we recommend the bottom of square or continuous footings be founded at least 12 inches below the proposed ground surface. A minimum footing width of 18 inches is recommended for square footings and 12 inches for continuous footings. The allowable bearing value for footings with above minimum sizes is 1,500 psf for dead plus live load. Based on the allowable net bearing pressures presented above, static settlement is anticipated to be less than ½ inch. Differential settlement is expected to be up to one-half of the total settlement over a 30-foot span. Most of the static settlement at the project site is expected to occur immediately after the application of the load.

Resistance to lateral loading may be provided by friction acting at the base of foundations and by passive earth pressure. An allowable coefficient of friction of 0.3 may be used with the dead load forces. Passive earth pressure may be computed as an equivalent fluid having a density of 300 pcf with a maximum earth pressure of 4,500 psf. When combining passive and friction for lateral resistance, the passive component should be reduced by one-third.

5.10. Slab-On-Grade

Concrete slab-on-grade may be used for the proposed building and should be supported on compacted fill, per the “Site Preparation and Earthwork” recommendations.

Concrete slabs should be at least 4 inches thick and should be reinforced with a minimum of #4 rebar spaced not exceeding 16 inches on center, each way. The project structural engineer should design the reinforcement of slab based on the design performance criteria.

5.11. Moisture Retarder

Slabs to be covered with flooring should be protected by an acceptable plastic vapor retarder/barrier (minimum 10 mil thickness) placed on the firm subgrade. If moisture vapor transmission is a concern to the facility owner, an expert should be consulted to provide

additional recommendations for the design and construction of slabs in moisture sensitive flooring areas.

5.12. Hardscape

Patios, steps, walkways, etc. are not normally subject to building code requirements for structural support. In order to reduce the potential for distress due to potential settlement, the hardscape should be supported by compacted fill, and it may be desirable to provide additional steel and concrete thickness determined by the project structural engineer. At a minimum, hardscape slab should be reinforced with a minimum of #4 rebar spaced at a maximum distance of 16 inches on center, each way. It should be noted that hardscape constructed to the preceding specification may be subject to distress over time. Periodic maintenance or replacement may be necessary.

5.13. Pavement

Prior to placing pavement structural section, the subgrade shall be prepared in accordance with the recommendations in “Site Preparation and Earthwork” section.

A flexible pavement section consisting of 3 inches of asphalt concrete over 4 inches of base material should be used. A flexible pavement section consisting of 4 inches of concrete over 6 inches of base material should be used for service lanes (truck and loading area), if applicable. The base material should be crushed aggregate base.

As an alternative, a rigid pavement section consisting of Portland Cement Concrete (PCC) can be used. The traffic loading is expected to be primarily light vehicles. Recommendations for the rigid concrete pavement design is provided herein on the following table.

Concrete Thickness	5 inches
95 Percent Compacted Subgrade	12 inches
Contraction Joint Spacing	10 ft.
Depth of Joint	1 inch
Compressive Strength of Concrete @ 28 days	3500 psi
Modulus of Rupture of Concrete @ 28 days	550 psi

Concrete slabs should be separated from other structures or fixed objects within or abutting the paved area by isolation joints. This serves to offset the effects of the differential horizontal and vertical movements of the structures which may fracture the concrete slab. When isolation joints are located where wheel and other loads are applied, the pavement edge at the joint should be thickened by 20 percent or two inches, whichever is greater.

A joint filler should be applied to any new isolated joints within the concrete slab. The joint filler should extend through the slab thickness and should be recessed below the pavement surface so that the joint can be sealed with joint sealant material. The types of joint filler

materials recommended include bituminous mastic, bituminous impregnated cellulose or cork, sponge rubber, or resin-bound cork. Joint filler materials should be installed in accordance with the recommendations of the manufacturer.

5.14. Drainage Protection

All pad and roof drainage should be collected and transferred to the street or an approved area in non-erosive drainage devices. Drainage should not be allowed to pond on the pad or against any foundation or retaining wall.

We recommend a minimum 5 percent slope away from the building foundations for a horizontal distance of 3 feet be established for any landscape areas immediately adjacent to the building foundations. In addition, we recommend a minimum 2 percent slope away from the building foundations be established for any impervious surfaces immediately adjacent to the building foundations for a minimum horizontal distance of 10 feet. Lastly, we recommend the installation of roof gutters and downspouts which deposit water into a buried drain system be installed instead of discharging surface water into planter areas adjacent to structures.

It is the responsibility of the contractor and ultimately the developer and/or property owner to ensure that all drainage devices are installed and maintained in accordance with the approved plans, our recommendations, and the requirements of all applicable municipal agencies. This includes installation and maintenance of all subdrain outlets and surface drainage devices.

It is recommended that watering be limited or stop altogether during the rainy season when little irrigation is required. Over-saturation of the ground can cause major subsurface damage. Maintaining a proper drainage system will minimize the shrink/swell potential of sub-soils.

5.15. Pre-Construction Survey

We recommend that the client's representative prepare a pre-construction survey prior to site development. The pre-construction survey should document existing site conditions and performance of offsite structures (i.e. property line block walls and fences) prior to construction (where applicable). If adverse conditions are encountered during excavations, additional recommendations may be necessary.

6. SECTION 111 STATEMENT

It is the finding of this firm that the proposed structures will be safe and that they will not be affected by any hazard from landslide, liquefaction, lateral spreading, slope instability, flood hazard, tsunamis, seiches, settlement or slippage and the completed work will not adversely affect adjacent property, in compliance with the Los Angeles County code, provided that our recommendations are followed.

7. GENERAL INFORMATION

Accuracy of Provided Drawings

LK Geotechnical Engineering, Inc. (LKGE) investigation, analysis, findings and/or recommendations of a site, with respect to the proposed improvements, are often dependent on several factors or information provided to LKGE by the client and/or the client's representative(s). Provided information or Drawings may include topographic surveys, architectural drawings, engineering plans and/or grading plans. It is LKGE's assumption that the provided Drawings, to be utilized as part of our investigation, accurately depict topographic conditions, existing and/or proposed structures and grades, property lines, easements, etc. It should be understood that LKGE's use of the provided Drawings does not mean or confirm that the provided Drawings are accurate. If revisions are made to the site Drawings, these documents should be submitted to LKGE as soon as possible. Additional exploration, analysis and/or revised recommendations may be necessary depending upon our review of the revised Drawings, etc.

Environmentally Hazardous or Non-Hazardous Materials

It should be clearly understood that environmental geologic services are not within the scope of this study. Environmental geologic services may include the detection of hazardous or non-hazardous materials, wastes or substances existing on the site from research of available records, exploratory methods, sampling, laboratory analysis, etc. or the recommended treatment and/or disposal of these materials, wastes or substances. If hazardous or non-hazardous materials, wastes or substances are revealed by supplementary investigations or studies or are encountered during construction or grading operations, appropriate environmental investigation(s) and analysis may be required. In this case, mitigation and/or treatment of hazardous or non-hazardous materials, wastes or substances may be necessary. It should be understood that the property owner and potential future property owner(s) shall acknowledge and/or indemnify that LKGE has neither created or contributed to the creation or existence of any hazardous or non-hazardous materials, wastes or substances or otherwise dangerous conditions at the site. All site generated hazardous or non-hazardous materials, wastes or substances are the possession and responsibility of the property owner and potential future property owner(s).

Plan Review

This report is based on the development plans provided to our office. We recommend that the client's representative(s) provide a complete set of the construction, building and/or grading plans to our office for review and/or approval, prior to initiation of construction. Any change in the scope of the project, from that addressed herein, may require additional geotechnical services by LKGE. Formal plans should be reviewed and approved by LKGE, prior to initiation of construction. The appropriate government reviewing agency may require that the building and/or grading plans be signed by a licensed geotechnical engineer and/or a licensed engineering geologist, prior to initiation of construction. The plan review fees will be billed in accordance with our current fee schedule.

Government Reviewing Agency and Additional Geotechnical Services

This report is intended for submittal to the appropriate governmental authorities that control the issuance of necessary permits. The client or client's representative should submit the geotechnical reports to the appropriate government reviewing agency, unless specific arrangements are made with this office. It should be noted that the government reviewing agency has various fees for reviewing geotechnical reports, the fees for which are not included within our scope of work. If applicable, the report submittal fees will be billed in accordance with our current fee schedule. All geotechnical and/or engineering geologic aspects of the proposed development are subject to review and approval by the government reviewing agency. It should be understood that the government reviewing agency may approve or deny any portion of the proposed development, which may require additional geotechnical services by this office. Additional geotechnical services may include review responses, supplemental letters, plan review and signature, construction observations, meetings, etc. The fees for generating additional reports, letters, exploration, analysis, etc. will be billed on a time and material basis, per our previously approved work acknowledgment or a pre-determined, agreed fee.

Site Observations during Construction

The appropriate government reviewing agency or building department requires that the geotechnical consultant of record provide site observations during grading and construction. The purpose of the site inspections is to verify site geotechnical and/or engineering geologic conditions and conformance with the intensions of the recommendations addressed herein. Although certain geotechnical and/or engineering geologic observations may not be required by the building department, the more site inspections typically reduce the risk for future problems. It is the client's or the client's representative(s) responsibility to contact the appropriate building department or building official regarding approval for all required inspections. Following is a general list of inspections required by this firm.

a) Pre-grade meetings
b) Foundation excavations for all structures (residence, retaining walls, pools, etc.)
c) Temporary excavations/shoring
d) Bottom excavations for primary and/or secondary structural fills
e) Keyway excavations
f) Compaction testing for primary and secondary structural fills
g) Compaction testing for retaining wall backfill and utility trenches
h) Subdrains for retaining walls, swimming pools or ponds

It is recommended that all foundation excavations be approved by this firm prior to placing forms, steel reinforcement and/or concrete. Any fill which is placed at the site should be tested for compaction, especially if used for engineering purposes. All cut-slopes and temporary excavations should be observed by a representative of this firm. Should the observation reveal any unforeseen hazard, appropriate action will be recommended.

Representatives of LKGE will observe work in progress, perform tests on soil, and observe excavations and trenches. Excavation bottom observations should be requested before the placement of subdrains or compacted fill. The approved plans and permits should be on the job

site and available for review by this office. The site inspections during construction will be billed on a time and material basis in accordance with our current fee schedule.

It is advised that the client contact LKGE at least 1 week in advance of commencing constructing and/or grading to allow for contractual agreements for geotechnical services during the construction phases of your project. Please advise this office at least 48 hours prior to any required verification or approval.

Construction Site Maintenance

It is the responsibility of the contractor to maintain a safe construction site and for the safe operation of all equipment. When excavations exist on the site, the areas should be secured by placing appropriate coverings, fencing, warning signs, etc. All excavations should be properly covered and secured. Excavation stock piles or spoil piles should either be removed from the site or be property compacted, in accordance with recommendations presented herein. Fill temporarily stock-piled on the site should be placed in stable or approved areas and away from slopes, excavations or improvements. Earth materials generated from grading should not be disposed of along slopes or other unapproved locations. Workers should not be allowed to enter any un-shored excavations over 5-feet in depth, or depth specified herein. Water should not be allowed to saturate open footing trenches. Temporary erosion control measures and proper drainage control should be followed, especially during the rainy season.

It should be understood that the project contractor or others shall supervise and direct the work and they shall be solely responsible for all construction means, methods, techniques, sequences and procedures, and shall be solely and completely responsible for conditions of the job site, including safety of all persons and property during the performance of the work.

Periodic or continuous observation by LKGE is not intended to include verification of dimensions or review of the adequacy of the contractor's safety measures in, on, or near the construction site.

Final As-Built Reports

During or upon completion of the project or grading, the appropriate government reviewing agency or building department often requires interim or final as-built geotechnical reports prepared by this firm to document that foundations and/or fill placement were conducted per the recommendations addressed herein and/or the approved building and/or grading plans. Interim or final geotechnical reports are often required for placement of primary or secondary structural fill, retaining wall backfill, slope repairs, pile observations, etc. The interim or final geotechnical reports will be billed on a time and material basis, in accordance with our current fee schedule.

8. LIMITATIONS

This report has been compiled for the exclusive use of the addressee(s) of the report, and their authorized representatives. It shall not be transferred to, or used by, a third party, to another project or applied to any other project on this site, other than as described herein, without the written consent and/or thorough review by this firm.

This report and the exploration are subject to the following conditions. Please read this section carefully, it limits our liability.

This report is based on the development plans provided to our office. In the event that any significant changes (from those discussed herein) in the design and/or location of the proposed structure(s) are planned, the conclusions and recommendations contained in this report may not be considered valid unless the changes are reviewed by LKGE and the conclusions and recommendations are modified and/or approved by this firm after such review.

The conclusions and recommendations contained herein are based on the findings and observations made at the test pit, trench and/or boring locations. While no great variations in fill, soil and/or bedrock conditions are anticipated, if conditions are encountered during construction which appears to differ from those disclosed herein, this firm should be notified immediately, so as to consider the need for modifications or revised geotechnical recommendations. Compliance with the design concepts, specifications or recommendations during construction requires our review during construction which pertains to the specific recommendations contained herein.

The subsurface conditions, excavations, characteristics and geologic structure described herein and shown on the enclosed cross-section(s) have been projected from individual test pits, trenches and/or borings placed on the subject property. The subsurface conditions and excavation characteristics, and geologic structure shown should in no way be construed to reflect any variations which may occur between or away from these exploratory excavations. The projection of geologic data is based on available information and experience and should not be considered exact.

It should be noted that fluctuations in the level of the ground-water may occur at the site due to variations in rainfall, temperature, irrigation, water line leaks, sewage disposal and/or other factors not evident at the time of measurements reported herein. LKGE assumes no responsibility for groundwater variations which may occur across the site. High groundwater levels can be extremely hazardous and saturation of earth materials can cause subsidence, settlement and/or slippage at the site.

The intent of this report is to advise our client and/or client's representative(s) on soils and engineering geologic conditions at the site with respect to the proposed improvements. Implementation of the advice presented in the Recommendations Section of this report is intended to reduce the risk associated with the proposed project and should not be construed to imply total performance of the project. It should be understood that geotechnical consulting and the contents of this report are not perfect. Any errors or omissions noted by any party reviewing this report, and/or any other geotechnical aspect of this project, should be reported to this firm as soon as possible.

Geotechnical engineering is characterized by uncertainty or is described as an inexact science or art. The conclusions and recommendations presented herein are partly based on; 1) the evaluation of technical data gathered by this firm, 2) standard of practice, 3) experience, and, 4) professional judgment. The conclusions and recommendations presented herein should be considered advice. Other geotechnical consultants could arrive at different conclusions and recommendations. This report has been prepared in accordance with generally accepted practice. No warranties, either expressed or implied, are made as to the professional advice provided under the terms of the agreement and included in this report.

It should be understood that LKGE's services are limited to the disciplines of soils engineering and/or engineering geology. While LKGE may refer various professionals or outside services, working in associated disciplines, to their client's or client's representatives, LKGE is not responsible for the performance of work by third parties, which may include, but are not limited to, surveyors, civil or structural engineers, architects, contractors, etc. It should be clearly understood that LKGE is not a licensed surveyor, architect, civil or structural engineer or contractor. LKGE's periodic or continuous inspection(s) of geotechnical work on an LKGE project shall not relieve third party professionals of their responsibility to perform their work in accordance with the applicable and/or approved geotechnical reports, plans, specifications, safety requirements, etc. It should be understood that LKGE's periodic or continuous inspection(s) of geotechnical work on an LKGE project does not imply that LKGE is observing, verifying and/or approving all site work. LKGE will only make site inspections, per our approved work authorization agreement(s) and/or related to the appropriate geotechnical field services provided by LKGE and will not relieve others of their professional responsibilities.

Should the project be delayed beyond the period of one year after the date of this report, the site should be observed and the report reviewed to consider possible changed conditions.

This report is issued with the understanding that it is the responsibility of the owner, or his representative, to assure that the information and recommendations contained herein are called to the attention of the designers and builders for the project.

Appendix A
Field Exploration

We performed a field exploration consisting of logging of three (3) exploratory soil borings on July 23, 2020. The exploration was performed using hand labor. The borings were advanced to a maximum depth of approximately 21 feet below the existing grade. The approximate locations of the borings are shown on Plate 1.

The Boring Logs are presented on Plates A-1 through A-3. The Boring Logs describe the earth materials encountered, samples obtained, and show the field and laboratory tests performed. The borings were logged by an engineer or geologist using the Unified Soil Classification System. Drive and bulk samples of representative earth materials were obtained from the borings and delivered to the geotechnical laboratory for testing.

A California modified sampler was used to obtain drive samples of the soil encountered. This sampler consists of a 3-inch outside diameter (O.D.), 2.4-inch inside diameter (I.D.) split barrel shaft that was driven a total of 6-inches into the soil at the bottom of the boring. The soil was retained in brass rings for laboratory testing. Additional soil from each drive remaining in the cutting shoe was usually discarded after visually classifying the soil.

Upon completion of the geologic and geotechnical logging, the borings were backfilled with soil derived from the cuttings.

Percolation Testing

Percolation testing was performed using the falling head boring test method in accordance with the Los Angeles County “Guidelines for Geotechnical Investigation and Reporting Low Impact Development Stormwater Infiltration” dated June 30, 2017. The water level was measured to the nearest tenth of a foot and converted to inches in the calculation. The infiltration rate is shown in the table below and the raw data is attached.

Soil Infiltration Rate

Boring No.	Total Depth of Boring (ft)	Depth of Testing Zone (ft)	Soil Description of Testing Zone	Infiltration Rate (inch/hour)

Appendix B
Laboratory Testing

Representative soil samples collected from our field exploration were delivered to the EGL, Inc. of Arcadia, California for testing, and to evaluate relevant engineering properties. Based on our review of the laboratory data, LKGE concurs with and accept the laboratory testing results performed by EGL, Inc.

Laboratory Moisture Content and Density Tests

The moisture content and dry densities of selected driven samples obtained from the exploratory borings were evaluated in general accordance with the latest version of ASTM D 2937. The results are shown on the attached EGL report.

Direct Shear Test

Direct shear testing was conducted on representative soil samples to determine their shear strength in accordance with the ASTM D3080. The sample was saturated under normal load before testing. For each test, three samples were placed, one at a time, into the test apparatus and subjected to a range of normal loads appropriate for the anticipated conditions. The samples were then sheared at a constant shear rate of 0.01-inches per minute. Shear deformation was recorded until a maximum of about 0.3 inches of horizontal displacement was achieved. Ultimate shear strengths for each sample were selected from the shear stress-displacement data. Based on the test data, the stress generally becomes constant beyond 0.2 inch of displacement and it is our opinion that the samples were sheared to its ultimate strength status. The shear strength parameters are shown in the following table and on the attached EGL report.

Sample Location	Depth (ft.)	Soil Type	Soil Description	Ultimate Strength Parameters	
				Cohesion (psf)	Friction Angle (degrees)
B-1	5	Qae	Sandy CLAY	178	28

Consolidation Test

Consolidation testing was performed on representative soil samples under consolidated drained conditions per the ASTM D2435 Method. Axial loads were carried to a maximum of 8,000 psf. To hasten consolidation, investigate the collapsibility potential and similar possible adverse field conditions, water was added to an axial load of 2,000 psf. Compressibility of the soils within the zone of significant stress was investigated and the results are provided on the attached EGL report. The collapse/swell potential is tabulated below:

Sample Location	Depth (ft.)	Soil Type	Soil Description	Percent of Collapse (-)/ Swell (+)	Collapse Index
B-1	10	Qae	Sandy CLAY/Sandy SILT	0	None
B-3	3	Qae	Sandy CLAY/Sandy SILT	-1.4	Slightly

Expansion Index Test

Expansion Index testing was performed on representative soil sample(s) per the ASTM D4829 Method. The soil was molded to a 4-inch diameter, 1-inch thick specimen under a specified compactive energy at approximately 50 percent saturation, and then loaded with 144 psf equivalent surcharge under inundated condition. Readings of volumetric swell were taken for a period of 24 hours. The test results are presented in the attached AGI report.

Sample Location	Depth (ft.)	Soil Type	Soil Description	Expansion Index	Expansion Potential
B-1	0 – 5	Qae	Sandy CLAY/Sandy SILT	30	Low

Corrosivity Tests

Soil pH and resistivity tests were performed on a representative soil sample in general accordance with the latest version of California Test Method 643. The chloride content of the selected sample was evaluated in general accordance with the latest version of California Test Method 422. The sulfate content of the selected samples was evaluated in general accordance with the latest version of California Test Method 417. The test results are presented in the attached EGL report.

RE: LABORATORY TEST RESULTS/REPORT
Project Name: 129 Poplar Avenue, Montebello
Project No: 20-0708
EGL Job No. 20-122-036

Dear Mr. Lin:

We have completed the testing program conducted on samples from the above project. The tests were performed in accordance with testing procedures as follows:

TEST	METHOD
Moisture & Dry Density	ASTM D2937
Consolidation	ASTM D2435
Direct Shear	ASTM D3080
Corrosion	CT-417,422,643
Expansion Index	ASTM D4829

Enclosed is the Summary of Test Results.

We appreciate the opportunity to provide testing services to LK Geotechnical Engineering, Inc. Should you have any questions, please call the undersigned.

Sincerely yours,
EGLAB, Inc.

Ryan Jones, GE
Principal Engineer

116, 128 and 136 N. Poplar Avenue & 129 and 133 N. Poplar Avenue

CEQA SCPE Energy & Water Efficiency Compliance Memo

January 10, 2022

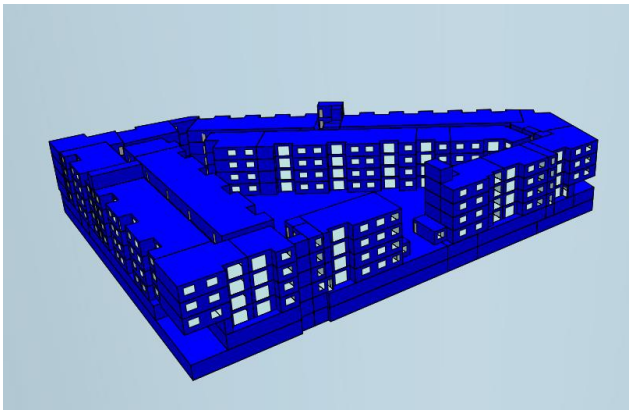
ZC Sustainability

1. Executive Summary

The purpose of this memo is to describe how the 116, 128 and 136 N. Poplar Avenue & 129 and 133 N. Poplar Avenue project (Project), located in Montebello, CA 90640, will meet the Sustainable Communities Project CEQA Exemption (SCPE) criteria regarding energy and water efficiency (Public Resources Code Section 21155.1(a)(8)).

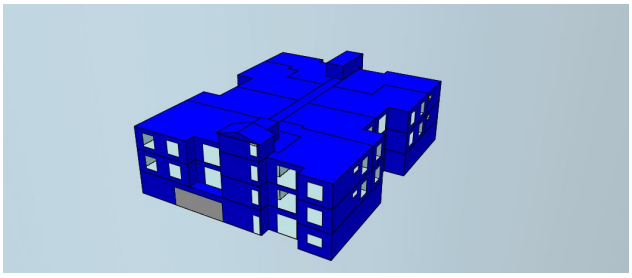
The Project consists of two residential buildings:

- 116, 128 and 136 N. Poplar Avenue consists of 140 dwelling units in a four-story building over two floors of subterranean parking.
- 129 and 133 N. Poplar Avenue consists of 16 dwelling units in a three-story building.



The Subsection (a) (8) requirements for Energy Efficiency and Water Usage Reduction are as follows:

> *The buildings in the transit priority project are 15 percent more energy efficient than required by Chapter 6 of Title 24 of the California Code of Regulations and the buildings and landscaping are designed to achieve 25 percent less water usage than the average household use in the region.*



Results Summary

The Proposed Designs, utilizing the energy efficiency and water usage reduction strategies discussed in this memo, comply with both requirements. The analysis results are as follows:

- Energy Efficiency
  - 116, 128 and 136 N. Poplar Avenue: **15.8**% more energy efficient than Title 24-2019, Part 6.
  - 129 and 133 N. Poplar Avenue: **15.2%** more energy efficient than Title 24-2019, Part 6.
- Water Usage
  - 116, 128 and 136 N. Poplar Avenue: **50.0%** less water usage than the Metropolitan Water District (MWD) baseline.
  - 129 and 133 N. Poplar Avenue: **56.5%** less water usage than the Metropolitan Water District (MWD) baseline.

116, 128 and 136 N. Poplar Avenue
Energy model rendering

129 and 133 N. Poplar Avenue
Energy model rendering

2. Energy Efficiency

Both Project buildings utilized the Title 24-2019 Part 6 Whole Building Performance Approach to show compliance with the energy efficiency requirement.

116, 128 and 136 N. Poplar Avenue is subject to the High-Rise Residential Title 24-2019 Energy Code, while 129 and 133 N. Poplar Avenue is subject to the Low-Rise Residential Title 24-2019 Energy Code. As such, two separate energy models have been developed, using Title 24-2019 approved software, which is CBECC-Com for High-Rise Residential buildings (four-stories and above) and CBECC-Res for Low-Rise Residential buildings (up to three stories).

Since the project is currently in the entitlement review stage, all building features have not been fully designed. Assumptions based on experience with similar projects in this climate zone have been used when actual design information was not yet available.

Note: This analysis and the listed design features will be used to inform the final design. Any modification of the listed design features impacting energy efficiency will be analyzed to ensure the required 15% threshold is met.

2.1. Energy Efficiency Measures

The following Proposed Energy Efficiency Measures contribute to the reported energy savings:

- High-performance Low-e windows with very low Solar Heat Gain Coefficient (SHGC) and U-value.
- Overhangs & balconies shading the glazed patio doors below.
- Wood framed walls with R-21 batt insulation.
- Wood framed roof with R-38 batt insulation.
- Cool Roof Rating Council (CRRC) certified high-reflectance cool roof.
- Central water heating system with condensing natural gas water heaters.
- High-efficiency HVAC systems serving residential units and common spaces.
- A Photovoltaic (PV) system will further reduce energy use.
- Reduced Lighting wattage from LED fixtures throughout the buildings, including Common Spaces and Amenities, with Daylight and Motion Sensor controls.
- Low-flow fixtures: although energy savings from low-flow fixtures are not captured in the Title 24 energy analysis, this strategy significantly reduces the hot water usage and associated heating energy requirements.

The preliminary Title 24-2019 Reports, showing the Percentage Better than Standard (i.e. the Title 24-2019 Baseline Design), are shown on the next page.

2.2. Title 24-2019 Energy Performance Results

Following are the energy performance summary results from the Title 24-2019 Reports.

- **116, 128 and 136 N. Poplar Avenue, Title 24-2019 Compliance Results**

A. GENERAL INFORMATION

ENERGY USE SUMMARY				
Energy Use (kTDV/ft^2-yr)	**Standard Design**	**Proposed Design**	**Compliance Margin**	**Percent Improvement**
Space Heating	3.83	4.39	-0.56	-14.6
Space Cooling	33.08	19.94	13.14	39.7
IAQ Ventilation	4.11	4.11	0	0
Water Heating	39.8	40.08	-0.28	-0.7
Self Utilization/Flexibility Credit	n/a	0	0	n/a
Compliance Energy Total	**80.82**	**68.52**	**12.3**	**15.2**

The Title 24-2019 TDV Energy Use reduction is from 80.82 (Title 24 Standard Design) to 68.52 (Proposed Design). **The Proposed Design is 15.2% more energy efficient than Title 24-2019, Part 6.**

3. Water Usage

The Subsection (a) (8) water efficiency requirement is that each project must achieve a 25 percent water use reduction from the regional average household water use.

For residential and mixed-use, residential/commercial buildings, the baseline is the average regional water use in Gallons Per Capita Per Day of 120 gallons as stated in the Metropolitan Water District Water Tomorrow Annual Report to the California State Legislature, Covering Fiscal Year 2019/20 (p. 28). The report is available at: http://www.mwdh2o.com/WWAMaterials%20Provided%20to%20WaterDM/3.1_1.2_Regional_Progress_Report.pdf#search=3%2E1%5F1%2E2%5FRegional%5FProgress%5FReport

This is multiplied by 3.3, the assumed residential occupancy based on the most recent census data for households in the City of Montebello, to determine the average daily water use per residential unit.

The projected water use utilizes the flow rates are as follows. Other elements are calculated using accepted industry practice. The Title 24 CALGreen-permitted maximum fixture flow rates are as follows:

1. Showerheads: 1.8 GPM (gallons per minute, as required by CALGreen)
2. Lavatory faucets: 1.2 GPM (as required by CALGreen)
3. Kitchen faucets: 1.5 GPM (as required by CALGreen)
4. Tank water closets (toilets): 1.28 GPF (gallons per flush; as required by CALGreen)
5. Commercial clothes washers: Energy Star certified, 3.5 IWF (Integrated Water Factor)
6. Dishwashers: Energy Star certified, 3.5 GPC (Gallons per Cycle)

3.1. Projected Water Savings

The *Water Use Analyses* for this project, included in Appendix B, calculates both the baseline and projected water use, followed by the percentage savings. The projected water use for both 116, 128 and 136 N. Popular Avenue, and 129 and 133 N. Popular Avenue, is overall more efficient than required by Title 24, Part 11, CALGreen, which includes water efficiency measures to reduce water use. The specified water efficiency measures listed above would sufficiently reduce water use so that no additional water reduction measures would be necessary.

The water use reduction is as follows:

- For 116, 128 and 136 N. Popular Avenue, from 396.0 (baseline per unit) to 172.0 gpd (projected per unit). **The projected water use savings is 50.0%.**
- For 129 and 133 N. Popular Avenue, from 396.0 (baseline per unit) to 172.0 gpd (projected per unit). **The projected water use savings is 56.5%.**

Appendix A: Energy Analysis Design Features

The following table lists the building's design features and assumptions used in the energy analysis. These assumptions are based on the Current Design and on experience with similar projects in this climate zone when design information was not available at the time of this memo.

Feature	116, 128 and 136 N. Poplar Avenue	129 and 133 N. Poplar Avenue
Project Description		
Location	Montebello, CA 90640	
CA Climate Zone	CZ-9	
Number of units	140 Units	16 Units
Stories above grade	4	3

Solar Hot Water	No Solar Hot Water included	
Indoor Lighting		
Residential Units[1]	High Efficacy Fixtures (LED)	
Common Spaces	Average ~30% Lighting Power Density (LPD, W/sf) savings compared to Title 24-2019 Prescriptive allowances per occupancy type	
Controls	Title 24 Mandatory Daylight and Occupancy Sensor controls	
Renewable Energy		
Photovoltaic (PV)	No PV included	40 kW DC PV, per Title 24-2019
HERS Field Verifications		
Quality Insulation (QII)	NA	Yes
Dwelling unit leakage	Yes	Yes
Verified SEER / HSPF	NA	Yes
Duct Leakage Testing	No	Yes
Ducts in conditioned space	No	Yes
Hot water piping insulation	NA	Yes

Appendix B: Water Usage Analysis

116, 128 and 136 N. Popular Avenue, Montebello
Water Use Analysis

Fixture Type	Flow Rate[1] (gpm or gpf)		Duration (min or # flush)		Daily Uses		Occupants	=	Gallons Per Day
Residential Water Use									
Showerheads residential	1.8	x	8	x	1	x	462	=	6,652.8
Lavatory faucets residential	1.2	x	0.25	x	5	x	462	=	693.0
Kitchen faucets	1.5	x	4	x	1	x	462	=	2,772.0
Tank water closets (M)	1.28	x	1	x	5	x	231	=	1,478.4
Tank water closets (F)	1.28	x	1	x	5	x	231	=	1,478.4
Clotheswashers (gal/person-day)[2]	15.1						462	=	6,976.2
Dishwashers (gal/person-day)[3]	0.7						462	=	323.4
Potable Water Irrigation (gpd (gallons per day))[4]								=	420.5
Pool Loss[5]								=	529.5
Total Daily Baseline Water Use (BWU) in Gallons Per Day								=	**21,786.6**
Average Water Use per Household per Day = 21,786.6 gpd/140 units								=	**155.7**

Current Water Use per Multi-Family Household (MWD 2019/20 Water Tomorrow Annual Report)	
Gallons Per Capita Per Day = 120 x 3.3 occupants/unit per 2020 US Census	**317.1**
Water Use per Unit per Day (inc. appliances & landscape)	**155.7**
Percent Reduction from MWD Baseline	**50.0**

Assumptions
140 residential units x 3.3 occupants/unit (per 2020 US Census) = 462 occupants.
1. Flow rates are the maximum allowed under Title 24, Part 11, CALGreen
2. Clothes Washer in each unit (baseline per Homes v4, 15.1 gal per person per day, WF=9.5). High efficiency WF=3.2, therefore 33.6% of baseline, or 5.08 gal per person per day.
3. Dishwashers assumed in each unit (baseline per Homes v4, 0.7 gal per person per day, 6.5 GPC). High efficiency dishwashers can be 4 GPC, therefore 61% of baseline, or 0.43 gal per person per day.
4. Landscaping potable water use calculated using LEED v4 Outdoor Water Use Reduction Calculator v02. Assumes efficient irrigation system and drought tolerant plants. Estimated landscape area is 6,072 SF.
5. Pool/spa surface total 448 SF (385 SF pool + 63 SF spa). Avg 0.25 inch/0.021 ft loss per day, or 55.8 gallons to be made up per day.

129 and 133 N. Popular Avenue, Montebello

Water Use Analysis

Fixture Type	Flow Rate[1] (gpm or gpf)		Duration (min or # flush)		Daily Uses		Occupants	=	Gallons Per Day
Residential Water Use									
Showerheads residential	1.8	x	8	x	1	x	53	=	763.2
Lavatory faucets residential	1.2	x	0.25	x	5	x	53	=	79.5
Kitchen faucets	1.5	x	4	x	1	x	53	=	318.0
Tank water closets (M)	1.28	x	1	x	5	x	17	=	108.8
Tank water closets (F)	1.28	x	1	x	5	x	17	=	108.8
Clotheswashers (gal/person-day)[2]	15.1						53	=	800.3
Dishwashers (gal/person-day)[3]	0.7						53	=	37.1
Potable Water Irrigation (gpd (gallons per day))[4]								=	73.3
Total Daily Baseline Water Use (BWU) in Gallons Per Day								=	**2,751.4**
Average Water Use per Household per Day = 2,751.4 gpd/16 units								=	**172.0**

Current Water Use per Multi-Family Household (MWD 2019/20 Water Tomorrow Annual Report)	
Gallons Per Capita Per Day = 120 x 3.3 occupants/unit per 2020 US Census	**396.0**
Water Use per Unit per Day (inc. appliances & landscape)	**172.0**
Percent Reduction from MWD Baseline	**56.5**

Assumptions

16 residential units x 3.3 occupants/unit (per 2020 US Census) = 53 occupants.

1. Flow rates are the maximum allowed under Title 24, Part 11, CALGreen

2. Clothes Washer in each unit (baseline per Homes v4, 15.1 gal per person per day, WF=9.5). High efficiency WF=3.2, therefore 33.6% of baseline, or 5.08 gal per person per day.

3. Dishwashers assumed in each unit (baseline per Homes v4, 0.7 gal per person per day, 6.5 GPC). High efficiency dishwashers can be 4 GPC, therefore 61% of baseline, or 0.43 gal per person per day.

4. Landscaping potable water use calculated using LEED v4 Outdoor Water Use Reduction Calculator v02. Assumes efficient irrigation system and drought tolerant plants. Estimated landscape area is 840 SF.

SOUTHERN CALIFORNIA EDISON®
Energy for What's Ahead®

SOUTHERN CALIFORNIA EDISON'S SERVICE AREA

Southern California Edison is one of the nation's largest electric utilities, providing electric service to approximately 15 million people through 5 million customer accounts.

SCE's service area includes portions of 15 counties and hundreds of cities and communities in a 50,000-square-mile service area within Central, Coastal and Southern California.

CITY OF MONTEBELLO
PLANNING COMMISSION

RESOLUTION NO. 05-22

RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF MONTEBELLO, CALIFORNIA, RECOMMENDING CITY COUNCIL APPROVAL OF: A PLANNED DEVELOPMENT DISTRICT, A PARKING MANAGEMENT PLAN, A SITE PLAN REVIEW (CASE NO. PC-2021-008-PD-PMP-SPR);A DEVELOPMENT AGREEMENT (DA 04-21) AND RECOMMENDING ADOPTION OF A CEQA EXEMPTION (ENV NO. 04-22-CE) TO ALLOW THE CONSTRUCTION OF 140 DWELLING UNITS AT 116, 128, AND 136 N. POPLAR AVE ("PROJECT A") AND 16 DWELLING UNITS AT 129 AND 133 N. POPLAR AVE ("PROJECT B").

WHEREAS, the City of Montebello ("City") received an application from Magna & Magna, Inc. ("Applicant") for a Planned Development District ("PD"), Site Plan Review ("SPR"), and Parking Management Plan ("PMP") (Case No. PC-2021-0008-PD-PMP-SPR) to allow the construction of 156 apartment units combined with parking and related amenities ("Project") consisting of two (2) locations: 116 , 128 ,and 136 N. Poplar Avenue ("Project A") and 129, and 133 N. Poplar Avenue ("Project B"). Project A, consists of the construction of a four (4)-story residential building approximately 73,807 square feet with a hundred-forty (140) dwelling units, including thirty (30) affordable housing units, together with parking and related amenities. Project B, consists of the construction of a three (3)-story residential building approximately 12,500 square feet with sixteen (16) dwelling units, including two (2) affordable housing units, together with parking and related amenities; and

WHEREAS, pursuant to Section 17.38.010 of the Montebello Municipal Code ("MMC"), a PD is a master planning mechanism for the orderly development of larger parcels of land in residential, commercial and manufacturing zones where the existing underlying development standards do not functionally allow for reasonable development; and

WHEREAS, Section 17.38.070(F) of the MMC authorizes the Planning Commission and City Council to allow exceptions to standards or baseline development requirements in Planned Development Districts; and

WHEREAS, pursuant to Section 17.74.030 of the MMC, a SPR is required for all residential projects resulting in three or more dwelling units and for all commercial and industrial projects involving the construction of five thousand square feet or more of building area; and

WHEREAS, pursuant to Section 17.52.280 of the MMC, tandem, stacked, valet and attended off-street parking are subject to approval of a PMP by the planning commission; and

WHEREAS, the California Legislature adopted the "Development Agreement Statute," section 65864 of the Government Code, to strengthen the public planning process, encourage

private participation in comprehensive planning, and reduce the economic risk of development; and

WHEREAS, the City of Montebello (the "City") is authorized pursuant to the Development Agreement Statute to enter into development agreements with persons having legal or equitable interests in real property for the purpose of establishing certainty for both the City and the owner of the development process; and

WHEREAS, the Development Agreement Statute requires development agreements to be approved by an ordinance adopted by the City Council of the City of Montebello ("City Council"), and following public hearings conducted by the Planning Commission and the City Council; and

WHEREAS, the Applicant and the City have negotiated a development agreement in the form attached as Attachment X: "Draft Development Agreement No. 04-21" ("Development Agreement") to "An Ordinance of the City Council of the City of Montebello Approving a Development Agreement ("DA 04-21") between the City of Montebello and Magna & Magna, Inc.," as such ordinance is attached hereto this Resolution as Attachment X: "Draft Ordinance" (the "Ordinance"); and

WHEREAS, the Development Agreement ("DA No. 04-21") and Ordinance approving the Project are considered a "project" per the California Environmental Quality Act ("CEQA"); and

WHEREAS, the Application is a discretionary action of the City and a "project" within the meaning of the California Environmental Quality Act ("CEQA"), and the City of Montebello is the lead agency for the proposed Project; and

WHEREAS, consistent with the requirements of CEQA, the project is exempt under CEQA per the California Public Resources Code ("PRC") Section 21155.1 under the Sustainable Communities Project Exemption ("SCPE") if the City Council finds, after conducting a public hearing, that the transit priority project meets all of the requirements of subdivisions (a) and (b) and one of the requirements of subdivision (c). The Project is a transit priority project and meets the requirements of PRC Section 21155 subdivisions (a) and (b) and Section 21155.1 subdivisions (a) and (b) and one of the requirements of subdivision (c). Refer to "Attachment B" for additional details on the Sustainable Communities Project Exemption; and

WHEREAS, a duly noticed public hearing has been held, and the Planning Commission has received and considered the Application, staff presentations, recommendations, public testimony, and all other substantial evidence presented at the public hearing and included in the record for this matter; and

WHEREAS, all other legal prerequisites to the adoption of this Resolution have occurred.

NOW, THEREFORE, the Planning Commission of the City of Montebello hereby finds, declares, and resolves as follows:

SECTION 1. RECITALS. The foregoing recitals are true and correct and are hereby incorporated as substantive findings of this Resolution.

SECTION 2. FINDINGS.

1. Based on the substantial evidence presented to and considered by the Planning Commission at the public hearing on the Application, the Planning Commission makes the following findings pursuant to Section 17.38.110 of the Montebello Municipal Code:

    a. Is in compliance with the provisions of MMC Chapter 17.38;

    The proposed Planned Development is in compliance with Chapter 17.38 of the Zoning Code. Consistent with MMC Section 17.38.010, the Planned Development would allow for flexibility in land use controls, as the existing underlying development standards do not functionally allow for reasonable development of the project sites. The projects proposed for Project Site A and Project Site B are in substantial compliance with the MMC; however, inefficiencies in the MMC do not recognize current residential building and market trends or site specific conditions. Therefore, relief is sought for certain development standards contained in the MMC through a Planned Development approval.

    As detailed below, consistent with MMC Chapter 17.38, the Planned Development would, among other things: provide for sound and efficient development of project sites with unique topographic land features and/or having irregular shape; allow the development of large residential projects in such a manner to ensure that the projects are consistent with the elements of the general plan, and to assure that the projects will be compatible with surrounding existing and proposed land uses; reduce or eliminate the rigidity, delays, and inequities that otherwise may result from the application of land use regulations; and encourage architectural design diversity and avoid monotony by allowing greater freedom in the design of architectural elements to provide access, light, open space, and amenities in an aesthetically pleasing manner. Consistent with MMC Section 17.38.040, the project sites comprising the Planned Development would have a total area of more than one-half acre. With approval of the Planned Development, the projects will be in compliance with the MMC.

    Project A
    Project Site A is an approximately 73,807 square foot trapezoidal irregularly-shaped site. The topography of the site trends downwards towards the south and east and presents unique challenges to the development of a MMC compliant, modern, and architecturally uniform

structure. This is reflected in the irregular and inefficient location of the current buildings including carports on the site. The R-3 Multiple Family Residential Zone standards provide a significant impediment to the development of modern and efficient residential units. In this case, there will be three (3)separate parcels held together as one for a single building site. The MMC allows one unit per 3,000 square feet of lot area; therefore, the site could only yield 24 units under the current density standards. There are currently 41 units located on the project site, almost double the number permitted under the MMC. As part of the required Planned Development approval, the project includes 140 units (including 30 units affordable to lower-income households) at a density of approximately 83 units per acre. This density is consistently found in many communities in the region. Project A's design and layout are efficient and self-contained with on-site amenities and parking.

The MMC allows a maximum of 1 bedroom per 1,000 square feet of lot area; therefore, the site could only yield 74 bedrooms under this standard. Project A would include a total of 237 bedrooms, exceeding this requirement. The project includes a mix of studio, one, two, and three-bedroom units and units that will range in size as follows: 616 square feet for the studio units; one-bedroom units from 730 square feet to 900 square feet; two-bedroom units from 1,100 square feet to 1,500 square feet; and three-bedroom units from 1,472 to 1,780 square feet. These unit sizes are ample and spacious for the market and match or exceed square footages seen in similar projects. The building is integrated into the landscape and takes into account the sloping topography, unique shape of the lot, and constrained access to the site from Poplar Avenue. Applying the MMC standards for density and bedroom count would negatively impact the unit count and unit sizes of the project and discourage flexibility and design innovation of the project floor plans, ultimately reducing the number, variety, and quality of units that could be provided.

Per the MMC, the maximum lot coverage in the R-3 Zone is 60%. Lot coverage standards exist to regulate the number and size of structures on a lot to allow for open space and adequate light and ventilation. Typically, lot coverage represents the percentage of building area-generally measured by the building footprint or roof lines as a proportion to the land area of the site. The existing site is developed with structures of varying sizes and shapes and currently has a lot coverage of approximately 42%. The proposed project would have a lot coverage of 57%, in compliance with the MMC standard.

The maximum height allowed in the R-3 zone is 25 feet. The Planned Development is proposing to exceed the permitted height of 25 feet. The MMC height regulation is overly restrictive and is lower than the height limits set forth in Single- Family Residential (R-1) zones. The height of the proposed building

is 47 feet and 4 stories, as measured under the MMC, and does not include stepbacks. The topography of the site slopes to the south and east, necessitating the zoning code deviations sought through the Planned Development for the project to integrate all parking, open space, and amenities into one cohesive building. The south elevation of the proposed building would be partially obscured from Whittier Boulevard due to southward sloping conditions including the closed off, but non-vacated portion of Poplar Avenue and existing buildings along the street. The site to the east immediately abutting the project is significantly lower in elevation and views of the proposed building would be partially obstructed by an existing retaining wall on that site. The building setbacks and articulation will serve to adequately relate the building to adjacent properties.

The MMC requires a minimum open space of 150 square feet per unit for private open space and 100 square feet per unit for common open space with a total of 300 square feet open space per unit thus requiring 42,000 square feet in total. The nature of the topography of the site and its shape precludes the project from providing the minimum open space distribution between private and common open space; therefore, the project requests an approximate 25% reduction in required open space and would provide a total of 31,360 square feet of open space. The requested open space reduction is appropriate because the project would still provide ample private and public on-site open space, especially compared to the existing development which includes very little on-site open space. The project features state-of-the-art amenities, including balconies for each unit, a courtyard with a pool, water feature, kids play area, barbeques, cabanas, seating areas, and a solar panel zone designed for the installation of future solar panels. Therefore, the project provides abundant open space and high-quality open space and recreation areas for residents, and the triangular design of the building with a large central open courtyard will provide all units in the building ample light and ventilation.

Pursuant to the State of California's Density Bonus Law (Cal. Govt. Code Section 65915), because the project would include at least 10% of the units for lower-income households, the project is not required to provide more than one on-site parking space per studio unit and one-bedroom unit, and 1.5 on-site parking space per two-bedroom unit and three-bedroom units (including parking for persons with a disability and guest parking). Per Section 17.52.050 of the MMC, the 140-unit project will require 327 off-street parking spaces. Based on the ratios provided under the State of California's Density Bonus Law, Project A is required to provide a minimum of 182 total parking spaces. The project will exceed this requirement and provide a total of 298 parking spaces located in two subterranean levels. In addition, the project will provide 14 short-term bicycle racks and 140 long-term bicycle racks.

The proposed building provides an efficient design and layout considering the site constraints and is designed to be fully self-contained as it relates to parking including the use of tandem and compact parking spaces. The project would include the approval of a Parking Management Plan for the tandem and compact parking spaces. Public transportation options exist for residents of the project. For example, Project Site A is located within 1,000 feet of a Montebello Bus Lines #10 line stop and the Montebello Transportation Department administers a "Dial a Taxi" program to residents that are disabled or over age 62. Finally, the project is well-served by other modes of public transportation including Metro Bus lines and offers its residents many choices for access to the aforementioned bike parking and to ride-share services.

The MMC requires building setbacks of 20 feet from the front property line, 5 feet along the side yard setback and 10 feet from the rear yard property line. The MMC also requires a one-foot stepback for every three feet over 15 feet. In this case, the project meets all the required building setbacks, except it does not include the one-foot stepback. The setbacks are building facades and elevations is sufficient given the building's contemporary Mediterranean architectural style and inviting residential appearance, main entryway to the courtyard with a direct visual line of sight, and abundant landscaping along the front setback. If the stepback requirements were observed, it would require the reduction of the courtyard area and would reduce the overall number of units.

The MMC requires 100 cubic feet of storage per residential unit. The building's subterranean garage is the most efficient and effective location for these storage units given the site topographical and access constraints. The project offers storage units for each unit in the building conveniently located at both garage levels. The project includes storage units that are generally stacked and include 136.9 cubic feet per unit. In addition, each residential unit has ample interior closet space offsetting the need for such extensive storage requirements.

The MMC requires trash areas for multiple-family dwellings to provide the equivalent of not less than seventy-five (75) gallon capacity container per dwelling unit. Where commercial trash containers (three cubic yards or more) are used, one container is required for every seven (7) dwelling units and trash areas are required to be located within one hundred fifty feet of the units which they serve. Under the MMC, the project would be required to provide twenty (20) commercial trash containers, and the project includes trash rooms with trash bin areas located at three locations in the upper parking level with a total of twenty-four (24) trash bins. These bins are served by trash chutes for convenient and easy access by the residents. The project will have frequent trash pickup service throughout the week to ensure that the project's trash demands are adequately served. With twenty-four (24) commercial trash bins

and frequent trash pickup service, the project will include adequate trash facilities.

The project will be fully code compliant with all applicable fire/life/safety and California Title 24 building energy efficiency standards. In addition, the project will be responsible for paying all applicable fees and will upgrade all utilities and infrastructure to serve the projects thereby not negatively impacting the surrounding area or the City as a whole. The new construction will positively enhance property values and the property tax base of the City. With approval of the Planned Development, Project A will be in compliance with the MMC.

Project B

Project Site B comprises two parcels with approximately 12,500 square feet that is rectangularly-shaped. While the shape of the lot is not irregular, the density and other regulatory standards set forth in the R-3 Multiple Family Residential Zone would allow for the construction of a maximum of four (4) units and as such is not conducive to the encouragement of reinvestment in housing stock. In this case, there will be two (2) separate parcels held together as one for a uniform project. The MMC allows one (1) unit per 3,000 square feet of lot area; therefore, the site could only yield four (4) units under the density standards and allows bedroom per 1,000 square feet of lot area. The site is currently improved with two (2) single-family residences. Utilizing the Planned Development approval, the project will exceed the permitted density and propose sixteen (16) units (including 2 units affordable to lower-income households) at a density of approximately fifty-six (56) units per acre. This density is consistently found in many communities in the region. Project B's design and layout are efficient and self-contained with on-site amenities and parking.

The MMC allows a maximum of one (1) bedroom per 1,000 square feet of lot area; therefore, the site could only yield twelve (12) bedrooms under this standard. Project A would include a total of thirty (30) bedrooms, exceeding this limit. The project includes a mix of one-, two-, and three-bedroom units and unit will range in size as follows: 825 square feet for the one-bedroom units; 891 square feet to 1,083 feet for the two-bedroom units; and 1,179 square feet for the three-bedroom units. These unit sizes are ample and spacious for the market and match or exceed square footages seen in similar projects. The building is integrated into the landscape and small size and

limited access to the site from Poplar Avenue and the alley. Applying the MMC standards for density and bedroom count would negatively impact the unit count and unit sizes of the project and discourage flexibility and design innovation of the project floor plans, ultimately reducing the number, variety, and quality of units that could be provided.

Per the MMC, the maximum lot coverage is 60%. Lot coverage standards exist to regulate the number and size of structures on a lot to allow for open space and adequate light and ventilation. Typically, lot coverage represents the percentage of building area-generally measured by the building footprint or roof lines as a proportion to the land area of the site. The building is designed as a single, integrated structure and meets the MMC side and rear yard setbacks. The project has a lot coverage of 74% which is necessary to accommodate the proposed density. The building is inviting and spacious and strict adherence to the lot coverage standard based on the site's small size would result in unique challenges that would compromise the integrity of the building's design and reduce the number of units that could be provided.

The maximum height allowed in the R-3 zone is 25 feet. The Planned Development is proposing to exceed the permitted height of 25 feet. The MMC height regulation is overly restrictive and is lower than the height limits set forth in Single Family Residential (R-1) zones. The height of the proposed building is 34 feet and 6 inches and three (3) stories (including one parking level), as measured under the MMC, and does not include stepbacks. All elevations of the building feature architectural details including brow pieces and trellis structures over the upper balconies, score lines on the walls, a decorative tile mansard roof, and vine pockets along the south and north elevations to soften the buildings appearance. The building setbacks and articulation will serve to adequately relate the building to adjacent properties.

The MMC requires a minimum open space of 150 square feet for private open space and 100 square feet for common open space and a total of 300 square feet per unit thus requiring 4,800 square feet in total. The small size of the site precludes the project from providing the MMC minimum required open space or meeting the minimum open space distribution between private and common open space; therefore, the project requests an approximate 25% reduction in required open space and would provide a total of 3,650 square feet of open space. The requested open space reduction is appropriate because the project would still provide ample private and public on-site open space. The project features state-of-the art, high-quality amenities including balconies for each unit and a rooftop deck with patio furniture.

Pursuant to the State of California's Density Bonus Law (Cal. Govt. Code Section 65915), because the project would include at least 10% of the units for lower-income households, the project is not required to provide more than one

on-site parking space per studio unit and one-bedroom unit, and 1.5 on-site parking spaces per two-bedroom unit and three-bedroom units (including parking for persons with a disability and guest parking). Per Section 17.52.050 of the MMC, the 16-unit project will require 37 off-street parking spaces Based on the ratios provided under the State of California's Density Bonus Law, Project A is required to provide a minimum of 22 total parking spaces. The project will exceed this requirement and provide a total of 30 parking spaces. The project will provide a combination of side-by-side and tandem parking spaces in a controlled tuck under garage. In addition, the project will provide 16 bicycle parking spaces. The proposed building provides an efficient design and layout considering the site constraints and is designed to be fully self-contained as it relates to parking including the use of tandem and compact parking spaces. The project would include the approval of a Parking Management Plan for the tandem and compact parking spaces. Public transportation options exist for residents of the project. For example, Project Site B is located within 1,000 feet of a Montebello Bus Lines #10 line stop and the Montebello Transportation Department administers a "Dial a Taxi" program to residents that are disabled or over age 62. Finally, the project is well-served by other modes of public transportation including Metro Bus lines and offers its residents many choices for access to the aforementioned bike parking and to ride-share services.

The MMC requires building setbacks of 20 feet from the front property line, five (5) feet along the side yard setback and 10 feet from the rear yard property line. The MMC also requires a one-foot stepback for every three (3) feet over 15 feet. In this case, the project exceeds the side yard setbacks. The front property line (east elevation facing Poplar Avenue) is proposed at fifteen (15) feet and the building does not include the one-foot stepback. The 15-foot setback is sufficient given the building's contemporary Mediterranean architectural style and inviting residential appearance, main entryway, and abundant landscaping along the front setback. If the stepback requirement were observed, it would require the reduction of the rooftop deck and would reduce the overall number of units. The rear yard setback is proposed at five (5) feet where ten (10) feet is required; however, the rear yard faces the alley so the effective setback from the properties across the alley is fifteen (15) feet.

The MMC requires 100 cubic feet of storage per residential unit. The building's garage is the most efficient and effective location for these storage units given small size of the site. The project includes storage units that are stacked above the front ends of parking spaces and provide 100 cubic feet overall for each unit. In addition, each residential unit has ample interior closet space.

The MMC requires trash areas for multiple-family dwellings to provide the equivalent of not less than seventy-five (75) gallon capacity container per dwelling unit. Where commercial trash containers (three cubic yards or more) are used, one container is required for every seven (7) dwelling units and trash areas are required to be located within one hundred fifty feet of the units which they serve. Under the MMC, the project would be required to provide two (2) commercial trash bins, and the project includes a dedicated trash and recycling area located at the ground level. The project will have frequent trash pickup throughout the week to ensure that the project's trash demands are adequately served. With a dedicated trash and recycling area and frequent trash pickup service, the project will include adequate trash facilities.

The project will be fully code compliant with all applicable fire/life/safety and California Title 24 building energy efficiency standards. In addition, the project will be responsible for paying all applicable fees and will upgrade all utilities and infrastructure to serve the projects thereby not negatively impacting the surrounding area or the City as a whole. The new construction will positively enhance property values and the property tax base of the City.

With approval of the Planned Development, the project on Project Site B will be in compliance with the MMC.

b. Is consistent with the subdivision regulations, with the general intent of the zoning regulations, with the general plan, and with any applicable specific plan;

The projects, including the proposed Planned Development with Density Overlay and Height Overlay, would be consistent with the general intent of the zoning regulations and with the City's General Plan. The projects do not propose any subdivision and there is no applicable specific plan.

Per Section 17.02.020 of the MMC, the purpose of the zoning code is "to permit the most compatible use of land within the city, consistent with the needs of residential, commercial and industrial developments, and the promotion of the public health, safety, welfare and general prosperity of the city and its residents." Both projects are of the high-quality design and have a layout with a scale and massing harmonious with the area, and represent a significant reinvestment in the City. They would be compatible with the existing residential uses in the vicinity of the project sites, and would contribute to the City's residential needs.

One policy of the Land Use Element of the General Plan is that "Residential development of varying densities and housing types should be compatible among themselves and with adjacent commercial and industrial

development". Another policy of the same element states "Opportunities for a variety of living needs should be available in various locations throughout the City". For both project sites, separate parcels will be combined to form a single building site which in turn creates opportunities for excellence in design, site layout, and more efficient vehicular and pedestrian access. Both Project A and Project B are of high-quality architectural design and offer amenity-rich rental housing opportunities not commonly found in the City of Montebello. This would be consistent with the General Plan's policy of provide varying housing types and opportunities for a variety of living needs in the City.

A stated purpose of the 2016-2021 Housing Element is "to review development standards to improve site design, architectural quality, and livability of multi-family units". The 2016-2021 Housing Element contemplated updating the Zoning Standards for the R-3 zone to accommodate the additional housing needs identified in the Regional Housing Needs Assessment (RHNA); however, these revised standards have not been codified. The project design for both sites' layout is efficient and self-contained with on-site amenities and parking. The projects utilize efficient design concepts and are integrated into the neighborhood and are therefore compatible with the surrounding uses. In addition, the new residents will support and enhance demand for commercial services from the nearby business districts in the City.

Other stated purposes of the 2016-2021 Housing Element are "to minimize governmental constraints, market constraints, and environmental constraints that may impede the development of new housing," and "to address future housing needs by expanding housing opportunities in the City." The R-3 Multiple Family Residential Zone standards provide a significant impediment to the development of modern and efficient residential units. The projects would utilize the MMC's Planned Development provisions to achieve additional additional density and certain deviations from the R-3 development standards to expand housing opportunities in the City and meet the goals of the City's Housing Element. The projects would make a substantial contribution towards meeting the City's RHNA allocation, including its affordable housing allocation, consistent with the goals and policies of the General Plan Housing Element.

The projects would also support the following policies of the 2016-2021 Housing Element related to affordable housing:

> *Policy 4.1. The City will continue to encourage the development of affordable housing throughout the community.*

Policy 4.5. The City will continue to encourage development of new housing in proximity to public services, transportation routes, and other community facilities.

Policy 4.6. The City will encourage the establishment of a variety of affordability levels in multiple-projects.

Consistent with Policy 4.1, the projects would include a total of 32 units affordable to lower-income households (30 in Project A and 2 in Project B). Consistent with Policy 4.5, these units would be constructed in proximity to nearby public transportation routes and other community facilities. Consistent with Policy 4.6, the projects would be mixed-income projects with a variety of affordability levels, both market-rate and affordable to lower-income households.

c. Is compatible with present and future development of the property within the immediate vicinity;

Project A

The maximum height allowed in the R-3 zone is 25 feet. The Planned Development is proposing to exceed the permitted height of 25 feet. The MMC height regulation is overly restrictive and is lower than the height limits set forth in Single Family Residential (R-1) zones. The height of the proposed building is 47 feet and 4 stories, as measured under the MMC, and does not include stepbacks. The topography of the site slopes to the south and east, necessitating the zoning code deviations sought through the Planned Development for the project to integrate all parking, open space, and amenities into one cohesive building. The south elevation of the proposed building would be partially obscured from Whittier Boulevard due to southward sloping conditions including the closed off but non-vacated portion of Poplar Avenue and existing buildings along the street. The site to the east immediately abutting the project is significantly lower in elevation and views of the proposed building would be partially obstructed by an existing retaining wall on that site. The building setbacks and articulation will serve to adequately relate the building to adjacent properties. Therefore, the project physically relates to the adjacent and surrounding properties in the vicinity.

Project B

The maximum height allowed in the R-3 zone is 25 feet. The Planned Development is proposing to exceed the permitted height of 25 feet. The MMC height regulation is overly restrictive and is lower than the height limits set forth in Single Family Residential (R-1) zones. The height of the proposed building is 34 feet and six inches and 3 stories (including one level of parking), as measured under the MMC, and does not include stepbacks. While the site

is relatively flat and rectangular-shaped, the small size of the site necessitates the zoning code deviations sought through the Planned Development for the project to integrate all parking, open space, and amenities into one cohesive building. The site abuts Poplar Avenue to the east, an alley to the west, two-story multi-family buildings to the north and while some of the adjoining properties to the south and east across the alley are improved with single-family homes, the building setbacks and articulation will serve to adequately relate the building to adjacent properties. Therefore, the project physically relates to the adjacent and surrounding properties in the vicinity.

As discussed above, given the building's contemporary Mediterranean architectural style and inviting residential appearance, and abundant landscaping along the front setback, the projects' setbacks are sufficient and would also be compatible with present and future development of property within the immediate vicinity.

d. Is consistent with the general peace, health, safety and general welfare;

Section 17.02.020 of the MMC, allows in part for the regulation of land uses to promote compatibility consistent with the needs of the respective land use type and to promote the public health, safety, welfare and general prosperity of the city and its residents. Both projects are of high-quality design and have a layout with a scale and massing harmonious with the area, and represent a significant reinvestment in the City.

The topography of the Project Site A slopes to the south and east, necessitating the zoning code deviations sought through the Planned Development for the project to integrate all parking, open space, and amenities into one cohesive building. The south elevation of the proposed building would be partially obscured from Whittier Boulevard due to southward sloping conditions including the closed off but non-vacated portion of Poplar Avenue and existing buildings along the street. The site to the east immediately abutting the project is significantly lower in elevation and views of the proposed building would be partially obstructed by an existing retaining wall on that site. While Project Site B is relatively flat, the small size of the site necessitates the zoning code deviations sought through the Planned Development for the project in order to integrate all parking, open space, and amenities into one cohesive building.

Both buildings' setbacks and articulation will serve to adequately relate the buildings to adjacent properties. Except for the relief being sought by the Planned Development approval to exceed in density and height, both projects are designed to be fully compliant with the intent of the required codes and

standards and will pay all required development-related fees. Both projects will be assets to the City, will address the severe shortage of quality housing (including quality affordable housing) in the rental market in the region with convenient access to the job market, and will provide the residents a greater variety of housing options (including affordable housing).

In addition, the projects would not adversely affect the general peace, health, safety, and welfare of surrounding residents, because the projects will be constructed in accordance with all applicable City regulations. Construction will occur within the permitted hours. Furthermore, the projects will comply with all Low Impact Development (LID) and building code requirements

e. That the permitted uses and development standards adopted as part of the Amended Precise Plan of Development will not be detrimental to present and potential surrounding uses, but will have a beneficial effect which could not have been adequately achieved under the pre-existing zoning district;

The projects proposed for Project Site A and Project Site B are in substantial compliance with the MMC; however, inefficiencies in the MMC do not recognize current residential building and market trends or site specific conditions. Therefore, relief is sought for certain development standards contained in the MMC through a Planned Development approval. With approval of the Planned Development, the projects will be in compliance with the MMC.

Project Site A is an approximately 73,807 square foot trapezoidal irregularly-shaped site. The topography of the site trends downwards towards the south and east and presents unique challenges to the development of a MMC compliant, modern, and architecturally uniform structure. This is reflected in the irregular and inefficient location of the current buildings including carports on the site. The MMC allows one unit per 3,000 square feet of lot area; therefore, the site could only yield 24 units under the density standards. There are currently 41 units located on the project site, almost double the number permitted under the MMC. Utilizing the Planned Development approval, the project will exceed the permitted density and propose 140 units (including 30 units affordable to lower-income households) at a density of approximately 83 units per acre This density is consistently found in many communities in the region. Project A's design and layout are efficient and self-contained with on-site amenities and parking. The building is integrated into the landscape and takes into account the sloping topography, unique shape of the lot, and constrained access to the site from Poplar Avenue. Applying the MMC standards for density would negatively impact the unit count of the project and discourage flexibility and design innovation of

the project floor plans, ultimately reducing the number of units that could be provided.

Project Site B comprises two parcels with approximately 12,500 square feet that is rectangularly-shaped. While the shape of the lot is not irregular, the density and other regulatory standards set forth in the R-3 Multiple Family Residential Zone would allow for the construction of a maximum of four units and as such is not conducive to the encouragement of reinvestment in housing stock. In this case, there will be two separate parcels held together as one for a uniform project. The MMC allows one unit per 3,000 square feet of lot area; therefore, the site could only yield four units under the density standards and allows bedroom per 1,000 square feet of lot area. The site is currently improved with two single-family residences. Utilizing the Planned Development approval, the project will exceed the permitted density and propose 16 units (including 2 units affordable to lower-income households) at a density of approximately 56 units per acre. This density is consistently found in many communities in the region. Project B's design and layout are efficient and self-contained with on-site amenities and parking. The building is integrated into the landscape and takes into account the small size and limited access to the site from Poplar Avenue and the alley. Applying the MMC standards for density would negatively impact the unit count of the project and discourage flexibility and design innovation of the project floor plans, ultimately reducing the number of units that could be provided.

The projects will be constructed in accordance with all pertinent building code requirements. Construction will occur during the permitted hours of operation. In addition, the projects will include energy and water efficient fixtures, LID appurtenances, bicycle racks, and designated areas for solar panels. The trips generated by the proposed project will not exceed the capacity of the adjacent streets, nor will the projects' trips result in a deterioration of any intersection levels of service. The new development will increase property values in the area and will assist the City in achieving its RHNA goals by providing necessary rental housing (including affordable housing). The implementation of the Planned Development is essential, because the current zoning conditions do not permit an increase in density. The existing conditions presently limit the City's ability to meet its RNHA targets. In addition, the 2016-2021 Housing Element contemplated updating the Zoning Standards for the R-3 zone to accommodate the additional housing needs identified in the RHNA; however, these revised standards have not been codified. The projects would make a substantial contribution towards meeting the City's RHNA allocation, and would also provide a substantial share of affordable housing, consistent with the goals and policies of the General Plan Housing Element.

For all of these reasons, the Planned Development will not be detrimental to present and potential surrounding uses, and will have beneficial effects which could not have been adequately achieved under the pre-existing zoning district.

f. That the proposed on-site streets and thoroughfares are adequate in size to accommodate the traffic volume generated by the proposed PD, and increased densities will not generate traffic in such amounts as to overload the street network outside the PD boundary;

The existing roadways are adequate in size to accommodate the projects' trip generation. According to the traffic impact analysis that was prepared for the project, each of the roadway segments nearest the project sites operate at a Level of Service (LOS) C or better, both with and without the project. As a result, the addition of project traffic would not result in any of the roadway segments exceeding their available capacities. In addition, the roadways are wide enough to accommodate construction and project traffic.

In addition, the projects will provide on-site bicycle parking, and public transportation options also exist for residents of the projects. For example, the project sites are located within 1,000 feet of a Montebello Bus Lines #10 line stop and the Montebello Transportation Department administers a "Dial a Taxi" program to residents that are disabled or over age 62. Finally, the projects are well-served by other modes of public transportation including Metro Bus lines. These alternative transportation options will reduce vehicle trips and further ensure that increased densities do not generate traffic that overloads the surrounding street network.

g. That the exceptions, if any, from the development standards of the zoning code are warranted by the design and amenities, as incorporated, are in accord with adopted policies of the planning commission and the city council;

As discussed in Finding 1 above, the projects would include certain exceptions from the development standards of the Zoning Code to provide high-quality architectural design and offer amenity-rich rental housing opportunities not commonly found in the City of Montebello, in addition to helping the City meet its housing needs.

At Project Site A, architectural projections at key locations along the building which create visual interest and articulation, both of which are desirable design features. At Project Site B, the building elevations will feature architectural details including brow pieces and trellis structures over the upper balconies, score lines on the walls, a decorative tile mansard roof, and vine pockets along the south and north elevations to soften the buildings appearance. The Planned Development for the projects will allow each building to integrate all

parking, open space, and amenities into one cohesive building for each project site.

The projects will include new LID appurtenances; energy and water efficient fixtures; bicycle parking; designated solar areas; abundant recreational amenities including a gym, pool, and children's play area; and electric vehicle charging stations.

The projects will assist the City in meeting or exceeding their RNHA allocation by providing more rental housing (including affordable housing) than the existing development standards would permit, consistent with the City's policies as identified in its General Plan

h. That the existing or proposed utility services and facilities are adequate for the proposed population densities and nonresidential uses; and

The two project sites are currently occupied by existing residential units. The implementation of the projects will result in an increase in water consumption and sewage and solid waste generation over the present conditions. Nevertheless, the new apartment units will be equipped with water and energy efficient fixtures and appliances. In addition, the two buildings will include a designated solar area for future solar panels. New utility lines will be provided to accommodate the increase in demand and usage for utility services. These new water and sewer lines will be large enough to accommodate the increase in volume of effluent discharged from the project area.

i. That the proposed buildings and structures are situated in such a manner to minimize impacting the privacy of existing abutting residential uses.

The new buildings at Project Site A and Project Site B will be adequately set back from the adjacent residential units.

The height of the proposed building at Project Site A is 47 feet and 4 stories, as measured under the MMC, and does not include stepbacks. The topography of the site slopes to the south and east, necessitating the zoning code deviations sought through the Planned Development for the project to integrate all parking, open space, and amenities into one cohesive building. The south elevation of the proposed building would be partially obscured from Whittier Boulevard due to southward sloping conditions including the closed off but non-vacated portion of Poplar Avenue and existing buildings along the street. The site to the east immediately abutting the project is significantly lower in elevation and views of the proposed building would be partially obstructed by an existing retaining wall on that site. The building setbacks and articulation will adequately relate the building to adjacent properties.

The height of the proposed building at Project Site B is 34 feet and six inches and 3 stories (including one level of parking), as measured under the MMC, and does not include stepbacks. While the site is relatively flat and rectangular-shaped, the small size of the site necessitates the zoning code deviations sought through the Planned Development for the project to integrate all parking, open space, and amenities into one cohesive building. The site abuts Poplar Avenue to the east, an alley to the west, two-story multi-family buildings to the north and while some of the adjoining properties to the south and east across the alley are improved with single-family homes, the building setbacks and articulation will serve to adequately relate the building to adjacent properties.

The projects' building setbacks and articulation will serve to minimize impacts on the privacy of existing abutting residential uses.

2. Pursuant to Section 17.74.070 of the MMC, before any site plan review shall be granted, all of the following findings must be made:

    a. That the proposed design for improvement complies with all requirements of the MMC;

    The projects proposed for Project Site A and Project Site B are in substantial compliance with the MMC; however, inefficiencies in the MMC do not recognize current residential building and market trends or site specific conditions. Therefore, relief is sought for certain development standards contained in the MMC through a Planned Development approval. With approval of the Planned Development, the projects will be in compliance with the MMC.

    Project A
    Project Site A is an approximately 73,807 square foot trapezoidal irregularly-shaped site. The topography of the site trends downwards towards the south and east and presents unique challenges to the development of a MMC compliant, modern, and architecturally uniform structure. This is reflected in the irregular and inefficient location of the current buildings including carports on the site. The R-3 Multiple Family Residential Zone standards provide a significant impediment to the development of modern and efficient residential units. In this case, there will be three separate parcels held together as one for a single building site. The MMC allows one unit per 3,000 square feet of lot area; therefore, the site could only yield 24 units under the density standards. There are currently 41 units located on the project site, almost double the number

permitted under the MMC. Utilizing the Planned Development approval, the project will exceed the permitted density and propose 140 units (including 30 units affordable to lower-income households) at a density of approximately 83 units per acre. This density is consistently found in many communities in the region. Project A's design and layout are efficient and self-contained with on-site amenities and parking.

The MMC allows a maximum of 1 bedroom per 1,000 square feet of lot area; therefore, the site could only yield 74 bedrooms under this standard. Project A would include a total of 237 bedrooms, exceeding this limit. The project includes a mix of studio, one-, two-, and three-bedroom units and units will range in size as follows: 616 square feet for the studio units; one-bedroom units from 730 square feet to 900 square feet; two-bedroom units from 1,100 square feet to 1,500 square feet; and three-bedroom units from 1,472 to 1,780 square feet. These unit sizes are ample and spacious for the market and match or exceed square footages seen in similar projects. The building is integrated into the landscape and takes into account the sloping topography, unique shape of the lot, and constrained access to the site from Poplar Avenue. Applying the MMC standards for density and bedroom count would negatively impact the unit count and unit sizes of the project and discourage flexibility and design innovation of the project floor plans, ultimately reducing the number, variety, and quality of units that could be provided.

Per the MMC, the maximum lot coverage is 60%. Lot coverage standards exist to regulate the number and size of structures on a lot to allow for open space and adequate light and ventilation. Typically, lot coverage represents the percentage of building area-generally measured by the building footprint or roof lines as a proportion to the land area of the site. The existing site is developed with structures of varying sizes and shapes and currently has a lot coverage of approximately 42%. The proposed project would have a lot coverage of 57%, in compliance with the MMC standard.

The maximum height allowed in the R-3 zone is 25 feet. The Planned Development is proposing to exceed the permitted height of 25 feet. The MMC height regulation is overly restrictive and is lower than the height limits set forth in Single Family Residential (R-1) zones. The height of the proposed building is 47 feet, as measured under the MMC, and does not include stepbacks. The topography of the site slopes to the south and east, necessitating the zoning code deviations sought through the Planned Development for the project to integrate all parking, open space, and amenities into one cohesive building. The south elevation of the proposed building would be partially obscured from Whittier Boulevard due to southward sloping conditions including the closed off but non-vacated portion

of Poplar Avenue and existing buildings along the street. The site to the east immediately abutting the project is significantly lower in elevation and views of the proposed building would be partially obstructed by an existing retaining wall on that site. The building setbacks and articulation will serve to adequately relate the building to adjacent properties.

The MMC requires a minimum open space of 150 square feet for private open space and 100 square feet for common open space and a total of 300 square feet per unit thus requiring 42,000 square feet in total. The nature of the topography of the site and its shape precludes the project from providing the MMC minimum required open space or meeting the minimum open space distribution between private and common open space; therefore, the project requests an approximate 25% reduction in required open space and would provide a total of 31,360 square feet of open space. The requested open space reduction is appropriate because the project would still provide ample private and public on-site open space, especially compared to the existing development which includes very little on-site open space. The project features state-of-the-art amenities, including balconies for each unit, a courtyard with a pool, water feature, kids play area, barbeques, cabanas, seating areas, cabanas, and a solar panel zone designed for installation for future solar panels. Therefore, the project provides abundant and high-quality open space and recreation areas for residents and the triangular design of the building with a large central open courtyard will provide all units in the building ample light and ventilation.

Pursuant to the State of California's Density Bonus Law (Cal. Govt. Code Section 65915), because the project would include at least 10% of the units for lower-income households, the project is not required to provide more than one on-site parking space per studio unit and one-bedroom unit, and 1.5 on-site parking spaces per two-bedroom unit and three-bedroom units (including parking for persons with a disability and guest parking). Based on these ratios, Project A is required to provide a minimum of 182 total parking spaces. The project will exceed this requirement and provide a total of 298 parking spaces located in two subterranean levels. In addition, the project will provide 14 short-term bicycle racks and 140 long-term bicycle racks. The proposed building provides an efficient design and layout considering the site constraints and is designed to be fully self-contained as it relates to parking including the use of tandem and compact parking spaces. The project would include the approval of a Parking Management Plan for the tandem and compact parking spaces. Public transportation options exist for residents of the project. For example, Project Site A is located within 1,000 feet of a Montebello Bus Lines #10 line stop and the Montebello Transportation Department administers a "Dial a Taxi" program to residents that are disabled or over age 62. Finally, the project is well-served by other

modes of public transportation including Metro Bus lines and offers its residents many choices for access to the aforementioned bike parking and to ride-share services.

The MMC requires building setbacks of 20 feet from the front property line, 5 feet along the side yard setback and 10 feet from the rear yard property line. The MMC also requires a one-foot stepback for every three feet over 15 feet. In this case, the project meets all the required building setbacks, except it does not include the one-foot stepback. The setbacks and building facades and elevations are sufficient given the building's contemporary Mediterranean architectural style and inviting residential appearance, main entryway to the courtyard with a direct visual line of sight, and abundant landscaping along the front setback. If the stepback requirement were observed, it would require the reduction of the courtyard area and would reduce the overall number of units.

The MMC requires 100 cubic feet of storage per residential unit. The building's subterranean garage is the most efficient and effective location for these storage units given the site topographical and access constraints. The project offers storage units for each unit in the building conveniently located at both garage levels. The project includes storage units that are generally stacked and include 136.9 cubic feet per unit. In addition, each residential unit has ample interior closet space offsetting the need for such extensive storage requirements.

The MMC requires trash areas for multiple-family dwellings to provide the equivalent of not less than seventy-five (75) gallon capacity container per dwelling unit. Where commercial trash containers (three cubic yards or more) are used, one container is required for every seven dwelling units and trash areas are required to be located within one hundred fifty feet of the units which they serve. Under the MMC, the project would be required to provide twenty (20) commercial trash containers, and the project includes trash rooms with trash bin areas located at three locations in the upper parking level with a total of twenty-four (24) trash bins. These bins are served by trash chutes for convenient and easy access by the residents. The project will have frequent trash pickup throughout the week to ensure that the project's trash demands are adequately served. With twenty-four (24) commercial trash bins and frequent trash pickup service, the project will include adequate trash facilities.

The project will be fully code compliant with all applicable fire/life/safety and California Title 24 building energy efficiency standards. In addition, the project will be responsible for paying all applicable fees and will upgrade all utilities and infrastructure to serve the projects thereby not negatively

impacting the surrounding area or the City as a whole. The new construction will positively enhance property values and the property tax base of the City.

With approval of the Planned Development, Project A will be in compliance with the MMC.

Project B

Project Site B comprises two parcels with approximately 12,500 square feet that is rectangular-shaped. While the shape of the lot is not irregular, the density and other regulatory standards set forth in the R-3 Multiple Family Residential Zone would allow for the construction of a maximum of four units and as such is not conducive to the encouragement of reinvestment in housing stock. In this case, there will be two separate parcels held together as one for a uniform project.

The MMC allows one (1) unit per 3,000 square feet of lot area; therefore, the site could only yield four units under the density standards and allows bedroom per 1,000 square feet of lot area. The site is currently improved with two single-family residences. Utilizing the Planned Development approval, the project will exceed the permitted density and propose sixteen (16) units (including 2 units affordable to lower-income households) at a density of approximately 56 units per acre. This density is consistently found in many communities in the region. Project B's design and layout are efficient and self-contained with on-site amenities and parking. The MMC allows a maximum of 1 bedroom per 1,000 square feet of lot area; therefore, the site could only yield twelve (12) bedrooms under this standard. Project A would include a total of thrity (30) bedrooms, exceeding this limit. The project includes a mix of one-, two-, and three-bedroom units and unit will range in size as follows: 825 square feet for the one-bedroom units; 891 square feet to 1,083 feet for the two-bedroom units; and 1,179 square feet for the three-bedroom units. These unit sizes are ample and spacious for the market and match or exceed square footages seen in similar projects. The building is integrated into the landscape and takes into account the small size and limited access to the site from Poplar Avenue and the alley. Applying the MMC standards for density and bedroom count would negatively impact the unit count and unit sizes of the project and discourage flexibility and design innovation of the project floor plans, ultimately reducing the number, variety, and quality of units that could be provided.

Per the MMC, the maximum lot coverage is 60%. Lot coverage standards exist to regulate the number and size of structures on a lot to allow for open space and adequate light and ventilation. Typically, lot coverage represents the percentage of building area-generally measured by the building

footprint or roof lines as a proportion to the land area of the site. The building is designed as a single, integrated structure and meets the MMC side and rear yard setbacks. The project has a lot coverage of 74% which is necessary to accommodate the proposed density. The building is inviting and spacious and strict adherence to the lot coverage standard based on the site's small size would result in unique challenges that would compromise the integrity of the building's design and reduce the number of units that could be provided.

The maximum height allowed in the R-3 zone is twenty-five (25) feet. The Planned Development is proposing to exceed the permitted height of twenty-five (25) feet. The MMC height regulation is overly restrictive and is lower than the height limits set forth in Single Family Residential (R-1) zones. The height of the proposed building is 34 feet and 6 inches and three (3) stories (including one parking level), as measured under the MMC, and does not include stepbacks. All elevations of the building feature architectural details including brow pieces and trellis structures over the upper balconies, score lines on the walls, a decorative tile mansard roof, and vine pockets along the south and north elevations to soften the buildings appearance. The building setbacks and articulation will serve to adequately relate the building to adjacent properties.

The MMC requires a minimum open space of 150 square feet for private open space and 100 square feet for common open space and a total of 300 square feet per unit thus requiring 4,800 square feet in total. The small size of the site precludes the project from providing the MMC minimum required open space or meeting the minimum open space distribution between private and common open space; therefore, the project requests an approximate 25% reduction in required open space and would provide a total of 3,650 square feet of open space. The requested open space reduction is appropriate because the project would still provide ample private and public on-site open space. The project features state-of-the art, high-quality amenities including balconies for each unit and a rooftop deck with patio furniture.

Pursuant to the State of California's Density Bonus Law (Cal. Govt. Code Section 65915), because the project would include at least 10% of the units for lower-income households, the project is not required to provide more than one on-site parking space per studio unit and one-bedroom unit, and 1.5 on-site parking spaces per two-bedroom unit and three-bedroom units (including parking for persons with a disability and guest parking). Based on these ratios, Project A is required to provide a minimum of twenty-two (22) total parking spaces. The project will exceed this requirement and provide a total of thirty (30) parking spaces. The project will provide a combination of side-by-side and tandem parking spaces in a controlled tuck under garage.

In addition, the project will provide sixteen (16) bicycle parking spaces. The proposed building provides an efficient design and layout considering the site constraints and is designed to be fully self-contained as it relates to parking including the use of tandem and compact parking spaces. The project would include the approval of a Parking Management Plan for the tandem and compact parking spaces. Public transportation options exist for residents of the project. For example, Project Site B is located within 1,000 feet of a Montebello Bus Lines #10 line stop and the Montebello Transportation Department administers a "Dial a Taxi" program to residents that are disabled or over age 62. Finally, the project is well-served by other modes of public transportation including Metro Bus lines and offers its residents many choices for access to the aforementioned bike parking and to ride-share services.

The MMC requires building setbacks of twenty (20) feet from the front property line, five (5) feet along the side yard setback and ten (10) feet from the rear yard property line. The MMC also requires a one-foot stepback for every three feet over fifteen (15) feet. In this case, the project exceeds the side yard setbacks. The front property line (east elevation facing Poplar Avenue) is proposed at fifteen (15) feet and the building does not include the one-foot stepback. The 15-foot setback is sufficient given the building's contemporary Mediterranean architectural style and inviting residential appearance, main entryway, and abundant landscaping along the front setback. If the stepback requirement were observed, it would require the reduction of the rooftop deck and would reduce the overall number of units. The rear yard setback is proposed at five (5) feet where ten (10) feet is required; however, the rear yard faces the alley so the effective setback from the properties across the alley is fifteen (15) feet.

The MMC requires 100 cubic feet of storage per residential unit. The building's garage is the most efficient and effective location for these storage units given small size of the site. The project includes storage units that are stacked above the front ends of parking spaces and provide 100 cubic feet overall for each unit. In addition, each residential unit has ample interior closet space.

The MMC requires trash areas for multiple-family dwellings to provide the equivalent of not less than seventy-five (75) gallon capacity container per dwelling unit. Where commercial trash containers (three cubic yards or more) are used, one container is required for every seven dwelling units and trash areas are required to be located within one hundred fifty (150) feet of the units which they serve. Under the MMC, the project would be required to provide two commercial trash bins, and the project includes a dedicated trash and recycling area located at the ground level. The project will have frequent trash pickup throughout the week to ensure that the project's trash demands

are adequately served. With a dedicated trash and recycling area and frequent trash pickup service, the project will include adequate trash facilities.

The project will be fully code compliant with all applicable fire/life/safety and California Title 24 building energy efficiency standards. In addition, the project will be responsible for paying all applicable fees and will upgrade all utilities and infrastructure to serve the projects thereby not negatively impacting the surrounding area or the City as a whole. The new construction will positively enhance property values and the property tax base of the City.

With approval of the Planned Development, the project on Project Site B will be in compliance with the MMC

b. That the proposed design for improvement is consistent with the general plan;

The projects and proposed design for improvement would be consistent with the City's General Plan.

One policy of the Land Use Element of the General Plan is that "Residential development of varying densities and housing types should be compatible among themselves and with adjacent commercial and industrial development". Another policy of the same element states "Opportunities for a variety of living needs should be available in various locations throughout the City". For both project sites, separate parcels will be combined to form a single building site which in turn creates opportunities for excellence in design, site layout, and more efficient vehicular and pedestrian access. Both Project A and Project B are of high-quality architectural design and offer amenity-rich rental housing opportunities not commonly found in the City of Montebello. This would be consistent with the General Plan's policy of provide varying housing types and opportunities for a variety of living needs in the City.

A stated purpose of the 2016-2021 Housing Element is "to review development standards to improve site design, architectural quality, and livability of multi-family units". The 2016-2021 Housing Element contemplated updating the Zoning Standards for the R-3 zone to accommodate the additional housing needs identified in the RHNA; however, these revised standards have not been codified. The project design for both sites' layout is efficient and self-contained with on-site amenities and parking. The projects utilize efficient design concepts and are integrated into the neighborhood and are therefore compatible with the surrounding uses. In

addition, the new residents will support and enhance demand for commercial services from the nearby business districts in the City.

Other stated purposes of the 2016-2021 Housing Element are "to minimize governmental constraints, market constraints, and environmental constraints that may impede the development of new housing," and "to address future housing needs by expanding housing opportunities in the City." The R-3 Multiple Family Residential Zone standards provide a significant impediment to the development of modern and efficient residential units. The projects would utilize the MMC's Planned Development provisions to achieve additional density and certain deviations from the R-3 development standards to expand housing opportunities in the City and meet the goals of the City's Housing Element. The projects would make a substantial contribution towards meeting the City's RHNA allocation, including its affordable housing allocation, consistent with the goals and policies of the General Plan Housing Element.

The projects would also support the following policies of the 2016-2021 Housing Element related to affordable housing:

> *Policy 4.1. The City will continue to encourage the development of affordable housing throughout the community.*
> *Policy 4.5. The City will continue to encourage development of new housing in proximity to public services, transportation routes, and other community facilities.*
> *Policy 4.6. The City will encourage the establishment of a variety of affordability levels in multiple-projects.*

Consistent with Policy 4.1, the projects would include a total of 32 units affordable to lower-income households (30 in Project A and 2 in Project B). Consistent with Policy 4.5, these units would be constructed in proximity to nearby public transportation routes and other community facilities. Consistent with Policy 4.6, the projects would be mixed-income projects with a variety of affordability levels, both market-rate and affordable to lower-income households

c. Tha the proposed design for improvement will not have any significant adverse impact on the surrounding properties or on the general public welfare;

Section 17.02.020 of the MMC, allows in part for the regulation of land uses to promote compatibility consistent with the needs of the respective land use type and to promote the public health, safety, welfare and general prosperity of the city and its residents. Both projects are of high-quality

design and have a layout with a scale and massing harmonious with the area, and represent a significant reinvestment in the City.

The topography of the Project Site A slopes to the south and east, necessitating the zoning code deviations sought through the Planned Development for the project to integrate all parking, open space, and amenities into one cohesive building. The south elevation of the proposed building would be partially obscured from Whittier Boulevard due to southward sloping conditions including the closed off but non-vacated portion of Poplar Avenue and existing buildings along the street. The site to the east immediately abutting the project is significantly lower in elevation and views of the proposed building would be partially obstructed by an existing retaining wall on that site. While Project Site B is relatively flat, the small size of the site necessitates the zoning code deviations sought through the Planned Development for the project in order to integrate all parking, open space, and amenities into one cohesive building.

Both buildings' setbacks and articulation will serve to adequately relate the buildings to adjacent properties. Except for the relief being sought by the Planned Development approval to exceed in density and height, and the Parking Management Plan, both projects are designed to be fully compliant with the intent of the required codes and standards and will pay all required development-related fees. Both projects will be assets to the City, will address the severe shortage of quality housing (including quality affordable housing) in the rental market in the region with convenient access to the job market, and will provide the residents a greater variety of housing options (including affordable housing).

3. Pursuant to Section 17.52.310 (B) of the MMC, a parking management plan may be approved or conditionally approved by the planning commission if the following findings can be made:

    a. The proposed use is consistent with the general plan, any applicable specific plans, and the general intent of the zoning code;

    The projects, including the proposed Parking Management Plan to allow self-managed tandem parking, would be consistent with the general intent of the zoning regulations and with the City's General Plan. The projects do not propose any subdivision and there is no applicable specific plan.

    Per Section 17.02.020 of the MMC, the purpose of the zoning code is "to permit the most compatible use of land within the city, consistent with the needs of residential, commercial and industrial developments, and the promotion of the public health, safety, welfare and general prosperity of

the city and its residents." Both projects are of the high-quality design and have a layout with a scale and massing harmonious with the area, and represent a significant reinvestment in the City. They would be compatible with the existing residential uses in the vicinity of the project sites, and would contribute to the City's residential needs.

One policy of the Land Use Element of the General Plan is that "Residential development of varying densities and housing types should be compatible among themselves and with adjacent commercial and industrial development". Another policy of the same element states "Opportunities for a variety of living needs should be available in various locations throughout the City". For both project sites, separate parcels will be combined to form a single building site which in turn creates opportunities for excellence in design, site layout, and more efficient vehicular and pedestrian access. Both Project A and Project B are of high-quality architectural design and offer amenity-rich rental housing opportunities not commonly found in the City of Montebello. This would be consistent with the General Plan's policy of provide varying housing types and opportunities for a variety of living needs in the City.

A stated purpose of the 2016-2021 Housing Element is "to review development standards to improve site design, architectural quality, and livability of multi-family units". The 2016-2021 Housing Element contemplated updating the Zoning Standards for the R-3 zone to accommodate the additional housing needs identified in RHNA; however, these revised standards have not been codified. The project design for both sites' layout is efficient and self-contained with on-site amenities and parking. The projects utilize efficient design concepts and are integrated into the neighborhood and are therefore compatible with the surrounding uses. In addition, the new residents will support and enhance demand for commercial services from the nearby business districts in the City.

Other stated purposes of the 2016-2021 Housing Element are "to minimize governmental constraints, market constraints, and environmental constraints that may impede the development of new housing," and "to address future housing needs by expanding housing opportunities in the City." The R-3 Multiple Family Residential Zone standards provide a significant impediment to the development of modern and efficient residential units. The projects would utilize the MMC's Planned Development provisions to achieve additional density and certain deviations from the R-3 development standards to expand housing opportunities in the City and meet the goals of the City's Housing Element. The projects would make a substantial contribution towards meeting the City's RHNA allocation,

including its affordable housing allocation, consistent with the goals and policies of the General Plan Housing Element.

The projects would also support the following policies of the 2016-2021 Housing Element related to affordable housing:

> *Policy 4.1. The City will continue to encourage the development of affordable housing throughout the community.*
> *Policy 4.5. The City will continue to encourage development of new housing in proximity to public services, transportation routes, and other community facilities.*
> *Policy 4.6. The City will encourage the establishment of a variety of affordability levels in multiple-projects.*

Consistent with Policy 4.1, the projects would include a total of 32 units affordable to lower-income households (30 in Project A and 2 in Project B). Consistent with Policy 4.5, these units would be constructed in proximity to nearby public transportation routes and other community facilities. Consistent with Policy 4.6, the projects would be mixed-income projects with a variety of affordability levels, both market-rate and affordable to lower-income households.

b. The surrounding properties will not be adversely affected by the approval of the proposed parking management plan;

The proposed building represents an efficient design and layout and is designed to be fully self-contained as it relates to parking, including through the use of tandem and compact parking spaces.

Approval of the proposed Parking Management Plan would not adversely affect surrounding properties. All vehicular parking for both projects would be located on-site and would be enclosed. All tandem and compact parking spaces would be self-managed by individual tenants.

c. The proposed parking management plan is appropriate for the proposed land use;

Self-managed tandem parking and use of compact parking spaces are typical and appropriate for multi-family residential developments with enclosed on-site parking. The projects are designed to make the most efficient use of each site. Due to site constraints and changes in topography, the buildings have been designed to be fully self-contained, including through the use of tandem and compact parking. Drive aisles have been designed to provide ample circulation and access. Public transportation options exist for residents

of the project. The project sites are located within 1,000 feet of a Montebello Bus Lines #10 line stop and the Montebello Transportation Department administers a "Dial a Taxi" program to residents that are disabled or over age 62. Finally, the projects are well-served by other modes of public transportation including Metro Bus lines and offers its residents many choices for access to the aforementioned bike parking and to ride-share services.

d. That adequate off-street parking for customers, clients, visitors, and employees will be available for the proposed land use;

The projects are both multi-family residential buildings that will provide adequate parking for residents and guests. The buildings have been designed to be fully self-contained, including through the use of tandem and compact parking, to increase the amount of parking than could otherwise be provided without eliminating units. The projects include adequate short-term and long-term bicycle parking to supplement the vehicular parking. Therefore, adequate off-street parking will be available for the proposed land use.

e. The parking management plan includes provisions for periodic monitoring by the city to identify any problems associated with implementation of the plan and to adjust the plan as necessary. Any costs to the city incurred as a result of such monitoring shall be paid by the property owner upon request of the city;

As stated above, the proposed Parking Management Plan includes provisions for periodic monitoring by the city, and costs will be reimbursed by the property owner upon request of the city;

SECTION 3. CEQA. Pursuant to the California Environmental Quality Act (CEQA), Case No. PC-2021-0008-PD-PMP-SPR is considered a "project," per the CEQA definition of a "project." The Planning Commission finds and recommends that the City Council of the City of Montebello determine and find that the Project is exempt from CEQA per PRC Section 21155.1 under the Sustainable Communities Project Exemption (SCPE). The Project is a transit priority project and meets the requirements of PRC Section 21155 subdivisions (a) and (b) and Section 21155.1 subdivisions (a) and (b) and one of the requirements of subdivision (c). Refer to "Attachment B" for additional details and findings on the Sustainable Communities Project Exemption, which are incorporated herein by this reference. Additionally, the Planning Commission's recommendation to the City Council is further exempt under CEQA because its recommendation will not result in a direct or reasonably foreseeable indirect or direct physical change in the environment and in light of the general rule that CEQA applies only to projects which have the potential for causing a significant effect on the environment and since it can be seen with certainty that there is no possibility that the Planning Commission's recommendation to the City Council may have a

significant effect on the environment, Planning Commission's recommendation is not subject to CEQA pursuant to Section 15061(b)(3) of the CEQA Guidelines.

SECTION 4. RECOMMENDATIONS TO THE CITY COUNCIL. The Planning Commission hereby recommends that the City Council find, that the Project and Development Agreement is consistent with the goals, policies, and implementation measures set forth in the City's General Plan, in that it: achieves the General Plan goals of formulating a plan that is responsive to the needs of the community and which permits the orderly arrangement of land uses, permitting, and sufficient areas of development; and achieves the General Plan policy that residential development in the City be sited in appropriate locations according to need of the City and provide opportunities for a variety of living needs should be available in various locations throughout the City and are varying densities and housing types that should be compatible among themselves and with adjacent commercial and residential development. In doing so, it is the Planning Commission's recommendation that the City Council approve the Planned Development District, Parking Management Plan, Site Plan Review and Development Agreement associated with Case No. PC-2021-0008-PD-PMP-SPR subject to the conditions herein below.

SECTION 6. CONDITIONS. The Planning Commission recommends that the foregoing conditions of approval are necessary and appropriate.

A. Planning Division Conditions

1. The Applicant shall defend, indemnify, and hold harmless the City, its elected and appointed officials, agents, officers, and employees from any claim, action, or proceeding brought against the City, its elected and appointed officials, agents, officers, or employees arising out of, or which are related to the Applicant's project or application (collectively referred to as "proceedings"). The indemnification shall include, but not be limited to, damages, fees and/or costs awarded against the City, if any, and cost of suit, attorney's fees, and other costs, liabilities, and expenses incurred or awarded in connection with the proceedings whether incurred by the Applicant, the City and/or the parties initiating or bringing such proceedings. This indemnity provision shall include the Applicant's obligation to indemnify the City for all the City's costs, fees, and damages that the City incurs in enforcing the indemnification provisions set forth herein. The City shall have the right to choose its own legal counsel to represent the City's interest in the proceedings.

2. The development of the subject properties shall be consistent with all of the provisions of the Montebello Municipal Code (MMC), Approved Precise Plan of Development, Site Plan Review, and Parking Management Plan (Case No. PC-2021-0008-PD-PMP-SPR/ENV No. 04-22-CE), and the specifications of the City's Planning Division ("Planning Division" or "Planning Department").

3. Within thirty (30) days of the Planning Division transmittal of the Acceptance Form, the Applicant shall sign and return a copy of the Acceptance Form, agreeing to the conditions of approval and acknowledging that failure to comply with such conditions shall constitute

grounds for potential revocation of the permit approval. Failure to return the Acceptance Form within thirty (30) days shall constitute grounds for terminating the permit.

4. The Director of Planning & Community Development ("Director"), at any time, can call for a review of the approved conditions of approval at a duly noticed public hearing before the Planning Commission. These condition(s) may be modified, or new condition(s) added to reduce any impacts of the use.

5. The Applicant shall execute and record with the Los Angeles County a Covenant and Agreement to hold the abutting parcels located at 116,128, & 136 N. Poplar Ave (Project Site A) as one parcel and 129 & 133 N. Poplar Ave (Project Site B) as another parcel.

6. The Applicant shall enter into a Development Agreement (DA 04-21) with the City for the proposed Planned Development District (PC-2022-0008-PD-PMP-SPR).

7. The Applicant or successor in interest shall meet the applicable code requirements and all other City department regulations.

8. All applicable conditions of approval from previous entitlements on the property shall remain in full force and effect, unless otherwise specifically noted in this Resolution.

9. It is the responsibility of the Applicant to have all graffiti on the site removed within twenty-four (24) hours of its appearance, or be subject to citation from the City of Montebello Code Enforcement Division.

10. The Applicant will bear the full costs of all monitoring and inspection activities to be conducted by City staff, or its designated representative(s), as necessary to ensure compliance with the conditions of this Resolution.

11. Any change, expansion, intensification and/or modification to the proposed plans use, or mode of operations shall be subject to the review and approval by the Director who may take action or call for review by the Montebello Planning Commission ("Planning Commission") at a noticed public hearing.

12. This approval shall not supersede the approval of any other responsible agencies. The Applicant shall comply with all Federal, State and local laws.

13. The approval of this Planned Development (PC-2022-0008-PD-PMP-SPR) shall automatically expire if the rights granted are not exercised before March 1, 2023. Applicant shall be considered to have exercised its rights under this approval by having been issued a building permit by the City and Applicant actually commencing construction of the applicable Phase by completing the first required inspection.

14. The approval of this Precise Plan of Development (PC-2022-0008-PD-PMP-SPR /ENV No. 04-22-CE) can be extended not to exceed three (3) years with a written request by the property owner no less than thirty (30) days prior to the expiration date stating the reason and need for an extension and upon review and approval by the Director.

15. In the event of a violation of the conditions of approval, no further permits, licenses, approvals or certificates of occupancy shall be issued until such violation has been fully remedied.

16. Modification to Plans. Subsequent modifications to this approval shall be in conformance with the approved plans. The Director shall determine as to whether a modification to the project is allowed. The approval of such modification shall be provided in written format in the form deemed acceptable by the Director and City Attorney. Modifications which extend beyond the parameters of substantial conformance shall be subject to a Planned Development District amendment and/or new Site Plan Review, as determined by the Director. Any substantial change or modification to the proposed site plan shall be subject to review and approval by the Planning Commission.

17. The Applicant shall contact the Planning Division to arrange a Planning Inspection of the site prior to the release of occupancy/utilities. This inspection is to confirm that the conditions of approval and code requirements have been satisfied.

18. A copy of the approved Resolution shall be attached to the construction plans for any site improvement at the submittal of plans for plan check.

19. If at any time, a problem with fugitive dust arises, the Director may require a fugitive dust mitigation plan to be submitted and reviewed. The fugitive dust mitigation plan shall include a schedule of time and frequency of fugitive dust mitigation activities. Upon approval of the plan by the Director, the measures of the plan shall be implemented. This condition may require the developer to post a bond to ensure fugitive dust mitigation compliance.

20. The Director may, at any point, request remedy to fugitive dust and soil/mud spillage onto public rights-of-ways and adjacent properties due to inclement weather or other reasons.

21. All improvements to the subject property shall be in compliance with all City Ordinances.

22. The hours of construction shall be 7:00 a.m. to 8:00 p.m., Monday through Friday, and weekends and holidays 9:00 a.m. to 6:00 p.m. as restricted by the MMC Section 9.08.050.

23. The Applicant shall adhere to all residential development standards for the mitigation of noise as per MMC Section 17.22.110.

24. The street shall be swept at the end of the day if visible soil material is carried onto adjacent public sidewalks and paved roads.

25. Garage access shall be equipped with a secure door. The vehicular access-opening door shall be equipped with an automatic garage door opener.

26. Any parking space that fronts a building wall or fence with no separation between the front end of the parking space and the wall or fence, shall be provided with a concrete wheel stop or curb barrier not less than two (2) feet from such wall or fence property line. Such wheel stop or curb barrier shall be securely installed and maintained.

27. Minimum aisle widths and circulation shall be provided in accordance to the MMC Chapter 17.52- Off-street Parking requirements.

28. The site shall be attractively landscaped and maintained in accordance with the standards established in the MMC and to the satisfaction of the Planning Department.

29. Landscape and Irrigation Plan. Detailed landscape and irrigation plans, which meet the requirements set forth in the MMC shall be required as a part of the project Plan Check review and approval process. Permanent underground automated irrigation system must be provided for all landscaping on the site. Plans shall be forwarded to the Planning Division for final approval prior to issuance of building permits.

30. The landscape plan shall conform to the MMC requirements. Shrubs shall not be less than three (3) feet in height when planted and cover not less than thirty (30) percent of the landscaped area. All landscaping shall cover the designated planting areas from the outset.

31. All trees shall be at least twenty-four inch (24") box or equivalent.

32. All landscape planters shall be surrounded by a six (6) inch concrete curb if adjacent to any public right-of-way or private road or sidewalk intended for public use.

33. A trash enclosure, if provided, shall be constructed of decorative masonry block or masonry block with decorative finish, such as stucco, and view-obscuring doors that are compatible with the main residence, subject to the final review and approval of the Planning Department. The Applicant shall reflect this requirement on the plans submitted for plan check.

34. All proposed utilities (Gas, Electricity, Communications, etc.) shall be placed underground. The Applicant shall reflect this requirement on plans submitted for "Plan Check".

35. All outdoor utilities or machinery located outside the exterior walls, including roof-mounted equipment, shall be completely screened from view from any public right-of-way or adjacent residential use by either view obscuring landscaping or architectural features of the main building (i.e. parapet walls, façade extension, etc.), subject to the final review and approval of the Planning Department.

36. Any inevitable exposed wires shall be neatly bolted and painted to match the building color.

37. The proposed exterior colors and materials board shall be implemented as approved by the Planning Department based on the Planning Commission action. Any changes to the approved exterior colors and materials shall be subject to the review and approval of the Planning Department.

38. The Applicant shall submit a separate lighting plan (photometric study) during the plan check process, subject to the review and approval of the Montebello Police Department ("Police Department") and Planning Department.

39. The Applicant shall submit a detailed wall/fence plan which is consistent with the MMC and identifies the material(s), color(s), and dimensions of proposed fencing, subject to the review and approval of the Planning Department.

40. The Applicant shall provide a parking management plan for all assigned spaces, which will contain all notices, agreements, rules, assignments and regulations regarding tenant parking of vehicles within the project.

41. All buildings with third- and fourth-story window views overlooking adjacent residential properties shall be reviewed to ensure privacy windows are installed to protect surrounding neighbors. The Applicant shall be required to install privacy windows, and where appropriate and feasible shall also install landscaping, decorative wall extensions or any equivalent solution approved by the Director.

42. All outdoor recreation areas maintained by property owner shall be open from 8:00 a.m. to 10:00 p.m. (Pacific Standard Time). Any changes to the proposed hours shall be reviewed and approved by the Director.

43. Thirty (30) units within Project A and two (2) units whithin Project B shall be restricted to and available at affordable rent, adjusted for household size, to Lower Income Households (as defined in California Health and Safety Code Section 50079.5 and as periodically published by the California Department of Housing and Community Development for a term of fifty-five years (55).

B. Building Division Conditions

1. The 4-story apartment building (R-2 occupancy) shall be Type II-B or a higher type of construction, separated from the 2-story Type I-A subterranean garage (S-2 occupancy) by a 3-hour fire-resistance-rated horizontal assembly which shall also be of Type I-A construction.

2. The R-2 and S-2 occupancies shall be protected by NFPA 13 fire sprinklers throughout.

3. All of the apartment units are covered multifamily dwellings as defined in the Fair Housing Amendment Act and the California Building Code, subject to the requirements set forth in the Fair Housing Design Guidelines and Chapter 11A of the 2019 California Building Code.

4. Out of the 86 electric vehicle parking spaces, one (1) shall be van accessible, three (3) standard accessible, and three (3) ambulatory parking spaces.

5. At least 2 percent of the assigned parking spaces provided to residents shall be accessible. At least 5 percent of the unassigned parking spaces and visitor parking spaces shall be accessible.

C. Engineering Conditions

1. A traffic analysis report shall be submitted to the City for review and approval.

2. A sewer capacity study shall be submitted to the City Department of Public Works and to the County of Los Angeles Sanitation district for review and approval.

D. Public Works Department Conditions

1. Low impact development (LID) requirements are required for city approval.

2. All broken, damaged, or substandard street improvements, shall be removed and replaced from property line to property line to the center of the street along the proposed project; such as: sidewalk, curb and gutter, driveway approach, and pavement.

    a. Grind 2" PCC Pavement and overlay with 2" AC from property line to property line to the center of the street along the proposed project or inlieu of grind and AC overlay deposit money for the cost of this improvement with the City for the future Street improvement.

3. Conduct a traffic and sewer study for the proposed development project.

4. Install new domestic water, fire and irrigation line.

5. Install a new gas line.

6. Install new sewer laterals to city sewer main with Wye connections (minimum 6" diameter, must be VCP).

7. Underground all overhead utilities entering/servicing the new development site.

8. Storm runoff mitigation measures are required.

9. Show all proposed curb drains.

10. Civil plan must shall all underground utility main lines on the street and adjacent to the project site.

11. Civil plan must show entire street right-of-way, on-site and off-site improvements including underground and overhead utility lines and all proposed and required right-of-way improvements.

E. Fire Department Conditions

1. Fire flow report based on 2019 Edition California Fire Code, Appendix B/BB.
2.
3. Provide proposed standpipe location and show hose pull distances do not exceed 150' feet.

4. Fire access plan based on 2019 Edition California Fire Code and local amendments.

5. When the height of a structure at the roof eaves exceeds 27 feet or the capability of the fire department to access the roof safely utilizing ground ladders, the location and width of access roadways shall be such that the truck mounted areal ladders may be utilized.

6. Aerial ladder access shall include the ability to maneuver apparatus, deploy outriggers and provide proper climbing angles.

7. Elevator shall meet requirements of 2019 Edition California Fire Code, Chapter 6, Building Services and Systems and California Code of Regulations, Title 8, Division 1, Chapter 4, Subchapter 6, Elevator Safety Orders.

8. Elevator will be required to be gurney compliant.

9. Knox Boxes shall be installed per the satisfaction of the Montebello Fire Department. Knox key switches for any mechanical security gates.

10. Fire flow report based on 2019 Edition California Fire Code, Appendix B/BB.

11. Provide proposed standpipe location and show hose pull distances do not exceed 150' feet.

12. Provide additional public hydrants to meet fire flow requirements.

13. Fire hydrant plan based on 2019 Edition California Fire Code and City of Montebello local amendments.

14. Underground fire main/fire sprinkler supply plan based on 2019 Edition California Fire Code and NFPA 13/24 and Montebello Fire Department's plan check submittal requirements and notes.

15. Fire Sprinkler Overhead plan based on 2019 Edition California Fire Code and NFPA 13/13R and Montebello Fire Department's plan check submittal requirements and notes.

16. Fire standpipe plan based on 2019 Edition California Fire Code and NFPA 14.

17. Fire Alarm plan based on 2019 Edition California Fire Code and NFPA 72 and Montebello Fire Department's plan check submittal requirements and notes.

18. Provide Carbon Monoxide detection in residential units.

19. Provide Carbon Monoxide in enclosed parking garage per 2019 Edition California Mechanical Code.

20. Project will meet requirements of 2019 Edition California Fire Code, Chapter 12, Energy Systems.

21. Fire extinguishers per 2019 Edition California Fire Code and CCR Title 19.

22. Additional requirements maybe added during the plan check process

PASSED AND ADOPTED this 1st day of March, 2022 by the Planning Commission.

Re: CEQA and Land Use Notice Request for Poplar Avenue Residential Development (SCH 2021110168)

Dear Ms. Rodriguez, Mr. Palombi, and Mr. Jimenez:

I am writing on behalf of Supporters Alliance for Environmental Responsibility ("SAFER") regarding the project known as Poplar Avenue Residential Development (SCH 2021110168), including all actions related or referring to the proposed construction of 140 apartment units within a 73,807 square foot development area at 116, 128, and 136 North Poplar Avenue, referred to as Project Site A; and the construction of 16 units within a 12,500 square foot area at 129 and 133 North Poplar Avenue, referred to as Project Site B, in the City of Montebello ("Project").

We hereby request that the City of Montebello ("City") send by electronic mail, if possible or U.S. mail to our firm at the address below notice of any and all actions or hearings related to activities undertaken, authorized, approved, permitted, licensed, or certified by the City and any of its subdivisions, and/or supported, in whole or in part, through contracts, grants, subsidies, loans or other forms of assistance from the City, including, but not limited to the following:

- Notice of any public hearing in connection with the Project as required by California Planning and Zoning Law pursuant to Government Code Section 65091.
- Any and all notices prepared for the Project pursuant to the California Environmental Quality Act ("CEQA"), including, but not limited to:
  - Notices of any public hearing held pursuant to CEQA.
  - Notices of determination that an Environmental Impact Report ("EIR") is required for the Project, prepared pursuant to Public Resources Code Section 21080.4.
  - Notices of any scoping meeting held pursuant to Public Resources Code Section 21083.9.

- Notices of preparation of an EIR or a negative declaration for the Project, prepared pursuant to Public Resources Code Section 21092.
- Notices of availability of an EIR or a negative declaration for the Project, prepared pursuant to Public Resources Code Section 21152 and Section 15087 of Title 14 of the California Code of Regulations.
- Notices of approval and/or determination to carry out the Project, prepared pursuant to Public Resources Code Section 21152 or any other provision of law.
- Notices of any addenda prepared to a previously certified or approved EIR.
- Notices of approval or certification of any EIR or negative declaration, prepared pursuant to Public Resources Code Section 21152 or any other provision of law.
- Notices of determination that the Project is exempt from CEQA, prepared pursuant to Public Resources Code section 21152 or any other provision of law.
- Notice of any Final EIR prepared pursuant to CEQA.
- Notice of determination, prepared pursuant to Public Resources Code Section 21108 or Section 21152.

Please note that we are requesting notices of CEQA actions and notices of any public hearings to be held under any provision of Title 7 of the California Government Code governing California Planning and Zoning Law. **This request is filed pursuant to Public Resources Code Sections 21092.2 and 21167(f), and Government Code Section 65092**, which require local counties to mail such notices to any person who has filed a written request for them with the clerk of the agency's governing body.

Please send notice by electronic mail or U.S. Mail to:

Attention: Planning & Community Development Director

Dear Montebello Planning Commissioners,

I would like to share my support for the Twin Palms Apartment plan to build 156 new units along Poplar Avenue. We have a real housing shortage in our city and these new apartments will go a long way toward meeting the demand for housing. Not only that, but the design is beautiful. We need more projects like this in our city.

I hope you will do the right thing and vote in favor of project approval.

Regards,

William Caperton

Subject: Case No. PC-2021-0008-PD-PMP-SPR

Honorable Planning Commissioners:

I am fully in support of the proposed Twin Palms project on Poplar Ave. I think that taking an unsightly set of old and decaying buildings and turning them into charming new housing units is a great use of space and a great move for Montebello, which we all know is suffering a housing shortage. I can see a project like this being a beautiful addition to the neighborhood and a much-needed boost to the local business community for many years to come.

It's a true win-win. I urge a "yes" vote from the Planning Commission.

Sincerely,

Gabriella Lozano

Dear Planning Commissioners:

I am fully in support of the proposed new housing units on Poplar Avenue.

I live on Cleveland Ave near where the property will be developed . I received multiple invitations to attend a community meeting hosted by the developer. I attended two of those meetings. I like the development, we need more housing in our city and I am happy to see that the owner will beautify our neighborhood.

Sincerely,
Fernando Saldivar

Dear Planning Commissioners:

I'm in full support of the proposed new housing units on Poplar Avenue called the Twin Palms Apartments.

I have lived in Montebello for many years and was excited to see the planned project of the property. If you live in the neighborhood or have driven past the site you know that the immediate community needs work. A project like this does not come often which will increase the value and aesthetics to its surroundings. We need more investors to come into our City and invest in these types of beautiful projects!

Sincerely,

Re: Comment on Sustainable Communities Project Exemption for Poplar Avenue Residential Project

Dear Chairperson Briseno and Honorable Members of the Planning Commission:

I am writing on behalf of the Supporters Alliance for Environmental Responsibility ("SAFER"), a California nonprofit benefit corporation, regarding the proposed development of apartment units on Poplar Avenue, located in the City of Montebello and known as the Poplar Avenue Residential Project ("Project"). The City of Montebello Planning and Community Development department has determined that the project is categorically exempt from the requirement for preparation of environmental documents pursuant to Section 21155.1 of the California Environmental Quality Act ("CEQA"). However, after reviewing the Project and the associated documents, we conclude that the Project does not meet the requirement for an exemption under CEQA Section 21155.1. SAFER respectfully requests that the Planning Commission **not** recommend approval of the Planned Development District, Parking Management Plan, Site Plan Review, and Development Agreement for the Project and instead prepares necessary environmental documents under CEQA.

This comment has been prepared with the assistance of Certified Industrial Hygienist, Francis "Bud" Offermann, PE, CIH (Exhibit A) and environmental consulting firm Soil/Water/Air Protection Enterprise ("SWAPE") (Exhibit B). We incorporate the Offermann and SWAPE comments herein by reference.

I. Project Description

The proposed project consists of two elements: 140 apartment units in a 73,807 square foot development area and 16 units in a 12,500 square foot development area. The area surrounding the project site is largely residential, with a motel and an abandoned lot also bordering one of the project sites.

Project A's construction is expected to last approximately 21 months and will include demolition of the existing buildings onsite. Project B's construction is expected to last approximately 12 months and will also include demolition of existing buildings onsite.

II. Legal Standard

CEQA mandates that "the long-term protection of the environment . . . shall be the guiding criterion in public decisions" throughout California. PRC § 21001(d). A "project" is "the whole of an action" directly undertaken, supported, or authorized by a public agency "which may cause either a direct physical change in the environment, or a reasonably foreseeable indirect physical change in the environment." PRC § 21065; 14 CCR § 15378(a). For this reason, CEQA is concerned with an action's ultimate "impact on the environment." *Bozung v. LAFCO* (1975) 13 Cal.3d 263, 283. CEQA requires environmental factors to be considered at the "earliest possible stage . . . before [the project] gains irreversible momentum," *Id*. at 277, "at a point in the planning process where genuine flexibility remains." *Sundstrom v. Mendocino County* (1988) 202 Cal.App.3d 296, 307.

The EIR is the very heart of CEQA. *Bakersfield Citizens for Local Control v. City of Bakersfield (*2004) 124 Cal.App.4th 1184, 1214 (*Bakersfield Citizens*); *Pocket Protectors v. City of Sacramento* (2004) 124 Cal.App.4th 903, 927. The EIR is an "environmental 'alarm bell' whose purpose is to alert the public and its responsible officials to environmental changes before they have reached the ecological points of no return." *Bakersfield Citizens*, 124 Cal.App.4th at 1220. The EIR also functions as a "document of accountability," intended to "demonstrate to an apprehensive citizenry that the agency has, in fact, analyzed and considered the ecological implications of its action." *Laurel Heights Improvements Assn. v. Regents of Univ. of Cal.* (1988) 47 Cal.3d 376, 392. The EIR process "protects not only the environment but also informed self-government." *Pocket Protectors*, 124 Cal.App.4th at 927.

To achieve its objectives of environmental protection, CEQA has a three-tiered structure. 14 CCR § 15002(k); *Committee to Save the Hollywoodland Specific Plan v. City of Los Angeles* (2008) 161 Cal.App.4th 1168, 1185-86. First, if a project falls into an exempt category, or it can be seen with certainty that the activity in question will not have a significant effect on the environment, no further agency evaluation is required. *Id*. Second, if there is a possibility the project will have a significant effect on the environment, the agency must perform an initial threshold study. *Id*.; 14 CCR §

15063(a). If the study indicates that there is no substantial evidence that the project or any of its aspects may cause a significant effect on the environment the agency may issue a negative declaration. *Id*.; 14 CCR §§ 15063(b)(2), 15070. Finally, if the project will have a significant effect on the environment, an environmental impact report ("EIR") is required. *Id*. Here, since the County exempted the Project from CEQA entirely, the first step of the CEQA process applies.

CEQA identifies certain classes of projects which are exempt from the provisions of CEQA. These are called categorical exemptions. 14 CCR §§ 15300, 15354. "Exemptions to CEQA are narrowly construed and '[e]xemption categories are not to be expanded beyond the reasonable scope of their statutory language.' (Citations)." *Mountain Lion Foundation v. Fish & Game Com*. (1997) 16 Cal.4th 105, 125. The determination as to the appropriate scope of a categorical exemption is a question of law subject to independent, or de novo, review. *San Lorenzo Valley Community Advocates for Responsible Education v. San Lorenzo Valley Unified School Dist*., (2006) 139 Cal. App. 4th 1356, 1375 ("[Q]uestions of interpretation or application of the requirements of CEQA are matters of law. Thus, for example, interpreting the scope of a CEQA exemption presents 'a question of law, subject to de novo review by this court.'" (internal citations omitted)).

Here, the City has issued a notice of exemption alleging that the proposed Project is exempt from CEQA review under the Sustainable Communities Project ("SCP") exemption. PRC § 21155.1. However, as discussed below, this exemption is improper, and instead, a full CEQA analysis, such as an EIR, must be prepared for this Project.

III. Discussion

a. The City Incorrectly Applied CEQA's Section 21155.1 Sustainable Communities Project Exemption to the Project and Instead a Full CEQA Analysis is Required.

Under the SCP exemption, certain "transit priority" projects are exempt from environmental review under CEQA if they meet various environmental, land use and geographic criteria. PRC 21155.1. However, the SCP exemption cannot apply if a project site is subject to "[r]isk of a public health exposure at a level that would exceed the standards established by any state or federal agency." PRC § 21155.1(a)(6)(C).

Here, there is substantial evidence demonstrating that the Project will have public health impacts which exceed state standards. Specifically, the Project will result in significant increased cancer risks from emissions of formaldehyde and diesel particular matter in excess of standards established by the South Coast Air Quality Management District. Therefore, the Project does not qualify for the SCP exemption and the City must prepare appropriate CEQA documents for this Project.

b. There is Substantial Evidence that the Project Will Have a Significant Health Risk Impact from its Indoor Air Quality Impacts.

Certified Industrial Hygienist, Francis "Bud" Offermann, PE, CIH, has conducted a review of the proposed Project and relevant documents regarding the Project's indoor air emissions. Indoor Environmental Engineering Comments (December 23, 2021) (Exhibit A). Mr. Offermann concludes that it is likely that the Project will expose residents of the Project to significant impacts related to indoor air quality, and in particular, emissions of the cancer-causing chemical formaldehyde. Mr. Offermann is a leading expert on indoor air quality and has published extensively on the topic. Mr. Offermann's expert comments and curriculum vitae are attached as Exhibit A.

Mr. Offermann explains that many composite wood products used in building materials and furnishings commonly found in offices, warehouses, residences, and hotels contain formaldehyde-based glues which off-gas formaldehyde over a very long time period. He states, "[t]he primary source of formaldehyde indoors is composite wood products manufactured with urea-formaldehyde resins, such as plywood, medium density fiberboard, and particleboard. These materials are commonly used in building construction for flooring, cabinetry, baseboards, window shades, interior doors, and window and door trims." Ex. A, p. 2-3.

Formaldehyde is a known human carcinogen. Mr. Offermann states that future residential occupants would be exposed to a cancer risk of 120 in one million. Ex. A, p. 4. These calculations are assuming all materials are compliant with the California Air Resources Board's formaldehyde airborne toxics control measure. *Id*. These potential exposure levels exceed the South Coast Air Quality Management District's ("SCAQMD") CEQA significance threshold for airborne cancer risk of 10 per million. *Id*.

Mr. Offermann concludes that these significant environmental impacts should be analyzed in accordance with CEQA and mitigation measures should be imposed to reduce the risk of formaldehyde exposure. *Id*. at 5. Mr. Offermann identifies mitigation measures that are available to reduce these significant health risks, including the installation of air filters and a requirement that the applicant use only composite wood materials (e.g. hardwood plywood, medium density fiberboard, particleboard) for all interior finish systems that are made with CARB approved no-added formaldehyde (NAF) resins or ultra-low emitting formaldehyde (ULEF) resins in the buildings' interiors. *Id*. at 11-13.

The City has a duty to investigate issues relating to a project's potential environmental impacts, especially those issues raised by an expert's comments. *See Cty. Sanitation Dist. No. 2 v. Cty. of Kern*, (2005) 127 Cal.App.4th 1544, 1597–98 ("under CEQA, the lead agency bears a burden to investigate potential environmental impacts"). In addition to assessing the Project's potential health impacts to residents, Mr. Offermann identifies the investigatory path that the City should be following to develop an EIR which evaluates the Project's future formaldehyde emissions and

establishes mitigation measures that reduce the cancer risk below the SCAQMD level. *Id.* at 5-9. Such an analysis would be similar in form to the air quality modeling typically conducted as part of a CEQA review.

The failure to address the project's formaldehyde emissions is contrary to the California Supreme Court's decision in *California Building Industry Ass'n v. Bay Area Air Quality Mgmt. Dist.* (2015) 62 Cal.4th 369, 386 ("*CBIA"*). At issue in *CBIA* was whether the Air District could enact CEQA guidelines that advised lead agencies that they must analyze the impacts of adjacent environmental conditions on a project. The Supreme Court held that CEQA does not generally require lead agencies to consider the environment's effects on a project. *CBIA*, 62 Cal.4th at 800-801. However, to the extent a project may exacerbate existing adverse environmental conditions at or near a project site, those would still have to be considered pursuant to CEQA. *Id*. at 801 ("CEQA calls upon an agency to evaluate existing conditions in order to assess whether a project could exacerbate hazards that are already present"). In so holding, the Court expressly held that CEQA's statutory language required lead agencies to disclose and analyze "impacts on ***a project's users or residents*** that arise ***from the project's effects*** on the environment." *Id*. at 800 (emphasis added).

The carcinogenic formaldehyde emissions identified by Mr. Offermann are not an existing environmental condition. Those emissions to the air will be from the Project. Residents will be users of the Project. Rather than excusing the City from addressing the impacts of carcinogens emitted into the indoor air from the project, the Supreme Court in *CBIA* expressly finds that this type of effect by the project on the environment and a "project's users" must be addressed in the CEQA process.

The Supreme Court's reasoning is well-grounded in CEQA's statutory language. CEQA expressly includes a project's effects on human beings as an effect on the environment that must be addressed in an environmental review. "Section 21083(b)(3)'s express language, for example, requires a finding of a 'significant effect on the environment' (§ 21083(b)) whenever the 'environmental effects of a project will cause substantial adverse effects *on human beings,* either directly or indirectly.'" *CBIA*, 62 Cal.4th at 800 (emphasis in original). Likewise, "the Legislature has made clear—in declarations accompanying CEQA's enactment—that public health and safety are of great importance in the statutory scheme." *Id*., citing e.g., §§ 21000, subds. (b), (c), (d), (g), 21001, subds. (b), (d). It goes without saying that the future residents of the Project are human beings and the health and safety of those individuals is as important to CEQA's safeguards as that of other nearby residents currently living near the project site.

Because the Project's formaldehyde emissions constitute a "public health exposure at a level that would exceed" SCAQMD's significance threshold for increased cancer risk, the Project does not qualify for the SCP exemption. *See* PRC § 21155.1(a)(6)(C). Therefore, the City must conduct CEQA review of the Project and

prepare an adequate MND or EIR to disclose and mitigate the potential environmental impacts to future users of the building.

c. There is Substantial Evidence that the Project May Have a Significant Health Impact as a Result of Diesel Particulate Emissions.

Matt Hagemann, P.G., C.Hg., and Dr. Paul E. Rosenfeld, Ph.D., of the environmental consulting firm SWAPE reviewed the Project's potential impacts on health risk. After assessing the potential impacts of the Project, SWAPE concludes that the Project does not qualify for the SCP exemption due to its potentially significant health risk impact. SWAPE's comment letter and CVs are attached as Exhibit B and their comments are briefly summarized here.

One of the primary emissions of concern regarding health effects for land development projects is diesel particulate matter ("DPM"), which can be released during Project construction and operation. DPM consists of fine particles with a diameter less than 2.5 micrometers including a subgroup of ultrafine particles (with a diameter less than 0.1 micrometers). Diesel exhaust also contains a variety of harmful gases and cancer-causing substances. Exposure to DPM is a recognized health hazard, particularly to children whose lungs are still developing and the elderly who may have other serious health problems. According to the California Air Resources Board ("CARB"), DPM exposure may lead to the following adverse health effects: aggravated asthma; chronic bronchitis; increased respiratory and cardiovascular hospitalizations; decreased lung function in children; lung cancer; and premature deaths for those with heart or lung disease.[1]

SWAPE identifies three main reasons for why the Project's failure to evaluate potential health risk impacts is incorrect.

First, because the Project proponents failed to quantify Project-generated toxic air contaminant ("TAC") emissions, they also failed to indicate concentrations at which those pollutants would trigger adverse health effects. Ex. B, p. 2. In failing to connect TAC emissions to potential health risks to nearby receptors, the Project fails to meet the CEQA requirement that projects correlate increases in project-generated emissions to adverse impacts on human health cause by those emissions. *Id.*; *See Sierra Club v. County of Fresno* (2018) 6 Cal.5th 502, 510.

Second, the California Department of Justice recommends the preparation of a quantitative Health Risk Assessment ("HRA") pursuant to the Office of Environmental Health Hazard Assessment ("OEHHA"), the organization responsible for providing guidance on conducting HRAs in California, as well as local air district guidelines. OEHHA released its most recent guidance document in 2015 describing which types of projects warrant preparation of an HRA. *See* "Risk Assessment Guidelines Guidance

[1] *See* CARB Resources - Overview: Diesel Exhaust & Health, available at https://ww2.arb.ca.gov/resources/overview-diesel-exhaust-and-health.).

Manual for Preparation of Health Risk Assessments." OEHHA, February 2015, *available at*: http://oehha.ca.gov/air/hot_spots/hotspots2015.html. The OEHHA document recommends that if a project's construction is expected to last at least 2 months, as this Project will, it should be evaluated for cancer risks to nearby sensitive receptors. Ex. B, p. 3. Additionally, if a project is expected to operate for over 6 months, the exposure should be evaluated throughout the project using a 30-year exposure duration to estimate individual cancer risks. *Id.* SWAPE reasonably assumes that the Project will last at least 30 years, and therefore recommends that health risk impacts from the project be evaluated. *Id.* An EIR or at least an MND is therefore required to analyze these impacts.

Third, in failing to prepare a construction or operational HRA, the Project also fails to compare the excess health risk impact to the SCAQMD threshold of 10 in one million. Ex. B, p. 3. SWAPE therefore concludes that "an assessment of the health risk posed to nearby, existing receptors from Project construction and operation should have been conducted." *Id.*

SWAPE prepared a screening-level HRA to evaluate potential impacts from Project construction using AERSCREEN, a screening-level air quality dispersion model. Ex. B, p. 3-7. SWAPE applied a sensitive receptor distance of 50 meters and analyzed impacts to individuals at different stages of life based on OEHHA and SCAQMD guidance utilizing age sensitivity factors. *Id*. SWAPE found that the excess cancer risks at a sensitive receptor located approximately 50 meters away over the course of Project construction and operation are approximately 26.3 in one million for infants, 200 in one million for children, and 66.6 in one million for adults. *Id*. at 6. Moreover, **the excess lifetime cancer risk over the course of a residential lifetime is approximately 294 in one million**. *Id*. The risks to infants, children, adults, and lifetime residents exceed SCAQMD's threshold of 10 in one million.

SWAPE's analysis constitutes substantial evidence that the Project may have a significant health impact as a result of diesel particulate emissions. Because the Project's DPM emissions constitute a "public health exposure at a level that would exceed" SCAQMD's significance threshold for increased cancer risk, the Project does not qualify for the SCP exemption. *See* PRC § 21155.1(a)(6)(C). SWAPE recommends that "a full CEQA analysis should be prepared, including a quantified air pollution model as well as an updated, quantified refined health risk assessment which adequately and accurately evaluates health risk impacts associated with both Project construction and operation." Ex. B, p. 7.

IV. Conclusion

In light of the above comments, the Project does not meet the requirements of the SCP Exemption due to its potential public health risk impacts. The City must prepare an EIR for the Project, or at least an MND, and the draft CEQA document

should be circulated for public review and comment in accordance with CEQA. Thank you for considering these comments.

Sincerely,

Amalia Bowley Fuentes

Subject: Indoor Air Quality: Poplar Avenue Apartments Project, City of Montebello, CA (IEE File Reference: P-4527)

Pages: 19

Indoor Air Quality Impacts

Indoor air quality (IAQ) directly impacts the comfort and health of building occupants, and the achievement of acceptable IAQ in newly constructed and renovated buildings is a well-recognized design objective. For example, IAQ is addressed by major high-performance building rating systems and building codes (California Building Standards Commission, 2014; USGBC, 2014). Indoor air quality in homes is particularly important because occupants, on average, spend approximately ninety percent of their time indoors with the majority of this time spent at home (EPA, 2011). Some segments of the population that are most susceptible to the effects of poor IAQ, such as the very young and the elderly, occupy their homes almost continuously. Additionally, an increasing number of adults are working from home at least some of the time during the workweek. Indoor air quality also is a serious concern for workers in hotels, offices and other business establishments.

The concentrations of many air pollutants often are elevated in homes and other buildings relative to outdoor air because many of the materials and products used indoors contain

and release a variety of pollutants to air (Hodgson et al., 2002; Offermann and Hodgson, 2011). With respect to indoor air contaminants for which inhalation is the primary route of exposure, the critical design and construction parameters are the provision of adequate ventilation and the reduction of indoor sources of the contaminants.

Indoor Formaldehyde Concentrations Impact. In the California New Home Study (CNHS) of 108 new homes in California (Offermann, 2009), 25 air contaminants were measured, and formaldehyde was identified as the indoor air contaminant with the highest cancer risk as determined by the California Proposition 65 Safe Harbor Levels (OEHHA, 2017a), No Significant Risk Levels (NSRL) for carcinogens. The NSRL is the daily intake level calculated to result in one excess case of cancer in an exposed population of 100,000 (i.e., ten in one million cancer risk) and for formaldehyde is 40 µg/day. The NSRL concentration of formaldehyde that represents a daily dose of 40 µg is 2 µg/m^3, assuming a continuous 24-hour exposure, a total daily inhaled air volume of 20 m^3, and 100% absorption by the respiratory system. All of the CNHS homes exceeded this NSRL concentration of 2 µg/m^3. The median indoor formaldehyde concentration was 36 µg/m^3, and ranged from 4.8 to 136 µg/m^3, which corresponds to a median exceedance of the 2 µg/m^3 NSRL concentration of 18 and a range of 2.3 to 68.

Therefore, the cancer risk of a resident living in a California home with the median indoor formaldehyde concentration of 36 µg/m^3, is 180 per million as a result of formaldehyde alone. The CEQA significance threshold for airborne cancer risk is 10 per million, as established by the South Coast Air Quality Management District (SCAQMD, 2015).

Besides being a human carcinogen, formaldehyde is also a potent eye and respiratory irritant. In the CNHS, many homes exceeded the non-cancer reference exposure levels (RELs) prescribed by California Office of Environmental Health Hazard Assessment (OEHHA, 2017b). The percentage of homes exceeding the RELs ranged from 98% for the Chronic REL of 9 µg/m^3 to 28% for the Acute REL of 55 µg/m^3.

The primary source of formaldehyde indoors is composite wood products manufactured with urea-formaldehyde resins, such as plywood, medium density fiberboard, and

particleboard. These materials are commonly used in building construction for flooring, cabinetry, baseboards, window shades, interior doors, and window and door trims.

In January 2009, the California Air Resources Board (CARB) adopted an airborne toxics control measure (ATCM) to reduce formaldehyde emissions from composite wood products, including hardwood plywood, particleboard, medium density fiberboard, and also furniture and other finished products made with these wood products (California Air Resources Board 2009). While this formaldehyde ATCM has resulted in reduced emissions from composite wood products sold in California, they do not preclude that homes built with composite wood products meeting the CARB ATCM will have indoor formaldehyde concentrations below cancer and non-cancer exposure guidelines.

A follow up study to the California New Home Study (CNHS) was conducted in 2016-2018 (Singer et. al., 2019), and found that the median indoor formaldehyde in new homes built after 2009 with CARB Phase 2 Formaldehyde ATCM materials had lower indoor formaldehyde concentrations, with a median indoor concentrations of 22.4 $\mu g/m^3$ (18.2 ppb) as compared to a median of 36 $\mu g/m^3$ found in the 2007 CNHS. Unlike in the CNHS study where formaldehyde concentrations were measured with pumped DNPH samplers, the formaldehyde concentrations in the HENGH study were measured with passive samplers, which were estimated to under-measure the true indoor formaldehyde concentrations by approximately 7.5%. Applying this correction to the HENGH indoor formaldehyde concentrations results in a median indoor concentration of 24.1 $\mu g/m^3$, which is 33% lower than the 36 $\mu g/m^3$ found in the 2007 CNHS.

Thus, while new homes built after the 2009 CARB formaldehyde ATCM have a 33% lower median indoor formaldehyde concentration and cancer risk, the median lifetime cancer risk is still 120 per million for homes built with CARB compliant composite wood products. This median lifetime cancer risk is more than 12 times the OEHHA 10 in a million cancer risk threshold (OEHHA, 2017a).

With respect to the Poplar Avenue Apartments Project, City of Montebello, CA, the buildings consist of residential spaces.

The residential occupants will potentially have continuous exposure (e.g. 24 hours per day, 52 weeks per year). These exposures are anticipated to result in significant cancer risks resulting from exposures to formaldehyde released by the building materials and furnishing commonly found in residential construction.

Because these residences will be constructed with CARB Phase 2 Formaldehyde ATCM materials, and be ventilated with the minimum code required amount of outdoor air, the indoor residential formaldehyde concentrations are likely similar to those concentrations observed in residences built with CARB Phase 2 Formaldehyde ATCM materials, which is a median of 24.1 $\mu g/m^3$ (Singer et. al., 2020)

Assuming that the residential occupants inhale 20 m^3 of air per day, the average 70-year lifetime formaldehyde daily dose is 482 µg/day for continuous exposure in the residences. This exposure represents a cancer risk of 120 per million, which is more than 12 times the CEQA cancer risk of 10 per million. For occupants that do not have continuous exposure, the cancer risk will be proportionally less but still substantially over the CEQA cancer risk of 10 per million (e.g. for 12/hour/day occupancy, more than 6 times the CEQA cancer risk of 10 per million).

Appendix A, Indoor Formaldehyde Concentrations and the CARB Formaldehyde ATCM, provides analyses that show utilization of CARB Phase 2 Formaldehyde ATCM materials will not ensure acceptable cancer risks with respect to formaldehyde emissions from composite wood products.

Even composite wood products manufactured with CARB certified ultra low emitting formaldehyde (ULEF) resins do not insure that the indoor air will have concentrations of formaldehyde the meet the OEHHA cancer risks that substantially exceed 10 per million. The permissible emission rates for ULEF composite wood products are only 11-15% lower than the CARB Phase 2 emission rates. Only use of composite wood products made with no-added formaldehyde resins (NAF), such as resins made from soy, polyvinyl

acetate, or methylene diisocyanate can insure that the OEHHA cancer risk of 10 per million is met.

The following describes a method that should be used, prior to construction in the environmental review under CEQA, for determining whether the indoor concentrations resulting from the formaldehyde emissions of specific building materials/furnishings selected exceed cancer and non-cancer guidelines. Such a design analyses can be used to identify those materials/furnishings prior to the completion of the City's CEQA review and project approval, that have formaldehyde emission rates that contribute to indoor concentrations that exceed cancer and non-cancer guidelines, so that alternative lower emitting materials/furnishings may be selected and/or higher minimum outdoor air ventilation rates can be increased to achieve acceptable indoor concentrations and incorporated as mitigation measures for this project.

Pre-Construction Building Material/Furnishing Formaldehyde Emissions Assessment

This formaldehyde emissions assessment should be used in the environmental review under CEQA to assess the indoor formaldehyde concentrations from the proposed loading of building materials/furnishings, the area-specific formaldehyde emission rate data for building materials/furnishings, and the design minimum outdoor air ventilation rates. This assessment allows the applicant (and the City) to determine, before the conclusion of the environmental review process and the building materials/furnishings are specified, purchased, and installed, if the total chemical emissions will exceed cancer and non-cancer guidelines, and if so, allow for changes in the selection of specific material/furnishings and/or the design minimum outdoor air ventilations rates such that cancer and non-cancer guidelines are not exceeded.

1.) Define Indoor Air Quality Zones. Divide the building into separate indoor air quality zones, (IAQ Zones). IAQ Zones are defined as areas of well-mixed air. Thus, each ventilation system with recirculating air is considered a single zone, and each room or group of rooms where air is not recirculated (e.g. 100% outdoor air) is considered a separate zone. For IAQ Zones with the same construction material/furnishings and design minimum outdoor air ventilation rates. (e.g. hotel rooms, apartments, condominiums,

etc.) the formaldehyde emission rates need only be assessed for a single IAQ Zone of that type.

2.) Calculate Material/Furnishing Loading. For each IAQ Zone, determine the building material and furnishing loadings (e.g., m^2 of material/m^2 floor area, units of furnishings/m^2 floor area) from an inventory of all potential indoor formaldehyde sources, including flooring, ceiling tiles, furnishings, finishes, insulation, sealants, adhesives, and any products constructed with composite wood products containing urea-formaldehyde resins (e.g., plywood, medium density fiberboard, particleboard).

3.) Calculate the Formaldehyde Emission Rate. For each building material, calculate the formaldehyde emission rate (µg/h) from the product of the area-specific formaldehyde emission rate (µg/m^2-h) and the area (m^2) of material in the IAQ Zone, and from each furnishing (e.g. chairs, desks, etc.) from the unit-specific formaldehyde emission rate (µg/unit-h) and the number of units in the IAQ Zone.

NOTE: As a result of the high-performance building rating systems and building codes (California Building Standards Commission, 2014; USGBC, 2014), most manufacturers of building materials furnishings sold in the United States conduct chemical emission rate tests using the California Department of Health "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions for Indoor Sources Using Environmental Chambers," (CDPH, 2017), or other equivalent chemical emission rate testing methods. Most manufacturers of building furnishings sold in the United States conduct chemical emission rate tests using ANSI/BIFMA M7.1 Standard Test Method for Determining VOC Emissions (BIFMA, 2018), or other equivalent chemical emission rate testing methods.

CDPH, BIFMA, and other chemical emission rate testing programs, typically certify that a material or furnishing does not create indoor chemical concentrations in excess of the maximum concentrations permitted by their certification. For instance, the CDPH emission rate testing requires that the measured emission rates when input into an office, school, or residential model do not exceed one-half of the OEHHA Chronic Exposure Guidelines (OEHHA, 2017b) for the 35 specific VOCs, including formaldehyde, listed in

Table 4-1 of the CDPH test method (CDPH, 2017). These certifications themselves do not provide the actual area-specific formaldehyde emission rate (i.e., µg/m^2-h) of the product, but rather provide data that the formaldehyde emission rates do not exceed the maximum rate allowed for the certification. Thus, for example, the data for a certification of a specific type of flooring may be used to calculate that the area-specific emission rate of formaldehyde is less than 31 µg/m^2-h, but not the actual measured specific emission rate, which may be 3, 18, or 30 µg/m^2-h. These area-specific emission rates determined from the product certifications of CDPH, BIFA, and other certification programs can be used as an initial estimate of the formaldehyde emission rate.

If the actual area-specific emission rates of a building material or furnishing is needed (i.e. the initial emission rates estimates from the product certifications are higher than desired), then that data can be acquired by requesting from the manufacturer the complete chemical emission rate test report. For instance if the complete CDPH emission test report is requested for a CDHP certified product, that report will provide the actual area-specific emission rates for not only the 35 specific VOCs, including formaldehyde, listed in Table 4-1 of the CDPH test method (CDPH, 2017), but also all of the cancer and reproductive/developmental chemicals listed in the California Proposition 65 Safe Harbor Levels (OEHHA, 2017a), all of the toxic air contaminants (TACs) in the California Air Resources Board Toxic Air Contamination List (CARB, 2011), and the 10 chemicals with the greatest emission rates.

Alternatively, a sample of the building material or furnishing can be submitted to a chemical emission rate testing laboratory, such as Berkeley Analytical Laboratory (https://berkeleyanalytical.com), to measure the formaldehyde emission rate.

4.) Calculate the Total Formaldehyde Emission Rate. For each IAQ Zone, calculate the total formaldehyde emission rate (i.e. µg/h) from the individual formaldehyde emission rates from each of the building material/furnishings as determined in Step 3.

5.) Calculate the Indoor Formaldehyde Concentration. For each IAQ Zone, calculate the indoor formaldehyde concentration (µg/m^3) from Equation 1 by dividing the total

formaldehyde emission rates (i.e. µg/h) as determined in Step 4, by the design minimum outdoor air ventilation rate (m^3/h) for the IAQ Zone.

$$C_{in} = \frac{E_{total}}{Q_{oa}} \quad \text{(Equation 1)}$$

where:

C_{in} = indoor formaldehyde concentration (µg/m^3)

E_{total} = total formaldehyde emission rate (µg/h) into the IAQ Zone.

Q_{oa} = design minimum outdoor air ventilation rate to the IAQ Zone (m^3/h)

The above Equation 1 is based upon mass balance theory, and is referenced in Section 3.10.2 "Calculation of Estimated Building Concentrations" of the California Department of Health "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions for Indoor Sources Using Environmental Chambers", (CDPH, 2017).

6.) Calculate the Indoor Exposure Cancer and Non-Cancer Health Risks. For each IAQ Zone, calculate the cancer and non-cancer health risks from the indoor formaldehyde concentrations determined in Step 5 and as described in the OEHHA Air Toxics Hot Spots Program Risk Assessment Guidelines; Guidance Manual for Preparation of Health Risk Assessments (OEHHA, 2015).

7.) Mitigate Indoor Formaldehyde Exposures of exceeding the CEQA Cancer and/or Non-Cancer Health Risks. In each IAQ Zone, provide mitigation for any formaldehyde exposure risk as determined in Step 6, that exceeds the CEQA cancer risk of 10 per million or the CEQA non-cancer Hazard Quotient of 1.0.

Provide the source and/or ventilation mitigation required in all IAQ Zones to reduce the health risks of the chemical exposures below the CEQA cancer and non-cancer health risks.

Source mitigation for formaldehyde may include:

1.) reducing the amount materials and/or furnishings that emit formaldehyde
2.) substituting a different material with a lower area-specific emission rate of

formaldehyde

Ventilation mitigation for formaldehyde emitted from building materials and/or furnishings may include:

1.) increasing the design minimum outdoor air ventilation rate to the IAQ Zone.

NOTE: Mitigating the formaldehyde emissions through use of less material/furnishings, or use of lower emitting materials/furnishings, is the preferred mitigation option, as mitigation with increased outdoor air ventilation increases initial and operating costs associated with the heating/cooling systems.

Further, we are not asking that the builder "speculate" on what and how much composite materials be used, but rather at the design stage to select composite wood materials based on the formaldehyde emission rates that manufacturers routinely conduct using the California Department of Health "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions for Indoor Sources Using Environmental Chambers," (CDPH, 2017), and use the procedure described earlier above (i.e. Pre-Construction Building Material/Furnishing Formaldehyde Emissions Assessment) to insure that the materials selected achieve acceptable cancer risks from material off gassing of formaldehyde.

Outdoor Air Ventilation Impact. Another important finding of the CNHS, was that the outdoor air ventilation rates in the homes were very low. Outdoor air ventilation is a very important factor influencing the indoor concentrations of air contaminants, as it is the primary removal mechanism of all indoor air generated contaminants. Lower outdoor air exchange rates cause indoor generated air contaminants to accumulate to higher indoor air concentrations. Many homeowners rarely open their windows or doors for ventilation as a result of their concerns for security/safety, noise, dust, and odor concerns (Price, 2007). In the CNHS field study, 32% of the homes did not use their windows during the 24-hour Test Day, and 15% of the homes did not use their windows during the entire preceding week. Most of the homes with no window usage were homes in the winter field session. Thus, a substantial percentage of homeowners never open their windows, especially in the

winter season. The median 24-hour measurement was 0.26 air changes per hour (ach), with a range of 0.09 ach to 5.3 ach. A total of 67% of the homes had outdoor air exchange rates below the minimum California Building Code (2001) requirement of 0.35 ach. Thus, the relatively tight envelope construction, combined with the fact that many people never open their windows for ventilation, results in homes with low outdoor air exchange rates and higher indoor air contaminant concentrations.

The Poplar Avenue Apartments Project, City of Montebello, CA is close to roads with moderate to high traffic (e.g., North Poplar Avenue, East Whittier Boulevard, East Cleveland Avenue, etc.), and thus the Project site is a sound impacted site.

According to the Poplar Avenue Apartments Project Mitigated Negative Declaration (Ceqaology, 2021), the existing ambient noise levels reported in Table 6, range from 43.3 dBA to 78.4 dBA. These noise levels were measured over just a 15-minute period on a Monday, and thus are not representative of the day/night noise levels. An acoustic study consisting of one-week long measurements should be conducted to determine the CNEL and/or L_{dn}, sound levels.

As a result of the anticipated high outdoor noise levels, the current project will require a mechanical supply of outdoor air ventilation to allow for a habitable interior environment with closed windows and doors. Such a ventilation system would allow windows and doors to be kept closed at the occupant's discretion to control exterior noise within building interiors.

$PM_{2.5}$ Outdoor Concentrations Impact. An additional impact of the nearby motor vehicle traffic associated with this project, are the outdoor concentrations of $PM_{2.5}$. According to the Poplar Avenue Apartments Project Mitigated Negative Declaration (Ceqaology, 2021), the Project is located in the South Coast Air Basin, which is a State and Federal non-attainment area for $PM_{2.5}$.

An air quality analyses should to be conducted to determine the concentrations of $PM_{2.5}$ in the outdoor and indoor air that people inhale each day. This air quality analyses needs to

consider the cumulative impacts of the project related emissions, existing and projected future emissions from local $PM_{2.5}$ sources (e.g. stationary sources, motor vehicles, and airport traffic) upon the outdoor air concentrations at the Project site. If the outdoor concentrations are determined to exceed the California and National annual average $PM_{2.5}$ exceedence concentration of 12 $\mu g/m^3$, or the National 24-hour average exceedence concentration of 35 $\mu g/m^3$, then the buildings need to have a mechanical supply of outdoor air that has air filtration with sufficient removal efficiency, such that the indoor concentrations of outdoor $PM_{2.5}$ particles is less than the California and National $PM_{2.5}$ annual and 24-hour standards.

It is my experience that based on the projected high traffic noise levels, the annual average concentration of $PM_{2.5}$ will exceed the California and National $PM_{2.5}$ annual and 24-hour standards and warrant installation of high efficiency air filters (i.e. MERV 13 or higher) in all mechanically supplied outdoor air ventilation systems.

Indoor Air Quality Impact Mitigation Measures

The following are recommended mitigation measures to minimize the impacts upon indoor quality:

Indoor Formaldehyde Concentrations Mitigation. Use only composite wood materials (e.g. hardwood plywood, medium density fiberboard, particleboard) for all interior finish systems that are made with CARB approved no-added formaldehyde (NAF) resins (CARB, 2009). CARB Phase 2 certified composite wood products, or ultra-low emitting formaldehyde (ULEF) resins, do not insure indoor formaldehyde concentrations that are below the CEQA cancer risk of 10 per million. Only composite wood products manufactured with CARB approved no-added formaldehyde (NAF) resins, such as resins made from soy, polyvinyl acetate, or methylene diisocyanate can insure that the OEHHA cancer risk of 10 per million is met.

Alternatively, conduct the previously described Pre-Construction Building Material/Furnishing Chemical Emissions Assessment, to determine that the combination

of formaldehyde emissions from building materials and furnishings do not create indoor formaldehyde concentrations that exceed the CEQA cancer and non-cancer health risks.

It is important to note that we are not asking that the builder "speculate" on what and how much composite materials be used, but rather at the design stage to select composite wood materials based on the formaldehyde emission rates that manufacturers routinely conduct using the California Department of Health "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions for Indoor Sources Using Environmental Chambers", (CDPH, 2017), and use the procedure described above (i.e. Pre-Construction Building Material/Furnishing Formaldehyde Emissions Assessment) to insure that the materials selected achieve acceptable cancer risks from material off gassing of formaldehyde.

Outdoor Air Ventilation Mitigation. Provide each habitable room with a continuous mechanical supply of outdoor air that meets or exceeds the California 2016 Building Energy Efficiency Standards (California Energy Commission, 2015) requirements of the greater of 15 cfm/occupant or 0.15 cfm/ft^2 of floor area. Following installation of the system conduct testing and balancing to insure that required amount of outdoor air is entering each habitable room and provide a written report documenting the outdoor airflow rates. Do not use exhaust only mechanical outdoor air systems, use only balanced outdoor air supply and exhaust systems or outdoor air supply only systems. Provide a manual for the occupants or maintenance personnel, that describes the purpose of the mechanical outdoor air system and the operation and maintenance requirements of the system.

$PM_{2.5}$ Outdoor Air Concentration Mitigation. Install air filtration with sufficient $PM_{2.5}$ removal efficiency (e.g. MERV 13 or higher) to filter the outdoor air entering the mechanical outdoor air supply systems, such that the indoor concentrations of outdoor $PM_{2.5}$ particles are less than the California and National $PM_{2.5}$ annual and 24-hour standards. Install the air filters in the system such that they are accessible for replacement by the occupants or maintenance personnel. Include in the mechanical outdoor air

ventilation system manual instructions on how to replace the air filters and the estimated frequency of replacement.

APPENDIX A

INDOOR FORMALDEHYDE CONCENTRATIONS
AND THE
CARB FORMALDEHYDE ATCM

With respect to formaldehyde emissions from composite wood products, the CARB ATCM regulations of formaldehyde emissions from composite wood products, do not assure healthful indoor air quality. The following is the stated purpose of the CARB ATCM regulation - *The purpose of this airborne toxic control measure is to "reduce formaldehyde emissions from composite wood products, and finished goods that contain composite wood products, that are sold, offered for sale, supplied, used, or manufactured for sale in California"*. In other words, the CARB ATCM regulations do not "assure healthful indoor air quality", but rather "reduce formaldehyde emissions from composite wood products".

Just how much protection do the CARB ATCM regulations provide building occupants from the formaldehyde emissions generated by composite wood products? Definitely some, but certainly the regulations do not "*assure healthful indoor air quality"* when CARB Phase 2 products are utilized. As shown in the Chan 2019 study of new California homes, the median indoor formaldehyde concentration was of 22.4 $\mu g/m^3$ (18.2 ppb), which corresponds to a cancer risk of 112 per million for occupants with continuous exposure, which is more than 11 times the CEQA cancer risk of 10 per million.

Another way of looking at how much protection the CARB ATCM regulations provide building occupants from the formaldehyde emissions generated by composite wood products is to calculate the maximum number of square feet of composite wood product that can be in a residence without exceeding the CEQA cancer risk of 10 per million for occupants with continuous occupancy.

For this calculation I utilized the floor area (2,272 ft^2), the ceiling height (8.5 ft), and the number of bedrooms (4) as defined in Appendix B (New Single-Family Residence Scenario) of the Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions for Indoor Sources Using Environmental Chambers, Version 1.1, 2017, California

Department of Public Health, Richmond, CA. https://www.cdph.ca.gov/Programs/CCDPHP/DEODC/EHLB/IAQ/Pages/VOC.aspx.

For the outdoor air ventilation rate I used the 2019 Title 24 code required mechanical ventilation rate (ASHRAE 62.2) of 106 cfm (180 m^3/h) calculated for this model residence. For the composite wood formaldehyde emission rates I used the CARB ATCM Phase 2 rates.

The calculated maximum number of square feet of composite wood product that can be in a residence, without exceeding the CEQA cancer risk of 10 per million for occupants with continuous occupancy are as follows for the different types of regulated composite wood products.

Medium Density Fiberboard (MDF) – 15 ft^2 (0.7% of the floor area), or
Particle Board – 30 ft^2 (1.3% of the floor area), or
Hardwood Plywood – 54 ft^2 (2.4% of the floor area), or
Thin MDF – 46 ft^2 (2.0 % of the floor area).

For offices and hotels the calculated maximum amount of composite wood product (% of floor area) that can be used without exceeding the CEQA cancer risk of 10 per million for occupants, assuming 8 hours/day occupancy, and the California Mechanical Code minimum outdoor air ventilation rates are as follows for the different types of regulated composite wood products.

Medium Density Fiberboard (MDF) – 3.6 % (offices) and 4.6% (hotel rooms), or
Particle Board – 7.2 % (offices) and 9.4% (hotel rooms), or
Hardwood Plywood – 13 % (offices) and 17% (hotel rooms), or
Thin MDF – 11 % (offices) and 14 % (hotel rooms)

Clearly the CARB ATCM does not regulate the formaldehyde emissions from composite wood products such that the potentially large areas of these products, such as for flooring, baseboards, interior doors, window and door trims, and kitchen and bathroom cabinetry,

could be used without causing indoor formaldehyde concentrations that result in CEQA cancer risks that substantially exceed 10 per million for occupants with continuous occupancy.

Even composite wood products manufactured with CARB certified ultra low emitting formaldehyde (ULEF) resins do not insure that the indoor air will have concentrations of formaldehyde the meet the OEHHA cancer risks that substantially exceed 10 per million. The permissible emission rates for ULEF composite wood products are only 11-15% lower than the CARB Phase 2 emission rates. Only use of composite wood products made with no-added formaldehyde resins (NAF), such as resins made from soy, polyvinyl acetate, or methylene diisocyanate can insure that the OEHHA cancer risk of 10 per million is met.

If CARB Phase 2 compliant or ULEF composite wood products are utilized in construction, then the resulting indoor formaldehyde concentrations should be determined in the design phase using the specific amounts of each type of composite wood product, the specific formaldehyde emission rates, and the volume and outdoor air ventilation rates of the indoor spaces, and all feasible mitigation measures employed to reduce this impact (e.g. use less formaldehyde containing composite wood products and/or incorporate mechanical systems capable of higher outdoor air ventilation rates). See the procedure described earlier (i.e. Pre-Construction Building Material/Furnishing Formaldehyde Emissions Assessment) to insure that the materials selected achieve acceptable cancer risks from material off gassing of formaldehyde.

Alternatively, and perhaps a simpler approach, is to use only composite wood products (e.g. hardwood plywood, medium density fiberboard, particleboard) for all interior finish systems that are made with CARB approved no-added formaldehyde (NAF) resins.

Education

M.S. Mechanical Engineering (1985)
Stanford University, Stanford, CA.

Graduate Studies in Air Pollution Monitoring and Control (1980)
University of California, Berkeley, CA.

B.S. in Mechanical Engineering (1976)
Rensselaer Polytechnic Institute, Troy, N.Y.

Professional Experience

President: Indoor Environmental Engineering, San Francisco, CA. December, 1981 - present.

Direct team of environmental scientists, chemists, and mechanical engineers in conducting State and Federal research regarding indoor air quality instrumentation development, building air quality field studies, ventilation and air cleaning performance measurements, and chemical emission rate testing.

Provide design side input to architects regarding selection of building materials and ventilation system components to ensure a high quality indoor environment.

Direct Indoor Air Quality Consulting Team for the winning design proposal for the new State of Washington Ecology Department building.

Develop a full-scale ventilation test facility for measuring the performance of air diffusers; ASHRAE 129, Air Change Effectiveness, and ASHRAE 113, Air Diffusion Performance Index.

Develop a chemical emission rate testing laboratory for measuring the chemical emissions from building materials, furnishings, and equipment.

Principle Investigator of the California New Homes Study (2005-2007). Measured ventilation and indoor air quality in 108 new single family detached homes in northern and southern California.

Develop and teach IAQ professional development workshops to building owners, managers, hygienists, and engineers.

Air Pollution Engineer: Earth Metrics Inc., Burlingame, CA, October, 1985 to March, 1987.

Responsible for development of an air pollution laboratory including installation a forced choice olfactometer, tracer gas electron capture chromatograph, and associated calibration facilities. Field team leader for studies of fugitive odor emissions from sewage treatment plants, entrainment of fume hood exhausts into computer chip fabrication rooms, and indoor air quality investigations.

Staff Scientist: Building Ventilation and Indoor Air Quality Program, Energy and Environment Division, Lawrence Berkeley Laboratory, Berkeley, CA. January, 1980 to August, 1984.

Deputy project leader for the Control Techniques group; responsible for laboratory and field studies aimed at evaluating the performance of indoor air pollutant control strategies (i.e. ventilation, filtration, precipitation, absorption, adsorption, and source control).

Coordinated field and laboratory studies of air-to-air heat exchangers including evaluation of thermal performance, ventilation efficiency, cross-stream contaminant transfer, and the effects of freezing/defrosting.

Developed an *in situ* test protocol for evaluating the performance of air cleaning systems and introduced the concept of effective cleaning rate (ECR) also known as the Clean Air Delivery Rate (CADR).

Coordinated laboratory studies of portable and ducted air cleaning systems and their effect on indoor concentrations of respirable particles and radon progeny.

Co-designed an automated instrument system for measuring residential ventilation rates and radon concentrations.

Designed hardware and software for a multi-channel automated data acquisition system used to evaluate the performance of air-to-air heat transfer equipment.

Assistant Chief Engineer: Alta Bates Hospital, Berkeley, CA, October, 1979 to January, 1980.

Responsible for energy management projects involving installation of power factor correction capacitors on large inductive electrical devices and installation of steam meters on physical plant steam lines. Member of Local 39, International Union of Operating Engineers.

Manufacturing Engineer: American Precision Industries, Buffalo, NY, October, 1977 to October, 1979.

Responsible for reorganizing the manufacturing procedures regarding production of shell and tube heat exchangers. Designed customized automatic assembly, welding, and testing equipment. Designed a large paint spray booth. Prepared economic studies justifying new equipment purchases. Safety Director.

Project Engineer: Arcata Graphics, Buffalo, N.Y. June, 1976 to October, 1977.

Responsible for the design and installation of a bulk ink storage and distribution system and high speed automatic counting and marking equipment. Also coordinated material handling studies which led to the purchase and installation of new equipment.

PROFESSIONAL ORGANIZATION MEMBERSHIP

American Society of Heating, Refrigeration and Air Conditioning Engineers (ASHRAE)

- Chairman of SPC-145P, Standards Project Committee - Test Method for Assessing the Performance of Gas Phase Air Cleaning Equipment (1991-1992)
- Member SPC-129P, Standards Project Committee - Test Method for Ventilation Effectiveness (1986-97)
  - Member of Drafting Committee
- Member Environmental Health Committee (1992-1994, 1997-2001, 2007-2010)
  - Chairman of EHC Research Subcommittee
  - Member of Man Made Mineral Fiber Position Paper Subcommittee
  - Member of the IAQ Position Paper Committee
  - Member of the Legionella Position Paper Committee
  - Member of the Limiting Indoor Mold and Dampness in Buildings Position Paper Committee
- Member SSPC-62, Standing Standards Project Committee - Ventilation for Acceptable Indoor Air Quality (1992 to 2000)
  - Chairman of Source Control and Air Cleaning Subcommittee
- Chairman of TC-4.10, Indoor Environmental Modeling (1988-92)
  - Member of Research Subcommittee
- Chairman of TC-2.3, Gaseous Air Contaminants and Control Equipment (1989-92)
  - Member of Research Subcommittee

American Society for Testing and Materials (ASTM)

- D-22 Sampling and Analysis of Atmospheres
  - Member of Indoor Air Quality Subcommittee
- E-06 Performance of Building Constructions

American Board of Industrial Hygiene (ABIH)

American Conference of Governmental Industrial Hygienists (ACGIH)

- Bioaerosols Committee (2007-2013)

American Industrial Hygiene Association (AIHA)

Cal-OSHA Indoor Air Quality Advisory Committee

International Society of Indoor Air Quality and Climate (ISIAQ)

- Co-Chairman of Task Force on HVAC Hygiene

U. S. Green Building Council (USGBC)
- Member of the IEQ Technical Advisory Group (2007-2009)
- Member of the IAQ Performance Testing Work Group (2010-2012)

Western Construction Consultants (WESTCON)

PROFESSIONAL CREDENTIALS

Licensed Professional Engineer - Mechanical Engineering

Certified Industrial Hygienist - American Board of Industrial Hygienists

SCIENTIFIC MEETINGS AND SYMPOSIA

Biological Contamination, Diagnosis, and Mitigation, Indoor Air'90, Toronto, Canada, August, 1990.

Models for Predicting Air Quality, Indoor Air'90, Toronto, Canada, August, 1990.

Microbes in Building Materials and Systems, Indoor Air '93, Helsinki, Finland, July, 1993.

Microorganisms in Indoor Air Assessment and Evaluation of Health Effects and Probable Causes, Walnut Creek, CA, February 27, 1997.

Controlling Microbial Moisture Problems in Buildings, Walnut Creek, CA, February 27, 1997.

Scientific Advisory Committee, Roomvent 98, 6th International Conference on Air Distribution in Rooms, KTH, Stockholm, Sweden, June 14-17, 1998.

Moisture and Mould, Indoor Air '99, Edinburgh, Scotland, August, 1999.

Ventilation Modeling and Simulation, Indoor Air '99, Edinburgh, Scotland, August, 1999.

Microbial Growth in Materials, Healthy Buildings 2000, Espoo, Finland, August, 2000.

Co-Chair, Bioaerosols X- Exposures in Residences, Indoor Air 2002, Monterey, CA, July 2002.

Healthy Indoor Environments, Anaheim, CA, April 2003.

Chair, Environmental Tobacco Smoke in Multi-Family Homes, Indoor Air 2008, Copenhagen, Denmark, July 2008.

Co-Chair, ISIAQ Task Force Workshop; HVAC Hygiene, Indoor Air 2002, Monterey, CA, July 2002.

Chair, ETS in Multi-Family Housing: Exposures, Controls, and Legalities Forum, Healthy Buildings 2009, Syracuse, CA, September 14, 2009.

Chair, Energy Conservation and IAQ in Residences Workshop, Indoor Air 2011, Austin, TX, June 6, 2011.

Chair, Electronic Cigarettes: Chemical Emissions and Exposures Colloquium, Indoor Air 2016, Ghent, Belgium, July 4, 2016.

SPECIAL CONSULTATION

Provide consultation to the American Home Appliance Manufacturers on the development of a standard for testing portable air cleaners, AHAM Standard AC-1.

Served as an expert witness and special consultant for the U.S. Federal Trade Commission regarding the performance claims found in advertisements of portable air cleaners and residential furnace filters.

Conducted a forensic investigation for a San Mateo, CA pro se defendant, regarding an alleged homicide where the victim was kidnapped in a steamer trunk. Determined the air exchange rate in the steamer trunk and how long the person could survive.

Conducted *in situ* measurement of human exposure to toluene fumes released during nailpolish application for a plaintiffs attorney pursuing a California Proposition 65 product labeling case. June, 1993.

Conducted a forensic *in situ* investigation for the Butte County, CA Sheriff's Department of the emissions of a portable heater used in the bedroom of two twin one year old girls who suffered simultaneous crib death.

Consult with OSHA on the 1995 proposed new regulation regarding indoor air quality and environmental tobacco smoke.

Consult with EPA on the proposed Building Alliance program and with OSHA on the proposed new OSHA IAQ regulation.

Johnson Controls Audit/Certification Expert Review; Milwaukee, WI. May 28-29, 1997.

Winner of the nationally published 1999 Request for Proposals by the State of Washington to conduct a comprehensive indoor air quality investigation of the Washington State Department of Ecology building in Lacey, WA.

Selected by the State of California Attorney General's Office in August, 2000 to conduct a comprehensive indoor air quality investigation of the Tulare County Court House.

Lawrence Berkeley Laboratory IAQ Experts Workshop: "Cause and Prevention of Sick Building Problems in Offices: The Experience of Indoor Environmental Quality Investigators", Berkeley, California, May 26-27, 2004.

Provide consultation and chemical emission rate testing to the State of California Attorney General's Office in 2013-2015 regarding the chemical emissions from e-cigarettes.

Subject: Comments on the Poplar Avenue Apartments Project (SCH No. 2021110168)

Dear Ms. Fuentes,

We have reviewed the Notice of Public Hearing dated February 17, 2022 ("Notice") and the October 2021 Initial Study / Mitigated Negative Declaration ("IS/MND") for the Poplar Avenue Apartments ("Project") located in the City of Montebello ("City"). The proposed Project consists of two elements: Project A and Project B. Project A proposes to construct 140 residential apartment units and 298 parking spaces on a 1.69-acre site while Project B proposes to construct 16 residential apartment units and 30 parking spaces on a 0.28-acre site.

Our review concludes that the Notice fails to adequately consider or evaluate the Project's air quality and health risk impacts. As a result of our findings, the proposed Project does not qualify for a categorical exemption under the California Environmental Quality Act ("CEQA") per the California Resources Code ("PRC") Section 21155.1 under the Sustainable Communities Project Exemption, and, therefore, a full CEQA analysis must be prepared to adequately assess and mitigate the potential air quality and health risk impacts that the Project may have on the surrounding environment.

Air Quality

Incorrect Reliance on PRC Section 21155.1

Regarding the proposed categorical exemption, the Notice states:

> "The proposal is considered a "Project" and is categorically exempt under the California Environmental Quality Act (CEQA) per the California Resources Code (PRC) Section 21155.1 under the Sustainable Communities Project Exemption (SCPE)" (p. 1).

However, according to PRC Section 21155.1:

> "**21155.1.** If the legislative body finds, after conducting a public hearing, that a transit priority project meets all of the requirements of subdivisions (a) and (b) and one of the requirements of subdivision (c), the transit priority project is declared to be a sustainable communities project and shall be exempt from this division.
>
> (a) The transit priority project complies with all of the following environmental criteria: […]
>
> (6) The transit priority project site is not subject to any of the following: […]
>
> (C) Risk of a public health exposure at a level that would exceed the standards established by any state or federal agency."[1]

As demonstrated above, a transit priority project can be exempt from environmental review under CEQA if the project does not pose a "[r]isk of a public health exposure at a level that would exceed the standards established by any state or federal agency." However, as demonstrated in SWAPE's analysis below, the proposed Project poses a potentially significant health risk impact. As such, the proposed Project is not eligible for a Sustainable Communities Project Exemption ("SPCE") per PRC Section 21155.1 and a full CEQA analysis should be prepared to adequately assess and mitigate the potential health risk impacts that the Project may have on the surrounding environment.

Diesel Particulate Matter Health Risk Emissions Inadequately Evaluated

As previously stated, the Notice claims the Project qualifies for a SPCE per PRC Section 21155.1. However, the proposed Project's failure to evaluate the potential health risk impacts is incorrect for three reasons.

First, the IS/MND indicates that construction of "Project A" will produce emissions of diesel particulate matter ("DPM") through the exhaust stacks of construction equipment throughout the construction period of 21 months (p. 36). Furthermore, the proposed land uses associated with Project A will generate 762 daily weekday vehicle trips, which will generate additional exhaust emissions and continue to expose nearby sensitive receptors to DPM emissions (p. 121, Table 8). However, the Notice and IS/MND fail to quantify Project-generated toxic air contaminant ("TAC") emissions or indicate the concentrations at which such pollutants would trigger adverse health effects. Thus, without making a reasonable effort to connect the Project's construction-related and operational TAC emissions to the potential health risks posed to nearby receptors, the is inconsistent with CEQA's requirement to correlate the increase in emissions generated by the Project with the potential adverse impacts on human health.

Second, the Office of Environmental Health Hazard Assessment ("OEHHA"), the organization responsible for providing guidance on conducting HRAs in California, released its most recent *Risk Assessment*

[1] "CHAPTER 4.2. Implementation of the Sustainable Communities Strategy [21155 - 21155.4]." California Legislative Information Public Resources Code, June 2012, *available at:* https://leginfo.legislature.ca.gov/faces/codes_displaySection.xhtml?sectionNum=21155.1.&lawCode=PRC.

Guidelines: Guidance Manual for Preparation of Health Risk Assessments in February 2015.[2] The OEHHA document recommends that all short-term projects lasting at least two months be evaluated for cancer risks to nearby sensitive receptors. As the Project's construction duration exceeds the 2-month requirement set forth by OEHHA, it is clear that the Project meets the threshold warranting a quantified HRA under OEHHA guidance. Furthermore, the OEHHA document recommends that exposure from projects lasting more than 6 months be evaluated for the duration of the project and recommends that an exposure duration of 30 years be used to estimate individual cancer risk for the maximally exposed individual resident ("MEIR"). Even though we were not provided with the expected lifetime of the Project, we can reasonably assume that the Project will operate for at least 30 years, if not more. Therefore, we recommend that health risk impacts from Project operation also be evaluated, as a 30-year exposure duration vastly exceeds the 6-month requirement set forth by OEHHA. These recommendations reflect the most recent state health risk policies, and as such, we recommend that an analysis of health risk impacts posed to nearby sensitive receptors from Project-generated DPM emissions be included in a full CEQA analysis for the Project.

Third, by claiming a less-than-significant impact without conducting a quantified construction or operational HRA for nearby, existing sensitive receptors, the Notice and IS/MND fail to compare the Project's combined excess health risk impact to the applicable SCAQMD numeric threshold of 10 in one million.[3] Thus, in accordance with the most relevant guidance, an assessment of the health risk posed to nearby, existing receptors from Project construction and operation should have been conducted.

Screening-Level Analysis Indicates a Potentially Significant Health Risk Impact

In an effort to accurately estimate Project's construction-related and operational emissions associated with Project "A," we utilized CalEEMod.2020.4.0, as well as the Project-specific information provided by the IS/MND. CalEEMod provides recommended default values based on site-specific information, such as land use type, meteorological data, total lot acreage, project type, and typical equipment associated with project type. As indicated by the IS/MND, we included 140 dwelling units, consisting of 170,161-SF, of "Apartments Mid Rise" in our model (p. 11-13). We also included 298 parking spaces, consisting of 124,514-SF, of "Enclosed Parking with Elevator" (p. 13). Furthermore, we included construction phase lengths, off-road construction equipment types and unit amounts, and a hauling trip number that were consistent with information provided in the IS/MND (p. 36). Finally, we assumed that the Project would be located within Climate Zone 9[4] and the Project's utilities would be provided by Los Angeles Department of Water and Power.[5] All other values were left as default. It is important to note we only

modeled emissions associated with the proposed Project A and excluded Project B. Thus, emissions estimates are underestimated and not representative of the entire Project.

In order to conduct our screening-level risk assessment we relied upon AERSCREEN, which is a screening level air quality dispersion model.[6] The model replaced SCREEN3, and AERSCREEN is included in the OEHHA[7] and the California Air Pollution Control Officers Associated ("CAPCOA")[8] guidance as the appropriate air dispersion model for Level 2 health risk screening assessments ("HRSAs"). A Level 2 HRSA utilizes a limited amount of site-specific information to generate maximum reasonable downwind concentrations of air contaminants to which nearby sensitive receptors may be exposed. If an unacceptable air quality hazard is determined to be possible using AERSCREEN, a more refined modeling approach is required prior to approval of the Project.

We prepared a preliminary HRA of the Project's construction and operational health risk impact to residential sensitive receptors using the annual PM_{10} exhaust estimates from SWAPE's CalEEMod output files. Consistent with recommendations set forth by OEHHA, we assumed residential exposure begins during the third trimester stage of life. SWAPE's CalEEMod model indicates that construction activities will generate approximately 170 pounds of DPM over the 640-day construction period.[9] The AERSCREEN model relies on a continuous average emission rate to simulate maximum downward concentrations from point, area, and volume emission sources. To account for the variability in equipment usage and truck trips over Project construction, we calculated an average DPM emission rate by the following equation:

$$Emission\ Rate\ \left(\frac{grams}{second}\right) = \frac{170.2\ lbs}{640\ days} \times \frac{453.6\ grams}{lbs} \times \frac{1\ day}{24\ hours} \times \frac{1\ hour}{3{,}600\ seconds} = \mathbf{0.00140\ g/s}$$

Using this equation, we estimated a construction emission rate of 0.00140 grams per second ("g/s"). Subtracting the 640-day construction period from the total residential duration of 30 years, we assumed that after Project construction, the sensitive receptor would be exposed to the Project's operational DPM for an additional 28.25 years. SWAPE's operational CalEEMod emissions indicate that operational activities will generate approximately 310 pounds of DPM per year throughout operation. Applying the same equation used to estimate the construction DPM rate, we estimated the following emission rate for Project operation:

$$Emission\ Rate\ \left(\frac{grams}{second}\right) = \frac{309.8\ lbs}{365\ days} \times \frac{453.6\ grams}{lbs} \times \frac{1\ day}{24\ hours} \times \frac{1\ hour}{3{,}600\ seconds} = \mathbf{0.00446\ g/s}$$

[6] U.S. EPA (April 2011) AERSCREEN Released as the EPA Recommended Screening Model, http://www.epa.gov/ttn/scram/guidance/clarification/20110411_AERSCREEN_Release_Memo.pdf
[7] OEHHA (February 2015) Risk Assessment Guidelines Guidance Manual for Preparation of Health Risk Assessments, https://oehha.ca.gov/media/downloads/crnr/2015guidancemanual.pdf.
[8] CAPCOA (July 2009) Health Risk Assessments for Proposed Land Use Projects, http://www.capcoa.org/wp-content/uploads/2012/03/CAPCOA_HRA_LU_Guidelines_8-6-09.pdf.
[9] See Attachment B for calculations.

Using this equation, we estimated an operational emission rate of 0.00446 g/s. Construction and operation were simulated as a 1.69-acre rectangular area source in AERSCREEN, with approximate dimensions of 117- by 58-meters. A release height of three meters was selected to represent the height of stacks of operational equipment and other heavy-duty vehicles, and an initial vertical dimension of one and a half meters was used to simulate instantaneous plume dispersion upon release. An urban meteorological setting was selected with model-default inputs for wind speed and direction distribution. The population of Montebello was obtained from U.S. 2020 Census data.[10]

The AERSCREEN model generates maximum reasonable estimates of single-hour DPM concentrations from the Project Site. EPA guidance suggests that in screening procedures, the annualized average concentration of an air pollutant to be estimated by multiplying the single-hour concentration by 10%.[11] According to the IS/MND, the nearest sensitive receptors are located 25 meters from the Project site (p. 57). However, review of the AERSCREEN output files demonstrates that the maximally exposed individual resident ("MEIR") is located approximately 50 meters from the Project site. Thus, the single-hour concentration estimated by AERSCREEN for Project construction is approximately 5.193 $\mu g/m^3$ DPM at approximately 50 meters downwind. Multiplying this single-hour concentration by 10%, we get an annualized average concentration of 0.5193 $\mu g/m^3$ for Project construction at the MEIR. For Project operation, the single-hour concentration estimated by AERSCREEN is 16.58 $\mu g/m^3$ DPM at approximately 50 meters downwind. Multiplying this single-hour concentration by 10%, we get an annualized average concentration of 1.658 $\mu g/m^3$ for Project operation at the MEIR.

We calculated the excess cancer risk to the MEIR using applicable HRA methodologies prescribed by OEHHA, as recommended by SCAQMD.[12] Consistent with the 640-day construction schedule, the annualized average concentration for construction was used for the entire third trimester of pregnancy (0.25 years) and the first 1.5 years of the infantile stage of life (0 – 2 years). The annualized average concentration for operation was used for the remainder of the 30-year exposure period, which makes up the latter 0.5 years of the infantile stage of life, the entire child stage of life (2 – 16 years), and the entire adult stage of life (16 – 30 years).

Consistent with OEHHA guidance, as recommended by SCAQMD, we used Age Sensitivity Factors ("ASF(s)") to account for the heightened susceptibility of young children to the carcinogenic toxicity of air pollution.[13] According to this guidance, the quantified cancer risk should be multiplied by a factor of ten during the third trimester of pregnancy and during the first two years of life (infant) as well as multiplied by a factor of three during the child stage of life (2 – 16 years). Furthermore, in accordance

with guidance set forth by OEHHA, we used the 95th percentile breathing rates for children from the 3rd trimester through age 2.[14] Finally, consistent with SCAQMD and OEHHA guidance, we used a Fraction of Time At Home ("FAH") Value of 1 for the 3rd trimester, infant, and child receptors, and a value of 0.73 for the adult receptors.[15] We used a cancer potency factor of 1.1 (mg/kg-day)$^{-1}$ and an averaging time of 25,550 days. The results of our calculations are shown in the tables below.

The Maximally Exposed Individual at an Existing Residential Receptor

Age Group	Emissions Source	Duration (years)	Concentration (ug/m3)	Breathing Rate (L/kg-day)	Cancer Risk (without ASFs*)	ASF	Cancer Risk (with ASFs*)
3rd Trimester	Construction	0.25	0.5193	361	7.06E-07	10	**7.06E-06**
Infant (Age 0 - 2)	*Construction*	*1.50*	*0.5193*	*1090*	*1.28E-05*		
	Operation	*0.50*	*1.658*	*1090*	*1.35E-05*		
	Total	2			2.63E-05	10	**2.63E-04**
Child (Age 2 - 16)	Operation	14	1.658	572	2.00E-04	3	**6.00E-04**
Adult (Age 16 - 30)	Operation	14	1.658	261	6.66E-05	1	**6.66E-05**
Lifetime		**30**			**2.94E-04**		**9.37E-04**

* We, along with CARB and SCAQMD, recommend using the more updated and health protective 2015 OEHHA guidance, which includes ASFs.

As demonstrated in the table above, the excess cancer risks for the 3rd trimester of pregnancy, infants, children, and adults at the MEIR located approximately 50 meters away, over the course of Project construction and operation, utilizing ASFs, are approximately 7.06, 263, 600, and 66.6 in one million, respectively. The excess cancer risk over the course of a residential lifetime (30 years), utilizing ASFs, is approximately 973 in one million. The infant, child, adult, and lifetime cancer risks exceed the SCAQMD threshold of 10 in one million, thus resulting in a potentially significant impact not previously addressed or identified. Thus, the Project is not eligible for a SPCE per PRC Section 21155.1.

[14] "AB 2588 and Rule 1402 Supplemental Guidelines (Supplemental Guidelines for Preparing Risk Assessments for the Air Toxics 'Hot Spots' Information and Assessment Act)." SCAQMD, October 2020, *available at:* http://www.aqmd.gov/docs/default-source/planning/risk-assessment/ab2588-risk-assessment-guidelines.pdf?sfvrsn=6, p. 19; see also:" Risk Assessment Guidelines Guidance Manual for Preparation of Health Risk Assessments." OEHHA, February 2015, *available at:* https://oehha.ca.gov/media/downloads/crnr/2015guidancemanual.pdf.

[15] "Risk Assessment Procedures for Rules 1401, 1401.1, and 212." SCAQMD, September 2017, available at: http://www.aqmd.gov/docs/default-source/permitting/rule-1401-risk-assessment/riskassessproc-v8-1.pdf?sfvrsn=12, p. 7.

Utilizing ASFs is the most conservative, health-protective analysis according to the most recent guidance by OEHHA and reflects recommendations from the air district. Results without ASFs are presented in the table above, although we do not recommend utilizing these values for health risk analysis. Regardless, the excess cancer risks for the 3rd trimester of pregnancy, infants, children, and adults at the MEIR located approximately 50 meters away, over the course of Project construction and operation, without ASFs, are approximately 0.706, 26.3, 200, and 66.6 in one million, respectively. The excess cancer risk over the course of a residential lifetime, without ASFs, is approximately 294 in one million. The infant, child, adult, and lifetime cancer risks exceed the SCAQMD threshold of 10 in one million, thus resulting in a potentially significant impact not previously addressed or identified. While we recommend the use of ASFs, the Project's cancer risk without ASFs, as estimated by SWAPE, exceeds the SCAQMD threshold regardless. Thus, as previously stated, the Project is not eligible for a SPCE per PRC Section 21155.1.

An agency must include an analysis of health risks that connects the Project's air emissions with the health risk posed by those emissions. Our analysis represents a screening-level HRA, which is known to be conservative and tends to err on the side of health protection. The purpose of the screening-level construction and operational HRA shown above is to demonstrate the link between the proposed Project's emissions and the potential health risk. Our screening-level HRA demonstrates that construction and operation of the Project could result in a potentially significant health risk impact, when correct exposure assumptions and up-to-date, applicable guidance are used. Thus, a full CEQA analysis should be prepared, including a quantified air pollution model as well as an updated, quantified refined health risk assessment which adequately and accurately evaluates and mitigates health risk impacts associated with both Project construction and operation.

Disclaimer

SWAPE has received limited discovery regarding this project. Additional information may become available in the future; thus, we retain the right to revise or amend this report when additional information becomes available. Our professional services have been performed using that degree of care and skill ordinarily exercised, under similar circumstances, by reputable environmental consultants practicing in this or similar localities at the time of service. No other warranty, expressed or implied, is made as to the scope of work, work methodologies and protocols, site conditions, analytical testing results, and findings presented. This report reflects efforts which were limited to information that was reasonably accessible at the time of the work, and may contain informational gaps, inconsistencies, or otherwise be incomplete due to the unavailability or uncertainty of information obtained or provided by third parties.

Sincerely,

Matt Hagemann, P.G., C.Hg.

AERSCREEN 21112

Poplar Avenue Project A Operation

Poplar Avenue Project A Operation

---------- DATA ENTRY VALIDATION ----------

	METRIC	ENGLISH
** AREADATA **	---	---
Emission Rate:	0.446E-02 g/s	0.354E-01 lb/hr
Area Height:	3.00 meters	9.84 feet
Area Source Length:	116.95 meters	383.69 feet
Area Source Width:	58.48 meters	191.86 feet
Vertical Dimension:	1.50 meters	4.92 feet
Model Mode:	URBAN	
Population:	62640	
Dist to Ambient Air:	1.0 meters	3. feet

** BUILDING DATA **

No Building Downwash Parameters

** TERRAIN DATA **

No Terrain Elevations

Source Base Elevation: 0.0 meters 0.0 feet

Probe distance: 5000. meters 16404. feet

No flagpole receptors

No discrete receptors used

** FUMIGATION DATA **

No fumigation requested

** METEOROLOGY DATA **

Min/Max Temperature: 250.0 / 310.0 K -9.7 / 98.3 Deg F

Minimum Wind Speed: 0.5 m/s

Anemometer Height: 10.000 meters

Dominant Surface Profile: Urban

Dominant Climate Type: Average Moisture

Surface friction velocity (u*): not adjusted

DEBUG OPTION ON

AERSCREEN output file:

2022.02.28_PoplarAve_Operation.out

*** AERSCREEN Run is Ready to Begin

No terrain used, AERMAP will not be run

SWAPE Technical Consultation, Data Analysis and Litigation Support for the Environment

2656 29th Street, Suite 201
Santa Monica, CA 90405

Matt Hagemann, P.G, C.Hg.
(949) 887-9013
mhagemann@swape.com

Matthew F. Hagemann, P.G., C.Hg., QSD, QSP

Geologic and Hydrogeologic Characterization
Investigation and Remediation Strategies
Litigation Support and Testifying Expert
Industrial Stormwater Compliance
CEQA Review

Education:

M.S. Degree, Geology, California State University Los Angeles, Los Angeles, CA, 1984.
B.A. Degree, Geology, Humboldt State University, Arcata, CA, 1982.

Professional Certifications:

California Professional Geologist
California Certified Hydrogeologist
Qualified SWPPP Developer and Practitioner

Professional Experience:

Matt has 30 years of experience in environmental policy, contaminant assessment and remediation, stormwater compliance, and CEQA review. He spent nine years with the U.S. EPA in the RCRA and Superfund programs and served as EPA's Senior Science Policy Advisor in the Western Regional Office where he identified emerging threats to groundwater from perchlorate and MTBE. While with EPA, Matt also served as a Senior Hydrogeologist in the oversight of the assessment of seven major military facilities undergoing base closure. He led numerous enforcement actions under provisions of the Resource Conservation and Recovery Act (RCRA) and directed efforts to improve hydrogeologic characterization and water quality monitoring. For the past 15 years, as a founding partner with SWAPE, Matt has developed extensive client relationships and has managed complex projects that include consultation as an expert witness and a regulatory specialist, and a manager of projects ranging from industrial stormwater compliance to CEQA review of impacts from hazardous waste, air quality and greenhouse gas emissions.

Positions Matt has held include:

- Founding Partner, Soil/Water/Air Protection Enterprise (SWAPE) (2003 – present);
- Geology Instructor, Golden West College, 2010 – 2104, 2017;
- Senior Environmental Analyst, Komex H2O Science, Inc. (2000 -- 2003);

- Executive Director, Orange Coast Watch (2001 – 2004);
- Senior Science Policy Advisor and Hydrogeologist, U.S. Environmental Protection Agency (1989–1998);
- Hydrogeologist, National Park Service, Water Resources Division (1998 – 2000);
- Adjunct Faculty Member, San Francisco State University, Department of Geosciences (1993 – 1998);
- Instructor, College of Marin, Department of Science (1990 – 1995);
- Geologist, U.S. Forest Service (1986 – 1998); and
- Geologist, Dames & Moore (1984 – 1986).

Senior Regulatory and Litigation Support Analyst:

With SWAPE, Matt's responsibilities have included:

- Lead analyst and testifying expert in the review of over 300 environmental impact reports and negative declarations since 2003 under CEQA that identify significant issues with regard to hazardous waste, water resources, water quality, air quality, greenhouse gas emissions, and geologic hazards. Make recommendations for additional mitigation measures to lead agencies at the local and county level to include additional characterization of health risks and implementation of protective measures to reduce worker exposure to hazards from toxins and Valley Fever.
- Stormwater analysis, sampling and best management practice evaluation at more than 100 industrial facilities.
- Expert witness on numerous cases including, for example, perfluorooctanoic acid (PFOA) contamination of groundwater, MTBE litigation, air toxins at hazards at a school, CERCLA compliance in assessment and remediation, and industrial stormwater contamination.
- Technical assistance and litigation support for vapor intrusion concerns.
- Lead analyst and testifying expert in the review of environmental issues in license applications for large solar power plants before the California Energy Commission.
- Manager of a project to evaluate numerous formerly used military sites in the western U.S.
- Manager of a comprehensive evaluation of potential sources of perchlorate contamination in Southern California drinking water wells.
- Manager and designated expert for litigation support under provisions of Proposition 65 in the review of releases of gasoline to sources drinking water at major refineries and hundreds of gas stations throughout California.

With Komex H2O Science Inc., Matt's duties included the following:

- Senior author of a report on the extent of perchlorate contamination that was used in testimony by the former U.S. EPA Administrator and General Counsel.
- Senior researcher in the development of a comprehensive, electronically interactive chronology of MTBE use, research, and regulation.
- Senior researcher in the development of a comprehensive, electronically interactive chronology of perchlorate use, research, and regulation.
- Senior researcher in a study that estimates nationwide costs for MTBE remediation and drinking water treatment, results of which were published in newspapers nationwide and in testimony against provisions of an energy bill that would limit liability for oil companies.
- Research to support litigation to restore drinking water supplies that have been contaminated by MTBE in California and New York.

- Expert witness testimony in a case of oil production-related contamination in Mississippi.
- Lead author for a multi-volume remedial investigation report for an operating school in Los Angeles that met strict regulatory requirements and rigorous deadlines.
- Development of strategic approaches for cleanup of contaminated sites in consultation with clients and regulators.

Executive Director:

As Executive Director with Orange Coast Watch, Matt led efforts to restore water quality at Orange County beaches from multiple sources of contamination including urban runoff and the discharge of wastewater. In reporting to a Board of Directors that included representatives from leading Orange County universities and businesses, Matt prepared issue papers in the areas of treatment and disinfection of wastewater and control of the discharge of grease to sewer systems. Matt actively participated in the development of countywide water quality permits for the control of urban runoff and permits for the discharge of wastewater. Matt worked with other nonprofits to protect and restore water quality, including Surfrider, Natural Resources Defense Council and Orange County CoastKeeper as well as with business institutions including the Orange County Business Council.

Hydrogeology:

As a Senior Hydrogeologist with the U.S. Environmental Protection Agency, Matt led investigations to characterize and cleanup closing military bases, including Mare Island Naval Shipyard, Hunters Point Naval Shipyard, Treasure Island Naval Station, Alameda Naval Station, Moffett Field, Mather Army Airfield, and Sacramento Army Depot. Specific activities were as follows:

- Led efforts to model groundwater flow and contaminant transport, ensured adequacy of monitoring networks, and assessed cleanup alternatives for contaminated sediment, soil, and groundwater.
- Initiated a regional program for evaluation of groundwater sampling practices and laboratory analysis at military bases.
- Identified emerging issues, wrote technical guidance, and assisted in policy and regulation development through work on four national U.S. EPA workgroups, including the Superfund Groundwater Technical Forum and the Federal Facilities Forum.

At the request of the State of Hawaii, Matt developed a methodology to determine the vulnerability of groundwater to contamination on the islands of Maui and Oahu. He used analytical models and a GIS to show zones of vulnerability, and the results were adopted and published by the State of Hawaii and County of Maui.

As a hydrogeologist with the EPA Groundwater Protection Section, Matt worked with provisions of the Safe Drinking Water Act and NEPA to prevent drinking water contamination. Specific activities included the following:

- Received an EPA Bronze Medal for his contribution to the development of national guidance for the protection of drinking water.
- Managed the Sole Source Aquifer Program and protected the drinking water of two communities through designation under the Safe Drinking Water Act. He prepared geologic reports, conducted

public hearings, and responded to public comments from residents who were very concerned about the impact of designation.

- Reviewed a number of Environmental Impact Statements for planned major developments, including large hazardous and solid waste disposal facilities, mine reclamation, and water transfer.

Matt served as a hydrogeologist with the RCRA Hazardous Waste program. Duties were as follows:

- Supervised the hydrogeologic investigation of hazardous waste sites to determine compliance with Subtitle C requirements.
- Reviewed and wrote "part B" permits for the disposal of hazardous waste.
- Conducted RCRA Corrective Action investigations of waste sites and led inspections that formed the basis for significant enforcement actions that were developed in close coordination with U.S. EPA legal counsel.
- Wrote contract specifications and supervised contractor's investigations of waste sites.

With the National Park Service, Matt directed service-wide investigations of contaminant sources to prevent degradation of water quality, including the following tasks:

- Applied pertinent laws and regulations including CERCLA, RCRA, NEPA, NRDA, and the Clean Water Act to control military, mining, and landfill contaminants.
- Conducted watershed-scale investigations of contaminants at parks, including Yellowstone and Olympic National Park.
- Identified high-levels of perchlorate in soil adjacent to a national park in New Mexico and advised park superintendent on appropriate response actions under CERCLA.
- Served as a Park Service representative on the Interagency Perchlorate Steering Committee, a national workgroup.
- Developed a program to conduct environmental compliance audits of all National Parks while serving on a national workgroup.
- Co-authored two papers on the potential for water contamination from the operation of personal watercraft and snowmobiles, these papers serving as the basis for the development of nation-wide policy on the use of these vehicles in National Parks.
- Contributed to the Federal Multi-Agency Source Water Agreement under the Clean Water Action Plan.

Policy:

Served senior management as the Senior Science Policy Advisor with the U.S. Environmental Protection Agency, Region 9.

Activities included the following:

- Advised the Regional Administrator and senior management on emerging issues such as the potential for the gasoline additive MTBE and ammonium perchlorate to contaminate drinking water supplies.
- Shaped EPA's national response to these threats by serving on workgroups and by contributing to guidance, including the Office of Research and Development publication, Oxygenates in Water: Critical Information and Research Needs.
- Improved the technical training of EPA's scientific and engineering staff.
- Earned an EPA Bronze Medal for representing the region's 300 scientists and engineers in negotiations with the Administrator and senior management to better integrate scientific

principles into the policy-making process.
- Established national protocol for the peer review of scientific documents.

Geology:

With the U.S. Forest Service, Matt led investigations to determine hillslope stability of areas proposed for timber harvest in the central Oregon Coast Range. Specific activities were as follows:

- Mapped geology in the field, and used aerial photographic interpretation and mathematical models to determine slope stability.
- Coordinated his research with community members who were concerned with natural resource protection.
- Characterized the geology of an aquifer that serves as the sole source of drinking water for the city of Medford, Oregon.

As a consultant with Dames and Moore, Matt led geologic investigations of two contaminated sites (later listed on the Superfund NPL) in the Portland, Oregon, area and a large hazardous waste site in eastern Oregon. Duties included the following:

- Supervised year-long effort for soil and groundwater sampling.
- Conducted aquifer tests.
- Investigated active faults beneath sites proposed for hazardous waste disposal.

Teaching:

From 1990 to 1998, Matt taught at least one course per semester at the community college and university levels:

- At San Francisco State University, held an adjunct faculty position and taught courses in environmental geology, oceanography (lab and lecture), hydrogeology, and groundwater contamination.
- Served as a committee member for graduate and undergraduate students.
- Taught courses in environmental geology and oceanography at the College of Marin.

Matt is currently a part time geology instructor at Golden West College in Huntington Beach, California where he taught from 2010 to 2014 and in 2017.

Invited Testimony, Reports, Papers and Presentations:

Hagemann, M.F., 2008. Disclosure of Hazardous Waste Issues under CEQA. Presentation to the Public Environmental Law Conference, Eugene, Oregon.

Hagemann, M.F., 2008. Disclosure of Hazardous Waste Issues under CEQA. Invited presentation to U.S. EPA Region 9, San Francisco, California.

Hagemann, M.F., 2005. Use of Electronic Databases in Environmental Regulation, Policy Making and Public Participation. Brownfields 2005, Denver, Coloradao.

Hagemann, M.F., 2004. Perchlorate Contamination of the Colorado River and Impacts to Drinking Water in Nevada and the Southwestern U.S. Presentation to a meeting of the American Groundwater Trust, Las Vegas, NV (served on conference organizing committee).

Hagemann, M.F., 2004. Invited testimony to a California Senate committee hearing on air toxins at schools in Southern California, Los Angeles.

Brown, A., Farrow, J., Gray, A. and **Hagemann, M.**, 2004. An Estimate of Costs to Address MTBE Releases from Underground Storage Tanks and the Resulting Impact to Drinking Water Wells. Presentation to the Ground Water and Environmental Law Conference, National Groundwater Association.

Hagemann, M.F., 2004. Perchlorate Contamination of the Colorado River and Impacts to Drinking Water in Arizona and the Southwestern U.S. Presentation to a meeting of the American Groundwater Trust, Phoenix, AZ (served on conference organizing committee).

Hagemann, M.F., 2003. Perchlorate Contamination of the Colorado River and Impacts to Drinking Water in the Southwestern U.S. Invited presentation to a special committee meeting of the National Academy of Sciences, Irvine, CA.

Paul Rosenfeld, Ph.D.

Chemical Fate and Transport & Air Dispersion Modeling

Principal Environmental Chemist

Risk Assessment & Remediation Specialist

Education

Ph.D. Soil Chemistry, University of Washington, 1999. Dissertation on volatile organic compound filtration.

M.S. Environmental Science, U.C. Berkeley, 1995. Thesis on organic waste economics.

B.A. Environmental Studies, U.C. Santa Barbara, 1991. Thesis on wastewater treatment.

Professional Experience

Dr. Rosenfeld has over 25 years' experience conducting environmental investigations and risk assessments for evaluating impacts to human health, property, and ecological receptors. His expertise focuses on the fate and transport of environmental contaminants, human health risk, exposure assessment, and ecological restoration. Dr. Rosenfeld has evaluated and modeled emissions from oil spills, landfills, boilers and incinerators, process stacks, storage tanks, confined animal feeding operations, industrial, military and agricultural sources, unconventional oil drilling operations, and locomotive and construction engines. His project experience ranges from monitoring and modeling of pollution sources to evaluating impacts of pollution on workers at industrial facilities and residents in surrounding communities. Dr. Rosenfeld has also successfully modeled exposure to contaminants distributed by water systems and via vapor intrusion.

Dr. Rosenfeld has investigated and designed remediation programs and risk assessments for contaminated sites containing lead, heavy metals, mold, bacteria, particulate matter, petroleum hydrocarbons, chlorinated solvents, pesticides, radioactive waste, dioxins and furans, semi- and volatile organic compounds, PCBs, PAHs, creosote, perchlorate, asbestos, per- and poly-fluoroalkyl substances (PFOA/PFOS), unusual polymers, fuel oxygenates (MTBE), among other pollutants. Dr. Rosenfeld also has experience evaluating greenhouse gas emissions from various projects and is an expert on the assessment of odors from industrial and agricultural sites, as well as the evaluation of odor nuisance impacts and technologies for abatement of odorous emissions. As a principal scientist at SWAPE, Dr. Rosenfeld directs air dispersion modeling and exposure assessments. He has served as an expert witness and testified about pollution sources causing nuisance and/or personal injury at sites and has testified as an expert witness on numerous cases involving exposure to soil, water and air contaminants from industrial, railroad, agricultural, and military sources.

Professional History:

Soil Water Air Protection Enterprise (SWAPE); 2003 to present; Principal and Founding Partner
UCLA School of Public Health; 2007 to 2011; Lecturer (Assistant Researcher)
UCLA School of Public Health; 2003 to 2006; Adjunct Professor
UCLA Environmental Science and Engineering Program; 2002-2004; Doctoral Intern Coordinator
UCLA Institute of the Environment, 2001-2002; Research Associate
Komex H_2O Science, 2001 to 2003; Senior Remediation Scientist
National Groundwater Association, 2002-2004; Lecturer
San Diego State University, 1999-2001; Adjunct Professor
Anteon Corp., San Diego, 2000-2001; Remediation Project Manager
Ogden (now Amec), San Diego, 2000-2000; Remediation Project Manager
Bechtel, San Diego, California, 1999 – 2000; Risk Assessor
King County, Seattle, 1996 – 1999; Scientist
James River Corp., Washington, 1995-96; Scientist
Big Creek Lumber, Davenport, California, 1995; Scientist
Plumas Corp., California and USFS, Tahoe 1993-1995; Scientist
Peace Corps and World Wildlife Fund, St. Kitts, West Indies, 1991-1993; Scientist

Water Environment Federation 12th Annual Residuals and Biosolids Management Conference Proceedings. Lecture conducted from Bellevue Washington.

Rosenfeld, P.E., C.L. Henry, R. B. Harrison, and R. Dills. (1997). Comparison of Odor Emissions From Three Different Biosolids Applied to Forest Soil. *Soil Science Society of America*. Lecture conducted from Anaheim California.

Teaching Experience:

UCLA Department of Environmental Health (Summer 2003 through 20010) Taught Environmental Health Science 100 to students, including undergrad, medical doctors, public health professionals and nurses. Course focused on the health effects of environmental contaminants.

National Ground Water Association, Successful Remediation Technologies. Custom Course in Sante Fe, New Mexico. May 21, 2002. Focused on fate and transport of fuel contaminants associated with underground storage tanks.

National Ground Water Association; Successful Remediation Technologies Course in Chicago Illinois. April 1, 2002. Focused on fate and transport of contaminants associated with Superfund and RCRA sites.

California Integrated Waste Management Board, April and May, 2001. Alternative Landfill Caps Seminar in San Diego, Ventura, and San Francisco. Focused on both prescriptive and innovative landfill cover design.

UCLA Department of Environmental Engineering, February 5, 2002. Seminar on Successful Remediation Technologies focusing on Groundwater Remediation.

University Of Washington, Soil Science Program, Teaching Assistant for several courses including: Soil Chemistry, Organic Soil Amendments, and Soil Stability.

U.C. Berkeley, Environmental Science Program Teaching Assistant for Environmental Science 10.

Academic Grants Awarded:

California Integrated Waste Management Board. $41,000 grant awarded to UCLA Institute of the Environment. Goal: To investigate effect of high carbon wood ash on volatile organic emissions from compost. 2001.

Synagro Technologies, Corona California: $10,000 grant awarded to San Diego State University.
Goal: investigate effect of biosolids for restoration and remediation of degraded coastal sage soils. 2000.

King County, Department of Research and Technology, Washington State. $100,000 grant awarded to University of Washington: Goal: To investigate odor emissions from biosolids application and the effect of polymers and ash on VOC emissions. 1998.

Northwest Biosolids Management Association, Washington State. $20,000 grant awarded to investigate effect of polymers and ash on VOC emissions from biosolids. 1997.

James River Corporation, Oregon: $10,000 grant was awarded to investigate the success of genetically engineered Poplar trees with resistance to round-up. 1996.

United State Forest Service, Tahoe National Forest: $15,000 grant was awarded to investigating fire ecology of the Tahoe National Forest. 1995.

Kellogg Foundation, Washington D.C. $500 grant was awarded to construct a large anaerobic digester on St. Kitts in West Indies. 1993

Deposition and/or Trial Testimony:

In the Circuit Court Of The Twentieth Judicial Circuit, St Clair County, Illinois
Martha Custer et al., Plaintiff vs. Cerro Flow Products, Inc., Defendants
Case No.: No. 0i9-L-2295
Rosenfeld Deposition, 5-14-2021
Trial, October 8-4-2021

In the Circuit Court of Cook County Illinois
Joseph Rafferty, Plaintiff vs. Consolidated Rail Corporation and National Railroad Passenger Corporation d/b/a AMTRAK,
Case No.: No. 18-L-6845
Rosenfeld Deposition, 6-28-2021

In the United States District Court For the Northern District of Illinois
Theresa Romcoe, Plaintiff vs. Northeast Illinois Regional Commuter Railroad Corporation d/b/a METRA Rail, Defendants
Case No.: No. 17-cv-8517
Rosenfeld Deposition, 5-25-2021

In the Superior Court of the State of Arizona In and For the Cunty of Maricopa
Mary Tryon et al., Plaintiff vs. The City of Pheonix v. Cox Cactus Farm, L.L.C., Utah Shelter Systems, Inc.
Case Number CV20127-094749
Rosenfeld Deposition: 5-7-2021

In the United States District Court for the Eastern District of Texas Beaumont Division
Robinson, Jeremy et al *Plaintiffs*, vs. CNA Insurance Company et al.
Case Number 1:17-cv-000508
Rosenfeld Deposition: 3-25-2021

In the Superior Court of the State of California, County of San Bernardino
Gary Garner, Personal Representative for the Estate of Melvin Garner vs. BNSF Railway Company.
Case No. 1720288
Rosenfeld Deposition 2-23-2021

In the Superior Court of the State of California, County of Los Angeles, Spring Street Courthouse
Benny M Rodriguez vs. Union Pacific Railroad, A Corporation, et al.
Case No. 18STCV01162
Rosenfeld Deposition 12-23-2020

In the Circuit Court of Jackson County, Missouri
Karen Cornwell, *Plaintiff,* vs. Marathon Petroleum, LP, *Defendant.*
Case No.: 1716-CV10006
Rosenfeld Deposition. 8-30-2019

In the United States District Court For The District of New Jersey
Duarte et al, *Plaintiffs,* vs. United States Metals Refining Company et. al. *Defendant.*
Case No.: 2:17-cv-01624-ES-SCM
Rosenfeld Deposition. 6-7-2019

In the United States District Court of Southern District of Texas Galveston Division

Re: Poplar Avenue Residential Project; a/k/a TWIN PALMS PROJECT (CASE NO. PC-2021-0008-PD-PMP-SPR); PROJECT SITE A (116, 128, AND 136 N. POPLAR AVE) AND PROJECT SITE B (129-133 N. POPLAR AVE)

Dear Chairperson Briseno and Honorable Members of the Planning Commission:

I am writing on behalf of the Supporters Alliance for Environmental Responsibility ("SAFER"), a California nonprofit benefit corporation, regarding the proposed development of apartment units on Poplar Avenue, located in the City of Montebello and known as the Poplar Avenue Residential Project. TWIN PALMS PROJECT (CASE NO. PC-2021-0008-PD-PMP-SPR); PROJECT SITE A (116, 128, AND 136 N. POPLAR AVE) AND PROJECT SITE B (129-133 N. POPLAR AVE) ("Project"). The agenda for the Planning Commission hearing on March 15, 2022, states that "no further action by the Commission is necessary" for the Project. We believe that this is an erroneous statement and request that the Planning Commission correct this statement and continue its consideration of the Project, as the Commission indicated they would at the conclusion of the March 1, 2022 Planning Commission hearing.

I. Background

On March 1, 2022, the Planning Commission considered this Project. The City of Montebello Planning and Community Development department determined that the project is categorically exempt from the requirement for preparation of environmental documents pursuant to Section 21155.1 of the California Environmental Quality Act ("CEQA"). SAFER submitted comments to the Planning Commission on the matter, disagreeing with the use of the exemption. (SAFER letter, March 1, 2022). The comment included expert reports from Certified Industrial Hygienist Francis "Bud" Offermann and environmental consulting firm Soil/Water/Air Protection Enterprise, which demonstrated substantial evidence of the Project's potential impacts from indoor air quality and diesel particulate matter. Based on that evidence, SAFER determined that

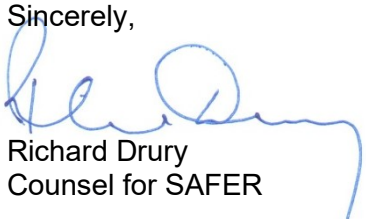
the Section 21155.1 exemption did not apply, and requested that the City prepare appropriate CEQA documents for the Project.

At the hearing on March 1, the Commission discussed the Project, and eventually a Commissioner made a motion to approve the Project. The motion concluded in two ayes, one no, and one abstention. This was determined to be a deadlock, so a second motion was presented to continue the item to the next Planning Commission meeting on March 15, 2022. That motion passed 4-0.

The agenda item for the Project in the March 15 Planning Commission hearing agenda states as follows:

> Staff will provide clarity on the action taken by the Planning Commission to approve the resolution recommending approval of the project by a vote of 2-1-1 and explain that no further action by the Commission is necessary.

(City of Montebello Planning Commission Agenda, March 15, 2022, p.4). This statement is contrary to what was stated at the March 1, 2022 hearing, and is erroneous as demonstrated below.



II. Discussion

In the case of *Vedanta Society of Southern California v. California Quartet, Ltd.* (2000) 84 Cal. App. 4th 517, a city council deadlocked 2-2-1 on a vote to certify a CEQA document. The Court of Appeal held that this vote was no sufficient to approve the project because CEQA requires an "affirmative" vote to issue findings and to certify the CEQA document. The court held that a 2-2-2 vote is not an affirmative vote of a majority of the city council and therefore the project could not be approved. Also, Gov't Code Section 25005 provides that No act of the Board shall be valid or binding unless a majority of all the members concur therein

By the same reasoning, the planning commission's vote of 2-1-1 is not an affirmative vote of a majority of the planning commission. A majority of the planning commission did not vote to approve or disapprove of the CEQA document or the project. Therefore, the project may not proceed unless it receives an affirmative vote of a majority of the members of the planning commission.

Thank you for considering our comments.

Sincerely,

Richard Drury
Counsel for SAFER

ITEM # 7

CITY OF MONTEBELLO

CITY COUNCIL AGENDA STAFF REPORT

TO: Honorable Mayor and City Council Members

FROM: René Bobadilla, P.E., City Manager

BY: Arnold Alvarez-Glasman, City Attorney

SUBJECT: **Adopt Resolution No. 22-21 Rescinding Resolution Nos. 20-21, 20-22, 20-23, 20-33, and 20-61 Which Declared a Local Emergency as a Result of the Coronavirus (COVID-19) and Rescinding Resolution No. 21-85 Which Authorized Teleconferenced Open Meetings Pursuant to AB 361**

DATE: April 13, 2022

RECOMMENDATIONS:

It is recommended that the City Council:

1) Adopt Resolution No. 22-21 rescinding Resolution Nos. 20-21, 20-22, 20-23, 20-33, and 20-61, which declared a local emergency as a result of the Coronavirus (COVID-19) and rescinding Resolution No. 21-85 which authorized teleconferenced open meetings pursuant to AB 361; and

2) Take such additional, related, action that may be desirable.

FISCAL IMPACT

There is no fiscal impact to the City.

BACKGROUND

On March 11, 2020 the World Health Organization declared a COVID-19 Pandemic. On March 4, 2020, California Governor Newsom declared a State of Emergency as a result of COVID-19. Following the State of Emergency the City Council adopted Resolution No. 20-22 on March 16, 2020, declaring a local emergency as a result of the COVID-19 pandemic. This Declaration provided for increased efficiency and ability to pivot as needed in order to respond to the pandemic. The Declaration promoted various forms of social distancing to protect the most vulnerable from COVID-19, as well as to contain the spread.

On September 20, 2021, Governor Gavin Newson signed Executive Order N-15-21 clarifying that cities may continue to meet remotely in accordance with the procedures outlined by previous executive orders issued. Recently adopted legislation, Assembly Bill (AB) 361, allowed cities to continue to meet remotely and to have the public participate remotely during gubernatorial states of emergency under modified Brown Act provisions. On October 13, 2021, City Council adopted Resolution No. 21-85 which authorized the City to continue teleconferencing of open meetings pursuant to AB 361.

The COVID-19 pandemic is not over; however, the number of weekly cases have dropped significantly since the beginning of the current year and continue to maintain a downward trend. At this time, Staff no longer finds that conditions of extreme peril exists to the safety of persons and property within the City of Montebello and is recommending the adoption of Resolution No. 22-21 to rescind the Declaration of the Local Emergency (Resolution No. 0-21, 20-22, 20-23, 20-33, and 20-61) and rescind the continuation of teleconferencing open meetings pursuant to AB 361 (Resolution No. 21-85).

Staff is proposing that City Hall facilities open at 100%, subject to operating under proper safety conditions or as recommended by Occupational Safety and Health Administration and Los Angeles County Department of Public Health. Upon approval of Resolution No. 22-21, City Council meetings will be held in person effective April 27, 2022 and the public may access the meeting and offer public comments in person only moving forward. Written comments can still be submitted via electronic mail and will be submitted to all members of the City Council. Written comments may not be read aloud but will be entered into the record of the proceedings to the extent they relate to matters listed on the posted agenda or otherwise address matters/issues within the subject matter jurisdiction of the City Council.

SUMMARY

Staff recommends that the City Council consider adopting Resolution No. 22-21 rescinding the declaration of local emergency and AB 361 findings.

ATTACHMENT A

RESOLUTION NO. 22-21

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MONTEBELLO, CALIFORNIA, RESCINDING RESOLUTION NOS. 20-21, 20-22, 20-23, 20-33, AND 20-61, WHICH DECLARED AND PROCLAIMED THE EXISTENCE OF A LOCAL EMERGENCY DUE TO THE EFFECTS OF THE COVID-19 VIRUS, AS WELL AS RESOLUTION NO. 21-85, WHICH AUTHORIZED TELECONFERENCED OPEN MEETINGS PURSUANT TO AB 361

RECITALS

WHEREAS, the City of Montebello like many other local, county, state and federal jurisdictions are impacted by the affects created by the COVID-19 virus and the virus is significantly impacting both the essential and non-essential services and operations of government; and

WHEREAS, on March 12, 2020; March 16, 2020; March 19, 2022; April 15, 2020; and July 31, 2020 the City Council of the City of Montebello ("City") adopted Resolution Nos. 20-21, 20-22, 20-23, 20-33, and 20-61, which declared and proclaimed the existence of a local emergency due to the effects of the COVID-19 virus; and

WHEREAS, the City remains vigilant with federal, state, and county official updates related to COVID-19 because information, orders, and directives continue to change; and

WHEREAS, the City is committed to preserving and nurturing public access and participation in meetings of the City Council; and

WHEREAS, California Assembly Bill 361 ("AB 361") was signed into law on September 16, 2021 which amended the Ralph M. Brown Act; and

WHEREAS, the City Council is a legislative body and the Ralph M. Brown Act (Gov't Code §54950 *et seq*.) requires meetings of "legislative bodies" of local agencies to be open and public; and

WHEREAS, AB 361 provided an alternative of teleconferenced public meetings rather than having in-person public meetings in accordance with Government Code §54953(b)(3) if the City Council made specific findings that the following circumstances exist:

1. The state of emergency as a result of COVID-19 continues to directly impact the ability of the members of City Council and the members of the City's subordinate Committees, Commissions, and Boards to meet safely in person; and

2. The State of California and the City continue to impose or recommend measures to promote social distancing; and

WHEREAS, on October 13, 2021, the City Council of the City of Montebello adopted Resolution No. 21-85, which authorized the City to implement teleconferenced open meetings pursuant to AB 361; and

WHEREAS, in accordance with the current low-risk tier status for COVID-19 in Los Angeles County and California State and all current mandates and policies, the City will not continue to impose COVID-19 measures such as social distancing and wearing of masks; and

WHEREAS, the City Council no longer finds that the circumstances mentioned above exist within the City of Montebello and the City Council desires to return to in-person public meetings; and

WHEREAS, a resolution may be amended or rescinded by another resolution or by ordinance; and

WHEREAS, City Council has considered all information related to this matter.

NOW, THEREFORE, IT IS HEREBY PROCLAIMED that a local emergency no longer exists throughout the City of Montebello, and**:**

SECTION 1. The facts set forth in the Recitals, above, are true and correct.

SECTION 2. The City Council of the City of Montebello hereby rescinds Resolution Nos. 20-21, 20-22, 20-23, 20-33, and 20-61which declared and proclaimed the existence of a local emergency due to the effects of the COVID-19 virus and ordered certain actions, services, restrictions and mandates throughout the City.

SECTION 3. The City Council of the City of Montebello hereby rescinds Resolution No. 21-85 which authorized the City to implement teleconferenced open meetings pursuant to AB 361. It is declared that the City Council will immediately return to holding in-person public meetings as a result of the current low-tier COVID-19 risk status of Los Angeles County and the State of California, the City no longer finds that:

1. The state of emergency as a result of COVID-19 continues to directly impact the ability of the members of City Council and the members of the City's subordinate Committees, Commissions, and Boards to meet safely in person; and

2. The State of California and the City continue to impose or recommend measures to promote social distancing.

SECTION 4. Severability. If any section, subsection, paragraph, sentence, clause, phrase, or portion thereof, of this Resolution is declared by a court of competent jurisdiction to be unconstitutional or otherwise invalid, such decision shall not affect the validity of the remaining portions of this Resolution. The City Council declares that it would have adopted this Resolution, and each section, subsection, paragraph, sentence, clause, phrase, or portion thereof, irrespective of the fact that any one or more sections, subsections, paragraphs, sentences, clauses, phrases, or portions thereof, be declared invalid or unconstitutional. To this end, the provisions of this Resolution are declared to be severable.

SECTION 5. The City Clerk shall attest to the passage of this Resolution and it shall there upon be in full force and effect.

APPROVED AND ADOPTED this 13th day of April 2022.

I, Irma Barajas, City Clerk of the City of Montebello, do hereby certify that the foregoing City Council Resolution No. 20-21was duly and regularly approved and adopted by the City Council of the City of Montebello at their meeting held on the . day of 2020, as approved by law by the following vote:

AYES: Hadjinian, Cobos-Cawthorne, Jimenez, Torres, Melendez
NOES: None.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed the official seal of said City on the 12th day of March, 2020.

IRMA BARAJAS, City Clerk

RESOLUTION NO. 20-22

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MONTEBELLO, CALIFORNIA DECLARING AND PROCLAIMING THE EXISTENCE OF A LOCAL EMERGENCY DUE TO THE AFFECTS OF THE COVID-19 VIRUS AND THE EFFECTS AND IMPACTS UPON THE OPERATIONS OF GOVERNMENT OF THE CITY OF MONTEBELLO AND SUPERCEDES ALL PREVIOUS RESOLUTIONS PROCLAIMING A LOCAL EMERGENCY

WHEREAS, the City of Montebello like many other local, county, state and federal jurisdictions are impacted by the affects created by the COVID-19 virus and the virus is significantly impacting both the essential and non-essential services and operations of government; and

WHEREAS, the City Council of the City of Montebello is responding to the spread of coronavirus disease, and now hereby finds that international, national, state, and local health and governmental authorities are responding to an outbreak of said respiratory disease caused by a novel coronavirus, COVID-19; and

WHEREAS, Chapter 2.48, et seq. of the Montebello Municipal Code authorizes the City Council to proclaim the existence or threatened existence of a local emergency, and further authorizes the City Manager with enumerated powers when the Governor or County has declared a state of emergency, which has been the case as discussed hereinabove as it relates to COVID-19; and

WHEREAS, the City of Montebello remains vigilant with federal, state, and county official updates related to COVID-19 because information, orders, and directives continue to change on a daily basis; and

WHEREAS, the City Council of the City of Montebello hereby declares and proclaims the existence of a local emergency due to the COVID-19 virus, and;

WHEREAS, the City Council of the City of Montebello hereby finds that conditions of extreme peril exists to the safety of persons and property have arisen within the City caused by the COVID-19 virus, and;

WHEREAS, these conditions are or are likely to be beyond the control of the services, personnel, equipment, and facilities of said City;

WHEREAS, this Resolution supersedes and controls over any previously adopted Resolution.

NOW, THEREFORE, IT IS HEREBY PROCLAIMED that a local emergency now exists throughout the City of Montebello, and;

SECTION 1: IT IS FURTHER PROCLAIMED AND ORDERED that during the existence of said local emergency the powers, functions, and duties of the emergency organization of this City shall be those prescribed by state law, by local ordinances, and resolutions of this City; and the City seeks all services, financial assistance and other related aid provided for or made available by the County of Los Angeles, State of California or Federal Government.

SECTION 2: All individuals, organizations, and business entities are hereby required to comply and adhere to all federal, state, and local orders and directives within the City's jurisdiction and boundaries relating to COVID-19. Should subsequent federal, state, or county orders and directives be issued that promote various forms of social distancing to protect the most vulnerable from COVID-19, as well as to contain the spread of same, the more restrictive orders and directives shall apply.

SECTION 3: Notwithstanding any provision of the Montebello Municipal Code to the contrary, the City Manager, as the director of emergency services, in addition to the authority granted under emergency circumstances, has an increase in spending authority for emergency response needs; and is authorized, without complying with the competitive bidding procedures, to execute any agreement, subject to approval as to form by the City Attorney, if the agreement is related to emergency response needs pursuant to this Resolution. City Manager is required to subsequently make a report to City Council with information of related expenditures.

SECTION 4: It is hereby found and determined that the following actions, services, restrictions or mandates are hereby ordered:

- The Montebello Bus Line and those services provided are hereby determined to be essential services. All Montebello Bus Line personal, including but not limited to drivers, administrative personnel, service and maintenance personnel, and management personnel, are required to perform these essential functions provided by the City throughout the duration of this emergency without interruption.

- The City hereby waives the collection of fare box charges for Bus Line passengers.

- The City hereby authorizes and restricts the use of any hotel owned by the City for public service personnel as deemed appropriate by the City. This mandate controls over any other order and directive issued by Federal, State or County governments.

- All Information Technology (IT) services are deemed to be essential services. All IT personnel are required to perform these essential functions provided by the City throughout the duration of this emergency without interruption.

- The City hereby reserves the right to waive any fees or penalties charged or incurred as a result of cancellations or adjustments necessary due to the emergency conditions or situation.

- The City Manager, as the Director of Emergency Services, has all rights and authority vested in him pursuant to the Montebello Municipal Code.

SECTION 3: It is hereby proclaimed and ordered that during the existence of said local emergency, the powers, functions, and duties of the emergency organization of the City shall be as prescribed by federal, state, and county law, as well as the laws, ordinances and resolutions of the City of Montebello. This Resolution shall supersede and control over any previously adopted Resolution.

SECTION 4: SEVERABILITY. If any section, subsection, paragraph, sentence, clause, phrase, or portion thereof, of this Resolution is declared by a court of competent jurisdiction to be unconstitutional or otherwise invalid, such decision shall not affect the validity of the remaining portions of this Resolution. The City Council declares that it would have adopted this Resolution, and each section, subsection, paragraph, sentence, clause, phrase, or portion thereof, irrespective of the fact that any one or more sections, subsections, paragraphs, sentences, clauses, phrases, or portions thereof, be declared invalid or unconstitutional. To this end, the provisions of this Resolution are declared to be severable.

PASSED, APPROVED, AND ADOPTED BY THE CITY COUNCIL OF THE CITY OF MONTEBELLO, CALIFORNIA, THIS 16TH DAY OF MARCH, 2020.

COUNTY OF LOS ANGELES) ss.
CITY OF MONTEBELLO)

I, Irma Barajas, City Clerk of the City of Montebello, do hereby certify that the foregoing City Council Resolution No. 20-23 was duly and regularly approved and adopted by the City Council of the City of Montebello at their meeting held on the 19TH day of MARCH, 2020, as approved by law by the following vote:

AYES: Torres, Hadjinian, Cobos-Cawthorne, Jimenez, Melendez
NOES: None

IN WITNESS WHEREOF, I have hereunto set my hand and affixed the official seal of said City on the 19th day of March, 2020.

IRMA BARAJAS, City Clerk

RESOLUTION NO. 20-33

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MONTEBELLO, CALIFORNIA FURTHER DECLARING AND PROCLAIMING THE CONTINUED EXISTENCE OF A LOCAL EMERGENCY DUE TO THE AFFECTS OF THE COVID-19 VIRUS AND THE EFFECTS AND IMPACTS UPON THE OPERATIONS OF GOVERNMENT OF THE CITY OF MONTEBELLO

WHEREAS, the City Council of the City of Montebello has been responding to the spread of coronavirus disease, and has found that international, national, state, and local health and governmental authorities are responding to an outbreak of said respiratory disease caused by a novel coronavirus, also known and abbreviated as COVID-19, ("COVID-19"); and

WHEREAS, the City Council of the City of Montebello is and has been responding to the spread of coronavirus disease, and now continues to find that international, national, state, and local health and governmental authorities are responding to an outbreak of said respiratory disease caused by a novel coronavirus, COVID-19; and

WHEREAS, Chapter 2.48, et seq. of the Montebello Municipal Code authorizes the City Council to proclaim the existence or threatened existence of a local emergency, and further authorizes the City Manager with enumerated powers when the Governor or County has declared a state of emergency, which has been the case as discussed hereinabove as it relates to COVID-19; and

WHEREAS, the City of Montebello remains vigilant with federal, state, and county officials' updates related to COVID-19 because information, orders, and directives continue to change on a daily basis; and

WHEREAS, pursuant to Montebello Municipal Code Section 2.48.090, the City Council of the City of Montebello hereby continues to declare and proclaim the existence of a local emergency due to the COVID-19 virus, and;

WHEREAS, the City Council of the City of Montebello hereby finds that conditions of extreme peril exists to the safety of persons and property continues within the City caused by the COVID-19 virus, and;

WHEREAS, these conditions are or are likely to be beyond the control of the services, personnel, equipment, and facilities of said City;

NOW, THEREFORE, IT IS HEREBY PROCLAIMED that a local emergency continues to exist throughout the City of Montebello, and;

SECTION 1: IT IS FURTHER PROCLAIMED AND ORDERED that during the existence of said local emergency the powers, functions, and duties of the emergency organization of this City shall be those prescribed by state and County law, by local ordinances, and resolutions of this City; and the City continues to seek all services, financial assistance and other related aid provided for or made available by the County of Los Angeles, State of California or Federal Government.

SECTION 2: All individuals, organizations, and business entities are hereby required to comply and adhere to all federal, state, and local orders and directives within the City's jurisdiction and boundaries relating to COVID-19. Should subsequent federal, state, or county orders and directives be issued that promote various forms of social distancing to protect the most vulnerable from COVID-19, as well as to contain the spread of same, the more restrictive orders and directives shall apply. Specifically the City Council hereby confirms and supports the "Safer at Home Order for Control of COVID-19" issued by the County of Los Angeles Department of Public Health on April 10, 2020, attached hereto as Exhibit "A" and incorporated herein by this reference.

SECTION 3: This Resolution is adopted consistent with and as set forth in Montebello Municipal Code Section 2.48.090 which requires the City Council to review, at least every fourteen days until the local emergency is terminated, the need for continuing the local emergency until the termination of the local emergency at the earliest possible date that conditions warrant.

SECTION 4: It is hereby proclaimed and ordered that during the existence of said local emergency, the powers, functions, and duties of the emergency organization of the City shall be

as prescribed by federal, state, and county law, as well as the laws, ordinances and resolutions of the City of Montebello.

SECTION 5: SEVERABILITY. If any section, subsection, paragraph, sentence, clause, phrase, or portion thereof, of this Resolution is declared by a court of competent jurisdiction to be unconstitutional or otherwise invalid, such decision shall not affect the validity of the remaining portions of this Resolution. The City Council declares that it would have adopted this Resolution, and each section, subsection, paragraph, sentence, clause, phrase, or portion thereof, irrespective of the fact that any one or more sections, subsections, paragraphs, sentences, clauses, phrases, or portions thereof, be declared invalid or unconstitutional. To this end, the provisions of this Resolution are declared to be severable.

PASSED, APPROVED, AND ADOPTED BY THE CITY COUNCIL OF THE CITY OF MONTEBELLO, CALIFORNIA, THIS 15TH DAY OF APRIL, 2020.

Salvador Melendez, Mayor

SAFER AT HOME ORDER FOR CONTROL OF COVID-19
Temporary Prohibition of All Events and Gatherings
Closure of Non-Essential Businesses and Areas

Revised Order Issued: April 10, 2020

Please read this Order carefully. Violation of or failure to comply with this Order is a crime punishable by fine, imprisonment, or both. (California Health and Safety Code § 120295; California Penal Code §§ 69, 148(a)(1); Los Angeles County Code § 11.02.080.)

SUMMARY OF THE ORDER: This County of Los Angeles Health Officer Revised Order (Order) amends and supersedes the Orders and Addendums of the County of Los Angeles Health Officer (Health Officer) issued on March 16, 19, 21, 27, and 31, 2020. This Order is issued to comply with Executive Order N-33-20 issued by Governor Gavin Newsom, wherein the State Public Health Officer ordered all individuals living in the State of California to stay home or at their place of residence, except as needed to maintain continuity of operations of the federal critical infrastructure sectors.

Due to the continued rapid spread of the Novel Coronavirus (COVID-19) and the need to protect the most vulnerable members of our community, this Order continues to prohibit all indoor and outdoor public and private gatherings and events. The Order specifically requires all businesses to cease in-person operations and remain closed to the public, unless the business is defined as an Essential Business by this Order. This Order is effective within the County of Los Angeles Public Health Jurisdiction, defined as, all unincorporated areas and cities within the County of Los Angeles with the exception of the cities of Long Beach and Pasadena, and continues through May 15, 2020.

The Health Officer now requires Essential Businesses to implement by no later than 11:59 p.m. on April 15, 2020, a Social Distancing Protocol, which includes a requirement to provide all of their employees whose duties require contact with other employees and/or the public with a cloth face covering to wear while performing duties that involve contact with others.

This Order does not prohibit any individual or members of a single household or living unit from engaging in outdoor activities, as an individual or household, such as jogging, walking, or biking. This Order continues to allow individuals to leave their homes to shop at Essential Businesses, including grocery stores and restaurants offering delivery, drive thru or carry out service, so long as all persons practice Social Distancing and wear a cloth face covering while visiting Essential Businesses.

Further, this Health Officer Order continues the closure of all indoor malls and shopping centers, all swap meets and flea markets, all indoor and outdoor playgrounds, beaches, trails and trailheads, and in-person operations of all non-essential businesses. This Order does not supersede any stricter limitation imposed by a local public entity.

The County Health Officer will continue to monitor the rate of COVID-19 disease spread, the severity of the resulting illnesses and deaths caused, California Department of Public Health (CDPH) and Centers for Disease Control and Prevention (CDC) recommendations, and the effect of this Order. If needed, this Order may be extended, expanded, or otherwise modified to protect the public's health.

UNDER THE AUTHORITY OF THE CALIFORNIA HEALTH AND SAFETY CODE SECTIONS 101040, 101085, AND 120175, THE COUNTY OF LOS ANGELES HEALTH OFFICER ORDERS:

1) Effective immediately on April 10, 2020 and continuing through May 15, 2020, all persons are to remain in their homes or at their place of residence, except to travel to and from Essential Businesses, to work at or provide service to a Healthcare Operation or Essential Infrastructure, to engage in Essential Activities, or to perform Minimum Basic Operations for non-essential businesses, while practicing Social Distancing, as defined in Section 14 of this Order.

   a) All public and private gatherings of any number of people occurring outside a single household or living unit are prohibited within the County of Los Angeles Public Health Jurisdiction, except for the limited purposes expressly permitted by this Order. Nothing in this Order prohibits members of a single household or living unit from engaging in Essential Activities together.

   b) Essential Businesses are directed to continue to maximize the number of employees who work from home. Essential Businesses must follow industry-specific guidance issued by the Health Officer on the County of Los Angeles Department of Public Health website related to COVID-19: http://publichealth.lacounty.gov/media/coronavirus/.

2) For Essential Businesses open to any member of the public, excluding clinical settings within Healthcare Operations, the owner, manager, or operator of the Essential Business shall prepare and post by no later than 11:59 p.m. on April 15, 2020, a Social Distancing Protocol for each of their facilities within the County of Los Angeles Public Health Jurisdiction that are frequented by the public or employees. The Social Distancing Protocol must be substantially in the form attached to this Order as Appendix A. The Social Distancing Protocol must be posted at or near the entrance of the relevant facility and shall be easily viewable by the public and employees. A copy of the Social Distancing Protocol must also be provided to each employee performing work at the facility. All Essential Businesses shall implement the Social Distancing Protocol and provide evidence of its implementation to any authority enforcing this Order upon demand. The Social Distancing Protocol must explain how the Essential Business facility is achieving the following, as applicable:

   a) Limiting the number of people who may enter into the facility at any one time to ensure that people in the facility can easily maintain, at all times, a minimum six (6) foot physical distance from others, except as required to complete an Essential Business activity. Persons who are family members or household contacts, may stand or move together, but must be separated from others by a physical distance of at least six (6) feet.

   b) Where lines may form at a facility, marking six (6) foot increments at a minimum, establishing where individuals should stand to maintain adequate Social Distancing.

   c) Providing hand sanitizer, soap and water, or effective disinfectant at or near the entrance of the facility and in other appropriate areas for use by the public and employees, and in locations where there is high-frequency employee interaction with members of the public (e.g. cashiers). Restrooms normally open to the public shall remain open to the public.

   d) Posting a sign in a conspicuous place at all public entries that instructs members of the public not to enter if they are experiencing symptoms of respiratory illness, including fever or cough, and to maintain Social Distancing from one another.

   e) Providing for the regular disinfection of high-touch surfaces, and disinfection of all payment portals, pens, and styluses after each use. Essential Businesses are encouraged to also offer touch-less payment mechanisms, if feasible.

   f) Providing cloth face coverings to employees and contracted workers whose duties require close contact (within 6 feet for 10 minutes or more) with other employees and/or the public.

g) Requiring that members of the public who enter the facility wear a face covering during their time in the facility.

h) Adhere to communicable disease control recommendations provided by the Los Angeles County Department of Public Health, including guidance for cleaning and disinfecting the site. See guidance posted at www.publichealth.lacounty.gov/media/Coronavirus/.

3) The Health Officer orders the continued closure of the following types of commercial properties, recreational sites and businesses:

a) Non-Essential Retail Businesses.

b) Indoor Malls and Indoor Shopping Centers, including all stores and vendors therein regardless whether they are an Essential or Non-Essential Retail Business. As an exception, permanent Essential Businesses that are part of an Indoor Mall or Indoor Shopping Center, but that are accessible by the public from the exterior of the Indoor Mall or Shopping Center may remain open. The interior of the Indoor Mall or Indoor Shopping Center shall remain closed to the public.

c) This Order does not require closure of Essential Businesses in Outdoor Malls and Shopping Centers. However, owners and operators of Outdoor Malls and Shopping Centers shall enforce Social Distancing measures among their visitors.

d) Indoor and Outdoor Playgrounds for Children, except for those located within childcare centers.

e) All public beaches, piers, public beach parking lots, and beach access points.

f) All public trails and trailheads.

g) Indoor and Outdoor Flea Markets and Swap Meets.

h) Additional types of commercial properties and businesses:

(i) Bars and Nightclubs that do not serve food;

(ii) Gyms and fitness centers;

(iii) Movie Theaters, Drive-In Theaters, Live Performance Theaters, Concert Halls, Arenas and Stadiums;

(iv) Bowling Alleys and Arcades; and

(v) The portions of wineries, breweries and tap rooms that provide tastings to the public.

4) This Order does not supersede any stricter limitation imposed by a local public entity within the Los Angeles County Public Health Jurisdiction.

5) This Order considers employees of government agencies working in the course and scope of their public service employment to be Essential Infrastructure.

a) This Order declares that all government employees to be essential, including, but not limited to, health care providers and emergency responders. Health care providers and emergency responders include employees who serve in the following areas: law enforcement; emergency services and management; first responder; fire; search and rescue; juvenile detention; corrections; healthcare services and operations; public health; laboratory or medical testing; mental health; community health; public works; executive management employees serving in these fields; all employees assigned to serve in or support the foregoing fields; and all employees whose services are otherwise needed to assist in a declared emergency.

b) While all government employees are essential, the employees identified here and the others called to serve in their Disaster Service Worker capacity must be available to serve the public or assist in response or continuity of operations efforts during this health crisis to the maximum extent allowed under the law.

REASONS FOR THE ORDER

6) This Order is based upon scientific evidence and best practices, as currently known and available, to protect members of the public from avoidable risk of serious illness and death resulting from the spread of COVID-19. The intent of this Order is to ensure that the maximum number of people remain in their places of residence to the maximum extent feasible to stem the spread of COVID-19 and mitigate the impact on delivery of critical healthcare services to those in need, as well as to protect the healthcare system from a surge of cases into emergency rooms and hospitals. The Order supports the CDC's efforts to institute more stringent and necessary Social Distancing measures to reduce community transmission of COVID-19.

7) Existing community transmission of COVID-19 in Los Angeles County presents a substantial and significant risk of harm to the health of residents. Currently, there is no vaccine available to protect against and no specific treatment for COVID-19. As of April 9, 2020, there have been at least 7,995 cases of COVID-19 and 223 deaths reported in Los Angeles County. There remains a strong likelihood of a significant and increasing number of cases of community transmission. Making the community transmission problem worse, some individuals who contract the virus causing COVID-19 have no symptoms or have mild symptoms, which means they may not be aware they carry the virus and are transmitting it to others.

8) The virus that causes COVID-19 is easily spread through person-to-person contact. This risk of transmission is increased when people are in close proximity. All gatherings pose an increased risk for community transmission of COVID-19 and thus, are a substantial risk to public health. As such, scientific evidence shows that at this stage of the public health emergency, it remains essential to continue to slow the virus transmission as much as possible to protect the most vulnerable, to prevent the healthcare system from being overwhelmed, and to prevent deaths. The extension of this Order and the strengthening of its Social Distancing requirements are necessary to further reduce the spread of COVID-19, preserving critical and limited healthcare capacity in the County and advancing to a point in the pandemic where transmission can be controlled.

9) In the absence of a specific immunization or treatment for COVID-19, Social Distancing is essential to preventing the spread of this disease. Increasing the practice of Social Distancing and prohibiting events and gatherings is intended to slow transmission of COVID-19. Accordingly, to reduce the community transmission of COVID-19, the Health Officer is continuing the temporary prohibition of <u>all</u> events and gatherings, the closure of Indoor Malls and Shopping Centers as defined in Section 11, and the cessation of in-person operations of certain businesses, as described in Section 12.

DEFINITIONS

10) For purposes of this Order, Essential Activities, are defined as travel for purposes of:
    a) Visiting a health or veterinary care professional;
    b) Obtaining medical supplies or medication;
    c) Obtaining grocery items or necessary supplies from Essential Businesses for one's household or for delivery to others;
    d) Legally mandated governmental purposes, such as access to court, social and administrative services;
    e) Providing care for minors, the elderly, dependents, persons with disabilities, or other vulnerable persons;
    f) Complying with an order of law enforcement or court, and;
    g) Engaging in outdoor recreation activity, in compliance with Social Distancing requirements.

11) For purposes of this Order, Indoor Malls and Shopping Centers are defined as: A building with seven (7) or more "sales or retail establishments" with adjoining indoor space. For purposes of this Order, Outdoor Malls and Shopping Centers are defined as: A series of buildings on a common site, either under common ownership or common control or developed together, with seven (7) or more "sales or retail establishments."

12) Non-Essential Retail Businesses are establishments that provide goods or services to the public that do not come within the definition of Essential Businesses set forth in Paragraph 13 of this Order.

13) For purposes of this Order, Essential Businesses are defined as the following:

a) Grocery stores, certified farmers' markets, farm and produce stands, supermarkets, food banks, convenience stores, warehouse stores, and other establishments engaged in the retail sale of canned food, dry goods, fresh fruit and vegetables, pet supply, water, fresh meats, fish, and poultry, and any other household consumer products (such as cleaning or personal care products). This includes stores that sell groceries and other non-grocery products, such as products necessary to maintaining the safety, sanitation, and essential operation of residences. This does not include businesses that sell only prepackaged non-potentially hazardous food which is incidental to the primary retail business;

b) Food processors, confectioners, food packagers, food testing labs that are not open to the public, and food cultivation, including farming, livestock, and fishing;

c) Organizations and Businesses that provide food, shelter, and social services, and other necessities of life for economically disadvantaged or otherwise needy individuals (including gang prevention and intervention, domestic violence, and homeless service agencies);

d) Newspapers, television, radio, magazine, podcast and journalism activities;

e) Gas stations, auto-supply, mobile auto repair operations, auto repair shops (including, without limitation, auto repair shops adjacent to or otherwise in connection with a retail or used auto dealership), and bicycle repair shops and related facilities. This subparagraph (e) does not restrict the on-line purchase of automobiles if they are delivered to a residence or Essential Business;

f) Banks, credit unions, financial institutions and insurance companies;

g) Hardware stores, nurseries; building supply stores;

h) Plumbers, electricians, exterminators, custodial/janitorial workers, handyman services, funeral home workers and morticians, moving services, HVAC installers, carpenters, vegetation services, tree maintenance, landscapers, gardeners, property managers, private security personnel and other service providers who provide services to maintain the safety, sanitation, and essential operation to properties and other Essential Businesses;

i) Businesses providing mailing and shipping services, including post office boxes;

j) Educational institutions (including public and private K-12 schools, colleges, and universities) for purposes of facilitating distance learning, providing meals for pick-up, or performing Minimum Basic Operations, provided that Social Distancing is practiced;

k) Laundromats, dry cleaners, laundry service providers;

l) Restaurants and other food facilities that prepare and serve food, but only for delivery, drive thru or carry out. Indoor and outdoor table dining is not permitted. Cafeterias, commissaries, and restaurants located within hospitals, nursing homes, or other licensed health care facilities may provide dine-in service, as long as Social Distancing is practiced;

m) Businesses that supply office or computer products needed by people who work from home;

n) Businesses that supply other Essential Businesses with the support or supplies necessary to operate. This exemption shall not be used as a basis for engaging in sales to the general public from retail storefronts;

o) Non-manufacturing, transportation or distribution businesses that ship, truck, transport, or provide logistical support to deliver groceries, food, goods or services directly to residences, Essential Businesses, Healthcare Operations, and Essential Infrastructure. This exemption shall not be used as a basis for engaging in sales to the general public from retail storefronts;

p) Airlines, taxis, ride sharing services and other private transportation providers providing transportation services necessary for activities of daily living and other purposes expressly authorized in this Order;

q) Businesses that manufacture parts and provide necessary service for Essential Infrastructure;

r) Home-based care for seniors, adults, disabled persons, or children;

s) Residential facilities and shelters for homeless residents, disabled persons, seniors, adults, children and animals;

t) Professional services, such as legal, payroll or accounting services, when necessary to assist in compliance with legally mandated activities, and the permitting, inspection, construction, transfer and recording of ownership of housing, including residential and commercial real estate and anything incidental thereto, provided that appointments and other residential viewings must only occur virtually or, if a virtual viewing is not feasible, by appointment with no more than two visitors at a time residing within the same household or living unit and one individual showing the unit (except that in-person visits are not allowed when the occupant is still residing in the residence);

u) Military/Defense Contractors/FFRDC (Federally Funded Research and Development Centers). For purposes of this Order, essential personnel may leave their residence to provide any service or perform any work deemed essential for national security including, but not limited to defense, intelligence and aerospace development and manufacturing for the Department of Defense, the Intelligence Community, and NASA and other federal government, and or United States Government departments and agencies. Essential personnel include prime, sub-primes, and supplier contractor employees, at both the prime contract level and any supplier levels at any tier, working on federal United States Government contracts such as contracts rated under the Defense Priorities and Allocations System (DPAS) and contracts for national intelligence and national security requirements;

v) Childcare facilities providing services that enable employees exempted in this Order to work as permitted. To the extent possible, childcare facilities must operate under the following mandatory conditions: (1) Childcare must be carried out in stable groups of 10 or fewer ("stable" means the same ten (10) or fewer children are in the same group each day); (2) Children shall not change from one group to another; (3) If more than one (1) group of children is cared for at one facility, each group shall be in a separate room. Groups shall not mix with each other; (4) Childcare providers shall remain solely with one group of children;

w) Hotels, motels, shared rental units and similar facilities;

x) Construction, which includes the operation, inspection, and maintenance of construction sites and construction projects for construction of commercial, office and institutional buildings, residential and housing construction;

y) Manufacturers and retailers of fabric or cloth that is made into personal protective equipment, such as, face coverings. These businesses may provide their products to purchasers by delivery or pick-up but may not be open to the public;

14) For purposes of this Order, "Social Distancing" means: (1) Maintaining at least six-feet of physical distance from individuals who are not part of the same household; (2) Frequently washing hands with soap and water for at least 20 seconds or using hand sanitizer that contains at least 60% alcohol; (3) Wearing a cloth face covering while out in public when in contact with others, not including members of a single household or living unit; and (4) Avoiding all social interaction outside the household when sick with fever or cough.

15) This Order does not prohibit persons from leaving their residences to perform any work necessary or provide any services to or obtain services from the following Essential Infrastructure and Healthcare Operations:

a) Healthcare Operations are hospitals, clinics, laboratories, dentists, pharmacies, physical therapists and chiropractors, pharmaceutical and biotechnology companies, other licensed healthcare facilities, healthcare suppliers, home healthcare service providers, mental or behavioral health providers, alcohol and drug treatment providers, cannabis dispensaries with a medicinal cannabis license and all other

required state and local licenses, medical or scientific research companies, or any related and/or ancillary healthcare services, manufacturers, distributors and servicers of medical devices, diagnostics, and equipment, veterinary care, and all healthcare provided to animals. This exemption shall be construed to avoid any impact to the delivery of healthcare, broadly defined. Healthcare Operations does not include fitness and exercise gyms and similar exercise or training facilities.

b) Essential Infrastructure, for purposes of this Order, is defined as public health operations, public works construction, airport operations, port operations, food supply, water, sewer, gas, electrical, oil extraction and refining, roads and highways, public transportation, solid waste collection, removal and processing, flood control and watershed protection, cemeteries, mortuaries, crematoriums, and internet and telecommunications systems (including the provision of essential global, national, local infrastructure for computing services, business infrastructure, communications, and web-based services), and manufacturing and distribution companies deemed essential as part of the Essential Infrastructure supply chain, provided that they carry out those services or that work in compliance with Social Distancing requirements, to the extent practicable.

ADDITIONAL TERMS

16) This Order does not, in any way, restrict: (a) first responder access to the site(s) named in this Order during an emergency or (b) local, state or federal officers, investigators, or medical or law enforcement personnel from carrying out their lawful duties at the site(s) named in this Order.

17) Operators of non-essential businesses that are required to cease in-person operations, but may continue to work from home, may travel to those businesses for purposes of Minimum Basic Operations, which means:

a) The minimum necessary activities to maintain and protect the value of the business's inventory and facilities; ensure security, safety, and sanitation; process payroll and employee benefits;

b) The minimum necessary activities to facilitate owners, employees, and contractors of the business being able to continue to work remotely from their residences, and to ensure that the business can deliver its services remotely.

18) The County shall promptly provide copies of this Order by: (a) posting it on the Los Angeles Department of Public Health's website (www.publichealth.lacounty.gov), (b) posting it at the Kenneth Hahn Hall of Administration located at 500 West Temple Street, Los Angeles, CA 90012, (c) providing it to any member of the public requesting a copy, and (d) issuing a press release to publicize the Order throughout the county).

(a) The owner, manager, or operator of any facility that is likely to be impacted by this Order is strongly encouraged to post a copy of this Order onsite and to provide a copy to any member of the public requesting a copy.

(b) Because guidance may change, the owner, manager, or operator of any facility that is subject to this Order is ordered to consult the Los Angeles County Department of Public Health's website (www.publichealth.lacounty.gov) daily to identify any modifications to the Order and is required to comply with any updates until the Order is terminated.

19) If any subsection, sentence, clause, phrase, or word of this Order or any application of it to any person, structure, gathering, or circumstance is held to be invalid or unconstitutional by a decision of a court of competent jurisdiction, then such decision will not affect the validity of the remaining portions or applications of this Order.

20) This Order incorporates by reference, the March 4, 2020 Proclamation of a State of Emergency issued by Governor Gavin Newsom and the March 4, 2020 declarations of a local and public health emergency issued by the Los Angeles County Board of Supervisors and Los Angeles County Health Officer, respectively, and as they may be supplemented.

21) This Order is issued in light of the March 19, 2020 Order of the State Public Health Officer, (the "State Shelter Order") which set the baseline statewide restrictions on non-residential business activities, effective until further notice, as well as the Governor's March 19, 2020 Executive Order N-33-20 directing California residents to follow the State Shelter Order. This Order adopts in certain respects more stringent restrictions addressing the particular facts and circumstances in the County of Los Angeles Public Health Jurisdiction, which are necessary to control the public health emergency as it is evolving. Without this tailored set of restrictions that further reduce the number of interactions between persons, scientific evidence indicates that the public health crisis will worsen to the point at which it may overtake available healthcare resources within the County of Los Angeles and increase the death rate.

22) Where a conflict exists between this Order and any state public health order related to controlling the spread of COVID-19 during this pandemic, the most restrictive provision controls. Consistent with California Health and Safety Code section 131080, except where the State Health Officer may issue an order expressly directed at this Order or a provision of this Order and based upon a finding that a provision of this Order constitutes a menace to the public health, any more restrictive measures in this Order may continue to apply and control in the County of Los Angeles Public Health Jurisdiction.

23) Pursuant to Sections 26602 and 41601 of the California Government Code and Section 101029 of the California Health and Safety Code, the Health Officer requests that the Sheriff and all chiefs of police in all cities located in the Los Angeles County Public Health Jurisdiction ensure compliance with and enforcement of this Order. The violation of any provision of this Order constitutes an imminent threat and menace to public health, constitutes a public nuisance, and is punishable by fine, imprisonment or both.

24) This Order shall become effective immediately on April 10, 2020 and will continue to be in effect until 11:59 p.m. on May 15, 2020, or until it is extended, rescinded, superseded, or amended in writing by the Health Officer.

IT IS SO ORDERED:

Muntu Davis, M.D., M.P.H.
Health Officer,
County of Los Angeles

APRIL 10, 2020
Date

Appendix A: Social Distancing Protocol

Business name: _____

Facility Address: _____

Approximate gross square footage of space open to the public: _____

Businesses must implement all applicable measures listed below and be prepared to explain why any measure that is not implemented is inapplicable to the business.

A. SIGNAGE

- ❑ Signage at each public entrance of the facility to inform all employees and customers that they should: avoid entering the facility if they have a cough or fever; maintain a minimum six-foot distance from one another.
- ❑ Signage posting a copy of the Social Distancing Protocol at each public entrance to the facility.

B. MEASURES TO PROTECT EMPLOYEE HEALTH (CHECK ALL THAT APPLY TO THE FACILITY)

- ❑ Everyone who can carry out their work duties from home has been directed to do so.
- ❑ All employees have been told not to come to work if sick.
- ❑ Symptom checks are being conducted before employees may enter the workspace.
- ❑ All employees that have contact during their shift(s) with the public or other employees are offered, at no-cost, a cloth face covering to be used at work when interacting with them.
- ❑ All desks or individual workstations are separated by at least six feet.
- ❑ Break rooms, restrooms, and other common areas are being disinfected frequently, on the following schedule:
  - ❑ Break rooms: _____
  - ❑ Restrooms: _____
  - ❑ Other: _____
- ❑ Disinfectant and related supplies are available to all employees at the following location(s):
- ❑ Hand sanitizer effective against COVID-19 is available to all employees at the following location(s):
- ❑ Soap and water are available to all employees at the following location(s):
- ❑ Employees are allowed frequent breaks to wash their hands.

❑ Copies of this Protocol have been distributed to all employees.

❑ Optional—Describe other measures:

C. MEASURES TO PREVENT CROWDS FROM GATHERING (CHECK ALL THAT APPLY TO THE FACILITY)

❑ Limit the number of customers in the store at any one time, which allows for customers and employees to easily maintain at least six-foot distance from one another at all practicable times.

Maximum number of customers in the facility:

❑ Post an employee at the door to ensure the maximum number of customers in the facility is not exceeded.

❑ Placing per-person limits on goods that are selling out quickly to reduce crowds and lines. Explain:

❑ Optional-Describe other measures:

D. MEASURES TO KEEP PEOPLE AT LEAST SIX FEET APART (CHECK ALL THAT APPLY TO THE FACILITY)

❑ Placing signs outside the store reminding people to be at least six feet apart, including when in line.

❑ Placing tape or other markings at least six feet apart in customer line areas inside the store and on walkways at public entrances with signs directing customers to use the markings to maintain distance.

❑ Separate order areas from delivery areas to prevent customers from gathering.

❑ All employees have been instructed to maintain at least six feet distance from customers and from each other, except employees may momentarily come closer when necessary to accept payment, deliver goods or services, or as otherwise necessary.

❑ Optional—Institute one-way aisles to facilitate Social Distancing.

❑ Optional—Describe other measures:

E. MEASURES TO PREVENT UNNECESSARY CONTACT (CHECK ALL THAT APPLY TO THE FACILITY)

❑ Preventing people from self-serving any items that are food-related.

- ❑ All items are pre-packaged in sealed containers by staff.
- ❑ Bulk-item food bins are not available for customer self-service use.
- ❑ Food samples are prohibited.

❑ Providing for contactless payment systems or, if not feasible, sanitizing payment systems regularly. Describe:

❑ Optional-Describe other measures (e.g. providing senior-only hours):

F. MEASURES TO INCREASE SANITIZATION (CHECK ALL THAT APPLY TO THE FACILITY)

- ❑ Restrooms normally open to the public shall remain open to the public.
- ❑ Disinfecting wipes that are effective against COVID-19 are available near shopping carts and shopping baskets.
- ❑ Employee(s) assigned to disinfect carts and baskets frequently, preferably after each use.
- ❑ Hand sanitizer, soap and water, or effective disinfectant is available to the public at or near the entrance of the facility, at checkout counters, and anywhere else inside the store or immediately outside where people have direct interactions.
- ❑ Disinfecting all payment portals, pens, and styluses after each use.
- ❑ Disinfecting all high-contact surfaces frequently.
- ❑ Optional- Describe other measures:

_____

Any additional measures not included above should be listed on separate pages, which the business should attach to this document.

RESOLUTION NO. 20-61

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MONTEBELLO, CALIFORNIA DECLARING AND PROCLAIMING THE CONTINUED EXISTENCE OF A LOCAL EMEGENCY DUE TO THE AFFECTS OF THE COVID-19 VIRUS PURSUANT TO MONTEBELLO MUNICIPAL CODE SECTION 2.48.090

WHEREAS, the City Council of the City of Montebello has been responding to the spread of coronavirus disease, and has found that international, national, state, and local health and governmental authorities are responding to an outbreak of said respiratory disease caused by a novel coronavirus, also known and abbreviated as COVID-19, ("COVID-19"); and

WHEREAS, the City Council of the City of Montebello is and has been responding to the spread of the coronavirus disease, and now continues to find that international, national, state, and local health and governmental authorities are responding to the outbreak of said respiratory disease caused by a novel coronavirus, COVID-19; and

WHEREAS, Chapter 2.48, et seq. of the Montebello Municipal Code authorizes the City Council to proclaim the existence or threatened existence of a local emergency, and the City Council commencing on March 19, 2020 and continuing thereafter has by its actions confirmed the ongoing existence of a local emergency; and

WHEREAS, pursuant to Montebello Municipal Code Section 2.48.090, the City Council of the City of Montebello must review the need for the determination of a continuing local emergency and intends to continue to declare and proclaim the existence of a local emergency due to the COVID-19 virus, and;

WHEREAS, the City Council of the City of Montebello hereby finds that conditions of extreme peril continue to exist which significantly impacts the safety of persons and property within the City caused by the COVID-19 virus and which requires the continued proclamation of a local emergency.

NOW, THEREFORE, IT IS HEREBY PROCLAIMED that a local emergency continues to exist throughout the City of Montebello, and;

SECTION 1: IT IS FURTHER PROCLAIMED AND ORDERED that during the existence of said local emergency the powers, functions, and duties of the emergency organization of this City shall be those prescribed by state and County law, by local ordinances, and resolutions of this City; and the City continues to seek all services, financial assistance and other related aid provided for or made available by the County of Los Angeles, State of California or Federal Government.

SECTION 2: All individuals, organizations, and business entities are hereby required to comply and adhere to all federal, state, and local orders and directives within the City's jurisdiction and boundaries relating to COVID-19. Should subsequent federal, state, or county orders and directives be issued that promote various forms of social distancing to protect the most vulnerable from COVID-19, as well as to contain the spread of same, the more restrictive orders and directives shall apply.

SECTION 3: This Resolution is adopted consistent with and as set forth in Montebello Municipal Code Section 2.48.090 which requires the City Council to review, at least every fourteen days until the local emergency is terminated, the need for continuing the local emergency until the termination of the local emergency at the earliest possible date that conditions warrant.

SECTION 4: It is hereby proclaimed and ordered that during the existence of said local emergency, the powers, functions, and duties of the emergency organization of the City shall be as prescribed by federal, state, and county law, as well as the laws, ordinances and resolutions of the City of Montebello.

SECTION 5: SEVERABILITY. If any section, subsection, paragraph, sentence, clause, phrase, or portion thereof, of this Resolution is declared by a court of competent jurisdiction to be unconstitutional or otherwise invalid, such decision shall not affect the validity of the remaining portions of this Resolution. The City Council declares that it would have adopted this Resolution, and each section, subsection, paragraph, sentence, clause, phrase, or portion thereof, irrespective of the fact that any one or more sections, subsections, paragraphs, sentences, clauses, phrases, or portions thereof, be declared

invalid or unconstitutional. To this end, the provisions of this Resolution are declared to be severable.

PASSED, APPROVED, AND ADOPTED BY THE CITY COUNCIL OF THE CITY OF MONTEBELLO, CALIFORNIA, THIS 31st DAY OF JULY, 2020.

Salvador Melendez, Mayor

ATTEST:

Irma Barajas, City Clerk

APPROVED AS TO FORM

Arnold M. Alvarez-Glasman
City Attorney

STATE OF CALIFORNIA)
COUNTY OF LOS ANGELES) ss.
CITY OF MONTEBELLO)

I, Irma Barajas, City Clerk of the City of Montebello, do hereby certify that the foregoing City Council Resolution No. 20-61 was duly and regularly approved and adopted by the City Council of the City of Montebello at their meeting held on the 31st day of July, 2020, as approved by law by the following vote:

AYES: Torres, Hadjinian, Cobos-Cawthorne, Jimenez, Melendez
NOES: None

IN WITNESS WHEREOF, I have hereunto set my hand and affixed the official seal of said City on the 31ST day of July, 2020.

IRMA BARAJAS, City Clerk

RESOLUTION NO. 21-85

RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MONTEBELLO AUTHORIZING THE CITY TO CONTINUE TO TELECONFERENCE OPEN MEETINGS PURSUANT TO ASSEMBLY BILL 361.

WHEREAS, the City of Montebello, values and places the highest priority on public safety and protecting its community; and

WHEREAS, the City of Montebello remains vigilant with federal, state, and county official updates related to COVID-19 because information, orders, and directives continue to change; and

WHEREAS, the City of Montebello is committed to preserving and nurturing public access and participation in meetings of City Council; and

WHEREAS, all meetings of the City of Montebello's City Council are open and public, as required by the Ralph M. Brown Act (Gov't Code § 54950 – 54963), so that any member of the public may attend, participate, and watch the City's Council conduct their business; and

WHEREAS, the Brown Act, Government Code § 54953(e), makes provisions for remote teleconferencing participation in meetings by members of local agencies, without compliance with the requirements of Government Code section 54953(b)(3), subject to the existence of certain conditions; and

WHEREAS, on March 17, 2020, the Governor issued Executive Order N-29-20, which suspended and modified the teleconferencing requirements under the Brown Act (Gov't. Code § 54950 et seq.) so that local agencies can hold public meetings via teleconferences (with audio or video communications, without a physical meeting location), as long as the meeting agenda identifies the teleconferencing procedures to be used; and

WHEREAS, on June 11, 2021, the Governor issued Executive Order N-08-21, which extended the provision of N-29-20 concerning the conduct of public meetings through September 30, 2021; and

WHEREAS, California Assembly Bill 361 was signed into law on September 16, 2021 and amended Government Code Section 54953; and

WHEREAS, Assembly Bill 361 has several requirements to ensure the public can view and make public comments during the teleconferenced open meetings, including:

- To provide notice of how members of the public may access the meeting and offer public comments, including the chance for all persons to attend the meeting via a call-in or internet-based service option;

- The City Council cannot take further action on agenda items when there is a disruption which prevents the public agency from broadcasting the meeting, or in the event of a disruption within the City Council's control which prevents members of the public from offering public comments, until public access is restored;

- Prohibiting City Council from requiring public comments to be submitted in advance of the meeting and would specify that the City Council must provide an opportunity for the public to address the City Council and offer comments in real time, however, written comments may still be submitted in advance;

- Prohibiting City Council from closing the public comment period until the public comment period has elapsed or until a reasonable amount of time has elapsed; and

WHEREAS, Government Code Section 54953(e)(3)(A-B) permits public meetings by teleconference but requires agendas be posted at all teleconference locations, each teleconference location shall be identified in the notice and agenda of the meeting or proceeding, and each teleconference location shall be accessible to the public; and

WHEREAS, Government Code Section 54953(b)(3) provides an alternative to having public meetings in accordance with Government Code Section 54953(b)(3) when City Council has considered the circumstances of the COVID-19 state of emergency and that the following circumstances exists;

1. The state of emergency as a result of COVID-19 continues to directly impact the ability of the members of City Council and the members of the City's subordinate Committees, Commissions, and Boards to meet safely in person; and

2. The State of California and the City of Montebello continue to impose or recommend measures to promote social distancing.

WHEREAS, the City of Montebello continues to impose or recommend measures to promote social distancing, which includes, but is not limited to:

1. Due to the increased transmission from the Delta Variant and ensure the health and safety of the public, temporarily suspending the public to attend in person City Council meetings.

2. Posting COVID-19 safety measures.

WHEREAS, the proposed action is exempt from the requirements of the California Environmental Quality Act (CEQA) in accordance with CEQA Guidelines Section 15378(b)(5), in that adopting a Resolution authorizing the City Manager to conduct teleconferenced public meetings for all City's Committees, Commissions, and Boards, does not meet CEQA's definition of a "project", because the action does not have the potential for resulting in either a direct physical change in the environment or a reasonably

foreseeable indirect physical change in the environment, and because the action constitutes organizational or administrative activities of governments that will not result in direct or indirect physical changes in the environment and is exempt pursuant to Section 15269(c) of the CEQA Guidelines, as specific actions necessary to prevent or mitigate an emergency; and

WHEREAS, the City Council has considered all information related to this matter, as presented at the public meetings of the City Council identified herein;

NOW THEREFORE, THE CITY COUNCIL OF THE CITY OF MONTEBELLO HEREBY RESOLVES, FINDS, AND DECLARES AS FOLLOWS:

SECTION 1: The above recitals are true and correct and are incorporated herein by this reference.

SECTION 2: That the City Council of the City of Montebello has reconsidered the circumstances of COVID-19 state of emergency and that the following circumstances continue to exist:

- The state of emergency as a result of COVID-19 continues to directly impact the ability of the members of City Council and the City's subordinate Committees, Commissions, and Boards to meet safely in person; and

- The State of California and the City of Montebello continue to impose or recommend measures to promote social distancing.

SECTION 3: Declares that as a result of the findings in Section 2 above, that the City is authorized to implement teleconferenced public meetings for City Council and all of the City's Committees, Commissions, and Boards pursuant to Assembly Bill 361.

SECTION 4: Adoption of this Resolution declares and affirms that the City Council of the City of Montebello authorizes that public meetings be teleconferenced in accordance to the provisions within Assembly Bill 361 and other applicable provisions of the Brown Act.

SECTION 5: Public Comment Periods during Remote Teleconferenced Meetings will be conducted in accordance with Government Code section 54953 (e), Assembly Bill 361, and other applicable provisions of the Brown Act as follows:

1. To ensure the health and safety of the public, residents will have the option of providing public comments in real time, during City Council meetings.
2. Residents may continue to submit comments telephonically in real time.
3. Comments can still be submitted via electronic mail and will be submitted to all members of the City Council. Written comments may not be read aloud and will be entered into the record of the proceedings to the extent they relate to

matters listed on the posted agenda or otherwise address matters/issues within the subject matter jurisdiction of the City Council.

4. Members of the public will be allowed a reasonable amount of time per agenda item to provide public comments.
5. All activities during City Council meetings will immediately cease if the internet or website system malfunctions or any technical difficulty arises and will resume until access to the public has been restored.
6. City Council will make findings to this resolution every thirty (30) days by a majority vote to continue exemptions to the teleconferencing rules of the Brown Act.
7. City Council shall conduct teleconference meetings in a manner that protects the statutory and constitutional rights of the residents and the public appearing before Council.
8. All required elements of teleconferencing as required by AB 361 will be implemented by October 27, 2021.

SECTION 6: This Resolution shall take effect immediately upon its adoption and shall be effective until thirty (30) days from the adoption of this resolution, or such time the City Council adopts a subsequent resolution in accordance with Government Code section 54953(e)(3) to extend the time during which the City of Montebello may continue to teleconference without compliance with paragraph (3) of subdivision (b) of section 54953.

SECTION 7: It is hereby proclaimed and ordered that during the existence of said local emergency, the powers, functions, and duties of the emergency organization of the City shall be as prescribed by federal, state, and county law, as well as the laws, ordinances and resolutions of the City of Montebello.

SECTION 8: If any section, subsection, paragraph, sentence, clause, phrase, or portion thereof, of this Resolution is declared by a court of competent jurisdiction to be unconstitutional or otherwise invalid, such decision shall not affect the validity of the remaining portions of this Resolution. The City Council declares that it would have adopted this Resolution, and each section, subsection, paragraph, sentence, clause, phrase, or portion thereof, irrespective of the fact that any one or more sections, subsections, paragraphs, sentences, clauses, phrases, or portions thereof, be declared invalid or unconstitutional. To this end, the provisions of this Resolution are declared to be severable.

SECTION 9: That the City Clerk shall certify to the passage and adoption of this Resolution and that the same shall be in full force and effect. Notwithstanding the foregoing, this Resolution shall be deemed adopted effective October 13, 2021.

APPROVED and **ADOPTED** this 13th day of October 2021.

Kimberly A. Cobos-Cawthorne, Mayor

ATTEST:

Christopher Jimenez, City Clerk

APPROVED AS TO FORM:

Arnold M. Alvarez-Glasman, City Attorney

STATE OF CALIFORNIA)
COUNTY OF LOS ANGELES) SS:
CITY OF MONTEBELLO)

I, Christopher Jimenez, City Clerk of the City of Montebello, County of Los Angeles, State of California, hereby certify that the foregoing Resolution No. 21-85 was passed and adopted by the City Council of the City of Montebello, signed by the Mayor and attested by the City Clerk at a regular meeting of said Council held on the 13th day of October, 2021 and that said Resolution was adopted by the following vote, to-wit:

AYES:
NOES:
ABSTAIN:
ABSENT:

The undersigned, City Clerk of the City of Montebello, does hereby attest and certify that the foregoing Resolution is a true, full and correct copy of a resolution duly adopted at a meeting of said City which was duly convened and held on the date stated thereon, and that said document has not been amended, modified, repealed or rescinded since its date of adoption and is in full force and effect as of the date hereof.

DATE: 10/13/21

Christopher Jimenez, City Clerk

ITEM # 8

CITY OF MONTEBELLO

CITY COUNCIL AGENDA STAFF REPORT

TO: Honorable Mayor and City Council Members

FROM: René Bobadilla, P.E., City Manager

BY: James Enriquez, Director of Public Works / City Engineer

SUBJECT: **Montebello Boulevard Grade Separation Project – Construction, Operation and Maintenance Standard Form Agreement No. 3974**

DATE: April 13, 2022

RECOMMENDATIONS:

It is recommended that the City Council:

1) Approve the Construction, Operation and Maintenance (COM) Standard Form Agreement No. 3974 (Attachment A) for the subject project and authorize the Mayor to execute the agreement on behalf of the City in the final form approved by the City Attorney; and

2) Take such additional, related, action that may be desirable.

FISCAL IMPACT

Other than staff time for coordination with San Gabriel Valley Council of Governments (SGVCOG) during the design and construction of the project, the City is not contributing to the cost of the design or construction of this project.

However, the project will be transferred to the City after completion for operation and maintenance. This transfer is anticipated in Fiscal Year 2025-26 and will be considered in the budget development process at that time. This includes costs associated with the operation and maintenance of the completed facilities, including recommendations for the accumulation of capital outlay funds for future repairs and the eventual replacement of the facilities (as described below).

BACKGROUND

The Union Pacific Railroad (UPRR) Los Angeles Subdivision is one of the busiest and most important railroad corridors in the United States, providing vital goods movement from the sea ports, through Southern California and out to the entire nation. It also provides critical commuter rail service in Southern California. There are four existing at-grade roadway crossings within the City of Montebello: 1) Vail Avenue; 2) Maple Avenue; 3) Greenwood Avenue; and 4) Montebello Boulevard.

In 2013, in an effort to address traffic delays, noise and other safety concerns associated with these at-grade railroad crossings, the City Council directed staff to contract the services of an engineering firm to complete a conceptual study of alternatives for constructing a grade separation for the Montebello Boulevard crossing. The firm JMD was selected and completed the study in December 2014.

Following a series of five public outreach meetings in 2014 and presentations to the Planning Commission and Traffic & Safety Commission, the City Council selected a preferred design alternative for an underpass at its meeting on February 25, 2015 and directed staff to submit the selection to the San Gabriel Valley Council of Governments (SGVCOG) for consideration of inclusion in its construction program. The SGVCOG oversees the agency formerly known as the Alameda Corridor East Construction Authority that was formed to plan, design and construct rail improvements in the Southern California region, particularly focused on roadway crossings of railroad corridors along Alameda Street from the Ports of Los Angeles and Long Beach to Downtown Los Angeles and eastward.

Since the SGVCOG selected this project as part of its construction program in 2015, staff has been working closely with SGVCOG staff and their team of consultants on the design of the project. The plans and specification have been completed and the SGVCOG is preparing to advertise the project for construction bids by the end of 2022, pending final resolution of right-of-way acquisitions and the availability of sufficient funding. Construction commencement is anticipated in spring 2023 and the duration of the construction is approximately 3 to 3.5 years at an estimated construction cost of $95 million.

The project consists of constructing an underpass for Montebello Boulevard (Montebello Way) under the UPRR rail located south of Olympic Boulevard (See Project Vicinity Map, Attachment B). The underpass will begin immediately south of Los Angeles Avenue, cross under Olympic Boulevard and the railroad and daylight immediately north of (before) the intersection of Montebello Way with Greenwood Avenue. A bridge will be constructed for Olympic Boulevard as well as the railroad. Limited access from Olympic Boulevard to Montebello Boulevard will be provided via frontage roads on both sides of new retaining walls only to the north. Connectivity of Montebello Boulevard (Way) with Roosevelt Avenue will be maintained by extending Roosevelt Avenue down into the underpass and

constructing a new signalized intersection. New signalized intersections will also be constructed at the Los Angeles Avenue and Greenwood Avenue intersections with Montebello Boulevard (Montebello Way). The residential portion of Montebello Boulevard south of the rail and Truck Way will terminate in cul-de-sacs, eliminating access to Montebello Way. The project includes pedestrian access via sidewalk along the east side of the underpass; bike lanes within the roadway; drainage improvements, including a new pump station; and other ancillary improvements. Aesthetic treatments have been included on new retaining walls as approved by the Infrastructure Committee.

As the next step in the project delivery process, the SGVCOG has requested that the City of Montebello execute a Construction, Operation and Maintenance (COM) Standard Form Agreement (Attachment A). The agreement will be executed by and between the City, SCVCOG and UPRR. The COM Agreement defines the roles and responsibilities of the City, SGVCOG and UPRR in the construction, maintenance and operation of the new grade separation project. SGVCOG, in coordination with UPRR, will construct the project and transfer the completed project to the City for operation and maintenance. The City will remain in close communication with SGVCOG throughout the construction of the project. In specific regards to operation and maintenance, the agreement specifies that the City will be responsible for the following:

- Operation and maintenance of the underpass substructure below the bridge seats, abutments, columns, roadway, sidewalks, roadway drainage systems, roadway lighting and landscaping, and any cosmetic features of the bridge (UPRR is responsible for the track infrastructure on top of the bridge)
- Graffiti removal
- Repairs/modifications and future replacement of the underpass

SCVCOG will manage the construction including public outreach. City staff will coordinate with SCVCOG throughout the duration of the project.

ENVIRONMENTAL

The San Gabriel Valley Council of Governments manages the design and construction of this project and serves as the Lead Agency, as defined by the California Environmental Quality Act (CEQA). Furthermore, grade separation projects, which eliminate an existing at-grade crossing or which reconstruct an existing grade separation, are statutorily exempt from CEQA pursuant to Section 21080.13 of the Public Resources Code.

DISCUSSION

The recommended agreement is the standard agreement that SGVCOG executes with cities and the railroad owner for the construction of rail grade separation projects. The body of the agreement (Attachment A) is in final form and has been reviewed and approved by the City Attorney. The exhibits to the agreement are in draft form and will be

finalized prior to the execution of the agreement, following a final review by the City Attorney. SGVCOG has requested approval of the agreement by the City Council at this time because it is required prior to regulatory and funding approvals required to prepare the project for construction bidding. Any substantial changes to the agreement following this approval, including substantial changes to any exhibits, will be returned for City Council consideration, at the City Attorney's recommendation, and likely would require the approval and execution of an amendment to the agreement.

SUMMARY

Upon approval by the City Council of the recommended actions, staff will coordinate execution of the agreement and continue coordination with the SGVCOG for the completion of the construction of the project, including public outreach leading up to and throughout the duration of construction.

ATTACHMENTS:

A. Attachment A - Construction, Operation and Maintenance Agreement No. 3974
B. Attachment B - Project Vicinity Map

City of Montebello
Agreement No. 3974

MONTEBELLO BOULEVARD UNDERPASS
CONSTRUCTION, OPERATION AND MAINTENANCE
STANDARD FORM AGREEMENT

THIS AGREEMENT (this "Agreement"), made this _____ day of_____, 2022 (the "Effective Date"), is by and among **UNION PACIFIC RAILROAD COMPANY**, a Delaware corporation, hereinafter termed the "**UNION PACIFIC**", the **SAN GABRIEL VALLEY COUNCIL OF GOVERNMENTS**, a joint powers authority of the State of California, hereinafter termed "**SGVCOG**", and the **CITY OF MONTEBELLO**, a California municipal corporation, hereinafter termed "**CITY**" in furtherance of the ALAMEDA CORRIDOR – EAST PROJECT.

R E C I T A L S

UNION PACIFIC is a railroad corporation operating through and local freight train movements over its Los Angeles Subdivision and Alhambra Subdivision main lines in the San Gabriel Valley area of Los Angeles County. **SGVCOG** was tasked with overseeing the Alameda Corridor - East Project (the "Project"), which includes elimination of at-grade street, road and highway crossings of **UNION PACIFIC's** main lines in the valley through construction of underpasses and overcrossings. The **CITY** has primary responsibility for, and jurisdiction over, Montebello Boulevard, which presently has an at-grade crossing of one of the **UNION PACIFIC** main lines identified by the California Public Utilities Commission ("CPUC") by Crossing No. 003 – 8.53 (Los Angeles Subdivision) and DOT No. 811074G.

The **CITY** and **SGVCOG** desire to undertake design, construction, operation and maintenance of a grade separation underpass structure as shown in attached Exhibit "A" (the "Underpass"). **SGVCOG** has already executed an agreement with the **CITY** authorizing **SGVCOG** to obtain approvals and permits from **UNION PACIFIC** on the **CITY's** behalf for design and construction of Underpass elements within the **CITY's** jurisdiction. That agreement allows the **CITY** and **SGVCOG** to jointly negotiate an agreement with **UNION PACIFIC** for operation and maintenance of the Underpass. **SGVCOG** (by virtue of an internal reorganization completed in January 2018) has succeeded to all contracts entered into by its former administrative subsidiary known as the Alameda Corridor – East Construction Authority, including but not limited to that certain Master Agreement Construction, Operation and Maintenance of Highway - Railroad Underpass, dated December 4, 2001 (the "Master Agreement") entered into with **UNION PACIFIC** for design, construction, operation and maintenance of the Underpass Project (as such term is defined in the Master Agreement).

NOW, THEREFORE, it is mutually agreed by and among the parties hereto as follows:

/
/
/

AGREEMENT

ARTICLE 1. GRANTS OF RIGHTS

1.01 **UNION PACIFIC** Grant of right to construct and maintain Underpass: In consideration of **SGVCOG's** and **CITY's** agreement to perform and abide by the covenants, terms and conditions of this Agreement, including Exhibits "A", "A-1", "A-2", "B", "C", and "C-1", which are attached hereto and hereby made a part hereof, **UNION PACIFIC** hereby grants to **SGVCOG**, and to the **CITY** to the extent necessary, the right to construct, and to the **CITY** and **SGVCOG,** the right to maintain, repair, rehabilitate and replace the Underpass on and within the property or properties generally shown in Exhibit "A-1" and described in Exhibit "A-2" (the "SGVCOG Easement Areas"). As of the Effective Date, the boundaries of the SGVCOG Easement Areas remain under review by the parties, and Exhibit "A-1" is in preliminary form and has not been finalized. The parties agree to use commercially reasonable efforts to finalize the boundaries of the SGVCOG Easement Areas and to revise Exhibit "A-1" and provide Exhibit "A-2" as necessary to accurately reflect the SGVCOG Easement Areas. Consideration to be paid by **SGVCOG** to **UNION PACIFIC** in connection with the SGVCOG Easement Areas shall be determined once the boundaries of the SGVCOG Easement Areas are finalized. Once Exhibit "A-1" and Exhibit "A-2" are revised and finalized, the preliminary version of Exhibit "A-1" attached to this Agreement as of the Effective Date shall be replaced with the final version of Exhibit "A-1" and Exhibit "A-2" shall be attached hereto and shall be incorporated herein. Approval of the final Exhibit "A-1" and Exhibit "A-2" to be attached to this Agreement shall not be deemed to have been given by **UNION PACIFIC** until **UNION PACIFIC's** Assistant Vice President - Real Estate, or his authorized representative, and shall not be deemed to be given by **SGVCOG** until **SGVCOG's** Chief Engineer, have each separately approved such exhibits in writing.

1.02 **UNION PACIFIC** Grant of Permanent Rights to SGVCOG Easement

Areas: Upon **SGVCOG's** payment to **UNION PACIFIC** of an amount of consideration to be determined by the parties in connection with finalizing the boundaries of the SGVCOG Easement Areas, **UNION PACIFIC**, by separate indenture, agrees to grant to the **CITY** and **SGVCOG**, an easement for permanent rights, as described in Exhibits "A-1" and "A-2" (as such exhibits are to be finalized pursuant to Section 1.01), to construct, maintain, repair, rehabilitate and replace the Underpass. This separate indenture must be fully executed by **UNION PACIFIC**, **SGVCOG**, and the **CITY** prior to commencement of construction of the Underpass.

1.03 **UNION PACIFIC** Grant of Temporary Rights: For good and valuable consideration, the receipt of which is hereby acknowledged, and in further consideration of **SGVCOG's** and the **CITY's** agreement to perform and abide by the covenants, terms and conditions of this Agreement, **UNION PACIFIC** hereby grants to **SGVCOG**, and to the **CITY** to the extent necessary, temporary rights to access the portion of **UNION PACIFIC's** property generally shown in Exhibit "A-1" (the "Temporary Construction Area") in connection with the initial construction of the Underpass and work related thereto. As of the Effective Date, the boundaries of the Temporary Construction Area remain under review by the parties. The parties agree to use commercially reasonable efforts to finalize the boundaries of the Temporary Construction Area, and any such revisions shall be incorporated into Exhibit "A-1" (as such exhibit is to be finalized pursuant to Section 1.01). Use of the Temporary Construction Area by **SGVCOG**, **SGVCOG's** contractors and, as applicable, the **CITY** and the **CITY's** contractors shall be subject to the terms and conditions of this Agreement and the obligation of **SGVCOG**, the **CITY** and each of their respective contractors, as applicable, to comply with such provisions. The temporary construction rights granted herein shall commence as of the date that the conditions precedent to commence construction of the Underpass as set forth in Article 5 below are satisfied and shall continue for a period of thirty-six (36) months, or until the Underpass has been completed, whichever occurs earlier.

1.04 Interpretation of Exhibit "B": The term "Political Body" as used in Exhibit "B" shall be construed to mean both **SGVCOG** and the **CITY**, collectively, except as the one is distinguished from the other within this Agreement. If there is a conflict between terms of this Agreement and Exhibit "B", this Agreement shall take precedence.

ARTICLE 2. INTENTIONALLY DELETED

ARTICLE 3. CONSTRUCTION - WORK TO BE PERFORMED BY UNION PACIFIC; RAILROAD CONTRIBUTION

3.01 Work to be performed by **UNION PACIFIC**: **UNION PACIFIC** shall perform the railroad work to the extent identified as UPRR work on Exhibit "A" (as such exhibit is to be finalized pursuant to Section 5.01(2)) or described in Exhibits "C" and "C-1". **UNION PACIFIC** shall make any and all changes, alterations or relocations, whether temporary or permanent, and may provide flagging using **UNION PACIFIC** personnel or approved third party flagging services and other protective services and devices, which in **UNION PACIFIC's** judgment may be or may become necessary or expedient because of the Underpass. Such work shall include, without limitation: (1) on two separate occasions, construction and lineover of track connections to two **SGVCOG**-constructed shoofly tracks, ballast and track hardware for the track connections and all appurtenances thereto; (2) removal of automatic grade crossing warning devices; train detection constant warning time devices and track circuits, any railroad related temporary and permanent signal and railroad communications facilities; (3) construction of two new mainline tracks including ballast; (4) lineover of train operations back to the main track; (5) final shifting of the two new mainline tracks into permanent location; and (6) temporary and final relocation of lubrication equipment all as shown in greater detail in Exhibit "A" and on final plans to be submitted by **SGVCOG**. The estimated quantities for **UNION PACIFIC's** work are shown in Exhibit "C" and said costs will be estimated using and will be billed in accordance with all

applicable regulatory requirements. All of **UNION PACIFIC's** costs incurred in performing such work as detailed in this section shall be reimbursed by **SGVCOG**, and the only contribution **UNION PACIFIC** shall make to the Underpass is set forth in Section 3.02 below.

3.02 Railroad's Contribution to Underpass Costs: In compliance with the provisions of the California Public Utilities Code Section 1202.5 and pursuant to the terms of the Master Agreement, **UNION PACIFIC** will bear ten percent (10%) of the cost of the theoretical structure due to the Underpass resulting in the elimination of the existing at-grade crossing (the "Railroad Contribution"). The parties have estimated the Railroad Contribution to be equal to SEVEN MILLION EIGHT HUNDRED TWENY THOUSAND THREE HUNDRED NINETY FOUR AND 33/100 DOLLARSS ($7,820,394.33) (the "Estimated Contribution") as more particularly set forth on Exhibit C-1, and the parties agree that the Estimated Contribution is a reasonable estimation of the cost of constructing the theoretical structure of the grade separated road under and across the rail corridor for the number of lanes of the traveled roadway in existence as of the Effective Date. In no event shall the Railroad Contribution exceed the Estimated Contribution. Upon completion of the Underpass and final calculation of total actual costs in connection with the Underpass, there shall be a true-up pursuant to the terms of Section 7.04 of the Master Agreement so that **UNION PACIFIC's** advances of the Estimated Contribution Amount made to **SGVCOG** shall not exceed the Railroad Contribution. The parties agree that except for the Railroad Contribution and **UNION PACIFIC's** maintenance related activities as provided in Article 6 below, **UNION PACIFIC** will not be obligated to make any other or further financial or in-kind contribution toward the Underpass or to repay in whole or in part any financing obtained by **SGVCOG** as part of the Underpass and/or the Project, as applicable. Notwithstanding any rights of **SGVCOG** set out in other agreements associated with the Underpass, including Sections 6.01 and 9.02 of this Agreement, **SGVCOG**, to the maximum extent permitted by applicable law, hereby expressly

releases, remises and discharges forever, and indemnifies, defends and holds harmless, **UNION PACIFIC**, its officers, employees, and agents, from any claim for payment or contributions by **UNION PACIFIC** to any aspect of the Underpass or the Project, and from any and all Losses which may have been or in the future may be incurred or suffered by **SGVCOG**, or its property, relating to or otherwise resulting from any demand on **UNION PACIFIC** by **SGVCOG** or by any governmental agency with respect to any obligation of **UNION PACIFIC** under any California statutes, regulations or rules applicable to allocation of costs incurred by **SGVCOG** for the Underpass or the Project. As used in this section, "Losses" means liabilities, losses, causes of action, penalties, demands, detriments, claims, damages, costs and judgments and all expenses incurred in connection with the Underpass or the Project (including reasonable attorneys' fees, costs and expenses). **SGVCOG**, after having read and been advised by legal counsel regarding the provisions of California Civil Code Section 1542 and in any and all similar statutes, rules and regulations and any other statute of the United States, hereby agrees, represents and warrants that the matters released in this Section 3.02 are not limited to the matters which are known or disclosed. California Civil Code Section 1542 reads as follows:

> A GENERAL RELEASE DOES NOT EXTEND TO CLAIMS WHICH THE CREDITOR DOES NOT KNOW OR SUSPECT TO EXIST IN HIS FAVOR AT THE TIME OF EXECUTING A RELEASE WHICH, IF KNOWN BY HIM, MUST HAVE MATERIALLY AFFECTED HIS SETTLEMENT WITH THE DEBTOR. **SGVCOG** HERETO EVIDENCES ITS SPECIFIC AGREEMENT TO THE TEAMS OF THIS RELEASE BY PLACING ITS INITIALS BELOW.

_____

SGVCOG Initials

SGVCOG hereby agrees, represents and warrants that it realizes and acknowledges that factual matters now unknown to it may have given or may hereafter give rise to causes of action, claims, demands, controversies,

damages, costs, losses and expenses which are presently unknown, unanticipated and unsuspected, and further agrees, represents and warrants that the releases contained in this Section 3.02 have been negotiated and agreed upon in light of that realization and that it nevertheless hereby intends to release and discharge **UNION PACIFIC** and its officers, employees, and agents from any such causes of action, claims, demands, controversies, damages, costs, losses and expenses.

ARTICLE 4. CONSTRUCTION - WORK TO BE PERFORMED BY SGVCOG

4.01 Work to be performed by **SGVCOG**: **SGVCOG**, at **SGVCOG's** sole cost and expense except for **UNION PACIFIC's** payment of the Railroad Contribution, shall (1) do all necessary grading and excavation for the Underpass; (2) construct the Underpass structure; (3) place fill and sub-ballast suitable for shoofly and permanent track construction; (4) construct and remove the track shoofly; (5) remove two mainline tracks, track ties, and ballast; (6) provide both temporary and permanent drainage facilities; and (7) perform all other work as shown in Exhibit "A" and as further described in the Plans (as such term is defined in Section 5.01(2) below), except for the work **UNION PACIFIC** herein agrees to do as generally put forth in Section 3.01 above and as shown on Exhibit "A" and described on Exhibit "C". The estimated costs of **SGVCOG's** work are shown in Exhibit "C-1".

(a) **SGVCOG** will advertise, bid and award a general construction contract that includes provisions for construction of shoofly tracks by a qualified railroad subcontractor as detailed in the Plans. The railroad subcontractor will procure rail, ties, ballast and other track hardware from **UNION PACIFIC's** approved vendors meeting all of **UNION PACIFIC's** engineering requirements and arrange for the transportation of such materials to the project site and shall arrange for the secure storage of such materials at the project site. Final preparation of sub-ballast, laying of ballast, on-site welding of rail, assembly of track, tamping and final surfacing of track shall be performed by **SGVCOG** to

UNION PACIFIC's satisfaction. **SGVCOG** will have on its construction management team qualified inspectors with experience in the construction of **UNION PACIFIC** railroad facilities. **UNION PACIFIC**, at **SGVCOG's** sole cost and expense, shall maintain the shoofly for the entire period during which the shoofly will be operational in connection with the initial construction of the Underpass. **SGVCOG** shall pay **UNION PACIFIC's** expenses associated with the shoofly maintenance in accordance with the payment process set forth in Section 7.04 of the Master Agreement. The limits of **SGVCOG's** work will be to active main clear points. During operation of trains over the shoofly tracks, **UNION PACIFIC** shall be the Federal Railroad Administration designated owner of the shoofly tracks. After lineover of train operations back to mainline tracks built over the Underpass bridge, **SGVCOG** will promptly remove shoofly rail, ties and all track material and ballast and arrange for their proper disposal or salvage. Fill material shall remain at **UNION PACIFIC's** request. **SGVCOG's** contractor shall use in-track welders to weld jointed rail if rail provided is not continuous welded rail (CWR).

(b) If **SGVCOG** or its contractor needs to bring any borrow material onto the job site to accomplish such grading and embankment work, the borrow material shall be first tested by **SGVCOG** or its contractor, at **SGVCOG's** sole expense, to determine if the borrow material is acceptable to **UNION PACIFIC** including, without limitation, ensuring (1) that the borrow material meets specifications and standards provided by **UNION PACIFIC** to **SGVCOG** and (2) that the borrow material does not contain any contamination or naturally occurring radiologic material or any other material deemed under any applicable current federal, state or local agency law, statute, rule or regulation to be of environmental concern.

4.02 If work is to be performed by contractor: **SGVCOG** shall require any and all of **SGVCOG's** prime contractors to complete, submit and have executed a **UNION PACIFIC** right-of-entry agreement as shown in Exhibit B, prior to prime

contractor's entry on to **UNION PACIFIC** property. **SGVCOG** will require its prime contractors to maintain an active and valid right-of-entry permit throughout the entire period of the prime contractors' activity on or occupancy of **UNION PACIFIC's** right-of-way.

4.03 Insurance: **SGVCOG** shall cause **SGVCOG's** contractors to procure the insurance required pursuant to Exhibit "B" and to provide (and maintain the validity of) certificates of insurance issued by their insurance carriers evidencing such required insurance coverage. The certificates of insurance shall indicate that the insurance policies contain endorsements specifically naming Union Pacific Railroad Company, Southern California Regional Rail Authority and the National Railroad Passenger Corporation as additionally-insured entities with respect to all liabilities arising out of the insured's performance of the work required for construction of the Underpass. **SGVCOG** shall forward copies of such certificates of insurance to be provided hereunder to **UNION PACIFIC** prior to entry onto **UNION PACIFIC** property by the **SGVCOG** contractor required to obtain such insurance pursuant to Exhibit "B".

ARTICLE 5. CONDITIONS PRECEDENT TO COMMENCEMENT OF CONSTRUCTION OF UNDERPASS:

5.01 Conditions Precedent: No work shall commence on any portion of the Underpass affecting **UNION PACIFIC's** property or operations until the following conditions precedent set forth in paragraphs (1) through (4) below are satisfied. The parties shall work cooperatively to satisfy such conditions precedent on or before March 1, 2021.

(1) Exhibits "A-1" and "A-2" are finalized as set forth in Article 1 above;

(2) Final 100% completed plans and specifications for the Underpass (the "Plans") have been approved by the parties, which such plans and specifications shall include all appurtenances, including without limitation, associated drainage in connection with the Underpass. **UNION PACIFIC** shall have the right to review and approve or disapprove all plans and specifications

and proposed changes thereto for the Underpass (including, without limitation, subsequent iterations of the plans and specifications) affecting **UNION PACIFIC's** property and/or operations, with respect to, *inter alia*, compliance with the standards below. **UNION PACIFIC's** scope of review of such plans and specifications shall include, *inter alia*, determining whether (a) the plans and specifications (preliminary and final) and/or changes meet all applicable then-current **UNION PACIFIC** standards and requirements, including, without limitation, American Railway Engineering and Maintenance of Way Association ("AREMA") standards and guidelines, as applicable; (b) the plans and specifications (preliminary and final) and/or changes meet the terms and conditions of **UNION PACIFIC's** then-existing agreements with third parties, and do not otherwise adversely impact the use or condition of **UNION PACIFIC's** property; and (c) there will be any interference with or danger to **UNION PACIFIC's** property or **UNION PACIFIC's** common carrier freight rail operations, during or after completion of the Underpass. Approval by **UNION PACIFIC** of the final 100% completed plans and specifications under this Section 5.01(2) shall not be deemed to have been given until **UNION PACIFIC's** Assistant Vice President Engineering-Design, or his authorized representative, has approved such plans and specifications in writing. As of the Effective Date, the parties acknowledge and agree that the final plans and specifications for the Underpass are still under review, and as such, Exhibit "A" has not been finalized. Once the final plans and specifications have been approved by the parties, the Plans shall be deemed incorporated into this Agreement be reference, and the Plans shall be used to finalize Exhibit "A", which final exhibit shall be attached hereto and shall be incorporated herein. Once approved by the parties, no changes to the Plans shall be made unless the parties consent to such changes in writing. **UNION PACIFIC's** review and approval of the Plans in no way relieves the **SGVCOG**, the **CITY** or any contractor from their responsibilities, obligations and/or liabilities under this Agreement, and will be given with the understanding that **UNION PACIFIC** makes no representations or warranties as to the validity, accuracy, legal compliance or completeness of

the Plans and that any reliance by **SGVCOG**, the **CITY** or any contractor on the Plans is at the risk of **SGVCOG**, the **CITY** and such contractor(s), as applicable.

(3) Grant of any permanent or temporary rights by and between **SGVCOG** and **UNION PACIFIC**, as applicable, in connection with, as applicable, the construction, maintenance, repair and use of any retaining walls (permanent or temporary), and drainage in connection with the Underpass or **UNION PACIFIC** right-of-way. As of the Effective Date, it is unknown what rights, if any, are required in connection with the Underpass given that the plans and specifications have not been finalized.

5.02 Waiver: Any party may agree to waive any of the conditions precedent set forth in Section 5.01 above; *provided*, *however*, *that* a party's decision to waive any condition for its benefit set forth in Section 5.01 shall be in such party's sole and absolute discretion and shall be in writing.

ARTICLE 6. OPERATION AND MAINTENANCE OF THE UNDERPASS:

6.01 By **UNION PACIFIC**: **UNION PACIFIC**, at its sole cost, shall operate and maintain the railroad related facilities, including without limitation, the rails, signals, ties, switches and ballast, and the waterproofing layer located above the bridge seats of the Underpass superstructure; with the exceptions that any Underpass roadway illumination and electrical appurtenances, or aesthetic or cosmetic design elements or painting added to superstructure soffits, or facades, will be maintained by **SGVCOG** or the **CITY** having jurisdiction for the road, street, or highway concerned.

6.02 By **SGVCOG** and **CITY**: **SGVCOG** shall operate and maintain the Underpass substructure below bridge seats, abutments, column bents, roadway, sidewalks, roadway drainage system, roadway lighting and landscaping, and any superstructure soffit or façade cosmetic elements, at its sole expense, until such time as the **CITY** accepts ownership and operational and maintenance responsibilities as provided for in the **SGVCOG** – **CITY**

agreement. **SGVCOG** will provide written notification to **UNION PACIFIC** when **SGVCOG** relinquishes to the **CITY** these operational and maintenance responsibilities.

6.03 Major Maintenance: For maintenance or other activities by **SGVCOG** or the **CITY**, as applicable, of its portion of the Underpass which could affect on-track operations by **UNION PACIFIC** or otherwise affect the railroad operating environment, as further described in Exhibit B, **SGVCOG** or the **CITY**, as applicable, will first notify **UNION PACIFIC** in advance of the proposed activity and obtain railroad flagging, inspection and other protective services as deemed necessary by **UNION PACIFIC.**

6.04 Graffiti Removal: Notwithstanding the provisions of this Article 6 or of Exhibit B attached hereto, the parties specifically agree that graffiti removal from or overpainting of all component surfaces of the overall Underpass, and including without limitation the Underpass superstructure and substructure (*i.e.*, above and below the bridge seats), along with the overall appearance of the bridge structure and the surrounding property, including vegetation control around the structure shall be the responsibility of **SGVCOG** and the **CITY** in their sole and exclusive discretion, and **UNION PACIFIC** shall have no obligations whatsoever with regard to graffiti removal or the appearance of those areas. Before entering upon the track area of the Underpass superstructure to perform graffiti removal or overpainting or any other activities, **SGVCOG** and/or the **CITY** shall notify **UNION PACIFIC** sufficiently in advance, and **UNION PACIFIC** shall provide a flagger, at **UNION PACIFIC's** sole expense, as reasonably required for the safety of workers and trains.

ARTICLE 7. FUTURE RECONSTRUCTION OR ALTERATION OF THE UNDERPASS

For the purposes of apportioning costs of any future reconstruction or alteration of the Underpass under the provisions of the California Public Utilities Code, including Section 1202.5, **SGVCOG**, **UNION PACIFIC** and the **CITY** herein state that notwithstanding any provision of the California Public

Utilities Code, including Section 1202.5, to the contrary, **SGVCOG**, **UNION PACIFIC** and the **CITY** acknowledge and agree that any future reconstruction or alteration of the Underpass shall be deemed to provide no ascertainable net benefit to **UNION PACIFIC** and will not require cost participation by **UNION PACIFIC**.

ARTICLE 8. INTENTIONALLY DELETED

ARTICLE 9. MUTUAL INDEMNIFICATION AND HOLD HARMLESS CLAUSE

9.01 By **SGVCOG**: Neither **UNION PACIFIC** nor the **CITY**, or any of their respective board members, elected officials, shareholders, officers, employees, agents, or contractors, shall be responsible for any damage or liability occurring by reason of any acts or omissions on the part of **SGVCOG** under or in connection with any work, authority or jurisdiction delegated to **SGVCOG** under this Agreement. The parties understand and agree that **SGVCOG** shall fully indemnify, defend and hold **UNION PACIFIC** and the **CITY**, and their respective board members, elected officials, shareholders, officers, employees, agents, and contractors harmless from any and all liability, loss, expense (including reasonable attorneys' fees and other defense costs), or claims imposed for damages of any nature whatsoever, including but not limited to, bodily injury, death, personal injury, or property damage occurring by reason of any acts or omissions on the part of **SGVCOG** or its board, officers, employees, agents, contractors, or volunteers under or in connection with any work, authority or jurisdiction delegated to **SGVCOG** under this Agreement. This indemnity shall survive termination of this Agreement.

9.02 By **UNION PACIFIC**: Neither **SGVCOG** nor the **CITY**, or any of their respective board members, elected officials, officers, employees, agents, contractors, or volunteers, shall be responsible for any damage or liability occurring by reason of any acts or omissions on the part of **UNION PACIFIC** under or in connection with any work, authority or jurisdiction delegated to **UNION PACIFIC** under this Agreement. The parties understand and agree that

UNION PACIFIC shall fully indemnify, defend and hold **SGVCOG** and the **CITY**, and their respective board members, elected officials, officers, employees, agents, contractors, and volunteers harmless from any and all liability, loss, expense (including reasonable attorneys' fees and other defense costs), or claims imposed for damages of any nature whatsoever, including but not limited to, bodily injury, death, personal injury, or property damage occurring by reason of any acts or omissions on the part of **UNION PACIFIC** or its board, shareholders, officers, employees, agents, or contractors under or in connection with any work, authority or jurisdiction delegated to **UNION PACIFIC** under this Agreement. This indemnity shall survive termination of this Agreement.

9.03 By **CITY**: Neither **UNION PACIFIC** nor **SGVCOG**, or any of their respective board members, elected officials, shareholders, officers, employees, agents, or contractors, shall be responsible for any damage or liability occurring by reason of any acts or omissions on the part of the **CITY** under or in connection with any work, authority or jurisdiction delegated to the **CITY** under this Agreement. The parties understand and agree that the **CITY** shall fully indemnify, defend and hold **UNION PACIFIC** and **SGVCOG**, and their respective board members, elected officials, shareholders, officers, employees, agents, and contractors harmless from any and all liability, loss, expense (including reasonable attorneys' fees and other defense costs), or claims imposed for damages of any nature whatsoever, including but not limited to, bodily injury, death, personal injury, or property damage occurring by reason of any acts or omissions on the part of the **CITY** or its elected officials, officers, employees, agents, contractors, or volunteers under or in connection with any work, authority or jurisdiction delegated to the **CITY** under this Agreement. This indemnity shall survive termination of this Agreement.

ARTICLE 10. TERM

This Agreement shall become effective as the Effective Date, and shall continue in full force and effect until terminated by mutual consent by the parties.

ARTICLE 11. SUCCESSORS AND ASSIGNS

The covenants and provisions of the foregoing instrument shall be binding upon and inure to the benefit of the successors and assigns of **UNION PACIFIC**, **SGVCOG** and the **CITY**.

ARTICLE 12. ENTIRE AGREEMENT; CONFLICTS

This Agreement and the exhibits attached hereto and made a part hereof (whether attached on or before the Effective Date or attached following the Effective Date pursuant to the terms of this Agreement) and the Master Agreement constitute the entire understanding between **UNION PACIFIC**, **SGVCOG** and the **CITY** and cancel and supersede any prior negotiations, understandings or agreements, whether written or oral, with respect to the Underpass. To the extent that there is any conflict between the terms and conditions of the Master Agreement and this Agreement (including the exhibits attached hereto and made a part hereof) with respect to the Underpass, the terms and conditions of this Agreement shall control.

ARTICLE 13. SEVERABILITY

If any term or provision of this Agreement or the application thereof to any person or circumstance shall, to any extent, be invalid or unenforceable, then such term or provision shall be amended to, and solely to, the extent necessary to cure such invalidity or unenforceability, and in its amended form shall be enforceable. In such event, the remainder of this Agreement, or the application of such term or provision to persons or circumstances other than those as to which it is held invalid or unenforceable, shall not be affected thereby, and each term and provision of this Agreement shall be valid and be enforced to the fullest extent permitted by law.

ARTICLE 14. COUNTERPARTS

This Agreement may be executed in multiple counterparts, each of which shall be deemed an original, but all of which taken together shall constitute one and the same instrument.

ARTICLE 15. CAPTIONS

The captions appearing at the commencement of the sections hereof, and in any paragraph thereof, are descriptive only and shall have no significance in the interpretation of this Agreement.

ARTICLE 16. WAIVER

The waiver by **UNION PACIFIC**, **SGVCOG** or the **CITY**, of any breach of a term, covenant or condition herein contained shall not be deemed to be a waiver of any other term, covenant or condition or of any subsequent breach of the same or any other term, covenant or condition herein contained. No term, covenant or condition of this Agreement shall be deemed to have been waived by **UNION PACIFIC**, **SGVCOG** or the **CITY** unless in writing.

IN WITNESS WHEREOF the parties hereto have duly executed this Agreement to be effective as of the Effective Date.

LIST OF EXHIBITS TO BE ATTACHED TO MONTEBELLO BLVD UNDERPASS STANDARD FORM AGREEMENT

Exhibit A: Plan sheets prepared by **SGVCOG** showing track alignment concepts and the bridge general plan. These plans will be replaced with approved plans by way of amendment to this agreement.

Exhibit A-1: Three (3) 11" x 17" sheets showing right-of-way owned by or under the control of **UNION PACIFIC** needed for construction of the Underpass. These sheets show permanent encroachments required for the Underpass and the Temporary Construction Area. These plans will be replaced with approved plans by way of amendment to this agreement.

Exhibit A-2: Legal descriptions and plats of **UNION PACIFIC** right-of-way shown in Exhibit A-1.

Exhibit B: **UNION PACIFIC** Right-of-Entry Form/Insurance standard exhibits.

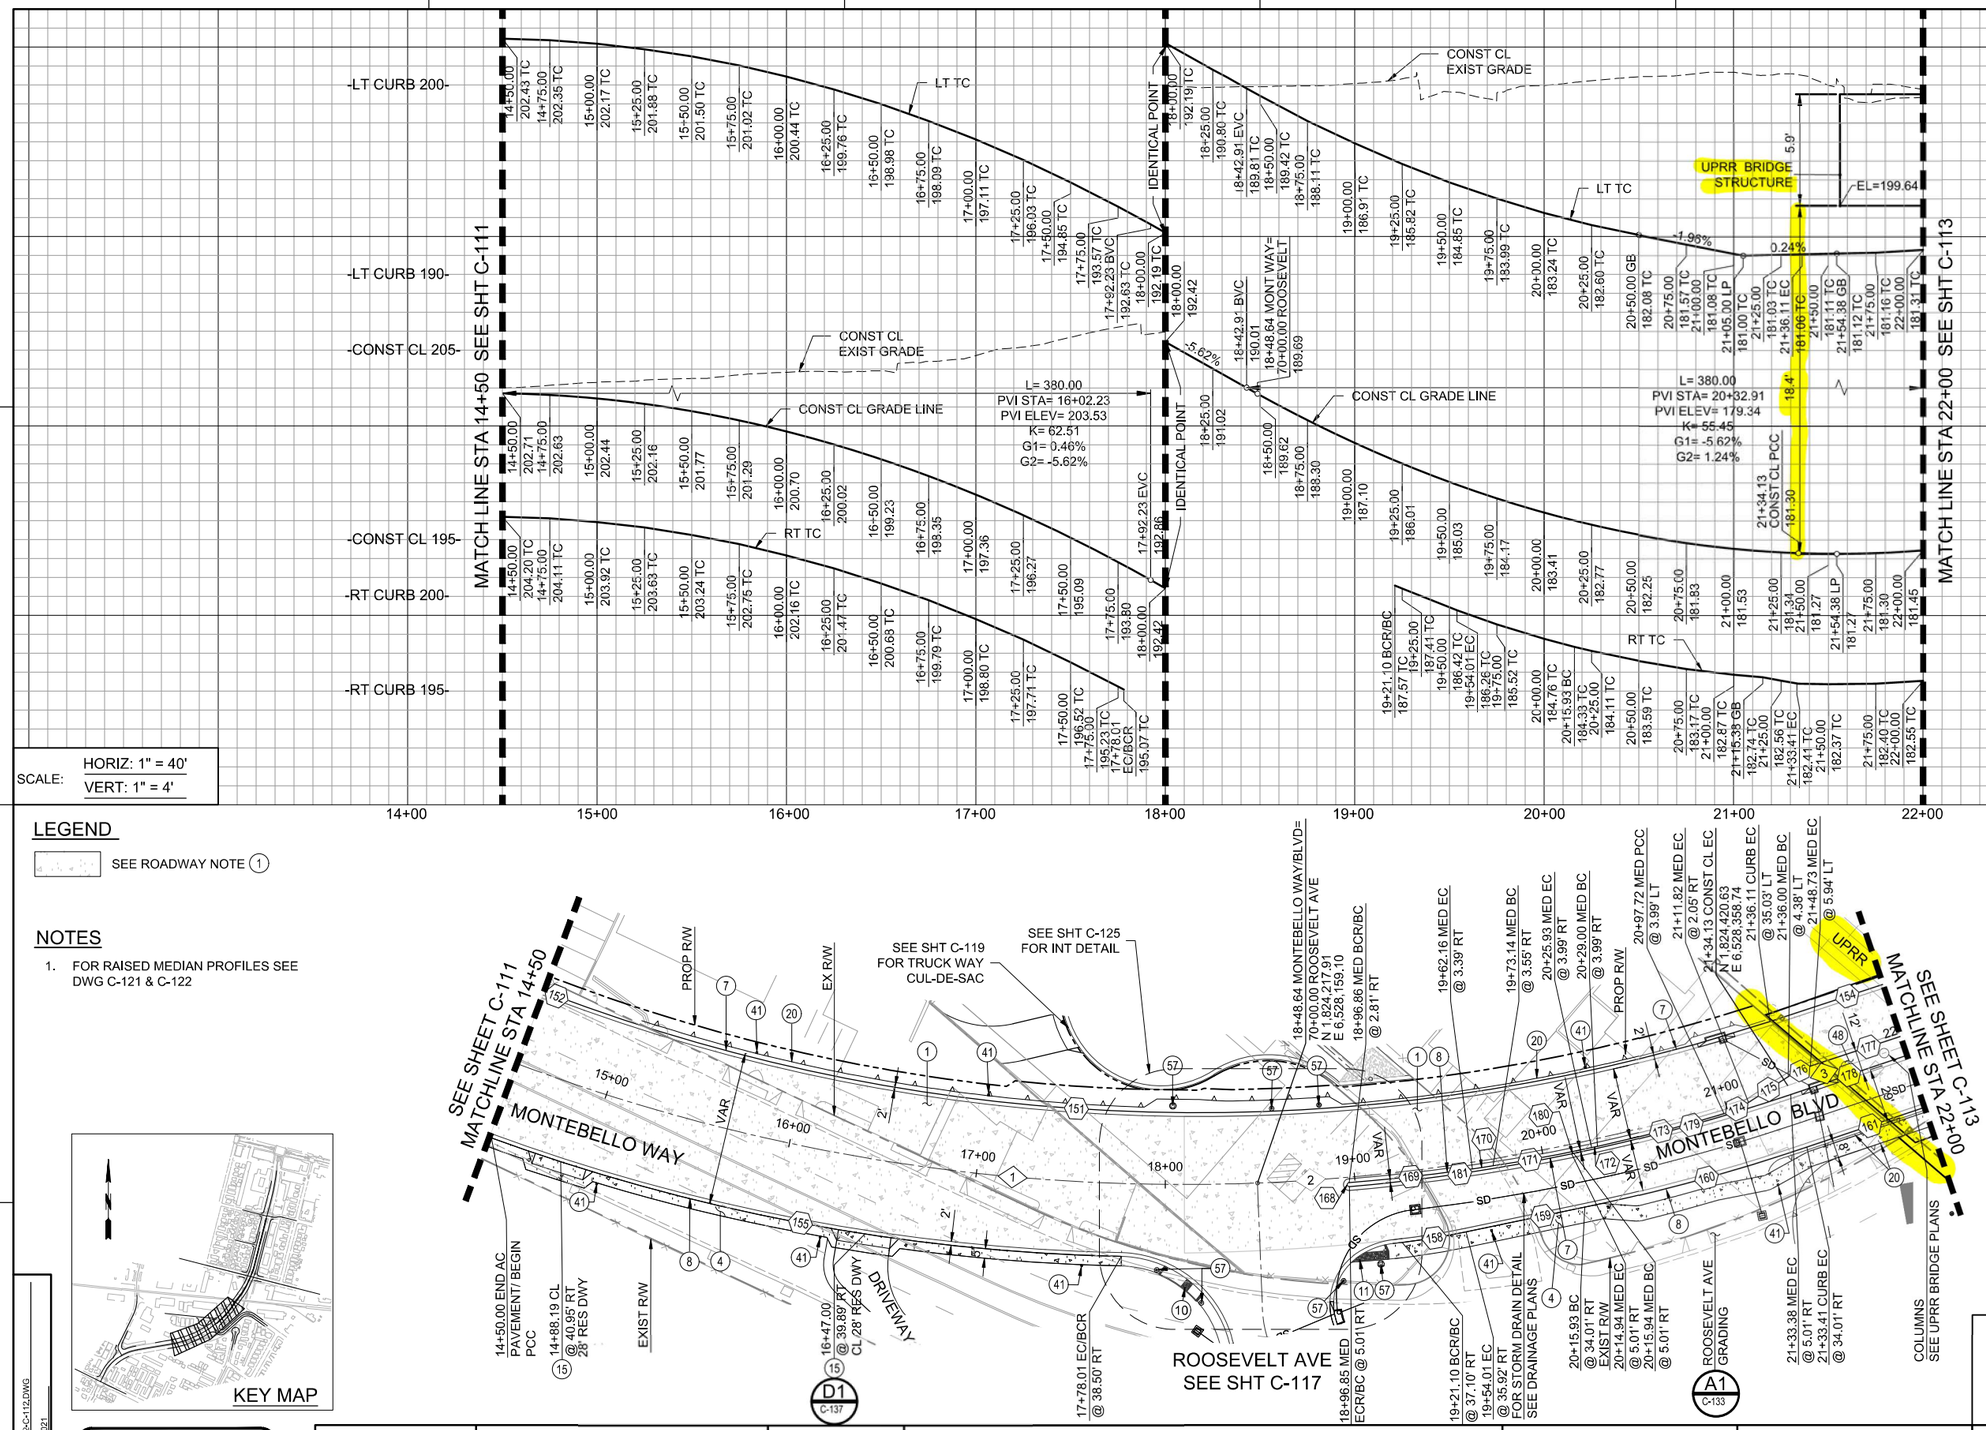

Exhibit C: **UNION PACIFIC's** estimate of its force account, material and equipment quantities for construction of the Underpass. The final version of this exhibit shall be added to this agreement by way of amendment.

Exhibit C-1: **SGVCOG's** estimate of those portions of the Underpass subject to railroad cost participation requirements in accordance with California Public Utilities Code Section 1202.5. These portions include preliminary engineering, right-of-way acquisition, construction for an underpass structure and roadway approaches required to transition up to existing road profiles, for the number of lanes on the existing road and in accordance with current State of California design standards, construction management and program management. The final version of this exhibit shall be added to this agreement by way of amendment.

Legal Descriptions and Plats for Permanent Easements and Encroachments

GUIDA SURVEYING, INC.

EXHIBIT "A-2"

Legal Description For Roadway Easement Purposes
SGVCOG Parcel No. 209UPRR 1

That portion of the Los Angeles and Salt Lake Railroad right-of-way, 100.00 feet wide, in the City of Montebello, County of Los Angeles, State of California, together with that portion of Montebello Boulevard, variable width, being more particularly described as follows:

Beginning at the intersection of the Southerly Right-of-Way line of said Railroad and the Westerly line of the Highway Easement granted to the City of Montebello as described in the document recorded August 13, 1974 as Instrument no. 3097, of Official Records, in the Office of the County Recorder of said County;

Thence along the Easterly prolongation of said Southerly Right-of-Way line South 83°59'58" East, 18.93 feet;

Thence leaving said Easterly prolongation of the Southerly Right-of-Way line North 36°23'03" East, 115.92 feet to the Easterly prolongation of the Northerly Right-of-Way line of said Railroad;

Thence along said Easterly prolongation of the Northerly Right-of-Way line and said Northerly Right-of-Way line North 83°59'58" West, 132.15 feet to a line that is parallel with and 114.00 feet Northwesterly, measured at right angles, of the course described above as *"North 36°23'03" East, 115.92 feet"*;

Thence leaving said Northerly Right-of-Way line and along said parallel line South 36°23'03" West, 115.92 feet to said Southerly Right-of-Way line;

Thence leaving said parallel line and along said Southerly Right-of-Way line South 83°59'58" East, 113.22 feet to the **Point of Beginning**.

Containing 13,215 square feet.

All as shown on Exhibit "B" attached hereto and made a part hereof.

This legal description is not intended to be used in conveyance of land in violation of the Subdivision Map Act of the State of California.

"Right-of-Entry Form/Insurance and B-1 Requirements"

Folder No.:

UPRR Audit No.:

CONTRACTOR'S RIGHT OF ENTRY AGREEMENT

THIS AGREEMENT is made and entered into as of the _____ day of _____, 20__, by and between **UNION PACIFIC RAILROAD COMPANY**, a Delaware corporation ("Railroad"); and

_____ (*Name of Contractor*)

a _____ corporation ("Contractor").

RECITALS:

Contractor has been hired by the _____("Public Entity") to perform work relating to the _____at-grade public road crossing with all or a portion of such work to be performed on property of Railroad in the vicinity of the Railroad's Mile Post _____ (DOT _____) on its Subdivision in or near _____, _____ County, _____, as such location is in the general location shown on the Railroad Location Print marked **Exhibit A**, attached hereto and hereby made a part hereof, which work is the subject of a contract dated _____, between the Railroad and the Public Entity.

The Railroad is willing to permit the Contractor to perform the work described above at the location described above subject to the terms and conditions contained in this Agreement

AGREEMENT:

NOW, THEREFORE, it is mutually agreed by and between Railroad and Contractor, as follows:

ARTICLE 1 - DEFINITION OF CONTRACTOR.

For purposes of this Agreement, all references in this agreement to Contractor shall include Contractor's contractors, subcontractors, officers, agents and employees, and others acting under its or their authority.

ARTICLE 2 - RIGHT GRANTED; PURPOSE.

Railroad hereby grants to Contractor the right, during the term hereinafter stated and upon and subject to each and all of the terms, provisions and conditions herein contained, to enter upon and have ingress to and egress from the property described in the Recitals for the purpose of performing the work described in the Recitals above. The right herein granted to Contractor is

limited to those portions of Railroad's property specifically described herein, or as designated by the Railroad Representative named in Article 4.

ARTICLE 3 - TERMS AND CONDITIONS CONTAINED IN EXHIBITS B, C & D.

The General Terms and Conditions contained in **Exhibit B**, the Insurance Requirements contained in **Exhibit C**, and the Minimum Safety Requirements contained in **Exhibit D**, each attached hereto, are hereby made a part of this Agreement.

ARTICLE 4 - ALL EXPENSES TO BE BORNE BY CONTRACTOR; RAILROAD REPRESENTATIVE.

A. Contractor shall bear any and all costs and expenses associated with any work performed by Contractor, or any costs or expenses incurred by Railroad relating to this Agreement.

B. Contractor shall coordinate all of its work with the following Railroad representative or his or her duly authorized representative (the "Railroad Representative"):

C. Contractor, at its own expense, shall adequately police and supervise all work to be performed by Contractor and shall ensure that such work is performed in a safe manner as set forth in Section 7 of **Exhibit B**. The responsibility of Contractor for safe conduct and adequate policing and supervision of Contractor's work shall not be lessened or otherwise affected by Railroad's approval of plans and specifications involving the work, or by Railroad's collaboration in performance of any work, or by the presence at the work site of a Railroad Representative, or by compliance by Contractor with any requests or recommendations made by Railroad Representative.

ARTICLE 5 - SCHEDULE OF WORK ON A MONTHLY BASIS.

The Contractor, at its expense, shall provide on a monthly basis a detailed schedule of work to the Railroad Representative named in Article 4B above. The reports shall start at the execution of this Agreement and continue until this Agreement is terminated as provided in this Agreement or until the Contractor has completed all work on Railroad's property.

ARTICLE 6 - TERM; TERMINATION.

A. The grant of right herein made to Contractor shall commence on the date of this Agreement, and continue until _____, unless sooner terminated as herein
(Expiration Date)

provided, or at such time as Contractor has completed its work on Railroad's property, whichever is earlier. Contractor agrees to notify the Railroad Representative in writing when it has completed its work on Railroad's property.

B. This Agreement may be terminated by either party on ten (10) days written notice to the other party.

ARTICLE 7 - CERTIFICATE OF INSURANCE.

A. Before commencing any work, Contractor will provide Railroad with the (i) insurance binders, policies, certificates and endorsements set forth in **Exhibit C** of this Agreement, and (ii) the insurance endorsements obtained by each subcontractor as required under Section 12 of **Exhibit B** of this Agreement.

B. All insurance correspondence, binders, policies, certificates and endorsements shall be sent to:

Union Pacific Railroad Company
Real Estate Department
1400 Douglas Street, MS 1690
Omaha, NE 68179-1690
*UPRR Folder No.:*_____

ARTICLE 8 - DISMISSAL OF CONTRACTOR'S EMPLOYEE.

At the request of Railroad, Contractor shall remove from Railroad's property any employee of Contractor who fails to conform to the instructions of the Railroad Representative in connection with the work on Railroad's property, and any right of Contractor shall be suspended until such removal has occurred. Contractor shall indemnify Railroad against any claims arising from the removal of any such employee from Railroad's property.

ARTICLE 9 - CROSSINGS.

No additional vehicular crossings (including temporary haul roads) or pedestrian crossings over Railroad's trackage shall be installed or used by Contractor without the prior written permission of Railroad.

ARTICLE 10 - CROSSINGS; COMPLIANCE WITH MUTCD AND FRA GUIDELINES.

A. No additional vehicular crossings (including temporary haul roads) or pedestrian crossings over Railroad's trackage shall be installed or used by Contractor without the prior written permission of Railroad.

B. Any permanent or temporary changes, including temporary traffic control, to crossings must conform to the Manual of Uniform Traffic Control Devices (MUTCD) and any applicable Federal Railroad Administration rules, regulations and guidelines, and must be reviewed by the Railroad prior to any changes being implemented. In the event the Railroad is found to be out of compliance with federal safety regulations due to the Contractor's modifications, negligence, or any other reason arising from the Contractor's presence on the Railroad's property, the Contractor agrees to assume liability for any civil penalties imposed upon the Railroad for such

noncompliance.

ARTICLE 11 - EXPLOSIVES.

Explosives or other highly flammable substances shall not be stored or used on Railroad's property without the prior written approval of Railroad.

IN WITNESS WHEREOF, the parties hereto have duly executed this agreement in duplicate as of the date first herein written.

EXHIBIT B

TO CONTRACTOR'S RIGHT OF ENTRY AGREEMENT

GENERAL TERMS & CONDITIONS

Section 1. NOTICE OF COMMENCEMENT OF WORK - FLAGGING.

A. Contractor agrees to notify the Railroad Representative at least thirty (30) working days in advance of Contractor commencing its work and at least ten (10) working days in advance of proposed performance of any work by Contractor in which any person or equipment will be within twenty-five (25) feet of any track, or will be near enough to any track that any equipment extension (such as, but not limited to, a crane boom) will reach to within twenty-five (25) feet of any track. No work of any kind shall be performed, and no person, equipment, machinery, tool(s), material(s), vehicle(s), or thing(s) shall be located, operated, placed, or stored within twenty-five (25) feet of any of Railroad's track(s) at any time, for any reason, unless and until a Railroad flagman is provided to watch for trains. Upon receipt of such ten (10)-day notice, the Railroad Representative will determine and inform Contractor whether a flagman need be present and whether Contractor needs to implement any special protective or safety measures. If flagging or other special protective or safety measures are performed by Railroad, Railroad will bill Contractor for such expenses incurred by Railroad, unless Railroad and a federal, state or local governmental entity have agreed that Railroad is to bill such expenses to the federal, state or local governmental entity. If Railroad will be sending the bills to Contractor, Contractor shall pay such bills within thirty (30) days of Contractor's receipt of billing. If Railroad performs any flagging, or other special protective or safety measures are performed by Railroad, Contractor agrees that Contractor is not relieved of any of its responsibilities or liabilities set forth in this Agreement.

B. The rate of pay per hour for each flagman will be the prevailing hourly rate in effect for an eight-hour day for the class of flagmen used during regularly assigned hours and overtime in accordance with Labor Agreements and Schedules in effect at the time the work is performed. In addition to the cost of such labor, a composite charge for vacation, holiday, health and welfare, supplemental sickness, Railroad Retirement and unemployment compensation, supplemental pension, Employees Liability and Property Damage and Administration will be included, computed on actual payroll. The composite charge will be the prevailing composite charge in effect at the time the work is performed. One and one-half times the current hourly rate is paid for overtime, Saturdays and Sundays, and two and one-half times current hourly rate for holidays. Wage rates are subject to change, at any time, by law or by agreement between Railroad and its employees, and may be retroactive as a result of negotiations or a ruling of an authorized governmental agency. Additional charges on labor are also subject to change. If the wage rate or additional charges are changed, Contractor (or the governmental entity, as applicable) shall pay on the basis of the new rates and charges.

C. Reimbursement to Railroad will be required covering the full eight-hour day during which any flagman is furnished, unless the flagman can be assigned to other Railroad work during a portion of such day, in which event reimbursement will not be required for the portion of the day during which the flagman is engaged in other Railroad work. Reimbursement will also be required for any day not actually worked by the flagman following the flagman's assignment to work on the project for which Railroad is required to pay the flagman and which could not reasonably be avoided by Railroad by assignment of such flagman to other work , even though Contractor may not be working during such time. When it becomes necessary for Railroad to bulletin and assign an employee to a flagging position in compliance with union collective bargaining agreements, Contractor must provide Railroad a minimum of five (5) days notice prior to the cessation of the need for a flagman. If five (5) days notice of cessation is not given, Contractor will still be required to pay flagging charges for the five (5) day notice period required by union agreement to be given to the employee, even though flagging is not required for that period. An additional ten (10) days notice must then be given to Railroad if flagging services are needed again after such five day cessation notice has been given to Railroad.

Section 2. LIMITATION AND SUBORDINATION OF RIGHTS GRANTED

A. The foregoing grant of right is subject and subordinate to the prior and continuing right and obligation of the Railroad to use and maintain its entire property including the right and power of Railroad to construct, maintain, repair, renew, use, operate, change, modify or relocate railroad tracks, roadways, signal, communication, fiber optics, or other wirelines, pipelines and other facilities upon, along or across any or all parts of its property, all or any of which may be freely done at any time or times by Railroad without liability to Contractor or to any other party for compensation or damages.

B. The foregoing grant is also subject to all outstanding superior rights (including those in favor of licensees and lessees of Railroad's property, and others) and the right of Railroad to renew and extend the same, and is made without covenant of title or for quiet enjoyment.

Section 3. NO INTERFERENCE WITH OPERATIONS OF RAILROAD AND ITS TENANTS.

A. Contractor shall conduct its operations so as not to interfere with the continuous and uninterrupted use and operation of the railroad tracks and property of Railroad, including without limitation, the operations of Railroad's lessees, licensees or others, unless specifically authorized in advance by the Railroad Representative. Nothing shall be done or permitted to be done by Contractor at any time that would in any manner impair the safety of such operations. When not in use, Contractor's machinery and materials shall be kept at least fifty (50) feet from the centerline of Railroad's nearest track, and there shall be no vehicular crossings of Railroads tracks except at existing open public crossings.

B. Operations of Railroad and work performed by Railroad personnel and delays in the work to be performed by Contractor caused by such railroad operations and work are expected by Contractor, and Contractor agrees that Railroad shall have no liability to Contractor, or any other person or entity for any such delays. The Contractor shall coordinate its activities with those of Railroad and third parties so as to avoid interference with railroad operations. The safe operation of Railroad train movements and other activities by Railroad takes precedence over any work to be performed by Contractor.

Section 4. LIENS.

Contractor shall pay in full all persons who perform labor or provide materials for the work to be performed by Contractor. Contractor shall not create, permit or suffer any mechanic's or materialmen's liens of any kind or nature to be created or enforced against any property of Railroad for any such work performed. Contractor shall indemnify and hold harmless Railroad from and against any and all liens, claims, demands, costs or expenses of whatsoever nature in any way connected with or growing out of such work done, labor performed, or materials furnished. If Contractor fails to promptly cause any lien to be released of record, Railroad may, at its election, discharge the lien or claim of lien at Contractor's expense.

Section 5. PROTECTION OF FIBER OPTIC CABLE SYSTEMS.

A. Fiber optic cable systems may be buried on Railroad's property. Protection of the fiber optic cable systems is of extreme importance since any break could disrupt service to users resulting in business interruption and loss of revenue and profits. Contractor shall telephone Railroad during normal business hours (7:00 a.m. to 9:00 p.m. Central Time, Monday through Friday, except holidays) at 1-800-336-9193 (also a 24-hour, 7-day number for emergency calls) to determine if fiber optic cable is buried anywhere on Railroad's property to be used by Contractor. If it is, Contractor will telephone the telecommunications company(ies) involved, make arrangements for a cable locator and, if applicable, for relocation or other protection of the fiber optic cable. Contractor shall not commence any work until all such protection or relocation (if applicable) has been accomplished.

B. In addition to other indemnity provisions in this Agreement, Contractor shall indemnify, defend and hold Railroad harmless from and against all costs, liability and expense whatsoever (including, without limitation, attorneys' fees, court costs and expenses) arising out of any act or omission of Contractor, its agents and/or employees, that causes or contributes to (1) any damage to or destruction of any telecommunications system on Railroad's property, and/or (2) any injury to or death of any person employed by or on behalf of any telecommunications company, and/or its contractor, agents and/or employees, on Railroad's property. Contractor shall not have or seek recourse against Railroad for any claim or cause of action for alleged loss of profits or revenue or loss of service or other consequential damage to a telecommunication company using Railroad's property or a customer or user of services of the fiber optic cable on Railroad's property.

Section 6. PERMITS - COMPLIANCE WITH LAWS.

In the prosecution of the work covered by this Agreement, Contractor shall secure any and all necessary permits and shall comply with all applicable federal, state and local laws, regulations and enactments affecting the work including, without limitation, all applicable Federal Railroad Administration regulations.

Section 7. SAFETY.

A. Safety of personnel, property, rail operations and the public is of paramount importance in the prosecution of the work performed by Contractor. Contractor shall be responsible for initiating, maintaining and supervising all safety, operations and programs in connection with the work. Contractor shall at a minimum comply with Railroad's safety standards listed in

Exhibit D, hereto attached, to ensure uniformity with the safety standards followed by Railroad's own forces. As a part of Contractor's safety responsibilities, Contractor shall notify Railroad if Contractor determines that any of Railroad's safety standards are contrary to good safety practices. Contractor shall furnish copies of **Exhibit D** to each of its employees before they enter the job site.

B. Without limitation of the provisions of paragraph A above, Contractor shall keep the job site free from safety and health hazards and ensure that its employees are competent and adequately trained in all safety and health aspects of the job.

C. Contractor shall have proper first aid supplies available on the job site so that prompt first aid services may be provided to any person injured on the job site. Contractor shall promptly notify Railroad of any U.S. Occupational Safety and Health Administration reportable injuries. Contractor shall have a nondelegable duty to control its employees while they are on the job site or any other property of Railroad, and to be certain they do not use, be under the influence of, or have in their possession any alcoholic beverage, drug or other substance that may inhibit the safe performance of any work.

D. If and when requested by Railroad, Contractor shall deliver to Railroad a copy of Contractor's safety plan for conducting the work (the "Safety Plan"). Railroad shall have the right, but not the obligation, to require Contractor to correct any deficiencies in the Safety Plan. The terms of this Agreement shall control if there are any inconsistencies between this Agreement and the Safety Plan.

Section 8. INDEMNITY.

A. To the extent not prohibited by applicable statute, Contractor shall indemnify, defend and hold harmless Railroad, its affiliates, and its and their officers, agents and employees (individually an "Indemnified Party" or collectively "Indemnified Parties") from and against any and all loss, damage, injury, liability, claim, demand, cost or expense (including, without limitation, attorney's, consultant's and expert's fees, and court costs), fine or penalty (collectively, "Loss") incurred by any person (including, without limitation, any Indemnified Party, Contractor, or any employee of Contractor or of any Indemnified Party) arising out of or in any manner connected with (i) any work performed by Contractor, or (ii) any act or omission of Contractor, its officers, agents or employees, or (iii) any breach of this Agreement by Contractor.

B. The right to indemnity under this Section 8 shall accrue upon occurrence of the event giving rise to the Loss, and shall apply regardless of any negligence or strict liability of any Indemnified Party, except where the Loss is caused by the sole active negligence of an Indemnified Party as established by the final judgment of a court of competent jurisdiction. The sole active negligence of any Indemnified Party shall not bar the recovery of any other Indemnified Party.

C. Contractor expressly and specifically assumes potential liability under this Section 8 for claims or actions brought by Contractor's own employees. Contractor waives any immunity it may have under worker's compensation or industrial insurance acts to indemnify the Indemnified Parties under this Section 8. Contractor acknowledges that this waiver was mutually negotiated by the parties hereto.

D. No court or jury findings in any employee's suit pursuant to any worker's compensation act or the Federal Employers' Liability Act against a party to this Agreement may be relied upon or used by Contractor in any attempt to assert liability against any Indemnified Party.

E. The provisions of this Section 8 shall survive the completion of any work performed by Contractor or the termination or expiration of this Agreement. In no event shall this Section 8 or any other provision of this Agreement be deemed to limit any liability Contractor may have to any Indemnified Party by statute or under common law.

Section 9. RESTORATION OF PROPERTY.

In the event Railroad authorizes Contractor to take down any fence of Railroad or in any manner move or disturb any of the other property of Railroad in connection with the work to be performed by Contractor, then in that event Contractor shall, as soon as possible and at Contractor's sole expense, restore such fence and other property to the same condition as the same were in before such fence was taken down or such other property was moved or disturbed. Contractor shall remove all of Contractor's tools, equipment, rubbish and other materials from Railroad's property promptly upon completion of the work, restoring Railroad's property to the same state and condition as when Contractor entered thereon.

Section 10. WAIVER OF DEFAULT.

Waiver by Railroad of any breach or default of any condition, covenant or agreement herein contained to be kept, observed and performed by Contractor shall in no way impair the right of Railroad to avail itself of any remedy for any subsequent breach or default.

Section 11. MODIFICATION - ENTIRE AGREEMENT.

No modification of this Agreement shall be effective unless made in writing and signed by Contractor and Railroad. This Agreement and the exhibits attached hereto and made a part hereof constitute the entire understanding between Contractor and Railroad and cancel and supersede any prior negotiations, understandings or agreements, whether written or oral, with respect to the work to be performed by Contractor.

Section 12. ASSIGNMENT - SUBCONTRACTING.

Contractor shall not assign or subcontract this Agreement, or any interest therein, without the written consent of the Railroad. Contractor shall be responsible for the acts and omissions of all subcontractors. Before Contractor commences any work, the Contractor shall, except to the extent prohibited by law; (1) require each of its subcontractors to include the Contractor as "Additional Insured" in the subcontractor's Commercial General Liability policy and Business Automobile policies with respect to all liabilities arising out of the subcontractor's performance of work on behalf of the Contractor by endorsing these policies with ISO Additional Insured Endorsements CG 20 26, and CA 20 48 (or substitute forms providing equivalent coverage; (2) require each of its subcontractors to endorse their Commercial General Liability Policy with "Contractual Liability Railroads" ISO Form CG 24 17 10 01 (or a substitute form providing equivalent coverage) for the job site; and (3) require each of its subcontractors to endorse their Business Automobile Policy with "Coverage For Certain Operations In Connection With Railroads" ISO Form CA 20 70 10 01 (or a substitute form providing equivalent coverage) for the job site.

EXHIBIT C

TO CONTRACTOR'S RIGHT OF ENTRY AGREEMENT

INSURANCE REQUIREMENTS

Contractor shall, at its sole cost and expense, procure and maintain during the course of the Project and until all Project work on Railroad's property has been completed and the Contractor has removed all equipment and materials from Railroad's property and has cleaned and restored Railroad's property to Railroad's satisfaction, the following insurance coverage:

A. COMMERCIAL GENERAL LIABILITY INSURANCE. Commercial general liability (CGL) with a limit of not less than $5,000,000 each occurrence and an aggregate limit of not less than $10,000,000. CGL insurance must be written on ISO occurrence form CG 00 01 12 04 (or a substitute form providing equivalent coverage).

The policy must also contain the following endorsement, which must be stated on the certificate of insurance:

- Contractual Liability Railroads ISO form CG 24 17 10 01 (or a substitute form providing equivalent coverage) showing "Union Pacific Railroad Company Property" as the Designated Job Site.
- Designated Construction Project(s) General Aggregate Limit ISO Form CG 25 03 03 97 (or a substitute form providing equivalent coverage) showing the project on the form schedule.

B. BUSINESS AUTOMOBILE COVERAGE INSURANCE. Business auto coverage written on ISO form CA 00 01 10 01 (or a substitute form providing equivalent liability coverage) with a combined single limit of not less $5,000,000 for each accident and coverage must include liability arising out of any auto (including owned, hired and non-owned autos).

The policy must contain the following endorsements, which must be stated on the certificate of insurance:

- Coverage For Certain Operations In Connection With Railroads ISO form CA 20 70 10 01 (or a substitute form providing equivalent coverage) showing "Union Pacific Property" as the Designated Job Site.
- Motor Carrier Act Endorsement - Hazardous materials clean up (MCS-90) if required by law.

C. WORKERS' COMPENSATION AND EMPLOYERS' LIABILITY INSURANCE. Coverage must include but not be limited to:

- Contractor's statutory liability under the workers' compensation laws of the state where the work is being performed.
- Employers' Liability (Part B) with limits of at least $500,000 each accident, $500,000 disease policy limit $500,000 each employee.

If Contractor is self-insured, evidence of state approval and excess workers compensation coverage must be provided.

Coverage must include liability arising out of the U. S. Longshoremen's and Harbor Workers' Act, the Jones Act, and the Outer Continental Shelf Land Act, if applicable.

The policy must contain the following endorsement, which must be stated on the certificate of insurance:

- Alternate Employer endorsement ISO form WC 00 03 01 A (or a substitute form providing equivalent coverage) showing Railroad in the schedule as the alternate employer (or a substitute form providing equivalent coverage).

D. RAILROAD PROTECTIVE LIABILITY INSURANCE. Contractor must maintain Railroad Protective Liability insurance written on ISO occurrence form CG 00 35 12 04 (or a substitute form providing equivalent coverage) on behalf of Railroad as named insured, with a limit of not less than $2,000,000 per occurrence and an aggregate of $6,000,000. A binder stating the policy is in place must be submitted to Railroad before the work may be commenced and until the original policy is forwarded to Railroad.

E. UMBRELLA OR EXCESS INSURANCE. If Contractor utilizes umbrella or excess policies, these policies must "follow form" and afford no less coverage than the primary policy.

F. POLLUTION LIABILITY INSURANCE. Pollution liability coverage must be written on ISO form Pollution Liability Coverage Form Designated Sites CG 00 39 12 04 (or a substitute form providing equivalent liability coverage), with limits of at least

$5,000,000 per occurrence and an aggregate limit of $10,000,000.

If the scope of work as defined in this Agreement includes the disposal of any hazardous or non-hazardous materials from the job site, Contractor must furnish to Railroad evidence of pollution legal liability insurance maintained by the disposal site operator for losses arising from the insured facility accepting the materials, with coverage in minimum amounts of $1,000,000 per loss, and an annual aggregate of $2,000,000.

OTHER REQUIREMENTS

G. All policy(ies) required above (except worker's compensation and employers liability) must include Railroad as "Additional Insured" using ISO Additional Insured Endorsements CG 20 26, and CA 20 48 (or substitute forms providing equivalent coverage). The coverage provided to Railroad as additional insured shall, to the extent provided under ISO Additional Insured Endorsement CG 20 26, and CA 20 48 provide coverage for Railroad's negligence whether sole or partial, active or passive, and shall not be limited by Contractor's liability under the indemnity provisions of this Agreement.

H. Punitive damages exclusion, if any, must be deleted (and the deletion indicated on the certificate of insurance), unless the law governing this Agreement prohibits all punitive damages that might arise under this Agreement.

I. Contractor waives all rights of recovery, and its insurers also waive all rights of subrogation of damages against Railroad and its agents, officers, directors and employees. This waiver must be stated on the certificate of insurance.

J. Prior to commencing the work, Contractor shall furnish Railroad with a certificate(s) of insurance, executed by a duly authorized representative of each insurer, showing compliance with the insurance requirements in this Agreement.

K. All insurance policies must be written by a reputable insurance company acceptable to Railroad or with a current Best's Insurance Guide Rating of A- and Class VII or better, and authorized to do business in the state where the work is being performed.

L. The fact that insurance is obtained by Contractor or by Railroad on behalf of Contractor will not be deemed to release or diminish the liability of Contractor, including, without limitation, liability under the indemnity provisions of this Agreement. Damages recoverable by Railroad from Contractor or any third party will not be limited by the amount of the required insurance coverage.

EXHIBIT D

TO CONTRACTOR'S RIGHT OF ENTRY AGREEMENT

MINIMUM SAFETY REQUIREMENTS

The term "employees" as used herein refer to all employees of Contractor as well as all employees of any subcontractor or agent of Contractor.

I. CLOTHING

A. All employees of Contractor will be suitably dressed to perform their duties safely and in a manner that will not interfere with their vision, hearing, or free use of their hands or feet.

Specifically, Contractor's employees must wear:

i. Waist-length shirts with sleeves.
ii. Trousers that cover the entire leg. If flare-legged trousers are worn, the trouser bottoms must be tied to prevent catching.
iii. Footwear that covers their ankles and has a defined heel. Employees working on bridges are required to wear safety-toed footwear that conforms to the American National Standards Institute (ANSI) and FRA footwear requirements.

B. Employees shall not wear boots (other than work boots), sandals, canvas-type shoes, or other shoes that have thin soles or heels that are higher than normal.

C. Employees must not wear loose or ragged clothing, neckties, finger rings, or other loose jewelry while operating or working on machinery.

II. PERSONAL PROTECTIVE EQUIPMENT

Contractor shall require its employees to wear personal protective equipment as specified by Railroad rules, regulations, or recommended or requested by the Railroad Representative.

i. Hard hat that meets the American National Standard (ANSI) Z89.1 – latest revision. Hard hats should be affixed with Contractor's company logo or name.
ii. Eye protection that meets American National Standard (ANSI) for occupational and educational eye and face protection, Z87.1 – latest revision. Additional eye protection must be provided to meet specific job situations such as welding, grinding, etc.
iii. Hearing protection, which affords enough attenuation to give protection from noise levels that will be occurring on the job site. Hearing protection, in the form of plugs or muffs, must be worn when employees are within:

- 100 feet of a locomotive or roadway/work equipment
- 15 feet of power operated tools
- 150 feet of jet blowers or pile drivers
- 150 feet of retarders in use (when within 10 feet, employees must wear dual ear protection – plugs and muffs)

iv. Other types of personal protective equipment, such as respirators, fall protection equipment, and face shields, must be worn as recommended or requested by the Railroad Representative.

III. ON TRACK SAFETY

Contractor is responsible for compliance with the Federal Railroad Administration's Roadway Worker Protection regulations – 49CFR214, Subpart C and Railroad's On-Track Safety rules. Under 49CFR214, Subpart C, railroad contractors are responsible for the training of their employees on such regulations. In addition to the instructions contained in Roadway Worker Protection regulations, all employees must:

i. Maintain a distance of twenty-five (25) feet to any track unless the Railroad Representative is present to authorize movements.

ii. Wear an orange, reflectorized workwear approved by the Railroad Representative.
iii. Participate in a job briefing that will specify the type of On-Track Safety for the type of work being performed. Contractor must take special note of limits of track authority, which tracks may or may not be fouled, and clearing the track. Contractor will also receive special instructions relating to the work zone around machines and minimum distances between machines while working or traveling.

IV. EQUIPMENT

A. It is the responsibility of Contractor to ensure that all equipment is in a safe condition to operate. If, in the opinion of the Railroad Representative, any of Contractor's equipment is unsafe for use, Contractor shall remove such equipment from Railroad's property. In addition, Contractor must ensure that the operators of all equipment are properly trained and competent in the safe operation of the equipment. In addition, operators must be:

i. Familiar and comply with Railroad's rules on lockout/tagout of equipment.
ii. Trained in and comply with the applicable operating rules if operating any hy-rail equipment on-track.
iii. Trained in and comply with the applicable air brake rules if operating any equipment that moves rail cars or any other railbound equipment.

B. All self-propelled equipment must be equipped with a first-aid kit, fire extinguisher, and audible back-up warning device.

C. Unless otherwise authorized by the Railroad Representative, all equipment must be parked a minimum of twenty-five (25) feet from any track. Before leaving any equipment unattended, the operator must stop the engine and properly secure the equipment against movement.

D. Cranes must be equipped with three orange cones that will be used to mark the working area of the crane and the minimum clearances to overhead powerlines.

V. GENERAL SAFETY REQUIREMENTS

A. Contractor shall ensure that all waste is properly disposed of in accordance with applicable federal and state regulations.

B. Contractor shall ensure that all employees participate in and comply with a job briefing conducted by the Railroad Representative, if applicable. During this briefing, the Railroad Representative will specify safe work procedures, (including On-Track Safety) and the potential hazards of the job. If any employee has any questions or concerns about the work, the employee must voice them during the job briefing. Additional job briefings will be conducted during the work as conditions, work procedures, or personnel change.

C. All track work performed by Contractor meets the minimum safety requirements established by the Federal Railroad Administration's Track Safety Standards 49CFR213.

D. All employees comply with the following safety procedures when working around any railroad track:

i. Always be on the alert for moving equipment. Employees must always expect movement on any track, at any time, in either direction.
ii. Do not step or walk on the top of the rail, frog, switches, guard rails, or other track components.
iii. In passing around the ends of standing cars, engines, roadway machines or work equipment, leave at least 20 feet between yourself and the end of the equipment. Do not go between pieces of equipment of the opening is less than one car length (50 feet).
iv. Avoid walking or standing on a track unless so authorized by the employee in charge.
v. Before stepping over or crossing tracks, look in both directions first.
vi. Do not sit on, lie under, or cross between cars except as required in the performance of your duties and only when track and equipment have been protected against movement.

E. All employees must comply with all federal and state regulations concerning workplace safety.

CITY OF MONTEBELLO

CITY COUNCIL AGENDA STAFF REPORT

TO: Honorable Mayor and City Council Members

FROM: René Bobadilla, P.E., City Manager

BY: Joseph Palombi, Director of Planning and Community Development

SUBJECT: **Update on the Art in Public Places Program**

DATE: April 13, 2022

RECOMMENDATIONS:

Staff recommends the City Council receive and file the update regarding the proposed Art in Public Places Program and provide staff direction.

BACKGROUND

In response to a request for art in public places, the City of Montebello ("City") Planning and Community Development Department conducted research on similar art programs and how such programs can help fund public art. Staff prepared an Art in Public Places Ordinance ("Ordinance") with the intent of facilitating the creative installation of high-quality art in the City intended to foster the aesthetic enjoyment of communities, City pride, and enhance the value of local developments and public spaces.

The following list provides a general overview of the proposed Art in Public Places Program:

- On June 15, 2021, the Planning Commission approved a recommendation that the City Council approve the proposed Art in Public Places Program Ordinance, establish an Advisory Committee, and amend Montebello Municipal Code Section 17.62.050 to remove "murals" from the list of prohibited signs.

- On August 11, 2021, staff introduced the first reading of the Art in Public Places Program Ordinance to the City Council.

  Based on the information presented by staff, the following recommendations/comments were provided by City Council:

- Revise Section 17.79.040 – Projects subject to Art in Public Places requirements, applicability is too inclusive and should remove projects that involve a tenant improvement and/or alteration from the list.
- Staff received comments regarding whether or not the threshold of $250,000 was appropriate. As a result, staff analyzed fees for eight (8) cities with approved public art programs.
- Should the City increase the number of units for residential development projects that trigger and in-lieu fee or artwork from 4 units or more to 10 units or more?
- Can the fee structure be revised to include a tiered fee structure?

The item was continued to the August 24, 2021 meeting.

- On August 24, 2021, the City Council continued the First Reading of the Arts in Public Places Program Ordinance to the September 8, 2021 meeting.

- On September 1, 2021, a City Council study session was held regarding the proposed Art in Public Places Program. Subsequently, the staff member who was working on this project transitioned to another city and the Planning Division has to reshuffle responsibilities and reassign this project accordingly.

- On September 8, 2021, the City Council continued the item to a date uncertain.

ANALYSIS

In an effort to establish a basis for the proposed fees, staff researched fees established by cities located within the County of Los Angeles including neighboring cities. The below table provides a summary of fees from other cities with Arts in Public Places programs. Each city listed below gives applicants the choice of acquiring and installing artwork on the project site or paying the in-lieu fee.

JURISDICTION	EXISTING FEE
Burbank	1% of total project cost for the first $15 million
Cerritos	1% of total project valuation of new development projects with building valuations equal to or exceeding $250,000
Commerce	1% of the total project costs if project costs equal or exceed $250,000
Downey	1% of construction or reconstruction costs if project valuation is equal to or exceeds $500,000
El Monte	1% of total project costs for commercial and industrial projects with project costs exceeding $500,000 or for residential projects of 4 or more dwelling units
Santa Fe Springs	1% of total project costs if project costs equal or exceed $300,000

JURISDICTION	EXISTING FEE
West Covina	.5% of total project costs for residential projects if project consists of 10 or more dwelling units or 1% of total project costs for non-residential projects if project costs equal to or exceed $500,000
Whittier	.5% of total project costs if total value equals to or exceeds $250,000

The proposed fee in the Ordinance is 1% of total project costs if project costs are equal to or exceed $250,000, which is comparable to what most of the above-referenced cities currently charge.

In addition, staff seeks direction regarding the proposed review/approval process for proposed artwork including values related to artwork and recommends enlisting the help from an art professional to help streamline the review/approval process administratively with an option for an appeal to the Planning Commission and/or City Council.

ENVIRONMENTAL

Pursuant to the California Environmental Quality Act (CEQA), this project is exempt from CEQA under the common sense rule that CEQA applies only to projects which have the potential for causing a significant effect on the environment. Because it can be seen with certainty that there is no possibility that this project will have a significant effect on the environment, the project is not subject to CEQA pursuant to State CEQA Guidelines Section 15061(b)(3).

SUMMARY

Staff is requesting direction from City Council regarding the Art in Public Places Program.

ITEM # 10

CITY OF MONTEBELLO

CITY COUNCIL AGENDA STAFF REPORT

TO: Honorable Mayor and City Council Members

FROM: René Bobadilla, P.E., City Manager

BY: Arnold Alvarez-Glasman, City Attorney

SUBJECT: **Adopt Resolution No. 22-20 Opposing Eligible Tribal Gaming Initiative**

DATE: April 13, 2022

RECOMMENDATIONS:

It is recommended that the City Council:

1) Adopt Resolution No. 22-20 affirming the City's opposition to "Legalize Sports Betting on American Indian Lands Initiative" related to sports betting on American Indian gaming casinos and licensed racetracks in California; and

2) Take such additional, related, action that may be desirable.

FISCAL IMPACT

There is no fiscal impact to the City.

BACKGROUND

In 2019, California Senator Bill Dodd introduced SCA 6 which proposed to establish the California Sports Wagering and Consumer Protection Act. The Act would have authorized sports betting, including online or mobile sports betting, for horse race tracks and federally recognized "American Indian" tribes. The bill would also incorporate the authority of a licensed gambling establishment to offer games with cards or tiles in which participants wager against each other. The bill was shelved in June 2020 due to opposition by a coalition of 25 Native American tribes that argued that the legislation would allow competing card clubs to continue offering card games the tribes claim violate their exclusive compacts with the state.

A new initiative has been proposed and now qualifies for the ballot in California as a combined initiated constitutional amendment and state stature on November 8, 2022. The California Legalize Sports Betting and American Indian Lands Initiative would legalize sports betting at American Indian gaming casinos and licensed racetracks in California as well as legalize roulette and dice games, such as craps, at tribal casinos. The proposed measure would legalize sports betting in California and distribute various percentages of the tax revenue to implement programs for problem gambling prevention programs and mental health.

The California Gaming Association (CGA), a trade association of licensed cardrooms and vendors oppose the measure because it contains language that would primarily benefit Native American Casinos and subject other California card clubs to increased state regulations. The initiative would expand Native American Casino gaming exclusivity over the gaming industry. In addition, under this measure, sports wagering would only be allowed in person at tribal gaming casinos and state-licensed racetracks, thus prevent online or mobile gaming in other California card clubs.

The City of Montebello would join California Contract Cities Association, Gateway Cities Council of Government, and other local governments in their opposition to the California Legalize Sports Betting and American Indian Lands Initiative, along with the California Cities for Self-Reliance Joint Powers Authority also known as the Gaming Cities JPA and its member cities as it negatively affects cardrooms in communities that greatly depend on them.

SUMMARY

Staff recommends that the City Council consider adopting Resolution No. 22-20 affirming the City's opposition to "Legalize Sports Betting on American Indian Lands Initiative" related to sports betting on American Indian gaming casinos and licensed racetracks in California

RESOLUTION NO. 22-20

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MONTEBELLO, CALIFORNIA, REAFFIRMING THE CITY'S OPPOSITION TO THE INDIAN LANDS INITIATIVE RELATED TO SPORTS BETTING AT AMERICAN INDIAN GAMING CASINOS AND LICENSED RACETRACKS IN CALIFORNIA

RECITALS

WHEREAS, in 2019, California Senator Bill Dodd introduced SCA 6 which proposed to establish the California Sports Wagering and Consumer Protection Act. The Act would have authorized sports betting, including online or mobile sports betting, for horse race tracks and federally recognized "American Indian" tribes; and

WHEREAS, a new initiative, the California Legalize Sports Betting and American Indian Lands Initiative, has been proposed and now qualifies for the ballot in California as a combined initiated constitutional amendment and state statute on November 8, 2022; and

WHEREAS, the California Legalize Sports Betting and American Indian Lands Initiative seeks to change the Constitution to allow sports betting at American Indian gaming casinos and licensed racetracks in California as well as legalize roulette and dice games, such as craps, at tribal casinos, thereby expanding their gaming exclusivity with no specified taxes being paid to state or local governments; and

WHEREAS, cardrooms are a major employer of residents for a number of cities that provide additional general fund contributions to those cities, and any initiative or policy that will harm cardroom revenues will also negatively impact those communities and cities; and

WHEREAS, the California Gaming Association (CGA), a trade association of licensed cardrooms and vendors oppose the measure because it contains language that would primarily benefit Native American Casinos and subject other California card clubs to increased state regulations; and

WHEREAS, the City of Montebello would join California Contract Cities Association, Gateway Cities Council of Government, and other local governments in their opposition to the California Legalize Sports Betting and American Indian Lands Initiative, along with the California Cities for Self-Reliance Joint Powers Authority also known as the Gaming Cities JPA and its member cities as it negatively affects cardrooms in communities that greatly depend on them.

NOW THEREFORE, THE CITY COUNCIL OF THE CITY OF MONTEBELLO HEREBY RESOLVES, FINDS, AND DECLARES AS FOLLOWS:

SECTION 1. All of the recitals above are true and correct and are incorporated herein as if set forth in full.

SECTION 2. That the City Council affirms the City's opposition to the California Legalize Sports Betting and American Indian Lands initiative.

SECTION 3. This Resolution shall take effect immediately upon its adoption by the City Council and the City Clerk shall certify to the passage and adoption of this resolution.

APPROVED AND ADOPTED this 13th day of April 2022.

ITEM # 11

CITY OF MONTEBELLO

CITY COUNCIL AGENDA STAFF REPORT

TO: Honorable Mayor and City Council Members

FROM: René Bobadilla, P.E., City Manager

BY: David Sosnowski, Director of Recreation and Community Services

SUBJECT: **Approval of Amendment No. 1 to Agreement No. 3886 – Summer Food Service Program Provider**

DATE: April 13, 2022

RECOMMENDATIONS:

It is recommended that the City Council:

1) Approve Amendment No. 1 extending Agreement No. 3886 for an additional one-year (1-year) term to provide services for the City's Summer Food Service Program; and

2) Authorize the City Manager to execute Amendment on behalf of the City.

3) Take such additional, related, action that may be desirable.

FISCAL IMPACT

The total not-to-exceed cost for services to provide meals for the City's Summer Food Service Program (SFSP) is Ninety Thousand Dollars ($90,000) annually. The contract extension will not increase the total contract amount. The program is administered by the United States Department of Agriculture (USDA) and is reimbursable for up to $4.4875 per lunch and up to $1.0525 per snack. Expenses for the SFSP are charged to the SFSP Grant account (Fund 265) and reimbursed by the USDA. Appropriate funding will be included in the Fiscal Year 2022-23 budget.

BACKGROUND / ANALYSIS

On June 9, 2021, after issuing a Request for Quotations (RFQ 21-53), the City of Montebello ("City") awarded a contract to School Nutrition Plus, Inc., to provide services for the City's SFSP. The contract is for an initial length of one (1) year, with an option to extend the contract for two (2) additional one-year terms. School Nutrition Plus, Inc. has demonstrated the desired ability, knowledge and experience to continue providing services for the City. The SFSP provides free meals to youth ages 18 and under from June through August. A total of 16,465 lunch meals were distributed in the summer of 2021.

City Council is being asked to consider extending the contract service with School Nutrition Plus, Inc. for an additional one (1) year term from June 9, 2022 to June 8, 2023 to continue providing services for next summer's program. The annual cost will be $90,000, with expenses reimbursed by the USDA.

SUMMARY

The City Council will consider approval of Amendment No. 1 to Agreement No. 3886 with School Nutrition Plus, Inc. to provide services for the City's Summer Food Service Program for an additional one-year (1-year) term.

B. Attachment B – Agreement No. 3886

ATTACHMENT A

CITY OF MONTEBELLO

AMENDMENT NO. 1
TO PROFESSIONAL SERVICES AGREEMENT NO. 3886
WITH SCHOOL NUTRITION PLUS, INC.

This Amendment No. 1 to the Professional Services Agreement No. 3886 ("Amendment No. 1"), is made and entered into this 13th day of April 2022, ("Effective Date") by and between the City of Montebello, a California municipal corporation, (hereinafter referred to as the "City") and School Nutrition Plus, Inc., (hereinafter referred to as the "Consultant"). The City and the Consultant are sometimes hereinafter individually referred to as a "Party" and jointly as the "Parties".

RECITALS

WHEREAS, the Consultant and the City entered into that certain Agreement for Summer Food Service Program Provider by and between the City of Montebello and School Nutrition Plus, Inc., dated June 9, 2021 No. 3886 ("Agreement"), pursuant to which City retained Consultant to provide services for Summer Food Service Program, as further described in the Agreement; and

WHEREAS, the Parties, being mutually satisfied with the other Party's performance of the Agreement, desire to amend the Agreement to extend the term for an additional one (1) year, specifically from June 9, 2022 to June 8, 2023; and

WHEREAS, for the reasons set forth herein, the City and Consultant desire to enter into this Amendment No. 1, as set forth below.

NOW THEREFORE, in consideration of the mutual promises and covenants contained herein, the receipt adequacy of which is expressly acknowledged by the Parties, the Parties agree to amend the Agreement as follows:

AMENDMENTS

SECTION 1. Section 2 of the Agreement Term is amended to read as follows:

> **"**2. Term. The term of this Agreement shall commence on June 9, 2022 and shall continue in full force and effect through and including June 8, 2023, unless extended or sooner terminated as provided in Section 7 herein."

SECTION 2. Except as expressly modified or supplemented by this Amendment No. 1, all other provisions of the Agreement, shall remain unaltered and in full force and effect. In the event of conflict between the provisions of this Amendment No. 1 and the provisions of the Agreement, the provisions of this Amendment No. 1 shall control.

IN WITNESS WHEREOF, the Parties execute this Amendment No. 1 to take effect as of the Effective Date identified above.

ATTEST:

Christopher Jimenez, City Clerk

APPROVED AS TO FORM:

Arnold M. Alvarez-Glasman, City Attorney

CITY OF MONTEBELLO

PROFESSIONAL SERVICES AGREEMENT NO. 3886 WITH SCHOOL NUTRITION PLUS, INC.

THIS AGREEMENT ("Agreement") is made and entered into on June 9, 2021, by the CITY OF MONTEBELLO, a municipal corporation (hereinafter referred to as "CITY") and SCHOOL NUTRITION PLUS, INC. (hereinafter referred to as "CONTRACTOR"). CITY and CONTRACTOR are sometimes referred to herein individual as the "Party," and jointly as the "Parties."

RECITALS

WHEREAS, the CITY desires to retain a qualified professional contractor to provide meal services for the Summer Food Service Program in the CITY; and

WHEREAS, the CONTRACTOR represents that it is fully qualified to perform such services by virtue of its experience and the training, education and expertise of its principals and employees.

NOW THEREFORE, in consideration of performance by the Parties of the covenants and conditions herein contained, the Parties hereto agree as follows:

SECTION 1. SERVICES / COMPENSATION.

A. All terms, conditions, requirements, and provisions of the Request for Quotations No. 21-53 for Summer Food Service Program Provider in the City of Montebello (May 13, 2021) ("Request for Quotations"), as such is set forth fully in **Exhibit "A"** hereto, are hereby incorporated fully herein by this reference and shall be binding on the Parties. To the extent of a conflict between the terms of this Agreement and that set forth in any exhibits or attachments hereto, the terms of this Agreement shall govern.

B. CONTRACTOR shall provide to CITY all labor, equipment, materials and incidental necessary to provide meal services for the Summer Food Service Program as set forth fully in the Request for Quotations, as such is set forth fully in **Exhibit "A"** hereto and incorporated fully herein by this reference (hereinafter "Professional Services").

C. CONTRACTOR shall be shall be compensated for performance of the Professional Services as set forth in the Schedule of Compensation attached hereto as **Exhibit "B"** and incorporated fully herein by this reference ("Compensation"). CONTRACTOR shall provide an itemized billing statement to the CITY each month for Professional Services performed. CONTRACTOR shall no incur fees or costs which exceed the Compensation without the prior written consent of the CITY.

SECTION 2. TERM.

This Agreement shall commence upon issuance of the Notice to Proceed by the City ("Effective Date"), and shall expire one (1) year from the Effective Date, unless terminated earlier as hereinafter provided. This Agreement may be extended for up to two (2) one-year extensions upon such terms and conditions mutually agreed upon by the Parties in writing.

SECTION 3. PERFORMANCE.

a. CONTRACTOR shall at all times, faithfully, competently, and to the best of its ability, experience and talent, perform all tasks described herein.

b. CONTRACTOR shall employ, at a minimum, generally accepted standards and practices utilized by companies engaged in providing similar services, as are required of Contractor hereunder, in meeting its obligations under this Agreement.

c. CONTRACTOR shall be knowledgeable of and subject to all CITY ordinances, rules and regulations, standard operating procedures, and the supervisory chain of command.

d. CONTRACTOR shall have the right to retain, subject to CITY's approval, additional individuals, consultants or subcontractors to assist in the completion of services as herein defined. Compensation for additional individuals, consultants or subcontractors shall be the sole and exclusive responsibility of CONTRACTOR.

e. CONTRACTOR shall retain all original reports, field and office notes, correspondence, calculations, maps, and other documents specifically related to the services provided by CONTRACTOR pursuant to this Agreement, other than documents which are exempt from disclosure pursuant to the attorney-client privilege or any other law. Said documents shall be made available for inspection by the CITY upon request.

SECTION 4. WORK PRODUCT.

a. CONTRACTOR hereby agrees that all work product produced pursuant to this Agreement, and provided to CITY during and upon completion of this Agreement, shall be the property of the CITY, and ownership of said work product shall be retained by the CITY. CONTRACTOR may take and retain copies of such written products as desired, but no such written products shall be the subject of a copyright application by CONTRACTOR.

b. All data, documents, discussion, or other information developed or received by CONTRACTOR or provided for performance of this Agreement are deemed confidential and shall not be disclosed by CONTRACTOR without prior written consent by the CITY. The CITY shall grant such consent if disclosure is legally required. All such written products shall be returned to the CITY upon the termination or expiration of this Agreement. CONTRACTOR agrees that the covenants contained in this Article shall survive the expiration or termination of this Agreement.

SECTION 5. EXTRA SERVICES.

No extra services over and above the Compensation shall be rendered by CONTRACTOR under this Agreement unless such extra services first shall have been duly authorized in writing by the City Manager.

SECTION 6. CITY SUPERVISION.

The City Manager shall have the right of general supervision of all work performed by CONTRACTOR and shall be the CITY agent with respect to obtaining CONTRACTOR's compliance hereunder. No payment for services rendered under this Agreement shall be made without the prior approval of the City Manager.

SECTION 7. TERMINATION.

In the event that either Party hereto fails or refuses to perform any of the provisions of this Agreement at the time and in the manner required, the non-defaulting party shall give the defaulting party written notice of the default, the nature of the default, and of the steps necessary to cure the default.

a. Termination for Cause. In the event that any of the provisions of the Agreement are violated by either party, the non-defaulting Party may terminate the Agreement by serving written notice upon the other Party, listing the violation(s) and its intent to terminate such Agreement unless within ten (10) days after the serving of such notice, such violation shall cease or be rectified, the contract shall upon the expiration of an additional thirty (30) days cease and terminate. Violations by Contractor which cannot be corrected within ten (10) days, said contract shall at the option of the City cease and terminate upon the giving of like notice. In the event of any such termination for default by Contractor, the City may take over the work and prosecute the same to completion by contract or otherwise for the account and at the expense of the Contractor. The Contractor and his sureties shall be liable to the City for any excess cost occasioned in the event of any such termination. This change shall not be construed to prevent the termination, for other causes authorized by law or other provisions of this contract. In the event of a termination for cause, CONTRACTOR shall only be entitled to the Compensation for those Professional Services satisfactory performed on or before the effective date of termination.

b. Termination For Convenience. The CITY shall have the option, at its sole discretion and without cause, to terminate this Agreement in whole, or in part, by giving ten (30) business days' written notice to CONTRACTOR. Upon the termination of this Agreement as provided herein, the CITY shall provide to CONTRACTOR the part of Compensation which would otherwise be payable to CONTRACTOR for services CONTRACTOR had completed as of the date of termination, less the amount of all previous payment with respect to the Compensation. Further, upon such a termination for convenience by CITY, the Parties agree that CONTRACTOR shall be reimbursed for any "non-refundable" costs that CONTRACTOR has incurred for its services under this Agreement, provided that: (1) such "non- refundable" costs were incurred by the CONTRACTOR prior to the date of termination, and (2) that CONTRACTOR provides the CITY with adequate proof that CONTRACTOR incurred the costs, and is unable to be seek a refund for such costs. Such "non-refundable" costs may include, but are not limited to, travel reservations incurred by CONTRACTOR for its performance of services under this Agreement. CONTRACTOR agrees to cease all work under this Agreement on or before the effective date of any notice of termination.

SECTION 8. EMPLOYMENT OF CITY EMPLOYEES.

No regular employee of the CITY shall be employed by CONTRACTOR during the term of this Agreement.

SECTION 9. NON-LIABILITY OF CITY OFFICIALS AND EMPLOYEES.

No official or employee of the CITY shall be personally liable to CONTRACTOR in the event of any default or breach by CITY, or for any amount which may become due to CONTRACTOR.

SECTION 10. INDEPENDENT CONTRACTOR.

a. The CONTRACTOR Is and shall, at all times, remain as to the CITY a wholly independent contractor. Neither the CITY nor any of its elected officials, officers, employees or agents shall have control over the conduct of the CONTRACTOR except as expressly set forth in this Agreement. The CONTRACTOR shall not at any time or in any manner represent that he is in any manner an elected official, officer, employee or agent of the CITY. No employee benefits shall be available to CONTRACTOR In connection with the performance of this Agreement. Except as provided in this Agreement, CITY shall not pay salary, wages, or other compensation to CONTRACTOR for performance hereunder for CITY, CITY shall not be liable for compensation to CONTRACTOR, CONTRACTOR's employees or CONTRACTOR'S subcontractors for injury or sickness arising out of performing services hereunder.

b. The parties further acknowledge and agree that nothing in this Agreement shall create or be construed to create a partnership, joint venture, employment relationship or any other relationship except as set forth in this Agreement.

c. CITY shall not deduct from the Compensation paid to CONTRACTOR any sums required for Social Security, withholding taxes, FICA, state disability insurance or any other federal, state or local tax or charge which may or may not be in effect or hereinafter enacted or required as a charge or withholding on the compensation paid to CONTRACTOR. CITY shall have no responsibility to provide CONTRACTOR, its employees or subcontractors with workers' compensation insurance or any other insurance.

SECTION 11. PERS ELIGIBILITY INDEMNITY.

a. In the event that CONTRACTOR or any employee, agent, or subcontractor of CONTRACTOR providing services under this Agreement claims or is determined by a court of competent jurisdiction or the California Public Employees Retirement System (PERS) to be eligible for enrollment in PERS as an employee of the CITY, CONTRACTOR shall indemnify, defend, and hold harmless CITY for the payment of any employee and/or employer contributions for PERS benefits on behalf of CONTRACTOR or its employees, agents, or subcontractors, as well as for the payment of any penalties and interest on such contributions, which would otherwise be the responsibility of CITY.

b. Notwithstanding any other agency, state or federal policy, rule, regulation, law or ordinance to the contrary, CONTRACTOR and any of its employees, agents, and subcontractors providing service under this Agreement shall not qualify for or become entitled to, and hereby agree to waive any claims to, any compensation, benefit, or any incident of employment by CITY, including but not limited to eligibility to enroll in PERS as an employee of CITY and entitlement to any contribution to be paid by CITY for employer contribution and/or employee contributions for PERS benefits.

SECTION 12. LEGAL RESPONSIBILITIES.

CONTRACTOR shall at all times observe and comply with all applicable laws, ordinances, codes and regulations of the federal, state and local governments including, but not limited to the Montebello Municipal Code. The CITY, and its appointed or elected officers, employees, or agents, shall not be liable at law or in

equity occasioned by failure of the CONTRACTOR to comply with this section.

SECTION 13. INDEMNIFICATION.

The CONTRACTOR agrees to, and shall defend, indemnify, protect and hold harmless, the CITY, its elected and appointed boards, officers, officials, employees, agents and volunteers from and against any and all claims, demands, lawsuits, defense costs, civil, penalties, expenses, causes of action, and judgments at law or in equity, or liability of any kind or nature which the CITY, its elected and appointed boards, officers, officials, employees, agents and volunteers may sustain or incur or which may be imposed upon them for injuries or deaths of persons, or damage to property arising out of CONTRACTOR'S negligent or wrongful act, or omission under the terms of this Agreement, except only liability arising out of the sole negligence of the CITY.

SECTION 14. INSURANCE COVERAGE.

During the term of this Agreement, CONTRACTOR shall carry, maintain, and keep in full force and effect insurance against claims for death or injuries to persons or damages to property that may arise from or in connection with CONTRACTOR'S performance of this Agreement. Such insurance shall be of the types and in the amounts as set forth below:

- **Commercial General Liability (CGL)**: Insurance Services Office Form CG 00 01 covering CGL on an "occurrence" basis for bodily injury and property damage, including products-completed operations, personal injury and advertising injury, with limits no less than $1,000,000 per occurrence. If a general aggregate limit applies, the limit shall be twice the required occurrence limit.

- **Automobile Liability Insurance:** Insurance Services Office Form Number CA 0001 covering, Code 1 (any auto), or if CONTRACTOR has no owned autos, Code 8 (hired) and 9 (non-owned), with limit no less than $1,000,000 per accident for bodily injury and property damage.

- **Worker's Compensation** Insurance as required by the laws of the State of California, with Statutory Limits, and Employer's Liability Insurance with limit of no less than $1,000,000 per accident for bodily injury or disease.

- **Professional Liability** insurance appropriate to the CONTRACTOR'S profession, with limit no less than $1,000,000 per occurrence or claim, $2,000,000 aggregate.

If the CONTRACTOR maintains higher limits than the minimums shown above, the CITY requires and shall be entitled to coverage for the higher limits maintained by the CONTRACTOR.

CONTACTOR shall require each of its subcontractors, if any, to maintain insurance coverage that meets all of the requirements of this Agreement.

The policy or policies required by this Agreement shall be issued by an insurer admitted in the State of California and with a current rating of at least A:VII in the latest edition of Best's Insurance Guide.

Each insurance policy required above shall state that coverage shall not be

canceled, except after thirty (30) days' prior written notice (ten (10) days for non-payment) has been given to the City. CONTRACTOR agrees that if it does not keep the aforesaid insurance in full force and effect CITY may either (i) immediately terminate this Agreement for Cause; or (ii) take out the necessary insurance and pay, at CONTRACTOR'S expense, the premium thereon.

At all times during the term of this Agreement, CONTRACTOR shall maintain on file with CITY's Risk Manager a certificate or certificates of insurance showing that the aforesaid policies are in effect in the required amounts and naming the CITY as an additional insured. CONTRACTOR shall, prior to commencement of work under this Agreement, file with CITY's Risk Manager such certificate(s).

CONTRACTOR shall provide proof that policies of insurance required herein expiring during the term of this Agreement have been renewed or replaced with other policies providing at least the same coverage. Such proof will be furnished at least two weeks prior to the expiration of the coverages.

The general liability and automobile policies of insurance required by this Agreement shall contain an endorsement naming CITY, its officers, employees, agents and volunteers as additional insureds. All of the policies required under this Agreement shall contain an endorsement providing that the policies cannot be canceled or reduced except on thirty days' prior written notice to CITY. CONTRACTOR agrees to require its insurer to modify the certificates of insurance to delete any exculpatory wording stating that failure of the insurer to mail written notice of cancellation imposes no obligation, and to delete the word "endeavor" with regard to any notice provisions.

The insurance provided by CONTRACTOR shall be primary to any coverage available to CITY. Any insurance or self-insurance maintained by CITY, its officers, employees, agents or volunteers, shall be in excess of CONTRACTOR'S insurance and shall not contribute with it.

All insurance coverage provided pursuant to this Agreement shall not prohibit CONTRACTOR, and CONTRACTOR'S employees, agents or subcontractors, from waiving the right of subrogation prior to a loss. CONTRACTOR hereby waives all rights of subrogation against the CITY.

Any deductibles or self-insured retentions must be declared to and approved by the CITY. At the option of CITY, CONTRACTOR shall either reduce or eliminate the deductibles or self-insured retentions with respect to CITY, or CONTRACTOR shall procure a bond guaranteeing payment of losses and expenses.

Procurement of insurance by CONTRACTOR shall not be construed as a limitation of CONTRACTOR'S liability or as fall performance of CONTRACTOR'S duties to indemnify, hold harmless and defend under Section 9 of this Agreement.

SECTION 15. SUBCONTRACT, ASSIGNMENT OR DELEGATION.

CONTRACTOR shall not subcontract, delegate or assign its duties or rights hereunder, either in whole or in part, without the prior written consent of CITY. Any proposed subcontract, delegation, or assignment shall provide a description of the services to be covered, identification of the proposed sub-contractor, delegee, or assignee, and an explanation of why and how the same was selected, including the degree of competition involved.

Any subcontract, delegation or assignment shall be made in the name of CONTRACTOR and shall not bind or purport to bind CITY and shall not release CONTRACTOR from any obligations under this Agreement including, but not limited to, the duty to properly supervise and coordinate the work of employees, assignees, delegees or sub-contractors. No such subcontract, delegation or assignment shall result in any increase in the amount of total compensation payable to CONTRACTOR under the Agreement.

SECTION 16. NO WAIVER.

Waiver by any party hereto of any term, condition or covenant of this Agreement shall not constitute the waiver of any other term, condition or covenant hereof.

SECTION 17. DISPUTE RESOLUTION; GOVERNING LAW.

Disputes regarding the interpretation or application of any provision(s) of this Agreement shall, to the extent reasonably feasible, be resolved through good faith negotiations between the Parties. If any action at law or in equity is brought to enforce this Agreement or because of alleged dispute, breach, default or misrepresentation in connection with the provisions of this Agreement, the prevailing party in such action shall be entitled to reasonable attorney's fees, expert fees, costs and necessary disbursements incurred in that action or proceeding, in addition to such other relief as may be sought and awarded. The venue for any litigation shall be County of Los Angeles, California. The Parties agree that the covenants contained in this Article shall survive the expiration or termination of this Agreement.

SECTION 18. ATTORNEY'S FEES AND COSTS.

If litigation is reasonably required to enforce or interpret the provisions of this Agreement, the prevailing party in such litigation shall be entitled to an award of reasonable attorney's fees and costs in addition to any other relief to which it may be entitled.

SECTION 19. WARRANTIES.

Each of the parties represents and warrants to one another as follows:

a. It has received independent legal advice from its attorneys with respect to the advisability of entering into and executing this Agreement;

b. In executing this Agreement, it has carefully read this Agreement, knows the contents thereof, and has relied solely on the statements expressly set forth herein and has placed no reliance whatsoever on any statement, representation, or promise of any other party, or any other person or entity, not expressly set forth herein, nor upon the failure of any other party or any other person or entity to make any statement, representation or disclosure of *any* matter whatsoever; and

c. It is agreed that each party has the full right and authority to enter into this Agreement, and that the person executing this Agreement on behalf of either party has the full right and authority to fully commit and bind such party to the provisions of this Agreement.

SECTION 20. MISCELLANEOUS.

a. The descriptive paragraph headings of this Agreement are included for purposes of convenience only and shall not control or affect the construction of interpretation of any of its provisions.

b. Whenever the context hereof shall so require, the singular shall include the plural, the male gender shall include the female gender, and the neuter and vice versa.

c. In case any one or more of the provisions contained in this Agreement shall for any reason be held to be invalid, illegal, or unenforceable in any respect, such invalidity, illegality, or unenforceability shall not affect any other provision hereof and this Agreement shall be construed as if such invalid, illegal, or unenforceable provisions had never been contained herein.

d. The representations and warranties made by the parties to this Agreement shall survive the consummation of the transaction herein described.

e. This Agreement may be signed in any one or more counterparts all of which taken together shall be but one and the same Agreement. Any signed copy of this Agreement or of any other document or agreement referred to herein, or copy or counterpart thereof, delivered by facsimile transmission, shall for all purposes be treated as if it were delivered containing an original manual signature of the party whose signature appears in the facsimile and shall be binding upon such party in the same manner as though an originally signed copy had been delivered.

f. Each of the parties acknowledges that it has been represented by independent counsel of its own choosing, or if it has not been so represented, it has been admonished to obtain independent counsel and has freely and voluntarily waived and relinquished the right to counsel. Each party who has not obtained independent counsel acknowledges that the failure to have independent legal counsel will not excuse such party's failure to perform under this Agreement or any agreement referred to in this Agreement.

SECTION 21. NOTICE.

All notices, demands, requests or approvals to be given under this Agreement shall be given in writing and conclusively shall be deemed served when delivered personally or on the second business day after the deposit thereof in the United States mail, postage prepaid, registered or certified, addressed as hereinafter provided. All notices, demands, requests, or approvals hereunder shall be given to the following addresses or such other addresses as the Parties may designate by written notice:

David Sosnowski, Director of Recreation and Community Services
Recreation and Community Services Department
City of Montebello
1600 West Beverly Boulevard
Montebello, California 90640
E-mail: dsosnowski@cityofmontebello.com

SECTION 22. NON-DISCRIMINATION AND EQUAL OPPORTUNITY EMPLOYER.

In the performance of this Agreement, CONTRACTOR shall not discriminate against any employee, sub-contractor, or applicant for employment because of race, color, creed, religion, sex, marital status, national origin, ancestry, age, physical or mental handicap, mental condition or sexual orientation. CONTRACTOR will take affirmative action to ensure that sub-contractor and applicants are employed, and that employees are treated during employment, without regard to their race, color, creed, religion, sex, marital status, national origin, ancestry, age, physical or mental handicap, medical condition or sexual orientation.

SECTION 23. CONFLICT OF INTEREST.

CONTRACTOR covenants that it presently has no Interest and shall not acquire any Interest, direct or indirect, which may be affected by the services to be performed by CONTRACTOR under this Agreement, or which would conflict in any manner with the performance of its services hereunder. CONTRACTOR further covenants that, in performance of this Agreement, no person having any such interest shall be employed by it. Furthermore, CONTRACTOR shall avoid the appearance of having any Interest that would conflict in any manner with the performance of its services pursuant to this Agreement.

CONTRACTOR covenants not to give or receive any compensation, monetary or otherwise, to or from the ultimate vendor(s) of services to CITY as a result of the performance of this Agreement, or the services that may be procured by the CITY as a result of the recommendations made by CONTRACTOR. CONTRACTOR's covenant under this section shall survive the termination of this Agreement.

SECTION 24. ENTIRE AGREEMENT.

This Agreement contains the entire understanding between the CITY and CONTRACTOR. Any prior agreements, promises, negotiations or representations not expressly set forth herein are of no force or effect. Subsequent modifications to this Agreement shall be effective only if in writing and signed by each party. If any term, condition or covenant of this Agreement is held by a court of competent jurisdiction to be invalid, void or unenforceable, the remaining provisions of this Agreement shall be valid and binding.

CITY OF MONTEBELLO

Request for Quotations

(RFQ No. 21-53)

SUMMER FOOD SERVICE PROGRAM PROVIDER

Release Date: May 13, 2021
Due Date: June 1, 2021 at 10:00 A.M.
Bid Award Date: June 9, 2021 City Council Meeting

TO PROSPECTIVE BIDDERS

The City of Montebello invites your firm to submit a bid in accordance with this Request for Quotations (RFQ). Your response to this request will be evaluated to determine the qualifications of your firm. Bids must adhere to the format and content of this RFQ. Bids will not be evaluated unless all parts requested are submitted in a complete package. The information set forth is the minimum required in order to qualify for consideration. The successful bidder will be required to enter into a standard professional services agreement based on the specifications outlined in this RFQ.

NOTICE INVITING QUOTATIONS
FOR SUMMER FOOD SERVICE PROGRAM PROVIDER

BID NO. 21-53

PUBLIC NOTICE IS HEREBY GIVEN THAT THE City of Montebello as AGENCY, invites sealed bids for the above stated project and will receive such bids via the PlanetBids vendor portal found on the City of Montebello's official website up to the hour of 10:00 a.m. on Tuesday, June 1, 2021.

Copies of the specifications and contract documents are available from the City of Montebello, 1600 West Beverly Boulevard, Montebello, California 90640.

The AGENCY hereby affirmatively ensures that minority business enterprises will be afforded full opportunity to submit bids in response to this notice and will not be discriminated against on the basis of race, color, national origin, ancestry, sex, or religion in any consideration leading to the award of contract.

Proposals must be prepared on the approved Proposal forms in conformance with the instructions to Bidders.

The successful Vendor and Subcontractors are notified that they shall comply with all applicable state laws, Montebello Municipal Code, will be required to possess business licenses from the City, and other requirements as set forth in the contract requirements.

Addenda issued during the time of bidding shall become a part of the documents furnished to bidders for the preparation of bids, shall be covered in the bids, and shall be made part of the final contract.

The solicitation of Quotations has been developed in the Request for Quotations (RFQ) format. Accordingly, bidders should take note that multiple factors as defined in the RFQ will be considered by the City to determine which bid best meets the requirements set forth in the RFQ documents. Price will be considered as part of the evaluation, but other factors under consideration include, but are not limited to, proposed methodology, quality control program, experience of staff, experience of management team, quality of equipment, tools and uniforms. The City reserves the right to negotiate the terms of any resulting contract. Final contract award, if any, will be made by the Montebello City Council.

The AGENCY reserves the right to accept or reject any or all bids, to waive any irregularity in a bid and to make an award as may serve the interests of the City.

Questions should be directed to David Sosnowski, Director of Recreation & Community Services at (323) 887-4540.

THE DATE OF SOLICITATION: Wednesday, May 12, 2021
SUBMITTAL DUE DATE: Tuesday, June 1, 2021 @10:00 a.m.
AWARD DATE: Wednesday, June 9, 2021

REQUEST FOR QUOTATIONS

The City of Montebello is seeking bids from qualified food vendors for snack and meals for this year's Summer Food Service Program (SFSP). Vendors are expected to provide snack and lunch for 4 locations. The contract will be awarded to the responsible firm whose proposal is most advantageous to the program, with price and other factors considered. All meals of each type must meet the minimum standards set by the United States Department of Agriculture (USDA) for Child and Adult Care Food Program (CACFP) and SFSP meals of that type.

SCOPE OF SERVICES

- Vendor to provide a snack to 4 park sites. Snacks to be delivered to sites daily.
- Vendor to provide hot or cold lunch to 4 park sites. Lunches to be delivered to sites daily.
- Vendor to provide snack and lunch to 4 park sites from June 21, 2021 to August 13, 2021.
- Snack to be delivered daily (Monday through Friday) between 11:00 a.m. - 11:30 a.m. in the summer months (June 21st –August 13th)
- Snack will be served between 11:30 a.m. – 1:30 p.m.
- Lunch to be delivered daily (Monday through Friday) between 11:00 a.m. - 11:30 a.m. In the summer months (June 21st –August 13th)
- Lunch will be served between 11:30 a.m. - 1:30 p.m.
- Vendor must provide ice sheets to use while serving snack to ensure safe milk temperature and Cambros to keep hot meals warm.
- The snack and lunch meal must meet a minimum of the portions specified by the USDA as described in the meal pattern (Appendix D).

SITE	Meal Type	Dates	Number of Meals	Delivery time	Serving Time
Montebello City Park 115 S. Taylor Ave. Montebello, CA 90640	Lunch & Snack	June 21st – August 13th	Range from 60-150	Monday - Friday 11:00 a.m.-11:30 a.m.	12:00 p.m.
Chet Holifield Park 1060 S. Greenwood Ave. Montebello, CA 90640	Lunch & Snack	June 21st – August 13th	Range from 60-150	Monday - Friday 11:00 a.m.-11:30 a.m.	12:00 p.m.
Reggie Rodriguez Park 200 W. Mines Ave. Montebello, CA 90640	Lunch & Snack	June 21st – August 13th	Range from 60-150	Monday - Friday 11:00 a.m.-11:30 a.m.	11:30 a.m.
Grant Rea Park 600 Rea Dr. Montebello, CA 90640	Lunch & Snack	June 21st – August 13th	Range from 60-150	Monday - Friday 11:00 a.m.-11:30 a.m.	11:30 a.m.

GENERAL REQUIREMENTS

All meals of each type must meet the minimum standards set by the USDA for CACFP and SFSP meals of that type.

Snack:

For a snack to be a reimbursable meal, it must contain two (2) of the four (4) components listed below.

1. One serving of milk (whole, low-fat, or fat-free)
2. One serving of vegetables, fruits, or 100% juice
3. One serving of a grain
4. One serving of meat or meat alternate

Juice may not be served when milk is served as the only other component of a snack. Please refer to the SFSP Meal Pattern Requirements and information on creditable meal components, in the SFSP Nutrition Guidance for Sponsors: http://www.fns.usda.gov/sfsp/handbooks.

Lunch:

The following four (4) food components must be offered through at least five (5) different food items:

1. One serving of meat/meat alternate
2. Two servings of fruit and/or vegetables (two different food items)
3. One serving of grains
4. One serving of fluid milk

Lunch and supper requirements differ from breakfast in that a child must take at least three (3) of the food components, rather than items, listed above from the five (5) food items offered. Three (3) food components are required for an adequate, nutritious meal for children.

All meals proposed for the programs must meet or exceed USDA requirements. All yields of cooked and uncooked products shall conform to yields identified in the USDA's Food Buying Guide.

The vendor must provide a 40-day sample menu cycle.

Packaging Specifications:

- Each meal to be individually packaged, inclusive of milk.
- Each meal to include a spork package with straw and napkin.
- Each snack to be individually packaged.
- Meals shall be prepared under properly controlled temperatures and assembled not more than 24 hours prior to delivery.
- All meat and meat products, except sausage products, shall have been slaughtered, processed, and manufactured in plants inspected under a USDA approved inspection program and bear the appropriate seal. Upon delivery, all meat and meat products must be sound, sanitary, and free of objectionable odors or signs of deterioration

CONTRACT PROVISIONS AND SPECIFICATIONS

1. Requirements Contract

(a) This is a requirements contract for services specified in the Sections and Schedules and for the period set forth herein. The quantities of such services specified herein are estimates only and are not purchased hereby. Except as may be otherwise provided herein, in the event the Agency's requirements for services set forth in the Sections and Schedules do not result in orders in the amounts or quantities described as "estimated" in the Sections and Schedules, such event shall not constitute the basis for an equitable price adjustment under this contract.

(b) The Agency shall not be required to purchase from the vendor requirements in excess of the limit on total orders under this contract, if any.

(c) The Agency may issue orders that provide for delivery or performance at multiple destinations.

(d) The Agency shall not be obligated to place any minimum dollar amount of orders under this contract or any minimum number of orders. The utilization of the Vendor for services specified in the Sections and Schedules will be dependent upon the needs and requirements of the agency.

(e) Regulatory or guidance changes prescribed by the USDA or California Department of Education (CDE), during the duration of this contract, shall be considered a basis for renegotiation with prior approval and agreement from CDE, of the terms and conditions of the contract between the Agency and the vendor. Authority for such renegotiation must be requested from CDE, in writing by the Agency, prior to the commencement of any such renegotiation.

2. Pricing

Pricing shall be on the numbers described in Appendix A, "Unit Price Schedule". All bidders must submit bids on the same price schedule provided by the agency. Bid prices must include the price of food, milk (if applicable), packaging, transportation, and all other related costs (e.g., condiments, utensils, etc.) that are essential to the content of the food services.

3. Unit Prices

The unit prices of each meal type that the bidder agrees to furnish must be written in ink or typed in the blank space provided of the Unit Price Schedule, including proper packaging as required in the specifications, and the costs of delivery to the designated sites. Unit prices shall include taxes; but, any charges or taxes that are required to be paid under future laws must be paid by the bidder at no additional charge to the agency.

4. Meal Orders

The agency will order meals on Mondays of the week preceding the week of delivery; orders will be placed for the total number of days in the succeeding week, and will include breakdown totals for each center and each type of meal. The Agency reserves the right to increase or decrease the number of meals ordered on a 24-hour notice (or less if mutually agreed upon between the parties to this contract).

5. Menu-cycle Change Procedure

Meals shall be delivered on a daily basis in accordance with the menu cycle. Deviation from this menu cycle shall be permitted only upon authorization of the Agency. When an emergency situation prevents the vendor from delivering a specified meal component, the vendor shall notify the agency immediately so substitutions can be agreed upon. The Agency reserves the right to periodically suggest menu changes that are within the vendor's food cost.

6. Noncompliance

The Agency reserves the right to inspect and determine the quality of food delivered and reject any meals that do not comply with the requirements and specifications of the contract. The vendor shall not be paid for unauthorized menu changes, incomplete meals, meals not delivered within the specified delivery time period, and meals rejected because they do not comply with the specifications. The agency reserves the right to obtain meals from other sources if meals are rejected due to any of the stated reasons. The vendor shall be responsible for any excess cost, but will receive no adjustment in the event the meals are procured at a lesser cost. The agency or agency representative inspecting shall notify the vendor in writing as to the number of meals rejected and the reasons for rejection.

7. Title III C Assurance

The Vendor assures the agency that no Title III C funds will be applied to the cost of the meals furnished for the program under this contract.

8. Specifications

(a) Packaging

(1) Hot Meal Unit packaging shall be suitable for maintaining meals in accordance with local health standards. Container and overlay should have an airtight closure, be of non-toxic material, and be capable of withstanding temperatures of 400°F (204°C) or higher.

(2) Cold Meal Unit or Unnecessary-to-heat Container and overlay shall be plastic or paper and non-toxic.

(3) Cartons—each carton shall be labeled and the label shall include:

A. The processor's (plant) name and address

B. Item identity and meal type

C. Date of production

D. Quantity of individual units per carton

(4) Meals shall be delivered with the following non-food items: condiments, straws, napkins, single service ware, etc.

(b) Food Preparation

Meals shall be prepared under properly controlled temperatures and assembled not more than 24 hours prior to delivery.

(c) Food Specifications

Bids are to be submitted using the enclosed cycle menu(s) and shall include, at a minimum, the portions specified by the USDA for each meal. Vendors must provide meals according to the enclosed SFSP Meal Pattern and the current CACFP Meal Pattern. Effective October 1, 2017, vendors will be required to provide meals according to the enclosed SFSP Meal Pattern and the new USDA CACFP Infants, Child, and Infants Meal Patterns.

All meat and meat products, except sausage products, shall have been slaughtered, processed, and manufactured in plants inspected under a USDA approved inspection program and bear the appropriate seal. Upon delivery, all meat and meat products must be sound, sanitary, and free of objectionable odors or signs of deterioration.

(d) Product Specifications

Milk and milk products are defined as "...fluid types of pasteurized flavored or unflavored whole milk or low fat milk, or skim milk or cultured buttermilk, which meets State and local standards for such milk..." Milk delivered hereunder shall conform to these specifications.

Note: In CACFP, only low-fat (1 percent) or nonfat milk can be served to individuals two years and older.

9. Delivery Requirements

(a) Deliveries shall be made by the vendor to each park site listed in accordance with the order from the Agency.

(b) Meals shall be delivered, unloaded, and placed in the designated center daily by the vendor's personnel at each of the locations and times listed.

(c) The vendor shall be responsible for the delivery of all meals and dairy products at the specified time. Adequate refrigeration or heating shall be provided during the transportation and delivery of all food to insure the wholesomeness of food at delivery in accordance with state or local health codes.

(d) The Agency reserves the right to add or delete centers. The Agency shall notify the vendor of such amendments not less than one week prior to the required date of service. Any changes in transportation costs that occur as a result of adding or deleting centers shall be negotiated and noted in the modification. The vendor's invoice shall show the cost as a separate item for that center.

10. Supervision and Inspection

The vendor shall provide management supervision at all times and maintain constant quality control inspections to check for portion size, appearance, and packaging, in addition to the quality of products.

11. Record Keeping

(a) Transport records must be prepared by the vendor—one for the vendor, one for center personnel, and one for the Agency. Transport records must be itemized to show the number of meals of each type delivered to each center. Designees of the Agency at each park site will check the adequacy of the delivery and the meals before signing the delivery ticket. Invoices shall be accepted by the agency only if they accurately represent the transport records signed by the Agency's designee at the park site.

(b) The vendor shall maintain records supported by transport records, purchase orders, and production records for this contract or other evidence for inspection and reference to support payments and claims.

(c) The books and records of the vendor pertaining to this contract shall be available for a period of three years from the date the agency submits to CDE the final claim for reimbursement for meals provided under this contract, or until the final resolution of any audits for inspection and audit by representatives of CDE, the USDA, the agency, and the Controller General of the United States at any reasonable time and place.

12. Method of Payment

The vendor shall submit its itemized invoice to the Agency monthly. Each invoice shall give a detailed breakdown of the number of meals delivered and signed for at each center during the preceding week. Payment will be made at the unit price specified in the contract. No payment shall be made unless the required delivery receipts have been signed by the center representative of the Agency.

The Vendor shall submit a monthly invoice in duplicate to the Accounts Payable Division of the Finance Department at the following address: 1600 W. Beverly Blvd.,

Montebello, CA 90640 and/or via email at AP@cityofmontbello.com. Invoice shall be submitted on standard company forms and shall state:

1. Invoice number
2. Invoice period
3. A brief description of work
4. Total amount requested
5. Vendor's tax identification number
6. Location where services were provided

13. Inspection of Facility

(a) The Agency, CDE, and the USDA reserve the right to inspect the vendor's preparation facilities prior to award and without notice at any time during the contract period, including the right to be present during preparation and delivery of meals.

(b) The vendor's facilities shall be subject to periodic inspections by the USDA, state, and local health departments, or any other agency designated to inspect meal quality for the state. This will be accomplished in accordance with USDA regulations.

(c) The vendor shall provide for meals which it prepares to be periodically inspected by the local health department or an independent agency to determine bacteria levels in the meals being prepared, transported, and delivered. Such levels shall conform to the standards which are applied by the local health authority with respect to the level of bacteria which may be present in meals served by other establishments in the locality.

14. Insurance

The Vendor shall procure and maintain for the duration of the contract insurance against claims from injuries to persons or damages to property, which may arise from or in connection with the performance of the work hereunder by the Vendor, its agents, representatives, or employees.

The Vendor shall not commence any work under this contract until he has secured all insurance required by this section and the professional services contract nor shall he allow any subcontractors to commence work on any subcontract until all similar insurance required of the subcontractor has been obtained. In accordance with Section 3700 of the California Labor Code, the Vendor shall (i) maintain adequate worker's compensation insurance under the laws of the State of California for all labor employed by him or any subcontractor under him, or (ii) secure from the Director of Industrial Relations a certificate to self-insure such labor, when such labor comes within the protection of such worker's compensation laws.

All policies shall contain the following: (i) a provision or endorsement naming the City of Montebello and the Montebello City Council, City Council appointed Commissions, and Committees, and all City elective and appointed officers, employees, agents, consultants, as additionally named insured with respect to liabilities arising out of acts or omissions caused by negligence of the Vendor or those working under him in the performance of the contract work, (ii) a provision or endorsement holding the City of Montebello, including the City Council, It's officers, agents, consultants, and employees, harmless from any claims or damages arising from such acts or omissions and stating that the City, including the City's officers, agents, consultants, and employees, will be defended from any such claims, (iii) a provision or endorsement that such insurance is primary insurance of said additionally named insured with respect to such liabilities, and that with respect to such liabilities, any other insurance maintained by said additional insured is excess and not contributing insurance with respect to the insurance required hereunder, (iv) a provision or endorsement providing that such insurance shall not be terminated, canceled, reduced or allowed to expire except upon thirty (30) days prior written notice to the City.

Promptly upon execution of the contract and prior to commencement of any work, Vendor shall furnish the City certificates of insurance covering all policies providing the insurance required hereunder. Insurance requirements are further outlined in the sample Professional Services Agreement found in this RFQ.

Vendor agrees, upon written request, to furnish City with copies of all required policies, certified by an authorized representative of the insurer. All insurance issued under the provisions of this section shall be issued in the form and by insurance organizations approved by the City prior to the commencement of any work hereunder.

15. Availability of Funds

The Agency shall have the option to cancel this contract if the federal government withdraws funds to support the CACFP and or SFSP. It is further understood that, in the event of cancellation of the contract, the agency shall be responsible for meals that have already been assembled and or delivered in accordance with the contract.

16. Number of Meals and Delivery Times

The vendor must provide the exact number of meals ordered. Counts of meals will be made at all centers before meals are accepted. Damaged or incomplete meals shall not be included when the number of delivered meals is determined.

17. Emergencies

In the event of unforeseen emergency circumstances, the vendor shall immediately notify the Agency of the following: (a) the impossibility of on-time delivery; (b) the circumstance(s) precluding delivery; and (c) a statement of whether or not succeeding

deliveries will be affected. No payments will be made for deliveries made later than 1 hour after specified mealtime. Emergency circumstances at the center precluding utilization of meals are the concern of the agency. The agency may cancel orders provided it gives the vendor at least 24 hours' notice. Adjustments for emergency situations affecting the vendor's ability to deliver meals or the agency's ability to utilize meals for periods longer than 24 hours will be mutually worked out between the vendor and the agency.

18. Termination for Cause or Convenience

(a) The Agency reserves the right to terminate the contract if the vendor fails to comply with any of the requirements of the contract. The Agency shall notify the vendor of specific instances of noncompliance in writing. In instances where the vendor has been notified of noncompliance with the terms of the contract and failed to take immediate corrective action, the Agency shall have the right upon a 30-day written notice to terminate the contract. The vendor shall be liable for any damages incurred by the agency. The Agency shall negotiate a repurchase contract on a competitive basis to arrive at a fair and reasonable price.

(b) The Agency reserves the right to terminate the contract for convenience.

(c) The Agency shall by written notice to the vendor, terminate the right of the vendor to proceed under the contract if it is found by the Agency that gratuities in the form of entertainment, gifts, or otherwise were offered or given by the vendor to any officer or employee of the agency, with a view toward securing the contract or securing favorable treatment with respect to the awarding or amending of the contract; provided that the existence of the facts upon which the agency makes such findings shall be in issue and may be reviewed in any competent court.

(d) In the event the contract is terminated as provided in paragraph (c) hereof, the Agency shall be entitled (i) to pursue the same remedies against the vendor as it could pursue in the event of a breach of the contract by the vendor, and (ii) as a penalty in addition to any other damages in an amount which shall not be less than three nor more than 10 times the cost incurred by the vendor in providing any such gratuities to any such officer or employee.

(e) The rights and remedies of the agencies provided in this clause shall not be exclusive and are in addition to any other rights and remedies provided by law or under this RFQ and the contract.

19. Subcontracts and Assignments

The vendor shall not subcontract with any other vendor for the total meal, with or without milk, or for the assembly of the meal; and shall not assign, without the advance written consent of the agency, this contract or any interest therein. In the

event of any assignment, the vendor shall remain liable to the Agency as principal for the performance of all the vendor's obligations under this contract.

20. Equal Opportunity

The following clause is applicable unless this contract is exempt under the rules, regulations, and relevant orders of the Secretary of Labor (Title 41, *Code of Federal Regulations*, Chapter 60).

During the performance of this contract, the vendor agrees as follows:

Vendor shall comply with E.O. 11246, Equal Employment Opportunity, as amended by E.O. 11375, Amending Executive Order 11246 Relating to Equal Employment Opportunity, and as supplemented by regulations at 41 CFR Part 60, Office of Federal Contract Compliance Programs, Equal Employment Opportunity, Department of Labor.

Vendor shall comply with applicable federal, state, and local laws and regulations pertaining to wages, hours, and conditions of employment. In connection with vendor's performance of work under this Agreement, Vendor agrees not to discriminate against any employee(s) or applicant(s) for employment because of sex, age, race, color, religion, creed, sexual orientation, gender identity, national origin, or disability. Vendor shall also comply with applicable Civil Rights laws as amended including but not limited to Title VI of the Civil Rights Act of 1964; Title IX of the Education Amendments of 1972; Section 504 of the Rehabilitation Act of 1973; the Age Discrimination Act of 1975; Title 7 CFR parts 15, 15a, and 15b; the Americans with Disabilities Act; and FNS Instruction 113-6, Civil Rights Compliance and Enforcement In any Child Nutrition Program.

The vendor will take affirmative action to ensure that the evaluation and treatment of his/her employees and applicants for employment are free of such discrimination. Such action shall include, but not be limited to, the following: employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship.

Vendors and subcontractors shall comply with the provisions of the Fair Employment and Housing Act (*Government Code*, Section 12900 et seq.) and the applicable regulations promulgated thereunder (California *Administrative Code*, Title 2, Section 7285.0 et seq.) The applicable regulations of the Fair Employment and Housing Commission implementing *Government Code*, Section 12990, set forth in Chapter 5 of Division 4 of Title 2 of the California *Administrative Code* are incorporated into this contract by reference and made a part hereof as if set forth in full. The vendor and the vendor's subcontractors shall give written notice of their obligations under this clause to labor organizations with which they have a collective bargaining or other agreement.

The vendor will furnish all information and reports required by Executive Order No. 11246 of September 24, 1965, as amended by Executive Order No. 11375, and by the

rules, regulations, and orders of the Department of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(d) In the event of the vendor's noncompliance with the equal opportunity clause of this contract or with any of the said rules, regulations, or orders, this contract may be canceled, terminated, or suspended, in whole or in part, and the vendor may be declared ineligible for further state or federally funded contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, as amended by Executive Order No. 11375 of October 13, 1967, and such other sanctions as may be imposed and remedies invoked as provided in Executive Order No. 11246 of September 24, 1965, as amended by Executive Order 11375 of October 13, 1967, or by rule, regulations, or order of the Secretary of Labor, or as otherwise provided by law.

REQUIRED INFORMATION AND BID FORMAT

In order to be considered for selection, respondent individuals or firms shall submit a bid that addresses each of the following criteria, and shall also provide resumes and evidence of qualifications to provide the services listed in this RFQ. All bids must be electronically submitted through PlanetBids' Bidder Portal, accessed through the City of Montebello's official website at http://www.cityofmontebello.com/rfp-bids/bid-opportunities.html. All Prospective Bidders must register to bid through the PlanetBids Vendor Portal found on the City of Montebello's website at the link provided above.

The City reserves the right to reject any and all bids as "non-responsive" for failure to provide the required information and abide by the required format outlined in this RFQ.

1. Letter of Introduction

a. Provide a letter of introduction signed by a Principal or Senior Officer of the company.
b. If submitting as a team, note which team is the prime consultant or lead joint venture partner, if applicable.
c. Include the name, title and resume of the person who will be the lead/project manager and the name(s) and title(s) and resumes for the individuals that will supervise or deliver services.

2. Firm Information and Qualifications

a. Number of years firm has been in business
b. List the company experience in providing similar services, including a chart that indicates name, personnel qualifications, state registrations, health department certifications and/or any certifications relevant to the type of SFSP services proposed to be provided.

3. References

a. Provide a list of at least 3 current references. Include name of individual or organization, job title, email address, mailing address, telephone number(s). Identify the type of services provided to each individual/organization, the location where the services were provided, and the dates of service.

4. Firm's Capabilities and Abilities

a. Provide a statement demonstrating your firm's or team's ability to accomplish the scope of services in a comprehensive and thorough manner to meet the needs of the City of Montebello addressing scope of work identified above.

5. Contract Documents

a. Utilize the attached Project Bid Sheet (Appendix A) to provide a proposed schedule of fees for each lunch or snack to be provided.
b. Vendor must fill out the attached Terms and Conditions (Appendix B).

c. Vendor must provide a 40-day sample menu cycle.

6. Customer Service

a. Describe how your firm provides for responsiveness to phone calls or email from City staff; and discuss your anticipated relationship with the City of Montebello and your organization.

7. Standard Professional Services Agreement

a. Include a statement regarding whether the City's standard professional services agreement is acceptable as is or whether any modification would be proposed.

8. List any lawsuits or arbitration proceedings that have been initiated by or against your firm in the past five (5) years. Briefly state the nature of the action and the outcome.

EVALUATION PROCESS AND SELECTION CRITERIA

Evaluation of the proposals will be based upon a competitive selection process. Selection may not, however, be limited to price alone. City staff and evaluators will review all statements of proposals received timely. The candidate will be evaluated on the following criteria:

1. Cost per meal/snack - 40%
2. Adequacy of facilities for food preparation, with approved licensing certification. Facilities must meet all applicable state and local health, safety, and sanitation standards – 20%
3. Previous experience performing services similar in nature and scope - 20%
4. References - 20%

The vendor must satisfy the City of its ability to perform the services required. The vendor must demonstrate and document a history of timely and satisfactory performance of similar projects in a manner, which addresses the stated evaluation criteria. The vendor shall be responsible for the accuracy of information supplied concerning references. In addition, the City may consider evidence of untimely and unsatisfactory performance on prior similar projects, or litigation by the vendor on previous contracts to be grounds for disqualification.

The City reserves the right to reject any or all Quotations, amend the RFQ, and to discontinue or re-open the process at any time. The City reserves the right to request and obtain, from one or more vendors, supplementary information as may be necessary for the City to analyze the proposal pursuant to contract selection criteria. Upon completion of the evaluation phase, the City will select those vendors for interviews whose bids and qualifications most closely conform to the requirements of this RFQ, if required. The vendor, by submitting a response to this RFQ, waives all rights to protest

or seek any legal remedies whatsoever regarding any aspect of this RFQ. The City may choose to interview one or more firms responding to this RFQ, and may enter into more than one contract with multiple individuals or firms, if City determines that is the best way to address the full range of services needed under this RFQ.

Questions during the solicitation period are preferably received by email, and may be addressed to:

Attn: David Sosnowski
Director of Recreation & Community Services
dsosnowski@cityofmontebello.com
1600 W. Beverly Blvd.
Montebello, CA 90640
(323) 887-4540

CONTRACT WITH THE CITY AND ANTICIPATED TIMING FOR BEGINNING SERVICES

The selected vendor will be required to enter into an Agreement with the City. The Agreement will include the final scope of work that is negotiated with the vendor. The City Manager is the authorizing entity to issue contracts with the Montebello City Council approval, and the contract will not take effect until it is approved by the City Council (as required) and fully executed by Vendor and City.

During the term of the contract, the Vendor will be required to keep informed of applicable local, State and Federal laws and regulations, including, but not limited, to those pertaining to conflict of interest, which in any manner affect those employed by the vendor or in any way affect the performance of the requested services.

The City's standard professional services agreement is attached, including insurance requirements. As part of your proposal, please indicate whether the standard agreement is acceptable or whether you would like to propose modifications to the standard agreement.

SUBMITTAL REQUIREMENTS

Proposals will be received through 10:00 A.M. on Tuesday, June 1, 2021.

All bids must be Electronically submitted through PlanetBids' Bidder Portal, accessed through the City of Montebello's official website at: http://www.cityofmontebello.com/rfp-bids/bid-opportunities.html .

APPENDIX "A"

UNIT PRICE SCHEDULE

RFQ 21- 53

SUMMER FOOD SERVICE PROGRAM PROVIDER

Unit Price Schedule

Bidders are to submit prices on the following meal types meeting the contract specifications set forth in this RFQ for meals to be delivered to all of the sites stated on page 5.

A. Meal Type		B. Estimated Servings Per Day	C. Estimated Number of Serving Days	D. Unit Price	E. Total Price
Snack	SFSP	350-400	40	$	$
Lunch	SFSP	350-400	40	$	$

Bidders shall submit their bids on an "all or none" basis. Except as otherwise provided in this solicitation, if a contract is awarded as a result of this solicitation, it will bind the agency during the term of the contract, secure all of the identified meals from the successful bidder, and such contract shall bind the bidder/vendor to perform all such work ordered by the agency at prices specified in the contract.

In the event of any inconsistencies or errors, the unit price (D) shall take precedence.

	1 oz.	alternate protein product or
	1 oz.	cheese or
	1/2 large	egg or
	1/4 cup	cooked dry beans or peas or
	2 Tbsp.	peanut or other nut or seed butter or
	1 oz.	nuts and/or seeds or
	4 oz.	yogurt

[1] Fruit or vegetable juice must be full-strength. Juice cannot be served when milk is the only other snack component.

[2] Breads and grains must be made from whole-grain or enriched meal or flour. Cereal must be whole-grain or enriched or fortified.

[3] A serving consists of the edible portion of cooked lean meat or poultry or fish.

[4] Yogurt may be plain or flavored, unsweetened or sweetened.

SAMPLE PROFESSIONAL AGREEMENT

CITY OF MONTEBELLO

PROFESSIONAL SERVICES AGREEMENT NO. _____
BY AND BETWEEN
CITY OF MONTEBELLO
AND
_____

THIS AGREEMENT ("Agreement") is made and entered into on , 2021, by the CITY OF MONTEBELLO, a municipal corporation (hereinafter referred to as "CITY") and ___ (hereinafter referred to as "VENDOR"). CITY and VENDOR are sometimes referred to herein individual as the "Party," and jointly as the "Parties."

RECITALS

WHEREAS, the CITY desires to retain a qualified professional vendor to provide meals for the Summer Food Service Program at various sites in the CITY; and

WHEREAS, the VENDOR represents that it is fully qualified to perform such services by virtue of its experience and the training, education and expertise of its principals and employees.

NOW THEREFORE, in consideration of performance by the Parties of the covenants and conditions herein contained, the Parties hereto agree as follows:

SECTION 1. SERVICES / COMPENSATION.

A. All terms, conditions, requirements, and provisions of the Request for Quotes for Summer Food Service Provider (, 2021) ("Request for Quotes"), as such is set forth fully in **Exhibit "A"** hereto, are hereby incorporated fully herein by this reference and shall be binding on the Parties. To the extent of a conflict between the terms of this Agreement and that set forth in any exhibits or attachments hereto, the terms of this Agreement shall govern.

B. VENDOR shall provide to CITY all labor, equipment, materials and incidental necessary for providing the custodial services as set forth fully in the Request for Quotes, as such is set forth fully in **Exhibit "A"** hereto and incorporated fully herein by this reference (hereinafter "Professional Services").

C. VENDOR shall be shall be compensated for performance of the Professional Services as set forth in the Schedule of Compensation attached hereto as **Exhibit "B"** and incorporated fully herein by this reference ("Compensation"). VENDOR shall provide an itemized billing statement to the CITY each month for Professional Services performed. VENDOR shall no incur fees or costs which exceed the Compensation without the prior written consent of the CITY.

SECTION 2. TERM.

This Agreement shall commence upon issuance of the Notice to Proceed by the City ("Effective Date"), and shall expire one (1) year from the Effective Date, unless terminated earlier as

hereinafter provided. This Agreement may be extended for up to two (2) additional years upon such terms and conditions mutually agreed upon by the Parties in writing.

SECTION 3. PERFORMANCE.

a. VENDOR shall at all times, faithfully, competently, and to the best of its ability, experience and talent, perform all tasks described herein.

b. VENDOR shall employ, at a minimum, generally accepted standards and practices utilized by companies engaged in providing similar services, as are required of Vendor hereunder, in meeting its obligations under this Agreement.

c. VENDOR shall be knowledgeable of and subject to all CITY ordinances, rules and regulations, standard operating procedures, and the supervisory chain of command.

d. VENDOR shall have the right to retain, subject to CITY's approval, additional individuals, consultants or subvendors to assist in the completion of services as herein defined. Compensation for additional individuals, consultants or subvendors shall be the sole and exclusive responsibility of VENDOR.

e. VENDOR shall retain all original reports, field and office notes, correspondence, calculations, maps, and other documents specifically related to the services provided by VENDOR pursuant to this Agreement, other than documents which are exempt from disclosure pursuant to the attorney-client privilege or any other law. Said documents shall be made available for inspection by the CITY upon request.

SECTION 4. WORK PRODUCT.

a. VENDOR hereby agrees that all work product produced pursuant to this Agreement, and provided to CITY during and upon completion of this Agreement, shall be the property of the CITY, and ownership of said work product shall be retained by the CITY. VENDOR may take and retain copies of such written products as desired, but no such written products shall be the subject of a copyright application by VENDOR.

b. All data, documents, discussion, or other information developed or received by VENDOR or provided for performance of this Agreement are deemed confidential and shall not be disclosed by VENDOR without prior written consent by the CITY. The CITY shall grant such consent if disclosure is legally required. All such written products shall be returned to the CITY upon the termination or expiration of this Agreement. VENDOR agrees that the covenants contained in this Article shall survive the expiration or termination of this Agreement.

SECTION 5. EXTRA SERVICES.

No extra services over and above the Compensation shall be rendered by VENDOR under this Agreement unless such extra services first shall have been duly authorized in writing by the City Manager or his/her designee.

SECTION 6. CITY SUPERVISION.

The City Manager shall have the right of general supervision of all work performed by VENDOR and shall be the CITY agent with respect to obtaining VENDOR's compliance hereunder. No

payment for services rendered under this Agreement shall be made without the prior approval of the City Manager.

SECTION 7. TERMINATION.

In the event that either Party hereto falls or refuses to perform any of the provisions of this Agreement at the time and in the manner required, the non-defaulting party shall give the defaulting party written notice of the default, the nature of the default, and of the steps necessary to cure the default.

a. Termination for Cause. In the event that any of the provisions of the Agreement are violated by either party, the non-defaulting Party may terminate the Agreement by serving written notice upon the other Party, listing the violation(s) and its intent to terminate such Agreement unless within ten (10) days after the serving of such notice, such violation shall cease or be rectified, the contract shall upon the expiration of an additional thirty (30) days cease and terminate. Violations by Vendor which cannot be corrected within ten (10) days, said contract shall at the option of the City cease and terminate upon the giving of like notice. In the event of any such termination for default by Vendor, the City may take over the work and prosecute the same to completion by contract or otherwise for the account and at the expense of the Vendor. The Vendor and his sureties shall be liable to the City for any excess cost occasioned in the event of any such termination. This change shall not be construed to prevent the termination, for other causes authorized by law or other provisions of this contract. In the event of a termination for cause, VENDOR shall only be entitled to the Compensation for those Professional Services satisfactory performed on or before the effective date of termination.

b. Termination For Convenience. The CITY shall have the option, at its sole discretion and without cause, to terminate this Agreement in whole, or in part, by giving ten (30) business days' written notice to VENDOR. Upon the termination of this Agreement as provided herein, the CITY shall provide to VENDOR the part of Compensation which would otherwise be payable to VENDOR for services VENDOR had completed as of the date of termination, less the amount of all previous payment with respect to the Compensation. Further, upon such a termination for convenience by CITY, the Parties agree that VENDOR shall be reimbursed for any "non-refundable" costs that VENDOR has incurred for its services under this Agreement, provided that: (1) such "non- refundable" costs were incurred by the VENDOR prior to the date of termination, and (2) that VENDOR provides the CITY with adequate proof that VENDOR incurred the costs, and is unable to be seek a refund for such costs. Such "non-refundable" costs may include, but are not limited to, travel reservations incurred by VENDOR for its performance of services under this Agreement. VENDOR agrees to cease all work under this Agreement on or before the effective date of any notice of termination.

SECTION 8. EMPLOYMENT OF CITY EMPLOYEES.

No regular employee of the CITY shall be employed by VENDOR during the term of this Agreement.

SECTION 9. NON-LIABILITY OF CITY OFFICIALS AND EMPLOYEES.

No official or employee of the CITY shall be personally liable to VENDOR in the event of any default or breach by CITY, or for any amount which may become due to VENDOR.

SECTION 10. INDEPENDENT VENDOR.

a. The VENDOR is and shall, at all times, remain as to the CITY a wholly independent vendor. Neither the CITY nor any of its elected officials, officers, employees or agents shall have control over the conduct of the VENDOR except as expressly set forth in this Agreement. The VENDOR shall not at any time or in any manner represent that he is in any manner an elected official, officer, employee or agent of the CITY. No employee benefits shall be available to VENDOR in connection with the performance of this Agreement. Except as provided in this Agreement, CITY shall not pay salary, wages, or other compensation to VENDOR for performance hereunder for CITY, CITY shall not be liable for compensation to VENDOR, VENDOR's employees or VENDOR'S subcontractors for injury or sickness arising out of performing services hereunder.

b. The parties further acknowledge and agree that nothing in this Agreement shall create or be construed to create a partnership, joint venture, employment relationship or any other relationship except as set forth in this Agreement.

c. CITY shall not deduct from the Compensation paid to VENDOR any sums required for Social Security, withholding taxes, FICA, state disability insurance or any other federal, state or local tax or charge which may or may not be in effect or hereinafter enacted or required as a charge or withholding on the compensation paid to VENDOR. CITY shall have no responsibility to provide VENDOR, its employees or subcontractors with workers' compensation insurance or any other insurance.

SECTION 11. PERS ELIGIBILITY INDEMNITY.

a. In the event that VENDOR or any employee, agent, or subcontractor of VENDOR providing services under this Agreement claims or is determined by a court of competent jurisdiction or the California Public Employees Retirement System (PERS) to be eligible for enrollment in PERS as an employee of the CITY, VENDOR shall indemnify, defend, and hold harmless CITY for the payment of any employee and/or employer contributions for PERS benefits on behalf of VENDOR or its employees, agents, or subcontractors, as well as for the payment of any penalties and interest on such contributions, which would otherwise be the responsibility of CITY.

b. Notwithstanding any other agency, state or federal policy, rule, regulation, law or ordinance to the contrary, VENDOR and any of its employees, agents, and subcontractors providing service under this Agreement shall not qualify for or become entitled to, and hereby agree to waive any claims to, any compensation, benefit, or any incident of employment by CITY, including but not limited to eligibility to enroll in PERS as an employee of CITY and entitlement to any contribution to be paid by CITY for employer contribution and/or employee contributions for PERS benefits.

SECTION 12. LEGAL RESPONSIBILITIES.

VENDOR shall at all times observe and comply with all applicable laws, ordinances, codes and regulations of the federal, state and local governments including, but not limited to the Montebello Municipal Code. The CITY, and its appointed or elected officers, employees, or agents, shall not be liable at law or in equity occasioned by failure of the VENDOR to comply with this section.

SECTION 13. INDEMNIFICATION.

The VENDOR agrees to, and shall defend, indemnify, protect and hold harmless, the CITY, its elected and appointed boards, officers, officials, employees, agents and volunteers from and against any and all claims, demands, lawsuits, defense costs, civil, penalties, expenses, causes of action, and judgments at law or in equity, or liability of any kind or nature which the CITY, its elected and appointed boards, officers, officials, employees, agents and volunteers may sustain or incur or which may be imposed upon them for injuries or deaths of persons, or damage to property arising out of VENDOR'S negligent or wrongful act, or omission under the terms of this Agreement, except only liability arising out of the sole negligence of the CITY.

SECTION 14. INSURANCE COVERAGE.

During the term of this Agreement, VENDOR shall carry, maintain, and keep in full force and effect insurance against claims for death or injuries to persons or damages to property that may arise from or in connection with VENDOR'S performance of this Agreement. Such insurance shall be of the types and in the amounts as set forth below:

- **Commercial General Liability (CGL):** Insurance Services Office Form CG 00 01 covering CGL on an "occurrence" basis for bodily injury and property damage, including products-completed operations, personal injury and advertising injury, with limits no less than $2,000,000 per occurrence. If a general aggregate limit applies, the limit shall be twice the required occurrence limit.

- **Automobile Liability Insurance:** Insurance Services Office Form Number CA 0001 covering, Code 1 (any auto), or if VENDOR has no owned autos, Code 8 (hired) and 9 (non-owned), with limit no less than $1,000,000 per accident for bodily injury and property damage.

- **Worker's Compensation** insurance as required by the laws of the State of California, with Statutory Limits, and Employer's Liability Insurance with limit of no less than $1,000,000 per accident for bodily injury or disease.

- **Professional Liability** insurance appropriate to the VENDOR'S profession, with limit no less than $1,000,000 per occurrence or claim, $2,000,000 aggregate.

If the VENDOR maintains higher limits than the minimums shown above, the CITY requires and shall be entitled to coverage for the higher limits maintained by the VENDOR.

CONTACTOR shall require each of its subcontractors, if any, to maintain insurance coverage that meets all of the requirements of this Agreement.

The policy or policies required by this Agreement shall be issued by an insurer admitted in the State of California and with a current rating of at least A:VII in the latest edition of Best's Insurance Guide.

Each insurance policy required above shall state that coverage shall not be canceled, except after thirty (30) days' prior written notice (ten (10) days for non-payment) has been given to the City. VENDOR agrees that if it does not keep the aforesaid insurance in full force and effect CITY may either (i) immediately terminate this Agreement for Cause; or (ii) take out the necessary insurance and pay, at VENDOR'S expense, the premium thereon.

At all times during the term of this Agreement, VENDOR shall maintain on file with CITY's

Risk Manager a certificate or certificates of insurance showing that the aforesaid policies are in effect in the required amounts and naming the CITY as an additional insured. VENDOR shall, prior to commencement of work under this Agreement, file with CITY's Risk Manager such certificate(s).

VENDOR shall provide proof that policies of insurance required herein expiring during the term of this Agreement have been renewed or replaced with other policies providing at least the same coverage. Such proof will be furnished at least two weeks prior to the expiration of the coverages.

The general liability and automobile policies of insurance required by this Agreement shall contain an endorsement naming CITY, its officers, employees, agents and volunteers as additional Insureds. All of the policies required under this Agreement shall contain an endorsement providing that the policies cannot be canceled or reduced except on thirty days' prior written notice to CITY. VENDOR agrees to require its insurer to modify the certificates of insurance to delete any exculpatory wording stating that failure of the insurer to mail written notice of cancellation imposes no obligation, and to delete the word "endeavor" with regard to any notice provisions.

The insurance provided by VENDOR shall be primary to any coverage available to CITY. Any insurance or self-insurance maintained by CITY, its officers, employees, agents or volunteers, shall be in excess of VENDOR'S insurance and shall not contribute with it.

All insurance coverage provided pursuant to this Agreement shall not prohibit VENDOR, and VENDOR'S employees, agents or subcontractors, from waiving the right of subrogation prior to a loss. VENDOR hereby waives all rights of subrogation against the CITY.

Any deductibles or self-insured retentions must be declared to and approved by the CITY. At the option of CITY, VENDOR shall either reduce or eliminate the deductibles or self-insured retentions with respect to CITY, or VENDOR shall procure a bond guaranteeing payment of losses and expenses.

Procurement of insurance by VENDOR shall not be construed as a limitation of VENDOR'S liability or as fall performance of VENDOR'S duties to indemnify, hold harmless and defend under Section 9 of this Agreement.

SECTION 15. SUBCONTRACT, ASSIGNMENT OR DELEGATION.

VENDOR shall not subcontract, delegate or assign its duties or rights hereunder, either in whole or in part, without the prior written consent of CITY. Any proposed subcontract, delegation, or assignment shall provide a description of the services to be covered, identification of the proposed sub-vendor, delegee, or assignee, and an explanation of why and how the same was selected, including the degree of competition involved.

Any subcontract, delegation or assignment shall be made in the name of VENDOR and shall not bind or purport to bind CITY and shall not release VENDOR from any obligations under this Agreement including, but not limited to, the duty to properly supervise and coordinate the work of employees, assignees, delegees or sub-vendors. No such subcontract, delegation or assignment shall result in any increase in the amount of total compensation payable to VENDOR under the Agreement.

SECTION 16. NO WAIVER.

Waiver by any party hereto of any term, condition or covenant of this Agreement shall not constitute the waiver of any other term, condition or covenant hereof.

SECTION 17. DISPUTE RESOLUTION; GOVERNING LAW.

Disputes regarding the interpretation or application of any provision(s) of this Agreement shall, to the extent reasonably feasible, be resolved through good faith negotiations between the Parties. If any action at law or in equity is brought to enforce this Agreement or because of alleged dispute, breach, default or misrepresentation in connection with the provisions of this Agreement, the prevailing party in such action shall be entitled to reasonable attorney's fees, expert fees, costs and necessary disbursements incurred in that action or proceeding, in addition to such other relief as may be sought and awarded. The venue for any litigation shall be County of Los Angeles, California. The Parties agree that the covenants contained in this Article shall survive the expiration or termination of this Agreement.

SECTION 18. ATTORNEY'S FEES AND COSTS.

If litigation is reasonably required to enforce or interpret the provisions of this Agreement, the prevailing party in such litigation shall be entitled to an award of reasonable attorney's fees and costs in addition to any other relief to which it may be entitled.

SECTION 19. WARRANTIES.

Each of the parties represents and warrants to one another as follows:

a. It has received independent legal advice from its attorneys with respect to the advisability of entering into and executing this Agreement;

b. In executing this Agreement, it has carefully read this Agreement, knows the contents thereof, and has relied solely on the statements expressly set forth herein and has placed no reliance whatsoever on any statement, representation, or promise of any other party, or any other person or entity, not expressly set forth herein, nor upon the failure of any other party or any other person or entity to make any statement, representation or disclosure of *any* matter whatsoever; and

c. It is agreed that each party has the full right and authority to enter into this Agreement, and that the person executing this Agreement on behalf of either party has the full right and authority to fully commit and bind such party to the provisions of this Agreement.

SECTION 20. MISCELLANEOUS.

a. The descriptive paragraph headings of this Agreement are included for purposes of convenience only and shall not control or affect the construction of interpretation of any of its provisions.

b. Whenever the context hereof shall so require, the singular shall include the plural, the male gender shall include the female gender, and the neuter and vice versa.

c. In case any one or more of the provisions contained in this Agreement shall for any reason be held to be invalid, illegal, or unenforceable in any respect, such invalidity, illegality, or unenforceability shall not affect any other provision hereof and this Agreement shall be construed as if such invalid, illegal, or unenforceable provisions had never been contained herein.

d. The representations and warranties made by the parties to this Agreement shall survive the consummation of the transaction herein described.

e. This Agreement may be signed in any one or more counterparts all of which taken together shall be but one and the same Agreement. Any signed copy of this Agreement or of any other document or agreement referred to herein, or copy or counterpart thereof, delivered by facsimile transmission, shall for all purposes be treated as if it were delivered containing an original manual signature of the party whose signature appears in the facsimile and shall be binding upon such party in the same manner as though an originally signed copy had been delivered.

f. Each of the parties acknowledges that it has been represented by independent counsel of its own choosing, or if it has not been so represented, it has been admonished to obtain independent counsel and has freely and voluntarily waived and relinquished the right to counsel. Each party who has not obtained independent counsel acknowledges that the failure to have independent legal counsel will not excuse such party's failure to perform under this Agreement or any agreement referred to in this Agreement.

SECTION 21. NOTICE.

All notices, demands, requests or approvals to be given under this Agreement shall be given in writing and conclusively shall be deemed served when delivered personally or on the second business day after the deposit thereof in the United States mail, postage prepaid, registered or certified, addressed as hereinafter provided. All notices, demands, requests, or approvals hereunder shall be given to the following addresses or such other addresses as the Parties may designate by written notice:

David Sosnowski
Recreation and Community Services Department
City of Montebello
1600 West Beverly Boulevard
Montebello, California 90640
E-mail: dsosnowski@cityofmontebello.com

SECTION 22. NON-DISCRIMINATION AND EQUAL OPPORTUNITY EMPLOYER.

In the performance of this Agreement, VENDOR shall not discriminate against any employee, subcontractor, or applicant for employment because of race, color, creed, religion, sex, marital status, national origin, ancestry, age, physical or mental handicap, mental condition or sexual orientation. VENDOR will take affirmative action to ensure that subcontractor and applicants are employed, and that employees are treated during employment, without regard to their race, color, creed, religion, sex, marital status, national origin, ancestry, age, physical or mental handicap, medical condition or sexual orientation.

SECTION 23. CONFLICT OF INTEREST.

VENDOR covenants that it presently has no interest and shall not acquire any interest, direct or indirect, which may be affected by the services to be performed by VENDOR under this Agreement, or which would conflict in any manner with the performance of its services hereunder. VENDOR further covenants that, in performance of this Agreement, no person having any such interest shall be employed by it. Furthermore, VENDOR shall avoid the appearance of having any interest that would conflict in any manner with the performance of its services pursuant to this Agreement.

VENDOR covenants not to give or receive any compensation, monetary or otherwise, to or from the ultimate vendor(s) of services to CITY as a result of the performance of this Agreement, or the services that may be procured by the CITY as a result of the recommendations made by VENDOR. VENDOR's covenant under this section shall survive the termination of this Agreement.

SECTION 24. ENTIRE AGREEMENT.

This Agreement contains the entire understanding between the CITY and VENDOR. Any prior agreements, promises, negotiations or representations not expressly set forth herein are of no force or effect. Subsequent modifications to this Agreement shall be effective only if in writing and signed by each party. If any term, condition or covenant of this Agreement is held by a court of competent jurisdiction to be invalid, void or unenforceable, the remaining provisions of this Agreement shall be valid and binding.

CITY OF MONTEBELLO

CITY COUNCIL AGENDA STAFF REPORT

TO: Honorable Mayor and City Council Members

FROM: René Bobadilla, P.E., City Manager

BY: James Enriquez, P.E., Director of Public Works / City Engineer

SUBJECT: **Approval of a Change Order to the Construction Contract with Gentry Brothers, Inc. – Beach Street Pavement and Storm Drain Rehabilitation Project - Phase 1 (From Vail Avenue to 5th Street), CP No. 883**

DATE: April 13, 2022

RECOMMENDATIONS:

It is recommended that the City Council:

1) Find that the requested "Changes in Work" for the project (Attachment A) have no significant effect on the environment and approve the changes in the aggregate amount of $389,870. The final contract amount with Gentry Brothers, Inc. is increased to $1,315,897; and

2) Take such additional, related, action that may be desirable.

FISCAL IMPACT

The Fiscal Year 2021-22 Capital Improvement Program (CIP) Budget approved by the City Council at the June 23, 2021 meeting includes a total amount of $2,200,000 for the Beach Street Pavement and Storm Drain Rehabilitation Project, including Phase 1 and Phase 2. The Project is funded entirely from the Road Maintenance and Rehabilitation Act (SB1) (Fund 201).

The total project cost is estimated at $1,853,545, including the recommended change orders and contingency, and is fully funded at this time, No additional appropriations are recommended.

BACKGROUND

On December 8, 2021, the City Council awarded a construction contract to the lowest responsive and responsible bidder, Gentry Brothers, Inc., in an amount not-to-exceed $926,027 for Phase 1 of the project from Vail Avenue to 5th Street.

Phase 2 of the project from 5th Street to Bluff Road had been delayed because it included the replacement of a storm drain that required a permit from Los Angeles County Department of Public Works. In January 2022, the City Council authorized the replacement of the storm drain under an emergency declaration following storm damage that occurred in December 2021. The storm drain replacement was completed in March 2022, allowing the road reconstruction of this segment to move forward. Staff recommends adding this work to the Phase 1 contract at the extended unit prices bid. The total cost for adding this segment of road work is $302,270. Construction of this segment under a separate contract would add additional administrative costs for preparing a separate bid package and for managing the bid and construction of an additional project. It would also delay the repair of this segment of Beach Street by several months.

Additionally, the contractor submitted a request for additional compensation for increased asphalt material costs that are beyond their control (Attachment B). The price increase is related to the recent sharp increase in the price of petroleum, a key ingredient in asphalt. The material supplier has indicated that the cost of the asphalt has increased by $15 per ton since the original bid was submitted. This increase applied over the tonnage of the entire project results in a total project cost increase of $87,600. Payment of this added cost will ensure the asphalt is available without delaying the project construction schedule, which could expose the project to even further material price increases due to the current volatility of oil prices.

ANALYSIS

An updated summary of total projected costs for the subject project is as follows:

$	247,700	Engineering Design Services (West & Associates awarded on 8/12/2020 & 11/10/2021)
$	92,126	Construction Management/Inspection (AIM Consulting Services awarded on 1/12/2022)
$	926,849	Original Authorized construction contract (Gentry Brothers, Inc. awarded on 12/8/2021)
$	389,870	Change Orders (Recommended)
$	197,000	Contingency (10%)
$	**1,853,545**	**Total Project Cost**

SUMMARY

The City Council will consider approving a change order, in the amount not-to-exceed $389,870 to the construction contract with Gentry Brothers, Inc. (GBI) for C.P. No. 883 – Beach Street Pavement and Storm Drain Rehabilitation Project. Upon the approval by the City Council of the recommended actions, staff will direct the contractor to proceed with the proposed additional work.

ATTACHMENTS:

A. Attachment A – Changes in Work Summary
B. Attachment B – Contractor Request for Additional Compensation

ATTACHMENT A

CHANGES IN WORK SUMMARY
April 13, 2022

BEACH STREET PAVEMENT AND STORM DRAIN REHABILITATION PROJECT (FROM VAIL AVENUE TO BLUFF ROAD)

CP NO. 883

Project Description:

The project consists of roadway resurfacing/reconstruction of Beach Street from Vail Avenue to Bluff Road. Work includes repair of damaged concrete sidewalk, cub, gutter, cross gutters and ADA ramps. The existing asphalt with be removed or cold-milled and resurfaced with new asphalt.

Changes in Work:

(1)	Extended project limits adding from 5th St to Bluff Rd	□ 302,270
(2)	Increased cost of Asphalt	□ 87,600
	Total Changes in Work	**$ 389,870**

Description of Changes:

(1) The project had been split into two phases. Phase 1 was from Vail Ave to 5th St. Phase 2 was from 5th St to Bluff Rd. The phasing was due to the replacement of the storm drain from 5th St to Bluff Rd. Since the storm drain replacement was delayed by permits required by LA County Department of Public Works, Phase 1 was bid for construction to accelerate the completion of the majority of the project. The storm drain was recently replaced in an emergency contract following storm damage in December 2021. Now that the storm drain work is completed, the road resurfacing work can be completed. The recommended cost of □302,270 extends the contract unit prices bid.

(2) The contractor has requested compensation for increased asphalt material cost that is beyond their control. The contractor submitted invoicing from the asphalt supplier demonstrating that the cost of asphalt material has increased since the original bid due to the sharp increase in the cost of petroleum. The increase is □15 per ton (from □60.41 to □75.41 per ton). The total increase for the project is □87,600.

Revised Contract Amount:

Original contract amount	□926,027

Changes in work to be authorized	□389.870
Revised contract amount	**$ 1,315,897**
Percent total change to original contract amount	42.1%

Montebello, CA 90640

RE: Beach Street Pavement Rehabilitation Project - Asphalt Price Increase
Project # CP No. 882

Mr. James Enriquez:

As you are able to see from the attached letters from Holliday Rock and Kelterite, the COVID-19 pandemic, coupled with political instability in Europe, has caused a significant increase in the price of materials. Specifically, our asphalt suppliers have had to substantially increase the cost of asphalt delivery on account of increased oil and natural gas prices. Previous binder pricing is not being honored, resulting in weekly price increases.

This increase is in addition to previous price increases. For example, the original quote we received put the price per ton at $60.41. This was material cost only. We recently received a revised Materials Quote, dated March 22, 2022, which indicated that the new price per ton would be $75.41. This represents a total increase in material price of $15.00 per ton. Given the fact that the California Crude Oil Price index had oil at $298.80 a year ago and now it is $507.20, this is not surprising.

The price increases are indicative of a critical supply shortage within the meaning of our contract. We are faced with "exorbitant prices entirely inconsistent with current and standard rates taking into account the quantities involved and the usual industry practices in obtaining such quantities." This has made performance of the contract essentially impossible at the current material pricing rates and ultimately requires a change order increasing the price of the contract that will allow us to perform.

We are hereby requesting that City of Montebello execute a Change Order reflecting an increase in the total price for the project.

Respecfully,

Wayne Gentry

ASPHALT and BASE MATERIALS ASPHALT and CONCRETE DUMP

2/28/2022

Customers:

Costs of goods such as oil, fuel, etc. have reached an all time high and are changing rapidly. Kelterite has tried to absorb increases and changes as fast as possible, however the recent escalations are so high we cannot continue to do so. Kelterite recommends that bidders put increases in their bids ahead of time because we will be quoting asphalt material with a good through date that will not be extended.

Oil prices for March 2022 jumped over $100.00 from some major suppliers and accordingly Kelterite has raised our prices for all asphalt materials $5.00 per ton on any future quotes and our FOB pricing.

Trucking and fuel prices are expected to increase dramatically in the coming weeks. Please be prepared for those costs when bidding your projects as adjustments will be made as needed in order to ensure trucking can be provided to our projects.

Kelterite appreciates your business and welcomes any suggestions you may have in order to help deal with these unprecedented times.

ITEM # 13

CITY OF MONTEBELLO

CITY COUNCIL AGENDA STAFF REPORT

TO: Honorable Mayor and City Council Members

FROM: René Bobadilla, P.E., City Manager

BY: James Enriquez, Director of Public Works / City Engineer

SUBJECT: **Notice of Completion – Montebello Boulevard Bike Lane and Sidewalk Improvement Project [ATPSB1L-5247(026)], CP No. 864**

DATE: April 13, 2022

RECOMMENDATIONS:

It is recommended that the City Council:

1) Accept the Montebello Boulevard Bike Lane and Sidewalk Improvement Project [ATPSB1L-5247(026)] - (CP No. 864) as completed by Sequel Contractors, Inc.; and

2) Find that the requested "Changes in Work" for the project (Attachment A) have no significant effect on the environment and approve the changes in the aggregate amount of $1,623,611. The final contract amount with Sequel Contractors, Inc. is $7,456,191.

3) Approve the Final Total Project Budget (Attachment B); and

4) Authorize the City Clerk to execute, verify and file the Notice of Completion (Attachment C) with the Los Angeles County Registrar-Recorder; and

5) Authorize the City Manager to release the retention payment due to Sequel Contractors, Inc. following the mandatory waiting period from the date the Notice of Completion is recorded; and

6) Take such additional, related, action that may be desirable.

FISCAL IMPACT

The Final Total Project Budget (Attachment B) shows the total funding and sources that were approved by the City Council throughout the life of the project in the total aggregate amount of $9,487,391. Also shown is the total aggregate expenditures for the project in the amount of $8,781,470, including $1,623,611 of construction change orders that are listed and detailed in Attachment A.

The remaining project budget balance of $705,924 will be available for re-programming for other capital improvement projects. No additional appropriations are required in order to close the project.

BACKGROUND

On December 19, 2018, the City Council awarded a construction contract for the subject project to Sequel Contractors, Inc. in the amount of $5,776,272. The project consisted of road widening of the east side of Montebello Boulevard from Jefferson Ave to Paramount Boulevard; and construction of new raised medians, landscaping, irrigation, road resurfacing and traffic signal improvements on Montebello Boulevard from Lincoln Avenue to Paramount Boulevard.

Construction commenced in February 2019. Construction was substantially completed in July 2021, following multiple unanticipated delays related to moratoriums on the work imposed by the California Department of Fish & Wildlife to mitigate adverse impacts to the nesting season of the protected Gnatcatcher birds that inhabit the hillside. There were also unanticipated delays for multiple utility relocations and a delay in obtaining Edison approval for the design and installation of the new street lights on the east side of the street, which delayed the completion of the sidewalk on the east side of the street.

ANALYSIS

The Contractor substantially completed construction of this project in July 2021. Staff has worked with the contractor since then to complete the final punch list and remedy some work defects as well as some labor compliance deficiencies. These issues have been resolved to the satisfaction of the City Engineer in accordance with the project plans and contract specifications. The contractor's final accounting was reviewed and approved by the City Engineer. Any applicable deductions for work not completed will be deducted from the retention payment. The applicable amount related to labor compliance deficiencies will also be withheld from the retention payment.

The project was completed at a total cost of $8,781,470, an amount of $705,924 under the total authorized budget of $9,487,391 (See Attachment B). The remaining funds will be available for re-programming for other capital improvement projects.

NOTICE OF COMPLETION

Pursuant to Civil Code Section 3093, when a capital improvement project is completed, a Notice of Completion must be prepared and filed with the County Recorder's Office for recordation after completion of the improvement. In compliance with this section of the Civil Code, the City Engineer has prepared the required Notice of Completion for the City Council to accept the project as completed; and to authorize the City Clerk to execute, verify and file the Notice of Completion for recordation with the County Recorder's Office.

Concurrent with the preparation of the Notice of Completion, the City Engineer approved the final progress payment based on the agreed upon scope of work; with a five (5%) percent retention being withheld from the progress payments. The final retention payment will be released to the contractor after recordation of the Notice of Completion with the Los Angeles County Registrar-Recorder.

SUMMARY

Staff is recommending that the City Council accept the Project as completed, approve the final contract amount with Sequel Contractors, Inc. in the amount of $7,456,191, including change orders, approve the Final Total Project Budget, authorize the City Clerk to execute, verify and file the Notice of Completion with the Los Angeles County Registrar-Recorder and authorize the City Manager to release the retention payment due to Sequel Contractors, Inc.

ATTACHMENT A

CHANGES IN WORK SUMMARY
April 13, 2022

MONTEBELLO BOULEVARD BIKE LANE AND SIDEWALK IMPROVEMENT PROJECT [ATPSB1L-4247(026)]

CP NO. 864

Project Description:

The project consisted of roadway widening of Montebello Blvd from Lincoln Ave to Paramount Blvd. The street was widened on the east side from Jefferson Blvd to Paramount Blvd to add dedicated bike lanes on both sides, a raised center median with landscaping and concrete sidewalk on the east side. The work included median construction, concrete construction for medians and sidewalk, construction of storm drain improvements, traffic signal improvements, street light improvements, utility relocations, landscaping improvements, striping, and other ancillary improvements.

Changes in Work:

(1)	Increase median curb height from 6” to 8”	53,814
(2)	Replace damaged conduit sweeps at Lincoln Ave	2,311
(3)	Construction of Concrete Slough wall at Liberty Ave	19,267

(44)	Michel Collins Median and Striping Modification	142,000
(45)	Grading and fencing changes at Paramount Blvd	18,114
(46)	Switch out city provided street light shields	800
	Total Changes in Work	**$ 1,623,611**

Description of Changes:

(1) The bid set of plans showed a 6” high median curb. The curb was increased to a height of 8” for increased traffic safety. Increased height also resulted in increase in materials for median landscaping.

(2) Existing traffic signal conduits at Lincoln Ave were found damaged and required repair in order to pull new wires.

(3) Bid set of plans did not include a retaining wall at the back of the sidewalk at the northwest corner of Liberty Ave and Montebello Blvd. The concrete slough wall was added to retain the slope and allow construction of a standard ADA ramp.

(4) White PVC irrigation mains were added throughout the project in the trench with the purple PVC. The purple PVC will be utilized in the future for reclaimed water.

(5) A gravity retaining wall was added on the east side of Montebello Blvd at Jefferson Blvd to avoid grading a slope beyond the street R/W line.

(6) Proposed change order not executed.

(7) Proposed change order not executed

(8) **Change Order 8A:** The bid set of plans did not include intersection improvements for the east side of the intersection at Montebello Blvd with Paramount Blvd and with Mall Drive. This change order added the improvements for the east leg of the intersection.
Change Order 8B: The city requested an upgrade in traffic signal equipment after the bid for the intersections of Montebello Blvd with Lincoln Ave, Ave de la Merced, Costco Driveway, and Jefferson Blvd.

(9) The contractor bid the project with a single lane of temporary traffic control during construction. The city requested a modification to the temporary traffic control to provide two lanes during construction to minimize traffic impacts.

(10) The contractor was directed to demobilize and stop construction in September 2019 while the city secured permits from the California Department of Fish and Wildlife and due to unresolved utility conflicts. The contractor requested additional compensation to maintain temporary traffic control devices during this shutdown period.

(11) The bid set of plans did not show a temporary fence on the east side of Montebello Blvd to maintain security for the adjacent private property following the removal of the existing fence and grading for the roadway widening.

(12) The city requested a change in the subgrade for the medians. Permeable PCC was substituted for the sand shown on the bid set of plans.

(13) The bid set of plans did not show an existing storm drain at Sta. 35□00 (east side of Montebello Blvd north of Jefferson Blvd) that interfered with the street widening. The storm drain required relocation.

(14) The retaining wall on the east side of Montebello Blvd from Sta. 57□00 to Sta. 66□00 was increased in height to meet actual field conditions. The contractor was compensated additionally for the increased wall height, including enlarging the wall foundation.

(15) A water line at Sta. 54□00 was exposed and was more shallow than anticipated. Relocation of approximately 100 LF was required to avoid interference with the roadway improvements.

(16) Design modifications required due to an unanticipated utility conflict with storm drain pipes at Sta. 50□50 and Sta. 68□00.

(17) Connections at the rear of several catch basins were added to provide future connections for storm drain from the adjacent private properties. The drainage from the private property was not contemplated in the bid set of plans.

(18) The existing chain link fence on the east side of the intersection of Montebello Blvd and Paramount Blvd required relocation to facilitate the new improvements. The fence was not shown in the bid set of plans.

(19) The bid set of plans did not show a drainage system or waterproofing for the backside of the retaining wall on the east side of Montebello Blvd from Sta. 57□00 to Sta. 66□00.

(20) The relocation of the water line (Change Order No. 15) required the addition of a valve to facilitate the switch over from the existing water line to the relocated water line.

(21) The existing traffic signal controller cabinet at Mall Dr was relocated to provide adequate ADA path of travel on the sidewalk in the vicinity of the new traffic signal pole.

(22) Proposed change order not executed.

(23) The bid set of plans called for a mortar cap for the retaining wall on the east side of Montebello Blvd from Sta. 57□00 to Sta. 66□00. The city requested an upgrade to a masonry block cap for aesthetics and durability.

(24) The relocation of the traffic signal cabinet at Mall Dr required the relocation of the pedestrian pushbutton pole.

(25) The relocated chain link fence along the east side of Montebello Blvd required the addition of barbed wire on top to comply with federal requirements for security of an oil field property.

(26) Proposed change order not executed.

(27) The existing chain link fence at the northeast corner of Montebello Blvd and Paramount Blvd required relocation for the installation of the new traffic signal pole.

(28) Installation of a 2” reclaimed water service for Taylor Ranch Park that was not installed during the construction of the reclaimed water main by Central Basin Municipal Water District.

(29) The gravity retaining on the east side of Montebello Blvd at Jefferson Blvd had to be extended and the existing storm drain was relocated due to grading changes at the street R/W line.

(30) The contractor was compensated additionally for labor and equipment delay costs resulting from time required to have a damaged traffic conduit repaired. The traffic conduit was not shown on the plans and was not marked in the field correctly.

(31) The catch basins at the intersection of Montebello Blvd and Paramount Blvd required modification due to unforeseen field conditions that were not reflected in the bid set of plans.

(32) The CA department of Fish and Wildlife required custom shields on the street lights on the east side of Montebello Blvd to prevent the lights from illuminating the hillside and disturbing the wildlife. The contractor was compensated for installing test shields on the lights for the evaluation of a biologist hired by the city.

(33) The design changes at the intersection of Montebello Blvd and Paramount Blvd and Mall Dr (Change Order No. 8A) required additional construction surveying to layout the new designs.

(34) All the permanent traffic striping was changed from 4” width to 6” width for increased traffic safety.

(35) The CA Department of Fish and Wildlife permit imposed a moratorium per that delayed the completion of the work in the vicinity of the intersection of Montebello Blvd and Paramount Blvd. The contractor was compensated additionally to phase the final paving and striping into two separate mobilizations in order to ensure the majority of the street was paved before the moratorium. This required a second mobilization for final paving and striping for the portion of the project in the vicinity of the intersection. The project had been bid for a single mobilization for paving and striping. Without this change, the majority of the project would have sat unpaved for an additional 6 months due to the moratorium.

(36) The original design of the drainage system that diverts rainwater from the gutters to the landscaped medians required modifications after construction to limit the amount of rain runoff diverted to the medians. The original design was causing erosion of the median landscaping.

(37) The landscaping shown on the bid set of plans on the east side of Montebello Blvd was deleted from the project. In accordance with the Standard Specifications for Public Works Construction, the contractor is entitled to renegotiate unit prices is more than 25% of the work is deleted from the contract.

(38) The bid set of plans did not include replacement of the traffic signal pole at the southwest corner of Montebello Blvd and Paramount Blvd.

(39) The project for bid for construction prior to the approval of Southern California Edison (SCE) of the street lighting design. The final configuration of the approved system added substantial underground infrastructure as required by SCE.

(40) Utility conflicts discovered during construction of the catch basins at the intersection of Montebello Blvd and Paramount Blvd required the addition of a reinforced concrete junction structure.

(41) A sinkhole was discovered in the middle of the intersection of Montebello Blvd and Paramount Blvd during construction. The sinkhole was repaired prior to the final paving.

(42) The newly constructed center median at the left turn pocket for northbound lanes located just north of Mall Drive (Sta. 78□50) required modification because northbound vehicles were running into the median curb as it was originally designed.

(43) Proposed change order not executed.

(44) The center medians in the vicinity of Michael Collins Circle required modification. The medians as originally designed and constructed were causing vehicles, mostly northbound, to run into the median curb. The design was modified to realign the traffic lanes. The contractor was compensated

additionally for the demolition of portions of the medians and reconstruction in accordance with the modified design; including modification to some irrigation and landscaping, grinding of thermoplastic striping, slurry sealing of the new pavement, and restriping.

(45) The construction of the specified sidewalk width on the east side of Montebello Blvd just south of Paramount Blvd required additional grading and fence relocation in order to avoid the need to add a retaining wall.

(46) Following the evaluation of the city's biologist of the street light shield (Change Order No. 32), the contractor removed the first shield and installed a modified design. The second shield was approved by the biologist and the city has requested the approval of the CA Department of Fish and Wildlife prior to the manufacturing and installation of the remaining shields on the new street lights along the entire east side of the project.

NOTICE OF COMPLETION

Notice pursuant to Civil Code Section 3093, must be filed within 10 days after completion. (See reverse side for complete requirements.)

Notice is hereby given that:

1. The undersigned is owner or corporate officer of the owner of the interest or estate stated below in the property hereinafter described:
2. The full name of the owner is City of Montebello
3. The full address of the owner is 1600 W Beverly Blvd., Montebello, CA 90640
4. The nature of the interest or estate of the owner is: in fee.

(if other than Fee, strike "In fee" and insert, for example, "purchaser under contract of purchase", or "lessee")

5. The full names and full addresses of all persons, if any, who hold title with the undersigned as joint tenants or as tenants in common are:

NAMES ADDRESSES

6. The full names and addresses of the predecessors in interest of the undersigned, if the property was transferred subsequent to the commencement of the work or improvements herein referred to:

NAMES ADDRESSES

7. A work of improvement on the property hereinafter described was completed on July 31, 2021. The general scope of work consisted of constructing concrete sidewalks, curb and gutters, curb ramps, raised medians with landscaping and irrigation, cold milling of existing asphalt pavement, paving with new asphalt, curb painting, traffic striping, pavement markings, and utility cover adjustment.

8. The name of the contractor, if any, for such work of improvement was Sequel Contractors, Inc.

(If no contractor for work of improvement as a whole, insert "None") December 19, 2018 (Date of Contract)

9. The property on which said work of improvement was completed is in the City of Montebello County of Los Angeles, State of CA, and is described as follows: Montebello Boulevard Bike Lane and Sidewalk Improvement from Lincoln Ave to Paramount Blvd [(ATPSB1L-52479026)] - CP 864.

Director of Public Works / City Engineer, City of Montebello
(Signature of Owner or corporate officer of Owner named in paragraph 2, or his agent)

VERIFICATION

I, the undersigned, say: I am the City Clerk of the City of Montebello, the declarant of the foregoing Notice of Completion:
I have read said Notice of Completion and know the contents thereof; the same is true to my own knowledge. I declare under penalty of perjury that the foregoing is true and correct.
Executed on_____ , 2022 at City of Montebello, Montebello, CA
_____(Personal signature of the individual who is swearing that the contents of the Notice of Completion are true)

DO NOT RECORD

REQUIREMENTS AS TO NOTICE OF COMPLETION

A notice of completion must be filed for record WITHIN 10 DAYS after completion of the work of improvement (to be computed exclusive of the day of completion), as provided in Civil Code Section 3093.

The "owner" who must file for record a notice of completion of a building or other work of improvement means the owner (or his successor in-interest at the date the notice is filed) on whose behalf the work was done, though his ownership is less than the fee title. For example, if A is the owner in fee, and B, lessee under a lease, causes a building to be constructed, then B, or whoever has succeeded to his interest at the date the notice is filed, must file the notice.

If the ownership is in two or more persons as joint tenants or tenants is common, the notice may be signed by any one of the co-owners (in fact, the foregoing form is designed for giving of the notice by only one cotenant), but the names and addresses of the other co-owners must be stated in paragraph 5 of the form.

Note that any Notice of Completion signed by a successor in interest shall recite the names and addresses of his transferor or transferors.

In paragraphs 3, 5 and 6, the full address called for should include street number, city, county and state.

As to paragraphs 7 and 8, this form should be used only where the notice of completion covers the work of improvement as a whole. If the notice is to be given only of completion of a particular contract, where the work of improvement is made pursuant to two or more original contracts, then this form must be modified as follows: (1) Strike the words "A work of improvement" from paragraph 6 and insert a general statement of the kind of work done or materials furnished pursuant to such contract (e.g., "The foundations for the improvements"); (2) Insert the name of the contractor under the particular contract in paragraph 7.

In paragraph 8 of the notice, insert the name of the contractor for the work of improvement as a whole. No contractor's name need be given if there is no general contractor, e.g., on so-called "owner-builder jobs."

In paragraph 9, insert the full, legal description, not merely a street address or tax description. Refer to deed or policy of title insurance. If the space provided for description is not sufficient, a rider may be attached.

In paragraph 10, show the street address, if any, assigned to the property by any competent public or governmental authority.

This standard form covers most usual problems in the field indicated. Before you sign, read it, fill in all blanks, and make changes proper to your transaction. Consult a lawyer if you doubt the form's fitness for your purpose.

ITEM # 14

CITY OF MONTEBELLO

CITY COUNCIL AGENDA STAFF REPORT

TO: Honorable Mayor and City Council Members

FROM: René Bobadilla, P.E., City Manager

BY: James Enriquez, Director of Public Works / City Engineer

SUBJECT: **Approval of Amendment No. 2 to Agreement No. 3316 with Flo-Services, Inc. for Additional Sewage Pump Station Repair Services**

DATE: April 13, 2022

RECOMMENDATIONS:

It is recommended that the City Council:

1) It is recommended that the City Council approve Amendment No. 2 to Agreement No. 3316 with Flo-Services, Inc. for additional sewage pump station repair services in the aggregate one-time additional amount not-to-exceed $269,579; and

2) Authorize the City Manager to execute the amendment on behalf of the City; and

3) Amend the Fiscal Year 2021-22 budget by increasing appropriations by $100,000 in Account No. 100-30-310-6040.45 (General Fund, Public Works, Streets, Contract Services – Sewer Maintenance); and

4) Take such additional, related, action that may be desirable.

FISCAL IMPACT

The cost for the maintenance and operation for the four (4) sewage pump stations is estimated at $269,579. Additional appropriations are needed to fund this work. A budget amendment in the amount of $100,000 is required, increasing appropriations in Account No. 100-30-310-6040.45 (General Fund, Public Works, Streets, Contract Services – Sewer Maintenance).

BACKGROUND

The City of Montebello owns and operates four (4) sewage pump stations at the following locations:

1. Lincoln Avenue at Rancho Drive
2. Natasha Lane cul-de-sac
3. Lincoln Avenue at Sanchez Drive
4. Grant Rea Park

On November 8, 2017 following a Request for Proposals (RFP No. 18-17), the City Council approved Agreement No. 3316 with Flo-Services, Inc. for the annual maintenance and service of these pump stations at an annual cost of $32,555. The scope of the work includes quarterly service consisting of inspection and testing of equipment and minor repairs. Major repairs and replacement of equipment, such as the repairs recommended herein, are additional services per the terms of the agreement.

The inspection reports submitted by Flo-Services two years ago indicated that various equipment components were nearing their useful service life at each of the four pump stations and were recommended for replacement. This condition has progressively worsened during the past two years, likely due to the significant increase in usage because people have been at home much longer periods of time during the COVID pandemic.

In the latest inspection reports, Flo-Services indicates that each of these four pump stations is in jeopardy of an unpredictable and complete failure if this equipment is not replaced. A complete failure of a pump station would result in the loss of sewer service to numerous households. Repair in the event of an unplanned failure would require an expensive temporary pump system to maintain service while the repair work is scheduled, and could include substantial delays in the availability of equipment which is currently subject to supply chain issues. The recommended amendment to Flo-Services' professional services agreement would allow Flo-Services to order equipment while the pump stations are still functioning and limit the need for temporary pumping.

SUMMARY

Upon the approval of the City Council of the recommended Amendment No. 2 to Agreement No. 3316, staff will coordinate the repair and replacement of the sewer pump station equipment by Flo-Services to ensure minimal interruption of sewage service to the affected households. A budget amendment in the amount of $100,000 is required, increasing appropriations in Account No. 100-30-310-6040.45 (General Fund, Public Works, Streets, Contract Services – Sewer Maintenance).

ATTACHMENT A

CITY OF MONTEBELLO
PROFESSIONAL SERVICES AGREEMENT NO. 3316
BY AND BETWEEN
CITY OF MONTEBELLO
AND
FLO-SERVICES, INC

THIS AGREEMENT ("Agreement") is made and entered into on **November 9, 2017**, by the CITY OF MONTEBELLO, a municipal corporation (hereinafter referred to as "CITY") and **Flo-Services, Inc.**, (hereinafter referred to as "CONTRACTOR"). CITY and CONTRACTOR are sometimes referred to herein individual as the "Party," and jointly as the "Parties."

RECITALS

WHEREAS, the CITY desires to retain a qualified professional contractor to provide design-build services in the CITY; and

WHEREAS, the CONTRACTOR represents that it is fully qualified to perform such services by virtue of its experience and the training, education and expertise of its principals and employees.

NOW THEREFORE, in consideration of performance by the Parties of the covenants and conditions herein contained, the Parties hereto agree as follows:

SECTION 1. SERVICES / COMPENSATION.

A. All terms, conditions, requirements, and provisions of the Request for Proposals for Storm and Sewer Lift Station Maintenance Services and Related Equipment in the City of Montebello (October 19, 2017) ("Request for Proposals"), as such is set forth fully in **Exhibit "A"** hereto, are hereby incorporated fully herein by this reference and shall be binding on the Parties. To the extent of a conflict between the terms of this Agreement and that set forth in any exhibits or attachments hereto, the terms of this Agreement shall govern.

B. CONTRACTOR shall provide to CITY all labor, equipment, materials and incidental necessary for a turnkey design-build project as set forth fully in the Request for Proposals, as such is set forth fully in **Exhibit "A"** hereto and incorporated fully herein by this reference (hereinafter "Professional Services").

C. CONTRACTOR shall be shall be compensated for performance of the Professional Services as set forth in the Schedule of Compensation attached hereto as **Exhibit "B"** and incorporated fully herein by this reference ("Compensation"). CONTRACTOR shall provide an itemized billing statement to the CITY each month for Professional Services performed. CONTRACTOR shall no incur fees or costs which exceed the Compensation without the prior written consent of the CITY.

SECTION 2. TERM.

This Agreement shall commence upon issuance of the Notice to Proceed by the City ("Effective Date"), and shall expire three (3) years from the Effective Date, unless terminated earlier as hereinafter provided. This Agreement may be extended for up to two (2) additional years upon such terms and conditions mutually agreed upon by the Parties in writing.

SECTION 3. PERFORMANCE.

a. CONTRACTOR shall at all times, faithfully, competently, and to the best of its ability, experience and talent, perform all tasks described herein.

b. CONTRACTOR shall employ, at a minimum, generally accepted standards and practices utilized by companies engaged in providing similar services, as are required of Contractor hereunder, in meeting its obligations under this Agreement.

c. CONTRACTOR shall be knowledgeable of and subject to all CITY ordinances, rules and regulations, standard operating procedures, and the supervisory chain of command.

d. CONTRACTOR shall have the right to retain, subject to CITY's approval, additional individuals, consultants or subcontractors to assist in the completion of services as herein defined. Compensation for additional individuals, consultants or subcontractors shall be the sole and exclusive responsibility of CONTRACTOR.

e. CONTRACTOR shall retain all original reports, field and office notes, correspondence, calculations, maps, and other documents specifically related to the services provided by CONTRACTOR pursuant to this Agreement, other than documents which are exempt from disclosure pursuant to the attorney-client privilege or any other law. Said documents shall be made available for inspection by the CITY upon request.

SECTION 4. WORK PRODUCT.

a. CONTRACTOR hereby agrees that all work product produced pursuant to this Agreement, and provided to CITY during and upon completion of this Agreement, shall be the property of the CITY, and ownership of said work product shall be retained by the CITY. CONTRACTOR may take and retain copies of such written products as desired, but no such written products shall be the subject of a copyright application by CONTRACTOR.

b. All data, documents, discussion, or other information developed or received by CONTRACTOR or provided for performance of this Agreement are deemed confidential and shall not be disclosed by CONTRACTOR without prior written consent by the CITY. The CITY shall grant such consent if disclosure is legally required. All such written products shall be returned to the CITY upon the termination or expiration of this Agreement. CONTRACTOR agrees that the covenants contained in this Article shall survive the expiration or termination of this Agreement.

SECTION 5. EXTRA SERVICES.

No extra services over and above the Compensation shall be rendered by CONTRACTOR under this Agreement unless such extra services first shall have been duly authorized in writing by the City Manager.

SECTION 6. CITY SUPERVISION.

The City Manager shall have the right of general supervision of all work performed by CONTRACTOR and shall be the CITY agent with respect to obtaining CONTRACTOR's compliance hereunder. No payment for services rendered under this Agreement shall be made without the prior approval of the City Manager.

SECTION 7. TERMINATION.

In the event that either Party hereto fails or refuses to perform any of the provisions of this Agreement at the time and in the manner required, the non-defaulting party shall give the defaulting party written notice of the default, the nature of the default, and of the steps necessary to cure the default.

a. Termination for Cause. In the event that any of the provisions of the Agreement are violated by either party, the non-defaulting Party may terminate the Agreement by serving written notice upon the other Party, listing the violation(s) and its intent to terminate such Agreement unless within ten (10) days after the serving of such notice, such violation shall cease or be rectified, the contract shall upon the expiration of an additional thirty (30) days cease and terminate. Violations by Contractor which cannot be corrected within ten (10) days, said contract shall at the option of the City cease and terminate upon the giving of like notice. In the event of any such termination for default by Contractor, the City may take over the work and prosecute the same to completion by contract or otherwise for the account and at the expense of the Contractor. The Contractor and his sureties shall be liable to the City for any excess cost occasioned in the event of any such termination. This change shall not be construed to prevent the termination, for other causes authorized by law or other provisions of this contract. In the event of a termination for cause, CONTRACTOR shall only be entitled to the Compensation for those Professional Services satisfactory performed on or before the effective date of termination.

b. Termination For Convenience. The CITY shall have the option, at its sole discretion and without cause, to terminate this Agreement in whole, or in part, by giving ten (30) business days' written notice to CONTRACTOR. Upon the termination of this Agreement as provided herein, the CITY shall provide to CONTRACTOR the part of Compensation which would otherwise be payable to CONTRACTOR for services CONTRACTOR had completed as of the date of termination, less the amount of all previous payment with respect to the Compensation. Further, upon such a termination for convenience by CITY, the Parties agree that CONTRACTOR shall be reimbursed for any "non-refundable" costs that CONTRACTOR has incurred for its services under this Agreement, provided that: (1) such "non- refundable" costs were incurred by the CONTRACTOR prior to the date of termination, and (2) that CONTRACTOR provides the CITY with adequate proof that CONTRACTOR incurred the costs, and is unable to be seek a refund for such costs. Such "non-refundable" costs may include, but are not limited to, travel reservations incurred by CONTRACTOR for its performance of services under this Agreement. CONTRACTOR agrees to cease all work under this Agreement on or before the effective date of any notice of termination.

SECTION 8. EMPLOYMENT OF CITY EMPLOYEES.

No regular employee of the CITY shall be employed by CONTRACTOR during the term of this Agreement.

SECTION 9. NON-LIABILITY OF CITY OFFICIALS AND EMPLOYEES.

No official or employee of the CITY shall be personally liable to CONTRACTOR in the event of any default or breach by CITY, or for any amount which may become due to CONTRACTOR.

SECTION 10. INDEPENDENT CONTRACTOR.

a. The CONTRACTOR is and shall, at all times, remain as to the CITY a wholly independent contractor. Neither the CITY nor any of its elected officials, officers, employees or agents shall have control over the conduct of the CONTRACTOR except as expressly set forth in this Agreement. The CONTRACTOR shall not at any time or in any manner represent that he

is in any manner an elected official, officer, employee or agent of the CITY. No employee benefits shall be available to CONTRACTOR in connection with the performance of this Agreement. Except as provided in this Agreement, CITY shall not pay salary, wages, or other compensation to CONTRACTOR for performance hereunder for CITY, CITY shall not be liable for compensation to CONTRACTOR, CONTRACTOR's employees or CONTRACTOR'S subcontractors for injury or sickness arising out of performing services hereunder.

b. The parties further acknowledge and agree that nothing in this Agreement shall create or be construed to create a partnership, joint venture, employment relationship or any other relationship except as set forth in this Agreement.

c. CITY shall not deduct from the Compensation paid to CONTRACTOR any sums required for Social Security, withholding taxes, FICA, state disability insurance or any other federal, state or local tax or charge which may or may not be in effect or hereinafter enacted or required as a charge or withholding on the compensation paid to CONTRACTOR. CITY shall have no responsibility to provide CONTRACTOR, its employees or subcontractors with workers' compensation insurance or any other insurance.

SECTION 11. PERS ELIGIBILITY INDEMNITY.

a. In the event that CONTRACTOR or any employee, agent, or subcontractor of CONTRACTOR providing services under this Agreement claims or is determined by a court of competent jurisdiction or the California Public Employees Retirement System (PERS) to be eligible for enrollment in PERS as an employee of the CITY, CONTRACTOR shall indemnify, defend, and hold harmless CITY for the payment of any employee and/or employer contributions for PERS benefits on behalf of CONTRACTOR or its employees, agents, or subcontractors, as well as for the payment of any penalties and interest on such contributions, which would otherwise be the responsibility of CITY.

b. Notwithstanding any other agency, state or federal policy, rule, regulation, law or ordinance to the contrary, CONTRACTOR and any of its employees, agents, and subcontractors providing service under this Agreement shall not qualify for or become entitled to, and hereby agree to waive any claims to, any compensation, benefit, or any incident of employment by CITY, including but not limited to eligibility to enroll in PERS as an employee of CITY and entitlement to any contribution to be paid by CITY for employer contribution and/or employee contributions for PERS benefits.

SECTION 12. LEGAL RESPONSIBILITIES.

CONTRACTOR shall at all times observe and comply with all applicable laws, ordinances, codes and regulations of the federal, state and local governments including, but not limited to the Montebello Municipal Code. The CITY, and its appointed or elected officers, employees, or agents, shall not be liable at law or in equity occasioned by failure of the CONTRACTOR to comply with this section.

SECTION 13. INDEMNIFICATION.

The CONTRACTOR agrees to, and shall defend, indemnify, protect and hold harmless, the CITY, its elected and appointed boards, officers, officials, employees, agents and volunteers from and against any and all claims, demands, lawsuits, defense costs, civil, penalties, expenses, causes of action, and judgments at law or in equity, or liability of any kind or nature which the CITY, its elected and appointed boards, officers, officials, employees, agents and volunteers may sustain or incur or which may be imposed upon them for injuries or deaths of persons, or damage to property arising out of CONTRACTOR'S negligent or wrongful act,

or omission under the terms of this Agreement, except only liability arising out of the sole negligence of the CITY.

SECTION 14. INSURANCE COVERAGE.

During the term of this Agreement, CONTRACTOR shall carry, maintain, and keep in full force and effect insurance against claims for death or injuries to persons or damages to property that may arise from or in connection with CONTRACTOR'S performance of this Agreement. Such insurance shall be of the types and in the amounts as set forth below:

- **Commercial General Liability (CGL)**: Insurance Services Office Form CG 00 01 covering CGL on an "occurrence" basis for bodily injury and property damage, including products-completed operations, personal injury and advertising injury, with limits no less than $1,000,000 per occurrence. If a general aggregate limit applies, the limit shall be twice the required occurrence limit.

- **Automobile Liability Insurance:** Insurance Services Office Form Number CA 0001 covering, Code 1 (any auto), or if CONTRACTOR has no owned autos, Code 8 (hired) and 9 (non-owned), with limit no less than $1,000,000 per accident for bodily injury and property damage.

- **Worker's Compensation** insurance as required by the laws of the State of California, with Statutory Limits, and Employer's Liability Insurance with limit of no less than $1,000,000 per accident for bodily injury or disease.

- **Professional Liability** insurance appropriate to the CONTRACTOR'S profession, with limit no less than $1,000,000 per occurrence or claim, $2,000,000 aggregate.

If the CONTRACTOR maintains higher limits than the minimums shown above, the CITY requires and shall be entitled to coverage for the higher limits maintained by the CONTRACTOR.

CONTACTOR shall require each of its subcontractors, if any, to maintain insurance coverage that meets all of the requirements of this Agreement.

The policy or policies required by this Agreement shall be issued by an insurer admitted in the State of California and with a current rating of at least A:VII in the latest edition of Best's Insurance Guide.

Each insurance policy required above shall state that coverage shall not be canceled, except after thirty (30) days' prior written notice (ten (10) days for non-payment) has been given to the City. CONTRACTOR agrees that if it does not keep the aforesaid insurance in full force and effect CITY may either (i) immediately terminate this Agreement for Cause; or (ii) take out the necessary insurance and pay, at CONTRACTOR'S expense, the premium thereon.

At all times during the term of this Agreement, CONTRACTOR shall maintain on file with CITY's Risk Manager a certificate or certificates of insurance showing that the aforesaid policies are in effect in the required amounts and naming the CITY as an additional insured. CONTRACTOR shall, prior to commencement of work under this Agreement, file with CITY's Risk Manager such certificate(s).

CONTRACTOR shall provide proof that policies of insurance required herein expiring during the term of this Agreement have been renewed or replaced with other policies

providing at least the same coverage. Such proof will be furnished at least two weeks prior to the expiration of the coverages.

The general liability and automobile policies of insurance required by this Agreement shall contain an endorsement naming CITY, its officers, employees, agents and volunteers as additional insureds. All of the policies required under this Agreement shall contain an endorsement providing that the policies cannot be canceled or reduced except on thirty days' prior written notice to CITY. CONTRACTOR agrees to require its insurer to modify the certificates of insurance to delete any exculpatory wording stating that failure of the insurer to mail written notice of cancellation imposes no obligation, and to delete the word "endeavor" with regard to any notice provisions.

The insurance provided by CONTRACTOR shall be primary to any coverage available to CITY. Any insurance or self-insurance maintained by CITY, its officers, employees, agents or volunteers, shall be in excess of CONTRACTOR'S insurance and shall not contribute with it.

All insurance coverage provided pursuant to this Agreement shall not prohibit CONTRACTOR, and CONTRACTOR'S employees, agents or subcontractors, from waiving the right of subrogation prior to a loss. CONTRACTOR hereby waives all rights of subrogation against the CITY.

Any deductibles or self-insured retentions must be declared to and approved by the CITY. At the option of CITY, CONTRACTOR shall either reduce or eliminate the deductibles or self-insured retentions with respect to CITY, or CONTRACTOR shall procure a bond guaranteeing payment of losses and expenses.

Procurement of insurance by CONTRACTOR shall not be construed as a limitation of CONTRACTOR'S liability or as fall performance of CONTRACTOR'S duties to indemnify, hold harmless and defend under Section 9 of this Agreement.

SECTION 15. SUBCONTRACT, ASSIGNMENT OR DELEGATION.

CONTRACTOR shall not subcontract, delegate or assign its duties or rights hereunder, either in whole or in part, without the prior written consent of CITY. Any proposed subcontract, delegation, or assignment shall provide a description of the services to be covered, identification of the proposed sub-contractor, delegee, or assignee, and an explanation of why and how the same was selected, including the degree of competition involved.

Any subcontract, delegation or assignment shall be made in the name of CONTRACTOR and shall not bind or purport to bind CITY and shall not release CONTRACTOR from any obligations under this Agreement including, but not limited to, the duty to properly supervise and coordinate the work of employees, assignees, delegees or sub-contractors. No such subcontract, delegation or assignment shall result in any increase in the amount of total compensation payable to CONTRACTOR under the Agreement.

SECTION 16. NO WAIVER.

Waiver by any party hereto of any term, condition or covenant of this Agreement shall not constitute the waiver of any other term, condition or covenant hereof.

SECTION 17. DISPUTE RESOLUTION; GOVERNING LAW.

Disputes regarding the interpretation or application of any provision(s) of this Agreement shall, to the extent reasonably feasible, be resolved through good faith negotiations between the Parties. If any action at law or in equity is brought to enforce this Agreement or because of

alleged dispute, breach, default or misrepresentation in connection with the provisions of this Agreement, the prevailing party in such action shall be entitled to reasonable attorney's fees, expert fees, costs and necessary disbursements incurred in that action or proceeding, in addition to such other relief as may be sought and awarded. The venue for any litigation shall be County of Los Angeles, California. The Parties agree that the covenants contained in this Article shall survive the expiration or termination of this Agreement.

SECTION 18. ATTORNEY'S FEES AND COSTS.

If litigation is reasonably required to enforce or interpret the provisions of this Agreement, the prevailing party in such litigation shall be entitled to an award of reasonable attorney's fees and costs in addition to any other relief to which it may be entitled.

SECTION 19. WARRANTIES.

Each of the parties represents and warrants to one another as follows:

a. It has received independent legal advice from its attorneys with respect to the advisability of entering into and executing this Agreement;

b. In executing this Agreement, it has carefully read this Agreement, knows the contents thereof, and has relied solely on the statements expressly set forth herein and has placed no reliance whatsoever on any statement, representation, or promise of any other party, or any other person or entity, not expressly set forth herein, nor upon the failure of any other party or any other person or entity to make any statement, representation or disclosure of *any* matter whatsoever; and

c. It is agreed that each party has the full right and authority to enter into this Agreement, and that the person executing this Agreement on behalf of either party has the full right and authority to fully commit and bind such party to the provisions of this Agreement.

SECTION 20. MISCELLANEOUS.

a. The descriptive paragraph headings of this Agreement are included for purposes of convenience only and shall not control or affect the construction of interpretation of any of its provisions.

b. Whenever the context hereof shall so require, the singular shall include the plural, the male gender shall include the female gender, and the neuter and vice versa.

c. In case any one or more of the provisions contained in this Agreement shall for any reason be held to be invalid, illegal, or unenforceable in any respect, such invalidity, illegality, or unenforceability shall not affect any other provision hereof and this Agreement shall be construed as if such invalid, illegal, or unenforceable provisions had never been contained herein.

d. The representations and warranties made by the parties to this Agreement shall survive the consummation of the transaction herein described.

e. This Agreement may be signed in any one or more counterparts all of which taken together shall be but one and the same Agreement. Any signed copy of this Agreement or of any other document or agreement referred to herein, or copy or counterpart thereof, delivered by facsimile transmission, shall for all purposes be treated as if it were delivered containing an original manual signature of the party whose signature appears in

the facsimile and shall be binding upon such party in the same manner as though an originally signed copy had been delivered.

f. Each of the parties acknowledges that it has been represented by independent counsel of its own choosing, or if it has not been so represented, it has been admonished to obtain independent counsel and has freely and voluntarily waived and relinquished the right to counsel. Each party who has not obtained independent counsel acknowledges that the failure to have independent legal counsel will not excuse such party's failure to perform under this Agreement or any agreement referred to in this Agreement.

SECTION 21. NOTICE.

All notices, demands, requests or approvals to be given under this Agreement shall be given in writing and conclusively shall be deemed served when delivered personally or on the second business day after the deposit thereof in the United States mail, postage prepaid, registered or certified, addressed as hereinafter provided. All notices, demands, requests, or approvals hereunder shall be given to the following addresses or such other addresses as the Parties may designate by written notice:

Danilo Batson, Assistant City Manager / Director of Public Works
Public Works Department
City of Montebello
1600 West Beverly Boulevard
Montebello, California 90640
E-mail: dbatson@cityofmontebello.com

SECTION 22. NON-DISCRIMINATION AND EQUAL OPPORTUNITY EMPLOYER.

In the performance of this Agreement, CONTRACTOR shall not discriminate against any employee, sub-contractor, or applicant for employment because of race, color, creed, religion, sex, marital status, national origin, ancestry, age, physical or mental handicap, mental condition or sexual orientation. CONTRACTOR will take affirmative action to ensure that sub-contractor and applicants are employed, and that employees are treated during employment, without regard to their race, color, creed, religion, sex, marital status, national origin, ancestry, age, physical or mental handicap, medical condition or sexual orientation.

SECTION 23. CONFLICT OF INTEREST.

CONTRACTOR covenants that it presently has no interest and shall not acquire any interest, direct or indirect, which may be affected by the services to be performed by CONTRACTOR under this Agreement, or which would conflict in any manner with the performance of its services hereunder. CONTRACTOR further covenants that, in performance of this Agreement, no person having any such interest shall be employed by it. Furthermore, CONTRACTOR shall avoid the appearance of having any interest that would conflict in any manner with the performance of its services pursuant to this Agreement.

CONTRACTOR covenants not to give or receive any compensation, monetary or otherwise, to or from the ultimate vendor(s) of services to CITY as a result of the performance of this Agreement, or the services that may be procured by the CITY as a result of the recommendations made by CONTRACTOR. CONTRACTOR's covenant under this section shall survive the termination of this Agreement.

SECTION 24. ENTIRE AGREEMENT.

This Agreement contains the entire understanding between the CITY and CONTRACTOR. Any prior agreements, promises, negotiations or representations not expressly set forth herein are of no force or effect. Subsequent modifications to this Agreement shall be effective only if in writing and signed by each party. If any term, condition or covenant of this Agreement is held by a court of competent jurisdiction to be invalid, void or unenforceable, the remaining provisions of this Agreement shall be valid and binding.

NOTICE INVITING SEALED BIDS
FOR STORM AND SEWER LIFT STATION MAINTENANCE SERVICES AND RELATED EQUIPMENT

RFP NO. 18-17

PUBLIC NOTICE IS HEREBY GIVEN THAT THE City of Montebello as AGENCY, invites proposals/sealed bids for the above stated project. Proposals/bids can be submitted via PlanetBids Portal (accessed through the City of Montebello's official website at http://www.cityofmontebello.com/rfp-bids/bid-opportunities.html) or to the City Clerk's Office at 1600 West Beverly Boulevard, up to the hour of 11:00 a.m. on Thursday, October 19, 2017.

Copies of the specifications and contract documents are available from the City of Montebello, 1600 West Beverly Boulevard, Montebello, California 90640 and on PlanetBids Portal, accessed through the City of Montebello's official website at http://www.cityofmontebello.com/rfp-bids/bid-opportunities.html.

Any contract entered into pursuant to this notice will incorporate the provisions of the State Labor Code. Compliance with the prevailing rates of wages and apprenticeship employment standards established by the State Director of Industrial Relations will be required.

Affirmative action to ensure against discrimination in employment practices on the basis of race, color, national origin, ancestry, sec, or religion will also be required.

The AGENCY hereby affirmatively ensures that minority business enterprises will be afforded full opportunity to submit bids in response to this notice and will not be discriminated against on the basis of race, color, national origin, ancestry, sex, or religion in any consideration leading to the award of contract.

The successful Contractor and his subcontractors will be required to possess business licenses from the City.

The AGENCY reserves the right to accept or reject any or all bids, to waive any irregularity in a bid and to make an award as may serve the interests of the City.

The contact person for this RFP is Sam Kouri, Consulting City Engineer at (323) 887-1367 or to email address shown on Page 2 of the Request for Proposals.

STORM AND SEWER LIFT STATION MAINTENANCE SERVICES AND RELATED EQUIPMENT

SCOPE OF WORK – The City of Montebello, herein after referred to as "City" desires a contractor to provide the following services:

Furnish all labor, tools, materials, appliances, and equipment for storm water and sewer lift station maintenance and related equipment maintenance services requested by the City. The maintenance work described in these Specifications shall be performed as a continuous and constant program throughout the contract. Any additional work not described in these specifications shall be performed by the contractor upon written notice from, and at the expense of, the City of Montebello.

REQUIRED INFORMATION AND FORMAT OF PROPOSALS

In order to be considered for selection, respondent individuals or firms shall submit a proposal that addresses each of the following criteria, and shall also provide resumes and evidence of qualifications to provide the services listed in this RFP.

1. **Letter of Introduction**
   a. Provide a letter of introduction signed by a Principal or Senior Officer of the firm.
   b. If submitting as a team, note which team is the prime consultant or lead joint venture partner, if applicable.
   c. Include the name, title and resume of the person who will be the lead/project manager and the name(s) and title(s) and resumes for the individuals that will supervise maintenance services.

2. **Firm Information and Qualifications**
   a. Number of years firm has been in business
   b. List the company experience in providing similar services, including a chart that indicates name, personnel qualifications, state registrations and/or certifications relevant to the type of maintenance services proposed to be provided.
   c. Identify any consultants/sub-consultants that you would expect to use, noting relevant disciplines. Include resumes and information regarding that firm(s) qualifications.

3. **References (See Exhibit "C")**
   a. Provide a list of at least 5 current references. Include name of individual or organization, job title, email address, mailing address, telephone number(s). Identify the type of services provided to each individual/organization, the location where the services were provided, and the dates of service.

4. **Firm's name or Team's Capabilities and Abilities; Review Times.**
   a. Provide a statement demonstrating your firm's or team's ability to accomplish the scope of services in a comprehensive and thorough manner to meet the needs of the City of Montebello addressing scope of work identified above.

5. **Professional Services Fees**
   a. Utilize the attached Itemized Cost Form to provide a proposed schedule of total fees for the components of the scope for which you are submitting on a Not-to-Exceed basis, include a listing of any additional direct reimbursable costs.

6. **Customer Service -** Describe how your firm provides for responsiveness to phone calls or email from City staff; and discuss your anticipated relationship with the City of Montebello and your organization.

7. **Standard Consulting Agreement -** Include a statement regarding whether the City's standard consultant agreement is acceptable as is or whether any modification would be proposed.

8. List any lawsuits or arbitration proceedings that have been initiated by or against your firm in the past five (5) years. Briefly state the nature of the action and the outcome.

EVALUATION PROCESS AND SELECTION CRITERIA

Evaluation of the proposals will be based upon a competitive selection process. Selection may not, however, be limited to price alone. The City's primary objective is to retain a consultant so that the City is best positioned to provide timely and professional Landscape services in a qualified, efficient, and cost-effective manner. City staff and evaluators will review all statements of proposals received timely. The candidate will be evaluated on the following criteria:

1. Experience in providing the same or similar services.

2. Projected Annual Cost on a Quarterly Rate not to exceed basis, to perform the required services as stated in the Scope of Work.
3. Oral and written communication abilities.
4. References.
5. Responsiveness to Scope of Work.

Consultant must satisfy the City of its ability to perform the services required. Consultant must demonstrate and document a history of timely and satisfactory performance of similar projects in a manner, which addresses the stated evaluation criteria. Consultant shall be responsible for the accuracy of information supplied concerning references. In addition, the City may consider evidence of untimely and unsatisfactory performance on prior similar projects, or litigation by the Consultant on previous contracts to be grounds for disqualification.

The City reserves the right to reject any or all Proposals, amend the RFP, and to discontinue or re-open the process at any time. The City reserves the right to request and obtain, from one or more consulting firms, supplementary information as may be necessary for the City to analyze the proposal pursuant to contract selection criteria. Upon completion of the evaluation phase, the City will select those consultants for interviews whose proposals and qualifications most closely conform to the requirements of this RFP. The consultant, by submitting a response to this RFP, waives all rights to protest or seek any legal remedies whatsoever regarding any aspect of this RFP, waives all right to protest or seek any legal remedies whatsoever regarding an aspect of this RFP. The City may choose to interview one or more firms responding to this RFP, and may enter into more than one contract with multiple individuals or firms, if City determines that is the best way to address the full range of services needed under this RFP.

Questions during the solicitation period shall be submitted through Planet Bids or by email, and may be addressed to:

City of Montebello
Department of Public Works
skouri@cityofmontebello.com

CONTRACT WITH THE CITY AND ANTICIPATED TIMING FOR BEGINNING SERVICES

The selected consultant(s) will be required to enter into an Agreement with the City. The Agreement will include the final scope of work that is negotiated with the consultant. The City Administrator is the authorizing entity to issue contracts with the Montebello City Council approval, and the contract will not take effect until it is approved by the City Council and fully executed by Consultant and City.

During the term of the contract, the Consultant will be required to keep informed of applicable local, State and Federal laws and regulations, including, but not limited, to those pertaining to conflict of interest, which in any manner affect those employed by Consultant or in any way affect the performance of the landscape maintenance services.

The City's standard professional consulting agreement is attached, including insurance requirements. As part of your proposal, please indicate whether the standard agreement is acceptable or whether you would like to propose modifications to the standard agreement.

SUBMITTAL REQUIREMENTS

Proposals will be received through 11:00 A.M. on **October 19, 2017.** If submitting through Planet Bids, only one electronic copy is required. If submitting via US Mail, Delivery Services or Delivery, please submit three (3) copies of your proposal addressed to the attention of:

City of Montebello
City Clerk's Office
Attention: Public Works Department
1600 W. Beverly Blvd.
Montebello, CA 90640

All proposals must either be 1) on paper, mailed or delivered to the City of Montebello Or 2) Electronically submitted through PlanetBids' Bidder Portal, accessed through the City of Montebello's official website at http://www.cityofmontebello.com/rfp-bids/bid-opportunities.html. All Prospective Bidders must register to bid through the PlanetBids Vendor Portal found on the City of Montebello's website at the link provided above. There no fees to register and bid on this Request For Proposals.

RFP NO. 18-17

STORM & SEWER LIFT STATION MAINTENANCE SERVICES AND RELATED EQUIPMENT

Submitted: October 19, 2017

CITY OF MONTEBELLO

RFP # 18-17: FOR STORM AND SEWER LIFT STATION MAINTENANCE SERVICES AND RELATED EQUIPMENT

1. LETTER OF INTRODUCTION (ATTACHED)

2. FIRM INFORMATION AND QUALIFICATIONS (ATTACHED)

3. REFERENCES (EXHIBIT "C" ATTACHED)

4. BIDDERS STATEMENT

Flo-Service, Inc. is uniquely qualified to perform the maintenance required in your RFP. Not only do we have a general "A" contractor's license, we also have a C10 and D21. Our primary business is modifying, repairing, maintaining, and installing pumps, motors, controls and water and waste water equipment. We are intimately familiar with your pump station equipment since we already provide preventative maintenance to your pump stations.

5. Professional Service fees (Attached)-Exhibit "B"

6. Customer Service:

Flo-Services is a service orientated company and already has a good working relationship with the City Of Montebello personnel. John Krukowski our principal has meet with Danilo Batson on a few different occasions for issues relating to the City Of Montebello's pump stations and future pump stations. John Krukowski our principal has worked with Sam Korey for many years and has met recently with Sam for City issues with new developments which include tying into your existing systems. We currently deal with Juan Hernandez on all call outs and service on your pump stations. Juan has a list of our service tech's cell phone #'s and knows to contact us any time and any day. Our office telephone # has all our emergency telephone #'s including cell phone #'s. We have already shown the City of Montebello that we are capable of handling and taking care of any of your pump station needs 24 hours a day 7 days a week.

7. Standard Consulting Agreement:

We have reviewed you contract which was part of the RFP and do not have any issues with this contract.

8. We have no law suits or arbitration proceedings initiated against our company.

We have also included a sign copy of your addendum #2 to include the Bidder Information Sheet as well as a filled out copy of your Contractor DIR Sheet.

1. Letter of Introduction

City Of Montebello
Purchasing Department

Reference: RFP #18-17

Dear Gentle People,

My name is John Krukowski, the president and owner of Flo-Services, Inc. We are your current contractor that handles your preventative maintenance and repairs to your storm water and waste water equipment.

Flo-Services started off under the name Flo-Systems Service Department close to 38 years ago. I was with Flo-Systems since the inception of the Service Department (which has been close to 35 years) and was their Service/ Construction Manager as well as on Flo-Systems Board of Directors and the Treasurer of Flo-Systems for 29 years of those years. The owner of Flo-Systems retired in February 2014 and sold the sales portion of the company. As part of the sale, Flo-Systems service, repair, maintenance, and construction division was separated from Flo-Systems and is now under our new company name, Flo-Services Inc. Flo-Systems no longer has a service, construction, maintenance, and repair department.

Flo-Services is still at the same location which is located in Burbank, Ca with basically the same personnel and the same cliental.

Flo-Services is a contracting company which specializes in performing maintenance, repairs, installation and modifications to water, wastewater and storm water equipment. We also perform sales in water and wastewater equipment.

Flo-Services has a General "A" Engineering California State Contractor's License, a C10 Electrical California State Contracting License, and a C61/21 pump and repair machinery California State Contractors license.

We are one of the only companies that have full time state certified journeymen electricians on our payroll and one of the only companies able to legally field and troubleshoot inspect and repair anything mechanically and electrically in our area. We have the proper insurances for performing the work required for our industry to include liability, workers compensation, pollution insurance, etc. We have a current City of Montebello business license.

All of Flo-Services employees have been trained on all the equipment we repair, service and maintain. All of Flo-Services employees have the required safety training and have been certified in confine space entry, hazmat, first aid and CPR training; all of which is required in order to perform certain tasks in the state of California.

Flo-Services wants to keep your business and humbly requests you thoroughly evaluate and accept our bid for your RFP # 18-17-For Storm and Sewer Lift Station Maintenance Services and related equipment.

Please contact me directly for any questions and/or concerns.

Sincerely,

John Krukowski
President
Flo-Services, Inc.

2. Qualifications

Flo-Services has a core group of employees that have been together for a long time. Their collective experience equates to over 80 years of expertise in our industry. Our field technicians are Confine Space and HazWoper certified, as well as trained in CPR. Our key personnel are as follows:

JOHN KRUKOWSKI
OWNER and PRESIDENT

John Krukowski began his career with Flo-Systems. He was with them for over 35 years and was their Service Construction Manager, Safety Manager, and Corporate Treasurer for 29 of those 35 years. John started Flo-Services, Inc. in 2013 due to the owner of Flo-Systems retired. John transferred Flo-Systems service department key personnel to Flo-Services in February 2014.

His expertise includes: providing turn-key installations, maintenance and service contracts, start-up service and operator training for major municipal pump and control manufacturers in Southern California, including progressing cavity pumps, non-clog pumps, vertical turbine pumps, recessed impeller pumps, submersible pumps, plunger pumps, process equipment grinders, comminutors, mixers, controls and instrumentation, etc.

He repairs and troubleshoots in the shop and in the field. He repairs and rebuilds all of the above equipment from manufacturers. He can modify electrical controls, instrumentation, pump control panels and MCC's.

Factory training includes:

- ABS Pumps
- Dakota Pumps
- Electromate
- Fairbanks Morse Pumps
- Moyno Pumps
- US Filter Consolidated
- Weir/Wemco Pumps

JOSE MERINO, SR.
SENIOR SERVICE TECHNICIAN

Jose was an employee of Flo-Systems for 24 years. Jose has 34 years' experience as a maintenance mechanic, electrician, plumber and welder. Jose transitioned to Flo-Services when Flo-Services separated from Flo-Systems. Jose is a State Certified Electrician.

Jose provides turn-key installations, maintenance and service contracts, start-up service and operator training for major municipal pump and control manufacturers in Southern California, including progressing cavity pumps, non-clog pumps, vertical turbine pumps,

recessed impeller pumps, submersible pumps, plunger pumps, process equipment grinders, comminutors, mixers, control panels and instrumentation on water, storm water and sewage pump systems.

Jose provides and oversees shop repairs, field repair and troubleshoots pump stations on all of the aforementioned equipment. He repairs and rebuilds all equipment provided from manufacturers. He field troubleshoots which includes modify electrical controls and pump control panels.

JAIME ADAME
SERVICE TECHNICIAN

Jaime Adame was employed by Flo Systems for 10 years. Jaime transitioned to Flo-Services when Flo-Services separated from Flo-Systems. Jaime is a welder and fabricator.

Jaime's duties include providing maintenance service for equipment including progressing cavity pumps, non-clog pumps, vertical turbine pumps, recessed impeller pumps, submersible pumps, plunger pumps, process equipment grinders, comminutors, mixers, controls and instrumentation.

Jaime provides and oversees shop repairs, field repair and troubleshoots pump stations on all of the aforementioned equipment. He repairs and rebuilds all equipment provided from manufacturers.

CHRISTOPHER BALDORF
SERVICE TECHNICIAN

Chris Baldorf has worked for Flo-Services, Inc. for 2 ½ years. He is currently a certified electrician trainee. Chris is also Flo-Services safety coordinator. His attention to detail and can-do attitude make Chris an invaluable asset to our team.

Chris's duties include providing maintenance service for equipment including progressing cavity pumps, non-clog pumps, vertical turbine pumps, recessed impeller pumps, submersible pumps, plunger pumps, process equipment grinders, comminutors, mixers, controls and instrumentation.

Chris provides and oversees shop repairs, field repair and troubleshoots pump stations on all of the aforementioned equipment. He repairs and rebuilds all equipment provided from manufacturers. He field troubleshoots which includes modify electrical controls and pump control panels.

KOREY STAPP
LABORER/SERVICE TECH

Korey Stapp has worked for Flo-Systems on and off for 7 years and has recently decided to come to work with Flo-Services, Inc.

Korey's duties include providing maintenance service for equipment including progressing cavity pumps, non-clog pumps, vertical turbine pumps, recessed impeller pumps, submersible pumps and process equipment grinders, comminutors, mixers.

Korey provides shop repairs, field repair and troubleshoots pump stations on all of the aforementioned equipment. He repairs and rebuilds all equipment provided from manufacturers. Korey is still in the process of continuing his education and is in the process of honing in on his skills.

JOHN JOSEPH KRUKOWSKI
UTILITY WORKER

John Joseph Krukowski has worked for Flo-Services, Inc. for going on 3 years. He is currently a utility worker.

John Joseph provides helps with shop repairs, field repairs and helps with troubleshooting pump stations and assists with installation and modification on all of the aforementioned equipment. John Joseph is still in the process of continuing his education and is in the process of honing in on his skills.

AMENDMENT NO. 1
TO PROFESSIONAL SERVICES AGREEMENT NO. 3316
BETWEEN THE CITY OF MONTEBELLO
AND FLO-SERVICES, INC.

This Amendment ("Amendment No. 1") to that certain Services Agreement No. 3316 for storm and sewer lift station maintenance services and related equipment for the City of Montebello dated November 9, 2017, (the "Agreement"), is made as of February 17, 2021, by and between the City of Montebello ("City"), and Flo-Services, Inc. ("Flo-Services").

WHEREAS, the City and Flo-Services are parties to the Agreement, dated November 9, 2017, under which Flo-Services was awarded a services agreement by the City for storm and sewer lift station maintenance services and related equipment services; and

WHEREAS, the City and Flo-Services desire to amend the Agreement to extend the expiration date of the term.

NOW, THEREFORE, the parties to this Amendment No. 1 agree as follows:

1. The termination date shall be extended by two (2) years, with the date amended from November 9, 2020 to November 9, 2022.

2. Except as expressly modified by this Amendment No. 1, all provisions of the Agreement shall remain in full force and effect.

4. The provisions of this Amendment No. 1 shall constitute the entire agreement of the parties with respect to the subject matter included in this Amendment No. 1 and shall supersede any other agreement, understanding, or arrangement, whether written or oral, between the parties with respect to the subject matter of this Amendment No. 1.

5. The person or persons executing this Amendment No. 1 on behalf of each of the parties warrants and represents that he or she has the authority to execute this Amendment No. 1 on behalf of that party and has the authority to bind that party to the performance of its obligations hereunder.

IN WITNESS WHEREOF, the parties have signed this Amendment No. 1 as of the date stated in the introductory clause.

ATTACHMENT B

CITY OF MONTEBELLO

AMENDMENT NO. 2
TO PROFESSIONAL SERVICES AGREEMENT NO. 3316
WITH FLO-SERVICES, INC.

This Amendment ("Amendment No. 2") to that certain Services Agreement No. 3316 for storm and sewer lift station maintenance services and related equipment for the City of Montebello dated November 9, 2017, ("Agreement"), is made as of April 13, 2022 ("Effective Date"), by and between the City of Montebello ("City"), and Flo-Services, Inc. ("Flo-Services"). City and Flo-Services are sometimes hereinafter individually referred to as a "Party" and jointly as the "Parties".

RECITALS

WHEREAS, City and Flo-Services are parties to the Agreement, dated November 9, 2017, under which Flo-Services was awarded a services agreement by the City for storm and sewer lift stations maintenance services and related equipment services; and

WHEREAS, an Amendment No. 1 to the Agreement dated February 17, 2021, was executed by the Parties extending the term of the Agreement to November 9, 2022 ("Amendment No. 1"); and

WHEREAS, City and Flo-Services now desire to amend the Agreement once more to expand the scope of work and increase the related compensation under the Agreement (and as thereafter amended in Amendment No. 1); and

NOW, THEREFORE, the parties to this Amendment No. 2 agree to amend the Agreement as follows:

SECTION 1. AMENDMENT TO SCOPE OF WORK. The scope of work to the Agreement is expanded to include the following services attached hereto as Exhibit "A" and incorporated herein by this reference:

A. Proposal # 22-019, Dated March 23, 2022 – Grant Rea Park Sewage Pump Station
B. Proposal # 22-020, Dated March 23, 2022 – Natasha Sewage Pump Station
C. Proposal # 22-017, Dated March 23, 2022 – Rancho & Lincoln Sewage Pump Station #1
D. Proposal # 22-018, Dated March 23, 2022 – Sanchez & Lincoln Sewage Pump Station #2

SECTION 2. COMPENSATION. Compensation for the expanded scope of work contemplated under Section 1 of this Amendment No. 2 shall be as follows:

> "City agrees to compensate Flo-Services for the expanded scope of work contemplated under Amendment No. 2 (Exhibit "A"), and Flo-Services agrees to accept in full satisfaction for such services an amount not-to-exceed the sum of **Two Hundred Sixty-Nine Thousand, Five Hundred Seventy-Nine** (**$269,579**); unless a different amount is specifically approved in advance in writing by City."

SECTION 3. EFFECT. Except as expressly modified by this Amendment No. 2, all provisions of the Agreement and as thereafter amended in Amendment No. 1, shall remain in full force and effect.

SECTION 4. ENTIRE AGREEMENT. The provisions of this Amendment No. 2 shall constitute the entire agreement of the parties with respect to the subject matter included in this Amendment No. 2 and shall supersede any other agreement, understanding, or arrangement, whether written or oral, between the parties with respect to the subject matter of this Amendment No. 2.

SECTION 5. AUTHORITY. The person or persons executing this Amendment No. 2 on behalf of each of the Parties warrants and represents that he or she has the authority to execute this Amendment No. 2 on behalf of that party and has the authority to bind that party to the performance of its obligations hereunder.

[SIGNATURE PAGE TO FOLLOW]

Proposal #22-017

City of Montebello
1600 W. Beverly Blvd.
Montebello, CA 90640

Attention: Mr. James Enriquez
Mr. Juan Hernandez

Reference: Rancho & Lincoln Sewage Pump Station #1
Revised Estimated Updated Budget Proposal
Urgent Repairs Required

Gentlemen,

Per our recent preventative maintenance station reports and previous proposals submitted to the city, Flo-Services found items that require immediate attention. Both Pump #1 & Pump #2 have very bad bearing noise and the packing is leaking excessively on both pumps. Both pump power frames need to be removed and rebuilt, and the motors require reconditioning. The 4" suction valve for Pump #1 is leaking at stem seal and the valve requires replacement. We suggest replacing both suction valves. The sewage wet well has excessive rags and debris and requires cleaning to remove and dispose of these items. Excessive wastewater was observed on the pump station drywell floor due to the pump packing issues. The sump pump is not operating properly, and the level switch is not activating until the dry well floor gets submerged with 1 inch of standing water. This standing water is creating issues with larvae/mosquito/red-worm infestation on the dry well floor, pump bases and pump which is due to the excessive packing leakage and sump pump operation. The sump pump with level switch require replacement.

Flo-Services will need to enter the wet well to perform isolation and replacement of both pump suction valves and to remove debris from inside the wet well. A vacuum truck service company will be required to be onsite to help with the removal and disposal of the wet well debris and to maintain the flow to the pump station during the replacement of the valve. It will be the responsibility of the City of Montebello to hire and pay for this vacuum truck to include any disposal fees which we estimate will be required for 2 days.

Flo-Services has revised this estimated time and material budget proposal to reflect the latest pricing at the time of this proposal. Due to the inflation issues, we have also included an estimated 20% increase on the materials to this budget pricing. We will adjust the material price accordingly to reflect current pricing at the time of the city authorizes this work.

Flo-Services is pleased to present our revised proposal to replace and/or repair the above items at Rancho & Lincoln Sewage Pump Station #1 as follows:

Standard Power Frame Rebuild and Standard Motor Recondition

Two-	Set's power frame repair parts to include bearings, gaskets, grease seals, shaft sleeve, slinger, lantern ring, and packing	$ 3,927.48 Each	$ 7,854.96
Two-	Motor recondition to include dip, bake, and bearings Material Portion	$ 655.50 Each	$ 1,311.00
Two-	4" flanged gate valve	$ 904.85 Each	$ 1,809.70
Four-	4" flange bolt kit 316 stainless steel with ring gasket	$ 31.47 Each	$ 125.88
Two-	4" flange adapter to include 316 stainless steel hardware	$ 927.75 Each	$ 1,855.50
One-	½ HP cast iron sump pump with vertical float switch, 9.5" start, 2.5" stop, 10.5A, 1-½" discharge		$ 686.00
One-	Lot estimated miscellaneous sump pump 316 stainless steel piping and valves required to adapt to the existing sump discharge line		$ 1,657.17

Estimated material price increase from date of last proposal 20% **$ 3,060.04**
(Prices will be adjusted accordingly once the material order is placed)

Two-	Motor recondition to include dip, bake, and bearings Labor Portion	$ 1,100.00 Each	$ 2,200.00

Estimated Field Labor – Portal to Portal – 3 Men
40 Hours at $401.25 Per Hour $16,050.00

Estimated Shop Hours Rebuild Power Frame on Pump #1 and Pump #2 With the standard rebuild parts listed above 24 Hours at $133.75 Per Hour	$ 3,210.00
2 Day confined space entry fee- Per day-$347.75	$ 695.50
Mileage Portal to Portal- Service Truck 52 Miles @ $1.66 Per Mile X 5 Trips	$ 431.60
Mileage – Portal to Portal – Utility Truck 52 Miles at $1.44 Per Mile x 5 Trips	$ 374.40
Tool Truck/Equipment Truck Fee-Per Day Estimated-5 Days @ $480.00 Per day	$ 2,400.00
1 Day- 4" Pneumatic Plug Assembly & Compressor Rental-Per Day 2 Days @ $278.00 Per day	$ 556.00
10.25% Sales Tax	$ 1,881.93
Parts freight to/from Flo-Services	$ 850.00
Estimated Price	**$47,009.68**_____ **Initial**

Note: This is an estimated proposal. The city will be invoiced for actual time and material required per rates on our contract with the City of Montebello. If additional parts and labor are required, you will be notified and invoiced accordingly. Bonds are not included in the above price but can be provided at cost plus 1.5%. Please advise.

The electrical conduit to sump pump receptacle has corroded and broken at floor level, wires are exposed, and has filled with water. The blower circuit breaker operator handle on control panel door does not function properly; breaker must be in "ON" position to close door. The D152 level controller display is starting to burn out, low-level alarm is no longer functional, and low-level setting pins have been removed. The telephone auto dialer alarm notification unit is not working and has been removed from service. The controller, control panel, and pump station electrical are old and should be replaced. The mechanical pumps, piping, valves, and fittings are also old and should be replaced. This station needs to be completely remodeled. Budget pricing to follow under separate cover after approval of this proposal.

THIS PROPOSAL EXPIRES IN 30 DAYS from the date of this proposal or bid opening date, if applicable.

The Sellers work and responsibility is expressly limited to providing materials and performing the services listed in this proposal. Design, application and direction for work and materials are to be provided by and responsibility of the Buyer. Flo- Services Total liability of the Seller for this purchase agreement including indemnity, liquidated

damages, actual damages, special damages, and consequential damages is limited to the coverage offered and paid by the Seller's insurance policies for all other Seller's liabilities, including liquidated/actual damages, due to delivery delays. Liquidated/Actual damages are further limited to what is assessed by the Owner, paid to Owner and assessed due to the sole cause of Seller's delays.
FLO-SERVICES Contractor's license Number is: 988492

The expiration date of FLO-SERVICES Contractor's license is: **11/30/23**

Bidder acknowledges that Section 7028.15 (e) of the Business and Professions Code provides as follows:

A license contractor shall not submit a bid to a public agency unless his or her contractor's license number appears clearly on the bid, the license expiration date is stated, and the bid contains a statement that the representations herein are made under penalty of perjury. Any bid not containing this information, or a bid containing the information, which is subsequently proven false, shall be considered non-responsive and shall be rejected by the public agency."

The undersigned declares, under penalty of perjury, that the representations made by the undersigned in the bid proposal are true and correct.

Thank you for your consideration to this proposal.

Very truly yours,

John Krukowski
FLO-SERVICES, INC.

TERMS OF SALE

1. ACCEPTANCE. "SELLER" is Flo-Services, Inc. who may function as a SUB-CONTRACTOR, REPAIR AND SERVICE ORGANIZATION OR VENDOR. "BUYER" is the CUSTOMER who may function as a CONTRACTOR, OWNER, ETC. These terms govern the purchase and sale of equipment, contractor's services, etc., referred to in SELLER"S proposal or acknowledgement. SELLER rejects all additional or different terms in any of BUYER'S forms or documents unless specifically accepted by SELLER in writing.
2. PAYMENT. Terms are Net 30 days from date of shipment and invoice, subject to approval of credit. SELLER may proceed on a "when ready" basis and partial invoice for the equipment that has shipped and /or services rendered. Interest at one percent per month or at the legal maximum rate will be assessed for late payment.
3. RETENTIONS, unless herein authorized by SELLER, are not allowed.
4. BACK CHARGES The BUYER agrees to pay reasonable BACK CHARGES (based on actual cost plus profit, overhead and taxes) for any special services, additional equipment, repairs etc. made necessary by the omissions, mistakes, accidents, negligence or miscalculations of the BUYER, ENGINEER or OWNER. Commensurate with the urgency, nature and scope of the back charge, SELLER shall give BUYER advance notice of the intended back charge, but such advance notice shall not be a prerequisite for BACK CHARGES against the BUYER. Any BACK CHARGES from the intended BUYER, not authorized in writing by SELLER, will not be recognized.
5. DELIVERY. SELLER shall not be liable for delays due to fire, flood, labor issues, war, civil disorders, delay in transportation, inability to obtain materials, accidents, acts of God or other causes beyond SELLER'S reasonable control.
6. RESPONSIBILITY. SELLER shall not be responsible for damage to equipment if misused, improperly stored, installed or maintained. SELLER SHALL NOT BE LIABLE FOR CONSEQUENTIAL, INCIDENTAL, SPECIAL, PUNITIVE, COLLATERAL, LIQUIDATED OR OTHER INDIRECT DAMAGES. CONSEQUENTIAL DAMAGES FOR THE PURPOSES OF THIS AGREEMENT SHALL INCLUDE BUT NOT BE LIMITED TO, LOSS OF USE, INCOME, PROFIT, LOSS OF OR DAMAGE TO PROPERTY, ETC. These limitations apply whether the liability is based upon contract, tort, strict liability or any other theory.
7. WARRANTY. For benefit of the original user, SELLER warrants all new equipment sold to be free from defects in material and workmanship, and will replace or repair, F.O.B. at its factories or other location designated by it, any part or parts returned to it which SELLERS examination shall show to have failed under normal use and service by the original user within one year following initial shipment to the BUYER. This warranty does not cover damage by decomposition from chemical action or wear caused by abrasive materials nor does it cover damage resulting from misuse, alteration, accident or neglect, or from improper operation, maintenance, installation, modification or adjustment. Such repair or replacement shall be free for all items except for those items that are consumable and normally replaced during maintenance. THIS WARRANTY IS EXPRESSLY MADE BY SELLER AND ACCEPTED BY BUYER IN LIEU OF ALL OTHER WARRANTIES, WHETHER WRITTEN, ORAL, EXPRESS OR IMPLIED.
8. COMPLIANCE WITH LAWS. BUYER shall be solely responsible for securing any necessary permits and for compliance with all safety, health, sanitation and any other laws, ordinances and regulations in connection with the design, installation and operation of the equipment.
9. INDEMNIFICATION. It is understood that SELLER has relied upon data furnished by and on behalf of BUYER with respect to the safety aspects and application of the equipment and that it is BUYERS responsibility to assure that the equipment will, when installed and put in use, be in compliance with requirements fixed by law and otherwise legally adequate to safeguard against injuries or damage to persons or property. BUYER hereby agrees to defend, indemnify and hold harmless SELLER, its agents and employees against any and all losses, costs, damages, claims, liabilities or expenses, arising out of or resulting from any injury or damage to any person or property caused by the inadequacy of safety features, devices or characteristics in the equipment or in the installation, use or operation of the same, except claims for repair or replacement of defective parts are provided in Paragraph 7 hereof. Within the policy limitations of the SELLERS insurance policies, SELLER will indemnify, defend and hold BUYER harmless from any claim, cause of action or liability incurred by BUYER as a result of third party claims for personal injury, death or damage to tangible property, to the extent caused by SELLERS sole negligence. SELLER shall have the sole authority to direct the defense of and settle any indemnified claim. SELLER's indemnification is conditioned on BUYER (a) promptly notifying SELLER of any claim, and (b) providing reasonable cooperation in the defense of any claim.
8.TITLE & LIEN RIGHTS. After delivery to Buyer, Seller will have all such rights, including security interests and liens, in the equipment as lawfully may be conferred upon Seller by contract under any applicable provision of law.
9.MISCELLANEOUS. Goods may not be returned without previous written permission and are subject to a restocking charge. The SELLER may cancel agreement only upon written notice and payment of reasonable cancellation charges, including anticipated profit. Attorney's fees and court costs necessary to enforce these terms of sale will be paid to the prevailing party. No part of the Agreement may be changed or cancelled except by a written document signed by SELLER and BUYER. No course of dealing or performance, usage of trade or failure to enforce any term shall be used to modify the Agreement. If any of these terms is unenforceable, such term shall be limited only to the extent necessary to make it enforceable and all other terms shall remain in full force and effect. BUYER may not assign or permit any other transfer of the Agreement without SELLERS prior written consent. The Agreement shall be governed by the laws of the State of California without regard to its conflict of laws provisions.

Acceptance of this proposal with the terms referred to herein may be accomplished by executing this document or by providing a BUYERS purchase order/contract.

Proposal #22-018

City of Montebello
1600 W. Beverly Blvd.
Montebello, CA 90640

Attention: Mr. James Enriquez
Mr. Juan Hernandez

Reference: Sanchez & Lincoln Sewage Pump Station #2
Revised Estimated Updated Budget Proposal
Urgent Repairs Required

Gentlemen,

Per our recent preventive maintenance station reports and previous proposals submitted to the city, Flo-Services found items that require immediate attention. Pump #1 has bearing noise, and the shaft packing is leaking excessively on both pumps. Both pump power frames need to be removed and rebuilt, and the motors require reconditioning. Wastewater was observed on the pump station drywell floor due to the pump packing issues. The sump pump with level switch is not operating properly and both require replacement. Pump #2 Starter has a cracked housing an requires replacement. The discharge valve on pump #2 is leaking around the shaft stem which is consistent with a worn valve stem. We suggest replacing both pump discharge valves. The sewage wet well has rags and debris and requires cleaning to remove and dispose of these items.

Flo-Services will need to enter the wet well to perform isolation and to remove debris from inside the wet well. A vacuum truck service company will be required to be onsite to help with the removal and disposal of the wet well debris and to maintain the flow to the pump station during the replacement of the valves. It will be the responsibility of the City of Montebello to hire and pay for this vacuum truck to include any disposal fees which we estimate will be required for 2 days.

Flo-Services has revised this estimated time and material budget proposal to reflect the latest pricing at the time of this proposal. Due to the inflation issues, we have also included an estimated 20% increase on the materials to this budget pricing. We will adjust the material price accordingly to reflect current pricing at the time of the city authorizes this work.

Flo-Services is pleased to present our revised proposal to replace and/or repair the above items at Sanchez & Lincoln Sewage Pump Station #2 as follows:

Standard Power Frame Rebuild

Two-	Set's power frame repair parts to include bearings, gaskets, grease seals, shaft sleeve, slinger, lantern ring, and packing	$ 3,927.48 Each	$ 7,854.96
Two-	Motor recondition to include dip, bake, and bearings Material Portion	$ 655.50 Each	$ 1,311.00
One-	½ HP cast iron sump pump with vertical float switch, 9.5" start, 2.5" stop, 10.5A, 1-½" discharge		$ 686.00
One-	Lot estimated miscellaneous sump pump 316 stainless steel piping and valves required to adapt to the existing sump discharge line		$ 1,657.17
One-	NEMA Size 1 full voltage motor starters		$ 421.23
Two-	4-Inch discharge valves with handles	$ 904.85 Each	$ 1,809.70
Four-	Sets of 316 stainless steel flange kits with gaskets	$ 34.04 Each	$ 136.16

Estimated material price increase from date of last proposal 20% $ 2,775.24
(Prices will be adjusted accordingly once the material order is placed)

Two-	Motor recondition to include dip, bake, and bearings Labor Portion	$ 1,100.00 Each $ 2,200.00
	Estimated Field Labor – Portal to Portal – 3 Men 40 Hours at $401.25 Per Hour	$16,050.00
	Estimated Shop Labor – 1 Man Rebuild Pump #1 24 Hours at $133.75 Per Hour	$ 3,210.00
	Mileage Portal to Portal- Service Truck 52 Miles @ $1.66 Per Mile X 5 Trips	$ 431.60

Mileage – Portal to Portal – Utility Truck 52 Miles at $1.44 Per Mile x 5 Trips	$ 374.40
Tool Truck/Equipment Truck Fee-Per Day Estimated-5 Days @ $480.00 Per day	$ 2,400.00
Confine Space Entry Fee-Per Day Estimated 2 days @ $347.75	$ 695.50
4" Pneumatic Plug Assembly & Compressor Rental-Per Day 2 Days @ $278.00 Per day	$ 556.00
Estimated 10.25% Sales Tax	$ 1,706.77
Parts freight to/from Flo-Services	$ 850.00
Estimated Price	**$45,125.73**_____

Initial

Note: This is an estimated proposal. The city will be invoiced for actual time and material required per rates on our contract with the City of Montebello. If additional parts and labor are required, you will be notified and invoiced accordingly. Bonds are not included in the above price but can be provided at cost plus 1.5%. Please advise.

Motor #1 is mega-ohm testing very low, we feel this is due to the electrical requiring upgrade. The wet well ladder has heavy rust deterioration and should never be used for entry to wet well. We suggest removing these rungs to prevent anyone from using these for entry. The electrical conduit to sump pump receptacle has corroded and broken at floor level, wires are exposed, and has filled with water. The D152 level controller display is starting to burn out. The telephone auto dialer alarm notification unit is not working and has been removed from service. The controller, control panel, and pump station electrical are old and should be replaced. The mechanical pumps, piping, valves, and fittings are also old and should be replaced. This station needs to be completely remodeled. Budget pricing to follow under separate cover after approval of this proposal.

THIS PROPOSAL EXPIRES IN 30 DAYS from the date of this proposal or bid opening date, if applicable.

The Sellers work and responsibility is expressly limited to providing materials and performing the services listed in this proposal. Design, application and direction for work and materials are to be provided by and responsibility of the Buyer. Flo- Services Total liability of the Seller for this purchase agreement including indemnity, liquidated damages, actual damages, special damages, and consequential damages is limited to the coverage offered and paid by the Seller's

insurance policies for all other Seller's liabilities, including liquidated/actual damages, due to delivery delays. Liquidated/Actual damages are further limited to what is assessed by the Owner, paid to Owner, and assessed due to the sole cause of Seller's delays.
FLO-SERVICES Contractor's license Number is: 988492

The expiration date of FLO-SERVICES Contractor's license is: **11/30/23**

Bidder acknowledges that Section 7028.15 (e) of the Business and Professions Code provides as follows:

A license contractor shall not submit a bid to a public agency unless his or her contractor's license number appears clearly on the bid, the license expiration date is stated, and the bid contains a statement that the representations herein are made under penalty of perjury. Any bid not containing this information, or a bid containing the information, which is subsequently proven false, shall be considered non-responsive and shall be rejected by the public agency."

The undersigned declares, under penalty of perjury, that the representations made by the undersigned in the bid proposal are true and correct.

Thank you for your consideration to this proposal.

Very truly yours,

John Krukowski

March 23, 2022
Proposal #22-019

City of Montebello
1600 W. Beverly Blvd.
Montebello, CA 90640

Attention: Mr. James Enriquez
Mr. Juan Hernandez

Reference: Grant Rea Park Sewage Pump Station

Gentlemen,

Per our last preventive maintenance at this pump station and our previous station reports, Flo-Services found a few items that require replacement. The air pumps are beyond their 3–5-year life expectancy and require replacement. The inner 0-160" level gauge is completely stuck and requires replacement. Both pump gate valves require replacement, they are not closing to stop back flow. Both pump check valves are not close properly and are causing the pumps to recirculate sewage, which is creating excessive operation, wear on the pumps and higher electricality bills. Both pump check valves require replacement. The motor starters are not able to be opened to clean which creates issue on servicing the motor starter contacts, we recommend upgrading to a more serviceable model. Pump motor #2 is indicating mechanical seal failure and the motor winding insulation mega-ohm test is low. Pump motor #1 is also megging low. Due to the age of these motors, it may be more cost effective to replace the motors instead of repairing it. Both pump impellers are worn and require replacement. The sewage wet well has rags and debris and requires cleaning to remove and dispose of these items.

Flo-Services will need to enter the wet well to perform isolation and to remove debris from inside the wet well. A vacuum truck service company will be required to be onsite to help with the removal and disposal of the wet well debris and to maintain the flow to the pump station during the replacement of the valves. It will be the responsibility of the City of Montebello to hire and pay for this vacuum truck to include any disposal fees which we estimate will be required for 1 day.

Flo-Services has revised this estimated time and material budget proposal to reflect the latest pricing at the time of this proposal. Due to the inflation issues, we have also included an estimated 20% increase on the materials to this budget pricing. We will adjust the material price accordingly to reflect current pricing at the time of the city authorizes this work.

Flo-Services is pleased to present our estimated proposal to replace the above items at Grant Rea Park Sewage Pump Station as follows:

Two-	Air pumps	$ 336.30 each	$ 672.60
One-	0-160" liquid level gauge		$ 127.24
Two-	4" gate valves flanged	$ 904.85 each	$ 1,809.70
Two-	4" check valves flanged lever/spring	$ 2,144.52 each	$ 4,289.04
Six-	4" flange bolt kits and gaskets	$ 34.04 each	$ 204.27
Two-	Motor starters with overload blocks With external reset buttons and auxiliary contacts	$ 783.78 each	$ 1,567.56
One-Lot-	300 M Bit Mastic Coating		$ 200.00
Two-	3 HP, 1160 RPM, 180TY frame, 460 volt, 3 phase, submersible pump motor, UL Listed Explosion-Proof, with 70' cables, T/C outer mechanical seal, and 300M two-part epoxy coating	$ 6,763.35 each	$13,526.70
Two-	Pump impellers	$ 1,784.34 each	$ 3,568.68
Two-	Pump impellers screws	$ 409.98 each	$ 819.96

Estimated material price increase from date of last proposal 20% $ 5,357.15
(Prices will be adjusted accordingly once the material order is placed)

Estimated Field Labor – Portal to Portal – 3 Men 32 Hours at $401.25 Per Hour	$12,840.00
2 Day confined space entry fee- Per day-$347.75	$ 695.50
4 Days Winch/Equipment Truck-Per Day-$480.00	$ 1,920.00
Shop Labor Coat the valves with a two-part 300 M Bit Mastic Coating 4 Hours @ 133.74 Per Hour	$ 534.96
Mileage Portal to Portal- Service Truck 52 Miles @ $1.66 Per Mile X 4 Trips	$ 345.28

Mileage – Portal to Portal – Utility Truck 52 Miles at $1.44 Per Mile x 4 Trips		$ 299.52
	Estimated 10.25% Sales Tax	$ 3,294.65
	Freight to/from Flo-Services	$ 1,350.00
	Estimated Price	**$53,422.81**_____ **Initial**

Note: This is an estimated proposal. The city will be invoiced for actual time and material required per rates on our contract with the City of Montebello. If additional parts and labor are required, you will be notified and invoiced accordingly. Bonds are not included in the above price but can be provided at cost plus 1.5%. Please advise.

THIS PROPOSAL EXPIRES IN 30 DAYS from the date of this proposal or bid opening date, if applicable.

The Sellers work and responsibility is expressly limited to providing materials and performing the services listed in this proposal. Design, application and direction for work and materials are to be provided by and responsibility of the Buyer. Flo- Services Total liability of the Seller for this purchase agreement including indemnity, liquidated damages, actual damages, special damages and consequential damages is limited to the coverage offered and paid by the Seller's insurance policies for all other Seller's liabilities, including liquidated/actual damages, due to delivery delays. Liquidated/Actual damages are further limited to what is assessed by the Owner, paid to Owner and assessed due to the sole cause of Seller's delays.
FLO-SERVICES Contractor's license Number is: 988492

The expiration date of FLO-SERVICES Contractor's license is: **11/30/23**

Bidder acknowledges that Section 7028.15 (e) of the Business and Professions Code provides as follows:

A license contractor shall not submit a bid to a public agency unless his or her contractor's license number appears clearly on the bid, the license expiration date is stated, and the bid contains a statement that the representations herein are made under penalty of perjury. Any bid not containing this information, or a bid containing the information, which is subsequently proven false, shall be considered non-responsive and shall be rejected by the public agency."

The undersigned declares, under penalty of perjury, that the representations made by the undersigned in the bid proposal are true and correct.

Thank you for your consideration to this proposal.

Very truly yours,

John Krukowski
FLO-SERVICES, INC.

TERMS OF SALE

1. ACCEPTANCE. "SELLER" is Flo-Services, Inc. who may function as a SUB-CONTRACTOR, REPAIR AND SERVICE ORGANIZATION OR VENDOR. "BUYER" is the CUSTOMER who may function as a CONTRACTOR, OWNER, ETC. These terms govern the purchase and sale of equipment, contractor's services, etc., referred to in SELLER"S proposal or acknowledgement. SELLER rejects all additional or different terms in any of BUYER'S forms or documents unless specifically accepted by SELLER in writing.
2. PAYMENT. Terms are Net 30 days from date of shipment and invoice, subject to approval of credit. SELLER may proceed on a "when ready" basis and partial invoice for the equipment that has shipped and /or services rendered. Interest at one percent per month or at the legal maximum rate will be assessed for late payment.
3. RETENTIONS, unless herein authorized by SELLER, are not allowed.
4. BACK CHARGES The BUYER agrees to pay reasonable BACK CHARGES (based on actual cost plus profit, overhead and taxes) for any special services, additional equipment, repairs etc. made necessary by the omissions, mistakes, accidents, negligence or miscalculations of the BUYER, ENGINEER or OWNER. Commensurate with the urgency, nature and scope of the back charge, SELLER shall give BUYER advance notice of the intended back charge, but such advance notice shall not be a prerequisite for BACK CHARGES against the BUYER. Any BACK CHARGES from the intended BUYER, not authorized in writing by SELLER, will not be recognized.
5. DELIVERY. SELLER shall not be liable for delays due to fire, flood, labor issues, war, civil disorders, delay in transportation, inability to obtain materials, accidents, acts of God or other causes beyond SELLER'S reasonable control.
6. RESPONSIBILITY. SELLER shall not be responsible for damage to equipment if misused, improperly stored, installed or maintained. SELLER SHALL NOT BE LIABLE FOR CONSEQUENTIAL, INCIDENTAL, SPECIAL, PUNITIVE, COLLATERAL, LIQUIDATED OR OTHER INDIRECT DAMAGES. CONSEQUENTIAL DAMAGES FOR THE PURPOSES OF THIS AGREEMENT SHALL INCLUDE BUT NOT BE LIMITED TO, LOSS OF USE, INCOME, PROFIT, LOSS OF OR DAMAGE TO PROPERTY, ETC. These limitations apply whether the liability is based upon contract, tort, strict liability or any other theory.
7. WARRANTY. For benefit of the original user, SELLER warrants all new equipment sold to be free from defects in material and workmanship, and will replace or repair, F.O.B. at its factories or other location designated by it, any part or parts returned to it which SELLERS examination shall show to have failed under normal use and service by the original user within one year following initial shipment to the BUYER. This warranty does not cover damage by decomposition from chemical action or wear caused by abrasive materials nor does it cover damage resulting from misuse, alteration, accident or neglect, or from improper operation, maintenance, installation, modification or adjustment. Such repair or replacement shall be free for all items except for those items that are consumable and normally replaced during maintenance. THIS WARRANTY IS EXPRESSLY MADE BY SELLER AND ACCEPTED BY BUYER IN LIEU OF ALL OTHER WARRANTIES, WHETHER WRITTEN, ORAL, EXPRESS OR IMPLIED.
8. COMPLIANCE WITH LAWS. BUYER shall be solely responsible for securing any necessary permits and for compliance with all safety, health, sanitation and any other laws, ordinances and regulations in connection with the design, installation and operation of the equipment.
9. INDEMNIFICATION. It is understood that SELLER has relied upon data furnished by and on behalf of BUYER with respect to the safety aspects and application of the equipment and that it is BUYERS responsibility to assure that the equipment will, when installed and put in use, be in compliance with requirements fixed by law and otherwise legally adequate to safeguard against injuries or damage to persons or property. BUYER hereby agrees to defend, indemnify and hold harmless SELLER, its agents and employees against any and all losses, costs, damages, claims, liabilities or expenses, arising out of or resulting from any injury or damage to any person or property caused by the inadequacy of safety features, devices or characteristics in the equipment or in the installation, use or operation of the same, except claims for repair or replacement of defective parts are provided in Paragraph 7 hereof. Within the policy limitations of the SELLERS insurance policies, SELLER will indemnify, defend and hold BUYER harmless from any claim, cause of action or liability incurred by BUYER as a result of third party claims for personal injury, death or damage to tangible property, to the extent caused by SELLERS sole negligence. SELLER shall have the sole authority to direct the defense of and settle any indemnified claim. SELLER's indemnification is conditioned on BUYER (a) promptly notifying SELLER of any claim, and (b) providing reasonable cooperation in the defense of any claim.
8.TITLE & LIEN RIGHTS. After delivery to Buyer, Seller will have all such rights, including security interests and liens, in the equipment as lawfully may be conferred upon Seller by contract under any applicable provision of law.
9.MISCELLANEOUS. Goods may not be returned without previous written permission and are subject to a restocking charge. The SELLER may cancel agreement only upon written notice and payment of reasonable cancellation charges, including anticipated profit. Attorney's fees and court costs necessary to enforce these terms of sale will be paid to the prevailing party. No part of the Agreement may be changed or cancelled except by a written document signed by SELLER and BUYER. No course of dealing or performance, usage of trade or failure to enforce any term shall be used to modify the Agreement. If any of these terms is unenforceable, such term shall be limited only to the extent necessary to make it enforceable and all other terms shall remain in full force and effect. BUYER may not assign or permit any other transfer of the Agreement without SELLERS prior written consent. The Agreement shall be governed by the laws of the State of California without regard to its conflict of laws provisions.

Acceptance of this proposal with the terms referred to herein may be accomplished by executing this document or by providing a BUYERS purchase order/contract.

CONTRACTORS LICENSE NO. 988492

NOTICE TO PROPERTY OWNER

If bills are not paid in full for the labor, services, equipment, or materials furnished or to be furnished, a mechanic's lien leading to the loss, through court foreclosure proceeding, of all or part of your property being so improved may be placed against the property even though you have paid your contractor in full. You may wish to protect yourself against this consequence by (1) requiring your contractor to furnish a signed release by the person or firm giving you this notice before making payment to your contractor or (2) any other method or device that is appropriate under the circumstances, such as a contractor's payment bond.

CONTRACTORS ARE REQUIRED BY LAW TO BE LICENSED AND REGULATED BY THE CONTRACTOR'S STATE LICENSE BOARD which has jurisdiction to investigate complaints against contractors if a complaint regarding a patent act or omission is filed within four years of the date of the alleged violation. A complaint regarding a latent act or omission pertaining to structural defects must be filed within ten years of the date of the alleged violation. Any questions concerning a contractor may be referred to:

City of Montebello
1600 W. Beverly Blvd.
Montebello, CA 90640

Attention: Mr. James Enriquez
Mr. Juan Hernandez

Reference: Natasha Sewage Pump Station
Revised Estimated Updated Budget Proposal

Gentlemen,

Per our recent preventive maintenance station reports and previous proposals submitted to the City, Flo-Services found many items at Natasha Sewage Pump Station that require immediate replacement and/or attention:

Flo-Services has revised this estimated time and material budget proposal to reflect the latest pricing at the time of this proposal. Due to the inflation issues, we have also included an estimated 20% increase on the materials to this budget pricing. We will adjust the material price accordingly to reflect current pricing at the time of the city authorizes this work.

1. The three-way discharge plug valve is no longer operational so the discharge of the pumps cannot be isolated. This valve requires replacement.

2. Both pump check valves are not shutting properly and are worn which is causing excessive ragging and backflushing. Both pump check valves require replacement.

3. The air release valve on Pump #1 is leaking and not operating properly and after disassembly we found it has excessive wear and are not repairable. Pump #2 air release valve is in the same condition. Both pump air release valves require replacement.

4. The exhaust fan does not work, the fan motor is burned out. The exhaust fan requires replacement.

5. Both air pumps are reading very low pressure. These air pumps are required to operate the level controls which in turn operates the sewage pumps in the automatic mode. Both air pumps require replacement to include replacement of the air tubing.

6. The drive belts on both sewage pumps are worn and the drive belts require replacement.

7. The pump impellers and suction wear plates are worn beyond adjustment. The suction flapper assemblies are also worn. The pumps require a major overhaul. At this point it is more cost effective to purchase new pumps.

8. The wet well pump suction pipes as well as the wet well discharge piping and fittings are corroded and require replacement. The external parts of this new material will need to be coated with a two-part 300 M epoxy to help protect/prevent premature replacement of these items.

9. The automatic telephone dialer alarm system is antiquated and is not functional. This station does not have an active alarm system. This alarm system requires replacement and upgrading to a current cellular internet-based alarm system like used at the City of Montebello's Greenwood Stormwater Pump Station.

10. Both sets of pump discharge and suction gauge assemblies are damaged and not operating properly and require replacement. Due to their age, the hoses, and hose fittings for these gauges require replacement. Both pump vent piping and drain hoses with fittings should also be replaced.

11. To conform with new electrical standards, the pump control panel requires a modification to include a new lightning/surge arrestor. The phase monitor relay requires replacement due to age.

12. The wet well is extremely dirty, has excessive debris and requires a major cleaning to include debris removal. This will require Flo-Services personnel to enter the wet well utilizing confine space entry procedures and equipment as well as require the City of Montebello to hire and pay for a vacuum truck to vacuum out and dispose of the wet well debris.

13. Due to the age of the motors and since the pumps are being replaced, we suggest reconditioning the existing pump motors which will include dip and bake of the windings, balancing the rotors, new bearings, and seals.

Flo-Services is pleased to present our revised proposal to replace and/or repair the above items at Natasha Lane Sewage Pump Station as follows:

2-Two- Replacement pumps with belts	$ 9,904.02 Each	$19,808.04
2-Two- Pump discharge check valves	$ 1,645.72 Each	$ 3,291.44
1-One- Three-way discharge plug valve		$ 8,333.34
2-Two- Pump air release valves	$ 1,125.18 Each	$ 2,250.36
2-Two- Pump Flapper assemblies	$ 296.77 Each	$ 593.54
12 Sets- 4 Inch 316 stainless steel flange kits with ring gaskets	$ 38.72 Each	$ 464.64
1-One- Lot estimated wet well pump suction piping, discharge piping, and pipe fittings		$10,556.40
1-One- Lot 300M two-part bitumastic coating and coating supplies		$ 816.00
1-One- Lot miscellaneous electrical for the new cellular telemetry to include control panel relay's, liquid tight flex with fittings, wire and din rail.		$ 600.00
1-One- Lot miscellaneous control panel electrical components to include phase monitor relay, and surge/lightning arrestor, wire and din rail.		$ 772.50
1-One- Lot miscellaneous plumbing components to include hoses, hose fittings with clamps, discharge gauges, suction gauges, valves, and pipe fittings		$ 3,067.37
2-Two- Air pumps	$ 336.30 Each	$ 672.60
1-One- Exhaust Fan		$ 227.90
2- Standard motor reconditioning to include new bearings and seals Material portion	$ 828.00 Each	$ 1,656.00

1-One- Lot Mission Communications M850 RTU Cellular based internet alarm system in a NEMA 4X enclosure to include back up battery, antenna, cable, bracket, and the first-year service package		$ 5,415.23
Note: There will be an annual service fee which is currently $563.40 per year which will be invoiced directly to the City of Montebello after the first year of service.		
Estimated material price increase from date of last proposal 20%		**$11,705.07**
2- Standard motor reconditioning to include new bearings and seals Labor portion	$ 1,104.00 Each	$ 2,208.00
Estimated Field Labor - Portal to Portal - 3 Men 56 Hours at $401.25 Per Hour		$22,470.00
Estimated Field Labor – Portal to Portal – 2 Men 32 Hours at $272.85 Per Hour		$ 8,731.20
Estimated Shop Hours Coating of wet well pipe and fittings. Painting of new pump and fittings. 16 Hours at $133.75 Per Hour		$ 2,140.00
5 Days-Estimated confined space entry fee- Per day-$347.75		$ 1,738.75
11 Days Winch/Equipment Truck- Per day-$480.00		$ 5,280.00
Mileage - Portal to Portal- Service Truck 52 Miles @ $1.66 Per Mile X 11 Trips		$ 949.52
Mileage – Portal to Portal – Utility Truck 52 Miles at $1.44 Per Mile x 7 Trips		$ 524.16
	Estimated 10.25% Sales Tax	$ 7,198.62
	Freight to/from Flo-Services	$ 2,550.00
	Estimated Price	**$124,020.68**_____ Initial

Note: This is an estimated proposal. The City will be invoiced for actual time and material required as listed on our contract will the City of Montebello. If additional parts and labor are required, you will be notified and invoiced accordingly. Bonds are not included in the above price but can be provided at cost plus 1.5%. Please advise.

As mentioned above, a vacuum truck service company will be required to be onsite to help with the removal and disposal of the wet well debris and to maintain the flow to the pump station during the replace of some of the wet well piping. It will be the responsibility of the City of Montebello to hire and pay for this vacuum truck to include any disposal fees. We estimate this will service will be required for 2 to 3 days. Bonds are not included in the above price but can be provided at cost. Please advise.

THIS PROPOSAL EXPIRES IN 30 DAYS from the date of this proposal or bid opening date, if applicable.

The Sellers work and responsibility is expressly limited to providing materials and performing the services listed in this proposal. Design, application and direction for work and materials are to be provided by and responsibility of the Buyer. Flo- Services Total liability of the Seller for this purchase agreement including indemnity, liquidated damages, actual damages, special damages, and consequential damages is limited to the coverage offered and paid by the Seller's insurance policies for all other Seller's liabilities, including liquidated/actual damages, due to delivery delays.

Liquidated/Actual damages are further limited to what is assessed by the Owner, paid to Owner and assessed due to the sole cause of Seller's delays.

FLO-SERVICES Contractor's license Number is: 988492

The expiration date of FLO-SERVICES Contractor's license is: 11/30/23

Bidder acknowledges that Section 7028.15 (e) of the Business and Professions Code provides as follows:
A license contractor shall not submit a bid to a public agency unless his or her contractor's license number appears clearly on the bid, the license expiration date is stated, and the bid contains a statement that the representations herein are made under penalty of perjury. Any

bid not containing this information, or a bid containing the information, which is subsequently proven false, shall be considered non-responsive and shall be rejected by the public agency."

The undersigned declares, under penalty of perjury, that the representations made by the undersigned in the bid proposal are true and correct.

Thank you for your consideration to this proposal.

Very truly yours,

John Krukowski

TERMS OF SALE

1. ACCEPTANCE. "SELLER" is Flo-Services, Inc. who may function as a SUB-CONTRACTOR, REPAIR AND SERVICE ORGANIZATION OR VENDOR. "BUYER" is the CUSTOMER who may function as a CONTRACTOR, OWNER, ETC. These terms govern the purchase and sale of equipment, contractor's services, etc., referred to in SELLER"S proposal or acknowledgement. SELLER rejects all additional or different terms in any of BUYER'S forms or documents unless specifically accepted by SELLER in writing.
2. PAYMENT. Terms are Net 30 days from date of shipment and invoice, subject to approval of credit. SELLER may proceed on a "when ready" basis and partial invoice for the equipment that has shipped and /or services rendered. Interest at one percent per month or at the legal maximum rate will be assessed for late payment.
3. RETENTIONS, unless herein authorized by SELLER, are not allowed.
4. BACK CHARGES The BUYER agrees to pay reasonable BACK CHARGES (based on actual cost plus profit, overhead and taxes) for any special services, additional equipment, repairs etc. made necessary by the omissions, mistakes, accidents, negligence or miscalculations of the BUYER, ENGINEER or OWNER. Commensurate with the urgency, nature and scope of the back charge, SELLER shall give BUYER advance notice of the intended back charge, but such advance notice shall not be a prerequisite for BACK CHARGES against the BUYER. Any BACK CHARGES from the intended BUYER, not authorized in writing by SELLER, will not be recognized.
5. DELIVERY. SELLER shall not be liable for delays due to fire, flood, labor issues, war, civil disorders, delay in transportation, inability to obtain materials, accidents, acts of God or other causes beyond SELLER'S reasonable control.
6. RESPONSIBILITY. SELLER shall not be responsible for damage to equipment if misused, improperly stored, installed or maintained. SELLER SHALL NOT BE LIABLE FOR CONSEQUENTIAL, INCIDENTAL, SPECIAL, PUNITIVE, COLLATERAL, LIQUIDATED OR OTHER INDIRECT DAMAGES. CONSEQUENTIAL DAMAGES FOR THE PURPOSES OF THIS AGREEMENT SHALL INCLUDE BUT NOT BE LIMITED TO, LOSS OF USE, INCOME, PROFIT, LOSS OF OR DAMAGE TO PROPERTY, ETC. These limitations apply whether the liability is based upon contract, tort, strict liability or any other theory.
7. WARRANTY. For benefit of the original user, SELLER warrants all new equipment sold to be free from defects in material and workmanship, and will replace or repair, F.O.B. at its factories or other location designated by it, any part or parts returned to it which SELLERS examination shall show to have failed under normal use and service by the original user within one year following initial shipment to the BUYER. This warranty does not cover damage by decomposition from chemical action or wear caused by abrasive materials nor does it cover damage resulting from misuse, alteration, accident or neglect, or from improper operation, maintenance, installation, modification or adjustment. Such repair or replacement shall be free for all items except for those items that are consumable and normally replaced during maintenance. THIS WARRANTY IS EXPRESSLY MADE BY SELLER AND ACCEPTED BY BUYER IN LIEU OF ALL OTHER WARRANTIES, WHETHER WRITTEN, ORAL, EXPRESS OR IMPLIED.
8. COMPLIANCE WITH LAWS. BUYER shall be solely responsible for securing any necessary permits and for compliance with all safety, health, sanitation and any other laws, ordinances and regulations in connection with the design, installation and operation of the equipment.
9. INDEMNIFICATION. It is understood that SELLER has relied upon data furnished by and on behalf of BUYER with respect to the safety aspects and application of the equipment and that it is BUYERS responsibility to assure that the equipment will, when installed and put in use, be in compliance with requirements fixed by law and otherwise legally adequate to safeguard against injuries or damage to persons or property. BUYER hereby agrees to defend, indemnify and hold harmless SELLER, its agents and employees against any and all losses, costs, damages, claims, liabilities or expenses, arising out of or resulting from any injury or damage to any person or property caused by the inadequacy of safety features, devices or characteristics in the equipment or in the installation, use or operation of the same, except claims for repair or replacement of defective parts are provided in Paragraph 7 hereof. Within the policy limitations of the SELLERS insurance policies, SELLER will indemnify, defend and hold BUYER harmless from any claim, cause of action or liability incurred by BUYER as a result of third party claims for personal injury, death or damage to tangible property, to the extent caused by SELLERS sole negligence. SELLER shall have the sole authority to direct the defense of and settle any indemnified claim. SELLER's indemnification is conditioned on BUYER (a) promptly notifying SELLER of any claim, and (b) providing reasonable cooperation in the defense of any claim.
8.TITLE & LIEN RIGHTS. After delivery to Buyer, Seller will have all such rights, including security interests and liens, in the equipment as lawfully may be conferred upon Seller by contract under any applicable provision of law.
9.MISCELLANEOUS. Goods may not be returned without previous written permission and are subject to a restocking charge. The SELLER may cancel agreement only upon written notice and payment of reasonable cancellation charges, including anticipated profit. Attorney's fees and court costs necessary to enforce these terms of sale will be paid to the prevailing party. No part of the Agreement may be changed or cancelled except by a written document signed by SELLER and BUYER. No course of dealing or performance, usage of trade or failure to enforce any term shall be used to modify the Agreement. If any of these terms is unenforceable, such term shall be limited only to the extent necessary to make it enforceable and all other terms shall remain in full force and effect. BUYER may not assign or permit any other transfer of the Agreement without SELLERS prior written consent. The Agreement shall be governed by the laws of the State of California without regard to its conflict of laws provisions.

Acceptance of this proposal with the terms referred to herein may be accomplished by executing this document or by providing a BUYERS purchase order/contract.

ITEM # 15

CITY OF MONTEBELLO

CITY COUNCIL AGENDA STAFF REPORT

TO: Honorable Mayor and City Council Members

FROM: René Bobadilla, P.E., City Manager

BY: Fire Chief Fernando Pelaez, Fire Chief
Michael Solorza, Director of Finance

SUBJECT: **Approve Acquisition and Lease Financing of a Tractor Drawn Aerial Fire Truck and Related Rescue Equipment**

DATE: April 13, 2022

RECOMMENDATIONS:

It is recommended that the City Council:

1) Authorize the purchase of a Tractor Drawn Aerial (TDA) Fire Truck using the pre-bid Sourcewell contract #022818-EOI-2 based off Request for Proposal #022818; and,

2) Authorize the City Manager to execute an agreement with Kovatch Mobile Equipment (KME) Corporation (KME Fire Apparatus), in a not-to-exceed amount of $1,926,844 for the purchase and equipping/outfitting of a Tractor Drawn Aerial Fire Truck; and

3) Approve a resolution for financing the lease/purchase of the Tractor Drawn Aerial (TDA) Fire Truck and required equipment from Kovatch Mobile Equipment and Leasing 2, Inc.; and

4) Find that the use of the pre-bid Sourcewell contract #022818-EOI-2 conforms with Montebello Municipal Code Chapter 3.20.050 (F), Cooperative Purchase; and

5) Approve the surplus of the unneeded fire truck and any associated equipment currently used as a reserve apparatus; and

6) Take such additional, related actions necessary to effectively and efficiently procure the Tractor Drawn Aerial Fire Truck and required Rescue Equipment from KME Fire Apparatus and Leasing 2, Inc.

FISCAL IMPACT

The City of Montebello currently has two Fire Trucks in service – one active and one held in reserve. Both of these apparatus are past their useful service life (20+ years) and must be replaced. The proposed plan is to acquire one new Tractor Drawn Aerial (TDA) Fire Truck which would be placed into immediate active service. (See Attachment A for the bid specifications of the TDA Fire Truck.) The current Fire Truck in active service would be placed in reserve, and the current reserve truck would be surplused/disposed.

These types of fire trucks are a substantial capital investment, and as such must be financed. Typically, fire engines and fire trucks are acquired through the lease-purchase process. This process allows the total cost of purchase and outfitting to be financed over a longer period of time, which results in reasonable and manageable annual lease payments. For example, the Montebello Fire Department acquired a fire engine in 2018 through the lease-purchase process and pays annual lease payments.

The TDA Fire Truck will be acquired from Kovatch Mobile Equipment (KME) Corporation. Financing will be handled by Leasing 2, Inc. Given the nature of this acquisition, delivery of this Fire Truck – built to customized specifications per the Montebello Fire Department (Attachment A) – will not occur for approximately 15 months. Lease payments would begin 18 months from City Council approval of this purchase, approximately October, 2023 (Fiscal Year 2023-24).

The total amount necessary to procure the Tractor Drawn Aerial (TDA) Fire Truck and Related Rescue Equipment is $1,926,844. The Fire Truck is priced at $1,654,809, with the additional $272,035 reserved for necessary equipment, sales tax and contingency reserve. The additionally purchased rescue equipment will be used to equip the fire truck, such as mobile radios, chain saws, rotary saws, hydraulic extrication tools, power tools, portable generators, salvage covers and other hand tools that are customary and required equipment found on a fire truck.

The entire amount will be financed over a ten year term (Attachment B). Financing the truck and equipment at a 2.68% fixed annual rate equals annual lease payments of $225,198. The first lease payment will be due October 2023, and annually thereafter. Per the terms of the lease, once the final payment is made, the City will own the fire truck outright. Given the typical service life of these apparatus, the ten year lease option makes the most operational and financial sense.

Adoption of a Resolution (Attachment C) approving the financing of this acquisition is also required. Staff will work directly with the financing corporation (Leasing 2, Inc.) to

complete all necessary paperwork and credit applications, after approval of this item and the resolution.

Given the nature of this lease-purchase, no budget amendment is necessary. Furthermore, no payments are necessary prior to the first annual lease payment (October 2023). This financing process allows the City to acquire an essential piece of firefighting and life safety equipment without any upfront costs. Furthermore, with the first payment not due until FY 2023-24, ample time exists to plan for the additional $225,198 General Fund expense.

BACKGROUND

The Montebello Fire Department operates three (3) fire stations, with suppression activities that account for the vast majority of emergency responses, resulting in approximately 22 to 25 emergency calls per day, with an estimate of 8,000 calls for service each year. Some of those emergency responses require a well-equipped Tractor Drawn Aerial (TDA) Fire Truck able to safely, effectively and efficiently respond to incidents. Montebello firefighters utilize the TDA to respond to various types of incidents such as traffic collisions and structure fires. The TDA is a highly used fire apparatus in the fire service, and is considered a maneuverable aerial apparatus.

Currently, the Fire Department has a front-line TDA and a reserve TDA. The front-line TDA Truck operates 24 hours per day, 7 days per week, and is deployed from Fire Station 55. The current active TDA Fire Truck is a 2003 model manufactured by American La France Eagle. This active fire truck exceeds the recommended industry standard service life for front line TDA fire apparatus, according to the National Fire Protection Association (NFPA) 1911-96- Inspection, Maintenance Testing of In-service Fire Apparatus and NFPA 1901 and 1906- Guidance on Retirement of Apparatus.

This Guidance states such apparatus must not exceed 10 years of front-line operation with an additional 10 years as a reserve apparatus, for a total of 20 years of service life. To further exacerbate the current state of keeping the active truck in working condition, the American La France fire apparatus company ceased operations in 2014, making it increasingly difficult to obtain parts for repairs.

Purchasing Process

Montebello fire personnel have carefully reviewed and assessed the most effective, efficient and dependable fire apparatus for the Fire Department fleet. The Fire Department utilized the Sourcewell procurement process to identify the best suitable pricing that is compliant with the City's procurement process and Municipal Code Chapter 3.20.050 (F) – Cooperative Purchases.

Specifically, Sourcewell Contract #022818-EOI-2 (Attachment E) is being utilized, which was established based off a National Joint Powers Alliance Request for Proposals, #022818 (Attachment F). The City has utilized Sourcewell for numerous and various types of purchases over the last several years. This is a nationally recognized cooperative purchasing entity and pricing has been determined to be competitive.

Through the procurement process it was deemed appropriate to move forward with the proposal for the lease-purchase of the new Tractor Drawn Aerial (TDA) Fire Truck, manufactured by Kovatch Mobile Equipment (KME) Corporation (Attachment A). The assessment was based on the fact that the Department's current front line TDA is 19 years old (2003 model) and the reserve TDA is now obsolete (1990 model). In addition, ongoing repairs would be financially burdensome to the City, including potential increased liabilities due to operating out of date fire apparatus. The 1990 fire truck will be surplused and the current active truck will be placed in reserve when the new TDA Fire Truck is delivered.

SUMMARY

Staff is recommending the City Council approve the lease-purchase of the Kovatch Mobile Equipment (KME) Tractor Drawn Aerial (TDA) Fire Truck and Related Rescue Equipment in order to maintain operable fire suppression services and operations, in addition to ensuring required fire apparatus and equipment meet the National Fire Protection Association (NFPA) 1911 and 1906 guidance for standards in fire operations.

The total cost of the fire truck and necessary equipment to be financed over a ten year term is $1,926,844. The fire truck is estimated at $1,654,809, and the additional $272,035 will be used to purchase necessary equipment to outfit the truck. Given the lease-purchase financing arrangement with Leasing 2, Inc., there will be no upfront expenses. The first lease payment will be due in October, 2023 (Attachment B).

The funds for the purchase of the fire truck and equipment will be placed in an escrow account. Fire Department staff will then purchase equipment as necessary, send invoices to Leasing 2, Inc., and expenses will be paid from the escrow account. Should the equipment be less than the estimated amount, any overage would be applied toward the first lease payment. Should the cost of the truck and equipment exceed the financing amount, the City would pay the difference. A budget amendment is not needed to effectuate this purchase. The FY 2023-24 budget will be developed to include the $225,198 annual lease amount (General Fund), see Attachment B.

Approval of the attached Resolution (Attachment C) will allow Staff to move forward with the necessary credit application and financing documents to finalize this lease-purchase. Delivery of the new fire truck is anticipated within 450 days of all financing documents being finalized. Staff will provide updates to the City Council as progress is made on manufacturing the City's new fire truck.

KME FIRE APPARATUS

Montebello Fire Department

Quote # QUO0000007376 (Rev 1)

March 2, 2022

DESIGN CLAUSE

QTY: 1

These specifications outline the components, installation methods, and operational characteristics KME is agreeing to provide in order to meet the purchaser's requirements. Subject to the terms of the purchase agreement, other construction details not explicitly listed in these specifications will be determined at the discretion of the builder. In the event the purchaser desires a different construction or installation not already described in these specifications, additional charges may apply, and quoted lead time commitments will be adjusted.

PROPOSED BY - KME FIRE APPARATUS - CALIFORNIA

QTY: 1

KME Fire Apparatus is pleased to offer the proposed vehicle to meet the intent of the fire department specifications.

KME Fire Apparatus is a leading manufacturer in custom and commercial fire fighting vehicles.

Questions or concerns pertaining to this proposal can be answered by contacting the following KME personnel:

KME Fire Apparatus
4725 Troy Ct.
Jurupa Valley, CA 91761

Phone: (800) 328-1033 / (909) 937-3326

Fax: (909) 937-1762

E-mail: kmeca@kovatch.com

COMPLETION INFORMATION

QTY: 1

The contractor shall supply, at the time of delivery, at least one (1) copy of the following documents.

- Owners name and address Apparatus manufacturer, model and serial number
- Chassis make, model and serial number
- Front tire size and total rated capacity in pounds
- Rear tire size and total rated capacity in pounds
- Chassis weight distribution in pounds with water and manufacturer mounted equipment, front and rear
- Engine make, model, serial number, rated horsepower, rated speed and governed speed
- Type of fuels and fuel tank capacity
- Electrical system voltage and alternator output in amps.
- Battery make, model and total capacity in cold crank amps (CCA)
- Transmission make, model, and serial number. If so equipped chassis transmission PTO(s) make, model and gear ratio
- Pump make, model, rated capacity in gallons per minute (liters per minute where applicable) and serial number
- Pump transmission make, model, serial number and gear ratio
- Auxiliary pump make, model, rated capacity in gallons per minute (liters per minute where applicable) and serial number
- Water tank certified capacity in gallons or liters
- Paint manufacturer and paint number(s)

- Company name and signature of responsible company representative
- Certification of slip resistance of all stepping, standing and walking surfaces.

If the apparatus has a fire pump or an industrial supply pump, the pump manufacturer's certification of suction capability.

If the apparatus has a fire pump or an industrial supply pump, a copy of the apparatus manufacturer's approval for stationary pumping applications.

If the apparatus has a fire pump or an industrial supply pump, the engine manufacturers certified brake horsepower curve for the engine furnished, showing the maximum governed speed.

If the apparatus has a fire pump or an industrial supply pump, the pump manufacturers certification of hydrostatic test.

If the apparatus has a fire pump or an industrial supply pump, the third party certification of inspection and test for the fire pump (if applicable).

If the apparatus has an aerial device the third party certification of inspection and test for the aerial device.

If the apparatus has an aerial device, all the technical information required for inspections to comply with NFPA 1911, Standards for Testing Fire Department Aerial Devices.

If the apparatus has a fixed line voltage power source, the certification of the test for the fixed power source (if applicable).

If the apparatus is equipped with an air system, test results of the air quality, the SCBA fill station, and the air system installation.

Weight documents from certified scale - showing actual loading on the front axle, rear axle(s) and overall vehicle (with the water tank full but without personnel, equipment and hose) shall be supplied with the complete vehicle to determine compliance with NFPA-1901.

Written load analysis and results of electrical performance tests.

If the apparatus is equipped with a water tank, the certification of water tank capacity by the tank manufacturer.

FMVSS REQUIREMENT

QTY: 1

The chassis shall be certified by the apparatus manufacturer as conforming to all applicable Federal Motor Vehicle Safety Standards in effect at the date of contract.

This shall be attested to by the attachment of a FMVSS certification label on the vehicle by the contractor who shall be recognized as the responsible final manufacturer.

RECORDS

QTY: 1

The successful bidder shall be responsible for preparing and maintaining a record file of parts and assemblies used to manufacture the apparatus.

These records shall be maintained in the factory of the bidder for a minimum of twenty (20) years.

File shall contain copies of any and all reported deficiencies, all replacement parts required to maintain the apparatus, and original purchase documents including specifications, contract, invoices, incomplete chassis certificates, quality control reports and final delivery acceptance documents.

The {Company} shall have access to any and all documents contained in this file upon official written request.

GENERAL CONSTRUCTION

QTY: 1

The complete apparatus, assemblies, subassemblies, component parts, etc., shall be designed and constructed with the due consideration to the nature and distribution of the load to be sustained and to the general character of the service to which the apparatus is to be subject.

All parts of the apparatus shall be designed with a factor of safety, which is equal to or greater than that which is considered standard and acceptable for this class of equipment in fire fighting service.

All parts of the apparatus shall be strong enough to withstand general service under full load.

The apparatus shall be so designed that the various parts and readily accessible for lubrication, inspection, adjustment and repair.

Bidder's specifications must meet minimum requirements of N.F.P.A. Pamphlet #1901 and all State and Federal Department of Transportation vehicle regulations at time of sale of unit.

The apparatus shall be designed and constructed, and the equipment so mounted, with due consideration to distribution of the load between front and rear axles that all specified equipment, including a full complement of specified ground ladders, full water tank, loose equipment, and firefighters shall be carried without overloading or injuring the apparatus.

PRODUCT LIABILITY

QTY: 1

Each bidder shall supply proof of product liability and facility insurance equal to or exceeding $30,000,000.00.

This shall be provided as part of the proposal. There will be no exceptions.

PAINT CERTIFICATION

QTY: 1

The finish paint shall be certified by the apparatus manufacturer as conforming to all applicable Commercial Vehicle Paint Standards in effect at the date of contract.

This shall be attested to by the attachment of a Sikkens certification.

PROPOSED SERVICE BY - KME FIRE APPARATUS - CA

QTY: 1

SERVICE CENTER AND PARTS DEPOT

KME Fire Apparatus
FACTORY BRANCH - CALIFORNIA

KME APPARATUS SERVICE STATEMENT

The proposed KME Fire Apparatus vehicle is offered with complete single-source service performed by the regional KME factory service center.

Service is provided by:
KME Fire Apparatus
4725 Troy Ct.
Jurupa Valley, CA 91761
Phone: (800) 328-1033 / (909) 937-3326
Fax: (909) 937-1762
Email: kmeca@kovatch.com

Service Center Capabilities:
KME Fire Apparatus in Ontario, CA. celebrates fourteen (14) years of operation and employs twenty (20) people. The factory owned operation employs nine (9) full-time service mechanics two (2) certified paint and body technicians and two (2) fabrication technicians to handle any service-related issues or operational improvements that you may desire.

KME Fire Apparatus employees EVTCC and ASE certified technicians, along with PPG and DuPont certified body shop technicians.
KME Fire Apparatus operates five (5) mobile service trucks that offer In-Station Service repairs to your apparatus when needed. We also have towing available should your unit need to travel to our service facility.
KME Fire Apparatus offers a twenty-four (24) hour service plan in which assigned service personnel carry pagers; one (1) man is always on call to handle any truck that is down and out of service.

KME Fire Apparatus offers:
Sheet metal repair and fabrication
Pump and electrical repair
Aerial ladder service and repair
Booster tank repair and replacement
Minor or major refurbishment capabilities
Mobile pump testing at your facility

KME Fire Apparatus offers factory authorized service and repairs to all makes of fire apparatus equipped with Hale, Waterous and Darley Pumps.

KME Fire Apparatus has the largest inventory of apparatus parts in Southern California and offers quick turn-around parts delivery when your unit is down. We also offer a large loose goods line and apparel to service the fire industry.

KME Fire Apparatus contact information, of proud service professionals.

Service Contacts - (951) 685-1237
John Whitney - Service Manager
Alfred Dominuez - Warranty

Parts and Loose Goods Sales - (951) 685-1237
Matthew Groth – Parts Manager

KME Fire Apparatus employees are protected by Workman's Compensation Insurance.

A 1 Million Dollar Garage Keepers Liability Insurance Coverage and a 25 Million Dollar Product Liability

Insurance Policy protect your fire department and your fire department equipment.

PRICES & PAYMENTS

QTY: 1

The bid price will be F.O.B. Destination, on a delivered and accepted basis at the Fire Department.
Total price on KME's proposal sheet will include all items listed in these specifications.
KME has computed pricing less federal and state taxes. It is understood that any applicable taxes will be added to the proposed prices, unless the purchaser furnishes appropriate tax-exempt forms.

FAIR ETHICAL & LEGAL COMPETITION

QTY: 1

In order to ensure fair, ethical, and legal competition, neither original equipment manufacturer (OEM) nor parent company of the OEM shall have ever been fined or convicted of price fixing, bid rigging, or collusion in any domestic or international fire apparatus market.

There will be no exceptions.

MATERIAL & WORKMANSHIP

QTY: 1

All equipment furnished shall be guaranteed to be new and of current manufacture, to meet all requirements of these specifications.

All workmanship shall be of high quality and accomplished in a professional manner so as to insure a functional apparatus with a pleasing, aesthetic appearance.

CONTRACT ADMINISTRATOR

QTY: 1

The successful bidder shall designate a contract administrator to provide a single point interface between the purchaser and the contractor on all matters concerning the contract.

APPROVAL DRAWING

QTY: 1

A detailed drawing of the apparatus shall be provided to the purchaser for approval before construction begins. A copy of this drawing shall also be provided to the manufacturer's representative. Upon purchaser's approval, the finalized drawing shall become a part of the total contract.

The drawing shall show, but is not limited to, such items as the chassis make and model, major components, location of lights, sirens, all compartment locations and dimensions, special suctions, discharges, etc. The drawing shall be a visual interpretation of the apparatus as it is to be supplied.

INSPECTION TRIPS (3)

QTY: 1

The successful bidder shall provide three (3) factory inspection trips to the apparatus manufacturer's facility.

Transportation, meals, lodging, and other requisite expenses shall be the bidder's responsibility.

TRIP ONE (1) AT PRE CONSTRUCTION

QTY: 1

Pre-construction / blueprint review.

TRIP TWO (2) AT MID-POINT COMPLETION

QTY: 1

Midpoint completion of entire apparatus.

TRIP THREE (3) AT FINAL COMPLETION

QTY: 1

Final inspection upon completion.

DELIVERY

QTY: 1

Delivery of the apparatus to the customer shall remain the bidder's responsibility.

On initial delivery of the fire apparatus, a qualified and responsible representative of the contractor shall demonstrate the apparatus and provide initial instruction to representatives of the customer regarding the operation, care, and maintenance of the apparatus and equipment supplied.

INSTRUCTION MANUALS - TWO (2) SETS - USB

QTY: 1

In accordance with standard commercial practices, applicable to each vehicle (including body and special equipment) furnished under the contract, the following listed manuals and schematics, in the quantity specified, shall be provided at time of delivery of each vehicle.

The contractor shall supply at time of delivery, two (2) USB copies of a complete operation and service manual covering the complete apparatus as delivered and accepted.

The manual shall contain the following:

- Descriptions, specifications, and ratings of chassis, pump (if applicable), and aerial device
- Wiring diagrams
- Lubrication charts
- Operating instructions for the chassis, any major components such as a pump and any auxiliary systems
- Instructions regarding the frequency and procedures recommended for maintenance
- Parts replacement information

PRODUCTION LEVEL ELECTRICAL DRAWINGS

QTY: 1

KME shall provide production level harness drawings for the specific unit to be built.

VEHICLE FLUID PLATE

QTY: 1

As required by NFPA-1901, the contractor shall affix a permanent plate in the driver's compartment specifying the quantity and type of the following fluids used in the vehicle:

A permanent plate in the driving compartment shall specify the quantity and type of the following fluids used in the vehicle:

- Engine oil
- Engine coolant
- Chassis transmission fluid
- Pump transmission lubrication fluid
- Pump primer fluid
- Drive axle(s) lubrication fluid
- Air-conditioning refrigerant
- Air-conditioning lubrication oil
- Power steering fluid

- Cab tilt mechanism
- Transfer case fluid
- Equipment rack fluid
- Air compressor system lubricant
- Generator system lubricant
- Aerial systems

EXACT BLUEPRINT WITH BID

QTY: 1

A scale drawing of the specific apparatus being proposed shall be submitted WITH THE BID.

Drawings of similar units or demo units shall not be permitted.

Bidders should be clear that this provision is requiring a SCALE drawing of the truck which is actually being bid.

The drawing shall be done at the manufacturer's facility by the manufacturer's engineering department in order to guarantee the accuracy of the drawing.

Failure to comply with this requirement shall be grounds for rejection of the bid!

FAMA MEMBERSHIP

QTY: 1

The apparatus manufacturer must be a current member of the Fire Apparatus Manufacturer's Association (FAMA).

MANUFACTURED IN UNITED STATES

QTY: 1

The entire apparatus shall be assembled within the borders of the Continental United States to insure more readily available parts (without added costs and delays caused by tariffs and customs) and service.

AMP DRAW REPORT

QTY: 1

The bidder shall provide with their bid proposal and at the time of delivery, an itemized print out of the expected amp draw of the entire vehicle's electrical system.

A written load analysis, which shall include the following:

- The rating of the alternator.
- The minimum continuous load of each component that is specified per: Applicable NFPA-1901.
- Additional loads that, when added to the minimum continuous load, determine the total connected load.
- Each individual intermittent load.

All of the above listed items shall be provided by the bidder per the applicable NFPA-1901.

COOPERATIVE PURCHASING

QTY: 1

The Manufacturer shall be pleased to allow other public agencies to use the purchase agreement resulting from this invitation to bid unless the bidder expressly notes on the proposal form that prices are not available for tag-on.

The condition of such use by other agencies shall be that any such agency must make and pursue contact, purchase order/contract, and all contractual remedies with the successful bidder.

Such tag-ons shall be done so that the original purchasing agency has no responsibility for performance by either the manufacturer or the agency using the contract.

VEHICLE TRANSPORTATION - KME PROVIDED

QTY: 1

Transportation of the completed vehicle from the final manufacturing facility to the end user shall be provided by the manufacturer.

!!! CRITICAL OVERALL HEIGHT REQUIREMENT !!! - "YES

QTY: 1

This vehicle has a critical overall height restriction requirement due to fire station door height or obstruction within the fire department/district.

Maximum overall height of vehicle in the unloaded configuration cannot exceed: _____" (inches).

!!! CRITICAL OVERALL LENGTH REQUIREMENT !!! - "YES

QTY: 1

This vehicle has a critical overall length restriction requirement due to fire station length or obstruction within the fire department/district.

Maximum overall length of vehicle cannot exceed: _____" (inches).

GENERAL INFORMATION - NFPA 1901

QTY: 1

The proposed apparatus will be constructed to withstand the severe and continuous use encountered during emergency fire fighting services. The apparatus will be of the latest type, carefully designed and constructed with due consideration to the nature and distribution of the load to be sustained.

This proposal details the general design criteria of cab and chassis components, aerial device (if applicable), fire pump and related components (if applicable), water tank (if applicable), fire body, electrical components, painting, and equipment.

All items of these proposal specifications will conform to the fullest extent possible with the National Fire Protection Association Pamphlet No. 1901, latest edition, except as noted in the Statement-of-Exceptions.

KME will furnish satisfactory evidence of our ability to construct, supply service parts and technical assistance for the apparatus specified.

NFPA TREADPLATE CERTIFICATION

QTY: 1

All stepping, standing, and walking surfaces on the body shall meet NFPA #1901 anti-slip standards.

Aluminum tread plate utilized for stepping, standing, and walking surfaces shall be NFPA embossed compliant.

Upon request by the purchaser, the manufacturer shall supply proof of compliance with this requirement.

VERTICAL TREAD PLATE - NON-EMBOSSED

QTY: 1

The following vertical surfaces on the vehicle (if applicable) shall have non-embossed tread plate:

To include but not limited to:

- Rear of cab overlay

- Rear body overlay
- Front of body overlay
- Front pump house panel
- Custom cab step well
- Fender overlay
- Fender compartment doors
- Interior cab trim
- Upper body walkway walls
- Rescue body interior (walk-In/walk through)

"PUMPER FIRE APPARATUS" NFPA 2016 CHAPTERS

QTY: 1

The unit shall be designed to conform fully to the "Pumper Fire Apparatus" requirements as stated in the NFPA 1901 Standard (2016 Revision), which shall include the following required chapters as stated in this revision:

- Chapter 1 Administration
- Chapter 2 Referenced Publications
- Chapter 3 Definitions
- Chapter 4 General Requirements
- Chapter 5 Pumper Fire Apparatus
- Chapter 12 Chassis and Vehicle Components
- Chapter 13 Low Voltage Electrical Systems and Warning Devices
- Chapter 14 Driving and Crew Areas
- Chapter 15 Body, Compartments and Equipment Mounting
- Chapter 16 Fire Pumps and Associated Equipment
- Chapter 18 Water Tanks

NFPA "CHAPTER 22" 110 VOLT SYSTEM REQUIREMENTS

QTY: 1

Chapter 22 Line Voltage Electrical Systems

THIRD PARTY TESTING

QTY: 1

If required by the specific chapters of NFPA-1901, the proposed unit shall be tested and certified by independent third party inspectors.

All test work for fire pumps outlined in NFPA 1901, Edition shall be conducted.

The third party inspectors shall provide the manufacturer a complete written examination and test report for each inspection performed at the manufacturer's facility.

This report specifies the points of inspection and results of such examinations and tests.

The inspectors performing the test work on the units are certified to Level II in the required NDT methods, under the requirements outlined in ASNT document CP-189.

The actual person(s) performing the inspection shall present for review proof of Level II Certification in the required NDT methods.

The apparatus manufacturer shall designate, in writing, who is qualified to witness and certify these test results.

Prior to submittal to the automotive fire apparatus manufacturer, the final Report shall be reviewed by the Supervisor of Fire Equipment Services and a Registered Professional Engineer, both of whom are directly involved with the aerial device certification program.

When the unit successfully meets all the requirements outlined in NFPA 1901, current edition, the third party inspector shall issue a Certificate of Automotive Fire Apparatus Examination and Test stating the unit's compliance with NFPA- 1901.

120/240 VOLT ELECTRICAL SYSTEM TESTING

QTY: 1

All line voltage wiring and permanently connected devices and equipment shall be subjected to a dielectric voltage withstand test of 900 volts for one minute. The test shall be conducted between live parts and the neutral conductor and between live parts and the vehicle frame with any switches in the circuits closed. The test shall be conducted after all bodywork has been completed. The dielectric tester shall have a minimum 500 VA transformer with a sinusoidal output voltage that can be verified.

Electrical polarity verification shall be made of all permanently wired equipment and receptacles to determine that connections have been properly made.

The apparatus manufacturer shall perform the following operation test and shall certify that the power source and any devices that are attached to the line voltage electrical system are properly connected and in working order.

The generator shall be started from a cold start condition and the line voltage electrical system shall be loaded to 100 percent of the nameplate voltage rating.

The following items shall be monitored and documented every 15 minutes:

- The cranking time until the generator starts and runs.
- The voltage, frequency, and amperes at continuous full rated load.
- The generator oil pressure, water temperature, transmission temperature, hydraulic temperature, and the battery rate charge, as applicable.
- The ambient temperature and altitude.

The generator shall operate at 100 percent of its nameplate wattage for a minimum of two (2) hours.

UL LINE VOLTAGE TESTING

QTY: 1

When the unit successfully meets all the requirements outlined in NFPA 1901, 2016 Edition, third party inspectors shall issue a Certificate of Automotive Fire Apparatus Examination and Test stating the unit's compliance with the required line voltage section of NFPA.

SEVERE SERVICE CAB - BASE, 100" - S2020

QTY: 1

The cab shall be a custom tilt style, built specifically for fire service.

The cab shall be a cab over engine design, with integral tilt mechanism and engine access from inside the cab.

The cab interior shall be the "Open-Space" design with no wall, window or vertical support posts between the front and rear crew areas to allow direct communication, better visibility and air circulation in the cab.

CAB MATERIAL

QTY: 1

The cab shall be fabricated from 5052-H 32 aluminum alloy, utilizing the minimum material thickness as follows:

- Cab side panels 0.125 thick (1/8")
- Cab roof 0.125 thick (1/8")
- Forward cab front sheet 0.125 thick (1/8")
- Interior cab panels 0.125 thick (1/8")
- Other panels 0.125 thick (1/8")
- Cab doors 0.1875 thick (3/16")
- Engine enclosure side panels 0.250 thick (1/4")

Cab, sub-frame shall be a welded assembly, fabricated of 6063 structural aluminum alloy. This frame shall extend the full length and width of the cab and be secured to the chassis frame through two (2) rear, urethane, self centering load cushions, two (2) forward pivot brackets, and two (2) cab locks. The cab shall be of entirely welded construction.

The front cab wall shall be of double wall type construction, featuring an inner and outer panel. {No Exceptions}

CRASH TESTING

QTY: 1

To ensure the safety of the cab occupants and cab integrity, proof of third party testing shall be provided.

The cab shall be certified for SAEJ2422 side impact, SAEJ2420 with ECER29 cab front impact, and ECER29 cab roof strength.

Furthermore, proof of testing and certification shall be provided that the cab, in accordance to SAE J2420 was front impact tested at 2.1 times the standard energy required in SAE J2420, thus exceeding the NFPA requirement.

This test shall be performed with no support immediately behind the cab, thus providing an authentic test result.

CAB LENGTH

QTY: 1

Minimum Cab Dimensions:

- Overall width 100"
- Inside width across ceiling 92"
- Front area floor to ceiling 61-3/4"
- Top of front seat to ceiling 44" (depending upon seat type)
- Seat back to steering wheel 21-1/4" (depending upon seat type)
- Inside width (door to engine enclosure) 24" (driver's side, at floor)
- Inside width (door to engine enclosure) 20-1/2" (officer's side, at floor)
- Crew seat area width 92"
- Outer crew seat risers to rear wall 41-1/2"
- Centerline axle to rear wall 59-1/2"

Glass Area Dimensions:

- Windshield (Contour) 3,422 sq. in.
- Side door window, retractable 625 sq. in. each
- Side fixed crew windows 550 sq. in. each

CAB ROOF

QTY: 1

Cab Entry Door Height Dimensions:

- Forward door opening 76" high
- Rear door opening 76" high

The roof will be a flat roof design with radius edges for an aesthetic, streamline appearance. The roof shall be constructed with the same material as the main structure and be internally reinforced using framing which shall span the entire width and length of the cab for maximum structural integrity. This shall allow the roof to support personnel and roof mounted equipment without the need for additional reinforcement. Approximate dimensions:

- Crew area floor to ceiling 53 1/2"
- Top of crew seat to ceiling 35" (depending upon seat type)

TREAD PLATE OVERLAY ON CAB ROOF

QTY: 1

A bright finish tread plate overlay shall be placed on the cab roof.

This overlay shall be placed on the raised roof section, or if a flat roof cab is being utilized, from the area of the “B” post area-rearward, and extending back to the end of the cab roof.

This tread plate overlay shall be sealed with caulking around the edges to prevent moisture from entering the area between the cab roof and the overlay.

CAB ROOF DRIP RAIL

QTY: 1

For enhanced protection from inclement weather, an integral drip rail shall be furnished on each side of the cab roof. The drip rail shall extend the full length of the cab roof.

CAST ANTI-SLIP ENTRY STEPS

QTY: 1

The front entrance steps shall be a minimum of 9" deep.

Each step shall be a cast aluminum, open grate style step fabricated by Cast Products Inc. with a polished aluminum outer surface.

The cab step risers shall be overlaid with.063" tread plate plate.

The rear entrance steps shall be a minimum of 9" deep.

Each step shall be a cast aluminum, open grate style step fabricated by Cast Products Inc. with a polished aluminum outer surface.

The cab step risers shall be overlaid with.063" tread plate plate.

BATTERY ACCESS DOORS

QTY: 1

The battery access door(s) shall be 1/8" tread plate, drop down doors with thumb latches at each side rear cab step well.

SCOTCHLITE INTERIOR OF DOOR PANELS

QTY: 1

Each interior cab door panel shall be equipped with reflective ScotchLite material that shall cover at least 96 in.

CAB DOORS

QTY: 1

Four (4) side-opening doors shall be provided. The cab doors shall be shortened to the floorboard level thus leaving an exposed step well area at each cab entrance. The cab doors shall be totally constructed of aluminum with an extruded aluminum frame and an aluminum outer door skin. The forward cab door opening shall be a minimum of 37" wide and the rear cab door opening shall be a minimum of 37" wide. The rearward cab doors shall have a radius cutout allowing the door opening to protrude forward over the cab wheel well, while providing full access to the rear crew area. There shall be a heavy duty, piano type, stainless steel hinge on each door of a minimum pin diameter of 3/8". Hinges shall be slotted for ease of horizontal and vertical adjustment. There shall be a cab door seal and the doors shall close flush with the side of the cab. A heavy duty 6" wide belting material shall be utilized to prevent the cab doors from opening greater than 90 degrees.

CAB DOOR INSULATION

QTY: 1

A 1/4" insulation panel shall be installed in each cab door. This insulation panel shall provide an additional acoustical barrier as well as help with heating/cooling properties of the apparatus.

HIDDEN WEATHER STRIP

QTY: 1

The cab doors shall be equipped with a weather strip seal track on the lower portion of the door. Bolt-on tracks shall be provided to allow for a snap-on replaceable weather stripping to be changed easily and shall be fastened in place with nutserts to ensure longevity.

CAB DOOR LATCHES

QTY: 1

Heavy-duty, bright finish cast paddle latches shall be provided on the interior and exterior of each cab door.

Door latch mechanisms which utilize spring steel clamps shall not be considered due to their tendency to both rust and break.

The interior door latch cables/rods are to be designed to reduce adjustment or possible wear at the adjustment turnbuckles.

KEY MODEL #751

QTY: 1

The specified door lock cylinder/s shall be equipped with #751 key/s.

DOOR LOCKS

QTY: 1

Each exterior cab door shall be equipped with keyed locks.

The cab doors shall be capable of being locked from the outside with a key and manually from the inside or with a momentary switch that shall either lock or unlock the doors.

A switch shall be provided on both the driver and officer side of the cab dash.

ELECTRIC WINDOWS

QTY: 1

Each side cab door shall have a tinted retractable window. The window track shall be designed into the door frame extrusion, which shall be extruded with a track groove to house a window track and seal. The window shall be capable of being removed from an access slot designed in the bottom of the door frame.

All side cab doors shall be equipped with electrically operated windows. Power window controls for all doors shall be provided on the driver's lower wing dash panel. The officer side power window control shall be on the officer's lower wing dash panel.

The control for each rear door shall be a rocker type, automotive style switch located on the inside door panel within easy reach.

CAB DOOR WINDOW SILL PROTECTION

QTY: 1

Brushed stainless steel protection caps shall be provided on each door interior window sill.

The caps shall be fabricated from 18-gauge brushed stainless steel and cover from the window edge down over the sill and meet the inner door panel top edge.

DOOR PANELS

QTY: 1

The cab door interior panels shall be covered with a brushed stainless steel panel, at full height.

The panel shall be 16 gauge stainless steel with a brushed finish and shall be designed to allow easy access to the inner door.

WINDSHIELD

QTY: 1

A two piece, symmetrical, safety glass windshield shall be provided on the cab for the driver and officer providing a clear viewing area.

The windshields shall be full width to the center of the front cab support for each side and provide the occupants with a panoramic view.

To provide enhanced peripheral vision on each side of the cab, the windshield and cab structure shall be designed with radius corners, which provide a minimum of 8" of glass area, measured from the glass face to the side edge near the door post.

The windshield shall consist of three (3) layers; the outer light, the middle safety laminate and the inner light.

The thick outer light layer shall provide superior chip resistance, the middle safety laminate layer shall prevent the windshield glass pieces from detaching in the event of breakage and the inner light shall provide yet another chip resistant layer.

The windshield will be a contour design with 3244 sq. in. of area for improved visibility and style.

The windshield glass shall be designed so it can be used on either the driver or officer side.

Single piece windshields that utilize epoxy or that are bonded to the cab structure shall not be acceptable.

WINDSHIELD WIPERS & WASHERS

QTY: 1

Dual, electric operated, pantographic type windshield wipers shall be provided.

One (1) electric drive motor shall be provided for each wiper.

Wipers shall have "HI/LO" and "INTERMITTENT" operating speeds. "HI/LO" speeds shall be controlled by a steering column control, within the turn signal control stem.

"INTERMITTENT" operation shall be controlled by a twist switch within the control on the steering column.

The wipers shall be of the self-parking type.

Windshield washers shall be electric operated wet-arm type with a 1/2 gallon washer fluid reservoir, mounted behind a hinged access door in the officer side front cab step well area. The fluid level shall be visible through a cutout in the access door. This door shall be secured with two thumb latches.

The washer control shall be integral with the intermittent wiper control switch.

There shall be individual removable panels on the front face of the cab for access to the wiper motor assemblies.

Windshield wipers shall survive testing in excess of 3 million cycles in accordance with section 6.2 of SAE J198 “Windshield Wiper Systems – Trucks, Buses and Multipurpose Vehicles”.

The bidder shall certify that the wiper system design has been “Third party tested” and that the wiper system has met this criteria.

SIDE VIEWING WINDOWS

QTY: 1

A fixed, tinted window with 620 sq. in of glass area shall be provided on each side of the cab behind the forward cab doors.

This window will be the same height as the window in the rear cab door for maximum visibility.

DARK TINT WINDOWS

QTY: 1

The windshield and the forward cab door glass shall be provided with standard DOT, green automotive tint.

If provided, the side cab windows to the rear of the front doors, the rear cab door windows, and any rear viewing windows shall be equipped with a dark, automotive tint.

CAB GRAB RAILS EXTERIOR

QTY: 1

1-1/4" diameter x 28" long, knurled bright anodized aluminum handrails shall be provided.

There will be one (1) at each cab door entrance.

Grab rail stanchions shall be chrome plated and offset when necessary to prevent "hand-pinching" when opening or closing the doors.

Formed rubber gaskets shall be provided between each stanchion base and the cab surface.

CAB GRAB HANDLES, INTERIOR

QTY: 1

Grab rails shall be provided to assist in entry and exiting of the cab. Each grab rail shall be a cast aluminum "D" style handle that shall have a black powder coat finish and shall be located in the following locations:

- One (1) 11" long, horizontally mounted on each front cab door on the interior door panel
- One (1) 11" long, horizontally mounted on each rear cab door on the interior door panel

INTERIOR "A" & "C" POST GRAB HANDLES-BLACK

QTY: 1

Three (3) 12" long, vertically mounted, one (1) on the driver's side cab interior on the “A” post and one (1) each side of the cab interior on the “C” post in the crew area.

FRONT CAB GRILLE

QTY: 1

A square mirror finished stainless steel grille shall be installed to allow for maximum air flow to the charge air cooler and the radiator. The top of the grille will have a flat area for the manufacturers emblem.

A four (4) inch wide solid band shall extend across the middle of the grill for lettering or lighting options.

SIDE CAB GRILLES

QTY: 1

Two (2) rectangle, mirror finished stainless steel air inlets/outlets shall be provided horizontally above the wheel well opening, one on each side of the cab.

The grilles shall be equipped with a mesh screen to serve as a secondary ember separator.

The design shall permit proper ducting of air through the engine compartment and cooling system.

This system shall be such that particles larger than .039 inches (1 mm) in diameter cannot reach the air filter element.

CAB EXTERIOR REAR WALL

QTY: 1

A bright finish tread plate overlay shall be provided over the entire exterior rear cab wall.

The tread plate overlay shall be sealed with caulking around the edges to prevent moisture from getting between the cab and the overlay.

CAB WHEEL WELL LINERS - ALUMINUM

QTY: 1

The front cab, wheel wells shall be equipped with fully removable bolt-in aluminum inner wheel well liners.

The liners shall extend full depth into the truck frame.

The completely washable wheel well liners shall be designed to protect the cab substructure, inner panels, and other miscellaneous installed components from road salts, debris, dirt accumulation and corrosion.

ALUMINUM CAB FENDERETTES

QTY: 1

The cab wheel well openings shall be trimmed with replaceable, bolt-in, polished aluminum fenderettes.

The fenderettes shall be secured to the cab with stainless steel, threaded fasteners along the internal perimeter of the wheel well.

Dissimilar metal tape and black vinyl trim molding shall be used where the cab and fender meet.

FRONT MUD FLAPS

QTY: 1

Heavy duty, black rubber type mud flaps shall be provided behind the front wheels.

CAB MIRRORS

QTY: 1

Two (2) Velvac V-MAX mirrors shall be furnished (kit 717435). Each mirror shall have a 98.7 sq. inch, flat glass viewing area and a 30 sq, inch, convex viewing area in a one piece, injection molded, chrome plated, ABS, plastic housing.

Each head will be electrically heated and motorized with controls on the driver's lower wing panel.

Mirror heads shall be installed on 17 long, pivoting, tubular, aluminum arms that are installed in model 2030 bus style brackets with one on each side of the front corner cab radius. The arms and heads shall be adjustable for optimum viewing. Each mirror shall have an arrow type turn signal indicator in the outboard area of the flat, glass head. These indicators shall work in conjunction with the turn signals. Each mirror shall also include a LEM camera for side visibility that is compatible with the on board camera system. This camera shall have CMOS technology to prevent smear or blooming so visibility is maintained under sunlight, glare, and bright headlight conditions.

MIRROR CONTROL

QTY: 1

In addition to the switches on the driver's lower wing panel, the mirror position and heat (if applicable) controls shall be programmed into the multiplex control screen.

DOOR WIDTH, X-MFD, LFD & X-LFD - 100" SS

QTY: 1

Cab Entry Door Width Dimensions:

- Forward door opening 37" wide
- Rear door opening 37" wide

Cab Entry Step Dimensions:

- Forward door recessed step 29 3/4" wide x 8-1/2" deep
- Rear door recessed step 25 3/4" wide x 8-1/2" deep

INTERIOR TRIM- GRAY VINYL

QTY: 1

The cab interior shall be constructed to create an ergonomically designed interior to be user friendly and functional for the driver and officer.

The forward overhead panel shall be a fabricated module, which shall have six (6), 3" diameter, adjustable, windshield defroster/heat vents and four (4) comfort vents.

All interior upholstery panels shall be gray in color.

The upholstered cab overhead and side wall portions shall utilize vinyl upholstery with padding underneath to provide additional insulation.

INTERIOR CAB WALL GRAY VINYL

QTY: 1

The interior rear wall of the cab shall be covered with gray vinyl for durability and shall match the other upholstered areas of the cab.

CAB FLOORING

QTY: 1

The floor of the driver's compartment and the floor of the crew area shall be lined with Baryfol vinyl composite flooring to comply with NFPA noise and heat requirements.

ACOUSTICAL INSULATION

QTY: 1

One (1) inch thick acoustical insulation shall be provided on the cab roof, rear and side walls of the cab.

This material shall be fitted between the cab structural members and secured with adhesive to provide an insulation barrier for noise and heat.

ENGINE ENCLOSURE ACCESS

QTY: 1

A composite, hinged access door shall be provided in the top rearward portion of the engine enclosure. The door shall allow access to the engine oil, transmission fluid, power steering fluid level dipsticks. The access door shall be provided with a flush mounted latch. The underside of the access door shall be insulated.

HD SOUNDPROOFING/ INSULATION PACKAGE UNDER ENGINE

QTY: 1

The underside of the engine enclosure shall be overlaid with Milcut, MilShield insulation. MilShield can withstand temperatures up to 1300°F. To ensure a clean, smooth surface, this material shall have a heavy aluminum foil covering and shall be retained by aluminum panels fastened to the cab structure as needed. Any gaps in this insulation barrier shall be sealed with 3M #425 aluminized high temperature tape.

HD SOUNDPROOFING/INSULATION BETWEEN UPHOLSTERY

QTY: 1

To further reduce the noise and heat levels inside the cab, 1/4" foam upholstery material shall be installed on all interior surfaces of the engine enclosure, below the upholstery material.

ENGINE ENCLOSURE OVERLAY MATERIAL

QTY: 1

The forward portion of the engine enclosure shall be covered with vinyl material formed overlay to match the balance of the cab interior. To allow maximum "elbow room" for the driver and officer, the forward portion of the engine enclosure shall feature a contour shape. The engine enclosure shall not significantly obstruct the driver's vision in any direction. The enclosure shall be an integral part of the cab structure, which shall be constructed from material providing adequate strength to support radio, map boxes, etc. The engine enclosure shall be insulated to protect from heat and sound. The noise insulation shall keep the DBA level within the limits stated in the current NFPA series 1901 pamphlet.

BRUSHED S/S SCUFF PLATES DS

QTY: 1

A brushed stainless steel scuff plate shall be provided on the vertical surface of the driver side engine enclosure.

The scuff plates shall extend a minimum of 6" above the floor.

BRUSHED S/S SCUFF PLATES OS

QTY: 1

A brushed stainless steel scuff plate shall be provided on the vertical surface of the officer side engine enclosure.

The scuff plates shall extend a minimum of 6" above the floor.

BRUSHED S/S SCUFF PLATES REAR

QTY: 1

A brushed stainless steel scuff plate shall be provided on the vertical surface of the rear engine enclosure.

The scuff plates shall extend a minimum of 6" above the floor.

SUN VISORS

QTY: 1

To provide maximum protection for the driver and officer, two (2) padded vinyl sun visors shall be mounted in the cab overhead on each side.

OVERHEAD PANEL, FABRICATED CENTER THREE WING PANEL

QTY: 1

An overhead console with a center three piece removeable panel assembly shall be provided on the cab roof between the driver and officer to permit installation of the multiplex smaller sized control screens and other components as space allows.

The overhead console shall be painted to match the interior of the cab.

The overhead console shall not obstruct the driver's vision through the officer's side window.

SEAT AND SEAT BELT ANCHOR TESTING

QTY: 1

Each seat belt anchor shall be tested to withstand 3,000lbs of pull on both the lap and shoulder belt in accordance with FMVSS 210 section 4.2.

Each seat mounting position shall be tested to withstand 20G's of force in accordance with FMVSS 207 section 4.2(c).

Both tests shall be performed and verified at a third party testing and evaluation center.

STORAGE COMPARTMENTS UNDER FRONT SEATS

QTY: 1

There shall be a compartment provided under each front seat.

Each compartment shall be accessible from the front of the seat riser when the door is opened.

DRIVERS SEAT, VALOR AIR SUSPENSION, ABTS

QTY: 1

The driver's seat shall be a Valor, air suspension, race back bucket ABTS LH seat.

The seat shall have a contoured and padded seat cushion with adjustable lumbar support.

The seat shall have a horizontal, slide adjustment and a vertical height adjustment with an adjustable back recline.

The seat air suspension shall be pneumatically controlled from a switch on the forward, lower edge of the seat.

The seat shall be equipped with a red, integrated, 3-point shoulder harness with a lap belt, and a dual retractor belt configuration.

It should have ready reach built into the seat assembly.

OFFICERS SEAT, VALOR - AIR SUSPENSION, ABTS

QTY: 1

The officer's seat shall be a Valor air suspension, ABTS RH, bucket seat.

The seat shall have a contoured and padded seat cushion with adjustable lumbar support.

The seat shall have a horizontal slide adjustment and a vertical height adjustment with adjustable back recline.

The seat air suspension shall be pneumatically controlled from a switch on the forward, lower edge of the seat.

The seat shall be equipped with a red, integrated, 3-point shoulder harness with lap belt, and a dual retractor belt configuration with ready reach built into the seat assembly.

VALOR BUCKET, ABTS, FWD FACING, OUTBOARD, DS

QTY: 1

The driver's side outboard forward facing crew seat shall be a Valor ABTS LH fixed base bucket seat.

The seat shall have a contoured and padded seat cushion.

The seat shall be equipped with a red, integrated, 3-point shoulder harness with lap belt and a dual retractor belt configuration with ready reach built into the seat assembly.

FORWARD FACING SEAT, OUTBOARD, DS

QTY: 1

The driver's side outboard, forward facing, crew seat shall have a flip-up style seat.

VALOR BUCKET ABTS - FORWARD FACING, OUTBOARD, OS

QTY: 1

The officer's side outboard, forward facing, crew seat shall be a Valor ABTS RH fixed base bucket seat.

The seat shall have a contoured and padded seat cushion.

The seat shall be equipped with a red, integrated, 3-point shoulder harness with lap belt and a dual retractor belt configuration with ready reach built into the seat assembly.

FORWARD FACING SEAT, OUTBOARD, OS

QTY: 1

The officer's side outboard forward facing crew seat shall have a flip-up style seat.

VALOR CUSTOM EMBROIDERED EMBLEM ON SEATS

QTY: 1

The seats shall be equipped with a custom embroidered logo, matching the fire department's requirements.

SEAT ADJUSTMENT NOTICE

QTY: 1

If equipped, adjustable seats may be limited by outside factors such as optional installed equipment (ie. ems compartments, battery chargers, SCBA cylinder brackets) and seat placement.

VALOR SEATING MATERIAL - BLACK CORDURA

QTY: 1

The seats shall be upholstered with Black Cordura material with black stitching as provided by Valor.

VEHICLE DATA RECORDER

QTY: 1

A Class 1 Vehicle Data Recorder (VDR) system shall be provided.

The system shall include an NFPA compliant, "Black Box" with reporting software that shall be capable of data storage to coincide with the NFPA requirements.

Data storage capabilities shall include interfaces with the following systems:

- Display module (Master Optical Warning Device)
- VDR, date time stamp
- Max Vehicle speed (MPH)
- Vehicle acceleration / deceleration (MPH/Sec.)
- Engine Speed (RPM)
- ABS event
- Data password protected
- Data sampled once per second, in 48-hour loop
- Data sampled min by min for 100 engine hours
- Throttle position (% of Throttle)
- Data software
- PC / Mac Compatible
- Data summary reports

The VDR data shall be downloadable by USB cable to a computer using either Microsoft or Apple operating systems.

SEAT BELT WARNING SYSTEM

QTY: 1

The apparatus shall be equipped with a Class 1, seat belt warning system.

The system shall consist of a seat belt module and shall display the seating positions through the main, UltraView screen.

FIVE (5) SEATING POSITIONS

QTY: 1

Seat belt and seat cushion sensors shall be provided on the five (5) specified seating positions.

DELETE - 4FRONT - FRONTAL AIR BAG SYSTEM

QTY: 1

EXTERNAL CAB EMS COMPARTMENT, DS

QTY: 1

An externally accessible storage compartment shall be mounted in the cab.

The compartment shall be approximately 23 7/8" deep x 24 1/4 " high x 23 7/8" wide.

The door opening shall be approximately 20" high x 20" wide.

The compartment shall be constructed of aluminum and painted to match the interior color of the cab.

Lastly, it shall be equipped with a hinged flush mount door hinged at the front of the compartment with a painted finish.

The door shall be held in the open position by a gas shock, stay arm.

JOB COLOR COMPT DS INTERIOR W/SPATTER PAINT

QTY: 1

The interior of the compartments shall be a finish painted, job color with a scuff resistant, webbing type paint of a contrasting color applied over the painted surfaces.

LIGHTING

QTY: 1

The EMS compartment shall be equipped with A Amdor LED interior light(s).

The lighting shall be wired to automatically activate when the compartment door is open and the master battery switch is in the "on" position.

EXTERNAL CAB EMS COMPARTMENT, OS

QTY: 1

An externally accessible storage compartment shall be mounted in the cab.

The compartment shall be approximately 23 7/8" deep x 24 1/4 " high x 23 7/8" wide.

The door opening shall be approximately 20" high x 20" wide.

The compartment shall be constructed of aluminum and painted to match the interior color of the cab.

Lastly, it shall be equipped with a hinged flush mount door hinged at the front of the compartment with a painted finish.

The door shall be held in the open position by a gas shock stay arm.

JOB COLOR COMPT OSINTERIOR W/SPATTER PAINT

QTY: 1

The interior of the compartments shall be finish, painted, job color with a scuff resistant, webbing type paint of a contrasting color applied over the painted surfaces.

LIGHTING

QTY: 1

The EMS compartment shall be equipped with A Amdor LED interior light(s).

The lighting shall be wired to automatically activate when the compartment door is open and the master battery switch is in the "on" position.

CAB EMS COMPARTMENT

QTY: 1

A storage compartment shall be mounted against the rear wall of the cab crew area. The compartment shall be approximately 18" deep x 53" high (depending on roof height) x 36" wide. The door opening shall be approximately 49" high x 32" wide.

The compartment shall be constructed of smooth aluminum and shall be equipped with a roll-up door. The compartment shall be painted with textured paint, matching the interior color of the cab.

ADJUSTABLE SHELVE(S)

QTY: 2

A adjustable shelf shall be provided in the EMS compartment. The shelf shall be constructed from 3/16" brush aluminum mounted to uni-strut tracking material.

LIGHTING

QTY: 2

The EMS compartment shall be equipped with the noted quantity Amdor LED interior light(s). The lighting shall be wired to automatically activate when the compartment door is open and the master battery switch is in the "on" position.

KEYED LOCK FOR EMS COMPARTMENT

QTY: 1

The EMS compartment door shall be equipped with a keyed lock.

KEYED LOCK FOR EMS COMPARTMENT

QTY: 1

The EMS compartment door shall be equipped with a keyed lock.

ENGINE ENCLOSURE STORAGE MODULE

QTY: 1

A storage module shall be installed on the center doghouse area between the driver and officer.

The module shall be constructed of 1/8" aluminum and the finish shall match the cab interior finish.

The module shall include two (2) cup holders, a pen tray, a flat open storage area for notebooks, six (6) divided storage area's for 3-ring binders, and four (4) slide in storage area's two (2) accessible from each side of the cab.

COMPUTER TERMINAL IN FRONT OF OFFICER

QTY: 1

There shall be a flat working surface area in front of the officer.

HEATER/DEFROSTER & ACCESSORIES

QTY: 1

A climate-control system shall be provided for total cab environmental comfort as well as provide heat, cooling and defrost capabilities to various areas in the cab.
The system shall consist of a single evaporator unit, mounted in the center overhead of the cab.

The ceiling mounted external evaporator/heater unit shall include the following:

- Heavy-duty, high output blower.
- High efficiency coil that includes "rifled" tubing and oversized header tubes for maximum refrigerant distribution.
- Four (4) 2" diameter, adjustable louvers; two (2) each side of the cab overhead, facing the driver and officer seat positions.
- Six (6) larger louvers evenly spaced, forward of the overhead assembly, facing the windshield.
- Multi-vent defroster louvers positioned above the windshield will provide adequate airflow for windshield defrost.
- Four (4) lower vents shall be provided, one (1) below the driver and officer seat positions and one (1) under each outboard rear facing crew seat.
- Twelve (12) vents shall be provided on the HVAC unit for crew comfort.
- Damper controls shall be pneumatically operated to provide air discharge to the windshield, front overhead air discharge louvers as required.
- An adjustable electric water valve to control the amount of heat.

- Housing shall be fully insulated and enclosed.
- BTU: 63,200 A/C
- BTU: 78,000 Heat
- CFM: 680 Heat as mounted in the cab
- CFM: 680 A/C as mounted in the cab

The ceiling mounted evaporator unit/s shall be designed with an ergonomically designed cover to provide maximum headroom and a pleasing appearance with a crinkle coat texture and include a deep well condensate collection pan, which shall be drained by a gravity system into the rear corners of the engine compartment utilizing stainless steel drain poles.

Evaporator units shall be mounted on the cab roof, enclosed by aluminum panels painted white. The evaporator louvers and controls shall penetrate the cab roof into occupant compartments to the least extent practicable. Evaporator units shall be mounted on the cab ceiling, enclosed by a black painted aluminum cover.

A serviceable foam intake filter shall be installed on the rear of the evaporator.

All defrost/heating systems will be plumbed with one (1) seasonal shut-off valve mounted in the officer side wheel well area.

A 12-volt roof top dual condenser shall be mounted on the cab roof. The condenser shall be designed with high performance, long life fan assemblies with sealed housings and shaft. The condenser and coil design shall include rifled tubing for maximum efficiency. Each coil shall be painted black. The condenser unit must include a receiver drier with a high and low pressure switch. The wire harness shall include necessary wiring for the clutch circuit as well as a separate power relay circuit.

Mounting design shall enable easy servicing of all components and unit replacement if necessary.

The system shall utilize one (1) Valeo TM-31 HD engine mounted compressor driven by a Poly “V” serpentine belt installed in accordance with the manufacturer's requirements. The system shall use R134a refrigerant. The air conditioner lines shall be EATON GH001 EverCool SAE J2064 Type E hose secured using EATON E-Z Clip system components.

Air conditioning hoses shall be #10 hose for discharge and #12 hose for suction with steel hose and end fittings provided at the compressor. The heater hose installation shall not incorporate a copper tube manifold.
The air conditioning system shall be configured to only operate when the vehicle's engine is running. The blowers, in both evaporators, shall be in operation whenever the air conditioning system is activated.

Heater-defroster shall have a three-speed electric fan with illuminated controls. The controls system shall actuate the air-distribution system with air cylinders, which are to be separated from the air brake system by an 85-90 psi pressure protection valve.

The 12-volt system for the air conditioners shall have first priority to be load managed.

The heater/defroster unit shall clear the windshield in half-the-time required by SAE standards.

PAINT ROOF MOUNTED CONDENSOR

QTY: 1

The roof mounted, air conditioning, condenser housing(s) shall be painted to match the cab roof color.

TREAD PLATE OVERLAY ON ROOF MOUNTED CONDENSOR

QTY: 1

The roof mounted air conditioning condenser housing shall have a tread plate overlay on the top of the unit.

HVAC CONTROLS

QTY: 1

HVAC controls shall be provided on the driver's overhead wing panel, consisting of a mode selector control, front fan speed, rear fan speed, air conditioning on/off and temperature range selection.

The controls shall be clearly labeled, adequately backlit.

The multiplex system control screen shall also contain all controls for the cab HVAC control system.

ACTIVE AIR PURIFICATION SYSTEM

QTY: 1

An Active Air Purification system shall be provided. The system utilizes RGF's Photohydroionization® Cell (PHI-Cell®) technology which produces hydro-peroxides, and hydroxide ions. The resulting Advanced Oxidation Process reduces airborne mold, bacteria, viruses and odors up to 99%.
The unit shall have a stainless steel housing and contain a fan to move air across the PHI cell and out of the housing.
The system shall be wired to the vehicle 12 volt system. The unit shall be powered on either when the shore power is connected or the apparatus ignition power is switched on. The air purification system shall be installed in the crew area as specified.

CAB TILT SYSTEM

QTY: 1

A hydraulic cab lift system shall be provided, consisting of an electric-powered hydraulic pump, fluid reservoir, dual lift cylinders, remote cab lift controls and all necessary hoses and valves.

The cab tilt mechanism shall be custom designed for ease of maintenance and consist of two (2) hydraulic cylinders connect to the cab and the frame assembly.

Hydraulic lines shall be rated at 20,000 PSI burst pressure.

The hydraulic cylinders shall be equipped with a velocity fuse that protects the cab from accidentally descending when the cab is in the tilt position.

Hydraulic cylinders shall be detachable to allow removal of the engine for major service.

A remote cable operated mechanical cylinder stay bar and release shall be provided to insure a positive lock in the tilted position.

The two (2) rear cab latches shall be of the hydraulic pressure release, automatic re-latching type and provide an automatic positive lock when the cab is lowered.

The tilt pump shall be electric over hydraulic type, with a pressure rating of not less than 4,000 PSI. Additionally, the cab tilt device shall be both electrically and hydraulically interlocked to prevent inadvertent activation of the cab tilt system.

- A "CAB NOT LATCHED" indicator shall be provided in the cab dash-warning cluster.
- A dual switch control system shall be provided for the cab tilt, located on the passenger side of the vehicle or on the optional tether control. System shall consist of two (2) position toggle switch along with a rubber covered push button momentary switch, which must be activated for the cab to raise or lower.

MANUAL CAB TILT

QTY: 1

An auxiliary, manual cab, lift backup system shall be furnished inside the passenger side of the pump enclosure or front compartment for use in the event of total electrical shutdown.

The removable handle shall be provided as loose equipment.

SECONDARY SAFETY LOCK

QTY: 1

A secondary, swing down, safety bar shall be applied to the driver side cab tilt cylinder with a manual lock to engage the lock, as required for extended service operations.

PARKING BRAKE/CAB TILT INTERLOCK

QTY: 1

The cab tilt control shall be equipped with an interlock.

This shall disable the cab tilt system in the event the parking brake is not applied.

FRAME ASSEMBLY

QTY: 1

The chassis frame shall be assembled in its entirety at the manufacturer's facility. This will prevent any split responsibility in warranty or service.

The frame shall consist of two (2) channels, fastened together by cross members. All structural fasteners used in the frame shall be Grade 8 hardware. Hardened steel washers shall be used under all bolt heads and nuts to avoid stress concentrations. Top flange shall be free of bolt heads. All spring hangers shall be machined, steel castings. Frame assemblies that are welded or assembled with Huck type fasteners are not acceptable.

Each main frame rail shall be 10-1/4" x 4" x 3/8", fabricated from Domex 110,000 PSI minimum yield steel, with a minimum section modulus of 18.396 cu in. and a resisting bending moment (RBM) of 2,023,560 inch pounds. Frames are built for the specific apparatus under construction so that no unnecessary holes or modifications are made to the frame assembly.

The chassis frame assembly, consisting of frame rails, cross members, axles, and steering gear(s), shall be finish painted before installation of any electrical wiring, fuel system components, or air system components. All components or brackets fastened to the frame rails shall be cleaned, primed, and painted prior to being attached to the frame rails.

FRONT BUMPER

QTY: 1

A 12" high, 101" wide, two (2) ribbed, bright finish, stainless steel, front bumper shall be provided.

The bumper shall be a wrapped design to match the contour of the front cab sheet.

FRONT BUMPER EXTENSION

QTY: 1

The bumper shall be extended 7" with a polished aluminum, tread plate, gravel shield enclosing the top and ends.

TOW EYES

QTY: 1

Two (2) painted steel tow eyes shall be fastened directly to the bumper support structure that extends below the bumper.

The tow eyes shall be fastened with grade 8 bolts and nuts.

FRONT AXLE

QTY: 1

The Steertek NXT front axle beam shall be rated to carry 22,000 lbs. and consist of a fabricated box cross section construction with 100ksi plate and a continuous beam architecture to minimize stress points for added durability.

The axle shall incorporate a removable kingpin feature for ease of kingpin serviceability. The knuckles shall allow for compatibility with disc brakes mounted at the 12 o'clock position and with drum brakes, and allow for wheel cut up to 45 degrees. They shall also utilize premium kingpin bushings and seals to provide enhanced protection from the elements to improve bushing life. Oil seals with viewing window shall be provided.

The suspension shall consist of multi-leaf parabolic springs rated at 22,000 lbs with double wrapped front eye that are packaged within an integrated clamp group that allows for ease of OEM assembly on to the axle beam and reduced part count. The clamp group bolts are tightened on the top of the clamp group opposed to the traditional U-bolt on the bottom making it easier to access with a torque wrench for servicing. The spring shall also include a lower shock attachment with an upturned eye. The springs will contain threaded pin bushings to allow simplification of spring alignment as well as long service life and improved ride quality. The suspension and spring geometry will be optimized to provide improved bump steer and Ackermann. Two ZF Sachs twin-tube shocks shall be provided with the front suspension assembly. The shocks shall be specially developed for parabolic leaf springs with a digressive characteristic curve using a patented piston system. The shocks shall feature multi-stage piston and base valves. The combination of valves shall achieve the desired damping characteristics that are ideal for the application.

Meritor EX-225 H, 17" disc brakes shall be provided for the front axle.

The front brakes shall be full air actuated with automatic, slack adjustment.

STEERING SYSTEM

QTY: 1

A dual power steering system shall be provided utilizing a Sheppard model #M110 main steering gear on the driver side of the chassis and a Sheppard model #M90 steering gear on the officer side of the chassis.

The power steering gear on the officer side of the chassis shall increase performance in turning the officer side wheel assembly, reducing loads and forces on the main gear and components.

The steering system shall be designed to maximize the turning capabilities of the front axle no matter the rating and tire size.

The use of a power assist cylinder on the officer side of the chassis is NOT ACCEPTABLE on front axles of this capacity.

The system shall be designed utilizing an engine driven hydraulic pump, with a maximum operating pressure of 2000 PSI.

Steering system components shall be mounted in accordance with the steering gear manufacturer's instructions.

STEERING COLUMN

QTY: 1

The steering column shall be a “Douglas Autotech” tilt and telescope column.

A lever mounted on the side of the column shall control the tilt and telescope features.

The steering shaft from the column to the miter box shall have a rubber boot to cover the shaft slip and a second rubber boot to seal the passage hole in the floor.

There shall be a ergonomically designed, self-canceling lever, that shall control the following functions:

- Left and right turn signals
- High beam activation
- Two speed with intermittent windshield wiper control
- Windshield washer control

18" STEERING WHEEL

QTY: 1

The steering wheel shall be a four (4) spoke, vinyl padded, minimum 18" diameter, with a center hub mounted horn button.

REAR AXLE

QTY: 1

Rear axle shall be a single, Meritor RS-30-185 with a capacity of 31,000 lbs.

(Minimum). Axle shall be a single reduction axle with hypoid gearing and oil-lubricated wheel bearings.

Oil seals shall be provided as standard equipment.

REAR BRAKES

QTY: 1

Brakes shall be "S" Cam, 16-1/2" x 8 5/8" size, and shall be full air actuated with automatic, slack adjusters.

VEHICLE TOP SPEED NFPA STATEMENT

QTY: 1

The rear axle/s (will/shall) be geared for a vehicle top speed in accordance with NFPA sections 4.15.2 and 4.15.3.

Units with GVWR over 26,000 pounds (will/shall) be limited to 68 mph. If the combined tank capacity is over 1250 gallons of foam and water or the GVWR is over 50,000 pounds, the vehicle top speed (will/shall) be limited to 60 mph or the fire service rating of the tires, whichever is lower.

REAR SUSPENSION

QTY: 1

The drive axle, air-ride suspension shall be a heavy-duty, severe fire service rated, 31,000 lb. capacity Neway model AD-130 with heavy-duty, air springs and heaviest duty, available hardware and urethane bushings.

Dual air leveling valves shall be provided for side to side leveling of air suspension.

The suspension shall be self-leveling from front to back and side to side and shall have restricted inlet and outlet ports to control sudden air loss.

The suspension shall be provided with quick-change type air bags and spring loaded snubbers.

The Neway rear suspension warranty will be three (3) years.

FRONT WHEELS

QTY: 1

The front wheels shall be 22.5" x 12.25" ten stud, hub piloted, polished aluminum disc type.

FRONT TIRES

QTY: 1

The front tires shall be Goodyear 425/65R22.5, "20 Ply", tubeless, radial Armor Max MSA, on/off road tread.

The tires shall be fire service rated up to 22,800 lbs and shall have a top speed of 68 mph when inflated to 120 psi.

REAR WHEELS

QTY: 1

The single rear axle wheels shall be 22.5" x 9" ten stud, hub piloted polished aluminum disc type.

REAR TIRES

QTY: 1

The rear tires shall be Goodyear 315/80R22.5, "20 Ply", tubeless, radial, G751-MSA, highway tread.

The tires shall be fire service rated up to 35,400 lbs and shall have a top speed of 68 mph when inflated to 130 psi.

TIRE PRESSURE MONITORING

QTY: 1

Each tire shall be equipped with an LED tire alert pressure management system (Vecsafe equal) that shall monitor tire pressure. A chrome plated brass sensor shall be provided on the valve stem of each tire.

The sensor shall calibrate to the tire pressure when installed on the valve stem for pressures between 20 and 120 psi.

The sensor shall activate an integral battery operated LED when the pressure of that tire drops 8 psi.

AIR BRAKE SYSTEM

QTY: 1

A dual circuit, air operated braking system, meeting the design and performance requirements of FMVSS -121 and the operating test requirements of NFPA 1901 current edition shall be installed.

The air system shall provide a rapid air build-up feature and low-pressure protection valve with light and buzzer, designed to meet the requirements of NFPA 1901, current edition.

ABS SYSTEM

QTY: 1

An Anti-Skid Braking System (ABS) shall be provided to improve braking control and reduce stopping distance. This braking system shall be fitted to all of the axles. All electrical connections shall be environmentally sealed, water, weatherproof, and vibration resistant.

The system shall constantly monitor wheel behavior during braking. Sensors on each wheel shall transmit wheel speed data to an electronic processor which shall sense approaching wheel lock causing instant brake pressure modulation up to 5 times per second in order to prevent wheel lockup. Each wheel shall be individually controlled.

To improve service trouble shooting, provisions in the system for an optional diagnostic tester shall be provided. The system shall test itself each time the vehicle is started. A dash-mounted light shall go out once the vehicle has attained 4 mph after successful ABS start-up. A warning light shall signal malfunction to the operator. The system shall consist of a wheel mounted toothed ring, sensor, sensor clip, electronic control unit and solenoid control valve. The sensor clip shall hold the sensor in close proximity to the toothed ring.

The system shall also control application of the auxiliary engine exhaust or drive line brakes to prevent wheel lock.

AIR RESERVOIRS

QTY: 1

There shall be a minimum of three (3) air reservoirs installed in conformance with best automotive practices.

An additional 800 cu. in. air reservoir shall be provided for an air manifold.

Reservoir capacity total shall be a minimum of 5500 cubic inches.

A pressure protection valve shall be installed to prevent the use of air horns or other air operated devices should the air system pressure drop below 80 psi (552 kPa).

The air reservoirs shall be color coded to match the air lines for easy identification, maintenance, and troubleshooting.

The reservoirs shall be painted the following colors:

- Wet Tank Black
- Primary Tank Green
- Secondary Tank Blue
- Auxiliary Tank(s) Yellow.

1/4 TURN DRAIN VALVES SIDE OF BODY

QTY: 1

For ease of daily maintenance, each air system reservoir shall be equipped with a brass 1/4 turn drain valve.

The brass, quarter turn, air tank drains shall be remotely mounted to the side of the body on a labeled panel just forward of rear wheel for ease of maintenance.

HEATED AIR DRYER

QTY: 1

A Bendix AD-IS heated air dryer system shall be furnished. The function of the AD-IS dryer reservoir module (DRM) is to provide an integrated vehicle air dryer, secondary reservoir, purge reservoir, governor, and a number of the charging valve components in a module. The DRM dryer module includes an integrated solution air dryer (AD-IS), a reservoir including a separate purge reservoir section, a governor, and four pressure protection valves which have been designed as an integrated, air supply system.

The function of the AD-IS air dryer is to collect and remove air system contaminants in solid, liquid and vapor form before they enter the brake system. It provides clean, dry air to the components of the brake system which increases the life of the system and reduces maintenance costs. Daily, manual, draining of

the reservoirs is eliminated. The function of the pressure protection valves is to both control the order in which the components receive air from the AD-IS air dryer, as well as to protect each reservoir from a pressure loss in the other reservoir or a pressure loss in an air accessory.

An automatic, moisture ejector on the primary or wet tank shall also be furnished.

REINFORCED BRAIDED AIR BRAKE HOSE

QTY: 1

All airlines in the chassis shall be Aeroquip FC350 Series polyester and wire braided reinforced air brake hose with reusable steel fittings adequately protected from chafing.

All of the airlines ends will be color coded to correspond with an air system schematic and shall be adequately protected from heat and chafing and will be clamped in a neat workman-like manner.

WABCO AIR COMPRESSOR

QTY: 1

Air compressor shall be a Wabco brand, with a minimum of 18.7 cubic feet per minute capacity on L9 X15 models and 25.9 cubic feet per minute on X12 models.

Air brake system shall be the quick build up type.

The air compressor discharge line shall be stainless steel braid reinforced Teflon hose.

The chassis air system shall meet NFPA 1901, latest edition for rapid air pressure build-up within sixty (60) seconds from a completely discharged air system.

This system shall provide sufficient air pressure so that the apparatus has no brake drag and is able to stop under the intended operating conditions following the sixty (60) seconds build-up time.

BRAKE TREADLE VALVE

QTY: 1

A Bendix dual brake treadle valve shall be mounted on the floor in front of the driver.

The brake control shall be positioned to provide unobstructed access and comfort for the driver.

PARKING BRAKE CONTROL

QTY: 1

Parking brake shall be of the spring-actuated type, mounted on the rear axle brake chambers.

The parking brake control shall be mounted on the driver lower wing panel.

A red, indicator light shall be provided in the driver dash panel that shall illuminate when the parking brake is applied.

ENGINE

QTY: 1

Engine shall be a Cummins, Model X15 605, diesel, turbo-charged, per the following specifications:

- Max. Horsepower 605 HP @ 1600 RPM
- Governed Speed 2100 RPM
- Peak Torque 1850 lb. ft. @ 1150 RPM
- Cylinders Six (6)
- Operating Cycles Four (4)
- Bore Stroke 5.39 x 6.65 in.
- Displacement 912 cu. in.
- Compression Ratio 17.2:1

- Governor Type Limiting Speed

Engine oil filters shall be engine manufacturers branded or approved equal.

Engine oil filters shall be accessible for ease of service and replacement.

ENGINE IQA CERTIFICATION - X15

QTY: 1

The Cummins X15 engine shall be certified by Cummins Power Systems for installation in the manufacturers custom chassis.

SECONDARY BRAKING

QTY: 1

An engine compression brake shall be furnished for increased braking capabilities.

Controls shall be as provided by the engine manufacturer and shall be activated by releasing the throttle pedal to the idle position.

The engine compression brake shall have dash mounted control switches to turn the brake on or off as well as to control the operational level of the brake.

The engine brake shall be wired in such a manner so as to illuminate the chassis brake lights when the engine brake is engaged and operating.

The engine brake shall be interlocked with the PTO operation and shall automatically disengage any time the apparatus is operating with the PTO active.

ENGINE AIR CLEANER

QTY: 1

An engine air cleaner shall be provided. The air cleaner shall include a dry type element and shall be installed in accordance with the engine manufacturer's recommendations.

The air cleaner shall be located to the rear of the engine, with streamline air pipes and hump hose connections from the inlet to the air cleaner and from the air cleaner to the turbo.

The air cleaner shall be easily accessible when the cab is tilted.

The air cleaner shall be plumbed to the air intake system that shall include a self sealing connection between the cab and air cleaner assembly to allow the cab to be tilted.

To draw fresh clean air, the intake for the air cleaner shall be on the side of the cab on the driver's side.

The inlet shall be a minimum of 41" above the ground to allow the vehicle to navigate through water without any part of the air intake system being below the frame rail, preventing any type of water intake. There will be no exceptions.

EMBER SEPARATOR

QTY: 1

An ember separator shall be installed in the chassis air intake system.

The ember separator housing must be easily accessible when the cab is tilted.

ACCELERATOR PEDAL - FLOOR MOUNT

QTY: 1

A floor mount accelerator pedal shall be installed on the floor in front of the driver.

The pedal shall be positioned for comfort with ample space for fire boots and adequate clearance from the brake pedal control.

REMOTE THROTTLE & INTERLOCK HARNESS

QTY: 1

An apparatus interface wiring harness for the engine shall be supplied with the chassis. If applicable, separate circuits shall be included for pump controls, “Pump Engaged” and “OK to Pump” indicator lights, open compartment ground, start signal, park brake ground, ignition signal, master power, customer ignition, air horn solenoid switch, high idle switch and high idle indication light.

The engine ECM (Electronic Control Module) discreet wire remote throttle circuit shall be turned off for use with a J1939 based pump controller or when the discreet wire remote throttle controls are not required.

COOLING SYSTEM

QTY: 1

The radiator and the complete cooling system shall meet or exceed NFPA and engine manufacturer cooling system standards.

To provide maximum corrosion resistance and cooling performance, the entire radiator core shall be constructed using long life aluminum alloy.

The core shall be made of aluminum fins, having a serpentine design, brazed to aluminum tubes.

The tubes shall be brazed to aluminum headers.

No solder joints or leaded material of any kind shall be acceptable in the core assembly.

The radiator core shall have a height of 35.92" x a width of 37.62".
