Violations

Violation Date: 09/25/2015
Violation Program: APSA
Citation: HSC 6.67 25270.6(a)(2) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.6(a)(2)
Violation Source: CERS
Violation Division: Los Angeles County Fire Department

Violation Notes:

Returned to compliance on 11/03/2015. OBSERVATION: Failure to submit a Tank Facility Statement or Business Plan. CORRECTIVE ACTION: Submit a Tank Facility Statement or Business Plan.

Violation Description:

Failure to submit a Tank Facility Statement or Business Plan.

Violations

Violation Date: 09/25/2015 ***Violation Source:*** CERS
Violation Program: HW ***Violation Division:*** Los Angeles County Fire Department
Citation: HSC 6.5 Multiple Sections - California Health and Safety Code, Chapter 6.5, Section(s) Multiple Sections
Violation Notes:

Returned to compliance on 11/03/2015. OBSERVATION: Bulk storage containers with secondary containment are not being emptied out daily and are being used for storage purpose and not for accidental discharge. Observed 2 x 55 gallon drum of used oil on secondary containment pallet filled up approximately half way.

Violation Description:

Haz Waste Generator Program - Operations/Maintenance - General

Violations

Violation Date: 09/25/2015 ***Violation Source:*** CERS
Violation Program: HMRRP ***Violation Division:*** Los Angeles County Fire Department
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Notes:

Returned to compliance on 09/26/2016. OBSERVATION: The facility has not submitted the Hazardous Materials Inventory Chemical Description page for: 1 x 500 gallon of ATF 3 x 25 gallon of part washer solvent to the CUPA. CORRECTIVE ACTION: Complete and submit the Hazardous Materials Inventory Chemical Description page for all materials listed above electronically in the California Environmental Reporting System (CERS).

Violation Description:

Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violations

Violation Date: 09/25/2015 ***Violation Source:*** CERS
Violation Program: HW ***Violation Division:*** Los Angeles County Fire Department
Citation: 22 CCR 16 66266.130 - California Code of Regulations, Title 22, Chapter 16, Section(s) 66266.130
Violation Notes:

Returned to compliance on 11/03/2015. OBSERVATION: Generator failed to properly handle, manage, label, and/or recycle used oil and fuel filters. Observed 3 x 55 gallon filter drums in tank room. One fitler drum labeled, other two missing labels. CORRECTIVE ACTION: Owner/Operator shall immediatly comply with the Title 22 regulations with regards to the proper handling, management, labeling and recycling of used oil and fuel filters. Verify compliance with the CUPA within [# days].

Violation Description:

Failure to properly handle, manage, label, and recycle used oil and fuel filters.

Violations

Violation Date: 09/25/2015 ***Violation Source:*** CERS
Violation Program: HW ***Violation Division:*** Los Angeles County Fire Department
Citation: 22 CCR 12 66262.20 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.20
Violation Notes:

Returned to compliance on 11/03/2015. OBSERVATION: Provide manifest(s) for the transport of sump sludge to a hazardous waste for off-site transfer, treatment, storage or disposal as required. There were no manifest available for sump sludge in clarifier or any documentation showing the clarifier were checked and not in need of pick up at this time. CORRECTIVE ACTION: The Owner/Operator shall properly prepare manifests for any transport of a hazardous waste for off-site transfer, treatment, storage or disposal going forward. Provide a copy of a prepared manifest to the CUPA to verify compliance.

Violation Description:

Failure to prepare a hazardous waste manifest for the transport of a hazardous waste for off-site transfer, treatment, storage, or disposal.

Violations

Violation Date: 09/25/2015
Violation Source: CERS
Violation Program: HW
Violation Division: Los Angeles County Fire Department
Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Notes:

Returned to compliance on 11/03/2015. Provide documents showing drain located inside the tank room is connected to a clarifier or other approved collection device.

Violation Description:

Haz Waste Generator Program - Release/Leaks/Spills - General

Violations

Violation Date: 09/25/2015
Violation Source: CERS
Violation Program: HW
Violation Division: Los Angeles County Fire Department
Citation: 22 CCR 15 66265.195(a) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.195(a)
Violation Notes:

Returned to compliance on 11/03/2015. OBSERVATION: Facility missing daily inspection log for september 2015. The owner/operator shall inspect, and document, where present, at least once each operating day: 1) Overfill/spill control equipment; 2) Aboveground portions of the tank system to detect corrosion or releases of water; 3) Data gathered from monitoring and leak-detection equipment; 4) Outside areas of the tank system including secondary containment to detect erosion or signs of releases of hazardous waste; 5) For uncovered tanks, the level of waste in the tank; 6) Cathodic protection if present. Inspection log missing all of september entry. Inspecton to be conducted daily prior to checking off. CORRECTIVE ACTION: Immediately begin daily inspections of the hazardous waste tank system(s), and document the items inspected. Submit a copy of the inspection log for the next 30 days to the CUPA by [date, 30 days from now].

Violation Description:

Failure of the owner or operator to conduct inspections and maintain inspection records at the facility of the following tank equipment:
1) Overfill/spill control equipment (e.g., waste-feed cutoff systems, bypass systems, and drainage systems) to ensure that it is in good working order;
2) The aboveground portions of the tank system, if any, to detect corrosion or releases of waste;
3) Data gathered from monitoring equipment and leak-detection equipment, (e.g., pressure and temperature gauges, monitoring wells) to ensure that the tank system is being operated according to its design;
4) The construction materials and the area immediately surrounding the externally accessible portion of the tank system including secondary containment structures (e.g., dikes) to detect erosion or signs of releases of hazardous waste (e.g., wet spots, dead vegetation); and
5) For uncovered tanks, the level of waste in the tank, to ensure compliance with section 66265.194(b)(3).

Violation/Evaluation Summary

Note: NO RECORDS: As of Jun 2021, there are no Compliance Monitoring and Enforcement (violation) records associated with this facility (EPA ID).

Handler Summary

Importer Activity:	No
Mixed Waste Generator:	No
Transporter Activity:	No
Transfer Facility:	No
Onsite Burner Exemption:	No
Furnace Exemption:	No
Underground Injection Activity:	No
Commercial TSD:	No
Used Oil Transporter:	No
Used Oil Transfer Facility:	No
Used Oil Processor:	No
Used Oil Refiner:	No
Used Oil Burner:	No
Used Oil Market Burner:	No
Used Oil Spec Marketer:	No

APN: 6348-021-006, 6348021006
Cleanup Status: CERTIFIED / OPERATION & MAINTENANCE AS OF 5/11/2021
Cleanup Oversight Agencies: DTSC - SITE CLEANUP PROGRAM - LEAD AGENCY
Site Type: STATE RESPONSE OR NPL
Office: CLEANUP CHATSWORTH
Past Use that Caused Contam: EQUIPMENT/INSTRUMENT REPAIR, JUNKYARD, RECYCLING - OTHER, RECYCLING - SCRAP METAL, TRANSFORMER REPAIR
Potential Media Affected: AQUIFER USED FOR DRINKING WATER SUPPLY AFFECTED, SOIL
Potential Contamin of Concern:

DIOXIN (AS 2,3,7,8-TCDD TEQ)
POLYCHLORINATED BIPHENYLS (PCBS)
VOLATILE ORGANICS (8260B VOCS)

Site History:

The property is located at 8226 East Whittier Boulevard in Pico Rivera, California, bounded by Whittier Boulevard on the north, Van Norman Road on the west, the Union Pacific Railroad (UPRR) 12-15-foot elevated tracks on the south.

The Site is largely flat, at an elevation of approximately 170 feet above mean sea level, in an urbanized alluvial plain in the Los Angeles Basin. The Site is surrounded to the west and south by industrial facilities and to the north by small business, residences and a church.

From 1948 to the 1980s, REEC and its predecessor(s) reclaimed copper from the cores of used electrical transformers. Used old or surplus transformers were obtained from entities, including but not limited to, utility companies, municipalities and the federal government. On occasion, oils from transformers were released into the environment as the transformers were handled, reclaimed and/or stored.
Because of operations at the former facility, surface and subsurface soils were impacted with hazardous wastes such as polychlorinated biphenyls (PCBs), petroleum hydrocarbons, volatile organic compounds (VOCs), metals, dioxins and furans. These compounds were found in different matrix media as result of waste discharge to the surface. Previously investigations performed at the former Facility associated the presence of these compounds in different matrix media to oils from transformers formerly serviced at the site, maintenance activities and fugitive dust from on-site furnaces used to remove materials from recyclables.

Transformers were handled and stored on and adjacent to the former unpaved area located in the southeastern quadrant of the former Facility. Recycling furnaces were located approximately 70 feet (ft.) from the southeastern quadrant of the former Facility.
REEC relocated its operation from the Site in 2008. On or about July 6, 2010, the REEC's property was sold to Whittier Pine LLC by TC Pan (Whittier Pine LLC) and leased to Pacific Eagle Construction Supply Inc. (Pacific Eagle). Currently, the Site is used as a storage yard and staging area.

Site Regulatory History Regarding to the Presence of PCBs at the Site:

• From April 2, 1975 to March 30, 1983, City of Pico Rivera issued three Notices of Violations and Orders to Comply to the facility.

• On April 7, 1975, Los Angeles Regional Water Quality Control Board (LARWQCB) notified RECC that discharges of water used to cool transformers during copper recovery operations into an adjacent drainage ditch was not in accordance with the California Water Code.

• On April 6, 1981, Department of County Engineer – Facilities Sanitation Division issued an investigation report that wastewater from transformer washing operation was been discharged to the ground.

• On July 8, 1981, County of Los Angeles, Office of the District Attorney, Consumer and Environment Protection Division, notified the facility that the County of Los Angeles would file a lawsuit against REEC due multiple violations of Section 17200 of the California Business and Professions Code and have indicated that soil samples collected at the facility reported concentrations of PCBs ranging from 92 to 21,000 mg/kg.

• On January 10, 1984, USEPA, Region 9, issued a Toxic Substances Control Act (TSCA) PCB Investigation Report. The report indicated potential violations according to 40 CFR 761.180, since no annual document had been prepared for 1981, 1982 and 1983 covering shipments of PCB-contaminated soil and PCB capacitors.

• On March 27, 1984, County of Los Angeles, Department of Health Services issued a letter directing the facility to comply with California Health and Safety Code (HSC) sections 25189 and 25191.

• On June 22, 1984, State of California- Health and Welfare Agency, Department of Health Services issued a Notice of Violation and Directive to Comply to the facility.

• On January 1986, State of California- Health and Welfare Agency, Department of Health Services issued a Preliminary Assessment Summary. This document indicated that was unknown whether the Site had been adequately assessed for removal of contaminated soils. Off-site subsurface contamination was assessed as potentially extensive because of the facility's historical discharges of wastewater into the unlined Arroyo Ditch.

• On June 17, 1986, Ecology and Environment performed a site inspection under USEPA contract no. 68-01-6692. Inspection recommendations

included referral of the Site to the United States Environmental Protection Agency (USEPA)'s enforcement section for possible TSCA violations, and referral to the local Health Department for additional sampling activities.

• On May 5, 1993, DTSC assumed lead agency status for REEC facility based on the fact there is known groundwater contamination and LARWQCB refused to accept oversight alleging that the environmental concerns at the subject property was more related to exposures and potential risk from soil and equipment contaminations, not groundwater concerns.

• On February 2, 1996, DTSC issued an Imminent and Substantial Endangerment Determination and Order and Remedial Action Order's (I&SE-RAO), Docket No. I&SE-RAO 05/06-002 to the Respondent (REEC). The purpose of this Order was to ensure that any release or threatened release of hazardous substances to the air, soil, surface water and ground water at or from the Site would be thoroughly investigated and that a plan to take appropriate removal/remedial actions would be prepared. DTSC alleged that the Responsible Party (REEC) and several other parties were potentially responsible for the contamination of the Site.

• From August 1997 through August 1999, a formal remedial investigation (RI) was conducted at the Site. Results from the RI indicated that the lateral and vertical extent of PCBs-impacted soil in the former unpaved area in the southeast quadrant was consistent with localized releases from previous operations at the facility. Released oil containing PCBs locally infiltrated the former unpaved area and seeped vertically into the deeper sandy soil vadose zone. The RI data indicated that the vertical distribution of PCBs with concentrations above 10 mg/kg extended to 60 feet below grade surface (bgs) near monitoring well RMW-2 and boring BD-1 (later converted into monitoring well RDW-1). The presence of PCBs in the porous media at a depth below the ground water was interpreted in the RI as result of past spills at periods of deep groundwater levels, due to recurrent groundwater piezometric elevation fluctuations, consequently, promoting a large smear profile area and inducing downward vertical transport of PCBs.

• The final Remedial Investigation/Feasibility Study (RI/FS) Report was submitted to the DTSC in October 1999, and was approved by the DTSC on June 18, 2000. A Remedial Action Plan (RAP) was submitted to DTSC in August 2003. The remedial actions proposed in the RAP included excavation and removal of PCB contaminated soils beneath specific areas of the Site, installation of an engineered cap, placement of a deed restriction on the property where contamination would be left in place at levels that prevent unrestricted use, and groundwater monitoring. The chosen remedy was implemented on both facility's area of concerns (AOC)#1 (the south-central portion of the former unpaved area located in the southeast corner of the Facility) and AOC#2 (along a surface drainage path adjacent to the south of the RECC's property within the railroad right-of-way). The RAP was approved by DTSC on December 16, 2004.

• On July 19, 2005, DTSC issued an I&SE-RAO, Docket No. I&SE-RAO 95/96-002, to the Respondents: REEC, Aaron Berman, an individual, Berman Steel Company, Pacific Gas and Electric Company, Southern California Edison Company, San Diego Gas and Electric, City of Anaheim, City of Los Angeles Department of Water and Power, City of Pasadena Water and Power Department, Sacramento Municipal Utility District and United States of America, by and through the Defense Logistics Agency. The Order determined that the Respondents must continue interim groundwater monitoring in accordance with DTSC's approved RAP, furnishing a Public Participation Plan, provide a Remedial Design (RD) describing in detail the technical and operational plans for implementation of the Final RAP, implementation of Final RAP, O&M requirements in accordance with the Final RAP and Five-Year Review to review and reevaluate the remedial action after a period of 5 years from the date of completion and every 5 years thereafter.

Because the Site will remain as an industrial parcel for foreseeable future, the Non-Governmental Respondents selected soil excavation of impacted soils at the two areas of concerns, off-site disposal of the unearthed soil materials to permitted facility(s) (landfill), installation of an engineering cap on both areas of concerns (AOCs), placement of a deed restriction on the properties where contamination will be left in place to allow oversight access to conduct groundwater monitoring and restrict beneficial end use. Additionally, long term post-closure groundwater monitoring and maintenance of AOC#1 and AOC#2 engineering caps were recommended to preclude unacceptable impacts to groundwater quality.

• The RAP was implemented from September 2006 through February 2007 and involved the removal and off-site disposal of some of the contaminated soil to permitted facility(s) (landfill). Both AOC#1 and AOC#2 excavation areas were backfilled with clean fill to meet requirements set forth on October 2001 DTSC's fact sheet "Information Advisory – Clean Fill Material", and covered with engineered surface cap.

Following excavation and back filling with clean soil, areas designed as AOCs were covered with an impermeable engineering cap. Final Closure Report was submitted to DTSC in April 2007 and approved in September 2007.

According to 2007 Final Closure Report, construction of AOC#1 engineered cap included final site grading, placement of cap foundation layer, base layer, and asphalt cover and associated drainage structures. Prior to placement of low permeability asphalt material at the areas of concern, a test batch was conducted at the asphalt batch plant and tested for conformance with the design mix and performance specifications. Testing results indicated that batch material met the performance for permeability, but had a lower than desired structural stability. Further, due to narrow space availability for construction within AOC#2, an alternate approach for achieving the cap permeability requirements was implemented. As a result, a double-coat pavement seal was placed over the low permeability mix asphalt in AOC#2. It was assumed that due to AOC#2 is in a non-traffic area, the seal coat would not experience any wear from point surface loads, such as vehicles.

• On October 12, 2009, a Covenant to restrict the use of a limited portion of former REEC property was made by and between Boardwalk Company, LLC (previous Site Owner) and DTSC pursuant to Civil Code section 1471. The restricted areas were located in the areas now generally bounded by a drainage ditch on the east, the northern boundary of the transformer repair building on the north, the machine shop on the west, and the UPRR's Right of Way on the south, containing the area referred to as AOC#).

• On October 28, 2009, a Covenant to restrict the use of property was made by and between the UPRR and DTSC pursuant to Civil Code section 1471. The property is a portion of Covenantor's railroad Right of Way, which is also generally describes as Los Angeles County Assessor's Parcel No. 6348-021-807, containing the area referred to as AOC#2.

• On November 30, 2009, DTSC, Non-Governmental Respondents, Local Governmental Respondents, and Federal Governmental Respondent entered into an Operation and Maintenance Consent Agreement (Consent Agreement), Docket No. HAS-CA 08/09-130, pursuant to HSC sections 25355.59a)(1)

(C), 58009, and 58010, and sections 113(f)(2) and 113(f)(3)(B) of Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). The Consent Agreement directed that the Non-Governmental Respondent shall be responsible for carrying out all activities and obligations determined in the O&M Plan that was submitted to DTSC in April 2007 and approved in September 5, 2007. Among the scheduled activities listed in the O&M Plan; ground water shall be monitored annually; groundwater wells (alternative point of compliance wells) shall be inspected semi-annually; final cover shall be inspected quarterly in the first year, semi-annually in the second and third years, and from the fourth year forward, annually; drainage system inspection shall be conducted on a quarterly basis; and the Non-Governmental Respondents shall review and reevaluate the remedial action after a period of 5 years from the date of completion and every 5 years thereafter.

• On June 15, 2010, DTSC issued a Removal Action Certification Form. DTSC determined that all appropriate removal/remedial action were completed and that all acceptable engineering practices implemented; however, the Site requires ongoing O&M and monitoring efforts according to the approved 2009 O&M Plan. O&M activities have been performed at the Site pursuant to 2005 I&SE-RAO and 2009 Consent Agreement, which includes annual groundwater monitoring, maintenance of groundwater monitoring systems, inspection and maintenance of the engineered asphalt cap, monitoring and maintenance of settlement monuments and drainage system inspection and maintenance, as well as associated reporting to DTSC. Alternative point of compliance wells have been monitored since 1999 and O&M activities, including post-closure monitoring and maintenance of AOC#1 and AOC#2, have been performed at the Site since February 2007, subsequent to completion of PCBs impacted soils removal and AOC capping activities.

Alternative point of compliance wells consist of five (5) monitoring wells. RMW-2 is located within the limits of the AOC#1 capped area. RMW-4 is located just beyond the southwestern facility boundary. RMW-5 is located to the southwest of the former Facility, south of RMW-4 and approximately 340 ft. from RMW-2. RMW-6 is located just beyond the northwestern facility boundary. RMW-7 is located approximately 320 ft. beyond the south.

Based on the information provided in the 2016 FYR Report, DTSC has concurred with the Non-Governmental Respondents' determination that: (i) the implemented remedy continues to be protective of human health; and (ii) the asphalt cover installed in the AOC#1 is currently preventing surface water infiltration that would promote/enhance percolation of chemical of concerns that may reside/be present in the unsaturated porous media beneath the asphalt cover.

Asphalt cover installed in AOC#2 was rectified to ensure that the remedy functions as intended. The following repairing actions were conducted at AOC#2: (i) placement of seal coat or binder in a gap between the REEC's southern perimeter wall and the ground surface along the AOC#2 northern limits; (ii) cleaning out gravels/vegetation that have been deposited/grown in the culvert outlets that transect the UPRR elevated rail track adjacent to the AOC#2 southern limits; and (iii) resealing the asphalt cover 2.

Groundwater elevations have decreased to levels below the alternative point of compliance (POC) monitoring wells' screens. Since 2014 this has prevented the Non-Governmental Respondents from collecting environmental groundwater samples to determine whether the remedy's objectives of protecting groundwater quality are being met.

Document Type: Operation and Maintenance Report
Date Completed: 1/29/2014
Comments: During calendar year 2013, inspections were performed at the Site on March 26, June 28, September 10 and December 10. Other activities performed during the 2013 calendar year included groundwater monitoring on March 15 and 16, 2012 and surveying of settlement markers on September 10, 2013.
During the groundwater monitoring event in March 2013, only the monitoring well RMW-2 had sufficient groundwater for purging and sample collection; wells RMW-4 through RMW-7 yielded insufficient water, therefore, they were not able to be sample during this event.

Potential Media Affected: AQUIFER USED FOR DRINKING WATER SUPPLY AFFECTED, SOIL
Potential Contamin of Concern:

DIOXIN (AS 2,3,7,8-TCDD TEQ)
POLYCHLORINATED BIPHENYLS (PCBS)
VOLATILE ORGANICS (8260B VOCS)

Site History:

The property is located at 8226 East Whittier Boulevard in Pico Rivera, California, bounded by Whittier Boulevard on the north, Van Norman Road on the west, the Union Pacific Railroad (UPRR) 12-15-foot elevated tracks on the south.

The Site is largely flat, at an elevation of approximately 170 feet above mean sea level, in an urbanized alluvial plain in the Los Angeles Basin. The Site is surrounded to the west and south by industrial facilities and to the north by small business, residences and a church.

From 1948 to the 1980s, REEC and its predecessor(s) reclaimed copper from the cores of used electrical transformers. Used old or surplus transformers were obtained from entities, including but not limited to, utility companies, municipalities and the federal government. On occasion, oils from transformers were released into the environment as the transformers were handled, reclaimed and/or stored.
Because of operations at the former facility, surface and subsurface soils were impacted with hazardous wastes such as polychlorinated biphenyls

(PCBs), petroleum hydrocarbons, volatile organic compounds (VOCs), metals, dioxins and furans. These compounds were found in different matrix media as result of waste discharge to the surface. Previously investigations performed at the former Facility associated the presence of these compounds in different matrix media to oils from transformers formerly serviced at the site, maintenance activities and fugitive dust from on-site furnaces used to remove materials from recyclables.

Transformers were handled and stored on and adjacent to the former unpaved area located in the southeastern quadrant of the former Facility. Recycling furnaces were located approximately 70 feet (ft.) from the southeastern quadrant of the former Facility.
REEC relocated its operation from the Site in 2008. On or about July 6, 2010, the REEC's property was sold to Whittier Pine LLC by TC Pan (Whittier Pine LLC) and leased to Pacific Eagle Construction Supply Inc. (Pacific Eagle). Currently, the Site is used as a storage yard and staging area.

Site Regulatory History Regarding to the Presence of PCBs at the Site:

• From April 2, 1975 to March 30, 1983, City of Pico Rivera issued three Notices of Violations and Orders to Comply to the facility.

• On April 7, 1975, Los Angeles Regional Water Quality Control Board (LARWQCB) notified RECC that discharges of water used to cool transformers during copper recovery operations into an adjacent drainage ditch was not in accordance with the California Water Code.

• On April 6, 1981, Department of County Engineer – Facilities Sanitation Division issued an investigation report that wastewater from transformer washing operation was been discharged to the ground.

• On July 8, 1981, County of Los Angeles, Office of the District Attorney, Consumer and Environment Protection Division, notified the facility that the County of Los Angeles would file a lawsuit against REEC due multiple violations of Section 17200 of the California Business and Professions Code and have indicated that soil samples collected at the facility reported concentrations of PCBs ranging from 92 to 21,000 mg/kg.

• On January 10, 1984, USEPA, Region 9, issued a Toxic Substances Control Act (TSCA) PCB Investigation Report. The report indicated potential violations according to 40 CFR 761.180, since no annual document had been prepared for 1981, 1982 and 1983 covering shipments of PCB-contaminated soil and PCB capacitors.

• On March 27, 1984, County of Los Angeles, Department of Health Services issued a letter directing the facility to comply with California Health and Safety Code (HSC) sections 25189 and 25191.

• On June 22, 1984, State of California- Health and Welfare Agency, Department of Health Services issued a Notice of Violation and Directive to Comply to the facility.

• On January 1986, State of California- Health and Welfare Agency, Department of Health Services issued a Preliminary Assessment Summary. This document indicated that was unknown whether the Site had been adequately assessed for removal of contaminated soils. Off-site subsurface contamination was assessed as potentially extensive because of the facility's historical discharges of wastewater into the unlined Arroyo Ditch.

• On June 17, 1986, Ecology and Environment performed a site inspection under USEPA contract no. 68-01-6692. Inspection recommendations included referral of the Site to the United States Environmental Protection Agency (USEPA)'s enforcement section for possible TSCA violations, and referral to the local Health Department for additional sampling activities.

• On May 5, 1993, DTSC assumed lead agency status for REEC facility based on the fact there is known groundwater contamination and LARWQCB refused to accept oversight alleging that the environmental concerns at the subject property was more related to exposures and potential risk from soil and equipment contaminations, not groundwater concerns.

• On February 2, 1996, DTSC issued an Imminent and Substantial Endangerment Determination and Order and Remedial Action Order's (I&SE-RAO), Docket No. I&SE-RAO 05/06-002 to the Respondent (REEC). The purpose of this Order was to ensure that any release or threatened release of hazardous substances to the air, soil, surface water and ground water at or from the Site would be thoroughly investigated and that a plan to take appropriate removal/remedial actions would be prepared. DTSC alleged that the Responsible Party (REEC) and several other parties were potentially responsible for the contamination of the Site.

• From August 1997 through August 1999, a formal remedial investigation (RI) was conducted at the Site. Results from the RI indicated that the lateral and vertical extent of PCBs-impacted soil in the former unpaved area in the southeast quadrant was consistent with localized releases from previous operations at the facility. Released oil containing PCBs locally infiltrated the former unpaved area and seeped vertically into the deeper sandy soil vadose zone. The RI data indicated that the vertical distribution of PCBs with concentrations above 10 mg/kg extended to 60 feet below grade surface (bgs) near monitoring well RMW-2 and boring BD-1 (later converted into monitoring well RDW-1). The presence of PCBs in the porous media at a depth below the ground water was interpreted in the RI as result of past spills at periods of deep groundwater levels, due to recurrent groundwater piezometric elevation fluctuations, consequently, promoting a large smear profile area and inducing downward vertical transport of PCBs.

• The final Remedial Investigation/Feasibility Study (RI/FS) Report was submitted to the DTSC in October 1999, and was approved by the DTSC on June 18, 2000. A Remedial Action Plan (RAP) was submitted to DTSC in August 2003. The remedial actions proposed in the RAP included excavation and removal of PCB contaminated soils beneath specific areas of the Site, installation of an engineered cap, placement of a deed restriction on the property where contamination would be left in place at levels that prevent unrestricted use, and groundwater monitoring. The chosen remedy was implemented on both facility's area of concerns (AOC)#1 (the south-central portion of the former unpaved area located in the southeast corner of the Facility) and AOC#2 (along a surface drainage path adjacent to the south of the RECC's property within the railroad right-of-way). The RAP was approved by DTSC on December 16, 2004.

• On July 19, 2005, DTSC issued an I&SE-RAO, Docket No. I&SE-RAO 95/96-002, to the Respondents: REEC, Aaron Berman, an individual, Berman

Steel Company, Pacific Gas and Electric Company, Southern California Edison Company, San Diego Gas and Electric, City of Anaheim, City of Los Angeles Department of Water and Power, City of Pasadena Water and Power Department, Sacramento Municipal Utility District and United States of America, by and through the Defense Logistics Agency. The Order determined that the Respondents must continue interim groundwater monitoring in accordance with DTSC's approved RAP, furnishing a Public Participation Plan, provide a Remedial Design (RD) describing in detail the technical and operational plans for implementation of the Final RAP, implementation of Final RAP, O&M requirements in accordance with the Final RAP and Five-Year Review to review and reevaluate the remedial action after a period of 5 years from the date of completion and every 5 years thereafter.

Because the Site will remain as an industrial parcel for foreseeable future, the Non-Governmental Respondents selected soil excavation of impacted soils at the two areas of concerns, off-site disposal of the unearthed soil materials to permitted facility(s) (landfill), installation of an engineering cap on both areas of concerns (AOCs), placement of a deed restriction on the properties where contamination will be left in place to allow oversight access to conduct groundwater monitoring and restrict beneficial end use. Additionally, long term post-closure groundwater monitoring and maintenance of AOC#1 and AOC#2 engineering caps were recommended to preclude unacceptable impacts to groundwater quality.

• The RAP was implemented from September 2006 through February 2007 and involved the removal and off-site disposal of some of the contaminated soil to permitted facility(s) (landfill). Both AOC#1 and AOC#2 excavation areas were backfilled with clean fill to meet requirements set forth on October 2001 DTSC's fact sheet "Information Advisory – Clean Fill Material", and covered with engineered surface cap.

Following excavation and back filling with clean soil, areas designed as AOCs were covered with an impermeable engineering cap. Final Closure Report was submitted to DTSC in April 2007 and approved in September 2007.

According to 2007 Final Closure Report, construction of AOC#1 engineered cap included final site grading, placement of cap foundation layer, base layer, and asphalt cover and associated drainage structures. Prior to placement of low permeability asphalt material at the areas of concern, a test batch was conducted at the asphalt batch plant and tested for conformance with the design mix and performance specifications. Testing results indicated that batch material met the performance for permeability, but had a lower than desired structural stability. Further, due to narrow space availability for construction within AOC#2, an alternate approach for achieving the cap permeability requirements was implemented. As a result, a double-coat pavement seal was placed over the low permeability mix asphalt in AOC#2. It was assumed that due to AOC#2 is in a non-traffic area, the seal coat would not experience any wear from point surface loads, such as vehicles.

• On October 12, 2009, a Covenant to restrict the use of a limited portion of former REEC property was made by and between Boardwalk Company, LLC (previous Site Owner) and DTSC pursuant to Civil Code section 1471. The restricted areas were located in the areas now generally bounded by a drainage ditch on the east, the northern boundary of the transformer repair building on the north, the machine shop on the west, and the UPRR's Right of Way on the south, containing the area referred to as AOC#).

• On October 28, 2009, a Covenant to restrict the use of property was made by and between the UPRR and DTSC pursuant to Civil Code section 1471. The property is a portion of Covenantor's railroad Right of Way, which is also generally describes as Los Angeles County Assessor's Parcel No. 6348-021-807, containing the area referred to as AOC#2.

• On November 30, 2009, DTSC, Non-Governmental Respondents, Local Governmental Respondents, and Federal Governmental Respondent entered into an Operation and Maintenance Consent Agreement (Consent Agreement), Docket No. HAS-CA 08/09-130, pursuant to HSC sections 25355.59a)(1)(C), 58009, and 58010, and sections 113(f)(2) and 113(f)(3)(B) of Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). The Consent Agreement directed that the Non-Governmental Respondent shall be responsible for carrying out all activities and obligations determined in the O&M Plan that was submitted to DTSC in April 2007 and approved in September 5, 2007. Among the scheduled activities listed in the O&M Plan; ground water shall be monitored annually; groundwater wells (alternative point of compliance wells) shall be inspected semi-annually; final cover shall be inspected quarterly in the first year, semi-annually in the second and third years, and from the fourth year forward, annually; drainage system inspection shall be conducted on a quarterly basis; and the Non-Governmental Respondents shall review and reevaluate the remedial action after a period of 5 years from the date of completion and every 5 years thereafter.

• On June 15, 2010, DTSC issued a Removal Action Certification Form. DTSC determined that all appropriate removal/remedial action were completed and that all acceptable engineering practices implemented; however, the Site requires ongoing O&M and monitoring efforts according to the approved 2009 O&M Plan. O&M activities have been performed at the Site pursuant to 2005 I&SE-RAO and 2009 Consent Agreement, which includes annual groundwater monitoring, maintenance of groundwater monitoring systems, inspection and maintenance of the engineered asphalt cap, monitoring and maintenance of settlement monuments and drainage system inspection and maintenance, as well as associated reporting to DTSC. Alternative point of compliance wells have been monitored since 1999 and O&M activities, including post-closure monitoring and maintenance of AOC#1 and AOC#2, have been performed at the Site since February 2007, subsequent to completion of PCBs impacted soils removal and AOC capping activities.

Alternative point of compliance wells consist of five (5) monitoring wells. RMW-2 is located within the limits of the AOC#1 capped area. RMW-4 is located just beyond the southwestern facility boundary. RMW-5 is located to the southwest of the former Facility, south of RMW-4 and approximately 340 ft. from RMW-2. RMW-6 is located just beyond the northwestern facility boundary. RMW-7 is located approximately 320 ft. beyond the south.

Based on the information provided in the 2016 FYR Report, DTSC has concurred with the Non-Governmental Respondents' determination that: (i) the implemented remedy continues to be protective of human health; and (ii) the asphalt cover installed in the AOC#1 is currently preventing surface water infiltration that would promote/enhance percolation of chemical of concerns that may reside/be present in the unsaturated porous media beneath the asphalt cover.

Asphalt cover installed in AOC#2 was rectified to ensure that the remedy functions as intended. The following repairing actions were conducted at AOC#2: (i) placement of seal coat or binder in a gap between the REEC's southern perimeter wall and the ground surface along the AOC#2 northern limits; (ii) cleaning out gravels/vegetation that have been deposited/grown in the culvert outlets that transect the UPRR elevated rail track adjacent to the AOC#2 southern limits; and (iii) resealing the asphalt cover 2.

Groundwater elevations have decreased to levels below the alternative point of compliance (POC) monitoring wells' screens. Since 2014 this has

prevented the Non-Governmental Respondents from collecting environmental groundwater samples to determine whether the remedy's objectives of protecting groundwater quality are being met.

Date Completed: 1/29/2014
Comments: During calendar year 2013, inspections were performed at the Site on March 26, June 28, September 10 and December 10. Other activities performed during the 2013 calendar year included groundwater monitoring on March 15 and 16, 2012 and surveying of settlement markers on September 10, 2013.
During the groundwater monitoring event in March 2013, only the monitoring well RMW-2 had sufficient

groundwater for purging and sample collection; wells RMW-4 through RMW-7 yielded insufficient water, therefore, they were not able to be sample during this event.

Title Link:
Area Name:
Area Link:
Sub Area:
Sub Area Link:
Document Type: Site Screening
Date Completed: 7/28/1993
Comments: LA County referred site to DTSC for state oversight on March 3, 1993. The county was responsible for the oversight of investigations over the last three years. The referral is based on the state's experience with GW investigations. Investigations indicate soil contamiantion as high as 2400 ppm, 17 ppb of PCB degredation products (ie. 1,4 - dichloro- benzene) in GW, and C12-C30 chains of oil as deep as twenty feet bgs in the saturated zone.

Potential Contaminants:

DIOXIN (AS 2,3,7,8-TCDD TEQ)
POLYCHLORINATED BIPHENYLS (PCBS)
VOLATILE ORGANICS (8260B VOCS)

Site History:

The property is located at 8226 East Whittier Boulevard in Pico Rivera, California, bounded by Whittier Boulevard on the north, Van Norman Road on the west, the Union Pacific Railroad (UPRR) 12-15-foot elevated tracks on the south.

The Site is largely flat, at an elevation of approximately 170 feet above mean sea level, in an urbanized alluvial plain in the Los Angeles Basin. The Site is surrounded to the west and south by industrial facilities and to the north by small business, residences and a church.

From 1948 to the 1980s, REEC and its predecessor(s) reclaimed copper from the cores of used electrical transformers. Used old or surplus transformers were obtained from entities, including but not limited to, utility companies, municipalities and the federal government. On occasion, oils from transformers were released into the environment as the transformers were handled, reclaimed and/or stored.
Because of operations at the former facility, surface and subsurface soils were impacted with hazardous wastes such as polychlorinated biphenyls (PCBs), petroleum hydrocarbons, volatile organic compounds (VOCs), metals, dioxins and furans. These compounds were found in different matrix media as result of waste discharge to the surface. Previously investigations performed at the former Facility associated the presence of these compounds in different matrix media to oils from transformers formerly serviced at the site, maintenance activities and fugitive dust from on-site furnaces used to remove materials from recyclables.

Transformers were handled and stored on and adjacent to the former unpaved area located in the southeastern quadrant of the former Facility. Recycling furnaces were located approximately 70 feet (ft.) from the southeastern quadrant of the former Facility.
REEC relocated its operation from the Site in 2008. On or about July 6, 2010, the REEC's property was sold to Whittier Pine LLC by TC Pan (Whittier Pine LLC) and leased to Pacific Eagle Construction Supply Inc. (Pacific Eagle). Currently, the Site is used as a storage yard and staging area.

Site Regulatory History Regarding to the Presence of PCBs at the Site:

• From April 2, 1975 to March 30, 1983, City of Pico Rivera issued three Notices of Violations and Orders to Comply to the facility.

• On April 7, 1975, Los Angeles Regional Water Quality Control Board (LARWQCB) notified RECC that discharges of water used to cool transformers during copper recovery operations into an adjacent drainage ditch was not in accordance with the California Water Code.

• On April 6, 1981, Department of County Engineer – Facilities Sanitation Division issued an investigation report that wastewater from transformer washing operation was been discharged to the ground.

• On July 8, 1981, County of Los Angeles, Office of the District Attorney, Consumer and Environment Protection Division, notified the facility that the County of Los Angeles would file a lawsuit against REEC due multiple violations of Section 17200 of the California Business and Professions Code and have indicated that soil samples collected at the facility reported concentrations of PCBs ranging from 92 to 21,000 mg/kg.

• On January 10, 1984, USEPA, Region 9, issued a Toxic Substances Control Act (TSCA) PCB Investigation Report. The report indicated potential violations according to 40 CFR 761.180, since no annual document had been prepared for 1981, 1982 and 1983 covering shipments of PCB-contaminated soil and PCB capacitors.

• On March 27, 1984, County of Los Angeles, Department of Health Services issued a letter directing the facility to comply with California Health and Safety Code (HSC) sections 25189 and 25191.

• On June 22, 1984, State of California- Health and Welfare Agency, Department of Health Services issued a Notice of Violation and Directive to Comply to the facility.

• On January 1986, State of California- Health and Welfare Agency, Department of Health Services issued a Preliminary Assessment Summary. This document indicated that was unknown whether the Site had been adequately assessed for removal of contaminated soils. Off-site subsurface contamination was assessed as potentially extensive because of the facility's historical discharges of wastewater into the unlined Arroyo Ditch.

• On June 17, 1986, Ecology and Environment performed a site inspection under USEPA contract no. 68-01-6692. Inspection recommendations included referral of the Site to the United States Environmental Protection Agency (USEPA)'s enforcement section for possible TSCA violations, and referral to the local Health Department for additional sampling activities.

• On May 5, 1993, DTSC assumed lead agency status for REEC facility based on the fact there is known groundwater contamination and LARWQCB refused to accept oversight alleging that the environmental concerns at the subject property was more related to exposures and potential risk from soil and equipment contaminations, not groundwater concerns.

• On February 2, 1996, DTSC issued an Imminent and Substantial Endangerment Determination and Order and Remedial Action Order's (I&SE-RAO), Docket No. I&SE-RAO 05/06-002 to the Respondent (REEC). The purpose of this Order was to ensure that any release or threatened release of hazardous substances to the air, soil, surface water and ground water at or from the Site would be thoroughly investigated and that a plan to take appropriate removal/remedial actions would be prepared. DTSC alleged that the Responsible Party (REEC) and several other parties were potentially responsible for the contamination of the Site.

• From August 1997 through August 1999, a formal remedial investigation (RI) was conducted at the Site. Results from the RI indicated that the lateral and vertical extent of PCBs-impacted soil in the former unpaved area in the southeast quadrant was consistent with localized releases from previous operations at the facility. Released oil containing PCBs locally infiltrated the former unpaved area and seeped vertically into the deeper sandy soil vadose zone. The RI data indicated that the vertical distribution of PCBs with concentrations above 10 mg/kg extended to 60 feet below grade surface (bgs) near monitoring well RMW-2 and boring BD-1 (later converted into monitoring well RDW-1). The presence of PCBs in the porous media at a depth below the ground water was interpreted in the RI as result of past spills at periods of deep groundwater levels, due to recurrent groundwater piezometric elevation fluctuations, consequently, promoting a large smear profile area and inducing downward vertical transport of PCBs.

• The final Remedial Investigation/Feasibility Study (RI/FS) Report was submitted to the DTSC in October 1999, and was approved by the DTSC on June 18, 2000. A Remedial Action Plan (RAP) was submitted to DTSC in August 2003. The remedial actions proposed in the RAP included excavation and removal of PCB contaminated soils beneath specific areas of the Site, installation of an engineered cap, placement of a deed restriction on the property where contamination would be left in place at levels that prevent unrestricted use, and groundwater monitoring. The chosen remedy was implemented on both facility's area of concerns (AOC)#1 (the south-central portion of the former unpaved area located in the southeast corner of the Facility) and AOC#2 (along a surface drainage path adjacent to the south of the RECC's property within the railroad right-of-way). The RAP was approved by DTSC on December 16, 2004.

• On July 19, 2005, DTSC issued an I&SE-RAO, Docket No. I&SE-RAO 95/96-002, to the Respondents: REEC, Aaron Berman, an individual, Berman Steel Company, Pacific Gas and Electric Company, Southern California Edison Company, San Diego Gas and Electric, City of Anaheim, City of Los Angeles Department of Water and Power, City of Pasadena Water and Power Department, Sacramento Municipal Utility District and United States of America, by and through the Defense Logistics Agency. The Order determined that the Respondents must continue interim groundwater monitoring in accordance with DTSC's approved RAP, furnishing a Public Participation Plan, provide a Remedial Design (RD) describing in detail the technical and operational plans for implementation of the Final RAP, implementation of Final RAP, O&M requirements in accordance with the Final RAP and Five-Year Review to review and reevaluate the remedial action after a period of 5 years from the date of completion and every 5 years thereafter.

Because the Site will remain as an industrial parcel for foreseeable future, the Non-Governmental Respondents selected soil excavation of impacted soils at the two areas of concerns, off-site disposal of the unearthed soil materials to permitted facility(s) (landfill), installation of an engineering cap on both areas of concerns (AOCs), placement of a deed restriction on the properties where contamination will be left in place to allow oversight access to conduct groundwater monitoring and restrict beneficial end use. Additionally, long term post-closure groundwater monitoring and maintenance of AOC#1 and AOC#2 engineering caps were recommended to preclude unacceptable impacts to groundwater quality.

• The RAP was implemented from September 2006 through February 2007 and involved the removal and off-site disposal of some of the contaminated soil to permitted facility(s) (landfill). Both AOC#1 and AOC#2 excavation areas were backfilled with clean fill to meet requirements set forth on October 2001 DTSC's fact sheet "Information Advisory – Clean Fill Material", and covered with engineered surface cap.

Following excavation and back filling with clean soil, areas designed as AOCs were covered with an impermeable engineering cap. Final Closure Report was submitted to DTSC in April 2007 and approved in September 2007.

According to 2007 Final Closure Report, construction of AOC#1 engineered cap included final site grading, placement of cap foundation layer, base layer, and asphalt cover and associated drainage structures. Prior to placement of low permeability asphalt material at the areas of concern, a test batch was conducted at the asphalt batch plant and tested for conformance with the design mix and performance specifications. Testing results indicated that batch material met the performance for permeability, but had a lower than desired structural stability. Further, due to narrow space availability for construction within AOC#2, an alternate approach for achieving the cap permeability requirements was implemented. As a result, a double-coat pavement seal was placed over the low permeability mix asphalt in AOC#2. It was assumed that due to AOC#2 is in a non-traffic area, the seal coat would not experience any wear from point surface loads, such as vehicles.

• On October 12, 2009, a Covenant to restrict the use of a limited portion of former REEC property was made by and between Boardwalk Company, LLC (previous Site Owner) and DTSC pursuant to Civil Code section 1471. The restricted areas were located in the areas now generally bounded by a drainage ditch on the east, the northern boundary of the transformer repair building on the north, the machine shop on the west, and the UPRR's Right of Way on the south, containing the area referred to as AOC#).

• On October 28, 2009, a Covenant to restrict the use of property was made by and between the UPRR and DTSC pursuant to Civil Code section 1471. The property is a portion of Covenantor's railroad Right of Way, which is also generally describes as Los Angeles County Assessor's Parcel No. 6348-021-807, containing the area referred to as AOC#2.

• On November 30, 2009, DTSC, Non-Governmental Respondents, Local Governmental Respondents, and Federal Governmental Respondent entered into an Operation and Maintenance Consent Agreement (Consent Agreement), Docket No. HAS-CA 08/09-130, pursuant to HSC sections 25355.59a)(1)(C), 58009, and 58010, and sections 113(f)(2) and 113(f)(3)(B) of Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). The Consent Agreement directed that the Non-Governmental Respondent shall be responsible for carrying out all activities and obligations determined in the O&M Plan that was submitted to DTSC in April 2007 and approved in September 5, 2007. Among the scheduled activities listed in the O&M Plan; ground water shall be monitored annually; groundwater wells (alternative point of compliance wells) shall be inspected semi-annually; final cover shall be inspected quarterly in the first year, semi-annually in the second and third years, and from the fourth year forward, annually; drainage system inspection shall be conducted on a quarterly basis; and the Non-Governmental Respondents shall review and reevaluate the remedial action after a period of 5 years from the date of completion and every 5 years thereafter.

• On June 15, 2010, DTSC issued a Removal Action Certification Form. DTSC determined that all appropriate removal/remedial action were completed and that all acceptable engineering practices implemented; however, the Site requires ongoing O&M and monitoring efforts according to the approved 2009 O&M Plan. O&M activities have been performed at the Site pursuant to 2005 I&SE-RAO and 2009 Consent Agreement, which includes annual groundwater monitoring, maintenance of groundwater monitoring systems, inspection and maintenance of the engineered asphalt cap, monitoring and maintenance of settlement monuments and drainage system inspection and maintenance, as well as associated reporting to DTSC. Alternative point of compliance wells have been monitored since 1999 and O&M activities, including post-closure monitoring and maintenance of AOC#1 and AOC#2, have been performed at the Site since February 2007, subsequent to completion of PCBs impacted soils removal and AOC capping activities.

Alternative point of compliance wells consist of five (5) monitoring wells. RMW-2 is located within the limits of the AOC#1 capped area. RMW-4 is located just beyond the southwestern facility boundary. RMW-5 is located to the southwest of the former Facility, south of RMW-4 and approximately 340 ft. from RMW-2. RMW-6 is located just beyond the northwestern facility boundary. RMW-7 is located approximately 320 ft. beyond the south.

Based on the information provided in the 2016 FYR Report, DTSC has concurred with the Non-Governmental Respondents' determination that: (i) the implemented remedy continues to be protective of human health; and (ii) the asphalt cover installed in the AOC#1 is currently preventing surface water infiltration that would promote/enhance percolation of chemical of concerns that may reside/be present in the unsaturated porous media beneath the asphalt cover.

Asphalt cover installed in AOC#2 was rectified to ensure that the remedy functions as intended. The following repairing actions were conducted at AOC#2: (i) placement of seal coat or binder in a gap between the REEC's southern perimeter wall and the ground surface along the AOC#2 northern limits; (ii) cleaning out gravels/vegetation that have been deposited/grown in the culvert outlets that transect the UPRR elevated rail track adjacent to the AOC#2 southern limits; and (iii) resealing the asphalt cover 2.

Groundwater elevations have decreased to levels below the alternative point of compliance (POC) monitoring wells' screens. Since 2014 this has prevented the Non-Governmental Respondents from collecting environmental groundwater samples to determine whether the remedy's objectives of protecting groundwater quality are being met.

Title: 2013 Annual Site Report
Title URL: https://www.envirostor.dtsc.ca.gov/public/final_documents2?global_id=19360068&doc_id=60390754
Document Type: Operation and Maintenance Report
Activity Type: Completed Activities
Date Completed: 1/29/2014
Comments: During calendar year 2013, inspections were performed at the Site on March 26, June 28, September 10 and December 10. Other activities performed during the 2013 calendar year included groundwater monitoring on March 15 and 16, 2012 and surveying of settlement markers on September 10, 2013.
During the groundwater monitoring event in March 2013, only the monitoring well RMW-2 had sufficient groundwater for purging and sample collection; wells RMW-4 through RMW-7 yielded insufficient water, therefore, they were not able to be sample during this event.

Title: Site Screening
Title URL:
Document Type: Site Screening
Activity Type: Completed Activities
Date Completed: 7/28/1993
Comments: LA County referred site to DTSC for state oversight on March 3, 1993. The county was responsible for the oversight of investigations over the last three years. The referral is based on the state's experience with GW investigations. Investigations indicate soil contamiantion as high as 2400 ppm, 17 ppb of PCB degredation products (ie. 1,4 - dichloro- benzene) in GW, and C12-C30 chains of oil as deep as twenty feet bgs in the saturated zone.

Potential Contamin of Concern:

DIOXIN (AS 2,3,7,8-TCDD TEQ)
POLYCHLORINATED BIPHENYLS (PCBS)
VOLATILE ORGANICS (8260B VOCS)

Site History:

The property is located at 8226 East Whittier Boulevard in Pico Rivera, California, bounded by Whittier Boulevard on the north, Van Norman Road on the west, the Union Pacific Railroad (UPRR) 12-15-foot elevated tracks on the south.

The Site is largely flat, at an elevation of approximately 170 feet above mean sea level, in an urbanized alluvial plain in the Los Angeles Basin. The Site is surrounded to the west and south by industrial facilities and to the north by small business, residences and a church.

From 1948 to the 1980s, REEC and its predecessor(s) reclaimed copper from the cores of used electrical transformers. Used old or surplus transformers were obtained from entities, including but not limited to, utility companies, municipalities and the federal government. On occasion, oils from transformers were released into the environment as the transformers were handled, reclaimed and/or stored.
Because of operations at the former facility, surface and subsurface soils were impacted with hazardous wastes such as polychlorinated biphenyls (PCBs), petroleum hydrocarbons, volatile organic compounds (VOCs), metals, dioxins and furans. These compounds were found in different matrix media as result of waste discharge to the surface. Previously investigations performed at the former Facility associated the presence of these compounds in different matrix media to oils from transformers formerly serviced at the site, maintenance activities and fugitive dust from on-site furnaces used to remove materials from recyclables.

Transformers were handled and stored on and adjacent to the former unpaved area located in the southeastern quadrant of the former Facility. Recycling furnaces were located approximately 70 feet (ft.) from the southeastern quadrant of the former Facility.
REEC relocated its operation from the Site in 2008. On or about July 6, 2010, the REEC's property was sold to Whittier Pine LLC by TC Pan (Whittier Pine LLC) and leased to Pacific Eagle Construction Supply Inc. (Pacific Eagle). Currently, the Site is used as a storage yard and staging area.

Site Regulatory History Regarding to the Presence of PCBs at the Site:

• From April 2, 1975 to March 30, 1983, City of Pico Rivera issued three Notices of Violations and Orders to Comply to the facility.

• On April 7, 1975, Los Angeles Regional Water Quality Control Board (LARWQCB) notified RECC that discharges of water used to cool transformers during copper recovery operations into an adjacent drainage ditch was not in accordance with the California Water Code.

• On April 6, 1981, Department of County Engineer – Facilities Sanitation Division issued an investigation report that wastewater from transformer washing operation was been discharged to the ground.

• On July 8, 1981, County of Los Angeles, Office of the District Attorney, Consumer and Environment Protection Division, notified the facility that the County of Los Angeles would file a lawsuit against REEC due multiple violations of Section 17200 of the California Business and Professions Code and have indicated that soil samples collected at the facility reported concentrations of PCBs ranging from 92 to 21,000 mg/kg.

• On January 10, 1984, USEPA, Region 9, issued a Toxic Substances Control Act (TSCA) PCB Investigation Report. The report indicated potential violations according to 40 CFR 761.180, since no annual document had been prepared for 1981, 1982 and 1983 covering shipments of PCB-contaminated soil and PCB capacitors.

• On March 27, 1984, County of Los Angeles, Department of Health Services issued a letter directing the facility to comply with California Health and Safety Code (HSC) sections 25189 and 25191.

• On June 22, 1984, State of California- Health and Welfare Agency, Department of Health Services issued a Notice of Violation and Directive to Comply to the facility.

• On January 1986, State of California- Health and Welfare Agency, Department of Health Services issued a Preliminary Assessment Summary. This document indicated that was unknown whether the Site had been adequately assessed for removal of contaminated soils. Off-site subsurface contamination was assessed as potentially extensive because of the facility's historical discharges of wastewater into the unlined Arroyo Ditch.

• On June 17, 1986, Ecology and Environment performed a site inspection under USEPA contract no. 68-01-6692. Inspection recommendations included referral of the Site to the United States Environmental Protection Agency (USEPA)'s enforcement section for possible TSCA violations, and referral to the local Health Department for additional sampling activities.

• On May 5, 1993, DTSC assumed lead agency status for REEC facility based on the fact there is known groundwater contamination and LARWQCB refused to accept oversight alleging that the environmental concerns at the subject property was more related to exposures and potential risk from soil and equipment contaminations, not groundwater concerns.

• On February 2, 1996, DTSC issued an Imminent and Substantial Endangerment Determination and Order and Remedial Action Order's (I&SE-RAO), Docket No. I&SE-RAO 05/06-002 to the Respondent (REEC). The purpose of this Order was to ensure that any release or threatened release of hazardous substances to the air, soil, surface water and ground water at or from the Site would be thoroughly investigated and that a plan to take appropriate removal/remedial actions would be prepared. DTSC alleged that the Responsible Party (REEC) and several other parties were potentially responsible for the contamination of the Site.

• From August 1997 through August 1999, a formal remedial investigation (RI) was conducted at the Site. Results from the RI indicated that the lateral and vertical extent of PCBs-impacted soil in the former unpaved area in the southeast quadrant was consistent with localized releases from previous operations at the facility. Released oil containing PCBs locally infiltrated the former unpaved area and seeped vertically into the deeper sandy soil vadose zone. The RI data indicated that the vertical distribution of PCBs with concentrations above 10 mg/kg extended to 60 feet below grade surface (bgs) near monitoring well RMW-2 and boring BD-1 (later converted into monitoring well RDW-1). The presence of PCBs in the porous media at a depth below the ground water was interpreted in the RI as result of past spills at periods of deep groundwater levels, due to recurrent groundwater piezometric elevation fluctuations, consequently, promoting a large smear profile area and inducing downward vertical transport of PCBs.

• The final Remedial Investigation/Feasibility Study (RI/FS) Report was submitted to the DTSC in October 1999, and was approved by the DTSC on June 18, 2000. A Remedial Action Plan (RAP) was submitted to DTSC in August 2003. The remedial actions proposed in the RAP included excavation and removal of PCB contaminated soils beneath specific areas of the Site, installation of an engineered cap, placement of a deed restriction on the property where contamination would be left in place at levels that prevent unrestricted use, and groundwater monitoring. The chosen remedy was implemented on both facility's area of concerns (AOC)#1 (the south-central portion of the former unpaved area located in the southeast corner of the Facility) and AOC#2 (along a surface drainage path adjacent to the south of the RECC's property within the railroad right-of-way). The RAP was approved by DTSC on December 16, 2004.

• On July 19, 2005, DTSC issued an I&SE-RAO, Docket No. I&SE-RAO 95/96-002, to the Respondents: REEC, Aaron Berman, an individual, Berman Steel Company, Pacific Gas and Electric Company, Southern California Edison Company, San Diego Gas and Electric, City of Anaheim, City of Los Angeles Department of Water and Power, City of Pasadena Water and Power Department, Sacramento Municipal Utility District and United States of America, by and through the Defense Logistics Agency. The Order determined that the Respondents must continue interim groundwater monitoring in accordance with DTSC's approved RAP, furnishing a Public Participation Plan, provide a Remedial Design (RD) describing in detail the technical and operational plans for implementation of the Final RAP, implementation of Final RAP, O&M requirements in accordance with the Final RAP and Five-Year Review to review and reevaluate the remedial action after a period of 5 years from the date of completion and every 5 years thereafter.

Because the Site will remain as an industrial parcel for foreseeable future, the Non-Governmental Respondents selected soil excavation of impacted soils at the two areas of concerns, off-site disposal of the unearthed soil materials to permitted facility(s) (landfill), installation of an engineering cap on both areas of concerns (AOCs), placement of a deed restriction on the properties where contamination will be left in place to allow oversight access to conduct groundwater monitoring and restrict beneficial end use. Additionally, long term post-closure groundwater monitoring and maintenance of AOC#1 and AOC#2 engineering caps were recommended to preclude unacceptable impacts to groundwater quality.

• The RAP was implemented from September 2006 through February 2007 and involved the removal and off-site disposal of some of the contaminated soil to permitted facility(s) (landfill). Both AOC#1 and AOC#2 excavation areas were backfilled with clean fill to meet requirements set forth on October 2001 DTSC's fact sheet "Information Advisory – Clean Fill Material", and covered with engineered surface cap.

Following excavation and back filling with clean soil, areas designed as AOCs were covered with an impermeable engineering cap. Final Closure Report was submitted to DTSC in April 2007 and approved in September 2007.

According to 2007 Final Closure Report, construction of AOC#1 engineered cap included final site grading, placement of cap foundation layer, base layer, and asphalt cover and associated drainage structures. Prior to placement of low permeability asphalt material at the areas of concern, a test batch was conducted at the asphalt batch plant and tested for conformance with the design mix and performance specifications. Testing results indicated that batch material met the performance for permeability, but had a lower than desired structural stability. Further, due to narrow space availability for construction within AOC#2, an alternate approach for achieving the cap permeability requirements was implemented. As a result, a double-coat pavement seal was placed over the low permeability mix asphalt in AOC#2. It was assumed that due to AOC#2 is in a non-traffic area, the seal coat would not experience any wear from point surface loads, such as vehicles.

• On October 12, 2009, a Covenant to restrict the use of a limited portion of former REEC property was made by and between Boardwalk Company, LLC (previous Site Owner) and DTSC pursuant to Civil Code section 1471. The restricted areas were located in the areas now generally bounded by a drainage ditch on the east, the northern boundary of the transformer repair building on the north, the machine shop on the west, and the UPRR's Right of Way on the south, containing the area referred to as AOC#).

• On October 28, 2009, a Covenant to restrict the use of property was made by and between the UPRR and DTSC pursuant to Civil Code section 1471. The property is a portion of Covenantor's railroad Right of Way, which is also generally describes as Los Angeles County Assessor's Parcel No. 6348-021-807, containing the area referred to as AOC#2.

• On November 30, 2009, DTSC, Non-Governmental Respondents, Local Governmental Respondents, and Federal Governmental Respondent entered into an Operation and Maintenance Consent Agreement (Consent Agreement), Docket No. HAS-CA 08/09-130, pursuant to HSC sections 25355.59a)(1)(C), 58009, and 58010, and sections 113(f)(2) and 113(f)(3)(B) of Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). The Consent Agreement directed that the Non-Governmental Respondent shall be responsible for carrying out all activities and obligations determined in the O&M Plan that was submitted to DTSC in April 2007 and approved in September 5, 2007. Among the scheduled activities listed in the O&M Plan; ground water shall be monitored annually; groundwater wells (alternative point of compliance wells) shall be inspected semi-annually; final cover shall be inspected quarterly in the first year, semi-annually in the second and third years, and from the fourth year forward, annually; drainage system inspection shall be conducted on a quarterly basis; and the Non-Governmental Respondents shall review and reevaluate the remedial action after a period of 5 years from the date of completion and every 5 years thereafter.

• On June 15, 2010, DTSC issued a Removal Action Certification Form. DTSC determined that all appropriate removal/remedial action were completed and that all acceptable engineering practices implemented; however, the Site requires ongoing O&M and monitoring efforts according to the approved 2009 O&M Plan. O&M activities have been performed at the Site pursuant to 2005 I&SE-RAO and 2009 Consent Agreement, which includes annual groundwater monitoring, maintenance of groundwater monitoring systems, inspection and maintenance of the engineered asphalt cap, monitoring and maintenance of settlement monuments and drainage system inspection and maintenance, as well as associated reporting to DTSC. Alternative point of compliance wells have been monitored since 1999 and O&M activities, including post-closure monitoring and maintenance of AOC#1 and AOC#2, have been performed at the Site since February 2007, subsequent to completion of PCBs impacted soils removal and AOC capping activities.

Alternative point of compliance wells consist of five (5) monitoring wells. RMW-2 is located within the limits of the AOC#1 capped area. RMW-4 is located just beyond the southwestern facility boundary. RMW-5 is located to the southwest of the former Facility, south of RMW-4 and approximately 340 ft. from RMW-2. RMW-6 is located just beyond the northwestern facility boundary. RMW-7 is located approximately 320 ft. beyond the south.

Based on the information provided in the 2016 FYR Report, DTSC has concurred with the Non-Governmental Respondents' determination that: (i) the implemented remedy continues to be protective of human health; and (ii) the asphalt cover installed in the AOC#1 is currently preventing surface water infiltration that would promote/enhance percolation of chemical of concerns that may reside/be present in the unsaturated porous media beneath the asphalt cover.

Asphalt cover installed in AOC#2 was rectified to ensure that the remedy functions as intended. The following repairing actions were conducted at AOC#2: (i) placement of seal coat or binder in a gap between the REEC's southern perimeter wall and the ground surface along the AOC#2 northern limits; (ii) cleaning out gravels/vegetation that have been deposited/grown in the culvert outlets that transect the UPRR elevated rail track adjacent to the AOC#2 southern limits; and (iii) resealing the asphalt cover 2.

Groundwater elevations have decreased to levels below the alternative point of compliance (POC) monitoring wells' screens. Since 2014 this has prevented the Non-Governmental Respondents from collecting environmental groundwater samples to determine whether the remedy's objectives of protecting groundwater quality are being met.

Comments: LA County referred site to DTSC for state oversight on March 3, 1993. The county was responsible for the oversight of investigations over the last three years. The referral is based on the state's experience with GW investigations. Investigations indicate soil contamiantion as high as 2400 ppm, 17 ppb of PCB degredation products (ie. 1,4 - dichloro- benzene) in GW, and C12-C30 chains of oil as deep as twenty feet bgs in the saturated zone.

Document Type: Operation and Maintenance Report
Date Completed: 1/29/2014
Comments: During calendar year 2013, inspections were performed at the Site on March 26, June 28, September 10 and December 10. Other activities performed during the 2013 calendar year included groundwater monitoring on March 15 and 16, 2012 and surveying of settlement markers on September 10, 2013.
During the groundwater monitoring event in March 2013, only the monitoring well RMW-2 had sufficient groundwater for purging and sample collection; wells RMW-4 through RMW-7 yielded insufficient water, therefore, they were not able to be sample during this event.

SAMPLE RESULTS SOIL SAMPLES: 11000 PPM PCB'S,21000PPM PCB'S. ON CORTESE LIST DHS Rcvd FIT SSI (REASSESSMENT)-EPA recommends NFA 9/12/90. INSPECTION(FED) EPA TSCA INSP. VIO FOR NOT REPORTING WASTES TRANSPORTED OFFSITE. CO CONFIRMS CLEAN UP ON 05-11-82. A consent order was signed between DTSC and 9 of the 10 PRPs for the site. The I&S/E Order was recinded for all those signing the consent order. The I&S/E order remains in effect for the 1 PRP not signing. Letters were sent to Rosen's and nine generators notifying them of their potential liability for the site and inform- ing them that they have 45 days to form a group and enter into an agreement with DTSC. Facility cited in 1981 for handling PCB capacitor without an EPA ID NO. Soil samples collected at SE corner of property showed 11,000 PPM PCB's. Remedial action revealed offsite contamination east of site in the unlined Arroyo ditch. 21,000 PPM PCBs found off-site north of railroad tracks. Capacitors and contaminated soil removed in 1982 under directive of LA County. Cited for additional discharge in 1983. Subsequent soil samples showed 600 PPM PCB's. Being evaluated for ranking/further cleanup SOURCE ACT: DHS INSP 1/3/86 Dismantling of transformers for reclamation of copper wire. Sale of waste oils. Yr of Oper: DHS/ASP Survey 11/16/81 1947 to present. Submit to EPA INSPECTION(LOCAL) CO PUB WRK. WASTEWATER DISCH TO UNLINED TRENCH.ORDERED TO CEASE & TO C-U. FAC WROTE LETTER 04/12/83. NOTIFYING REPAIRS & CLEANUP. INSPECTION(LOCAL)

CO PUB WRK. COMPLAINT RESPONSE. OBSERVED WASTE OIL DISCH TO GROUND. OFFSITE WASTE WATER DISCH. PARTIAL C-U 4/14/75. The RI/FS Workplan for the site was approved. Fifty additional samples and groundwater monitoring will be required for the first phase of the investigation. INSPECTION(LOCAL) CO REPRESENTATIVE STATES CONTAMINATED SOIL REMOVED TO PUENTE HILLS LDFL. WASTE WATER DISCH TO DRAINAGE CHANNEL. INSPECTION(LOCAL) CO PUB WRK. DISCH WASTEWTER INTO UNLINED STORM TRENCH. FACILITY IDENTIFIED FAC ID LACE CO ENGR. STORAGE & SCRAPING OF TRANSFORM PONDING OF LIQUIDS ON PROPERTY. Additional soil sampling both on-site and off-site completed. Two new groundwater monitoring wells placed both on-site and off-site to define groundwater contamination plume. INSPECTION(FED) EPA-FIT INSP. E&E C(86)C125. Recycle reformers contamination PCB's. Soil contamination remains, subsequent soil sample by DHS showed high PCBs still in site soil. 1984 warehouse fire may have spread contamination around site. Refer to DHS/ENF. 9/30/94 A database including pertinent information from PRPs who responded to the Department's Information Request Letter is being completed. An ISE Order is being prepared and will be issued to Rosen's and to those PRPs that the Department determines to be Responsible Parties. INSPECTION(LOCAL) REFERRAL TO DHS FROM CO HLTH. UNLAWFUL STORAGE & TRANSPORTATION OF WASTE. SOILS CONTAMINATED W/PCB'S. A Removal Action (RA) was completed at the site. The RA consisted of the installation of fencing to restrict public access to soil contaminated with polychlorinated biphenyls, metals and petroleum hydrocarbons. Warning signs in both English and Spanish were posted on the installed fencing. HRS package completed. SAMPLE RESULTS SOIL SAMPLES - 620 PPM PCB'S. The Remedial Investigation showed on-site PCB, dioxin-furan soil contamination; on-site PCB and VOC groundwater contamination; and off-site PCB soil and groundwater contamination. Detailed analysis of alternatives in the Feasibility Study included an asphalt cap, thermal blankets and wells, and excavation. ENFORCEMENT ACTION CO DISTRICT ATTORNEY THREATENS OPER W/ LAWSUIT.CASE DROPPED 1/82. LA County referred site to DTSC for state oversight on March 3, 1993. The county was responsible for the oversight of investigations over the last three years. The referral is based on the state's experience with GW investigations. Investigations indicate soil contamiantion as high as 2400 ppm, 17 ppb of PCB degredation products (ie. 1,4 - dichloro- benzene) in GW, and C12-C30 chains of oil as deep as twenty feet bgs in the saturated zone. REPORTED FOR PROP65 A database including pertinent information from PRPs who responded to the Department's Information Request Letter is being completed. An I & SE Order is being prepared and will be issued to Rosen's Electrical Equipment and to those PRPs that the Department determines to be Responsible Parties. Q RETURNED - SCRAPING OF TRANSFORMERS, ELECT EQUIP. WHOLESALE. PCB STORAGFE PERMIT #3-2147. INSPECTION(LOCAL) CO HLTH. ELEVATED PCB LEVELS IN STORM DRAIN. A meeting was held among the Department, the site owner, and parties who sent transformers to Rosen Electric. The Department announced that, up to the time of the meeting, there was insufficient information to name any of the parites except Rosen Electric as a PRP. The Department sent out information request letters to identified PRPs. Rosen Electric's attorney presents new information on the parties who sent transformers to Rosen Electric. Facility Drive-by. Secured site, unable to adequately see in- side. Evidence of a large number of stored drums. Final Strategy SITE REFERRED: TO HWMB/ENF The RAP includes excavation of 4,000 cu. yds. of PCB-contaminated soil, cap, deed restriction, ground water monitoring - Public comments were addressed.

An Initial Study, Negative Declaration, and De Minimus Finding were completed for this PCB-contaminated site. No comments on the draft Negative Declaration were received. After extensive efforts to negotiate a consent order were not successful, DTSC issued an imminent and substantial endanger- ment determination and remedial action order for the Rosen's Electrical Equipment Company Site. The consultant for the RP group is preparing a revised Risk Assessment for the Remedial Investigation and Fesibility Study (RI/FS).

Background:

LA County was responsible for the oversight of investigations that occurred in the past. The county referred the site to the Department for state oversight on March 3, 1993 based on the state's experience with groundwater investigations. Investi- gations indicate PCB soil contamination as high as 2400 ppm; 17 ppb (1,4 - dichlorobenzene) in groundwater; and C12-C30 chains of oil as deep as 20 feet bgs in the saturated zone.

In 1996 a Consent Order was issued to nine RPs to investigate the site. The RI/FS was campleted in 1997, and concluded that PB soil and groundwater contamination existed int he Southeastern corner that pose a risk to human health. A RAP approved in 2004 chose excavation of soil, groundwater monitoring, capping and placement of a deed restriction on the property.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

Formerly Utilized Sites Remedial Action Program: DOE FUSRAP

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

Government Publication Date: Mar 4, 2017

National Priority List: NPL

National Priorities List (Superfund)-NPL: EPA's (United States Environmental Protection Agency) list of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action.

Government Publication Date: Aug 25, 2021

National Priority List - Proposed: PROPOSED NPL

Includes sites proposed (by the EPA, the state, or concerned citizens) for addition to the NPL due to contamination by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment.

Government Publication Date: Aug 25, 2021

Deleted NPL: DELETED NPL

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Government Publication Date: Aug 25, 2021

SEMS List 8R Active Site Inventory: SEMS

The Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted.

Government Publication Date: Jul 29, 2021

SEMS List 8R Archive Sites: SEMS ARCHIVE

The Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

Government Publication Date: Jul 29, 2021

Inventory of Open Dumps, June 1985: ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

Comprehensive Environmental Response, Compensation and Liability Information System - CERCLIS: CERCLIS

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands: IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned: CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens: CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action: RCRA CORRACTS

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Jun 14, 2021

RCRA non-CORRACTS TSD Facilities: RCRA TSD

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

Government Publication Date: Jun 14, 2021

RCRA Generator List: RCRA LQG

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Jun 14, 2021

RCRA Small Quantity Generators List: RCRA SQG

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Jun 14, 2021

RCRA Very Small Quantity Generators List: RCRA VSQG

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Jun 14, 2021

RCRA Non-Generators: RCRA NON GEN

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Jun 14, 2021

Federal Engineering Controls-ECs: FED ENG

Engineering controls (ECs) encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Feb 23, 2021

Federal Institutional Controls- ICs: FED INST

Institutional controls are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's (United States Environmental Protection Agency) expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site.

Government Publication Date: Feb 23, 2021

Land Use Control Information System: LUCIS

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

Government Publication Date: Sep 1, 2006

Emergency Response Notification System: ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System: ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System: ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Jul 26, 2021

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database: FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Aug 20, 2021

FEMA Underground Storage Tank Listing: FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Facility Response Plan: FRP

List of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Dec 2, 2020

Historical Gas Stations: HIST GAS STATIONS

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries: REFN

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

Government Publication Date: Jul 10, 2020

Petroleum Product and Crude Oil Rail Terminals: BULK TERMINAL

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

Government Publication Date: Apr 28, 2020

LIEN on Property: SEMS LIEN

The EPA Superfund Enterprise Management System (SEMS) provides LIEN information on properties under the EPA Superfund Program.

Government Publication Date: Jul 29, 2021

Superfund Decision Documents: SUPERFUND ROD

This database contains a listing of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD), along with other associated memos and files. This information is maintained and made available by the US EPA (Environmental Protection Agency).

Government Publication Date: Jun 28, 2021

State

State Response Sites: RESPONSE

A list of identified confirmed release sites where the Department of Toxic Substances Control (DTSC) is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. This database is state equivalent NPL.

Government Publication Date: Jun 14, 2021

EnviroStor Database: ENVIROSTOR

The EnviroStor Data Management System is made available by the Department of Toxic Substances Control (DTSC). Includes Corrective Action sites, Tiered Permit sites, Historical Sites and Evaluation/Investigation sites. This database is state equivalent CERCLIS.

Government Publication Date: Jun 14, 2021

Delisted State Response Sites: DELISTED ENVS

Sites removed from the list of State Response Sites made available by the EnviroStor Data Management System, Department of Toxic Substances Control (DTSC).

Government Publication Date: Jun 14, 2021

Solid Waste Information System (SWIS): SWF/LF

The Solid Waste Information System (SWIS) database made available by the Department of Resources Recycling and Recovery (CalRecycle) contains information on solid waste facilities, operations, and disposal sites throughout the State of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites.

Government Publication Date: Jul 20, 2021

Solid Waste Disposal Sites with Waste Constituents Above Hazardous Waste Levels: SWRCB SWF

This is a list of solid waste disposal sites identified by California State Water Resources Control Board with waste constituents above hazardous waste levels outside the waste management unit.

Government Publication Date: Sep 20, 2006

EnviroStor Hazardous Waste Facilities: HWP

A list of hazardous waste facilities including permitted, post-closure and historical facilities found in the Department of Toxic Substances Control (DTSC) EnviroStor database.

Government Publication Date: Jun 14, 2021

Sites Listed in the Solid Waste Assessment Test (SWAT) Program Report: SWAT

In a 1993 Memorandum of Understanding, the State Water Resources Control Board (SWRCB) agreed to submit a comprehensive report on the Solid Waste Assessment Test (SWAT) Program to the California Integrated Waste Management Board (CIWMB). This report summarizes the work completed to date on the SWAT Program, and addresses both the impacts that leakage from solid waste disposal sites (SWDS) may have upon waters of the State and the actions taken to address such leakage.

Government Publication Date: Dec 31, 1995

Construction and Demolition Debris Recyclers: C&D DEBRIS RECY

This listing of Construction and Demolition Debris Recyclers is maintained by the California Intergrated Waste Management Board-common C&D materials include lumber, drywall, metals, masonry (brick, concrete, etc.), carpet, plastic, pipe, rocks, dirt, paper, cardboard, or green waste related to land development.

Government Publication Date: Jun 20, 2018

Recycling Centers: RECYCLING

This list of Certified Recycling Centers that are operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Nov 2, 2020

Listing of Certified Processors: PROCESSORS

This list of Certified Processors that are operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Oct 27, 2020

Listing of Certified Dropoff, Collection, and Community Service Programs: CONTAINER RECY

This list of Certified Dropoff, Collection, and Community Service Programs (non-buyback) operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Dec 16, 2020

Land Disposal Sites: LDS

Land Disposal Sites in GeoTracker, the State Water Resources Control Board (SWRCB)'s data management system. The Land Disposal program regulates of waste discharge to land for treatment, storage and disposal in waste management units. Waste management units include waste piles, surface impoundments, and landfills.

Government Publication Date: Jun 22, 2021

Leaking Underground Fuel Tank Reports: LUST

List of Leaking Underground Storage Tanks within the Cleanup Sites data in GeoTracker database. GeoTracker is the State Water Resources Control Board's (SWRCB) data management system for managing sites that impact groundwater, especially those that require groundwater cleanup (Underground Storage Tanks, Department of Defense and Site Cleanup Program) as well as permitted facilities such as operating Underground Storage Tanks. The Leak Prevention Program that overlooks LUST sites is the SWRCB in California's Environmental Protection Agency.

Government Publication Date: Jun 22, 2021

Delisted Leaking Storage Tanks: DELISTED LST

List of Leaking Underground Storage Tanks (LUST) cleanup sites removed from GeoTracker, the State Water Resources Control Board (SWRCB)'s database system, as well as sites removed from the SWRCB's list of UST Case closures.

Government Publication Date: Jun 22, 2021

Permitted Underground Storage Tank (UST) in GeoTracker: UST

List of Permitted Underground Storage Tank (UST) sites made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA).

Government Publication Date: Jul 25, 2021

Proposed Closure of Underground Storage Tank Cases: UST CLOSURE

List of UST cases that are being considered for closure by either the California Environmental Protection Agency, State Water Resources Control Board or the Executive Director that have been posted for a 60-day public comment period.

Government Publication Date: May 5, 2021

Historical Hazardous Substance Storage Information Database: HHSS

The Historical Hazardous Substance Storage database contains information collected in the 1980s from facilities that stored hazardous substances. The information was originally collected on paper forms, was later transferred to microfiche, and recently indexed as a searchable database. When using this database, please be aware that it is based upon self-reported information submitted by facilities which has not been independently verified. It is unlikely that every facility responded to the survey and the database should not be expected to be a complete inventory of all facilities that were operating at that time. This database is maintained by the California State Water Resources Control Board's (SWRCB) Geotracker.

Government Publication Date: Aug 27, 2015

Statewide Environmental Evaluation and Planning System: UST SWEEPS

The Statewide Environmental Evaluation and Planning System (SWEEPS) is a historical listing of active and inactive underground storage tanks made available by the California State Water Resources Control Board (SWRCB).

Government Publication Date: Oct 1, 1994

Aboveground Storage Tanks: AST

A statewide list from 2009 of aboveground storage tanks (ASTs) made available by the Cal FIRE Office of the State Fire Marshal (OSFM). This list is no longer maintained or updated by the Cal FIRE OSFM.

Government Publication Date: Aug 31, 2009

SWRCB Historical Aboveground Storage Tanks: AST SWRCB

A list of aboveground storage tanks made available by the California State Water Resources Control Board (SWRCB). Effective January 1, 2008, the Certified Unified Program Agencies (CUPAs) are vested with the responsibility and authority to implement the Aboveground Petroleum Storage Act (APSA).

Government Publication Date: Dec 1, 2007

Oil and Gas Facility Tanks: TANK OIL GAS

Locations of oil and gas tanks that fall under the jurisdiction of the Geologic Energy Management Division of the California Department of Conservation (CalGEM) (CCR 1760). CalGEM was formerly the Division of Oil, Gas, and Geothermal Resources (DOGGR).

Government Publication Date: Sep 13, 2021

Delisted Storage Tanks: DELISTED TNK

This database contains a list of storage tank sites that were removed by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA) and the Cal FIRE Office of State Fire Marshal (OSFM).

Government Publication Date: Sep 13, 2021

California Environmental Reporting System (CERS) Tanks: CERS TANK

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Sep 24, 2021

Delisted California Environmental Reporting System (CERS) Tanks: DELISTED CTNK

This database contains a list of Aboveground Petroleum Storage and Underground Storage Tank sites that were removed from in the California Environmental Protection Agency (CalEPA) Regulated Site Portal.

Government Publication Date: Sep 24, 2021

Historical Hazardous Substance Storage Container Information - Facility Summary: HIST TANK

The State Water Resources Control Board maintained the Hazardous Substance Storage Containers listing and inventory in th 1980s. This facility summary lists historic tank sites where the following container types were present: farm motor vehicle fuel tanks; waste tanks; sumps; pits, ponds, lagoons, and others; and all other product tanks. This set, published in May 1988, lists facility and owner information, as well as the number of containers. This data is historic and will not be updated.

Government Publication Date: May 27, 1988

Site Mitigation and Brownfields Reuse Program Facility Sites with Land Use Restrictions: LUR

The Department of Toxic Substances Control (DTSC) Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents land use restrictions that are active. Some sites have multiple land use restrictions.

Government Publication Date: Jun 14, 2021

CALSITES Database: CALSITES

This historical database was maintained by the Department of Toxic Substance Control (DTSC) for more than a decade. CALSITES contains information on Brownfield properties with confirmed or potential hazardous contamination. In 2006, DTSC introduced EnviroStor as the latest Brownfields site database.

Government Publication Date: May 1, 2004

Hazardous Waste Management Program Facility Sites with Deed / Land Use Restrictions: HLUR

The Department of Toxic Substances Control (DTSC) Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Government Publication Date: Feb 18, 2021

Deed Restrictions and Land Use Restrictions: DEED

List of Deed Restrictions, Land Use Restrictions and Covenants in GeoTracker made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency. A deed restriction (land use covenant) may be required to facilitate the remediation of past environmental contamination and to protect human health and the environment by reducing the risk of exposure to residual hazardous materials.

Government Publication Date: Jun 22, 2021

Voluntary Cleanup Program: VCP

List of sites in the Voluntary Cleanup Program made available by the Department of Toxic Substances and Control (DTSC). The Voluntary Cleanup Program was designed to respond to lower priority sites. Under the Voluntary Cleanup Program, DTSC enters site-specific agreements with project proponents for DTSC oversight of site assessment, investigation, and/or removal or remediation activities, and the project proponents agree to pay DTSC's reasonable costs for those services.

Government Publication Date: Jun 14, 2021

GeoTracker Cleanup Program Sites: CLEANUP SITES

A list of Cleanup Program sites in the state of California made available by The State Water Resources Control Board (SWRCB) of the California Environmental Protection Agency (EPA). SWRCB tracks leaking underground storage tank cleanups as well as other water board cleanups.

Government Publication Date: Jun 22, 2021

Delisted County Records: DELISTED COUNTY

Records removed from county or CUPA databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.

Government Publication Date: Oct 7, 2021

Tribal

Leaking Underground Storage Tanks (LUSTs) on Indian Lands: INDIAN LUST
LUSTs on Tribal/Indian Lands in Region 9, which includes California.
Government Publication Date: Apr 8, 2020

Underground Storage Tanks (USTs) on Indian Lands: INDIAN UST
USTs on Tribal/Indian Lands in Region 9, which includes California.
Government Publication Date: Apr 8, 2020

Delisted Tribal Leaking Storage Tanks: DELISTED ILST
Leaking Underground Storage Tank facilities which have been removed from the Regional Tribal LUST lists made available by the EPA.
Government Publication Date: Apr 14, 2020

Delisted Tribal Underground Storage Tanks: DELISTED IUST
Underground Storage Tank facilities which have been removed from the Regional Tribal UST lists made available by the EPA.
Government Publication Date: Apr 14, 2020

County

Los Angeles County - Site Mitigation List: SML LA
A Site Mitigation List in the County of Los Angeles. The list is made available by Los Angeles County Fire Department. Site mitigation is handled by the Site Mitigation Unit (SMU) which facilitates completion of site clean-up projects of contaminated sites in an expeditious manner in all cities of the Los Angeles County except El Segundo, Glendale, Long Beach, Santa Fe Springs, and Vernon.
Government Publication Date: Mar 2, 2021

Los Angeles County - Solid Waste Sites: SWF LA COUNTY
List of permitted solid waste facilities, closed landfills, historical dumpsites and other solid waste sites in Los Angeles County, made available by the Department of Public Works in Los Angeles County.
Government Publication Date: Jun 18, 2021

Los Angeles County - CUPA Program Records: CUPA LA COUNTY
A list of inspection and enforcement records for active and inactive CUPA Program facilities, made available by the Health Hazardous Materials Division (HHMD) of the County of Los Angeles Fire Department. Includes Hazardous Materials Business Plan (HMBP), California Accidental Release Prevention Plan (CalARP), Hazardous Waste Generator (HWG), and the Aboveground Petroleum Storage Act Programs (APSA). Inactive programs include facilities that are out of business or no longer regulated by the HHMD.
Government Publication Date: Mar 25, 2020

Los Angeles County - HMS List: HMS LA
List of sites in the Los Angeles County Department of Public Works Hazardous Materials System (HMS) Database which have or have had permits for Industrial Waste, Underground Storage Tanks, or Stormwater in the county of Los Angeles.
Government Publication Date: Nov 5, 2020

Los Angeles County - Santa Fe Springs Underground Storage Tank: UST SANTAFESP
A list of registered active Underground Storage Tanks (USTs) in the City of Santa Fe Springs. This list is made available by Santa Fe Springs Department of Fire-Rescue.
Government Publication Date: Jul 19, 2021

Los Angeles County - Long Beach UST List: UST LONGB
List of registered Underground Storage Tanks (USTs) in the City of Long Beach, Los Angeles County, made available by the Long Beach Certified Unified Program Agency (CUPA). The Long Beach CUPA operates under oversight shared by the Long Beach Fire Department and Health Department.
Government Publication Date: Jul 9, 2018

Los Angeles County - Burbank City CUPA List: CUPA BURBANK

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in the City of Burbank. This list is made available by the City of Burbank Fire Department.

Government Publication Date: Aug 21, 2019

Los Angeles County - El Segundo City Underground Storage Tanks List: UST ELSEGUNDO

List of registered Underground Storage Tanks (USTs) in the City of El Segundo of Los Angeles County, made available by El Segundo City Fire Department.

Government Publication Date: Jan 17, 2017

Los Angeles County - Santa Monica City Underground Storage Tank List: UST SANTA MONICA

A list of registered active Underground Storage Tanks (USTs) in the City of Santa Monica made available by Santa Monica Fire Prevention Division.

Government Publication Date: Dec 3, 2020

Los Angeles County - Santa Monica City Aboveground Storage Tank List: AST SANTAMON

List of registered Aboveground Storage Tanks (ASTs) made available by the Santa Monica Fire Department in the City of Santa Monica of Los Angeles County, California.

Government Publication Date: Dec 3, 2020

Los Angeles County - Santa Monica City CUPA Facilities List: CUPA SANTAMON

The Santa Monica Fire Department's office maintains a list of CUPA Facilities located in Santa Monica city.

Government Publication Date: Dec 3, 2020

Los Angeles County - Torrance City Underground Storage Tanks: UST TORRANCE

A list of registered Underground Storage Tank (UST) sites in Torrance City of Los Angeles County. This list is made available by Torrance City Office of Clerk.

Government Publication Date: Feb 2, 2021

Los Angeles County - Vernon City UST List: UST VERNON

A list of Underground Storage Tanks (UST) in Vernon City provided by the Vernon City Fire Department.

Government Publication Date: Jun 7, 2021

Los Angeles County - Vernon City CUPA List: CUPA VERNON

The Vernon City Fire Department's office maintains a list of CUPA Facilities located in Vernon city.

Government Publication Date: Jun 3, 2021

Los Angeles County - City of Los Angeles UST List: UST LA CITY

A list of active and inactive underground storage tank facilities made available by the Los Angeles Fire Department CUPA.

Government Publication Date: Jun 1, 2019

Los Angeles County - City of Los Angeles AST List: AST LA CITY

A list of active and inactive above ground petroleum storage tanks made available by the Los Angeles Fire Department CUPA.

Government Publication Date: Jun 1, 2019

Los Angeles County - City of Los Angeles Hazardous Materials Facilities: HAZMAT LA CITY

A list of active and inactive hazardous materials facilities made available by the Los Angeles Fire Department CUPA.

Government Publication Date: Jun 1, 2019

Additional Environmental Record Sources

Federal

PFOA/PFOS Contaminated Sites: PFAS NPL

List of sites where PFOA or PFOS contaminants have been found in drinking water or soil. Made available by the Federal Environmental Protection Agency (EPA).

Government Publication Date: Sep 17, 2021

Facility Registry Service/Facility Index: FINDS/FRS

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Nov 2, 2020

Toxics Release Inventory (TRI) Program: TRIS

The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U. S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

Government Publication Date: Aug 24, 2021

Perfluorinated Alkyl Substances (PFAS) Releases: PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a Per- or polyfluorinated alkyl substance (PFAS) included in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances. The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment.

Government Publication Date: Aug 24, 2021

Perfluorinated Alkyl Substances (PFAS) Water Quality: PFAS WATER

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances.

Government Publication Date: Jul 20, 2020

Hazardous Materials Information Reporting System: HMIRS

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

Government Publication Date: Sep 1, 2020

National Clandestine Drug Labs: NCDL

The U.S. Department of Justice ("the Department") provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Oct 5, 2020

Toxic Substances Control Act: TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Apr 11, 2019

Hist TSCA: HIST TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing: FTTS ADMIN

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing: FTTS INSP

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List: PRP

Early in the cleanup process, the Environmental Protection Agency (EPA) conducts a search to find the potentially responsible parties (PRPs). EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site.

Government Publication Date: Jun 25, 2021

State Coalition for Remediation of Drycleaners Listing: SCRD DRYCLEANER

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS): ICIS

The Integrated Compliance Information System (ICIS) is a system that provides information for the Federal Enforcement and Compliance (FE&C) and the National Pollutant Discharge Elimination System (NPDES) programs. The FE&C component supports the Environmental Protection Agency's (EPA) Civil Enforcement and Compliance program activities. These activities include Compliance Assistance, Compliance Monitoring and Enforcement. The NPDES program supports tracking of NPDES permits, limits, discharge monitoring data and other program reports.

Government Publication Date: Jun 14, 2021

Drycleaner Facilities: FED DRYCLEANERS

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) online search. The Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: May 5, 2021

Delisted Drycleaner Facilities: DELISTED FED DRY

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: May 5, 2021

Formerly Used Defense Sites: FUDS

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DoD) is responsible for an environmental restoration. This list is published by the U.S. Army Corps of Engineers.

Government Publication Date: May 26, 2021

Former Military Nike Missile Sites: FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 2, 1984

PHMSA Pipeline Safety Flagged Incidents: PIPELINE INCIDENT

A list of flagged pipeline incidents made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types.

Government Publication Date: Jul 7, 2020

Material Licensing Tracking System (MLTS): MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: May 11, 2021

Historic Material Licensing Tracking System (MLTS) sites: HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File: MINES

The Master Index File (MIF) contains mine identification numbers issued by the Department of Labor Mine Safety and Health Administration (MSHA) for mines active or opened since 1971. Note that addresses may or may not correspond with the physical location of the mine itself.

Government Publication Date: Nov 3, 2020

Surface Mining Control and Reclamation Act Sites: SMCRA

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of Abandoned Mine Land (AML) impacts, as well as information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Government Publication Date: Dec 18, 2020

Mineral Resource Data System: MRDS

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2006

Uranium Mill Tailings Radiation Control Act Sites: URANIUM

The Legacy Management Office of the Department of Energy (DOE) manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The L.M. Office manages this database of sites registered under the Uranium Mill Tailings Control Act (UMTRCA).

Government Publication Date: Mar 4, 2017

Alternative Fueling Stations: ALT FUELS

List of alternative fueling stations made available by the US Department of Energy's Office of Energy Efficiency & Renewable Energy. Includes Biodiesel stations, Ethanol (E85) stations, Liquefied Petroleum Gas (Propane) stations, Ethanol (E85) stations, Natural Gas stations, Hydrogen stations, and Electric Vehicle Supply Equipment (EVSE). The National Renewable Energy Laboratory (NREL) obtains information about new stations from trade media, Clean Cities coordinators, a Submit New Station form on the Station Locator website, and through collaborating with infrastructure equipment and fuel providers, original equipment manufacturers (OEMs), and industry groups.

Government Publication Date: Jul 12, 2021

Registered Pesticide Establishments: SSTS

List of active EPA-registered foreign and domestic pesticide-producing and device-producing establishments based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that facilities producing pesticides, active ingredients, or devices be registered. The list of establishments is made available by the EPA.

Government Publication Date: Apr 13, 2021

Polychlorinated Biphenyl (PCB) Notifiers: PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: Nov 19, 2020

State

Dry Cleaning Facilities: DRYCLEANERS

A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial, linen supply, commercial laundry, dry cleaning and pressing machines - Coin Operated Laundry and Dry Cleaning. This is provided by the Department of Toxic Substance Control.

Government Publication Date: Aug 27, 2021

Delisted Drycleaners: DELISTED DRYCLEANERS

Sites removed from the list of drycleaner related facilities that have EPA ID numbers, made available by the California Department of Toxic Substance Control.

Government Publication Date: Aug 27, 2021

Non-Toxic Dry Cleaning Incentive Program: DRYC GRANT

A list of grant recipients of the Non-Toxic Dry Cleaning Incentive Program made available by the California Air Resources Board (CARB). The program provides grants to eligible dry cleaning businesses to assist them in transitioning away from PERC machines to alternative non-toxic and non-smog forming technologies.

Government Publication Date: Feb 28, 2018

Per- and Polyfluoroalkyl Substances (PFAS): PFAS

List of sites from the State Water Resources Control Board (SWRCB)'s GeoTracker at which one or more of the potential contaminants of concern are in the PFAS Master List of PFAS Substances made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Jun 22, 2021

PFOA/PFOS Groundwater: PFAS GW

A list of water wells from the Groundwater Ambient Monitoring and Assessment Program (GAMA) Groundwater Information System with the groundwater chemical perfluorooctanoic acid (PFOA) (NL = 0.014 UG/L) or perfluorooctanoic sulfonate (PFOS) (NL = 0.013 UG/L). The GAMA Groundwater Information System search is made available by California Water Boards.

Government Publication Date: Oct 22, 2020

Hazardous Waste and Substances Site List - Site Cleanup: HWSS CLEANUP

The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements in providing information about the location of hazardous materials release sites. This list is published by California Department of Toxic Substance Control.

Government Publication Date: May 20, 2021

List of Hazardous Waste Facilities Subject to Corrective Action: DTSC HWF

This is a list of hazardous waste facilities identified in Health and Safety Code (HSC) § 25187.5. These facilities are those where Department of Toxic Substances Control (DTSC) has taken or contracted for corrective action because a facility owner/operator has failed to comply with a date for taking corrective action in an order issued under HSC § 25187, or because DTSC determined that immediate corrective action was necessary to abate an imminent or substantial endangerment.

Government Publication Date: Jul 18, 2016

EnviroStor Inspection, Compliance, and Enforcement: INSP COMP ENF

A list of permitted facilities with inspections and enforcements tracked in the Department of Toxic Substance Control (DTSC) EnviroStor.

Government Publication Date: Apr 29, 2021

School Property Evaluation Program Sites: SCH

A list of sites registered with The Department of Toxic Substances Control (DTSC) School Property Evaluation and Cleanup (SPEC) Division. SPEC is responsible for assessing, investigating and cleaning up proposed school sites. The Division ensures that selected properties are free of contamination or, if the properties were previously contaminated, that they have been cleaned up to a level that protects the students and staff who will occupy the new school.

Government Publication Date: Jun 14, 2021

California Hazardous Material Incident Report System (CHMIRS): CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS). This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Aug 1, 2021

Historical California Hazardous Material Incident Report System (CHMIRS): HIST CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS) prior to 1993. This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Jan 1, 1993

Hazardous Waste Manifest Data: HAZNET

A list of hazardous waste manifests received each year by Department of Toxic Substances Control (DTSC). The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Government Publication Date: Oct 24, 2016

Historical Hazardous Waste Manifest Data: HIST MANIFEST

A list of historic hazardous waste manifests received by the Department of Toxic Substances Control (DTSC) from year the 1980 to 1992. The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Government Publication Date: Dec 31, 1992

DTSC Registered Hazardous Waste Transporters: HW TRANSPORT

The California Department of Toxic Substances Control (DTSC) maintains this list of Registered Hazardous Waste Transporters.

Government Publication Date: Oct 19, 2020

Registered Waste Tire Haulers: WASTE TIRE

This list of registered waste tire haulers is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Dec 16, 2020

California Medical Waste Management Program Facility List: MEDICAL WASTE

This list of Medical Waste Management Program Facilities is maintained by the California Department of Public Health. The Medical Waste Management Program (MWMP) regulates the generation, handling, storage, treatment, and disposal of medical waste by providing oversight for the implementation of the Medical Waste Management Act (MWMA). The MWMP permits and inspects all medical waste off-site treatment facilities, medical waste transporters, and medical waste transfer stations. This list contains transporters, treatment, and transfer facilities.

Government Publication Date: Dec 31, 2020

Historical Cortese List: HIST CORTESE

List of sites which were once included on the Cortese list. The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements for providing information about the location of hazardous sites.

Government Publication Date: Nov 13, 2008

Cease and Desist Orders and Cleanup and Abatement Orders: CDO/CAO

The California Environment Protection Agency "Cortese List" of active Cease and Desist Orders (CDO) and Cleanup and Abatement Orders (CAO). This list contains many CDOs and CAOs that do NOT concern the discharge of wastes that are hazardous materials. Many of the listed orders concern, as examples, discharges of domestic sewage, food processing wastes, or sediment that do not contain hazardous materials, but the Water Boards' database does not distinguish between these types of orders.

Government Publication Date: Jul 19, 2020

California Environmental Reporting System (CERS) Hazardous Waste Sites: CERS HAZ

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Sep 24, 2021

Delisted Environmental Reporting System (CERS) Hazardous Waste Sites: DELISTED HAZ

This database contains a list of sites that were removed from the California Environmental Protection Agency (CalEPA) in the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator.

Government Publication Date: Nov 29, 2018

Sites in GeoTracker: GEOTRACKER

GeoTracker is the State Water Resource Control Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater. This is a list of sites in GeoTracker that aren't otherwise categorized as LUST, Land Disposal Sites (LDS), Cleanup Sites, or sites having Waste Discharge Requirements (WDR). This listing includes program types such as Underground Injection Control (UIC), Confined Animal Facilities (CAF), Irrigated Lands Regulatory Program, plans, and non-case information.

Government Publication Date: Jun 22, 2021

Mines Listing: MINE

This list includes mine site locations extracted from the Mines Online database, maintained by the California Department of Conservation. Mines Online (MOL) is an interactive web map designed with GIS features that provide information such as the mine name, mine status, commodity sold, location, and other mine specific data. Please note: Mine location information is provided to assist experts in determining the location of mine operators in accordance with California Civil Code section 1103.4 and reflects information reported by mine operators in annual reports provided under Public Resources Code section 2207. While the Division of Mine Reclamation (DMR) attempts to populate MOL with accurate location information, the DMR cannot guarantee the accuracy of operator reported location information.

Government Publication Date: Jan 12, 2021

Recorded Environmental Cleanup Liens: LIEN

The California Department of Toxic Substance Control (DTSC) maintains this list of liens placed upon real properties. A lien is utilized by the DTSC to obtain reimbursement from responsible parties for costs associated with the remediation of contaminated properties.

Government Publication Date: Nov 16, 2020

Waste Discharge Requirements: WASTE DISCHG

List of sites in California State Water Resources Control Board (SWRCB) Waste Discharge Requirements (WDRs) Program in California, made available by the SWRCB via GeoTracker. The WDR program regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

Government Publication Date: Jun 22, 2021

Toxic Pollutant Emissions Facilities: EMISSIONS

A list of criteria and toxic pollutant emissions data for facilities in California made available by the California Environmental Protection Agency - Air Resources Board (ARB). Risk data may be based on previous inventory submittals. The toxics data are submitted to the ARB by the local air districts as requirement of the Air Toxics "Hot Spots" Program. This program requires emission inventory updates every four years.

Government Publication Date: Dec 31, 2019

Clandestine Drug Lab Sites: CDL

The Department of Toxic Substances Control (DTSC) maintains a listing of drug lab sites. DTSC is responsible for removal and disposal of hazardous substances discovered by law enforcement officials while investigating illegal/clandestine drug laboratories.

Government Publication Date: Jan 19, 2021

Tribal

No Tribal additional environmental record sources available for this State.

County

Los Angeles County - Santa Monica City Hazardous Materials Facilities: HAZMAT SANTAMON

A list of Hazardous Materials Facilities in the City of Santa Monica, Los Angeles county. This list is made available by Santa Monica Fire Prevention Division which has been designated as the CUPA for the City.

Government Publication Date: Mar 12, 2020

Los Angeles County - Santa Monica City Hazardous Waste Facilities: HAZ WST SANTAMON

A list of Hazardous Waste Facilities in Los Angeles County, City of Santa Monica. This list is made available by Santa Monica Fire Prevention Division.

Government Publication Date: Dec 3, 2020

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Appendix H - Lien Search

ORDER NO. : 2676021408

EXHIBIT A

The land referred to is situated in the County of Los Angeles, City of Montebello, State of California, and is described as follows:

THAT PORTION OF LOT "B" OF MONTEBELLO, IN THE CITY OF MONTEBELLO, AS PER MAP RECORDED IN BOOK 78 PAGE 19 OF MISCELLANEOUS RECORDS, IN THE OFFICE OF THE COUNTY RECORDER OF SAID COUNTY, DESCRIBED AS FOLLOWS:

BEGINNING AT THE SOUTHWEST CORNER OF LOT 102 OF SAID MONTEBELLO, THENCE SOUTH 75° 53' 40" EAST ALONG THE SOUTHERLY LINE OF SAID LOT 102, 300 00 FEET, THENCE SOUTHWESTERLY 277 94 FEET, MORE OR LESS, TO THE NORTHEAST CORNER OF THE LAND CONVEYED TO W. W. BLACK, BY DEED RECORDED IN BOOK 6621 PAGE 288 OF DEEDS, THENCE NORTHWESTERLY ALONG THE NORTHERLY LINE THEREOF, AND PARALLEL WITH THE NORTHERLY LINE OF WHITTIER AVENUE 102.68 FEET TO THE WESTERLY LINE OF SAID LOT "B" BEING ALSO THE EASTERLY LINE OF POPLAR AVENUE, THENCE NORTHEASTERLY 169 70 FEET TO THE POINT OF BEGINNING.

EXCEPT THEREFROM THAT PORTION LYING SOUTHEASTERLY OF THE FOLLOWING:

DESCRIBED LINE BEGINNING AT SAID NORTHEAST CORNER OF THE LAND CONVEYED TO SAID W. W. BLACK, THENCE NORTH 50° 22" 02" EAST 1 87 FEET, THENCE NORTH 56° 48' 03" EAST 45.04 FEET, THENCE NORTH 50° 37' 43" EAST 19710 FEET TO THE SOUTHERLY LINE OF SAID LOT 102 DISTANT THEREON SOUTH 75° 53' 40" EAST 148.96 FEET FROM THE INTERSECTION OF SAID SOUTHERLY LINE WITH THE EASTERLY LINE OF A STRIP OF LAND OF UNIFORM DEPTH OF 100 00 FEET, EXTENDING ALONG THE EAST LINE OF POPLAR AVENUE FROM THE NORTH LINE OF WHITTIER AVENUE (NOW WHITTIER BOULEVARD) TO SAID LOT 102. AS DESCRIBED IN THE DEED RECORDED IN BOOK 2720 PAGE 129 OF DEEDS.

EXCEPT ALL OIL, GAS, MINERALS AND OTHER HYDROCARBON SUBSTANCES LYING BELOW A DEPTH OF 500 FEET OR MORE FROM THE SURFACE OF THE FOLLOWING DESCRIBED LAND, BUT WITHOUT THE RIGHT TO ENTER AND USE THE SURFACE OR THE SUBSURFACE LYING ABOVE A DEPTH OF 500 FEET FROM THE SURFACE THEREOF. AS GRANTED TO FAR WEST OIL CO, A LIMITED PARTNERSHIP. BY DEED RECORDED AUGUST 16, 1971 AS INSTRUMENT NO. 3238.

Property Address:

116 North Poplar Avenue, Montebello, CA 90640

In response to the above referenced application for a policy of title insurance, OLD REPUBLIC TITLE COMPANY, as issuing Agent of Old Republic National Title Insurance Company, hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a Policy or Policies of Title Insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an Exception below or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations of said policy forms.

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said Policy or Policies are set forth in Exhibit I attached. The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. Limitations on Covered Risks applicable to the Homeowner's Policy of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Exhibit I. Copies of the Policy forms should be read. They are available from the office which issued this report.

Please read the exceptions shown or referred to below and the exceptions and exclusions set forth in Exhibit I of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.
It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects, and encumbrances affecting title to the land.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

Dated as of September 24, 2021, at 7:30 AM

OLD REPUBLIC TITLE COMPANY
For Exceptions Shown or Referred to, See Attached

The form of policy of title insurance contemplated by this report is:

ALTA Loan Policy - 2006. A specific request should be made if another form or additional coverage is desired.

The estate or interest in the land hereinafter described or referred or covered by this Report is:

Fee

Title to said estate or interest at the date hereof is vested in:

Magna & Magna, Inc., a California corporation

The land referred to in this Report is situated in the County of Los Angeles, City of Montebello, State of California, and is described as follows:

THAT PORTION OF LOT "B" OF MONTEBELLO, IN THE CITY OF MONTEBELLO, AS PER MAP RECORDED IN BOOK 78 PAGE 19 OF MISCELLANEOUS RECORDS, IN THE OFFICE OF THE COUNTY RECORDER OF SAID COUNTY, DESCRIBED AS FOLLOWS:

BEGINNING AT THE SOUTHWEST CORNER OF LOT 102 OF SAID MONTEBELLO, THENCE SOUTH 75° 53' 40" EAST ALONG THE SOUTHERLY LINE OF SAID LOT 102, 300 00 FEET, THENCE SOUTHWESTERLY 277 94 FEET, MORE OR LESS, TO THE NORTHEAST CORNER OF THE LAND CONVEYED TO W. W. BLACK, BY DEED RECORDED IN BOOK 6621 PAGE 288 OF DEEDS, THENCE NORTHWESTERLY ALONG THE NORTHERLY LINE THEREOF, AND PARALLEL WITH THE NORTHERLY LINE OF WHITTIER AVENUE 102.68 FEET TO THE WESTERLY LINE OF SAID LOT "B" BEING ALSO THE EASTERLY LINE OF POPLAR AVENUE, THENCE NORTHEASTERLY 169 70 FEET TO THE POINT OF BEGINNING.

EXCEPT THEREFROM THAT PORTION LYING SOUTHEASTERLY OF THE FOLLOWING:

DESCRIBED LINE BEGINNING AT SAID NORTHEAST CORNER OF THE LAND CONVEYED TO SAID W. W. BLACK, THENCE NORTH 50° 22" 02" EAST 1 87 FEET, THENCE NORTH 56° 48' 03" EAST 45.04 FEET, THENCE NORTH 50° 37' 43" EAST 19710 FEET TO THE SOUTHERLY LINE OF SAID LOT 102 DISTANT THEREON SOUTH 75° 53' 40" EAST 148.96 FEET FROM THE INTERSECTION OF SAID SOUTHERLY LINE WITH THE EASTERLY LINE OF A STRIP OF LAND OF UNIFORM DEPTH OF 100 00 FEET, EXTENDING ALONG THE EAST LINE OF POPLAR AVENUE FROM THE NORTH LINE OF WHITTIER AVENUE (NOW WHITTIER BOULEVARD) TO SAID LOT 102. AS DESCRIBED IN THE DEED RECORDED IN BOOK 2720 PAGE 129 OF DEEDS.

EXCEPT ALL OIL, GAS, MINERALS AND OTHER HYDROCARBON SUBSTANCES LYING BELOW A DEPTH OF 500 FEET OR MORE FROM THE SURFACE OF THE FOLLOWING DESCRIBED LAND, BUT WITHOUT THE RIGHT TO ENTER AND USE THE SURFACE OR THE SUBSURFACE LYING ABOVE A DEPTH OF 500 FEET FROM THE SURFACE THEREOF. AS GRANTED TO FAR WEST OIL CO, A LIMITED PARTNERSHIP. BY DEED RECORDED AUGUST 16, 1971 AS INSTRUMENT NO. 3238.

At the date hereof exceptions to coverage in addition to the Exceptions and Exclusions in said policy form would be as follows:

1. Taxes and assessments, general and special, for the fiscal year 2021 - 2022, as follows:

Assessor's Parcel No	:	6347-012-008	
Code No.	:	06330	
1st Installment	:	$8,210.80	NOT Marked Paid
2nd Installment	:	$8,210.79	NOT Marked Paid
Land Value	:	$97,364.00	
Imp. Value	:	$717,353.00	

2. The lien of supplemental taxes, if any, assessed pursuant to the provisions of Section 75, et seq., of the Revenue and Taxation Code of the State of California.

3. Water rights, claims or title to water, whether or not shown by the public records.

4. An easement affecting that portion of said land and for the purposes stated herein and incidental purposes as provided in the following

Granted To	:	Francis M. Dyke and wife
For	:	pipes for conducting water for irrigation
Recorded	:	in Book 2720 of Deeds, Page 129
Affects	:	As described therein

5. The right to conduct water in pipes or ditches from the place of development to any reservoir or other lands owned by Kaspare Cohn, his heirs or assigns, as contained in the deed from Kaspare Cohn and wife, recorded in Book 2507, Page 98 of Deeds.

6. Covenants, conditions and restrictions, but omitting any covenants or restrictions if any, based on race, color, religion, sex, handicap, familial status or national origin unless and only to the extent that said covenant (A) is exempt under Chapter 42, Section 3607 of the United States code or (B) relates to handicap but does not discriminate against handicapped persons, in the instrument above mentioned.

NOTE: "If this document contains any restriction based on race, color, religion, sex, gender, gender identity, gender expression, sexual orientation, familial status, marital status, disability, veteran or military status, genetic information, national origin, source of income as defined in subdivision (p) of Section 12955, or ancestry, that restriction violates state and federal fair housing laws and is void, and may be removed pursuant to Section 12956.2 of the Government Code. Lawful restrictions under state and federal law on the age of occupants in senior housing or housing for older persons shall not be construed as restrictions based on familial status."

7. An easement affecting that portion of said land and for the purposes stated herein and incidental purposes as provided in the following

Granted To	:	The Standard Oil Company
For	:	transportation of all oil, petroleum, gas or water for the erection maintenance and operation of telegraph or telephone pole lines
Recorded	:	in Book 6568 of Deeds, Page 107
Affects	:	As described therein

And recorded in Book 6557 of Deeds, Page 340 .

8. An easement affecting that portion of said land and for the purposes stated herein and incidental purposes as provided in the following

For	:	waterline
Recorded	:	April 1, 1974 in Official Records As Instrument No. 4296
Affects	:	As described therein

9. An easement affecting that portion of said land and for the purposes stated herein and incidental purposes as provided in the following

Granted To	:	Standard Oil Company of California, a Corporation and Standard Gasoline Company, a Corporation
For	:	pipe lines
Recorded	:	May 23, 1962 in Book D-1624 of Official Records, Page 757 As Instrument No. 4832
Affects	:	As described therein

10. An easement affecting that portion of said land and for the purposes stated herein and incidental purposes as provided in the following

Granted To	:	Joseph A. Magna and Hedy A. Magna
For	:	waterline
Recorded	:	December 29, 1987 in Official Records As Instrument No. 87-2043659
Affects	:	As described therein

11. An unrecorded lease upon the terms, covenants, and conditions contained or referred to therein,

Lessor	:	Magna & Magna Incorporated
Lessee	:	Web Service Company, Inc.
Disclosed by	:	Memorandum of Lease
Recorded	:	February 28, 2000 in Official Records As Instrument No. 00-0292848

NOTE: The present ownership of said leasehold or leaseholds and other matters affecting the interest of the lessee or lessees are not shown herein.

12. Deed of Trust to secure an indebtedness of the amount stated below and any other amounts payable under the terms thereof,

Amount	:	$2,000,000.00
Trustor/Borrower	:	Magna & Magna, Inc., a California corporation
Trustee	:	First Mortgage Solutions
Beneficiary/Lender	:	KeyPoint Credit Union
Dated	:	June 5, 2020
Recorded	:	June 12, 2020 in Official Records As Instrument No. 20200644152
Loan No.	:	528207380

In Connection therewith, said trustors executed an Assignment of Rents,

Dated	:	June 5, 2020
Recorded	:	June 12, 2020 in Official Records As Instrument No. 20200644153

Covenants, conditions and restrictions contained in an instrument, which instrument is additional security for said deed of trust.

Entitled	:	Hazardous Substances Certificate and Indemnity Agreement
Executed By	:	Magna & Magna, Inc., a California corporation, Joseph A. MAGNA Living trust, DTD 01-13-15 and KeyPoint Credit Union
Recorded	:	June 12, 2020 in Official Records As Instrument No. 20200644154

Upon the recordation of a full reconveyance of said deed of trust, the covenants, conditions and restrictions will have no further force or effect.

13. Any unrecorded and subsisting leases.

14. Satisfactory evidence furnished to this Company:

(a) as to the due formation and continued existence of Magna & Magna, Inc., a California corporation as a legal entity under the laws of California; and

(b) documents from its board of directors authorizing this transaction and specifying the officers to execute on behalf of the corporation.

15. The requirement that this Company be provided with an opportunity to inspect the land (the Company reserves the right to make additional exceptions and/or requirements upon completion of its inspection).

16. Underwriting approval is required prior to our acceptance of instructions, recording of instruments and issuance of a title insurance policy or other product. If the application is approved, this report may be amended; additional exceptions from coverage may be shown, and additional conditions or requirements may be made.

---------- Informational Notes ----------

A. The applicable rate(s) for the policy(s) being offered by this report or commitment appears to be section(s) 4.2.

B. The above numbered report (including any supplements or amendments thereto) is hereby modified and/or supplemented to reflect the following additional items relating to the issuance of an American Land Title Association loan form policy:

NONE

NOTE: Our investigation has been completed and there is located on said land a multi-family residence known as 116 North Poplar Avenue, City of Montebello, California.

The ALTA loan policy, when issued, will contain the CLTA 100 Endorsement and 116 series Endorsement.

Unless shown elsewhere in the body of this report, there appear of record no transfers or agreements to transfer the land described herein within the last three years prior to the date hereof, except as follows:

NONE

Exhibit I

AMERICAN LAND TITLE ASSOCIATION LOAN POLICY OF TITLE INSURANCE (06/17/06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection; or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13, or 14); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   (a) a fraudulent conveyance or fraudulent transfer, or
   (b) a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

SCHEDULE B - PART I

Except as provided in Schedule B - Part II, this policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material unless such lien is shown by the Public Records at Date of Policy.

OLD REPUBLIC TITLE

FACTS	WHAT DOES OLD REPUBLIC TITLE DO WITH YOUR PERSONAL INFORMATION?

Why?	Financial companies choose how they share your personal information. Federal law gives consumers the right to limit some but not all sharing. Federal law also requires us to tell you how we collect, share, and protect your personal information. Please read this notice carefully to understand what we do.
What?	The types of personal information we collect and share depend on the product or service you have with us. This information can include: • Social Security number and employment information • Mortgage rates and payments and account balances • Checking account information and wire transfer instructions When you are no longer our customer, we continue to share your information as described in this notice.
How?	All financial companies need to share customers' personal information to run their everyday business. In the section below, we list the reasons financial companies can share their customers' personal information; the reasons Old Republic Title chooses to share; and whether you can limit this sharing.

Reasons we can share your personal information	Does Old Republic Title share?	Can you limit this sharing?
For our everyday business purposes — such as to process your transactions, maintain your account(s), or respond to court orders and legal investigations, or report to credit bureaus	**Yes**	**No**
For our marketing purposes — to offer our products and services to you	**No**	**We don't share**
For joint marketing with other financial companies	**No**	**We don't share**
For our affiliates' everyday business purposes — information about your transactions and experiences	**Yes**	**No**
For our affiliates' everyday business purposes — information about your creditworthiness	**No**	**We don't share**
For our affiliates to market to you	**No**	**We don't share**
For non-affiliates to market to you	**No**	**We don't share**

	Go to www.oldrepublictitle.com (Contact Us)

Who we are	
Who is providing this notice?	Companies with an Old Republic Title name and other affiliates. Please see below for a list of affiliates.

What we do	
How does Old Republic Title protect my personal information?	To protect your personal information from unauthorized access and use, we use security measures that comply with federal law. These measures include computer safeguards and secured files and buildings. For more information, visit https://www.oldrepublictitle.com/privacy-policy
How does Old Republic Title collect my personal information?	We collect your personal information, for example, when you: • Give us your contact information or show your driver's license • Show your government-issued ID or provide your mortgage information • Make a wire transfer We also collect your personal information from others, such as credit bureaus, affiliates, or other companies.
Why can't I limit all sharing?	Federal law gives you the right to limit only: • Sharing for affiliates' everyday business purposes - information about your creditworthiness • Affiliates from using your information to market to you • Sharing for non-affiliates to market to you State laws and individual companies may give you additional rights to limit sharing. See the State Privacy Rights section location at https://www.oldrepublictitle.com/privacy-policy for your rights under state law.

Definitions	
Affiliates	Companies related by common ownership or control. They can be financial and nonfinancial companies. • Our affiliates include companies with an Old Republic Title name, and financial companies such as Attorneys' Title Fund Services, LLC, Lex Terrae National Title Services, Inc., Mississippi Valley Title Services Company, and The Title Company of North Carolina.
Non-affiliates	Companies not related by common ownership or control. They can be financial and non-financial companies. • Old Republic Title does not share with non-affiliates so they can market to you
Joint marketing	A formal agreement between non-affiliated financial companies that together market financial products or services to you. • Old Republic Title doesn't jointly market.

Privacy Notice for California Consumers

This Privacy Notice for California Consumers supplements the information contained in the Master Privacy Notice for Old Republic Title and applies to consumers that reside in the State of California. The terms used in this Privacy Notice have the same meaning as the terms defined in the California Consumer Privacy Act ("CCPA").

What Personal Information We Collect

In accordance with the CCPA, personal information is information that identifies, relates to, describes, is capable of being associated with, or could reasonably be linked, directly or indirectly, with a particular consumer or household. Personal information does not include:
Information outside the scope of the CCPA such as:

- Health or medical information covered by the Health Insurance Portability Act of 1996 (HIPAA) and the California Confidentiality of Medical Information Act (CMIA).
- Personal Information covered by the Gramm-Leach-Bliley Act (GLBA), the Fair Credit Reporting Act (FCRA), the California Financial Information Privacy Act (FIPA), and the Driver's Privacy Protection Act of 1994,
- Publicly available information that is available from federal, state, or local government records, and
- De-identified or aggregated consumer information.

Please see the chart below to learn what categories of personal information we may have collected about California consumers within the preceding twelve months, the sources of and business purposes for that collection and the third parties with whom the information is shared, if any.

Category	**Examples**	**Collected**	**Sources**	**Business Purpose for Collection**	**Categories of Third Parties with Whom Information is Shared**
Identifiers	Real name, alias, postal address, unique personal identifier, online identifier, Internet protocol address, email address, account name, social security number, driver's license number, passport number or other similar identifiers	Yes	Consumers, Lenders, Brokers, Attorneys, Real Estate Agents, and Title Agents associated with the transaction	Underwriting or providing other products or services, responding to policyholder/consumer claims, inquiries or complaints, detecting security incidents, protecting against malicious,	Service providers associated with the transaction for a business purpose

				deceptive, fraudulent, or illegal activity. Other audit or operational purposes.	
Personal information described in California Customer Records statute (Cal. Civ. Code § 1798.80(e))	Name, signature, social security number, physical characteristics or description, address, telephone number, passport number, driver's license or state identification card number, insurance policy number, education, employment, employment history, bank account number, credit card number, debit card number, or any other financial information, medical information, or health insurance information. "Personal information" does not include publicly available information that is lawfully made available to the general public from federal, state, or local government records.	Yes	Consumers, Lenders, Brokers, Attorneys, Real Estate Agents, and Title Agents associated with the transaction	Underwriting or providing other products or services, responding to policyholder/consumer claims, inquiries or complaints, detecting security incidents, protecting against malicious, deceptive, fraudulent, or illegal activity. Other audit or operational purposes.	Service providers associated with the transaction for a business purpose
Characteristics of protected classifications under California or federal law	Age (40 years or older), race, color, ancestry, national origin, citizenship, religions or creed, marital status, medical condition, physical or mental disability, sex (including gender, gender identity, gender expression, pregnancy or childbirth and related	Yes	Consumers, Lenders, Brokers, Attorneys, Real Estate Agents, and Title Agents associated with the transaction	Underwriting or providing other products or services, responding to policyholder/consumer claims, inquiries or complaints. Other audit or operational purposes.	Service providers associated with the transaction for a business purpose

	medical conditions), sexual orientation, veteran or military status, or genetic information (including familial genetic information).				
Internet or other electronic network activity	Browsing history, search history, information about a consumer's interaction with a website, application, or advertisement.	Yes	Consumers, Lenders, Brokers, Attorneys, Real Estate Agents, and Title Agents associated with the transaction	To provide access to certain online services. To understand the interests of visitors to our online services, to support certain features of our site, for navigation and to display certain features more effectively. Detecting security incidents, protecting against malicious, deceptive, fraudulent, or illegal activity. Other audit or operational purposes.	Not Disclosed
Geolocation data	Geographic tracking data, physical location and movements	Yes	Consumers, Lenders, Brokers, Attorneys, Real Estate Agents, and Title Agents associated with the transaction	To provide access to certain online services. To understand the interests of visitors to our online services, to support certain features of our site, for navigation and to display certain features more effectively. Other audit or operational purposes.	Not Disclosed

What Personal Information We Share and Why We Share It

The CCPA requires us to tell you what categories of personal information we "sell" or "disclose." We do not sell and will not sell your personal information as that term is commonly understood. We also do not sell and will not sell your personal information, including the personal information of persons under 16 years of age, as that term is defined by the CCPA. When it is necessary for a business purpose, we share or disclose your personal information with a service provider, and we enter a contract with the service provider that limits how the information may be used and requires the service provider to protect the confidentiality of the information.

In the preceding twelve months, we have disclosed the following categories of personal information for the following business purposes. Where the personal information is shared with third parties, as that term is defined in the CCPA, the category of the third party is indicated.

Category	**Examples**	**Business Purpose for Disclosure**	**Categories of Third Parties with Whom Information is Shared**
Identifiers	Real name, alias, postal address, unique personal identifier, online identifier, internet protocol address, email address, account name, social security number, driver's license number, passport number or other similar identifiers	Underwriting or providing other products or services, responding to policyholder/consumer claims, inquiries or complaints, detecting security incidents, protecting against malicious, deceptive, fraudulent, or illegal activity. Other audit or operational purposes.	Service providers associated with the transaction for a business purpose
Personal information described in California Customer Records statute (Cal. Civ. Code § 1798.80(e))	Name, signature, social security number, physical characteristics or description, address, telephone number, passport number, driver's license or state identification card number, insurance policy number, education, employment, employment history, bank account number, credit card number, debit card number, or any other financial information, medical information, or health insurance information. "Personal information" does not include publicly available information that is lawfully made available to the general public from federal, state, or local government records.	Underwriting or providing other products or services, responding to policyholder/consumer claims, inquiries or complaints, detecting security incidents, protecting against malicious, deceptive, fraudulent, or illegal activity. Other audit or operational purposes.	Service providers associated with the transaction for a business purpose

2

Characteristics of protected classifications under California or federal law	Age (40 years or older), race, color, ancestry, national origin, citizenship, religions or creed, marital status, medical condition, physical or mental disability, sex (including gender, gender identity, gender expression, pregnancy or childbirth and related medical conditions), sexual orientation, veteran or military status, or genetic information (including familial genetic information).	Underwriting or providing other products or services, responding to policyholder/consumer claims, inquiries or complaints. Other audit or operational purposes.	Service providers associated with the transaction for a business purpose
Internet or other electronic network activity	Browsing history, search history, information about a consumer's interaction with a website, application, or advertisement.	To provide access to certain online services. To understand the interests of visitors to our online services, to support certain features of our site, for navigation and to display certain features more effectively. Detecting security incidents, protecting against malicious, deceptive, fraudulent, or illegal activity. Other audit or operational purposes.	Not Disclosed
Geolocation data	Geographic tracking data, physical location and movements	To provide access to certain online services. To understand the interests of visitors to our online services, to support certain features of our site, for navigation and to display certain features more effectively. Other audit or operational purposes.	Not Disclosed

We may also transfer to a third party the personal information of a consumer as an asset that is part of a merger, acquisition, bankruptcy, or other transaction in which the third party assumes control of all or part of the business.

Your Rights and Choices

The CCPA provides California consumers with certain rights regarding their personal information. This chart describes those rights and certain limitations to those rights.

Right	What This Means
Notice	At or before the time your personal information is collected, you will be given written notice of the categories of personal information to be collected and the purposes for which the categories of personal information will be used.
Access	At your verifiable request, but no more than twice in a twelve month period, we shall disclose to you: 1) the categories of personal information we have collected about you, 2) the

	categories of sources for the personal information we collected about you, 3) our business and commercial purpose for collecting or selling your personal information, 4) the categories of third parties with whom we share your personal information, 5) The specific pieces of information we have collected about you, 6) the categories of personal information disclosed for a business purpose, and 7) If we sold personal information, the categories of personal information sold and the categories of third parties to whom it was sold.
Deletion	You have the right to request that we delete any of your personal information that we collected from you, subject to certain exceptions. Once we receive and verify your request, we will delete (and direct our service providers to delete) your personal information from our records unless an exception applies. We may deny your request if retention of the information is necessary for us or our service providers to: • Complete the transaction for which we collected the personal information, provide a good or service that you requested, take actions reasonably anticipated within the context of our ongoing business relationship with you, or otherwise perform our contract with you. • Detect security incidents, protect against malicious, deceptive, fraudulent, or illegal activity, or prosecute those responsible for such activities. • Debug products to identify and repair errors that impair existing intended functionality. • Exercise free speech, ensure the right of another consumer to exercise their free speech rights, or exercise another right provided for by law. • Comply with the California Electronic Communications Privacy Act (Cal. Penal Code §1546 et seq.) • Engage in public or peer reviewed scientific, historical, or statistical research in the public interest that adheres to all other applicable ethics and privacy laws, when the information's deletion may likely render impossible or seriously impair the research's achievement, if you previously provided informed consent. • Enable solely internal uses that are reasonably aligned with consumer expectations based on your relationship with us. • Comply with a legal obligation. • Make other internal and lawful uses of that information that are compatible with the context in which you provided it. • Or if it is the type of personal information that falls outside the scope of the CCPA, (HIPAA, CIMA, GLBA, or publicly available information)
Opt-Out of Sale Opt-In to Sale	With some limitations, you may direct a business that sells personal information to third parties not to sell the personal information to these third parties. A business may not sell the personal information of persons less than sixteen years of age without their affirmative consent, and in the case of those less than thirteen years of age, the consent must come from a parent.
Non-Discrimination	We will not discriminate against you for exercising your rights under the CCPA. Unless otherwise permitted by the CCPA we will not: • Deny you goods or service • Charge you different prices or rates for goods or services, including through granting discounts or other benefits, or imposing penalties • Provide a different level or quality of goods or services • Suggest that you will receive a different price or rate for goods or services or a different level or quality of goods or services

2

To Exercise Your Rights

To Opt-out of the Sale of Your Personal Information

The CCPA gives consumers the right to direct a business that sells personal information about the consumer to third parties not to sell the consumer's personal information. We do not sell and will not sell your personal information as that term is commonly understood. We also do not sell and will not sell your personal information, as that term is defined by the CCPA.

To Request Access to or Deletion of Your Personal Information

To exercise your access or deletion rights described above, please submit a verifiable consumer request to us by either: Calling us at 1-855-557-8437 or contacting us through our website CCPA Consumer Request.

Only you or your representative that you authorize to act on your behalf (Authorized Agent) can make a verifiable consumer request for your personal information. You may also make a request for your minor child. The verifiable request must provide enough information that allows us to reasonably verify you are the person about whom we collected personal information. We cannot respond to your request or provide you with personal information if we cannot verify your identity or authority to make the request and to confirm the personal information relates to you.

We work to respond to a verifiable consumer request within 45 days of its receipt. If we require additional time, we will inform you of the extension period (up to an additional 45 days), and the reason for the extension in writing. If you have an account with us, we will deliver our response to that account. If you do not have an account with us, we will deliver our response by mail or electronically, depending on your preference. The response we provide will also explain any reasons why we cannot comply with a request.

You may only make a consumer request for access twice within a twelve-month period.
Any disclosures we provide will apply to the twelve-month period preceding the consumer request's receipt.

Contact Us

If you have any questions regarding our Privacy Notice or practices, please contact us via phone at 1-855-557-8437 or send your written request to: CCPA@oldrepublictitle.com, or Old Republic Title c/o CCPA Consumer Request Group, 275 Battery Street, Suite1500, San Francisco, CA 94111-3334.

The ERIS ***Physical Setting Report - PSR*** provides comprehensive information about the physical setting around a site and includes a complete overview of topography and surface topology, in addition to hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, public water systems and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

Radon Information

This section lists any relevant radon information found for the target property.

Federal EPA Radon Zone for *LOS ANGELES* County: **2**

Zone 1: Counties with predicted average indoor radon screening levels greater than 4 pCi/L
Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L
Zone 3: Counties with predicted average indoor radon screening levels less than 2 pCi/L

Federal Area Radon Information for *LOS ANGELES* County

No Measures/Homes:	69
Geometric Mean:	0.4
Arithmetic Mean:	0.7
Median:	0.5
Standard Deviation:	1
Maximum:	5.6
% >4 pCi/L:	1
% >20 pCi/L:	0
Notes on Data Table:	TABLE 1. Screening indoor radon data from the EPA/State Residential Radon Survey of California conducted during 1989-90. Data represent 2-7 day charcoal canister measurements from the lowest level of each home tested.

Appendix

Federal Sources

FEMA National Flood Hazard Layer — **FEMA FLOOD**

The National Flood Hazard Layer (NFHL) data incorporates Flood Insurance Rate Map (FIRM) databases published by the Federal Emergency Management Agency (FEMA), and any Letters Of Map Revision (LOMRs) that have been issued against those databases since their publication date. The FIRM Database is the digital, geospatial version of the flood hazard information shown on the published paper FIRMs. The FIRM Database depicts flood risk information and supporting data used to develop the risk data. The FIRM Database is derived from Flood Insurance Studies (FISs), previously published FIRMs, flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available.

Indoor Radon Data — **INDOOR RADON**

Indoor radon measurements tracked by the Environmental Protection Agency(EPA) and the State Residential Radon Survey.

Public Water Systems Violations and Enforcement Data — **PWSV**

List of drinking water violations and enforcement actions from the Safe Drinking Water Information System (SDWIS) made available by the Drinking Water Protection Division of the US EPA's Office of Groundwater and Drinking Water. Enforcement sensitive actions are not included in the data released by the EPA. Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Radon Zone Level — **RADON ZONE**

Areas showing the level of Radon Zones (level 1, 2 or 3) by county. This data is maintained by the Environmental Protection Agency (EPA).

Safe Drinking Water Information System (SDWIS) — **SDWIS**

The Safe Drinking Water Information System (SDWIS) contains information about public water systems as reported to US Environmental Protection Agency (EPA) by the states. Addresses may correspond with the location of the water system, or with a contact address.

Soil Survey Geographic database — **SSURGO**

The Soil Survey Geographic database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Soil maps outline areas called map units. The map units are linked to soil properties in a database. Each map unit may contain one to three major components and some minor components.

U.S. Fish & Wildlife Service Wetland Data — **US WETLAND**

The U.S. Fish & Wildlife Service Wetland layer represents the approximate location and type of wetlands and deepwater habitats in the United States.

USGS Current Topo — **US TOPO**

US Topo topographic maps are produced by the National Geospatial Program of the U.S. Geological Survey (USGS). The project was launched in late 2009, and the term "US Topo" refers specifically to quadrangle topographic maps published in 2009 and later.

USGS Geology — **US GEOLOGY**

Seamless maps depicting geological information provided by the United States Geological Survey (USGS).

USGS National Water Information System — **FED USGS**

The U.S. Geological Survey (USGS)'s National Water Information System (NWIS) is the nation's principal repository of water resources data. This database includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data.

State Sources

Oil and Gas Wells — **OGW**

A list of Oil and Gas well locations. This is provided by California's Department of Conservation Division of

Appendix

Oil, Gas and Geothermal Resources.

Periodic Groundwater Level Measurement Locations **MONITOR WELLS**

Locations of groundwater level monitoring wells in the Department of Water Resources (DWR)'s Periodic Groundwater Levels dataset. The DWR Periodic Groundwater Levels dataset contains seasonal and long-term groundwater level measurements collected by the Department of Water Resources and cooperating agencies.

Well Completion Reports **WATER WELLS**

List of wells from the Well Completion Reports data made available by the California Department of Water Resources' (DWR) Online System for Well Completion Reports (OSWCR). Please note that the majority of well completion reports have been spatially registered to the center of the 1x1 mile Public Land Survey System section that the well is located in.

Liability Notice

Reliance on information in Report: The Physical Setting Report (PSR) DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a review of environmental databases and physical characteristics for the site or adjacent properties.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS Information Inc. disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

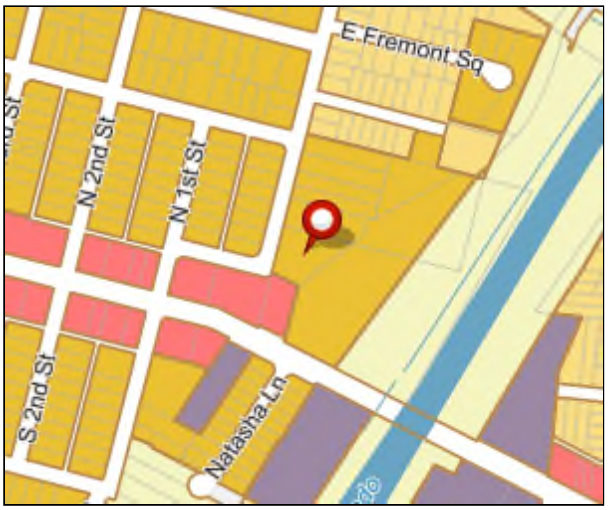
1. Land Use



Land use: **Five or More Apartments or Units - 4 Stories or Less (0500)**

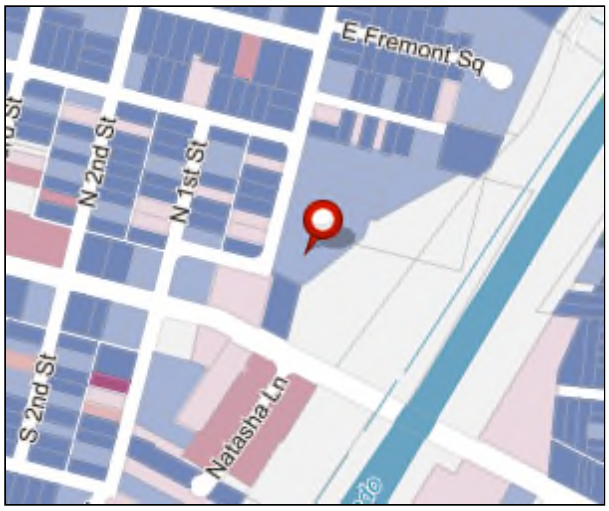
On this map, view the current land use for a property. The land use specifies how a property is used or what type of building is present on that property.

- Single family
- Condominium/Coop units
- Other residential
- Apartments/Multi-Family
- Office
- Retail
- Hotel/Motel/Other accommodation
- Restaurants
- Manufacturing/ Storage facilities
- Other industrial
- Public services/Facilities
- Education
- Cemeteries and other religious
- Hospitals/Care facilities
- Other institutional
- Entertaiment/Recreation
- Agricultural
- Parks
- Mixed use
- Vacant land
- Other
- Unknown

2. Zoning

Zoning: **Multiple-Family Residential (R-3)**

For more information about zoning districts click here.



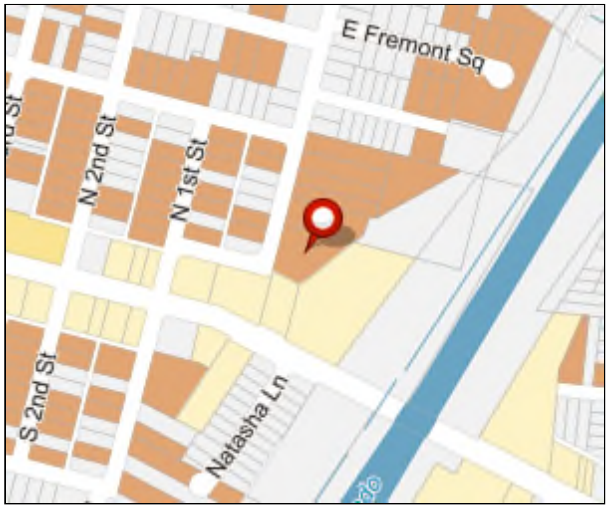
Properties can be classified by zoning and building class. Los Angeles County is divided into four basic zoning districts: residential (R), commercial (C), agricultural(A) and manufacturing (M).These basic zoning districts are subdivided by the intensity of use.

Major zoning groups:

- Multiple family
- Single family
- Other residential
- Commercial
- Offices
- Industrial/manufacturing
- Public facilities
- Open space
- Agricultural
- Mixed use
- Planned development
- Special zones
- Parking
- Planned development - overlay
- No zoning data available

3. Urban Landscape Maps

Year Built



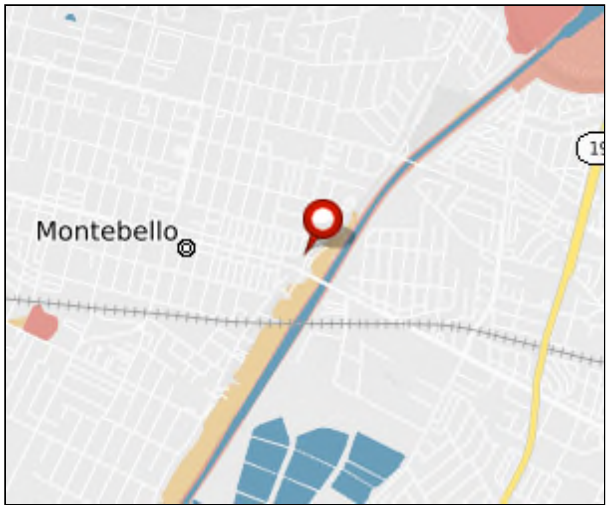
Year built: **1962**

On this map, view the year each property was built.

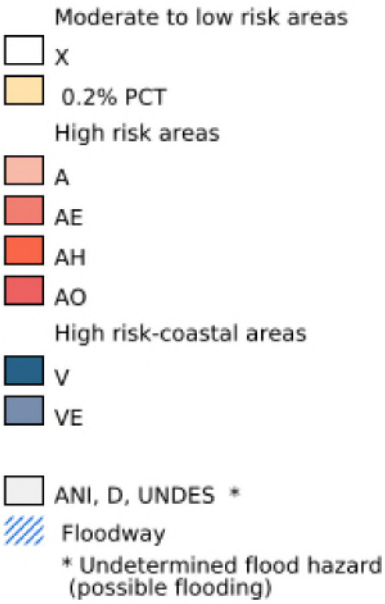
- 2015 and later
- 2010 - 2014
- 2000 - 2009
- 1990 - 1999
- 1970 - 1989
- 1950 - 1969
- 1900 - 1949
- older than 1900

Building Stories

Stories: **4**



On this map, view the number of stories per building.



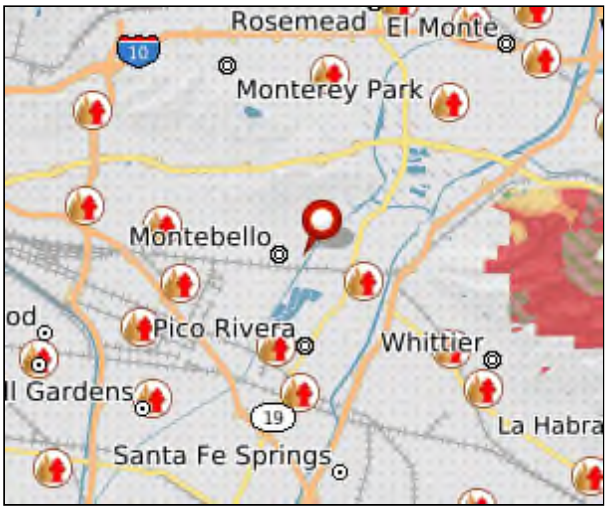
- 10 & Up stories
- 7 to 9 Stories
- 5 to 6 Stories
- 4 Stories
- 3 Stories
- 2 Stories
- 1 Story
- No data

Risk

1. FEMA Flood Zones

Use this map to determine if your property is at risk for flooding or storm surge and if it requires flood insurance.

Flood Zone Details



FEMA flood zone	**X - Low Risk Area**
Costal barrier resources system area (COBRA)	**Out**
FEMA floodway	**Out**
FEMA special flood hazard area	**Out**

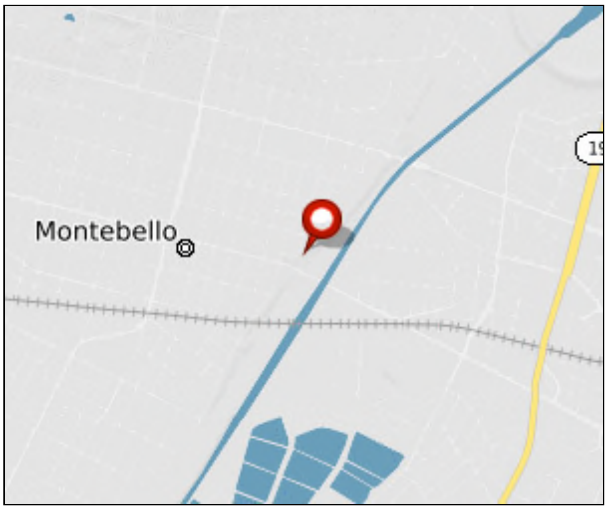
For more information about FEMA flood zones map click here.

Map Details

Map panel ID	**06037C1663F effective from 09/26/2008**

2. Fire Hazard Zones

Fire hazard class
- Very high
- High
- Moderate



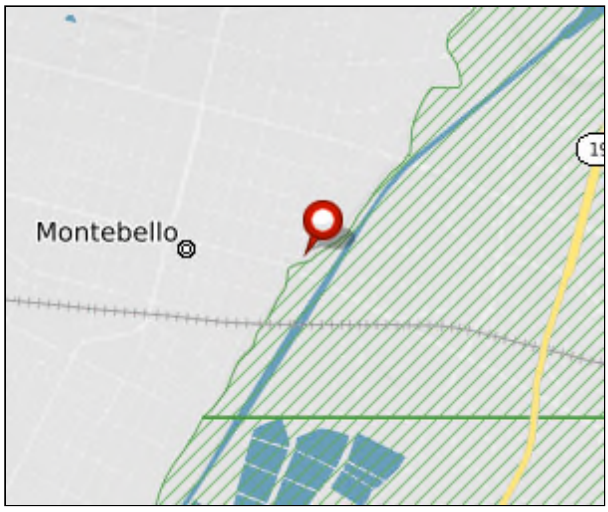
Responsability area
- SRA - State responsability area
- FRA - Federal responsability area
- LRA - Local responsability area

Historical fire areas
- 1980-1990
- 1990-2000
- 2000-2010
- 2010-2014

State and local fire protection facilities

Hydrants

3. Faults and Tsunami Inundation Zones



Earth quake fault zones

Tsunami inundation zone

Fault line type
- Accurate located faults
- Approximately located faults
- Inferred faults
- Aerial photo lineament
- Concealed faults

4. Landslides and Liquefaction

Landslide hazard zones
Liquefaction hazard zones
Unevaluated zones

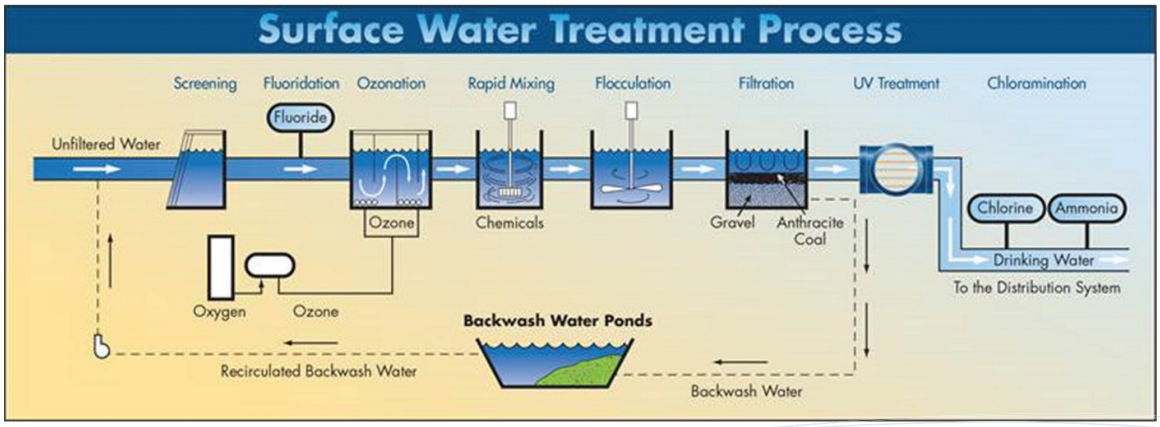
SAFEGUARDING L.A.'S DRINKING WATER

A Message from Razmik Manoukian

Director of Water Quality

It's been a tough year with many adjustments for all of Los Angeles, but one thing we didn't have to worry about was the safety of our drinking water supply. Throughout 2020, LADWP maintained the highest water quality standards by adhering to all treatment, monitoring and safety protocols.



The City of Los Angeles water supply is approximately 89 percent surface water, 9 percent groundwater, and 2 percent recycled water. The surface water is purified using a multibarrier approach as depicted in the treatment process figure below. The water is purified by screening, ozonation, filtration, ultra-violet disinfection, chlorination, and ammoniation. LADWP also disinfects extracted groundwater with chlorine to safeguard against microorganisms. Every step of the treatment process achieves a certain level of microorganism and contaminant removal. When it comes to viruses, including COVID-19, the most effective treatment process is chlorination. A very small amount of chlorine is highly effective in killing viruses. This is important because chlorine protects the water supply as it travels through the distribution system to your tap.

The use of water chlorination to disinfect public water supplies began in the early 1900s. Its use has had a major impact on the incidence of waterborne disease such as cholera, typhoid fever and dysentery in the U.S. and worldwide. Chlorination of drinking water has been credited for increasing life expectancy in developed countries during the twentieth century. It continues to be a primary method for disinfecting water today and an effective treatment step in stopping the COVID-19 virus. LADWP uses chlorination and other state-of-art water treatment methods because we are committed to the safety and quality of your drinking water.

The U.S. Environmental Protection Agency (U.S. EPA) and the State Water Resources Control Board, Division of Drinking Water (SWRCB-DDW) require that all water agencies produce an annual report informing customers about the quality of their drinking water. To ensure compliance with these drinking water standards, LADWP employees actively safeguard our water. Every day, we effectively manage state-of-the-art water treatment facilities and diligently test the water to make certain the highest quality water is delivered to you. Over 37,000 samples are tested for hundreds of constituents throughout the distribution system annually.

As you read through this report, you will find references to tables that depict the actual levels of specific substances or "constituents" we have found in the city's water supply. Looking at the tables, I am proud to state that all regulated constituents detected were at very low levels. In fact, LADWP water quality performance was at least 50 percent better than safety levels set by the US EPA and SWRCB-DDW. Out of the 104 constituents we are required to monitor, none were found at levels considered unsafe by health agencies and only 32 were detected at very low levels as listed in Tables I and II.

We are proud to serve safe, refreshing, high quality drinking water to all our customers across the city—at home, work, and neighborhood parks. At LADWP, we are committed to customer service. If you have any questions or concerns about your water quality or need advice on how to improve water quality at your home or workplace, please do not hesitate to call our Water Quality Hotline at (213) 367-3182.

LOS ANGELES IS WATER STRONG

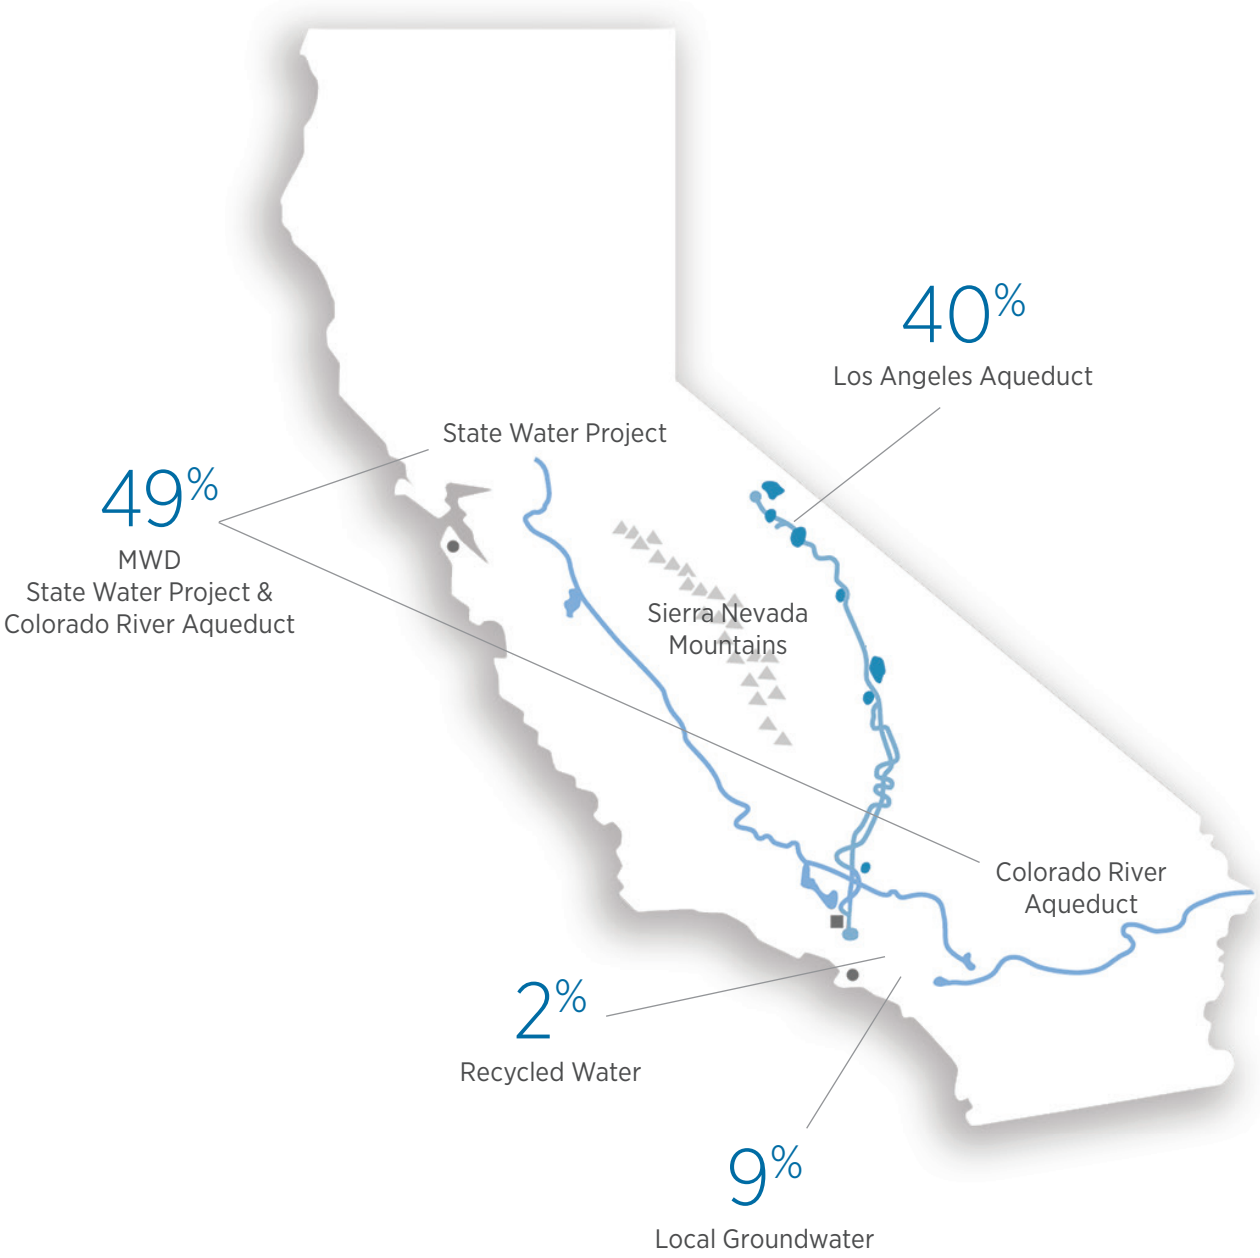
A Message from Richard Harasick

LADWP Senior Assistant General Manager, Water System

LADWP remains water strong despite all the challenges of 2020. Through the dedication and commitment of our essential workforce we continue to serve you safe, high quality drinking water. Our skilled personnel ensure water treatment facilities are maintained and water quality is monitored, sampled, and tested regularly. All water served to you and your family is treated and tested rigorously to meet state and federal standards. As your local utility, LADWP never stopped providing essential services during the pandemic, amidst the wildfires, and through periods of civil unrest.

Our workforce remains strong because we are taking stringent precautions to stay healthy on the job. We take our responsibility to safeguard the city's water supply seriously, especially during the COVID-19 pandemic.

Due to our investments in infrastructure, we continue to make our water system resilient and responsive to your needs and the community we serve. We continue to upgrade and fortify our distribution system through multiple improvement projects. These include strategic pipe replacement, earthquake resilient pipe installation, and ongoing maintenance of tanks and reservoirs. Also, investments in a diverse water supply portfolio of stormwater capture, water conservation, and water recycling further help us to prepare for dry periods and make us less dependent on purchased imported water supplies. Strong water infrastructure allows us to serve safe, high quality water and secure a sustainable water future.



We have every confidence in the quality, reliability, and safety of the water being delivered to your tap. We work in partnership with our regulators to maintain the water system to the highest standards, and we keep a watchful eye on any emerging contaminants. While we continue to navigate these difficult times together, we're working diligently to provide you with the essential services you need. Together, Los Angeles is Water Strong.

A lab technician collects water samples at the Tujunga Treatment Plant. In 2020, we tested the water for more than 148 constituents and performed more than 112,000 tests on samples taken throughout our vast water system.

L.A.'S WATER SOURCES IN 2020

Los Angeles receives water from several sources. In 2020, the Los Angeles Aqueduct (LAA) supplied 40 percent of the water that was treated at the Los Angeles Aqueduct Filtration Plant. Purchased imported water from the Metropolitan Water District of Southern California (MWD) amounted to 49 percent. The remaining water supply was sourced from local groundwater at 9 percent and recycled water at 2 percent.

Drinking Water and Your Health

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and, in some cases, radioactive material. It can pick up substances resulting from the presence of animals or from human activity.

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the U.S. EPA Safe Drinking Water Hotline: (800) 426-4791.

Health Advisory for People with Weakened Immune Systems

Although LADWP treats its water to meet drinking water standards, some people may be more vulnerable to constituents in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These individuals should seek advice about drinking water from their health care providers. U.S. EPA Centers for Disease Control (CDC) guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Drinking Water Hotline: (800) 426-4791.

Contaminants That May Be Present

Water agencies are required to use the following language to discuss the source of contaminants that may reasonably be expected to be found in drinking water, including tap and bottled water.

Contaminants that may be present in source water include:

- Microbial contaminants, such as viruses and bacteria that may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.
- Inorganic contaminants, such as salts and metals, that can be naturally-occurring or result from urban stormwater runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.
- Pesticides and herbicides that may come from a variety of sources such as agriculture, urban stormwater runoff, and residential uses.
- Organic chemical contaminants, including synthetic and volatile organic chemicals that are by-products of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff, agricultural application, and septic systems.
- Radioactive contaminants that can be naturally-occurring or be the result of oil and gas production and mining activities.

To ensure that tap water is safe to drink, the U.S. EPA and the State Water Resources Control Board (State Board) prescribe regulations that limit the amount of certain contaminants in water provided by public water systems.

The U.S. Food and Drug Administration regulations and California law also establish limits for contaminants in bottled water that provide the same protection for public health.

One of LADWP's frontline employees takes a break from installing critical water pipelines that ensure the reliability of our water infrastructure.

LADWP STAYS FOCUSED ON CUSTOMER SERVICE DURING THE PANDEMIC

LADWP continues to serve safe, high quality water despite the COVID-19 pandemic. The city's drinking water undergoes a multi-step treatment process that is closely monitored throughout the distribution system. This critical work is carried out by our frontline workers — engineers, microbiologists, chemists, sample collectors, and laboratory technicians as well as our everyday water utility workers installing and maintaining the vital water pipe distribution system. LADWP has remained water strong throughout these challenging times. With our capable and dedicated team behind every refreshing glass of tap water, we want to remind you that purchasing expensive single-use plastic water bottles is not necessary.

It is important that our customers feel confidence in the safety of the water we serve. LADWP offers free water quality testing at your residence or place of business. Upon request, one of our experts will collect a water sample and submit it for testing at our state-of-the-art water quality laboratory. A customized report will be provided to you. This report describes your water quality and identifies potential plumbing system issues, if any, at your property.

The inspectors help our customers understand the data provided in the report and identify low- and no-cost solutions to everyday water-related inquiries. This is a job that we take very seriously. In fact, we've completed over 97 percent of customer-initiated inspection requests by the end of the next business day.

Like many organizations this past year, we needed time to rethink and adjust our services to comply with social-distancing guidelines. These adjustments helped ensure the safety of customers, employees, and the general public. Where possible, we addressed many customer concerns over the phone and provided recommendations to improve their water quality. Additionally, we provided online resources such as a FAQ page and step-by-step instructions for common customer concerns. Following public health guidelines for COVID safety and prevention, we made some modifications to our processes and were able to conduct some in-person services in a responsible, safe, and customer focused manner.

LADWP remains committed to assisting our customers and we appreciate the opportunity to serve you. If you have any water quality concerns, please contact us at (213) 367-3182 or by email at waterquality@ladwp.com.

An LADWP worker replaces one of the lamps on an ultraviolet reactor. These reactors treat water at the microbial level and help us provide reliable high-quality water to our customers on a daily basis.

REGULATORY COMPLIANCE HOW DID WE MEASURE UP?

LADWP works around the clock to ensure that the drinking water we deliver to our customers is of the highest quality and meets all safety requirements. Highly trained, certified treatment operators monitor our water treatment operations continuously, thereby helping meet federal and state standards for drinking water. In 2020, we tested for more than 148 constituents in the water and performed more than 112,000 tests on samples taken throughout our water system. LADWP received no violations and met all primary drinking water standards in 2020.

PFAS and Drinking Water in California

Poly- and Perfluoroalkyl Substances (PFAS) are a group of synthetic (man-made) chemicals which include Perfluorooctanoic acid (PFOA) and Perfluorooctanoic sulfonic acid (PFOS). They have been used for decades in manufacturing; they are suspected carcinogens and don't breakdown. Most U.S. manufacturers voluntarily phased out production of PFOS between 2000 and 2002, and PFOA in 2006.

Studies indicate potential health consequences from exposure to significant levels of PFAS. Health effects may include high cholesterol, liver and thyroid cancer risks, immunotoxicity, pregnancy-induced hypertension, low birth weights, and decreased fertility. More information is available on US EPA's webpage https://www.epa.gov/ground-water-and-drinking-water/drinking-water-health-advisories-pfoa-and-pfos.

During the course of 2020, some states agencies released new PFAS requirements that included monitoring, compliance determination and reporting. A growing number of state agencies are actively sampling for PFAS to determine their occurrence, levels and potential environmental pathways. The State Board has been actively investigating and sampling for PFAS since 2019. Updated drinking water response levels were released for PFOA (10 parts per trillion) and PFOS (40 parts per trillion).

At the federal level, the U.S. EPA is yet to release its final determination if PFAS will become regulated. However, at the state level, the State Board has requested that the California

Office of Environmental Health Hazard Assessment begin the process to develop public health goals for PFOA and PFOS. The next step will be establishing regulatory standards, and maximum contaminant levels in drinking water.

LADWP began testing for PFAS in fiscal year 2013-14 and has continued to monitor its local groundwater sources for both PFOA and PFOS. Although PFAS were detected in a few samples from individual wells, no single well represents water provided to our customers. Water from individual wells is blended with water from other wells, and is further diluted by blending with much larger volumes of surface water before entering the distribution system. LADWP has not found PFAS contamination in its water distribution system. Customers can be confident that LADWP is providing high quality drinking water.

If you have questions, please contact our Water Quality Hotline at (213) 367-3182 or email us at waterquality@ladwp.com.

Compliance with Lead and Copper Rule (LCR)

LADWP has a long and successful history of controlling corrosion and minimizing lead exposure to customers. Between 1978 and 2006, LADWP cleaned and cement-lined approximately 2,600 miles of unlined iron pipes 4 inches in diameter and greater. Since 1994, we have been replacing our utility portion of galvanized iron service lines. The number of galvanized service lines in our inventory decreased from approximately 45,000 in 1994 to about 16,900 in 2020. LADWP initiated another program in 1998 to replace low-lead (8 percent lead) water meters with lead-free (0.25 percent lead) water meters. There are currently over 700,000 active water meters in LADWP's water distribution system, and approximately 31,500 meters are being replaced annually. Approximately 514,300 (71 percent) water meters have been replaced. In another proactive effort, our staff had located and removed approximately 12,000 known lead goosenecks from its water distribution system by the year 2005. In 2018, we completed an inventory of its remaining unknown utility-owned services lines—none consisted of lead material.

LADWP conducted LCR residential sampling in 2020. During the sampling program, 100 first draw samples were obtained from customers' homes and analyzed at LADWP's water quality laboratory. The results showed a 90th percentile of 5.0 parts per billion (ppb) for lead and 394 ppb for copper. Both values were well below the respective Action Levels of 15 ppb for lead and 1300 ppb for copper.

LCR Program Requirements

The LCR sampling program focuses on single family residences which were built within 1982 to 1987 that have copper pipes plumbed with lead solder. Customers with qualifying homes that participate in the sampling program will get their tap water tested for lead and copper at no cost.

If your home qualifies, you can participate in LADWP's next round of LCR sampling between June and September. Contact the Water Quality Hotline at (213) 367-3182 or by email at waterquality@ladwp.com.

Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is also available from the Safe Drinking Water Hotline: (800) 426-4791, or at www.epa.gov/lead

Assessment Programs for Surface and Groundwater Resources

Source water assessment updates are required by the SWRCB-DDW and must be included in the annual drinking water quality report. LADWP completed an initial source water assessment in 2002 and is required to provide an updated assessment every five years through a watershed sanitary survey. Watershed sanitary surveys examine possible contamination to sources of drinking water and recommend actions to better protect these water sources.

Below is an update of LADWP's source water assessment.

Surface Supply:
In 2020, LADWP completed an assessment of the Owens Valley and Mono Basin watersheds that supply the Los Angeles Aqueduct. These sources are most vulnerable to geothermal activities that release naturally occurring arsenic into creeks which feed the Owens River. Assessments were also completed for the Lower Stone Canyon Reservoir Watershed in 2019 and Encino Reservoir Watershed in 2020. Activities that impact water quality in these watersheds are livestock grazing, wildlife, and unauthorized public use of storage reservoirs. The impact to water quality from these activities is deemed to be minimal.

LADWP regularly monitors for cryptosporidium and giardia. Results indicate that their presence is infrequent and remain at very low levels in these watersheds.

Groundwater Supply:
Assessment of groundwater sources in the San Fernando Basin was updated in 2018. Assessment of groundwater sources in the Central and Sylmar Basins was completed in February 2019. Located in highly urbanized areas, the wells within these aquifers are most vulnerable to the following activities: dry cleaning, manufacturing, metal finishing, septic systems, chemical processing, and storage of fertilizer, pesticides, and chemicals. These local water supplies are treated and blended with water from other sources to ensure compliance with drinking water standards.

Purchased Imported Supplies from MWD:
The most recent surveys for MWD's source waters are the

Granular Activated Carbon vessels at North Hollywood West Remediation Project are helping us clean our local groundwater, providing a sustainable water supply as a viable alternative to costly, imported water.

Colorado River Watershed Sanitary Survey – 2020 Update, and the State Water Project Watershed Sanitary Survey – 2016 Update. Each source water used by MWD — the Colorado River and State Water Project — has different water quality challenges. Both are exposed to stormwater runoff, recreational activities, wastewater discharges, wildlife, fires and other watershed-related factors that could affect water quality. Treatment to remove specific contaminants can be more expensive than measures to protect water at the source. This is why MWD and other water agencies invest resources to support improved watershed protection programs.

Three of the five MWD treatment plants -- F.E. Weymouth, Robert B. Diemer, and Joseph Jensen -- supply water to the Los Angeles area. MWD tests its water for nearly 400 constituents and performs about 250,000 water quality tests per year on samples gathered from its vast distribution system. Analysis of these samples is undertaken at MWD's water quality laboratory. Results from MWD are provided to LADWP and are included in the report on Tables I, II and III.

Safeguarding our Surface Water

Administered by the SWRCB-DDW, the Surface Water Treatment Rule (SWTR) is a set of drinking water regulations that establish specific treatment requirements for surface water to reduce the risk of waterborne diseases.

The last update to the SWTR is the Long Term 2 Enhanced Surface Water Treatment Rule (LT2) which was put into effect in 2006. This rule protects treated water reservoirs from microbiological contamination by requiring one of three actions: 1) covering, 2) removing from service, or 3) providing additional treatment. LT2 applied to the six remaining uncovered reservoirs at the time: Los Angeles, Upper Stone Canyon, Santa Ynez, Ivanhoe, Silver Lake, and Elysian.

In March 2009, a compliance agreement for LT2 was executed between LADWP and SWRCB-DDW. The Los Angeles Reservoir is the only remaining reservoir awaiting completion of additional treatment.

Los Angeles Reservoir will remain in compliance with the LT2 through a combination of shade balls and construction of a new ultraviolet (UV) treatment plant. The "shading" of the reservoir was completed in 2015 with nearly 96 million shade balls deployed. The new UV treatment facility will disinfect water leaving the Los Angeles Reservoir to satisfy the LT2 water quality regulation. Construction began in June 2017 and will be completed July 2021.

Visit www.ladwp.com/waterquality to learn more about water quality projects and issues. For more information on the latest watershed sanitary surveys contact (213) 367-3182.

*Sources of drinking water may fluctuate in these communities depending on operational needs and source water availability.

DRINKING WATER QUALITY MONITORING RESULTS

Tables I, II and III list the results of water tests performed by the LADWP and MWD from January to December 2020. LADWP tests for over 148 substances. These tables include only substances with values that are detected. No substance was detected above the maximum contaminant level.

Terms used in Tables:

Compliance: A drinking water standard based on the health risk (primary standards) and aesthetic (secondary standards) exposure of a contaminant to consumers. For example, bacteria and nitrate have strict limits that must be met at all times due to the acute effects they can cause. Other standards, like small amounts of disinfection by-products and man-made chemicals, have standards that are based on a lifetime of exposure because the risk to consumers is very low. Compliance with most standards is based on an average of samples collected within a year. This allows for some fluctuation above and below the numerical standard, while still protecting public health.

Detection Level for Reporting (DLR):
A detected contaminant at or above its detection level for reporting purposes. DLRs are set by the SWRCB-DDW. Data reported in Tables I through III reflect DLRs.

Federal Minimum Reporting Level (MRL): Minimum concentration of a contaminant which can be detected in drinking water using analytical methods established by the U.S. EPA. Data reported in Table IV reflect MRLs.

Maximum Contaminant Level (MCL): Highest level of a contaminant that is allowed in drinking water. Primary MCLs are set as close to the PHGs (or MCLGs) as is economically and technologically feasible. Secondary MCLs are set to protect the odor, taste, and appearance of drinking water.

Maximum Contaminant Level Goal (MCLG): Level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs are set by the U.S. EPA.

Maximum Residual Disinfectant Level (MRDL): Highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

Maximum Residual Disinfectant Level Goal (MRDLG): Level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the beneficial use of disinfectants to control microbial contaminants. MRDLGs are set by U.S. EPA.

Notification Level (NL): Health-based advisory level established by SWRCB-DDW for chemicals in drinking water that lack MCLs.

Primary Drinking Water Standard (PDWS): MCLs, MRDLs and treatment techniques (TTs) for contaminants that affect health, along with their monitoring and reporting requirements.

Public Health Goal (PHG): Level of a contaminant in drinking water below which there is no known or expected risk to health. PHGs are set by the California Environmental Protection Agency.

Regulatory Action Level (AL): Concentration of a contaminant which, if exceeded, triggers treatment or other requirements that a water system must follow.

Secondary Maximum Contaminant Level (SMCL): Highest level a constituent allowed in drinking water that may affect the taste, odor or appearance. SMCLs are set by the U.S. EPA.

Treatment Technique (TT): Required process intended to reduce the level of a contaminant in drinking water. For example, the filtration process is a treatment technique used to reduce turbidity (cloudiness in water) and microbial contaminants from surface water. High turbidities may be indicative of poor or inadequate filtration.

Microbiologists testing water samples at LADWP's state-of-the-art water quality lab

HOW TO READ THE TABLES

The substances found in the water served in your area are listed as follows:

- For San Fernando Valley Area – water test results are under the Los Angeles Aqueduct Filtration Plant (LAAFP), the Northern Combined Wells (NCW), and the Metropolitan Water District (MWD) Jensen Plant columns.
- For Central Los Angeles Area – water test results are under the LAAFP and the Southern Combined Wells (SCW) columns.
- For Western Los Angeles Area – water test results are under the LAAFP columns.
- For Harbor/Eastern Los Angeles Area – water test results are under MWD Weymouth, Diemer, and Jensen Plants columns.

Some substances are reported on a citywide basis as required by SWRCB-DDW.

Abbreviations and Footnotes

ACU = apparent color unit

CFU/mL = colony-forming unit per milliliter

< = less than the detection limit for reporting purposes

µg/L = micrograms per liter (equivalent to ppb)

µS/cm = microsiemens per centimeter

mg/L = milligrams per liter (equivalent to ppm)

NTU = nephelometric turbidity units

NA = not applicable

NR = not reported

NT = not tested

NUM/100 mL = number per 100 milliliter

% = percentage

pCi/L = picocuries per liter

TON = threshold odor number

TABLE I

Calendar Year 2020 Water Quality Monitoring Results

Health-based Primary Drinking Water Standards (MCLs)
Substances Detected in Treated Water

Substances	Major Sources in Drinking Water	Units	Meets Primary Standard (YES / NO)	State Primary Standard MCL	State PHG	"Los Angeles Aqueduct Filtration Plant"		"Northern Combined Wells"		"Southern Combined Wells"		"MWD Weymouth Plant"		"MWD Diemer Plant"		"MWD Jensen Plant"

		%		TT = 95% of samples ≤0.3 NTU		100						100		100		100	
Uranium (d)	Erosion of natural deposits	pCi/L	YES	20	0.43	2.9	2.5 - 3.6	2.7	2.1 - 3.5	2.7	2.1 - 6.2	2	1 - 3	2	1 - 3	<1	<1 - 3

(a) Values reflect Highest Running Annual Average (HRAA). HRAA is the highest of all Running Annual Averages (RAAs) in the reported calendar year. RAA is a calculated average of all samples collected within the previous 12-month period, which may include test data from the previous calendar year. HRAA may be higher than the range, which is based on the test data in the reported calendar year.

(b) Bromate is formed in water treated with ozone in the presence of bromide. Bromate has also been found in water treated with chlorine in some uncovered reservoirs in LADWP that have elevated bromide levels and are exposed to sunlight. MWD tests for bromate at its Diemer and Jensen Filtration Plants, which use ozone. Weymouth Plant has tested for bromate for less than 12-month period and so RAA is not calculated. All LADWP distribution reservoirs are now shielded with flexible covers or shade balls to minimize bromate formation.

(c) Turbidity is a measure of the cloudiness of water and is a good indicator of water quality and filtration performance. High turbidity can hinder the effectiveness of disinfectants. The Primary Drinking Water Standard for turbidity (included in this table) at water filtration plants is less than or equal to 0.3 NTU in at least 95 percent of the measurements taken in any month and shall not exceed 1.0 NTU at any time. The reporting requirement for treatment plant turbidity is to report the highest single measurement in the calendar year as well as the lowest monthly percentage of measurements that are less than or equal to 0.3 NTU.

(d) Radiological monitoring is performed in cycles of various frequencies in LADWP for treated sources water and at the blend points. Monitoring for Gross Alpha Particle Activity is performed in six year cycle and was conducted in 2016. Monitoring of Combined Radium-226 and Radium-228 is performed in three year cycle and was conducted in 2019. Monitoring of Gross Beta Particle Activity, Strontium-90, Tritium and Uranium is performed annually. MWD conducted all radiological monitoring in 2020.

TABLE I (CONT'D)

Calendar Year 2020 Water Quality Monitoring Results

Health-based Primary Drinking Water Standards (MCLs)
Substances Detected in Treated Water and Reported on Citywide Basis

Substances	Major Sources in Drinking Water	Units	Meets Primary Standard (YES/NO)	State Primary Standard MCL or (MRDL)	State PHG / (MRDLG)	Average	Range
Bromate (uncovered reservoirs)	Byproduct of ozone disinfection; formed under sunlight for chlorinated water	µg/L	YES	10	0.1	HRAA = <1 (a)	Range = <1
Chlorine Residual, Total	Drinking water disinfectant added for treatment	mg/L	YES	(4)	(4)	HRAA = 1.9 (a)	Range = 1.8 – 2.0
Copper (at-the-tap) Action LeveL = 1300 (e)	Internal corrosion of household water plumbing systems	µg/L	YES	TT	300	90th Percentile value = 394	"Number of samples exceeding AL = 0 out of 100"
Fluoride	Erosion of natural deposits; water additive that promotes good dental health	mg/L	YES	2	1	Average = 0.7	Range = 0.7 - 0.9
Haloacetic Acids (Five) (HAA5)	Byproduct of drinking water disinfection	µg/L	YES	60	none	HLRAA = 11 (f)	Range = 3 – 12
Lead (at-the-tap) Action Level = 15 (e)	Internal corrosion of household water plumbing systems	µg/L	YES	TT	0.2	90th Percentile value = 5.0	"Number of samples exceeding AL = 1 out of 100"
Total Coliform Bacteria	Naturally present in the environment	% Positives	YES	≤5% of monthly samples are coliform positive	0	Highest monthly % positive samples = 0.7%	Range = % positive samples 0% – 0.7%
Total Trihalomethanes (TTHM)	Byproduct of drinking water disinfection	µg/L	YES	80	none	HLRAA = 27 (f)	Range = 7 - 29

(a) Values reflect Highest Running Annual Average (HRAA). HRAA is the highest of all Running Annual Averages (RAAs) in the reported calendar year. RAA is a calculated average of all samples collected within the previous 12-month period, which may include test data from the previous calendar year. HRAA may be higher than the range, which is based on the test data in the reported calendar year.

(e) At-the-tap monitoring of lead and copper is conducted as required by the federal Lead and Copper Rule. A system is out of compliance if the federal Action Level is exceeded in more than 10 percent of all samples collected at the customers' tap. The most recent monitoring was conducted in 2020. Although the City's treated water has little or no detectable lead, studies were conducted and corrosion control implementation started. A corrosion control study was completed in 2019 which found that LADWP's corrosion control treatment is optimized and that it does not require the continued addition of a corrosion inhibitor.

(f) The federal Stage 2 Disinfectants/Disinfection Byproducts Rule (Stage 2 D/DBPR) requires compliance monitoring and reporting for total trihalomethanes (TTHM) and five haloacetic acids (HAA5) based on Locational Running Annual Averages (LRAAs) of established monitoring locations. The Highest Locational Running Annual Averages (HLRAAs) of all LRAAs in the current calendar year for TTHM and HAA5 are reported.

TABLE II

Calendar Year 2020 Water Quality Monitoring Results

Aesthetic-based Secondary Drinking Water Standards (SMCLs)
Substances Detected in Treated Water

Substances	Major Sources in Drinking Water	Units	Meets Secondary Standard (YES/NO)	State SMCL or Federal (SMCL)	"Los Angeles Aqueduct Filtration Plant"		"Northern Combined Wells"		"Southern Combined Wells"		"MWD Weymouth Plant"		"MWD Diemer Plant"		"MWD Jensen Plant"

Unregulated Contaminant Monitoring Rule

The Unregulated Contaminant Monitoring Rule (UCMR) is a special program developed by the U.S. EPA that requires public water systems to monitor up to 30 selected contaminants of emerging concerns (CECs) once every five years.

During the fourth UCMR (UCMR4), LADWP monitored 29 unregulated contaminants. The contaminants monitored were total microcystins, microcystin-LA, microcystin-LF, microcystin-L, microcystin-LY, microcystin-RR, microcystin-YR, nodularin, anatoxin-a, cylindrospermopsin, germanium, manganese, alpha-hexachlorocyclohexane, chlorpyrifos, dimethipin, ethoprop, profenofos, tebuconazole, total permethrin (cis- & trans-), tribufos, oxyfluorfen, HAA5, HAA6Br, HAA9,1-butanol, 2-methoxyethanol, 2-propen-1-ol, butylated hydroxyanisole, o-toluidine and quinolone.

Most of the contaminants were not detected. Table IV below provides the contaminants that were detected during UCMR4. Contaminants that were detected were lower than the MCLs. Algal bloom and cyanotoxin were monitored at the source locations for each sampling event, and were not detected.

TABLE IV

Calendar Year 2020 Water Quality Monitoring Results

The Fourth U.S. EPA Unregulated Contaminant Monitoring Rule (UCMR4) Substances Detected In Treated Water

Substances	Units	Meets MCL or NL (YES / NO)	State Primary Standard MCL or (NL)	State PHG or Federal (MCLG)	San Fernando Valley				Central LA		Western LA		Harbor/Eastern LA	
					Los Angeles Aqueduct Filtration Plant		Northern Combined Wells		Southern Combined Wells		Los Angeles Aqueduct Filtration plant		Distribution System Sampling Locations	
					Average	Range	Average	Range	Average	Range	Average	Range	Average	Range
Bromide	mg/L	NA	NA	NA	0.06	0.04 - 0.09	0.07	0.03 - 0.11	0.07	0.03 - 0.2	0.06	0.04 - 0.09	NT	NT
Manganese NL = 500	µg/L	YES	(500)	NA	<0.4	<0.4 - 0.45	0.76	0.55 - 0.87	0.76	0.70 - 0.82	<0.4	<0.4 - 0.45	1.34	0.60 - 1.86
Total Organic Carbon (TOC)	mg/L	NA	NA	NA	1.6	1.5 - 1.7	1.3	1.1 - 1.6	1.3	0.3 - 2.2	1.6	1.5 - 1.7	7	4.4 - 12.8
HAA5	µg/L	YES	60	NA	3.3 (h)	1.9 - 4.4 (h)	3.3 (h)	1.9 - 4.4 (h)	3.6 (h)	2.7 - 5.0 (h)	4.0 (h)	2.7 - 7.4 (h)	6.0 (h)	5.3 - 7.0 (h)
HAABr6	µg/L	NA	NA	NA	2.1 (h)	1.0 - 3.7 (h)	2.1 (h)	1.0 - 3.7 (h)	2.7 (h)	2.2 - 3.8 (h)	2.6 (h)	1.5 - 4.6 (h)	3.7 (h)	3.3 - 4.3 (h)
HAA9	µg/L	NA	NA	NA	1.5 (h)	0.8 - 2.9 (h)	1.5 (h)	0.8 - 2.9 (h)	1.6 (h)	1.1 - 2.4 (h)	1.8 (h)	1.2 - 3.7 (h)	3.3 (h)	2.8 - 4.3 (h)

(h) For UCMR4 sampling, LADWP used the same established sampling locations as used for the Stage 2 Disinfectants/Disinfection By-Products Rule compliance monitoring. HAA5, HAABr6 and HAA9 were based on locational averages. These sample points are located throughout LADWP's distribution system. Data has been grouped by geographical area for the HAA results.

General Information

This annual Drinking Water Quality Report (also known as a Consumer Confidence Report) is required by the California State Water Resources Control Board, Division of Drinking Water (SWRCB-DDW) and is prepared in accordance with their guidelines. The report is available online at www.ladwp.com/waterqualityreport. Copies may be requested by calling (213) 367-3182.

LADWP, the largest municipal utility in the nation, was established more than 100 years ago and provides a safe, reliable water and power supply to the city's more than 4 million residents and businesses. LADWP is governed by a five-member Board of Water and Power Commissioners, appointed by the Mayor and confirmed by the City Council. The Board meets regularly on the second and fourth Tuesdays of each month at 10:00 a.m.

Meetings are held at:

Los Angeles Department of Water and Power
111 North Hope Street, Room 1555H
Los Angeles, CA 90012-2694

The meeting agenda is available to the public on the Thursday prior to the week of the meeting. You can access the Board agenda and view the meetings live online at www.ladwp.com/board or by calling (213) 367-1351.

For general information about LADWP, call (800) 342-5397 or visit www.ladwp.com.

For questions regarding this report, please call the Water Quality Hotline at (213) 367-3182.

THIS MESSAGE IS FOR NON-ENGLISH SPEAKING LADWP CUSTOMERS

ASTM E-1527-13 PHASE I ENVIRONMENTAL SITE ASSESSMENT
PRE-SURVEY QUESTIONNAIRE AND DISCLOSURE STATEMENT

Site Contact: Please complete this questionnaire before the Consultant's site visit. For those questions that are not applicable to the subject please respond with an "N/A". This document must be signed by the Owner or his/her representative (Item No. 2). If you have any questions about how to answer any of the questions please call EDI. If additional pages for response are necessary please attach them to this form. Clearly mark all references to the appropriate question number(s). This document and your written response to same will be an exhibit in EDI's report.

1. PROPERTY INFORMATION:

Property Name: Not completed by Owner or Owner's Representative		
Property Address:		
City	State	Zip
Assessor's Parcel Number:		

2. COMPLETED BY

Signature	Date
Printed Name	Title

3. ASTM-REQUIRED INQUIRIES

Property Owner:		
Name:	Phone:	Fax:
Key Site Manager (Site contact):		
Name:	Phone:	Fax:
If not residential Property, please provide list of tenants, including contact names and phone numbers.		
Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law. If so, please documents along with completed questionnaire to EDI		☐ Yes ☐ No
Are you aware of any Activity Use Limitations (AULs) such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law If so, please send documents along with completed questionnaire to EDI		☐ Yes ☐ No
Do you have any specialized knowledge or experience related to the property or nearby properties For example, are you involved in the same line of business the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business		☐ Yes ☐ No
Do you have any specialized knowledge that would be material in identifying recognized environmental conditions in connection with the Property		☐ Yes ☐ No
Does the purchase price being paid for this property reasonably reflect the fair market value of the property If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the Property		☐ Yes ☐ No
Are you aware if commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases For example: Do you know the past use of the property Do you know specific chemicals that are present		☐ Yes ☐ No

Please return completed form and any attachments via fax to:
EDI Consultants, Inc., 21151 S. Western Ave., Suite 100, Torrance, CA 90501
Telephone: 310-832-2300 Fax: 310-362-8843

or once were present at the property□ Do you know of spills or other chemical releases that have taken place at the property□ Do you know of any environmental cleanups that have taken place at the property□	
Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property□	☐ Yes ☐ No

Please attach explanation of all affirmative answers.

8) Please state reason for procuring this Phase 1 ESA:

☐ Qualify for Innocent Landowner defense to CERCLA Liability.

☐ Other: (state below)

4. PLEASE PROVIDE A GENERAL SITE DESCRIPTION BY COMPLETING THE FOLLOWING TABLE:

Legal description/ boundary survey/ plat available (please send to EDI if "yes")	☐ Yes ☐ No
Total Property Size	
Total number of buildings	
Total square footage of buildings	
Date of construction	
Dates of significant renovation	
Waste water discharge ☐ Municipal Sanitary Sewer ☐ On-site septic system ☐ Other	
Potable water source ☐ Community Water Supplier ☐ On-site well ☐ Other	
Please describe prior use of property, if known:	

5. PREVIOUS INVESTIGATIONS:

Have any previous environmental investigations been performed at the site□

☐ Yes ☐ No

INVESTIGATION TYPE **If yes, please describe conclusions, and attach copy of report(s)**	
☐ Phase 1 ESA	
☐ Phase 2 ESA	
☐ Tank Tightness Testing	

Have any previous environmental investigations been performed at the site? ☐ Yes ☐ No	
INVESTIGATION TYPE **If yes, please describe conclusions, and attach copy of report(s)**	
☐ Asbestos Survey/ O&M	
☐ Radon	
☐ Lead-based Paint	
☐ Lead in Water	
☐ Operations & Maintenance Plan(s)	
☐ Other	

6. ON SITE OPERATIONS

Are you aware of any of the following conditions, either past or present, on the site?		
Condition	**Response**	**If yes, please describe**
1. Stored Chemicals	☐ Yes ☐ No	
2. Underground Storage Tanks	☐ Yes ☐ No	
3. Aboveground Storage Tanks	☐ Yes ☐ No	
4. Spills or Releases	☐ Yes ☐ No	
5. Dump Areas/ Landfills	☐ Yes ☐ No	
6. Waste Treatment Systems	☐ Yes ☐ No	
7. Clarifies/ Separators	☐ Yes ☐ No	
8. Air stacks/ Vents/ Odors	☐ Yes ☐ No	
9. Floor Drains/Sumps	☐ Yes ☐ No	
10. Stained Soil/ Impacted Vegetation	☐ Yes ☐ No	
11. On-site OWNED Electrical Transformers	☐ Yes ☐ No	
12. Hydraulic lifts/ Elevators	☐ Yes ☐ No	
13. Dry Cleaning Operations	☐ Yes ☐ No	
14. Wetlands/ Flooding	☐ Yes ☐ No	
15. Oil/ Gas/ Water/ Monitoring Wells	☐ Yes ☐ No	
16. Environmental Cleanups	☐ Yes ☐ No	
17. Environmental Permits	☐ Yes ☐ No	If **yes**, please describe and ATTACH ALL COPIES of permits. Please attach last three waste manifests.
a) Industrial Discharge	☐ Yes ☐ No	
b) POTW (NPDES)	☐ Yes ☐ No	
c) Hazardous Waste Generator	☐ Yes ☐ No	
d) Air Quality	☐ Yes ☐ No	
e) Flammable Materials	☐ Yes ☐ No	
f) AST/UST	☐ Yes ☐ No	

Are you aware of any of the following conditions, either past or present, on the site		
Condition	**Response**	**If yes, please describe**
g) Waste Manifest(s)	☐ Yes ☐ No	
h) Other	☐ Yes ☐ No	

7. OFF SITE ENVIRONMENTAL CONCERNS

Are you aware of any of the following conditions, either past or present, Adjacent to the site		
Condition	**Response**	**If yes, please describe**
Gasoline Stations	☐ Yes ☐ No	
Dry Cleaners	☐ Yes ☐ No	
Industrial Uses	☐ Yes ☐ No	
Other	☐ Yes ☐ No	

Appendix J - Personnel Profile

SUMMARY OF EXPERIENCE

Brian Tang is a Senior Project Manager at EDI Consultants, Inc. (EDI) in Torrance, California. Mr. Tang has more than 6 year of experience in projects involving due diligence environmental site assessments, property condition assessments, data management, Geographic Information Systems (GIS), subsurface investigations of soil and groundwater contamination, environmental and geotechnical engineering projects for high profile clients throughout the nation.

At EDI, Mr. Tang manages a team performing Phase I and II Environmental Site Assessments, Property Condition Assessments, and other environmental risk assessments for major U.S. banks and lending institutions throughout the nation. In addition, he prepares and reviews technical documents for Phase I and II Environmental Site Assessments.

Mr. Tang is an Environmental Professional who possesses sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases on, at, in, or to a property, sufficient to meet the objectives and performance factors. As an Environmental Professional, Mr. Tang must hold a current Professional Engineer's or Professional Geologist's license or registration from a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) and have the equivalent of three (3) years of full-time relevant experience; or (ii) be licensed or certified by the federal government, a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) to perform environmental inquiries and have the equivalent of three (3) years of full-time relevant experience; or (iii) have a Baccalaureate or higher degree from an accredited institution of higher education in a discipline of engineering or science and the equivalent of five (5) years of full-time relevant experience; or (iv) have the equivalent of ten (10) years of full-time relevant experience.

RELEVANT PROJECT EXPERIENCE

Phase I & Phase II Environmental Site Assessments, Nationwide
Project Manager of Phase I and Phase II environmental site assessments for industrial and commercial real estate as well as multifamily dwellings for major U.S. banks and lending institutions throughout the nation. Conducted subsurface investigations of soil, groundwater and soil vapor contamination to assess and determine the need for further investigation and/or remediation as well as underground storage tank removals, cleanup and coordination with local and State governmental agencies for closure of same.

Property Condition Assessments, Nationwide
Project manager for more than 100 property condition assessments (PCAs) for a wide range of clients throughout the western United States. PCAs provide reliable and detailed information on the building's operating systems, overall design and architectural features, and any signs of material physical deterioration or functional obsolescence that could detract from the building's potential to generate income. In addition, he has examined the impact of local zoning regulations, building codes, and any special hazards that may affect the income stability of the property.

EDUCATION

B.S. Environmental Engineering, University of California, Irvine, 2013

Undergraduate Experience

Well Water Treatment
The purpose of this project is to design two shallow ground water wells for the City of Corona to reduce the demand on the Colorado River by 3,600 acre-ft per year. The project includes the design of an 11,500 ft pipeline to transport the raw well water as well as a treatment facility to treat for turbidity, nitrates, and perchlorates.

Site Planning Report
The goal of this project is to complete a Site Planning Report incompliance of the City of Irvine General Plan for the development of a 1,200 acre planning area centered on a transportation theme of alternative fuels. The planning area is composed of 3,200 dwelling units, a shopping center, a high school, recreational parks and open space to support a population of about 13,000 residents.

Environmental Professional
Board for Professional Engineers, Land Surveyors, and Geologist – Certified Engineer-in-Training (EIT)

EDI CONSULTANTS, INC.

Darrin Domingo, MBA, REPA, CHMM **Principal**

SUMMARY OF EXPERIENCE

Darrin Domingo is the Principal and founder of EDI Consultants, Inc. (EDI) in Torrance, California. Mr. Domingo has more than 27 years of experience in projects involving due diligence environmental site assessments, property condition assessments, data management and database design, Geographic Information Systems (GIS), cost engineering, subsurface investigations of soil and groundwater contamination, and environmental and geotechnical engineering projects including civil and remediation design.

RELEVANT PROJECT EXPERIENCE

Various Clients, Phase I, Phase II Environmental Site Assessments, Nationwide. Project manager for more than 5,000 combined Phase I, Phase II environmental site assessments for industrial and commercial real estate as well as multifamily dwellings for major U.S. banks and lending institutions throughout the nation. Conducted subsurface investigations of soil, soil gas and groundwater contamination to assess and determine the need for further investigation and/or remediation as well as underground storage tank removals, cleanup and coordination with local and State governmental agencies for closure of same.

Various Clients, Property Condition Assessments, Nationwide. Project manager for more than 100 property condition assessments (PCAs) for a wide range of clients throughout the western United States. PCAs provide reliable and detailed information on the building's operating systems, overall design and architectural features, and any signs of material physical deterioration or functional obsolescence that could detract from the building's potential to generate income. In addition, he has examined the impact of local zoning regulations, building codes, and any special hazards that may affect the income stability of the property.

SWDiv CLEAN, Environmental Baseline Survey (EBS), El Toro MCAS, California
GIS and database administrator for the Environmental Baseline Survey of over 1000 structures at El Toro MCAS. Prepared comprehensive maps of the MCAS El Toro in a Geographic Information System (GIS), by combining information gathered during the site evaluation with existing and planned information. The GIS was developed in ArcView for GIS analysis and the preparation of maps; and Microsoft Access for the storage and analysis of attribute data. Attribute data was collected in the field via a customized Palm Pilot interface. Responsible for application development of the Palm Pilot EBS Form for data acquisition in the field and seamless downloading of information into the database. Attribute data encompassed site information including pertinent environmental, land use, and watershed data. Also, field sketches and digital photo notes were entered into the Palm Pilot and converted to bitmap images within the database for retrieval of same. Responsible for uploading and management of all data for queries, analyses, and either output for use in the GIS maps; or Report Tables within the EBS.

SWDiv CLEAN, Naval Environmental Data Transfer Standard (NEDTS), El Toro MCAS, California. GIS and database administrator for groundwater, soil and vapor analytical data. Developed the Navy Environmental Data Transfer Standard (NEDTS) database and Data Management Plan (DMP) for the Southwest Division Comprehensive Long-Term Environmental Action Navy, El Toro Marine Corps Air Station. The NEDTS provides an open, platform independent standard that permits the Navy to describe information to be captured and delivered electronically without imposing any hardware or software requirements on the contracting community. This application automates day-to-day activities of integrating electronic data deliverables (EDD) from analytical laboratories and presenting the information in customized forms and reports. The application is developed utilizing MS Access as the data repository. ESRI's ArcView GIS and Autodesk's Volo View technology are integrated with the database to provide dynamic maps of on-site monitoring wells. A customized switchboard interface allows for automated retrieval of as-built drawings, charts, reports, and GIS views.

Lockheed Martin Corporation, Metadata Reference System, Redlands, California. Lead technical and database administrator for the Metadata Reference System for the Redlands site. Developed records management plan for administration of office-wide project data and records management system for efficient gathering, storage, and retrieval of all related electronic and hardcopy data.

SWDiv RAC, Naval Environmental Data Transfer Standard (NEDTS), Yermo and Nebo Marine Corp Logistics Bases, Barstow, California. Database design and management of the Navy's Southwest Division Remedial Action Contract (SWDiv RAC) databases for both Yermo and Nebo MCLBs. Developed and implemented NEDTS in a client/server architecture (Access 2000/SQL Server) for integration of data into ArcView GIS for mapping and spatial analysis of various subsurface contaminants. Used ESRI's Spatial Analyst and ModelBuilder extensions to map and analyze areas of contaminant influence, delineate plume extents, and generate contours.

New Cure, Inc., OII Landfill MIS/GIS System, Monterey Park, California. GIS Analyst and Database Administrator working in a design-build capacity to facilitate implementation of a remedial cap design for an EPA Superfund site. Provided AutoCAD and LDD civil/remediation design, hazardous waste management via programming and development of the management information system (MIS) using MS Access and the GIS for associated landfill hazardous materials and gases integrating ESRI's ArcView. Conducted environmental modeling and statistical and trend analysis of methane migration via ESRI's ArcView Spatial Analyst and 3D Analyst extensions. In coordination with the landfill gas consultant, designed and implemented the Well Adjustment Decision Tree programmed in Access for automated well adjustments in the field. Created automated data transfer procedure from GEM 2000 units into Access for analyzing gas composition and calculating flow. Trained staff technicians on effective use of the MIS/GIS System, Well Adjustment Decision Tree, as well as data collection and importing procedures.

Owner, Kyoto Plaza, Gardena, California. Operated and maintained soil vapor extraction system at Kyoto Plaza. Collected air (vapor) samples and conducted evaluation of vacuum, influent/effluent data. Developed MS Access data repository, which included but were not limited to integration of historical vapor extraction data into a standardized relational database design. Responsible for data management and modeling.

Southern California Gas Company, PAH Removal and Geotechnical Investigation, Hanford, California. Supervised and managed the removal of PAH-impacted soil, including subsurface investigation, sampling, and recompaction of fill soil. Ensured and designed proper grading of site utilizing Autodesk's Survey.

Home Savings of America, UST Removal and Upgrade, Irwindale, California. Supervised the removal and replacement of underground storage tanks, clarifiers, and hydraulic lifts at the corporate headquarters of Home Savings of America in Irwindale, CA. Also, performed subsurface investigation and confirmation sampling to achieve closure within the required Los Angeles County and state regulations.

Metropolitan Transportation Authority, Geotechnical Oversight for Red Line Segment 2 and 3, Los Angeles/Hollywood, California. Geotechnical engineer responsible for subsurface investigation and construction monitoring of geological conditions via geological/geotechnical mapping at the tunnel face. Performed geotechnical engineering analysis of settlement data in cooperation with land survey teams and staff geologists/geotechs at the tunnel face during tunnel excavation along Hollywood and Vermont Boulevards. Performed laboratory testing and interpretation of soils, field observation, fill testing, geotechnical engineering analysis including slope stability analysis, utilization of AutoCAD for grading and drainage plans, hydrologic analysis, and geotechnical report preparation.

California Department of Transportation (Caltrans), Advanced Public Transportation Systems Group, Los Angeles, California. Provided computer mapping and analysis of traffic data via MapInfo GIS. Created maps using MapInfo in support of various transportation tasks and updated traffic data in the APTS data repository built in MS Access. Assisted in the project management of the Smart Traveler Kiosk Project and the I-110 Vanpool Support Program.

Montebello, CA 90640

RE: **Phase I Environmental Site Assessments**
116, 128 & 136 Poplar Avenue and 129 & 133 Poplar Ave., Montebello, CA 90640
EDI Project Nos. 221-0741 and 221-0789

Dear Mr. Palombi:

EDI Consultants, Inc. ("EDI") prepared Phase I Environmental Site Assessments ("Reports") for the above-mentioned properties (the "Project").

EDI's Phase I Environmental Site Assessment (ESA) dated December 23, 2021 for the property located at 129 & 133 Poplar Avenue, Montebello, CA revealed no evidence of known Recognized Environmental Conditions (RECs) in connection with the Subject Property. In addition, EDI's Phase I ESA dated November 8, 2021 for the property located at 116, 128 & 136 Poplar Avenue, Montebello, CA revealed no evidence of known RECs in connection with the Subject Property.

As such, it is EDI's professional opinion that a Preliminary Endangerment Assessment (PEA) under DTSC oversight is not warranted for the Project based on the findings and conclusions in EDI's Phase I ESAs which indicate that no RECs were identified on site nor with the surrounding properties.

EDI recognizes that the City of Montebello will utilize the Reports for the purposes of assessing the environmental risk inherent in the contemplated development of the Subject Property. EDI certifies that the Reports were prepared in accordance with the due diligence practices as delineated by the American Society for Testing and Materials (ASTM). Attached please find a copy of our insurance certificate documenting our professional errors and omissions coverage.

Sincerely,

Darrin A. Domingo, MBA, REPA, CHMM
Principal - EDI Consultants, Inc.

Re: **Phase I Environmental Site Assessment**
Single-family Residences
129 & 133 N. Poplar Ave
Montebello, California 90640
EDI Project No. 221-0879

Dear Mr. Magna:

Pursuant to our agreement dated December 10 2021, EDI Consultants, Inc ("EDI") has conducted a Phase I Environmental Site Assessment (ESA) of the above referenced property conforming to the scope and limitations of ASTM Standard E 1527-13. The findings of this assessment are based upon a visual reconnaissance of the Subject Property, interviews with relevant personnel, limited observations of surrounding properties, and a records review including regulatory databases and historical use information. Any exception to, or deletions from, this practice are described in Sections 2.0-2.4 of this report.

The purpose of this Report is to assist Magna & Magna, Inc. in its underwriting of a proposed mortgage loan on the Subject Property described herein.

This report was prepared for and may be relied upon by Magna & Magna, Inc. and its participants, lenders, affiliates, successors, and assigns (collectively, “The Client”) with respect to any loan(s) placed on the property described in the report. Any rating agency, issuer or purchaser of any security collateralized or otherwise backed by such loan(s), any servicer (and their collective successors and assigns), any underwriter co-underwriting any such securities, and any institutional provider(s) of any liquidity or credit support for such financings may also rely upon the report. The Client may, at its option, elect to include the report in its entirety in the offering memorandum or other disclosure materials relating to the Securitization (as defined below). We also consent to the inclusion of this report in its entirety in any form, whether in paper or digital format, including any electronic media such as CD-ROM or the internet, in any Prospectus Supplement or other offering document relating to any "Securitization" (defined as an offering of debt securities that, as applicable, are registered with the Securities Exchange Commission pursuant to the Securities Act of 1933, as amended [the “Act”], or are privately placed pursuant to an exemption from the Act, in which the property reported upon may be part of a pool of properties owned by various non-affiliated owners collateralizing such offering) and the filing, if applicable, and the dissemination thereof, and we consent to the reference to our firm under the caption "Experts" in such Prospectus Supplement or other offering document, at The Client's discretion.

CERTIFICATIONS, LIMITATIONS AND STATEMENT OF INDEPENDENCE

This report has been prepared by the staff of EDI for Magna & Magna, Inc. under the professional supervision of the principal and/or senior staff whose seal(s) and signatures appear hereon. Neither EDI, nor any staff member, has any interest or contemplated interest, financial or otherwise, in the subject or surrounding properties, or in any entity that owns, leases, or occupies the subject or surrounding properties or that may be responsible for environmental issues identified during the course of this investigation, and has no personal bias with respect to the parties involved.

The information contained in this report has received appropriate technical review and approval. The conclusions represent professional judgments and are founded upon the findings of the assessments identified in the report and the interpretation of such data based on our experience and expertise according to the existing standard of care. No other warranty or limitation exists, either expressed or implied.

The report was prepared in accordance with Magna & Magna, Inc.'s Phase I Environmental Site Assessment scope of work and the scope and limitations of ASTM Standard E 1527-13 for the use and benefit of Magna & Magna, Inc., it's successors, and assignees. It is based, in part, upon documents, writings, and information owned, possessed, or secured by Magna & Magna, Inc.. Neither this report, nor any information contained herein shall be used or relied upon for any purpose by any other person or entity without the express written permission of Magna & Magna, Inc..

1.0 INTRODUCTION

EDI Consultants, Inc ("EDI") conducted a Phase I Environmental Site Assessment (ESA) for the Single-family Residences, located at 129 & 133 N. Poplar Ave, Montebello, California, on December 21, 2021 utilizing currently accepted ESA industry standards in accordance with ASTM E 1527-13, *Standard Practice for Environmental Site Assessments: Phase 1 Environmental Site Assessment Process* and Magna & Magna, Inc.'s (Magna) Environmental Due Diligence requirements. ASTM Standard E-1527-13 constitutes "*all appropriate inquiry"* into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B). Exceptions to or deletions from the scope of work are described in Section 9.4.

1.1 OPINIONS AND CONCLUSIONS

1.1.1 RECOGNIZED ENVIRONMENTAL CONDITIONS (RECs)

The assessment has revealed no evidence of known Recognized Environmental Conditions (RECs) in connection with the Subject Property.

1.1.2 CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS (CRECs)

The assessment has revealed no evidence of known Controlled Recognized Environmental Conditions (CRECs) in connection with the Subject Property.

1.1.3 HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS (HRECs)

The assessment has revealed no evidence of known Historical Recognized Environmental Conditions (HRECs) in connection with the Subject Property.

1.1.4 OTHER ENVIRONMENTAL CONSIDERATIONS (OECs)

No known Other Environmental Considerations (OECs) were identified during the course of this assessment.

1.1.5 De MINIMIS CONDITIONS

No known De Minimis Conditions were identified during the course of this assessment.

1.2 RECOMMENDATIONS

No Further Action

2.0 SITE DESCRIPTION OVERVIEW

A description of the key characteristics of the Subject Property is provided below. This description is derived from information provided by the User and information gathered during the site reconnaissance unless otherwise noted. Photographs of the Subject Property and adjacent properties are included in Appendix A. A Site Location Map is included in Appendix B.

2.1 SUBJECT PROPERTY

PROPERTY INFORMATION	
Property Name	Single-family Residences
Address	129 & 133 N. Poplar Ave, Montebello, Los Angeles, California
Subject Property Acreage	Total 0.286 acres
Current Owner	Magna and Magna, Inc.
Current Occupant(s)	Residences
Number of Parcels	Two (2)
Tax ID / Parcel #(s)	6346020012 & 6346020013
Legal Description	Please refer to the Subject Property's Preliminary Title Report (Appendix H) for the complete legal description.

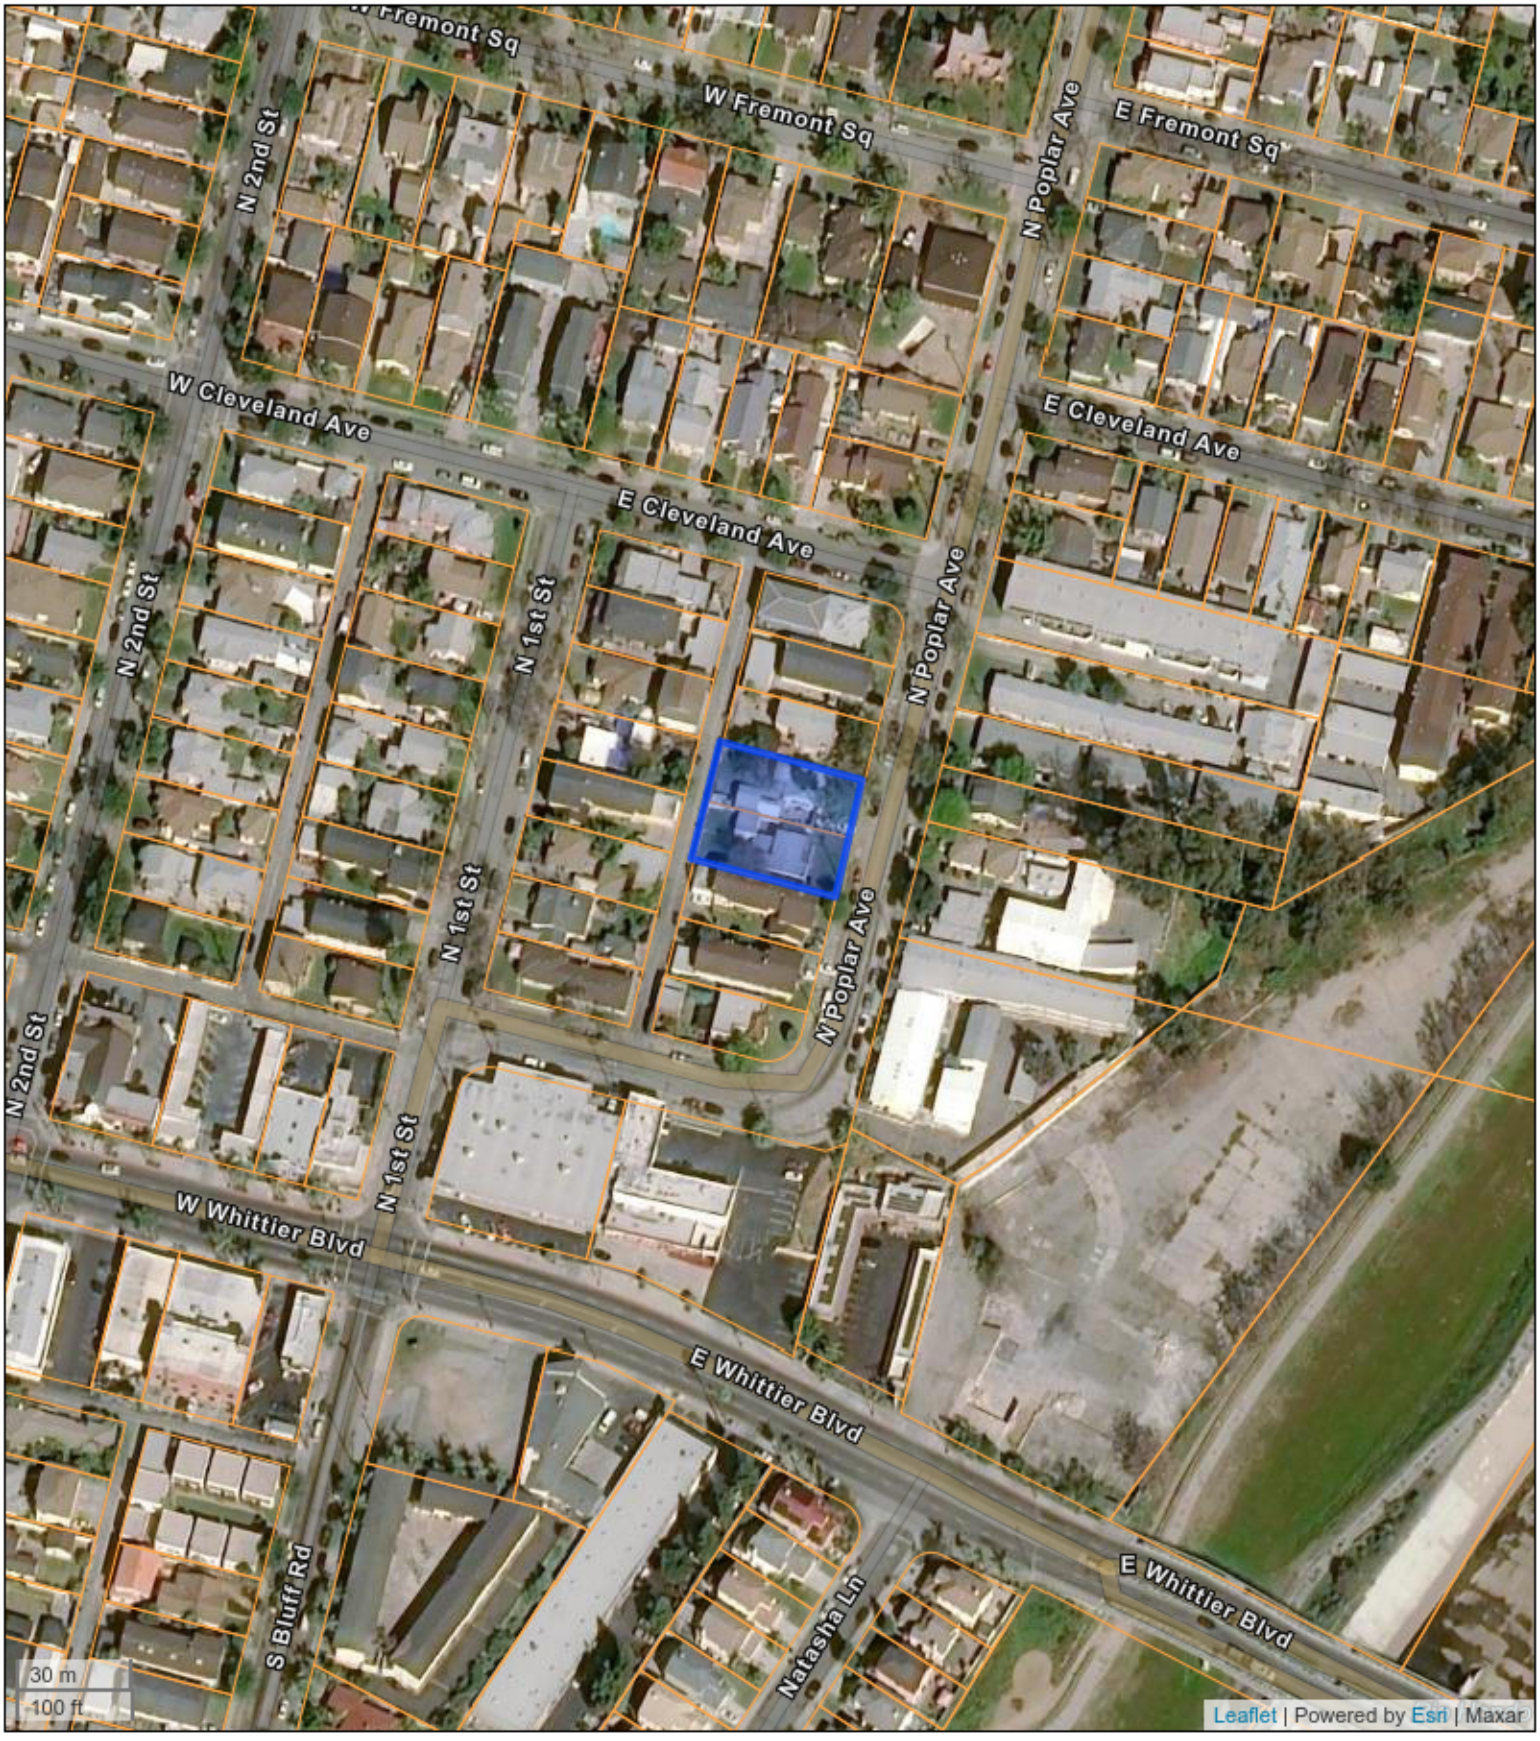

Figure 1 - Site Location Map

129 & 133 N Poplar Avenue
Montebello, CA 90640
EDI Project No.: 221-0879

EDI CONSULTANTS

2.1.1 CURRENT USE OF THE PROPERTY

The Subject Property is developed with Residential. A description of the Subject Property and any building on it and a current tenant list with a short description of their operations is provided below:

PROPERTY FEATURES AND IMPROVEMENTS	
Shape of Parcel(s)	Rectangular
Usage	Residential
Number of Buildings	Two (2)
Stories	Single-story
Construction Date	1927
Square Footage	1,233 and 1,090
Basement/Slab-on-Grade	Slab-on-Grade
Number of Units	Two (2)
Elevators	N/A
Transformers	N/A
Emergency Generators	N/A
Other Improvements	Two detached garages
Property Coverage	Landscaped grounds, Concrete-paved walkways and driveways

The current residential use of the Subject Property does not represent a potential environmental concern.

2.1.2 UTILITIES

SUBJECT PROPERTY UTILITIES	
Electricity	SoCal Edison
Water	City of Montebello
Sanitary Sewer	City of Montebello

SUBJECT PROPERTY UTILITIES	
Natural Gas	SoCal Gas
Solid Waste	City of Montebello

2.2 SITE AND VICINITY GENERAL CHARACTERISTICS

The Subject Property is located in a suburban setting which is characterized by residential development as well as vacant land. The following is a tabulation of surrounding property usage:

Direction	Adjoining Properties	Listed in Regulatory Database
North	Single-family residence (137 North Poplar Avenue)	☐
South	Multi-family residence (127 North Poplar Avenure)	☐
East	Single-family residence (134 North Poplar Avenue)	☐
West	Single-family residence (128 N 1st St)	☐

No adverse surficial environmental conditions were observed on the adjoining properties. Adjacent properties listed in the regulatory database(s), if any, are discussed in Section 7.1.2.

3.0 USER PROVIDED INFORMATION

Pursuant to ASTM E 1527-13, EDI requested the following site information from Magna & Magna, Inc. (User of this report).

Type of Information	User Provided	Issue Identified	Comments
Title Records	Yes	No	Preliminary Title Report dated September 24, 2021 prepared by Old Republic Title Company on behalf of Logix Federal Credit Union. No previous property owners were identified which are suspected of impairing the environmental quality of the Subject Property.
Environmental Liens or Activity and Use Limitations	No		
Specialized Knowledge	No		
Commonly Known or Reasonably Ascertainable Information	No		
Valuation Reduction for Environmental Issues	No		
Previous Reports	No		
Owner, Property Manager, Occupant Information	Yes	No	Magna and Magna, Inc. reportedly owns and manages the Subject Property which is currently occupied by residences.
Reason for Performing the Phase I	Yes	No	This ESA was performed to permit the *User* to satisfy one of the requirements to qualify for the *innocent landowner*, *contiguous property owner*, or *bona fide prospective purchaser* limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "*landowner liability protections*," or "*LLPs*").
ASTM User Questionnaire	No		
Other	No		

EDI considers the lack of environmental liens, AULs, ASTM user questionnaires and owner questionnaires for this resource to be a data gap; however, based on other available resources for the property, the absence of these user-provided items does not represent a significant data gap for the Subject Property.

4.0 ENVIRONMENTAL SETTING

Information regarding hydrological conditions in the region was obtained from review of the following:

- United States Geological Survey (USGS) 7.5 Minute Topographic Map,
- United States Department of Agriculture (USDA) Soil Conservation reports,
- Physical Settings Report (ERIS)
- Ground water contour maps, and
- Local regulatory sources.

4.1 TOPOGRAPHY AND REGIONAL SURFACE WATER

TOPOGRAPHY AND REGIONAL SURFACE WATER	
Elevation (feet above mean sea level)	206 ft
Inferred Groundwater / Surface Water Gradient	South-southeast
Nearest Water Body	Rio Hondo, approximately 479 feet SE
Source (USGS Topographic Quadrangle)	El Monte, California

4.2 GEOLOGY AND HYDROLOGY

GEOLOGY AND HYDROLOGY	
Geologic Formation / Province	Geologic Unit Q
Geologic Description	Quaternary alluvium and marine deposits
Soil Type	Urban land-Azuvina-Montebello complex, 0 to 5 percent slopes

GEOLOGY AND HYDROLOGY	
Soil Description	Map Unit Setting • National map unit symbol: 2pt42 • Elevation: 70 to 1,420 feet • Mean annual precipitation: 14 to 23 inches • Mean annual air temperature: 64 to 66 degrees F • Frost-free period: 355 to 365 days • Farmland classification: Prime farmland if irrigated Map Unit Composition • Urban land: 45 percent • Azuvina and similar soils: 25 percent • Montebello and similar soils: 20 percent • Minor components: 10 percent Estimates are based on observations, descriptions, and transects of the mapunit.
Groundwater Flow Direction	South-southeast
Approximate Depth to Groundwater	The depth to groundwater beneath the Subject Property is not specifically known

4.3 OIL & GAS EXPLORATION

The on-site reconnaissance addressed oil and gas exploration at the Subject Property. No evidence of oil or gas wells or the drilling of oil and gas wells was observed on site. In addition, EDI's review of the State of California Division of Oil and Gas and Geothermal Resources (DOGGR) online mapping system did not indicate any onsite oil, gas, or geothermal fields on the Subject Property.

It should be noted that a former oil and gas well (API #0403705699) is located approximately 200 feet to the east-northeast of the Subject Property. The former well was plugged with cement and abandoned. Of importance, the historical oil and gas well was properly plugged and abandoned as per California Division of Oil and Gas (CDOG) requirements at the time. Based on the foregoing, this former off-site oil and gas well is not suspected to have impacted the Subject Property.

5.0 HISTORICAL RECORDS REVIEW

EDI attempted to determine the history of the Subject Property dating back to 1940 or first developed use. The following records were available and reviewed:

5.1 HISTORICAL SOURCES REVIEWED

5.2 HISTORICAL RECORDS FINDINGS

5.2.1 PAST USES OF SUBJECT PROPERTY

Prior to the construction of the existing improvements in 1927, the Subject Property was undeveloped land from as far back as 1925. Since construction, the development and use of the Subject Property as two (2) single-family residences has remained essentially unchanged.

The previous uses of the Subject Property are described in the table below in intervals where meaningful property changes were noted.

PAST USES OF SUBJECT PROPERTY		
Years	**Historical Use**	**REC Identified**
Aerial Photographs		
1928 - 2020	The Subject Property is depicted with 2 of the existing residential buildings and a detached garages.	☐
Fire Insurance Maps		
1925	The Subject Property is depicted as vacant land.	☐
1929 - 1966	The Subject Property is depicted with the two (2) existing residential buildings and a detached garages.	☐
Topographic Maps		
1981	The Subject Property is shaded in pink denoting urban land/developed land.	☐
Local City Directories		
1948 - 1965	129 Smith J A 133 Oldham W G	☐
1972 - 1975	129 XXXX 133 Demille Theora	☐
1995 - 2000	129 Magna Joseph 133 XXXX	☐
2005	129 Garcia Dora & Ruben 133 Carbajal Anita	☐
2008 - 2020	NO LISTING FOUND FOR THIS YEAR	☐

5.2.2 NOTABLE PAST USES OF ADJACENT PROPERTIES

The previous uses of the adjacent properties which warrant mention are described in the table below.

NOTABLE PAST USES OF ADJACENT PROPERTIES			
Years	**Historical Use**	**Historical Source**	**REC Identified**
North			
1925 - 2020	No notable past uses of the north adjacent property were identified indicating a potential environmental concern.	Aerial Photographs Fire Insurance Maps Topographic Maps Local City Directories	☐
South			
1925 - 2020	No notable past uses of the south adjacent property were identified indicating a potential environmental concern.	Aerial Photographs Fire Insurance Maps Topographic Maps Local City Directories	☐
East			
1925 - 2020	No notable past uses of the east adjacent property were identified indicating a potential environmental concern.	Aerial Photographs Fire Insurance Maps Topographic Maps Local City Directories	☐
West			
1925 - 2020	No notable past uses of the west adjacent property were identified indicating a potential environmental concern.	Aerial Photographs Fire Insurance Maps Topographic Maps Local City Directories	☐

6.0 SUBJECT PROPERTY RECONNAISSANCE

As part of the site reconnaissance, EDI looked for evidence of the presence of hazardous substances used, stored, or discarded at and near the Subject Property. A summary of the site reconnaissance is provided below. Locations of pertinent observations are depicted on the figures provided in the appendices of this report. Photographs of pertinent findings and features observed during the site reconnaissance are provided in Appendix A of this report.

6.1 METHODOLOGY & LIMITATIONS

The Subject Property site reconnaissance was conducted in a systematic manner focusing initially on the exterior, which was surveyed in a grid pattern. The following spaces were visually and physically observed: Subject Property exteriors as well as adjoining and surrounding properties. Given the current COVID-19 pandemic, interior access to occupied units was not made available due to safety and health concerns of property management and staff in addition to the State's stay-in-place order that was in effect as of the inspection date. A tour of the common hallways and all exterior improvements was performed. Where access to portions of the Subject Property or to structures on the Subject Property was unavailable or limited, EDI renders no opinion as to the presence of petroleum products or hazardous substances in that portion of the Subject Property or structure. In addition, EDI renders no opinion as to the presence of, or indirect evidence relating to, petroleum products or hazardous substances where direct observation of the interior walls, floor, or ceiling of a structure was obstructed by objects or coverings on or over these surfaces.

The following spaces were visually and physically observed and when reasonably accessible:

- Subject Property interiors
- exteriors
- mechanical
- electrical rooms
- adjoining and surrounding properties

There were no notable portions of the Subject Property excluded from this survey.

Site Reconnaissance Date	December 21, 2021
Assessor	Raymond Hashimoto
Weather	63ºF; Cloudy
Limiting Conditions	None
Key Site Contact(s); Title	Mark Magna; Subject Property Owner

A Pre-Survey Questionnaire to be filled out and returned to EDI by someone knowledgeable about the site was provided to Mr. Magna, Subject Property Owner. A copy of the completed Pre-Survey Questionnaire is provided in Appendix D.

6.2 INTERVIEWS

The following information was provided by individuals contacted by EDI in connection with the Subject Property. Findings from these interviews are discussed in the appropriate sections in this report.

INTERVIEW COMMENTS		
Contact	**Relation to Subject Property**	**Details of Conversations**
Mark Magna	Subject Property Owner	Mr. Magna was not present during the time of the inspection. As part of this Assessment, Mr. Magna had completed an Environmental Questionnaire (Section H). Based on the information requested in the questionnaire, Mr. Magna indicated that no existing RECs, deficiencies, or other environmentally related problems are known to exist at the Subject Property.

6.3 OBSERVATIONS

The following tables summarize items on which the survey of interior and exterior areas of the Subject Property focused. If noted, the item is discussed in detail in Sections below:

Item	Noted- Interior	Noted - Exterior	Location
Processes that generate petroleum products or hazardous substances	☐	☐	
Unusual odors	☐	☐	
Pools of liquid	☐	☐	
Drums	☐	☐	
Stains or corrosion	☐	☐	
Drains and Sumps	☐	☐	

Item	Noted- Interior	Noted - Exterior	Location
Oil-containing equipment	☐	☐	
Underground Storage Tanks (USTs)	☐	☐	
Aboveground Storage Tanks (ASTs)	☐	☐	
Areas of asphalt patch or surface depressions	☐	☐	
Stained soil or pavement	☐	☐	
Stressed vegetation	☐	☐	
Fill material of questionable origin/ Piles	☐	☐	
Wastewater	☐	☐	
Monitoring Wells	☐	☐	
Catch basins or dry wells	☐	☐	
Septic systems	☐	☐	
Wetlands	☐	☐	
On-site Water Well	☐	☐	
Other	☐	☐	

6.3.1 OIL CONTAINING EQUIPMENT

Polychlorinated Biphenyls (PCBs) are known hazardous materials that are found in coolants or lubricating oils used in some electrical transformers, light ballasts, electrical panels or other similar equipment. PCB content in electrical transformers has been grouped into three (3) regulatory categories by the federal government. Parts per million is signified by ppm.

- 0 - 50 ppm non-PCB unit
- 50 - 500 ppm PCB contaminated unit
- >500 ppm PCB unit

Utility companies often own transformer equipment and typically assume the responsibility for repair or replacement of damaged or leaking units and for required cleanup or remediation activities. Indications of damage or leakage should be immediately reported to the responsible utility company.

No major electrical equipment (transformers, capacitors) likely containing PCB oils was observed at the Subject Property.

6.4 VAPOR ENCROACHMENT CONDITION

EDI has conducted a Vapor Encroachment Screen (VES) by evaluating historic and regulatory record sources along with soil, topographic, and groundwater data in the vicinity of the Property. The purpose of the VES is to determine the likelihood that Vapor Encroachment Conditions (VECs) exist at the Property. It should be noted that this VES was not conducted in full compliance with ASTM E2600-15; rather, this VES is the equivalent of a Tier 1 screening. Consideration of vapor encroachment consists of reviewing available information and use of professional judgment in determining 1) whether contamination is suspected in the soil and/or groundwater at, or near, the Property, and 2) whether identified contamination is suspected to exist within a 'Critical Distance' from the Property.

"Critical Distances", as defined in ASTM E2600-15 Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions, refer to the maximum distances at which vapor encroachment may occur. These distances vary depending on topographic and hydrologic gradient, width of the contaminant plume, and type of contaminant known, or suspected, to exist. Generally, Critical Distances are 100 feet for non-petroleum contaminants of concern (COCs) and 30 feet for dissolved petroleum COCs. If a facility is beyond the critical distance, it is highly unlikely that a VEC exists. Consideration of topographic gradient is key to defining the Areas of Concern (AOCs) within which Critical Distances are applied. When plume data is not available, AOCs are used in lieu of Critical Distance to determine whether a VEC exists or not. According to ASTM E2600, the AOCs for these critical distances are as follows:

- 1,760 feet (1/3 mile) for contamination located up-gradient of the Property, except for dissolved petroleum hydrocarbons, which have a distance of 528 feet (1/10 mile),
- 365 feet for contamination located cross-gradient of the Property,
- 100 feet for contamination located down-gradient of the Property, with the exception of dissolved petroleum hydrocarbons, which have a distance of 30 feet. If non-aqueous phase petroleum hydrocarbons (LNAPL) are present, the 100-foot distance is utilized.

In defining a standard of good commercial and customary practice for determining a VEC on a parcel of property, the goal of the process established by this practice is to identify whether or not a VEC exists or is likely to exist on the property. The term VEC means the presence or likely presence of any COC in the indoor air environment of existing or planned structures on a property caused by the release of vapor from contaminated soil or groundwater either on the property or within close proximity to the property, at a concentration that presents or

may present an unacceptable health risk to occupants. The term is not intended to include de minimis conditions that do not normally represent an unacceptable health risk to occupants and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be de minimis does not represent a VEC.

In EDI's professional opinion, none of the adjacent sites listed in the databases reviewed pose a significant threat to the Subject Property based on one or more of the following rationale: 1) there is no indication of a release at the respective sites, 2) a release has occurred but the medium affected was the soil only and the site is beyond the Critical Distance, and 3) the site location and/or plume of contamination is downgradient and in excess of the Critical Distance from the Subject Property. Thus, a VEC can be ruled out because a VEC is not suspected to exist at the Subject Property. In addition, potential exposure to a VEC, should it exist, is further reduced by the presence of structures and pavement at the site. Based on the foregoing, no further action is warranted at this time with respect to a potential VEC from an adjacent property.

6.5 NON-ASTM STANDARD OBSERVATIONS

6.5.1 ASBESTOS CONTAINING MATERIAL (ACM)

The use of asbestos in many building products was banned by the U.S. Environmental Protection Agency (EPA) by the late 1970s. In 1989, EPA issued a ruling prohibiting the manufacturing, importation, processing, and distribution of most asbestos containing products. This rule, known as the Ban & Phase-Out Rule, would have effectively banned the use of nearly 95% of all asbestos products used in the United States. However, the U.S. 5th Circuit Court of Appeals vacated and remanded most of the Ban and Phase Out Rule in October 1991. Due to this court decision, many asbestos containing product categories not previously banned (prior to 1989) may still be in use today. Among these common material types found in buildings are floor tile and roofing materials.

Asbestos-containing material (ACM) represents a concern when it is subject to damage that results in the release of fibers. Friable ACM, which can be crumbled by hand pressure and is therefore susceptible to damage, is of particular concern. Non-friable ACM is a potential concern if it is damaged by maintenance work, demolition or other activities.

No friable ACM was identified. However, due to its age, the Subject's "popcorn"-textured ceiling finishes, the non-friable joint compound, resilient floor finishes, and wallboard assemblies may contain asbestos. Since these non-friable materials are in good condition and the potential for fiber release is low, no further action is recommended at this time. However, in the event that building maintenance, renovation, or demolition require the removal or disturbance of the suspect ACM, EDI recommends that the non-friable organically bound materials be characterized for asbestos by transmission electron microscopy, a reliable method for detecting asbestos in

non-friable organically bound materials. Other suspect materials can be analyzed via polarized light microscopy. All activities involving ACM should be conducted in accordance with governmental regulations.

6.5.2 LEAD-BASED PAINT (LBP)

LBP is paint with a lead concentration greater than 5,000 parts per million (ppm) as defined by the EPA. LBP may be an environmental concern in residential properties based on the condition and maintenance of the paint and the presence or absence of LBP hazards. A LBP hazard is defined as damaged paint or paint covering a deteriorated subsurface that may create dust or chips that could potentially be ingested or inhaled.

The Subject Property's buildings were constructed between 1925 and 1928, prior to the Consumer Product Safety Commission's 1978 ban on the sale of LBP to consumers. As such, it is possible for LBP to be present on-site. Note, however, that the Subject Property's buildings have reportedly undergone several re-paintings since 1978 and therefore, older under-lying LBP (should it exist) would be encapsulated under several coats of non-LBP. Of importance, painted surfaces observed were in good condition and void of significant peeling and flaking. Based on the presumed use of non-LBP in residences and other areas where consumers have direct access to painted surfaces after 1978, it is unlikely that LBP in locations and quantities suspected to represent an environmental concern exists on-site. Notwithstanding, it is recommended that all such possible LBP-containing surfaces be tested prior to significant renovation or demolition activities that could disturb the LBP. Any testing, removal, or disturbance of LBP should be handled in compliance with federal, state, and local regulations.

6.5.3 RADON

Radon gas is a gas created from the radioactive decay of uranium. It exists in soil with a high concentration of uranium rocks or industrial waste. Radon gas may seep into and accumulate in dwellings through cracks in the foundation or walls or any other opening such as a floor drain.

The EPA has categorized radon levels into three (3) regulatory zones measured in pico-Curies per liter (pCi/L). The EPA action level for radon is 4.0 pico-Curies per liter.

- Level 1: Greater than 4 pCi/L
- Level 2: Between 2 and 4 pCi/L
- Level 3: Less than 2 pCi/L

Analysis for radon is not within the scope of an ASTM Phase I investigation. Magna did not request a radon gas screening, therefore EDI did not conduct a screening as part of this Phase I investigation.

The EPA Map of Radon Zones indicates Los Angeles County is in a Zone 2 radon area. Zone 2 is defined as areas that have a moderate potential for radon gas with levels >2.0 picocuries per liter (pCi/L) but < 4.0 pCi/L. The EPA guideline for radon is 4.0 pCi/L. Due to the non-residential use of the Subject Property, and in accordance with the scope of work, radon testing was not performed. Notwithstanding, long term sampling and testing are the only definitive means of radon detection.

6.5.4 LEAD IN DRINKING WATER

Lead has historically been used in pipes, solder, and brass fixtures used in water distribution systems and plumbing material. In 1986, EPA banned the use of lead at concentrations exceeding 0.2% lead in solder and 8% lead in other plumbing material.

The City of Montebello provides domestic water to the vicinity. Analysis for lead in drinking water is not within the scope of a Phase I ESA investigation. The Client did not request a lead in drinking water screening; therefore, EDI did not conduct a screening. According to City of Montebello's 2020 Annual Water Quality Report (*Appendices - Supporting Documents*), the City of Montebello is in compliance with all federal and local regulations concerning water quality. Based upon the foregoing information, EDI's opinion is that lead in drinking water is not a concern at the Subject Property. Notwithstanding, lead in drinking water sampling and testing are the only definitive means of lead detection.

7.0 REGULATORY RECORDS REVIEW

In accordance with ASTM Practice E1527-13, EDI reviewed applicable and reasonably accessible federal, state, and local records as part of this Phase I ESA. The environmental records review was performed in the form of an environmental database search conducted by Environmental Risk Information System, in an attempt to ascertain whether the Subject Property or neighboring properties were suspected of having environmental conditions with the potential to impact (or that have impacted) the soil, soil gas, and/or groundwater at the Subject Property. The database search included regulatory agency lists of known or potential hazardous waste facilities, landfills, hazardous waste generators, and disposal facilities in addition to properties under investigation under investigation due to identified or potential contamination. The information provided in this section was obtained from publicly available sources. The locations of the properties listed in this report are plotted with a geographic information system (GIS) utilizing geocoding of property addresses. Specific records and search distances for these environmental databases were reported by ERIS to be consistent with ASTM Practice E1527-13 and are discussed in the ERIS report (dated October 25, 2021).

7.1 FEDERAL AND STATE REGULATORY REVIEW

A copy of the regulatory database report provided by Environmental Risk Information System (ERIS) appears in Appendix G. EDI reviewed each database report to determine if certain sites identified therein are suspected to represent a material negative environmental impact to the Subject Property. The following table summarizes the number of sites by database within the prescribed search radius appearing in the database report:

Regulatory Report Summary

Database	Search Radius	Target Property	Within 0.12mi	0.12mi to 0.25mi	0.25mi to 0.50mi	0.50mi to 1.00mi	Total

7.1.1 SUBJECT PROPERTY REGULATORY REVIEW

The Subject Property was not identified in any of the State or Federal databases reviewed.

7.1.2 ADJACENT PROPERTIES REGULATORY REVIEW

The properties listed on the database were evaluated utilizing their downgradient to upgradient hydrologic locations in relation to the Subject Property in addition to other factors (see Section 4.1).

In October 1995, the Lawrence Livermore National Laboratory presented “Recommendation to Improve the Cleanup Process for California’s Leaking Underground Fuel Tanks.” Data compiled by Lawrence Livermore indicated that fuel groundwater contamination plumes seldom extended greater than 400 feet (0.075 mile) from the source in the worst cases. Therefore, EDI uses this data to further evaluate concern presented by off-site properties identified in the database. It should be noted that this data is specific to fuel releases. It should also be noted that the data was in some cases for very permeable soil types.

A summary of the adjacent properties of potential concern are listed in the table below:

Surrounding Properties Summary

Database	Site Name	Address	Dist. (mi) / Dir.	Elev. diff. (ft)	Comments

No adjacent properties were listed in the regulatory database report indicating a potential contamination condition suspected of having impacted the Subject Property.

Off-Site properties were identified during the review of the regulatory database report. These properties are not suspected of adversely impacting the Subject Property based on one or more of the following rationale:

- the sufficient distance from the Subject Property;
- their assumed topographic position relative to the Subject Property (i.e. downgradient);
- inferred groundwater flow direction away from the Subject Property;
- the nature of their release (i.e., soil only);
- the absence of reported leaks, spills or violations; and
- their reported regulatory status (i.e. no further action, case closed).

7.1.3 NON-GEOCODED SITES

The regulatory database report identified three (3) “Non-Geocoded” (orphan) sites. Non-Geocoded Sites are those sites which could not be mapped due to inadequate address information. Refer to the database report contained in Appendix G for a list of these Non-Geocoded Sites. EDI attempted to locate these sites via vehicular reconnaissance and interviews with personnel familiar with the area. Based on this research, EDI did not identify any Non-Geocoded Sites within the specified radii.

7.2 LOCAL REGULATORY REVIEW

Information obtained from local agencies was requested via one of the following methods

- written correspondence,
- review of published data,
- telephone conversations, or
- in person.

Local offices consulted during the preparation of this *Report* included the Los Angeles County Assessor as well as the City of Montebello Building & Safety, Code Enforcement, and Planning Divisions, and Fire Department. Documentation applicable to the Subject Property in those departments was requested and reviewed when and where reasonably ascertainable, as detailed in ASTM E-1527-13. No documented adverse environmental conditions or complaints were reported at the Subject Property and readily on file at these offices. The local offices did not contain records of spills or releases having occurred at the Subject Property.

Source	Date Contacted	Information Received	Comments
Los Angeles County Department of Public Works (LACDPW)	11/04/21	☐	EDI submitted a FOIA request to the LACDPW Environmental Programs Division for information regarding storage tanks, chemical spills, and other potential environmental concerns in connection with the Subject Property.

As of the date of this *Report* EDI has not received a response to this inquiry. Upon receipt of the agency response, if the provided information has a material affect on the findings of this *Report*, EDI will forward the new information, together with revised findings, as an addendum to this *Report*. If no response is received or no material violations are noted, our Report will not be modified.

8.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

EDI declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental professional* as defined in §312.10 of 40 CFR 312" and We have the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Certified Hazardous Materials Manager – No. 11546

9.0 PURPOSE AND SCOPE OF WORK

EDI was retained by Magna & Magna, Inc. (“Magna”) to prepare a Phase I Environmental Site Assessment, in compliance with ASTM Standard Practice E1527-13 on the Subject in accordance with our agreement dated December 10 2021.

9.1 PURPOSE

The purpose of this Phase I Environmental Site Assessment (ESA) is to define good commercial and customary practice in the United States of America for conducting an environmental site assessment of a parcel of commercial real estate with respect to the range of contaminants within the scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) and *petroleum products*. As such, this practice is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability (hereinafter, the “landowner liability protections,” or “LLPs”): that is, the practice that constitutes “all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice” as defined at 42 U.S.C. §9601(35)(B).

EDI understands that the findings of this study will be used by Magna & Magna, Inc. to evaluate a pending financial transaction in connection with the Subject Property with respect to ASTM Standard E 1527-13.

ASTM Standard Practice E1527-13 defines a *Recognized Environmental Condition (REC)* as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. Conditions determined to be de minimis generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not Recognized Environmental Conditions or Controlled Recognized Environmental Conditions.

A *Controlled Recognized Environmental Condition (CREC)* is a Recognized Environmental Condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

A *Historical Recognized Environmental Condition (HREC)* is a past release of any hazardous substances or petroleum products that has occurred in connection with the Property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the Property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

De minimis conditions are defined by ASTM as environmental conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

Other Environmental Considerations (OEC) warrant discussion, but do not qualify as RECs as defined by ASTM. These include, but are not limited to, de minimis conditions, environmental considerations, business environmental risks and/or Non-ASTM-Scope Issues such as the presence of ACMs, LPB, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property.

9.2 DETAILED SCOPE OF SERVICES

The scope of work for this ESA is in general accordance with the requirements of ASTM Standard E 1527-13. EDI warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an Environmental Site Assessment of a property for the purpose of identifying recognized environmental conditions. No other warranties are implied or expressed.

9.3 SIGNIFICANT ASSUMPTIONS

There is a possibility that even with the proper application of these methodologies there may exist on the Subject Property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. EDI believes that the information obtained from the record review and the interviews concerning the site is reliable. However, EDI cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The methodologies of this assessment are not intended to produce all inclusive or comprehensive results, but rather to provide Magna & Magna, Inc. with information relating to the Property.

9.4 LIMITATIONS AND EXCEPTIONS OF ASSESSMENT

The purpose of this report is to assess the Subject Property with respect to the presence of hazardous substances or petroleum products in accordance with the provisions of ASTM Standard E 1527-13.

The conclusions presented in this report are professional opinions, based solely upon visual observations of the Subject Property and vicinity and our interpretation of the available historical information and documents reviewed as described in this report. They are intended exclusively for the purpose outlined herein and for the Subject Property location and project indicated. EDI is a technical not legal firm, as such we offer no opinion as to the legal aspects of environmental compliance (permitting, remediation, etc.) and anyone relying upon this report should have this ESA reviewed by counsel regarding any legal issues. This report is intended for the sole use of Magna & Magna, Inc.. The scope of services performed in execution of this investigation may not be appropriate to satisfy the needs of other users, and any use or reuse of this document or the findings, and conclusions, presented herein is at the sole risk of said user.

It should be recognized that this study was not intended to be a definitive investigation of contamination at the Subject Property. It is possible that currently unrecognized contamination may exist at the Subject Property. Opinions presented herein apply to Subject Property conditions existing at the time of our investigation and those reasonably foreseeable. They cannot necessarily apply to Subject Property changes of which EDI is unaware and has not had the opportunity to evaluate. Additional information that becomes available after our survey and draft submission concerning the Subject Property should be provided to EDI so that our conclusions may be revised and modified if necessary, at additional cost. This Report has been prepared in accordance with our Standard Conditions for Engagement, which is an integral part of this Report.

This Phase I Environmental Site Assessment Report was performed in accordance with applicable, generally accepted environmental consulting practices currently practicing in the same locality under similar conditions, and utilizing methods and procedures consistent with established commercial practices and in conformance with industry standards. The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM 1527-13.

9.5 SPECIAL TERMS AND CONDITIONS

The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the client. No subsurface exploratory drilling or sampling was done under the scope of this work. Unless specifically stated otherwise in the report, no chemical analyses have been performed during the course of this ESA.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

9.6 USER RELIANCE

All reports, both verbal and written, are for the benefit of Magna & Magna, Inc., its successors and assigns. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of EDI.

10.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

10.1 Definition of an Environmental Professional

An Environmental Professional means: *(1)* a person who possesses sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases (see §312.1(c)) on, at, in, or to a property, sufficient to meet the objectives and performance factors in §312.20(e) and (f). *(2)* Such a person must: (i) hold a current Professional Engineer's or Professional Geologist's license or registration from a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) and have the equivalent of three (3) years of full-time relevant experience; or (ii) be licensed or certified by the federal government, a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) to perform environmental inquiries as defined in §312.21 and have the equivalent of three (3) years of full-time relevant experience; or (iii) have a Baccalaureate or higher degree from an accredited institution of higher education in a discipline of engineering or science and the equivalent of five (5) years of full-time relevant experience; or (iv) have the equivalent of ten (10) years of full-time relevant experience. *(3)* An environmental professional should remain current in his or her field through participation in continuing education or other activities. *(4)* The definition of environmental professional provided above does not preempt state professional licensing or registration requirements such as those for a professional geologist, engineer, or site remediation professional. Before commencing work, a person should determine the applicability of state professional licensing or registration laws to the activities to be undertaken as part of the inquiry identified in §312.21(b). *(5)* A person who does not qualify as an environmental professional under the foregoing definition may assist in the conduct of all appropriate inquiries in accordance with this part if such person is under the supervision or responsible charge of a person meeting the definition of an environmental professional provided above when conducting such activities.

10.2 Relevant Experience

Relevant experience, as used in the definition of environmental professional in this section, means: participation in the performance of all appropriate inquiries investigations, environmental site assessments, or other site investigations that may include environmental analyses, investigations, and remediation which involve the understanding of surface and subsurface environmental conditions and the processes used to evaluate these conditions and for which professional judgment was used to develop opinions regarding conditions indicative of releases or threatened releases (see §312.1(c)) to the subject property.

Resumes for the Environmental Professionals involved in this project are included in Appendix I.

RE: CITY DIRECTORY RESEARCH
129 & 133 N Poplar Ave
129 & 133 N Poplar Ave Montebello, CA

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

Search Criteria:

BEG-145 of N Poplar Ave
BEG-150 of E Whittier Blvd

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Violations

Violation Date: 09/25/2015
Violation Program: APSA
Citation: HSC 6.67 25270.6(a)(2) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.6(a)(2)
Violation Source: CERS
Violation Division: Los Angeles County Fire Department

Violation Notes:

Returned to compliance on 11/03/2015. OBSERVATION: Failure to submit a Tank Facility Statement or Business Plan. CORRECTIVE ACTION: Submit a Tank Facility Statement or Business Plan.

Violation Description:

Failure to submit a Tank Facility Statement or Business Plan.

Violations

Violation Date: 09/25/2015 ***Violation Source:*** CERS
Violation Program: HW ***Violation Division:*** Los Angeles County Fire Department
Citation: HSC 6.5 Multiple Sections - California Health and Safety Code, Chapter 6.5, Section(s) Multiple Sections
Violation Notes:

Returned to compliance on 11/03/2015. OBSERVATION: Bulk storage containers with secondary containment are not being emptied out daily and are being used for storage purpose and not for accidental discharge. Observed 2 x 55 gallon drum of used oil on secondary containment pallet filled up approximately half way.

Violation Description:

Haz Waste Generator Program - Operations/Maintenance - General

Violations

Violation Date: 09/25/2015 ***Violation Source:*** CERS
Violation Program: HMRRP ***Violation Division:*** Los Angeles County Fire Department
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Notes:

Returned to compliance on 09/26/2016. OBSERVATION: The facility has not submitted the Hazardous Materials Inventory Chemical Description page for: 1 x 500 gallon of ATF 3 x 25 gallon of part washer solvent to the CUPA. CORRECTIVE ACTION: Complete and submit the Hazardous Materials Inventory Chemical Description page for all materials listed above electronically in the California Environmental Reporting System (CERS).

Violation Description:

Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violations

Violation Date: 09/25/2015 ***Violation Source:*** CERS
Violation Program: HW ***Violation Division:*** Los Angeles County Fire Department
Citation: 22 CCR 16 66266.130 - California Code of Regulations, Title 22, Chapter 16, Section(s) 66266.130
Violation Notes:

Returned to compliance on 11/03/2015. OBSERVATION: Generator failed to properly handle, manage, label, and/or recycle used oil and fuel filters. Observed 3 x 55 gallon filter drums in tank room. One fitler drum labeled, other two missing labels. CORRECTIVE ACTION: Owner/Operator shall immediatly comply with the Title 22 regulations with regards to the proper handling, management, labeling and recycling of used oil and fuel filters. Verify compliance with the CUPA within [# days].

Violation Description:

Failure to properly handle, manage, label, and recycle used oil and fuel filters.

Violations

Violation Date: 09/25/2015 ***Violation Source:*** CERS
Violation Program: HW ***Violation Division:*** Los Angeles County Fire Department
Citation: 22 CCR 12 66262.20 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.20
Violation Notes:

Returned to compliance on 11/03/2015. OBSERVATION: Provide manifest(s) for the transport of sump sludge to a hazardous waste for off-site transfer, treatment, storage or disposal as required. There were no manifest available for sump sludge in clarifier or any documentation showing the clarifier were checked and not in need of pick up at this time. CORRECTIVE ACTION: The Owner/Operator shall properly prepare manifests for any transport of a hazardous waste for off-site transfer, treatment, storage or disposal going forward. Provide a copy of a prepared manifest to the CUPA to verify compliance.

Violation Description:

Failure to prepare a hazardous waste manifest for the transport of a hazardous waste for off-site transfer, treatment, storage, or disposal.

Violations

Violation Date: 09/25/2015
Violation Source: CERS
Violation Program: HW
Violation Division: Los Angeles County Fire Department
Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Notes:

Returned to compliance on 11/03/2015. Provide documents showing drain located inside the tank room is connected to a clarifier or other approved collection device.

Violation Description:

Haz Waste Generator Program - Release/Leaks/Spills - General

Violations

Violation Date: 09/25/2015
Violation Source: CERS
Violation Program: HW
Violation Division: Los Angeles County Fire Department
Citation: 22 CCR 15 66265.195(a) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.195(a)
Violation Notes:

Returned to compliance on 11/03/2015. OBSERVATION: Facility missing daily inspection log for september 2015. The owner/operator shall inspect, and document, where present, at least once each operating day: 1) Overfill/spill control equipment; 2) Aboveground portions of the tank system to detect corrosion or releases of water; 3) Data gathered from monitoring and leak-detection equipment; 4) Outside areas of the tank system including secondary containment to detect erosion or signs of releases of hazardous waste; 5) For uncovered tanks, the level of waste in the tank; 6) Cathodic protection if present. Inspection log missing all of september entry. Inspecton to be conducted daily prior to checking off. CORRECTIVE ACTION: Immediately begin daily inspections of the hazardous waste tank system(s), and document the items inspected. Submit a copy of the inspection log for the next 30 days to the CUPA by [date, 30 days from now].

Violation Description:

Failure of the owner or operator to conduct inspections and maintain inspection records at the facility of the following tank equipment:
1) Overfill/spill control equipment (e.g., waste-feed cutoff systems, bypass systems, and drainage systems) to ensure that it is in good working order;
2) The aboveground portions of the tank system, if any, to detect corrosion or releases of waste;
3) Data gathered from monitoring equipment and leak-detection equipment, (e.g., pressure and temperature gauges, monitoring wells) to ensure that the tank system is being operated according to its design;
4) The construction materials and the area immediately surrounding the externally accessible portion of the tank system including secondary containment structures (e.g., dikes) to detect erosion or signs of releases of hazardous waste (e.g., wet spots, dead vegetation); and
5) For uncovered tanks, the level of waste in the tank, to ensure compliance with section 66265.194(b)(3).

Cleanup Status: CERTIFIED / OPERATION & MAINTENANCE AS OF 5/11/2021
Cleanup Oversight Agencies: DTSC - SITE CLEANUP PROGRAM - LEAD AGENCY
Site Type: STATE RESPONSE OR NPL
Office: CLEANUP CHATSWORTH
Past Use that Caused Contam: EQUIPMENT/INSTRUMENT REPAIR, JUNKYARD, RECYCLING - OTHER, RECYCLING - SCRAP METAL, TRANSFORMER REPAIR
Potential Media Affected: AQUIFER USED FOR DRINKING WATER SUPPLY AFFECTED, SOIL
Potential Contamin of Concern:

DIOXIN (AS 2,3,7,8-TCDD TEQ)
POLYCHLORINATED BIPHENYLS (PCBS)
VOLATILE ORGANICS (8260B VOCS)

Site History:

The property is located at 8226 East Whittier Boulevard in Pico Rivera, California, bounded by Whittier Boulevard on the north, Van Norman Road on the west, the Union Pacific Railroad (UPRR) 12-15-foot elevated tracks on the south.

The Site is largely flat, at an elevation of approximately 170 feet above mean sea level, in an urbanized alluvial plain in the Los Angeles Basin. The Site is surrounded to the west and south by industrial facilities and to the north by small business, residences and a church.

From 1948 to the 1980s, REEC and its predecessor(s) reclaimed copper from the cores of used electrical transformers. Used old or surplus transformers were obtained from entities, including but not limited to, utility companies, municipalities and the federal government. On occasion, oils from transformers were released into the environment as the transformers were handled, reclaimed and/or stored.
Because of operations at the former facility, surface and subsurface soils were impacted with hazardous wastes such as polychlorinated biphenyls (PCBs), petroleum hydrocarbons, volatile organic compounds (VOCs), metals, dioxins and furans. These compounds were found in different matrix media as result of waste discharge to the surface. Previously investigations performed at the former Facility associated the presence of these compounds in different matrix media to oils from transformers formerly serviced at the site, maintenance activities and fugitive dust from on-site furnaces used to remove materials from recyclables.

Transformers were handled and stored on and adjacent to the former unpaved area located in the southeastern quadrant of the former Facility. Recycling furnaces were located approximately 70 feet (ft.) from the southeastern quadrant of the former Facility.
REEC relocated its operation from the Site in 2008. On or about July 6, 2010, the REEC's property was sold to Whittier Pine LLC by TC Pan (Whittier Pine LLC) and leased to Pacific Eagle Construction Supply Inc. (Pacific Eagle). Currently, the Site is used as a storage yard and staging area.

Site Regulatory History Regarding to the Presence of PCBs at the Site:

• From April 2, 1975 to March 30, 1983, City of Pico Rivera issued three Notices of Violations and Orders to Comply to the facility.

• On April 7, 1975, Los Angeles Regional Water Quality Control Board (LARWQCB) notified RECC that discharges of water used to cool transformers during copper recovery operations into an adjacent drainage ditch was not in accordance with the California Water Code.

• On April 6, 1981, Department of County Engineer – Facilities Sanitation Division issued an investigation report that wastewater from transformer washing operation was been discharged to the ground.

• On July 8, 1981, County of Los Angeles, Office of the District Attorney, Consumer and Environment Protection Division, notified the facility that the County of Los Angeles would file a lawsuit against REEC due multiple violations of Section 17200 of the California Business and Professions Code and have indicated that soil samples collected at the facility reported concentrations of PCBs ranging from 92 to 21,000 mg/kg.

• On January 10, 1984, USEPA, Region 9, issued a Toxic Substances Control Act (TSCA) PCB Investigation Report. The report indicated potential violations according to 40 CFR 761.180, since no annual document had been prepared for 1981, 1982 and 1983 covering shipments of PCB-contaminated soil and PCB capacitors.

• On March 27, 1984, County of Los Angeles, Department of Health Services issued a letter directing the facility to comply with California Health and Safety Code (HSC) sections 25189 and 25191.

• On June 22, 1984, State of California- Health and Welfare Agency, Department of Health Services issued a Notice of Violation and Directive to Comply to the facility.

• On January 1986, State of California- Health and Welfare Agency, Department of Health Services issued a Preliminary Assessment Summary. This document indicated that was unknown whether the Site had been adequately assessed for removal of contaminated soils. Off-site subsurface contamination was assessed as potentially extensive because of the facility's historical discharges of wastewater into the unlined Arroyo Ditch.

• On June 17, 1986, Ecology and Environment performed a site inspection under USEPA contract no. 68-01-6692. Inspection recommendations

included referral of the Site to the United States Environmental Protection Agency (USEPA)'s enforcement section for possible TSCA violations, and referral to the local Health Department for additional sampling activities.

• On May 5, 1993, DTSC assumed lead agency status for REEC facility based on the fact there is known groundwater contamination and LARWQCB refused to accept oversight alleging that the environmental concerns at the subject property was more related to exposures and potential risk from soil and equipment contaminations, not groundwater concerns.

• On February 2, 1996, DTSC issued an Imminent and Substantial Endangerment Determination and Order and Remedial Action Order's (I&SE-RAO), Docket No. I&SE-RAO 05/06-002 to the Respondent (REEC). The purpose of this Order was to ensure that any release or threatened release of hazardous substances to the air, soil, surface water and ground water at or from the Site would be thoroughly investigated and that a plan to take appropriate removal/remedial actions would be prepared. DTSC alleged that the Responsible Party (REEC) and several other parties were potentially responsible for the contamination of the Site.

• From August 1997 through August 1999, a formal remedial investigation (RI) was conducted at the Site. Results from the RI indicated that the lateral and vertical extent of PCBs-impacted soil in the former unpaved area in the southeast quadrant was consistent with localized releases from previous operations at the facility. Released oil containing PCBs locally infiltrated the former unpaved area and seeped vertically into the deeper sandy soil vadose zone. The RI data indicated that the vertical distribution of PCBs with concentrations above 10 mg/kg extended to 60 feet below grade surface (bgs) near monitoring well RMW-2 and boring BD-1 (later converted into monitoring well RDW-1). The presence of PCBs in the porous media at a depth below the ground water was interpreted in the RI as result of past spills at periods of deep groundwater levels, due to recurrent groundwater piezometric elevation fluctuations, consequently, promoting a large smear profile area and inducing downward vertical transport of PCBs.

• The final Remedial Investigation/Feasibility Study (RI/FS) Report was submitted to the DTSC in October 1999, and was approved by the DTSC on June 18, 2000. A Remedial Action Plan (RAP) was submitted to DTSC in August 2003. The remedial actions proposed in the RAP included excavation and removal of PCB contaminated soils beneath specific areas of the Site, installation of an engineered cap, placement of a deed restriction on the property where contamination would be left in place at levels that prevent unrestricted use, and groundwater monitoring. The chosen remedy was implemented on both facility's area of concerns (AOC)#1 (the south-central portion of the former unpaved area located in the southeast corner of the Facility) and AOC#2 (along a surface drainage path adjacent to the south of the RECC's property within the railroad right-of-way). The RAP was approved by DTSC on December 16, 2004.

• On July 19, 2005, DTSC issued an I&SE-RAO, Docket No. I&SE-RAO 95/96-002, to the Respondents: REEC, Aaron Berman, an individual, Berman Steel Company, Pacific Gas and Electric Company, Southern California Edison Company, San Diego Gas and Electric, City of Anaheim, City of Los Angeles Department of Water and Power, City of Pasadena Water and Power Department, Sacramento Municipal Utility District and United States of America, by and through the Defense Logistics Agency. The Order determined that the Respondents must continue interim groundwater monitoring in accordance with DTSC's approved RAP, furnishing a Public Participation Plan, provide a Remedial Design (RD) describing in detail the technical and operational plans for implementation of the Final RAP, implementation of Final RAP, O&M requirements in accordance with the Final RAP and Five-Year Review to review and reevaluate the remedial action after a period of 5 years from the date of completion and every 5 years thereafter.

Because the Site will remain as an industrial parcel for foreseeable future, the Non-Governmental Respondents selected soil excavation of impacted soils at the two areas of concerns, off-site disposal of the unearthed soil materials to permitted facility(s) (landfill), installation of an engineering cap on both areas of concerns (AOCs), placement of a deed restriction on the properties where contamination will be left in place to allow oversight access to conduct groundwater monitoring and restrict beneficial end use. Additionally, long term post-closure groundwater monitoring and maintenance of AOC#1 and AOC#2 engineering caps were recommended to preclude unacceptable impacts to groundwater quality.

• The RAP was implemented from September 2006 through February 2007 and involved the removal and off-site disposal of some of the contaminated soil to permitted facility(s) (landfill). Both AOC#1 and AOC#2 excavation areas were backfilled with clean fill to meet requirements set forth on October 2001 DTSC's fact sheet "Information Advisory – Clean Fill Material", and covered with engineered surface cap.

Following excavation and back filling with clean soil, areas designed as AOCs were covered with an impermeable engineering cap. Final Closure Report was submitted to DTSC in April 2007 and approved in September 2007.

According to 2007 Final Closure Report, construction of AOC#1 engineered cap included final site grading, placement of cap foundation layer, base layer, and asphalt cover and associated drainage structures. Prior to placement of low permeability asphalt material at the areas of concern, a test batch was conducted at the asphalt batch plant and tested for conformance with the design mix and performance specifications. Testing results indicated that batch material met the performance for permeability, but had a lower than desired structural stability. Further, due to narrow space availability for construction within AOC#2, an alternate approach for achieving the cap permeability requirements was implemented. As a result, a double-coat pavement seal was placed over the low permeability mix asphalt in AOC#2. It was assumed that due to AOC#2 is in a non-traffic area, the seal coat would not experience any wear from point surface loads, such as vehicles.

• On October 12, 2009, a Covenant to restrict the use of a limited portion of former REEC property was made by and between Boardwalk Company, LLC (previous Site Owner) and DTSC pursuant to Civil Code section 1471. The restricted areas were located in the areas now generally bounded by a drainage ditch on the east, the northern boundary of the transformer repair building on the north, the machine shop on the west, and the UPRR's Right of Way on the south, containing the area referred to as AOC#).

• On October 28, 2009, a Covenant to restrict the use of property was made by and between the UPRR and DTSC pursuant to Civil Code section 1471. The property is a portion of Covenantor's railroad Right of Way, which is also generally describes as Los Angeles County Assessor's Parcel No. 6348-021-807, containing the area referred to as AOC#2.

• On November 30, 2009, DTSC, Non-Governmental Respondents, Local Governmental Respondents, and Federal Governmental Respondent entered into an Operation and Maintenance Consent Agreement (Consent Agreement), Docket No. HAS-CA 08/09-130, pursuant to HSC sections 25355.59a)(1)

(C), 58009, and 58010, and sections 113(f)(2) and 113(f)(3)(B) of Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). The Consent Agreement directed that the Non-Governmental Respondent shall be responsible for carrying out all activities and obligations determined in the O&M Plan that was submitted to DTSC in April 2007 and approved in September 5, 2007. Among the scheduled activities listed in the O&M Plan; ground water shall be monitored annually; groundwater wells (alternative point of compliance wells) shall be inspected semi-annually; final cover shall be inspected quarterly in the first year, semi-annually in the second and third years, and from the fourth year forward, annually; drainage system inspection shall be conducted on a quarterly basis; and the Non-Governmental Respondents shall review and reevaluate the remedial action after a period of 5 years from the date of completion and every 5 years thereafter.

• On June 15, 2010, DTSC issued a Removal Action Certification Form. DTSC determined that all appropriate removal/remedial action were completed and that all acceptable engineering practices implemented; however, the Site requires ongoing O&M and monitoring efforts according to the approved 2009 O&M Plan. O&M activities have been performed at the Site pursuant to 2005 I&SE-RAO and 2009 Consent Agreement, which includes annual groundwater monitoring, maintenance of groundwater monitoring systems, inspection and maintenance of the engineered asphalt cap, monitoring and maintenance of settlement monuments and drainage system inspection and maintenance, as well as associated reporting to DTSC. Alternative point of compliance wells have been monitored since 1999 and O&M activities, including post-closure monitoring and maintenance of AOC#1 and AOC#2, have been performed at the Site since February 2007, subsequent to completion of PCBs impacted soils removal and AOC capping activities.

Alternative point of compliance wells consist of five (5) monitoring wells. RMW-2 is located within the limits of the AOC#1 capped area. RMW-4 is located just beyond the southwestern facility boundary. RMW-5 is located to the southwest of the former Facility, south of RMW-4 and approximately 340 ft. from RMW-2. RMW-6 is located just beyond the northwestern facility boundary. RMW-7 is located approximately 320 ft. beyond the south.

Based on the information provided in the 2016 FYR Report, DTSC has concurred with the Non-Governmental Respondents' determination that: (i) the implemented remedy continues to be protective of human health; and (ii) the asphalt cover installed in the AOC#1 is currently preventing surface water infiltration that would promote/enhance percolation of chemical of concerns that may reside/be present in the unsaturated porous media beneath the asphalt cover.

Asphalt cover installed in AOC#2 was rectified to ensure that the remedy functions as intended. The following repairing actions were conducted at AOC#2: (i) placement of seal coat or binder in a gap between the REEC's southern perimeter wall and the ground surface along the AOC#2 northern limits; (ii) cleaning out gravels/vegetation that have been deposited/grown in the culvert outlets that transect the UPRR elevated rail track adjacent to the AOC#2 southern limits; and (iii) resealing the asphalt cover 2.

Groundwater elevations have decreased to levels below the alternative point of compliance (POC) monitoring wells' screens. Since 2014 this has prevented the Non-Governmental Respondents from collecting environmental groundwater samples to determine whether the remedy's objectives of protecting groundwater quality are being met.

Comments: LA County referred site to DTSC for state oversight on March 3, 1993. The county was responsible for the oversight of investigations over the last three years. The referral is based on the state's experience with GW investigations. Investigations indicate soil contamiantion as high as 2400 ppm, 17 ppb of PCB degredation products (ie. 1,4 - dichloro- benzene) in GW, and C12-C30 chains of oil as deep as twenty feet bgs in the saturated zone.

Sub Area:
Sub Area Link:
Document Type: Operation and Maintenance Report
Date Completed: 1/29/2014
Comments: During calendar year 2013, inspections were performed at the Site on March 26, June 28, September 10 and December 10. Other activities performed during the 2013 calendar year included groundwater monitoring on March 15 and 16, 2012 and surveying of settlement markers on September 10, 2013.
During the groundwater monitoring event in March 2013, only the monitoring well RMW-2 had sufficient groundwater for purging and sample collection; wells RMW-4 through RMW-7 yielded insufficient water, therefore, they were not able to be sample during this event.

Potential Media Affected: AQUIFER USED FOR DRINKING WATER SUPPLY AFFECTED, SOIL
Potential Contamin of Concern:

DIOXIN (AS 2,3,7,8-TCDD TEQ)
POLYCHLORINATED BIPHENYLS (PCBS)
VOLATILE ORGANICS (8260B VOCS)

Site History:

The property is located at 8226 East Whittier Boulevard in Pico Rivera, California, bounded by Whittier Boulevard on the north, Van Norman Road on the west, the Union Pacific Railroad (UPRR) 12-15-foot elevated tracks on the south.

The Site is largely flat, at an elevation of approximately 170 feet above mean sea level, in an urbanized alluvial plain in the Los Angeles Basin. The Site is surrounded to the west and south by industrial facilities and to the north by small business, residences and a church.

From 1948 to the 1980s, REEC and its predecessor(s) reclaimed copper from the cores of used electrical transformers. Used old or surplus transformers were obtained from entities, including but not limited to, utility companies, municipalities and the federal government. On occasion, oils from transformers were released into the environment as the transformers were handled, reclaimed and/or stored.
Because of operations at the former facility, surface and subsurface soils were impacted with hazardous wastes such as polychlorinated biphenyls

(PCBs), petroleum hydrocarbons, volatile organic compounds (VOCs), metals, dioxins and furans. These compounds were found in different matrix media as result of waste discharge to the surface. Previously investigations performed at the former Facility associated the presence of these compounds in different matrix media to oils from transformers formerly serviced at the site, maintenance activities and fugitive dust from on-site furnaces used to remove materials from recyclables.

Transformers were handled and stored on and adjacent to the former unpaved area located in the southeastern quadrant of the former Facility. Recycling furnaces were located approximately 70 feet (ft.) from the southeastern quadrant of the former Facility.
REEC relocated its operation from the Site in 2008. On or about July 6, 2010, the REEC's property was sold to Whittier Pine LLC by TC Pan (Whittier Pine LLC) and leased to Pacific Eagle Construction Supply Inc. (Pacific Eagle). Currently, the Site is used as a storage yard and staging area.

Site Regulatory History Regarding to the Presence of PCBs at the Site:

• From April 2, 1975 to March 30, 1983, City of Pico Rivera issued three Notices of Violations and Orders to Comply to the facility.

• On April 7, 1975, Los Angeles Regional Water Quality Control Board (LARWQCB) notified RECC that discharges of water used to cool transformers during copper recovery operations into an adjacent drainage ditch was not in accordance with the California Water Code.

• On April 6, 1981, Department of County Engineer – Facilities Sanitation Division issued an investigation report that wastewater from transformer washing operation was been discharged to the ground.

• On July 8, 1981, County of Los Angeles, Office of the District Attorney, Consumer and Environment Protection Division, notified the facility that the County of Los Angeles would file a lawsuit against REEC due multiple violations of Section 17200 of the California Business and Professions Code and have indicated that soil samples collected at the facility reported concentrations of PCBs ranging from 92 to 21,000 mg/kg.

• On January 10, 1984, USEPA, Region 9, issued a Toxic Substances Control Act (TSCA) PCB Investigation Report. The report indicated potential violations according to 40 CFR 761.180, since no annual document had been prepared for 1981, 1982 and 1983 covering shipments of PCB-contaminated soil and PCB capacitors.

• On March 27, 1984, County of Los Angeles, Department of Health Services issued a letter directing the facility to comply with California Health and Safety Code (HSC) sections 25189 and 25191.

• On June 22, 1984, State of California- Health and Welfare Agency, Department of Health Services issued a Notice of Violation and Directive to Comply to the facility.

• On January 1986, State of California- Health and Welfare Agency, Department of Health Services issued a Preliminary Assessment Summary. This document indicated that was unknown whether the Site had been adequately assessed for removal of contaminated soils. Off-site subsurface contamination was assessed as potentially extensive because of the facility's historical discharges of wastewater into the unlined Arroyo Ditch.

• On June 17, 1986, Ecology and Environment performed a site inspection under USEPA contract no. 68-01-6692. Inspection recommendations included referral of the Site to the United States Environmental Protection Agency (USEPA)'s enforcement section for possible TSCA violations, and referral to the local Health Department for additional sampling activities.

• On May 5, 1993, DTSC assumed lead agency status for REEC facility based on the fact there is known groundwater contamination and LARWQCB refused to accept oversight alleging that the environmental concerns at the subject property was more related to exposures and potential risk from soil and equipment contaminations, not groundwater concerns.

• On February 2, 1996, DTSC issued an Imminent and Substantial Endangerment Determination and Order and Remedial Action Order's (I&SE-RAO), Docket No. I&SE-RAO 05/06-002 to the Respondent (REEC). The purpose of this Order was to ensure that any release or threatened release of hazardous substances to the air, soil, surface water and ground water at or from the Site would be thoroughly investigated and that a plan to take appropriate removal/remedial actions would be prepared. DTSC alleged that the Responsible Party (REEC) and several other parties were potentially responsible for the contamination of the Site.

• From August 1997 through August 1999, a formal remedial investigation (RI) was conducted at the Site. Results from the RI indicated that the lateral and vertical extent of PCBs-impacted soil in the former unpaved area in the southeast quadrant was consistent with localized releases from previous operations at the facility. Released oil containing PCBs locally infiltrated the former unpaved area and seeped vertically into the deeper sandy soil vadose zone. The RI data indicated that the vertical distribution of PCBs with concentrations above 10 mg/kg extended to 60 feet below grade surface (bgs) near monitoring well RMW-2 and boring BD-1 (later converted into monitoring well RDW-1). The presence of PCBs in the porous media at a depth below the ground water was interpreted in the RI as result of past spills at periods of deep groundwater levels, due to recurrent groundwater piezometric elevation fluctuations, consequently, promoting a large smear profile area and inducing downward vertical transport of PCBs.

• The final Remedial Investigation/Feasibility Study (RI/FS) Report was submitted to the DTSC in October 1999, and was approved by the DTSC on June 18, 2000. A Remedial Action Plan (RAP) was submitted to DTSC in August 2003. The remedial actions proposed in the RAP included excavation and removal of PCB contaminated soils beneath specific areas of the Site, installation of an engineered cap, placement of a deed restriction on the property where contamination would be left in place at levels that prevent unrestricted use, and groundwater monitoring. The chosen remedy was implemented on both facility's area of concerns (AOC)#1 (the south-central portion of the former unpaved area located in the southeast corner of the Facility) and AOC#2 (along a surface drainage path adjacent to the south of the RECC's property within the railroad right-of-way). The RAP was approved by DTSC on December 16, 2004.

• On July 19, 2005, DTSC issued an I&SE-RAO, Docket No. I&SE-RAO 95/96-002, to the Respondents: REEC, Aaron Berman, an individual, Berman

Steel Company, Pacific Gas and Electric Company, Southern California Edison Company, San Diego Gas and Electric, City of Anaheim, City of Los Angeles Department of Water and Power, City of Pasadena Water and Power Department, Sacramento Municipal Utility District and United States of America, by and through the Defense Logistics Agency. The Order determined that the Respondents must continue interim groundwater monitoring in accordance with DTSC's approved RAP, furnishing a Public Participation Plan, provide a Remedial Design (RD) describing in detail the technical and operational plans for implementation of the Final RAP, implementation of Final RAP, O&M requirements in accordance with the Final RAP and Five-Year Review to review and reevaluate the remedial action after a period of 5 years from the date of completion and every 5 years thereafter.

Because the Site will remain as an industrial parcel for foreseeable future, the Non-Governmental Respondents selected soil excavation of impacted soils at the two areas of concerns, off-site disposal of the unearthed soil materials to permitted facility(s) (landfill), installation of an engineering cap on both areas of concerns (AOCs), placement of a deed restriction on the properties where contamination will be left in place to allow oversight access to conduct groundwater monitoring and restrict beneficial end use. Additionally, long term post-closure groundwater monitoring and maintenance of AOC#1 and AOC#2 engineering caps were recommended to preclude unacceptable impacts to groundwater quality.

• The RAP was implemented from September 2006 through February 2007 and involved the removal and off-site disposal of some of the contaminated soil to permitted facility(s) (landfill). Both AOC#1 and AOC#2 excavation areas were backfilled with clean fill to meet requirements set forth on October 2001 DTSC's fact sheet "Information Advisory – Clean Fill Material", and covered with engineered surface cap.

Following excavation and back filling with clean soil, areas designed as AOCs were covered with an impermeable engineering cap. Final Closure Report was submitted to DTSC in April 2007 and approved in September 2007.

According to 2007 Final Closure Report, construction of AOC#1 engineered cap included final site grading, placement of cap foundation layer, base layer, and asphalt cover and associated drainage structures. Prior to placement of low permeability asphalt material at the areas of concern, a test batch was conducted at the asphalt batch plant and tested for conformance with the design mix and performance specifications. Testing results indicated that batch material met the performance for permeability, but had a lower than desired structural stability. Further, due to narrow space availability for construction within AOC#2, an alternate approach for achieving the cap permeability requirements was implemented. As a result, a double-coat pavement seal was placed over the low permeability mix asphalt in AOC#2. It was assumed that due to AOC#2 is in a non-traffic area, the seal coat would not experience any wear from point surface loads, such as vehicles.

• On October 12, 2009, a Covenant to restrict the use of a limited portion of former REEC property was made by and between Boardwalk Company, LLC (previous Site Owner) and DTSC pursuant to Civil Code section 1471. The restricted areas were located in the areas now generally bounded by a drainage ditch on the east, the northern boundary of the transformer repair building on the north, the machine shop on the west, and the UPRR's Right of Way on the south, containing the area referred to as AOC#).

• On October 28, 2009, a Covenant to restrict the use of property was made by and between the UPRR and DTSC pursuant to Civil Code section 1471. The property is a portion of Covenantor's railroad Right of Way, which is also generally describes as Los Angeles County Assessor's Parcel No. 6348-021-807, containing the area referred to as AOC#2.

• On November 30, 2009, DTSC, Non-Governmental Respondents, Local Governmental Respondents, and Federal Governmental Respondent entered into an Operation and Maintenance Consent Agreement (Consent Agreement), Docket No. HAS-CA 08/09-130, pursuant to HSC sections 25355.59a)(1)(C), 58009, and 58010, and sections 113(f)(2) and 113(f)(3)(B) of Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). The Consent Agreement directed that the Non-Governmental Respondent shall be responsible for carrying out all activities and obligations determined in the O&M Plan that was submitted to DTSC in April 2007 and approved in September 5, 2007. Among the scheduled activities listed in the O&M Plan; ground water shall be monitored annually; groundwater wells (alternative point of compliance wells) shall be inspected semi-annually; final cover shall be inspected quarterly in the first year, semi-annually in the second and third years, and from the fourth year forward, annually; drainage system inspection shall be conducted on a quarterly basis; and the Non-Governmental Respondents shall review and reevaluate the remedial action after a period of 5 years from the date of completion and every 5 years thereafter.

• On June 15, 2010, DTSC issued a Removal Action Certification Form. DTSC determined that all appropriate removal/remedial action were completed and that all acceptable engineering practices implemented; however, the Site requires ongoing O&M and monitoring efforts according to the approved 2009 O&M Plan. O&M activities have been performed at the Site pursuant to 2005 I&SE-RAO and 2009 Consent Agreement, which includes annual groundwater monitoring, maintenance of groundwater monitoring systems, inspection and maintenance of the engineered asphalt cap, monitoring and maintenance of settlement monuments and drainage system inspection and maintenance, as well as associated reporting to DTSC. Alternative point of compliance wells have been monitored since 1999 and O&M activities, including post-closure monitoring and maintenance of AOC#1 and AOC#2, have been performed at the Site since February 2007, subsequent to completion of PCBs impacted soils removal and AOC capping activities.

Alternative point of compliance wells consist of five (5) monitoring wells. RMW-2 is located within the limits of the AOC#1 capped area. RMW-4 is located just beyond the southwestern facility boundary. RMW-5 is located to the southwest of the former Facility, south of RMW-4 and approximately 340 ft. from RMW-2. RMW-6 is located just beyond the northwestern facility boundary. RMW-7 is located approximately 320 ft. beyond the south.

Based on the information provided in the 2016 FYR Report, DTSC has concurred with the Non-Governmental Respondents' determination that: (i) the implemented remedy continues to be protective of human health; and (ii) the asphalt cover installed in the AOC#1 is currently preventing surface water infiltration that would promote/enhance percolation of chemical of concerns that may reside/be present in the unsaturated porous media beneath the asphalt cover.

Asphalt cover installed in AOC#2 was rectified to ensure that the remedy functions as intended. The following repairing actions were conducted at AOC#2: (i) placement of seal coat or binder in a gap between the REEC's southern perimeter wall and the ground surface along the AOC#2 northern limits; (ii) cleaning out gravels/vegetation that have been deposited/grown in the culvert outlets that transect the UPRR elevated rail track adjacent to the AOC#2 southern limits; and (iii) resealing the asphalt cover 2.

Groundwater elevations have decreased to levels below the alternative point of compliance (POC) monitoring wells' screens. Since 2014 this has

prevented the Non-Governmental Respondents from collecting environmental groundwater samples to determine whether the remedy's objectives of protecting groundwater quality are being met.

Document Type: Operation and Maintenance Report
Date Completed: 1/29/2014
Comments: During calendar year 2013, inspections were performed at the Site on March 26, June 28, September 10 and December 10. Other activities performed during the 2013 calendar year included groundwater monitoring on March 15 and 16, 2012 and surveying of settlement markers on September 10, 2013.
During the groundwater monitoring event in March 2013, only the monitoring well RMW-2 had sufficient

groundwater for purging and sample collection; wells RMW-4 through RMW-7 yielded insufficient water, therefore, they were not able to be sample during this event.

Sub Area Link:
Document Type: Site Screening
Date Completed: 7/28/1993
Comments: LA County referred site to DTSC for state oversight on March 3, 1993. The county was responsible for the oversight of investigations over the last three years. The referral is based on the state's experience with GW investigations. Investigations indicate soil contamiantion as high as 2400 ppm, 17 ppb of PCB degredation products (ie. 1,4 - dichloro- benzene) in GW, and C12-C30 chains of oil as deep as twenty feet bgs in the saturated zone.

Potential Contaminants:

DIOXIN (AS 2,3,7,8-TCDD TEQ)
POLYCHLORINATED BIPHENYLS (PCBS)
VOLATILE ORGANICS (8260B VOCS)

Site History:

The property is located at 8226 East Whittier Boulevard in Pico Rivera, California, bounded by Whittier Boulevard on the north, Van Norman Road on the west, the Union Pacific Railroad (UPRR) 12-15-foot elevated tracks on the south.

The Site is largely flat, at an elevation of approximately 170 feet above mean sea level, in an urbanized alluvial plain in the Los Angeles Basin. The Site is surrounded to the west and south by industrial facilities and to the north by small business, residences and a church.

From 1948 to the 1980s, REEC and its predecessor(s) reclaimed copper from the cores of used electrical transformers. Used old or surplus transformers were obtained from entities, including but not limited to, utility companies, municipalities and the federal government. On occasion, oils from transformers were released into the environment as the transformers were handled, reclaimed and/or stored.
Because of operations at the former facility, surface and subsurface soils were impacted with hazardous wastes such as polychlorinated biphenyls (PCBs), petroleum hydrocarbons, volatile organic compounds (VOCs), metals, dioxins and furans. These compounds were found in different matrix media as result of waste discharge to the surface. Previously investigations performed at the former Facility associated the presence of these compounds in different matrix media to oils from transformers formerly serviced at the site, maintenance activities and fugitive dust from on-site furnaces used to remove materials from recyclables.

Transformers were handled and stored on and adjacent to the former unpaved area located in the southeastern quadrant of the former Facility. Recycling furnaces were located approximately 70 feet (ft.) from the southeastern quadrant of the former Facility.
REEC relocated its operation from the Site in 2008. On or about July 6, 2010, the REEC's property was sold to Whittier Pine LLC by TC Pan (Whittier Pine LLC) and leased to Pacific Eagle Construction Supply Inc. (Pacific Eagle). Currently, the Site is used as a storage yard and staging area.

Site Regulatory History Regarding to the Presence of PCBs at the Site:

• From April 2, 1975 to March 30, 1983, City of Pico Rivera issued three Notices of Violations and Orders to Comply to the facility.

• On April 7, 1975, Los Angeles Regional Water Quality Control Board (LARWQCB) notified RECC that discharges of water used to cool transformers during copper recovery operations into an adjacent drainage ditch was not in accordance with the California Water Code.

• On April 6, 1981, Department of County Engineer – Facilities Sanitation Division issued an investigation report that wastewater from transformer washing operation was been discharged to the ground.

• On July 8, 1981, County of Los Angeles, Office of the District Attorney, Consumer and Environment Protection Division, notified the facility that the County of Los Angeles would file a lawsuit against REEC due multiple violations of Section 17200 of the California Business and Professions Code and have indicated that soil samples collected at the facility reported concentrations of PCBs ranging from 92 to 21,000 mg/kg.

• On January 10, 1984, USEPA, Region 9, issued a Toxic Substances Control Act (TSCA) PCB Investigation Report. The report indicated potential violations according to 40 CFR 761.180, since no annual document had been prepared for 1981, 1982 and 1983 covering shipments of PCB-contaminated soil and PCB capacitors.

• On March 27, 1984, County of Los Angeles, Department of Health Services issued a letter directing the facility to comply with California Health and Safety Code (HSC) sections 25189 and 25191.

• On June 22, 1984, State of California- Health and Welfare Agency, Department of Health Services issued a Notice of Violation and Directive to Comply to the facility.

• On January 1986, State of California- Health and Welfare Agency, Department of Health Services issued a Preliminary Assessment Summary. This document indicated that was unknown whether the Site had been adequately assessed for removal of contaminated soils. Off-site subsurface contamination was assessed as potentially extensive because of the facility's historical discharges of wastewater into the unlined Arroyo Ditch.

• On June 17, 1986, Ecology and Environment performed a site inspection under USEPA contract no. 68-01-6692. Inspection recommendations included referral of the Site to the United States Environmental Protection Agency (USEPA)'s enforcement section for possible TSCA violations, and referral to the local Health Department for additional sampling activities.

• On May 5, 1993, DTSC assumed lead agency status for REEC facility based on the fact there is known groundwater contamination and LARWQCB refused to accept oversight alleging that the environmental concerns at the subject property was more related to exposures and potential risk from soil and equipment contaminations, not groundwater concerns.

• On February 2, 1996, DTSC issued an Imminent and Substantial Endangerment Determination and Order and Remedial Action Order's (I&SE-RAO), Docket No. I&SE-RAO 05/06-002 to the Respondent (REEC). The purpose of this Order was to ensure that any release or threatened release of hazardous substances to the air, soil, surface water and ground water at or from the Site would be thoroughly investigated and that a plan to take appropriate removal/remedial actions would be prepared. DTSC alleged that the Responsible Party (REEC) and several other parties were potentially responsible for the contamination of the Site.

• From August 1997 through August 1999, a formal remedial investigation (RI) was conducted at the Site. Results from the RI indicated that the lateral and vertical extent of PCBs-impacted soil in the former unpaved area in the southeast quadrant was consistent with localized releases from previous operations at the facility. Released oil containing PCBs locally infiltrated the former unpaved area and seeped vertically into the deeper sandy soil vadose zone. The RI data indicated that the vertical distribution of PCBs with concentrations above 10 mg/kg extended to 60 feet below grade surface (bgs) near monitoring well RMW-2 and boring BD-1 (later converted into monitoring well RDW-1). The presence of PCBs in the porous media at a depth below the ground water was interpreted in the RI as result of past spills at periods of deep groundwater levels, due to recurrent groundwater piezometric elevation fluctuations, consequently, promoting a large smear profile area and inducing downward vertical transport of PCBs.

• The final Remedial Investigation/Feasibility Study (RI/FS) Report was submitted to the DTSC in October 1999, and was approved by the DTSC on June 18, 2000. A Remedial Action Plan (RAP) was submitted to DTSC in August 2003. The remedial actions proposed in the RAP included excavation and removal of PCB contaminated soils beneath specific areas of the Site, installation of an engineered cap, placement of a deed restriction on the property where contamination would be left in place at levels that prevent unrestricted use, and groundwater monitoring. The chosen remedy was implemented on both facility's area of concerns (AOC)#1 (the south-central portion of the former unpaved area located in the southeast corner of the Facility) and AOC#2 (along a surface drainage path adjacent to the south of the RECC's property within the railroad right-of-way). The RAP was approved by DTSC on December 16, 2004.

• On July 19, 2005, DTSC issued an I&SE-RAO, Docket No. I&SE-RAO 95/96-002, to the Respondents: REEC, Aaron Berman, an individual, Berman Steel Company, Pacific Gas and Electric Company, Southern California Edison Company, San Diego Gas and Electric, City of Anaheim, City of Los Angeles Department of Water and Power, City of Pasadena Water and Power Department, Sacramento Municipal Utility District and United States of America, by and through the Defense Logistics Agency. The Order determined that the Respondents must continue interim groundwater monitoring in accordance with DTSC's approved RAP, furnishing a Public Participation Plan, provide a Remedial Design (RD) describing in detail the technical and operational plans for implementation of the Final RAP, implementation of Final RAP, O&M requirements in accordance with the Final RAP and Five-Year Review to review and reevaluate the remedial action after a period of 5 years from the date of completion and every 5 years thereafter.

Because the Site will remain as an industrial parcel for foreseeable future, the Non-Governmental Respondents selected soil excavation of impacted soils at the two areas of concerns, off-site disposal of the unearthed soil materials to permitted facility(s) (landfill), installation of an engineering cap on both areas of concerns (AOCs), placement of a deed restriction on the properties where contamination will be left in place to allow oversight access to conduct groundwater monitoring and restrict beneficial end use. Additionally, long term post-closure groundwater monitoring and maintenance of AOC#1 and AOC#2 engineering caps were recommended to preclude unacceptable impacts to groundwater quality.

• The RAP was implemented from September 2006 through February 2007 and involved the removal and off-site disposal of some of the contaminated soil to permitted facility(s) (landfill). Both AOC#1 and AOC#2 excavation areas were backfilled with clean fill to meet requirements set forth on October 2001 DTSC's fact sheet "Information Advisory – Clean Fill Material", and covered with engineered surface cap.

Following excavation and back filling with clean soil, areas designed as AOCs were covered with an impermeable engineering cap. Final Closure Report was submitted to DTSC in April 2007 and approved in September 2007.

According to 2007 Final Closure Report, construction of AOC#1 engineered cap included final site grading, placement of cap foundation layer, base layer, and asphalt cover and associated drainage structures. Prior to placement of low permeability asphalt material at the areas of concern, a test batch was conducted at the asphalt batch plant and tested for conformance with the design mix and performance specifications. Testing results indicated that batch material met the performance for permeability, but had a lower than desired structural stability. Further, due to narrow space availability for construction within AOC#2, an alternate approach for achieving the cap permeability requirements was implemented. As a result, a double-coat pavement seal was placed over the low permeability mix asphalt in AOC#2. It was assumed that due to AOC#2 is in a non-traffic area, the seal coat would not experience any wear from point surface loads, such as vehicles.

• On October 12, 2009, a Covenant to restrict the use of a limited portion of former REEC property was made by and between Boardwalk Company, LLC (previous Site Owner) and DTSC pursuant to Civil Code section 1471. The restricted areas were located in the areas now generally bounded by a drainage ditch on the east, the northern boundary of the transformer repair building on the north, the machine shop on the west, and the UPRR's Right of Way on the south, containing the area referred to as AOC#).

• On October 28, 2009, a Covenant to restrict the use of property was made by and between the UPRR and DTSC pursuant to Civil Code section 1471. The property is a portion of Covenantor's railroad Right of Way, which is also generally describes as Los Angeles County Assessor's Parcel No. 6348-021-807, containing the area referred to as AOC#2.

• On November 30, 2009, DTSC, Non-Governmental Respondents, Local Governmental Respondents, and Federal Governmental Respondent entered into an Operation and Maintenance Consent Agreement (Consent Agreement), Docket No. HAS-CA 08/09-130, pursuant to HSC sections 25355.59a)(1)(C), 58009, and 58010, and sections 113(f)(2) and 113(f)(3)(B) of Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). The Consent Agreement directed that the Non-Governmental Respondent shall be responsible for carrying out all activities and obligations determined in the O&M Plan that was submitted to DTSC in April 2007 and approved in September 5, 2007. Among the scheduled activities listed in the O&M Plan; ground water shall be monitored annually; groundwater wells (alternative point of compliance wells) shall be inspected semi-annually; final cover shall be inspected quarterly in the first year, semi-annually in the second and third years, and from the fourth year forward, annually; drainage system inspection shall be conducted on a quarterly basis; and the Non-Governmental Respondents shall review and reevaluate the remedial action after a period of 5 years from the date of completion and every 5 years thereafter.

• On June 15, 2010, DTSC issued a Removal Action Certification Form. DTSC determined that all appropriate removal/remedial action were completed and that all acceptable engineering practices implemented; however, the Site requires ongoing O&M and monitoring efforts according to the approved 2009 O&M Plan. O&M activities have been performed at the Site pursuant to 2005 I&SE-RAO and 2009 Consent Agreement, which includes annual groundwater monitoring, maintenance of groundwater monitoring systems, inspection and maintenance of the engineered asphalt cap, monitoring and maintenance of settlement monuments and drainage system inspection and maintenance, as well as associated reporting to DTSC. Alternative point of compliance wells have been monitored since 1999 and O&M activities, including post-closure monitoring and maintenance of AOC#1 and AOC#2, have been performed at the Site since February 2007, subsequent to completion of PCBs impacted soils removal and AOC capping activities.

Alternative point of compliance wells consist of five (5) monitoring wells. RMW-2 is located within the limits of the AOC#1 capped area. RMW-4 is located just beyond the southwestern facility boundary. RMW-5 is located to the southwest of the former Facility, south of RMW-4 and approximately 340 ft. from RMW-2. RMW-6 is located just beyond the northwestern facility boundary. RMW-7 is located approximately 320 ft. beyond the south.

Based on the information provided in the 2016 FYR Report, DTSC has concurred with the Non-Governmental Respondents' determination that: (i) the implemented remedy continues to be protective of human health; and (ii) the asphalt cover installed in the AOC#1 is currently preventing surface water infiltration that would promote/enhance percolation of chemical of concerns that may reside/be present in the unsaturated porous media beneath the asphalt cover.

Asphalt cover installed in AOC#2 was rectified to ensure that the remedy functions as intended. The following repairing actions were conducted at AOC#2: (i) placement of seal coat or binder in a gap between the REEC's southern perimeter wall and the ground surface along the AOC#2 northern limits; (ii) cleaning out gravels/vegetation that have been deposited/grown in the culvert outlets that transect the UPRR elevated rail track adjacent to the AOC#2 southern limits; and (iii) resealing the asphalt cover 2.

Groundwater elevations have decreased to levels below the alternative point of compliance (POC) monitoring wells' screens. Since 2014 this has prevented the Non-Governmental Respondents from collecting environmental groundwater samples to determine whether the remedy's objectives of protecting groundwater quality are being met.

Title: 2013 Annual Site Report
Title URL: https://www.envirostor.dtsc.ca.gov/public/final_documents2?global_id=19360068&doc_id=60390754
Document Type: Operation and Maintenance Report
Activity Type: Completed Activities
Date Completed: 1/29/2014
Comments: During calendar year 2013, inspections were performed at the Site on March 26, June 28, September 10 and December 10. Other activities performed during the 2013 calendar year included groundwater monitoring on March 15 and 16, 2012 and surveying of settlement markers on September 10, 2013.
During the groundwater monitoring event in March 2013, only the monitoring well RMW-2 had sufficient groundwater for purging and sample collection; wells RMW-4 through RMW-7 yielded insufficient water, therefore, they were not able to be sample during this event.

Comments: LA County referred site to DTSC for state oversight on March 3, 1993. The county was responsible for the oversight of investigations over the last three years. The referral is based on the state's experience with GW investigations. Investigations indicate soil contamiantion as high as 2400 ppm, 17 ppb of PCB degredation products (ie. 1,4 - dichloro- benzene) in GW, and C12-C30 chains of oil as deep as twenty feet bgs in the saturated zone.
